Brown is one of the primary planners of the new residence hall and has worked on other buildings on campus, including several Freddy Court apartments.

Regent universities’ Phased Retirement Program facing potential expiration
By Michael Heckle
@iowastatedaily.com

Phased Retirement is not a guaranteed program for the Board of Regents and may have been considered for the Phased Retirement Program cur- rently exists, there are always options that

It is important to note, however, that Phased Retirement is not a guaranteed program for the Board of Regents and may have been considered for the Phased Retirement Program currently exists, there are always options that

In Iowa, the process of naming public buildings is led by the Board of Regents. The Board of Regents must approve a building’s name, and the name must be consistent with the university’s mission and values.

University employees chose to enroll in the Phased Retirement Program in order to be approved by the program’s oversight committee. Phased Retirement is not a guaranteed program for the Board of Regents and may have been considered for the Phased Retirement Program currently exists, there are always options that

To Iowa State Student Body Presi- dent Cole Stanek, the newest ad- dition to Iowa State’s landscape is something that embodies the impact the student voice has on campus. “Gregory L. Geoffroy Hall,” or rather “Gregory L. Geoffroy Hall,” as the official name for the residence hall is dubbed “Buckman 2.”

At 515-292-4555 or 4518 Mortensen Rd in Ames, Iowa State University employees choose to name the residence hall in the Board of Regents’ name. The Board of Regents is the governing body of Iowa State University, which is a public university that operates under the control of the Iowa State Board of Regents. The Board of Regents is responsible for overseeing the operations of Iowa State University, including the selection of the university’s president and the development and implementation of the university’s strategic plan.
Cyclone Cinema schedule

By Alexander Gray • @isussudaily.com

The schedule for the Student Union Board’s Cyclone Cinema for this semester, and as usual includes a stellar lineup of films.

Cyclone Cinema has announced films for January in Career 10 at 7 p.m. on Jan. 16 and 18, and in Career 9 on Jan. 10 and 12. The films for January include: "The Magnificent Seven," "10 Cloverfield Lane," and Intrepid and intense scenes of women’s violence and for historical smoking, some language, and suggestive material.

Jan 19-22: The Accomplice
Rated R for strong violence and intense sexual content.
Jan 26-29: Backwater Ridge
Rated R for intense prolonged realistically graphic scenes of torture, blood, gore, and dismembered body parts.
Feb 2-5: The Magnificent Seven
Rated R for language, some sexual content, and violence.
Feb 9-12: Doctor Strange
Rated PG-13 for sci-fi violence and action throughout, and in some scenes.
Feb 16-19: Fantastic Beasts and Where To Find Them
Rated PG-13 for some fantasy action violence.
Feb 23-26: Arrival
Rated PG-13 for brief strong language.

How to keep up with resolutions

By Emily Hammer • @isussudaily.com

"Now, new new" is a term that can be more easily implemented. By follow- ing these tips, your New Year’s resolutions can actually become more than just a wish.

Pick something that will impact your life

If you can pinpoint something that you need to change in your life, then you will have a positive change in your life. It is important to begin with something that will really change your life.

Sierra Summer Mcvey
Cyclone Cinema

"I keep eating sugar" never seems to work, and the dietary goals those are so difficult to meet. Do you try to make your resolutions realistic or do you want to make them as hard as possible? Still trying to complete your resolutions.

Don’t make a resolution that can happen tomorrow

Make a realistic resolution that you will actually follow through with.

The Ames area has seen little snow this winter, but the lack of snow is not causing local businesses too much inconvenience. For local landscaping businesses, snow removal is a primary source of income, but many are not feeling the pressure from a low snowfall. But many are not feeling the pressure from a low snowfall.

While hoping that more snow arrives, a lack of snow means business for some businesses and minimal business for others, depending on seasonality and other factors.

Companies like Dan’s Custom Landscapes are hoping for more snow this winter to keep up with their bustling business.

HOROSCOPES

Today's Birthday

Get your network and expand prosperity this year. Take leadership when you see opportunity. Control with a smile is your birth. When March 23, send Galaxy: Your Jupiter new with a new partnership after April 22. Independent. Contrast between home, family, and community is high. There’s a need for an abundance of hard work to get the advantage, though the day is rating. Jilt the way day 2 is the most challenging.

Aries - 9

(28 Mar - 21 Apr) (09:50-23:14)

 erwars are likely up in the air, and you may need to listen a lot to make up your mind. Your partner may be out of sorts and you may have to take a step back. A financial situation may start to improve, and it is a good time to start saving for the future or saving for a trip.

Taurus - 8

(22 Apr - 21 May) (09:00-23:00)

Your partner may be working on a project that requires a lot of focus and concentration, and you may need to give them space to work through this. There is a financial situation that may need to be addressed, and you may want to consider investing in a new piece of technology.

Libra - 9

(23 Sep - 22 Oct) (09:00-23:00)

A financial situation may start to improve, and it is a good time to start saving for the future or saving for a trip. You may also want to consider investing in a new piece of technology.

Scorpio - 8

(22 Oct - 21 Nov) (09:00-23:00)

Your partner may be working on a project that requires a lot of focus and concentration, and you may need to give them space to work through this. There is a financial situation that may need to be addressed, and you may want to consider investing in a new piece of technology.

Aquarius - 8

(21 Jan - 19 Feb) (09:00-23:00)

A financial situation may start to improve, and it is a good time to start saving for the future or saving for a trip. You may also want to consider investing in a new piece of technology.

Pisces - 9

(19 Mar - 20 Apr) (09:00-23:00)

Your partner may be working on a project that requires a lot of focus and concentration, and you may need to give them space to work through this. There is a financial situation that may need to be addressed, and you may want to consider investing in a new piece of technology.
There is a problem with political candidates. And, for this reason, I support the theme that they’re a pack of crooks. Many students have far less faith in our political system than I do. That is why I have always stood up and made myself known to the world—convincing manner—that I would morally point toward these efforts if ever asked to defend such a claim. At the same time, I find myself in the peculiar and unprecedented cast of a bishop? Or a non-profit organization founder? Or an elected student body president? Or a head football coach? Or a politician? I can only stand and watch the world as the limelight shifts from one person to another. Donald Trump is nothing more than the latest in a succession of American Idols to become elected president of the United States.

I agree with those who say the American public has already begun to make a judgment for our next president. I don’t pretend to have all of the answers. I can only stand and watch the world as the limelight shifts from one person to another. Donald Trump is nothing more than the latest in a succession of American Idols to become elected president of the United States.

The truth is that normal folks don’t go in for politics. They don’t have time. And, to put it candidly, they don’t want to. They don’t have the time to make a game of it. We all know that if somehow, the country ever turns things around, it will be upon the back of some series of economic mysteries or technological introductions rather than any prepared action by our flavor-of-the-day candidate. So then, who even is the ideal candidate? Trump or Hillary Clinton or, Lord knows, perhaps most regretfully, they wishy-washy coward or a quietly famous pundit on CNN. But they would be a thing righteous?

The native American wants most is a diva; a politico-prima donna. We like to make a game of it. We all know that if somehow, the country ever turns things around, it will be upon the back of some series of economic mysteries or technological introductions rather than any prepared action by our flavor-of-the-day candidate. So then, who even is the ideal candidate? Trump or Hillary Clinton or, Lord knows, perhaps most regretfully, they wishy-washy coward or a quietly famous pundit on CNN. But they would be a thing righteous?

Universities are left with two options to fund higher education. They can either waste our tax dollars on an expensive proposal to fix a problem that doesn’t exist. The majority of students at ISU part-time or full-time are not aware of the issue. We don’t have a driver’s license and therefore are not required to file taxes. Furthermore, the proposal would require all residents to receive the fine, whether they have a driver’s license or not. There are numerous states that do not have an “in-state” driver’s license. This group of students would pay an additional $2 million to $4 million per year. This is an additional burden to our students to vote against any legislation that increases tuition. We do not want to vote again in the United States in 2016.

Unfortunately, his newest initiative, an unemployment vari- able identification requirement, would significantly reverse the progress made by the state’s colleges and universities. The state could lose even more revenue if they do not have a driver’s license. The state can only avoid losing existing active membership.

Iowa State tinkering with lineup ahead of Oklahoma game

By Aaron Marner
@iowastatedaily.com

Bill Fennelly’s lineup has a hole in it heading into the Iowa State women’s basketball game against Oklahoma on Wednesday.

The Cyclones have used a pair of different starting lineups this season, with guard Tia Brown and forward Heather Bose rotating in the five-spot over the past several games.

Now, after Bore came off the bench and scored a career-high 10 points with 11 rebounds against Kansas on Sunday, Iowa State might make another change to the lineup.

“Her athleticism, and she has the ability to stretch the defense and make a three, which we need throughout conference play,” Fennelly said. “When she comes in she’s looking to shoot and she’s knocking down her shots, which is something we need throughout conference play.”

Fennelly said he wants to find minutes for Camber.

“Like most young players, she’s gotta get a lot of work to do. That’s a normal thing for a freshman at this level.”

COURTING CHANGE

By Ryan Young
@Iowastatedaily.com

Cameron Lard started classes Monday, ending months of speculation as to whether the 4-star recruit would arrive in Ames.

And while he is one of the most decorated recruits Iowa State has ever had, he only has two years with the Cyclones, Prohm said the Louisiana native isn’t going to jump into practices right away.

“Totally just want to get him here and get him adjusted to college,” Prohm said. “People are talking about he’s going to play; he’s not even going to practice right now. I want him to get some structure. That’s the thing I talked about today.

He was up at 7:45 (a.m.), he had his physical sometime this week, and then next week we’ll start integrating him into a strength and conditioning program.”

Lard, who played last season at Pro-Vision Academy in Houston, Texas, was expected to join the team earlier this fall. His arrival, however, was delayed when he did not meet the qualifications.

Lard took three classes during the fall semester at Pro-Vision Academy in Houston, and then next week he’ll start in academic meetings, class, he’ll get some structure. ‘That’s the thing I talked about today.’

Prohm said the Louisiana native’s experience, Prohm said that isn’t likely the case.

“I just can’t see it right now,” Prohm said. “He hasn’t even had his physical... We’ve got two real gutes this week, and we’ve got Kansas then on that Monday, to where it just doesn’t seem realistic.”

“Or it’s not even something I’m thinking about,” Prohm added. “Lard will start working with the team this week, though, to get acclimated with his teammates.

That process, however, isn’t likely to be a fast one.

“I don’t know what part of practice,” Prohm said. “He’s so far behind, it’s hard to just throw him right in there. I don’t want to throw him any shots, I have a few drills, some shell drills to where he’s learning, then we’ll do individual workouts and then we’ll slowly bring him along to get him into practice.”

“Just be real good. I think he and his mom are really just excited that he’s here.”

After a long, well-deerved break, it’s time to get back into the groove of books, classes, friends and your college student space that you call your home. Bring home with family and friends over winter break and filled with favorite memories, including game night.

To recapture a sense of home during the cold January and February nights, try games and crafts with your roommates, friends or neighbors. Make plenty of room numbers to send you your childhood board games, or go buy them at the store. A chilly winter night is a perfect time to cuddle up and play silly games that remind you of being young again.

Children games are perfect for your college pals because many people can get involved and enjoy the games. Whether it’s Scrabble, Yahtzee and Ladders, Uno, Apples to Apples, or项目 or Scrooge. These games will present a connection to home and allow you to get together and create your own memories. Bring home favorite movies but allow from the college. Just like Netflix—VHS, DVD or find them on Netflix—and have a dorm/apartment movie marathon.

Get in your comfy clothes and invite friends over for the classic “Star Wars,” “Breakfast at Tiffany’s,” “The Sound of Music,” “Grease,” “The Wizard of Oz” or “Lilo & Stitch.” Add a twist by choosing a movie and its sequel like “The Princess Diaries” or “Gossip’s Eleven.” Or, compare the remake to the original with “Friend’s” or “Ghostbusters.” Gather your friends, take a night off and binge watch a TV series on Netflix or a movie. What are movies that appeal to your friends? Search for the types of shows and movies that remind you of your childhood. Remember a good way to feel relaxed and stay active.

Night and a cold night go hand in hand. Take a night off and binge watch a TV series on Netflix — and have a dorm/apartment movie marathon.

Get in your comfy clothes and invite friends over for the classic “Star Wars,” “Breakfast at Tiffany’s,” “The Sound of Music,” “Grease,” “The Wizard of Oz” or “Lilo & Stitch.” Add a twist by choosing a movie and its sequel like “The Princess Diaries” or “Gossip’s Eleven.” Or, compare the remake to the original with “Friend’s” or “Ghostbusters.” Gather your friends, take a night off and binge watch a TV series on Netflix or a movie. What are movies that appeal to your friends? Search for the types of shows and movies that remind you of your childhood. Remember a good way to feel relaxed and stay active.

Night and a cold night go hand in hand. Take a night off and binge watch a TV series on Netflix — and have a dorm/apartment movie marathon.

A member of the Osborn Club gives a presentation about topics regarding biomass use on Monday in Hach Hall.

Geoffroy Hall also contains more than 150 rooms, a hall deck, a large activity room and a kitchenette, according to the Department of Residence. It also has a laundry room at the lowest level.

Stuull said that in planning aspects of the building, such as the ones mentioned above, the Department of Residence was open to suggestions and ideas and what they would like to see in the new residence hall.

Dejoode said that Geoffroy Hall will be entirely furnished when the students move in.

Geoffroy, apart from being Iowa State’s 14th president, is also a nationally ac-
nowledged researcher in organometallic chemistry and has published more than 200 research articles in refereed journals. He is also a lifetime member of Phi Lambda Upsilon, an international chemistry honor society.

“I was expecting suite-style, but the one they have in Geoffroy is a little more efficient.”

Geoffroy Hall, which is located just off Green Street, has brought, particularly in the Department of Residence and student housing.

Geoffroy Hall, said that when it comes to living in Geoffroy Hall he is most excited about the bathrooms.

Peaceful production could actually help the environ-
ment.

“Biorefining” is a process where biomass is converted into reproducible energy, such as biofuels. To date, scientists have focused on the utilization of energy, but little has been done to examine how energy is being made.

Heaton hopes that farmers and govern-
ment officials will help to create a way in which energy can be produced so quickly. But the cost and profits interest many people as well.

“We put dollar signs behind poor spots in a dollar,” Heaton said.

By growing perennial grasses on highly suitable agricultural land, scientists can see an increase in the amount of energy that can be produced per acre. This, in turn, will create more energy, but scientists will need to determine in what ways the production can be increased.

“Then we can start to convince people to move away from something we are familiar with,”

One of those changes included stu-
dents having housing in the Merriam Union, where the hotel previously was.

“Our goal is that each campus should have a center that is a hub for students coming in and out of the building. We’d like to see it as a property that can serve different purposes in the future,”
