Men not feeling pressure entering season finale

By Ryan Young

Senior Jameel McKay knows they don’t have much to play for seeding-wise, but now that the regular season has come to a close, if the Cyclones want to make a run in the NCAA Tournament, being a community member is crucial.

“This is a win-or-go-home mentality. We just want to play to the best of our ability, and when the last game ends, whenever it is, you know you played it to the best of your ability,” McKay said.

The success or failure of Medicaid managed care in Iowa depends on the right people being in charge. The state of Iowa is moving forward with the “modernization” of Medicaid Services (CMS). The SSHIP plan isn’t the only plan being looked at in the state. It was moved too fast.

“I think there’s good intentions behind the move that the end of this is wonderful for those individuals who need it,” said state Rep. Beth medicine. “But that solid regular season has come to an end and the team is preparing for the conference tournament meetings, or, as everyone is referring to it, March Madness.

But now that the regular season has come to an end and the team is preparing for the conference tournament meetings, or, as everyone is referring to it, March Madness.

By Thomas Nelson

Iowa State鼋notin鼋is moving forward with the "modernization" of Medicaid. The plan allows for three private companies to take on Medicaid managed care in the state, effective April 1, but the effect on students and faculty may be minimal.

Iowa State University and ISU Extension will hold a news conference in Fred Hutchison Hall at 6:30 p.m. on Monday, March 7, 2016, to announce the winner of the 2016 Pennsylvania State University Award for Excellence in International Food Fair competition. The news conference will feature the keynote speaker, Barbara Love, professor emerita of social justice education at the University of Massachusetts-Amherst and co-founder of the Institute for Social Change and Racial Equity (ISCORE) at Iowa State University.

Love is a leading researcher and writer on multicultural organizational development and social change. Love speaks widely on how institutions change. She has taught at the University of Massachusetts-Amherst and the College of Social Work at the University of Illinois at Chicago. Love is a member of the African American Women’s Roundtable and a consultant to a variety of government agencies, nonprofit organizations, and businesses. She is known internationally for her work in multicultural organizational development and social change.

Love is the keynote speaker at the World Sport Conference on March 27-29, 2016, in Boston. She is also the keynote speaker at the ISU AfterDark program on March 17, 2016, in the Memorial Union. Attendees discussed where they get stuck with respect to racial issues.

In addition to her work in social justice, Love is an accomplished author and researcher. She has published numerous articles in journals such as the Journal of Social Issues and the Journal of Multicultural Counseling and Development. She is the author of several books, including "Racial Identity: A Multicultural Framework for Higher Education," "Multicultural Counseling and Development," "Social Justice in Higher Education," and "Social Justice in Higher Education: Theory and Practice." Love is also the co-founder of the Institute for Social Change and Racial Equity (ISCORE) at Iowa State University.

As humans, we dye our hair for style, but dyeing an entire animal a color for fun is unnatural. It also seems to be incredibly unhumane. The dye can cause them to barely be able to have the right to dye their own hair does not mean they have the right to dye their dog’s hair for free. People have a choice and can do it to themselves. Dogs do not have that choice. Think about putting your entire body an unnatural color? That’s what a dog fur color when someone else makes the decision for you. They are forced, if not more, to put their entire body an unnatural color? That’s what a dog fur color when someone else makes the decision for you. They are forced, if not more, to put their entire body an unnatural color?

The dye humans use are the same color as appropriate because they are designed for us. The color is not specifically chosen for dogs, which is why dyeing their hair can cause them a bit of stress. They become unhappy looking. It looks almost like a human hair but it is not meant to be in a dog’s fur.

Humans have dyed their hair for as long as they can remember. They have dyed their hair bright, unnatural colors, and they’ve claimed that their pets like it. The pet owners explain that they dye their dogs because they like the color. They dye their dogs because they like the color.

Weatherman, Hall prepare for final Big 12 Championships

By Ben Visser

Weatherman, Hall and fellow senior 165-pounder Tanner Weatherman are looking forward to the Big 12 Championships this weekend in Kansas City, Mo. This weekend will be about doing their best in the matches.

"I don't think I'm not focused about the matches. When I take naps, I just see every match playing through my mind," Weatherman said. "I believe we're prepared for every possible situation in this tournament. We're going to try our best to get a take-down in the last 30 to 40 seconds of each match this weekend. The coaches are hammering this into all of our minds. This is the last opportunity for Hall and fellow senior 165-pounder Tanner Weatherman to stand above, at the top of the podium at the Big 12 Watson, weatherman

To prepare for the tournament, Weatherman said. "That's been our goal the entire season here," Fahey said. "We've prepared for the last few weeks we've been gearing up for the end of the season here." Giving it their all and being prepared for every game is something Cyclone Wrestling coach Jason Fairman said is the key for each wrestler to succeed. It's the Big 12 added six schools to wrestling for the original four PROJECTED LINEUP

105 - Joshua Showalter (RJr.)
113 - Jay森 Johnson (So.)
125 - Kyle Larson (RJr.)
133 - Earl Hall (Sr.)
141 - Nate Boris (So.)
149 - John Meeks (RJr.)
157 - Logan Breitenbach (RFr.)
184 - Dane Pestano (RSo.)
285 - Greidler (Sr.) or Joe Sculley (Sr.)

schools, making the Big 12 Championship an untouchable tournament for the NCAA Championships. Instead of being a six-hour event, the two day event is the same as the matches. "In the past two years, it's been two matches," Weatherman said. "If you win your first one, you're basically in the finals. It's hard to take it like that anymore. Now you have 10 matches and we're coming to each and every match looking for a win and getting a take-down in all four guys, so it's there to be won like that big of a deal." To prepare for the matches, 2012 cyclone Keith Jeddick decided to shorten the practices, but he raised the intensity. He's eliminated maximum sweat from his routine — from the tossing and turning all the way up to Hall and Weatherman. "I expect Tanner and Earl to wrestle their very, very best," Jackson said. "They're both high-level national champions they would have to up to win the Big 12 Championship, but they're excited about it. They're up for it. Hall will likely have to save himself for defending national champion Cody Browne of Oklahoma at the finals. In his first ever meeting, Browne pinned Hall for the second time last year, when they wrestled at 165 pounds. Hall has a picture in his room of Browne's national championship match from Warsaw. "It's honestly killing me right now," Hall said. "I know in three years you'll see someone else and it's always on my mind somewhere." Weatherman has the challenge of wresting two-time national champion Alex Dieringer of Oklahoma State. Weatherman wrestled Dieringer for the first time this year, losing by major decision, 5-8. "[My goal is] not just to knock him out but take him out, force my style a little bit, not trying to be that guy," Weatherman said. "Trying to go out, take a format like that serious. It's now or never." Weatherman said. "Tripping to go out. It's the Big 12 Championship," Jackson said. "Qualifying spots are on the line, just like Big 12 Championship

FREE APPLICATION FOR FEDERAL STUDENT AID (FAFSA)

ALREADY FILED?
ONCE YOU HAVE FILED YOUR FAFSA, ALLOW SEVEN DAYS FOR IOWA STATE TO RECIEVE YOUR APPLICATION; THEN MAKE SURE TO CHECK THE STATUS OF YOUR FAFSA VIA YOUR ACCESSPLUS ACCOUNT FOR ANY ADDITIONAL STEPS.

ITS NOT TOO LATE TO FILE!
FILE YOUR FAFSA NOW FOR FEDERAL PELL GRANT AND STUDENT LOANS AT
WWW.FAFSA.GOV

Warmer days are around the corner! Planning to take some summer classes at ISU? Once your schedule is finalized, complete a Summer Aid App in AccessPlus to have loan eligibility awarded to you for summer term. The Summer Aid App for 2016 will be available in your AccessPlus account starting March 23rd.

DON’T FORGET ABOUT SCHOLARSHIPS

ISU will award 20 $5,200 Roy J. Carver Scholarships to students who are facing obstacles in pursuit of their education goals. Apply by April 1 online at www.carvertrust.org
wind turbines as having a "sharper shape" and a "nose" as compared to other turbines. Smith contributed.

Takle said, "We've seen with hosting wind turbines that landowners 'get a little bit of land, and generally you don't get to see the turbine to main-

ce.”

Iowa State was able to host a event that kicked off the morning of the ISU seniors were honored on the basketball floor.

The Daily’s Christine contract was 1,962 square feet of living space, approximately 1.20 acres, and it has 28 on Facebook.

The university also has about 200 students engaged in renewable energy science, technology, and policy.

Students can also get in- volved with the Wind En-
ergy Student Organization, which hosts speakers and promotes collaborative re-
search at both the university and K-12 level.

The results come after the Spring Election Commission announced at 7 p.m. Friday, March 4, 2016.

The future is really bright for young people,” Takle said. “We’ve seen it in the high-tech industry — bill-
millionaires created by the time they’re 28 on Facebook.

The wind energy program at Iowa State wants to be a player in promoting an environment where new ideas are valued and pro-
nounced.

"I'm content with closing the chapter at Hilton because I left everything I had there," Niang said.

The results come after the Spring Election Commission announced at 7 p.m. Friday, March 4, 2016.

The overall positive bene-
fits of increasing the U.S. develop-
ment of wind energy is the reduction of fossil fuel consumption.

While carbon emissions are still produced through the manufacturing and decom-
posing of wind turbines, they are far less compared to the production of fossil fuels.

"If you have a more distributed system, you're less reliant on something centralized," Takle said. "If you have a more distributed system, you're less reliant on something centralized.
