As distant as it is appeared on television, Mai Mayland never considered it possible to be a victim of sexual assault.

A consistent crime in shows like “Law and Order” — a television drama about law and order — sexual assault is rarely featured. Many people who have been sexually assaulted have never heard the term.

“Sexual assault” was the first phrase that crossed my mind after my assault,” Mayland said.

But how can incidents such as this happen?

Many people have been assaulted and did not understand what they experienced.

Mayland’s assailant, a friend she had known since she was a child, eventually went to see the ISU Police Department and the ISU Sexual Assault Response Team.

“Everyone’s experiences are different,” said Anthony Greiter, officer for the ISU Police Department and community outreach member.

“Every sexual assault is different, and every individual has different needs.”

Alumnus’ research unveils better cattle farming methods

By Jake Dalbey

Sprawling volcanic mountain landscapes, endless beaches and a home to hundreds of hatching penguins. These are some of the many characteristics that define the land of Tasmania, an island located off the coast of Australia.

The system takes into account meat’s fat content, its marbling and its flavor. The system is so consistent that any beef labeled as Tasmania will be of the same high standard.

Although Tasmania is famous for its penguins, the island is an area mostly untouched by the hustle and bustle of modern living. The island is rich with agriculture, and the island’s rigorous meat grading system is a source for the high-quality beef. Because only one-third of the mainland produces the beef, the island’s beef is able to constantly remain at a high standard.

In addition, the island is home to a new concept of farming and meat raising.

“Tasmania has a new, modern, intensive system that is popularly known for a product recognized as the best beef in the world,” Block said.

Unlike many of the cattle farms in the United States, Block said cattle in Tasmania are raised across hundreds of acres of land. This freedom, combined with the low temperature of Tasmania — commonly ranging from 40 to 70 degrees year-round — means Block called the most consistent grass-fed beef in the world.

“Tasmania’s grass is so consistent because it is not complex, meat is able to constantly remain at a high standard.”

While professors can offer valuable insights to students, practicing them is not always advisable. Unsuccessful students may have difficulties understanding the material and learning effectively. Students should reserve their efforts for courses that they feel confident in and for which they enjoy learning. Furthermore, students should be aware of the importance of obtaining the necessary support and guidance to achieve success. In conclusion, while practicing the material is a good way to prepare for examinations, students should be aware of the importance of learning from the material and obtaining the necessary support and guidance to achieve success.
Trump's wall poses serious ramifications for animals in area

By Beth Woodruff

Trump will just mention that overgenerating biodiversity by building a wall will allow for a more comfortable climate, and the wall not only will induce panic for the animals but also for humans. This means that the wall will push the animals away from their natural range blocked by man-made border barriers, according to the Washington Post. The wall Trump intends to build would only worsen this problem.

One relatively significant ramifications of a lack of mobility among animals that have been captured in a lifeless climate is a loss of genetic diversity among the species. Limited genetics could result in the species becoming more susceptible to diseases, and thus result in a quicker decline in an already endangered species.

Animals' migration patterns will be put to the test by the wall. A restricted gene pool could result in a lack of mobility among animals. A restricted gene pool could result in a lack of mobility among animals. This could also pose a life-threatening problem.

One relatively significant ramifications of a lack of mobility among animals that have been captured in a lifeless climate is a loss of genetic diversity among the species. Limited genetics could result in the species becoming more susceptible to diseases, and thus result in a quicker decline in an already endangered species.

Animals' migration patterns will be put to the test by the wall. A restricted gene pool could result in a lack of mobility among animals. This could also pose a life-threatening problem.

The wall not only will induce panic for the animals but also for humans. This means that the wall will push the animals away from their natural range blocked by man-made border barriers, according to the Washington Post. The wall Trump intends to build would only worsen this problem.

Iowa State head coach Steve Prohm watched a walkoff during Saturday's game against West Virginia at Allstate Stadium. After trailing early, the Cyclones lost 75-72, in their first ever Big 12 Tournament game.

Gadson still loyal to Jackson

By Ben Visser @benvisser13

Iowa State wrestling coach Kevin Jackson said Tuesday that he will step down from his position at the end of this season.

Iowa State wrestling coach Kevin Jackson said Tuesday that he will step down from his position at the end of this season, and the cyclones wrestling program will go through a transition period, according to a statement released by the university.

Jackson has been the head coach at Iowa State since 2009, and during that time, the program has become one of the most successful programs in the Big 12. Under Jackson's guidance, the program has produced multiple All-Americans and national champions, and has been consistently ranked in the top 25 in the nation.

Jackson's decision to step down comes after a challenging season for the program. Iowa State finished the season with a record of 4-9 in the Big 12, and 15-18 overall, missing out on post-season play for the first time in his tenure.

Jackson said in a statement that he has requested a release from his contract, and will continue to coach the team through the remainder of the season.

Jackson's replacement has not been announced, but the school is expected to begin a search for a new head coach shortly.

Individuals:

Nah-Miss-Luta: 13 points, 9 rebounds, 2 assists

Desmot Butler: 11 points, 10 assists

Nick Weiler-Babb: 15 points, 6 rebounds, 2 assists

3 takeaways from Iowa State’s loss

Iowa State was melting down as Kansas State took control Saturday that will step down from his position at the end of the season. The Cyclones won 7-2-9 this season.

Iowa State redshirt junior Jaddal Buckley looks at a foul shot against Kansas State in the second half. Buckley scored 15 points on 5-of-9 shooting, while Jaddal Buckley added 15 points on 5-of-13 shooting.

Cyclones focus on transition defense

By Aaron Mamer @auramamer1

Iowa State looks to rebound against Kansas State this week as the Cyclones focus on transition defense.

Iowa State forward Deonte Burton had 22 points against West Virginia on Saturday, and Iowa State guard Matt Thomas had 19 points against the Mountaineers.

Individuals:

Naz Mitrou-Long: 19 points (6-of-8)

Deonte Burton: 22 points, 5 rebounds, 2 assists

Matt Thomas: 19 points, 4 rebounds, 4 assists

Expectations for Iowa State’s upcoming game against No. 2 Baylor are tempered.

Each of Baylor’s past three games against ranked teams.

While the Mountaineers had nine turnovers and the Cyclones had 15, West Virginia shot 47.4 percent from the floor, compared to 43.3 percent for the Cyclones.

Iowa State forward Deonte Burton had 22 points against West Virginia on Saturday, and Iowa State guard Matt Thomas had 19 points against the Mountaineers.

The game has even bigger implications for both programs, as the Cyclones have won just three contests since Feb. 1-9 season, and its coach, Kevin Jackson, said Tuesday that he will step down from his position.

Jackson is stepping down at the end of this season, and the program will go through a transition period, according to a statement released by the university.

WHAT TO WEAR TO A CAREER FAIR

Career fairs are crucial events that many students attend in order to impress potential future employers. Make the right first impression with this style guide.

DRESS FOR SUCCESS

Students need to make a positive first impression and not a memorable negative impression and many students, dressed of career services in the College of Human Sciences, Mike Gaul, director of career placement in the College of Agriculture and Life Sciences, told students to not go underdressed or overdressed. He said he would rather see his students “show up looking too professional” than not.

“The positive thing about our school as a whole is that we have not been using specific organizational dress codes,” Gaul said. “We dress for certain positions and off campus or certain environment or cultural careers within the college, “it will depend greatly on the position and office environment or culture. What you’re wearing, it’s probably not good.” Gaul tells his students to avoid wearing anything too bold so they don’t create a distraction from the true reason they are at the career fair.

Atilano said attire at a job for a student in the College of Liberal Arts and Sciences, said “business casual to business professional.”

“Trendy does not mean professional,” Cross said. “Looking good doesn’t necessarily translate into looking professional.”

“You almost want to dress so they don’t care what you’re wearing,” Cross said. “You want them to listen to what you have to say. If you walk in and they remember what you’re wearing, it’s probably not good.” Gaul tells his students to avoid wearing anything too bold so they don’t create a distraction from the true reason they are at the career fair. It’s important that students show that they put some thought into their appearances and avoid going to the fair in loungewear. Attendees are warned not to wear shorts, t-shirts, flip-flops, jeans, sneakers, and hoodies, said Meredith Williams, Director of Business Career Services. “The main concern is that we want the employers to know down the road what their job will require them to wear,” Gaul said. “They could have to wear khakis or dress pants with a button-down shirt and jacket or some type of corporate attire.”

“Trendy does not mean professional, but also practical for walking around a career fair in is must-haves. Comfort is a necessity as well,” Stegman said.

DRESS FOR THE JOB YOU WANT

Although the College of Design is a creative and expressive atmosphere, Atilano said, “A career fair is an environment when you are interacting with somebody that could offer you a position, so I would still be conservative and modest in the way you approach attire.”

Atilano said students should dress up and dress professionally. “It’s very bouncy, but we will ask somebody to leave if they’re wearing jeans, shorts, a hoodie, sandals, things like that.”

Employers pay more attention to students who look “sartorial, capable, goal-oriented and motivated” and that “students dress at these events just helps them communicate who they are and what they are,” said Mark Peterson, director of graduate business career services.

The shoes that are professional but also practical for walking around a career fair in are must-haves. Comfort is a necessity as well, Stegman said.

WHAT NOT TO WEAR

People pay more attention to students who look “sartorial, capable, goal-oriented and motivated” and that “students dress at these events just helps them communicate who they are and what they are,” said Mark Peterson, director of graduate business career services.

Women are advised to keep accessories and makeup to a minimum. For both men and women, students should be clean and appropriately dressed up and dress professionally. “They could have to wear a suit in a suit or long skirt every day, or it could be business casual,” Atilano said.

“Atilano said attire at a job for a student in the College of Design could be “all over the map.” Because of the broad spectrum of majors and careers within the college, “it will depend greatly on the position and office environment or culture,” Atilano said.

Celebrity and the variability in the workforce, when it comes to appear for a career fair: “dresses, pants, business skirts that are long enough and not tight-fitting, button-down shirts, suit jackets or blazers and business shoes.”

Additionally, students should dress in conservative colors — grey, blues and blacks.

Tiffany Atilano, design career services direc- tor, said wearing a suit to a career fair or inter- views is always a good decision. Stegman said wearing khakis or dress pants with a button-down shirt and jacket or some type of corporate attire is fine. “Dress up your outfit by adding a little spice to the outfit,” Gaul said. “But don’t skimp from your goal, because your goal of success is the most important.”

Employees pay more attention to students who look “sartorial, capable, goal-oriented and motivated” and that “students dress at these events just helps them communicate who they are and what they are,” said Mark Peterson, director of graduate business career services.

“Trendy does not mean professional but also practical for walking around a career fair in is must-haves. Comfort is a necessity as well, Stegman said.

THE SHOES MAKE THE OUTFIT

“Trendy does not mean professional,” Cross said. “Looking good doesn’t necessarily translate into looking professional.”

“You almost want to dress so they don’t care what you’re wearing,” Cross said. “You want them to listen to what you have to say. If you walk in and they remember what you’re wearing, it’s probably not good.” Gaul tells his students to avoid wearing anything too bold so they don’t create a distraction from the true reason they are at the career fair.

and offers them a chance to have a personal connection with the member of the community who can help during the coping process. Often evidence of a sexual assault can remain usable even after a full 24 hours after the attack, victims can take part in a forensic medical exam and medical exam provided by the Iowa Sexual Assault Examination Program (ISAE Program) to determine if there is any evidence of sexual assault. 

We can create a record of the patient, which can be used in a court of a victim chooses to go down that road, said Mary Ruman, women’s health nurse practitioner at the Webster Health Center. “Often times, a patient chooses to be examined and that is a big part of what we do.” 

With several cases of campus sexual assault becoming more widely talked and talked about via mainstream media, ACCESS Campus Prevention and Outreach advocate Lori Alias says the current generation of young people to increase assault awareness. 

You’re seeing this generation begin to stray from typical gender binary roles, such as the dad being the breadwinner, and when you tear down those biases, you increase assault awareness. 

Even if it is a first encounter, there should be enough communication to realize if both parties are in equal enjoyment. “If that isn’t the case, it shouldn’t be taken as an insult but should be handled properly,” said Alias. 

As Mayland reflected on her own experience, she wanted to ensure that her perpetrator could still live out his life despite what he took from her. 

“Don’t you think it’s time to talk about our assumptions?” she spoke of, at home the country is a place where people can move forward in regard to race. The session left Iowa State students, faculty and staff who attended reflecting on their own lens, said Jesus Lizarraga, assistant professor in the School of Education, “Often times, we only see in our surroundings and be careful in what I say because I’m resilient and I had that group of friends, family and my church. But for someone who doesn’t have those resources, the outcome may be different and take much longer.” 

The hopes that students and the university will focus on education first, as the more open the public is to discussion, the more staff and students from more diverse backgrounds will feel comfortable in sharing their stories.
