## 2005 Ag Chemical Dealer Updates

Crop production changes at a rapid pace. New products, label revisions, regulatory requirements, soil nutrient recommendations--just some of the items you need to stay up-to-date on to better serve your customers. The Ag Chemical Dealer Updates are designed to do just that.

[1]

Attendees listen while Iowa State University experts review the previous growing season and prepare seed, chemical, and fertilizer dealers; crop consultants; farm managers; and agronomists for the upcoming growing season. (Jean McGuire)

The Ag Chemical Dealer Updates are intended to deliver the latest crop production recommendations, news and information directly from Iowa State University Extension. Each location features updates on weed, insect, crop disease, and soil nutrient management brought to you by Iowa State University experts. Meetings will review the positives and negatives of the 2005 growing season and prepare seed, chemical, and fertilizer dealers; crop consultants; farm managers; and agronomists for the challenges of the 2006 crop production year.

Each of the nine meetings is also a convenient way to obtain continuing education units for Certified Crop Advisers, as well as recertification for commercial ag pesticide applicators in categories 1A, 1B, 1C, and 10.

The registration fee is \$40 for each location until 7 days before the meeting date. Late registration or registration at the door is \$60. There is an additional \$10 fee for those needing applicator recertification credits.

Brochures will be mailed out mid-October. You can also view the brochure and [register online](#) [2] with your credit card.
