Ag Chemical Dealer Update Meetings Provide Timely Crop Production Information

Abstract
Updates on the latest crop production products and recommendations are the featured topics at meetings sponsored by Iowa State University Extension and Outreach in Iowa City on Nov. 24 and in Ames on Dec. 16. These meetings are an excellent opportunity for ag input providers to meet with extension specialists to review current research, discuss new products and learn of new recommendations.

Ag Chemical Dealer Update Meetings Provide Timely Crop Production Information

October 26, 2015

Updates on the latest crop production products and recommendations are the featured topics at meetings sponsored by Iowa State University Extension and Outreach in Iowa City on Nov. 24 and in Ames on Dec. 16.

These meetings are an excellent opportunity for ag input providers to meet with extension specialists to review current research, discuss new products and learn of new recommendations.

Each location will feature presentations on weed, insect and crop disease management as well as an update on the past growing season. Meetings are approved for Certified Crop Adviser (CCA) credits. In addition, the meetings offer Iowa Commercial Pesticide Applicator recertification in categories 1A, 1B, 1C and 10 for calendar year 2015.
Recertification is included in meeting registration. **Attendance at the entire meeting is required for recertification.**

Early registration is $70 if received by midnight, Nov. 17 (Iowa City) or Dec. 9 (Ames). Late or on-site registration is $85. Visit [www.aep.iastate.edu/acu](http://www.aep.iastate.edu/acu) for program details or to register online. For additional information contact an ISU Extension field agronomist hosting the meeting.
