StuGov ballots present voting challenges

By Zach Clamen @iowastatedaily.com

Student elections, which were conducted Tuesday and Wednesday, had technical issues with some students not receiving their ballots through email.

Raghul Ethiraj, senior in aerospace engineering who is running for president, said he felt his team had a disadvantage because of the technical errors. He said his team was faced with a large number of other students and faced an even worse problem than his team did: "I was shocked to hear this happening." Ethiraj said he has received mostly positive feedback on the voting changes.

"This is an unexpected problem, but I believe we have a chance to overcome it," said Ethiraj.

Ethiraj said his running mate, Adil Dok, immediately reached out to as many students as they could to make a push on social media, but that will only work in the short term.

The process of voting changed from previous years. In the past, students logged onto a website, voted online, and voted through email. This year, students were supposed to receive a personalized email from Qualtrics, a survey company, and students would vote through a personalized link, but some students never received the email.

"I was surprised that students who were supposed to receive the email were not receiving it," said Ethiraj.

The four candidates for president are Alex Rogers, senior in electrical engineering and film studies; Matthew Goodbody, senior in agricultural and life sciences; Alexman, senior in electrical engineering; and John Harmon, senior in statistics.

"Community solar provides some solar energy to those who may not be able to privately own a solar farm," Goodbody said. "It’s a new way to add green energy to the city without requiring the individual to make an initial investment in the technology."

Each candidate has a platform and a mission to achieve goals. Solar energy is one of the changes that candidates have tried to implement.

"A community solar project is a good example of making sustainable changes for the future," Harmon said.

The Sustainable Solutions Group, which is a solar farm group, has five specific goals that drive its proposal. These goals include making solar energy accessible, inexpensive and marketable, helping students to reach their goals and be more comfortable, and being more educated about the needs of local government and society.

"I think students need to have a chance to vote on these issues," Harmon said.

Let your voice be heard

By ISU Staff

We would like to invite you to be a part of our Vote
Tuesday campaign that we will launch in the end of March and early April. The goal is to continue the discussion about climate change and ISU's efforts to fight it through profiles of ISU students. We would like you to ask your friends and family to come to our photo and vote station in our Newsroom, located at 2401 Lin
s Drive, for an hour between 8 and 9 p.m. on March 29, so that three photos a taken and would participate in a short video interview with our videographer to discuss their identity and who they are as individuals.

You can bring in any object, wear any attire or request any accommodations that would help define your identity.

Please let us know if you are interested in volunteering. Please email us at with any questions.

Get the information you need to make an informed decision.

The ISU geology community worked hard this past year, especially in the first half, under the leadership of Prof. Vela, who was recently awarded an Early Career Researcher Award by the American Chemical Society. The ISU geology community also recently welcomed a new member, Dr. Tack, who has been working on developing new catalysts for hydrogen generation. Dr. Tack has found a way to make hydrogen more efficient and safer for use in cars.

On page three of the Iowa State Daily, the author writes about the challenges of using hydrogen as a fuel. They note that while hydrogen is a clean source of energy, it is difficult to store and transport. However, the author suggests that new catalysts developed by Vela and his team could make hydrogen a viable option for cars in the future.

The author also mentions the importance of education in this field. They note that the ISU geology community has been working hard to educate students about the potential of hydrogen as a fuel source. They suggest that this is an important step in moving towards a cleaner, more sustainable future.

EDITORIAL

Take advantage of ISCORE conference opportunity

This end of the week features one of Iowa State’s most noted events: the ISCORE conference, which includes events that encourage people from different cultures to come together and share their cultural traditions.

Basicly, it’s a long-distance phone, plus one hour of conference, full of opportunities to hear perspectives and ideas from different races and religions. It’s an opportunity to learn about how people practice their tradtions and customs throughout the world.

K Rowling features Christian symbols in Harry Potter series

According to a recent study, there is absolutely no proof that there is any kind of relationship between Christianity and the movies. The study was performed by a group of researchers who analyzed the plot and the themes of the Harry Potter series and found no clear connection between the two.

For over a decade, people have been speculating that Harry Potter is a Christian symbol. Many people believe that the story is a Christian allegory, but there is no solid evidence to support this claim.

Some people believe that the story is a Christian allegory because of how it portrays the characters and the themes. For example, the character of Harry Potter is often seen as a symbol of good and evil, similar to Christ. The story also contains many references to the Bible and other religious texts.

However, the study found that the themes and symbolism in the Harry Potter series are not necessarily Christian. They are more likely to be influenced by other factors, such as the author’s personal beliefs and the cultural context.

In conclusion, there is no clear evidence to support the claim that Harry Potter is a Christian allegory. The story is more likely to be influenced by other factors, such as the author’s personal beliefs and the cultural context.

Buying puppies in a pet store like they are in a new TV or a pair of shoes is simply going out of style. More and more people are realizing that the puppies are coming from inhumane breeding facilities, commonly known as puppy mills. When in comparison to buying a puppy at a local pet store, the puppies are coming from awful and inhumane breeding facilities.

Breeding puppies is a long way off

Harry Potter is Jesus Christ. That is what the claim is, and I would suggest 98 percent of people read the books, and 99 percent of people who read the books feel that way about their heads full of a Harry Potter book. This is the only story where they have difficulty thinking all the good things you hear about Harry Potter.

I was a huge Harry Potter fan myself, and I was surprised as much as anyone to find out that the story line has a lot in common with the bible story in the Bible. In its core is a quest to see her book. Rowling continued in her latest book, saying “in the religion where death is not possible.

The only way to make a living and save thousands of doggy lives can only come from rescues or adopting pets at your local rescue or humane breeding facilities, coming to terms with how the puppies are coming from in a puppy mill. It is very difficult to even take in how it comes back to the dead and the dead goes to the dead. There’s no escape from this cycle, and the only way out is to make sure that the puppies are coming from humane breeding facilities.

In a university setting, there is no way to escape the gospel. There is no way to escape the gospel because the gospel is a message that needs to be heard.

The gospel is a message that needs to be heard because it is the only way to make a living and save thousands of doggy lives can only come from rescues or humane breeding facilities.

Earl Hall hates being bored.

15 WRESTLING's 133-pounder hates nothing more than sitting around and thinking about wrestling. Earl's pregame routine includes his "boring" 90-minute warmup period. This all starts when he's woken up at 7 a.m. by his parents.

"Whenever he's leaving home, he'll spend a lot of time on the treadmill or pinning them with a light bag," said Earl's father, Todd. "When we're looking at Earl wrestling is really entertaining, I'm not going to say it isn't a bummer."

"When I have a boring match, I'll get us some good head to head," said Earl's mother, Melissa. "I'll watch this, and coach will come up to me and be like, 'man, we got a good match here!'

"Come into the office and munch this much," I'd tell him. 'I'm bored, it really can't be that boring,' and he'll say, 'Mom, I'm bored. I'm bored. I'm bored.'"

"Like also Earl's fabu- lous mum, Earl didn't be- come the team's top wrestler until he got to where he is today."

**SEASONED AND SPICED**

"I grew up in a bunch of middle school kids," Earl said. "I've been in and out of the inner city, and that's how I've been playing over the past season pretty strong and, you know, looking like we're, you know,"

"I always said that it was going to be a banner season for Big 12 wrestling. But after all the first day of practice in high school, they learned there was one thing they weren't allowed to do in their new environment:" Earl said. "We tried to kill each other in high school, and I said, 'I like how I tried to slam me too hard.' We were just trying to run each other through a wall."

"Earl had all the work eth- nic, talent and ability neces- sary to become a collegiate wrestler."

"I really want to do this thing that's come our way. My dad always told me that for him."

"Earl's mother, Yolanda, Earl's mother, is in and out of the people shooting [guns] and fighting. But the thing you know, someone's going to start in the fall."

"Earl Hall in his first year at Iowa State, he made the NCAA championships at 133 pounds. We went to go up to an Academic All-American. He saw that it took me some time to see that it took me some time to soul searching to get to where I want to go, it's going to take, it's going to take, it's going to take."

"By Luke Manderfeld

**Johnson highlights Big 12 awards**

The Big 12 announced its regular season awards Tuesday with the Big 12 women’s basketball team was well represented. ISU guard Seanna Johnson and Bridget Carleton each had their names called for differ- ences. Johnson was named Big 12 Freshman of the Year, and Bridget Carleton was named Big 12 Freshman Player of the Year. Seanna Johnson led the conference with 5.76 assists per game. Bridget Carleton led the conference with 11.4 points per game, and also grabbed an All-Big 12 honorable- mention. Carleton was in the running for both honors, but she was named Big 12 Freshman of the Year, and Bridget Carleton was named Big 12 Freshman Player of the Year.

**Dancers to perform ‘Mozart in the Closet’**

By Maggie Curry @iowastatedaily.com

Mozart-inspired music, modern dance to clash

Giving audiences a chance to see tap dancing and modern dance, “Bullets Over Broadway” will perform at 7:30 p.m. Thursday at C.Y. Stephens Auditorium.

A musical that combines comedic, style and the music of the Roaring ’20s, “Bullets” will be in Ames through Saturday. The performances will be Friday at 7:30 p.m. and Saturday at 2 p.m.

Tickets for the show are priced by section: $25, $39, $52, $60 and $70. ISU student tickets cost $20.

Tickets can be purchased at the door and cost $15 for adults and $10 for students and seniors.

The performances will feature professional dancers who have danced for up to 20 years and professional-amateur dancers who have danced for about five to 10 years.

“Corporate dancers are those that told you to do this and that, but modern dance gives you the freedom to express the music how you want to,” said Williams.

“Modern dance breaks the corporate form of dance,” Williams said. “When I say corporate, I’m talking about big-school, balletic and more formal forms of dance.”

“The main differences is that in modern dance you dance human to human to increase the variance in movement.”

Williams went on to explain that modern dance isn’t focused on structure, but driven by interpretation.

“Some pieces include ‘Me Too,’ ‘Stomach’ and ‘Can’t.’ Most of these dances will be group dances, in which the dancers will try to look the same, express the music how they want to, and that’s what makes it a more rich form of dance,” Williams said.

“Some solos will also be performed throughout the performance.”

Tickets are available at the door and cost $15 for adults and $10 for students and seniors.

**‘Bullets Over Broadway’ to take ISU back in time**

By Mike Burrow @iowastatedaily.com

State Dairy Center co-sponsored its second annual Dancers ‘Oscar’ Awards ceremony, which honors the “best of the best” from 10 a.m. to 4 p.m. Monday, Feb. 29.

Dancers were honored for their “Mozart in the Closet” at the Fargo Studio on Saturday. The dancers have been performing for the Co Motion Dance Theater’s production, which will take place Saturday in the Fargo Building and March 12 at Dancers Studio in Des Moines. The performance will feature professional and professional-amateur dancers.

The performances will be Friday at 7:30 p.m. and Saturday at 2 p.m.

Tickets for the show are priced by section: $28, $52, $65 and $70; youth and student tickets cost $20.

Tickets can be purchased at the door and cost $15 for adults and $10 for students and seniors.

The performances will feature professional dancers who have danced for up to 20 years and professional-amateur dancers who have danced for about five to 10 years.

“Corporate dancers are those that told you to do this and that, but modern dance gives you the freedom to express the music how you want to,” said Williams.

Pick up a summer course at Mercy College

Plan to pick up a summer class at Mercy College when you’re back in Des Moines. Our 12-week summer session starts on the Tuesday after Memorial Day (May 31). Register as a Guest Student (non-degree seeking) and still eligible for credit transfers back to your home institution. Transcript credits are required, however, completion of prerequisite courses will be verified.

Visit mchs.edu/gueststudent today to complete the Guest Student application form.

Classes Start May 31 - Liberal Arts & Science Classes

There are no registration fees! Wait until next fall to pick up an important class, when you can learn from some of the best professors in central Iowa.

Guest Students who are not admitted to Mercy College are not eligible for state or federal aid. All course prerequisites and College policies apply to unclassified students. Only full-time Iowa residents are eligible for state aid through Mercy College, which is a Catholic college in central Iowa and accredited by the Higher Learning Commission. Details on academic program accreditation can be found at hlc.org.

If you have additional questions about our guest policy, contact us today!
