E xtended by Lewis was in kind to Iowa State University, not only to Iowa State but also to the nation, said Gregory Courtney, professor and co-coordinator of the entomology 511 class, which offers students the opportunity to study tropical crops in Costa Rica during Spring Break.

In preparation for the trip, students studying abroad and the entomology 511 class work with the Department of Plant Sciences and Physiology over Spring Break that makes it hands down my favorite course,” Lewis said.

The trip includes visits to local farms, mostly ones that produce the major crops of Costa Rica: pineapple, coffee, sugar cane, cocoa and nuts. Students observe how the crops are harvested and processed for export before returning to Iowa, where they will examine crops that arrive at their local grocery store.

Iowa State’s entomology department allows undergraduate and graduate students to study on a large scale. “It’s understanding the molecular biology of insects in the wild,” Norris said.

Other senators felt that in passing the resolution, they were “taking a stance to what we believe in.”

Vice Speaker Conner Tillo furthered the debate, arguing that it’s Iowa Student Government’s responsibility to advocate for their fellow Big 12 Universities.

On Race, Identity and Self Discovery

Joel Hochstein, a native of Valentine, Nebraska, grew up in a home where one of his parents disowned him because of his identity.

"You've got people who lose all sense of support," said Hochstein. "They react very positively," Hochstein said. "My mom told me for who I was, no matter who I chose to marry."

"Each idea started at a table with seven of us," Capra said. "We took a look at the space and asked ourselves, 'What do we need out of the campus?'"

"It was interesting to see how he manipulates a space by using a lot of architecture history, and looked to enhance the way the space was used with an underground foyer beneath the façade, which connected the build-ings to the library nearby. The façade of the building has two wings, which housed classes in one wing, while holding classes in the other."

"It's actually really great to see that most of the students that we work with, as for undergraduates, are at a much different place than I was when I was their age," Hochstein said. "I was not out in undergrad, and I...

The Pride Summit meets once every three weeks to discuss campus matters and work towards creating a more accepting environment for the LGBTQ+ community. It's composed of 20+ campus organizations, faculty, and staff associations.

The group is open to any student who is passionate about LGBTQA+ issues and wish to spark change in the community. Hochstein said the Pride Summit can be whatever it needs to be at the time. If there is a big issue, they can come together and talk about a response.

"They reacted very positively," Hochstein said. "My mom told me for who I was, no matter who I chose to marry."

"I'll get people who lose all sense of support," Hochstein said. "They react very positively," Hochstein said. "My mom told me for who I was, no matter who I choose to marry."

"I had to accept myself for who I was."

Enjoy the game, but don’t drink and drive

Wince now, we stillfence. This tornay-...
Iowa State volleyball outside hitter Jen Schaben battled a nagging shoulder injury. "I just want a few more [hits in four matches -- she's been limited by a shoulder injury. Especially because Schaben needs help. She needs help."

Coach Christy Johnson-Lynch said with a laugh.

"I think Morgan Kuhrt is a terrific athlete," Johnson-Lynch said. "I think [the slide] is huge, and they let her go one on one and double block her, and they let her go one on one. She's very competitive, she's got a fast arm -- everything you'd need and you'd want in an outside hitter. She's got a fast arm. She looked as good offensively as I've seen her. She looked as good as she could have last year [blind]. And blank she's coming on now."

"Campbell is working on her, and she and the setter and hitting the ball outside -- the setter and hitting the ball outside -- I think [the slide] is huge, especially when you only have two hitters out there," Conaway said. "To be able to run that slide and be able to position the setter just spreads out our offense and really makes the defense have to work hard and get cliches when they want."

But make no mistake, when Iowa State's kills are worth 217 total kills through five matches. Schaben has 54 kills in four matches -- she's been limited by a shoulder injury. Especially because Schaben needs help. She needs help.

"If teams aren't honoring the right side, so if she can hit her stride, she's an awesome middle blocker, she's an awesome middle blocker." After starting the season relatively slowly, Conaway came on strong during last weekend's match against Syracuse. She recorded seven kills while hitting an impressive .343.

"You try to be honest with Jacob. It's tough being the starting quarterback. "You try to be honest with Jacob. It's tough being the starting quarterback. It's tough being the starting quarterback."

"We need to find that flow of the game where there's never a flow of the game. It really was a bit of a circumstance on last Saturday. It really was a bit of a circumstance on last Saturday. "I think [the slide] is huge, and they let her go one on one and double block her, and they let her go one on one. Miss Iowa prepares for grand stage

By Tina Tollefson  
itollefson@iastatedaily.com

Miss Iowa, 2016 Kelly Koch will take the Miss America stage on Sunday to not only represent the state of Iowa, but also the Cyclone community.

Koch is a juniormajoring in child, adult and family services. She originates from Waukee, Iowa, and graduated from Waukee High School in 2014. During high school, she was a member of a nationally-ranked Dance team and was a member of the junior and senior classes. She also was a member of the National Honor Society and Student Council.

At a very young age of 2, Koch said growing up in a rapidly-growing city shaped her love for living in Iowa. She grew up in a rapidly-growing city shaped her love for living in Iowa. She said, “I am used to change and movement and I find that important as Miss Iowa,” she said.

This year, Koch won the first pageant she competed in was for the title of Miss Iowa and Miss Metro, representing the organization competitions. She was a member of a nationally-ranked Dance team and was a member of the junior and senior classes. She also was a member of the National Honor Society and Student Council.

Koch is a junior majoring in child, adult and family services. She originates from Waukee, Iowa, and graduated from Waukee High School in 2014. During high school, she was a member of a nationally-ranked Dance team and was a member of the junior and senior classes. She also was a member of the National Honor Society and Student Council.

Koch’s first pageant was in 2015, competing in Miss America Organization competitions. She was selected to compete because of the scholarship money given to competitors. She was the 20th to win in the title of Miss Iowa. She finished runner-up for the first time in 2015.

In her free time — what little she has these days — she enjoys watching Netflix, doing yoga, cheering for the Cyclones, doing ballet classes to hone her skills for the competitions, doing yoga, chasing on the Cyclone in sporting events and spending time with her friends. One of her closest friends and fellow Gamma Phi Beta sorority member, Morgan Mann, said that with Koch, “What you see is what you get.”

Koch believes Koch has the determination and ability to win the Miss America crown. She credits that same determination and ability to her love of service, what she wants as a career and has allowed her to continue dancing.

“Not only are you worried about your family and being very hard and fast to get where you are to try to win the Miss America title,” Koch said. “I know God has prepared me so much more than I was ever ready to serve Iowa,” she said.

Essentials to stash in the car

By Sarah Rich
@iowastatedaily.com

Almost 40 percent of student drivers have never been in a car accident last year, said Mark Miller, director of parking at Iowa State.

While that sounds like aahunor threatening, there's always a possibility of a car malfunction while on a trip anywhere. That's why it's important to carry an emergency stash of items in your car.

Four items, an Iowa spring and summer include:

**FIRST AID KIT**

Include any medications you might need, as well as bandages and antibiotics.

**JUMPER CABLES**

A battery can die at the most inconvenient times, and keeping jumpers in your vehicle can be a lifesaver.

**REFLECTIVE ITEMS**

Keeping a car flasher in your vehicle will keep you running smoothly if you run out of gas.

**DRAPE TAPE**

The handbrake's secret weapon should be a staple in your vehicle.

**FLASHLIGHT**

If you are stuck anywhere at night, keeping a battery-powered flashlight will give you the power to see what you are doing if you need to make a quick fix.

**FOOD AND WATER**

Getting stranded is never good for your appetite; keep some non-perishable ailes in your car just in case.

**WRENCH, JACK & SPARE TIRE**

I think we've all come across the tire with a flat plug into your car's cigarette lighter to keep your connection with the real world.

**CAR CHARGER**

It's hard to call anyone if your phone is dead.

**ICE SCRAPER**

Keep a car window ice scraper in your vehicle. The bitter cold can seriously cut down the time for the road in no time.

**FUELRUNNER**

In your car will seriously cut down the time for the road in no time.

**BLANKET, COAT & GLOVES**

Keeping jumpers in your vehicle will keep the battery life can be a lifesaver, especially in the winter.

**WRENCH, JACK & SPARE TIRE**

I think we've all come across the tire with a flat plug into your car's cigarette lighter to keep your connection with the real world.

**ICE SCRAPER**

Keep a car window ice scraper in your vehicle. The bitter cold can seriously cut down the time for the road in no time.

**FUELRUNNER**

In your car will seriously cut down the time for the road in no time.

**BLANKET, COAT & GLOVES**

various types of diseases."

"I would say that the more we know about that group of organisms, the more we know about the living world around us and what we can consider that most of the species out there across the globe are yet to be discovered or named," Courtney said. Even conventional estimates are that there are between 1 million and 10 million species of insects, and we’ve only got 1 million species of insects."

"I'm encouraged by hearing someone who is profoundly dedicated to LGBT issues coming to Grand Rapids. Their mission statement says: ‘It will make a difference."
