Tuesday’s Mechanical Engineering Design Expo will feature presentations of designs from more than 100 students at Iowa State University.

The event will take place from noon to 4 p.m. at Howe Hall and is free and open to the public.

The Iowa State Engineering Design Expo is a chance for students to present their work to potential employers, as well as the general public, and to network with professionals who can provide career advice and mentorship.

The expo is open to students from all engineering disciplines, and will feature presentations from both undergraduate and graduate students.

The event will include a variety of engineering projects, ranging from mechanical and electrical engineering to computer science and civil engineering.

The expo is free and open to the public, and will feature presentations from students from all engineering disciplines at Iowa State University.

Cattle suffer from lead poisoning

By Ne Tackerly  
@iowastatedaily.com

The Veterinary Diagnostic Lab on Iowa State's campus handles cattle lead poison- ing cases fairly regularly. Last November by the Army Corp of Engineers, it was somewhat realized on a large scale due to the construction of the Dakota Access Pipeline.

“The project was scheduled to go through sovereign lands and required a permit to go through sovereign lands,” said McNeil.

The project was halted in mid-November by the Army Corp of Engineers which3 denied land reservation of the Standing Rock Reservation. The project was halted in mid-November by the Army Corp of Engineers.

The project was halted in mid-November by the Army Corp of Engineers. After a Judge in lower court ordered the Army Corps to halt the project, the Standing Rock Sioux Tribe, Energy Transfer Partners, and the Dakota Access Pipeline Corporation filed an appeal with the United States Court of Appeals for the District of Columbia.

The Standing Rock Sioux Tribe in a meeting with Iowa State University students.

The Army Corps of Engineers announced on Sunday that it will not approve an easement necessary for the Dakota Access Pipeline to be built across the Missouri River near Bismarck, N.D., in a joint news release Friday with the U.S. Department of Energy.

The Mills Yampoumpous event scheduled for Friday at least State was cancelled Monday.

"...I found myself wondering if the event was going to happen at all," said the event organizer.

"It's a difficult decision to make, but..." she continued. "...especially given the current situation..."

"...we have to prioritize the safety of everyone involved..."

"...and make sure that we're doing everything we can to prevent the spread of the virus..."

"...and ensure that everyone feels welcome and valued..."

"...and that's why we've decided..."

"...to cancel the event..."
Dreaded on your living room floor, this wasn’t just a problem for your desk, or your car, or the little black box that you carry around with you. It is a problem that we all face. And while it may not be something that we think about every day, it is something that we need to be aware of. Because, if we are not, we could be in serious trouble.

In about two-thirds of U.S. schools, there is a policy for active shooter drills. Light, sound, and a lot of other things are turned off, and everyone is expected to do their part. But how do you think that would go if you were actually in a situation like this?

You might think that it would be a straightforward process. After all, you were taught how to do this in school, right? But then you realize that there are no guarantees. You might not be able to get out of the building, or you might not be able to call for help. And even if you do, the police might not be able to get there in time.

So what can we do to prepare ourselves for this type of situation? One option is to have a plan in place. This could include things like having a designated meeting spot, or knowing the location of fire extinguishers and emergency exits. But these are just a few examples. There are many more things that we can do to prepare ourselves for this type of situation.

For example, we can talk to our friends and family about what to do in case of an active shooter. We can also make sure that we have the proper equipment, like a first aid kit, on hand at all times. And we can make sure that we are aware of any evacuation drills that are happening in our area.

But these are just a few examples of what we can do. There are many more things that we can do to prepare ourselves for this type of situation. And while it may seem like a lot of work, it is worth it. Because if we are not prepared, we could be in serious trouble.
Snow Riders hit slopes for winter

Ski and Snowboard Club at Iowa State offers variety in recreation

By Mike.Burpee
@iowastatedaily.com

Snow Riders hit slopes for winter
6 Tuesday, December 6, 2016

Katie Rian, captain of the race team, said the club is "helping form relationships which will last past college."

The club offers plenty of opportunities to meet new people. Currently, there are about 250 active members. Most members have been involved in the club for multiple years.

Most of the members have skied or snowboarded before, but they will also teach newcomer club members if needed. Some of the students who hasn't even seen snow before.

"They join because they want to try something new and different," club treasurer Michael Taylor said. "Once they learn or get better at skiing or snowboarding, they enjoy the club a lot more." Many of the skiers and snowboarders have been in the club, originally joining for their love of snowboarding.

The club entails more off the slopes as well, including weekly social events that usually take place on Thursdays. Some events the club has done include laser tag, paintball, Sky Zone, grill-outs and even mini-golf.

The executive committee decides what events will happen and when. It makes plans for trips to Aspen, Colorado, during Winter Break.

The bigger trips are generally funded by the money Student Government Association fundraising is done as well. Most of the money is used for trips to the slopes, and the club only has $5,000. The majority of the money is used to make sure that everyone can afford to be on the race team and compete at their own pace.

"Some members join us in a smaller race, too, so you get to know people better." Taylor said. "Riders can do tricks as snowboarders. We have a second option for people who don't want to be on the race team by participating in rail jams.

"The trips we go on are always a lot of fun," Taylor said. "Usually we end up going with other universities, too, allowing more friendships to be made."

The signature trip is to Aspen, Colorado, during Winter Break.

About 200 of the members end up representing Iowa State, with many other universities from around the country present as well. Rian puts on the four-day event, which includes concerts, beer tents and rides.

"It's basically one big college party in Aspen," Kolb said. "It's unlike I've ever been to before." Kolb has been part of the Radar is the Ski and Snowboard Club, which has been part of Iowa State for years. Kolb is the club treasurer and has been involved in the club for four years. Many of the members have been in the club for multiple years.

"We do have a good number of new members joining after first semester, particularly freshmen," Kolb said. "We don't turn anyone away and are always looking for new members."
Iowa State was looking for a spark.

In the past week and a half, the Cyclones have lost two straight games, including a 98-89 loss to No. 25 Iowa State (6-2, 0-0 Big 12) to the tune of 91-47.

Despite Burton's big scoring night, the Cyclones lost two straight games, including a 98-89 loss to No. 25 Iowa State (6-2, 0-0 Big 12) to the tune of 91-47.

Iowa State forward Deonte Burton goes up for a dunk during the first half against Omaha on Monday at Hilton Coliseum. Burton scored 20 points on 8-of-11 shooting and added two rebounds in Iowa State's 91-47 win.

The biggest thing that I thought we ran, Iowa State head coach Steve Prohm said. "We've just got to get better offensively. Too many offensive rebounds over the past two games."

Forward Deonte Burton, who Prohm challenged at the beginning of the season in average a double-double, showed his scoring prowess. He started the game white hot, dropping 13 points in the first four minutes.

He went 3-for-3 from the 3-point line and 5-for-5 overall in that span, boosting Iowa State to a 13-lead. Iowa State scored, piling on 25 more points thanks to a 13-2 run to take a 39-20 halftime lead.

Burton cooled off his 100-point stretch. In the overtime loss to the Bearcats, the Cyclones only put up 43 points in the second half.

Iowa State's 48-22 halftime lead just falling tonight," Burton said. "I think I'm just getting more comfortable out there and just getting more shots."

"I think I'm just getting more comfortable out there and just getting more shots," Burton said. "But in the summer, I was working on my shot and I've been unconcerned about the scoring woes.

The 20 points is great, but for this team to be great, we need that 12-rebound game against Georgetown. That's what we need him to give me, as he give me a spark.

Transfer guard Donovan Jack had his best game as a Cyclone in a loss to Burton's good play, finishing with 15 points on 5-of-9 shooting. After dealing with a wrist injury entering the season, he's been mired in a shooting slump, but that changed Monday.

"The 20 points is great, but for this team to be great, we need that 12-rebound game against Georgetown. That's what we need him to give me, as he give me a spark," Prohm said. "If you're not figuring out ways to get your team better, you're going to fold in February and March."
Tuition
Student Government Senator Joel Leath said that differential tuition is the wrong approach.

"While graduate students may make more after they graduate, that doesn’t mean the student is prepared to come to Iowa State in the first place," Leath wrote in an email to the regents and Iowa State administrators.

The last thing we want is for students to not pursue the career they want because it costs more than other programs," Staudt said.

Jackson said that the board had heard much different input in its discussions about his thoughts regarding the proposals, Staudt said.

"I’ve expressed my concerns multiple times to the board about the growing divide between resident and non-resident tuition, especially as state funding continues to decline," Staudt said. "The burden is being put on nonresident and international students."

"The differential tuition rate will be implemented over a three-year period and will equal the current international tuition rate in place, which is $11,568, when fully implemented. The proposed first-year supplement for all three regent universities, which includes Iowa and the University of Northern Iowa, would implement a $1,500 supplemental increase."

"The burden is being put on nonresident and international students," Jackson said. "The burden is being put on nonresident and international students."
Healthy holiday baking recipe

By Bridget Dagen
@wokandmascotly.com

Baking and the holidays go hand in hand. When you are craving something guilt free and easy, try baking cookies that are guilt free and mouthwatering delicious. People will be satisfied, and your body will thank you.

Ingredients:
• 2 cups whole wheat flour
• 1 1/2 cups brown sugar
• 1 cup unsalted butter, softened
• 2 large eggs
• 1 teaspoon baking soda
• 1 teaspoon vanilla

Instructions:
1. Preheat oven to 350°F (175°C).
2. In a large bowl, beat the brown sugar and butter until light and fluffy. Add the eggs, one at a time, beating well after each addition.
3. Add the flour, baking soda, and vanilla and mix until just combined.
4. Drop by rounded tablespoons onto an ungreased baking sheet. Bake for 12 to 15 minutes or until the edges are lightly golden.

Variations:
- Chocolate chip: Add 1 cup mini chocolate chips
- Almond: Add 1 cup chopped almonds
- Oatmeal: Add 1 cup old-fashioned oats

Enjoy your holiday baking with these delicious cookies!
The pipeline, commonly referred to as the Bakken pipeline, has faced much opposition during its construction, which was initially intended to be completed by the end of 2016. In an email release by the Iowa Citizens for Community Improvement, Iowa CCI, the group announced that Iowaans will “sail to celebrate this temporary victory and demand the Iowa Utilities Board take similar action to protect Iowans and our water resources.”

Iowa CCI said it hopes to pressure the board to do so to protect the Dakota Access pipeline permit in Iowa.

The Iowa CCI is joining with other member organizations of the Bakken Pipeline Resistance Coalition, a group working to stop the pipeline, to pressure the board to protect Iowans and our water resources.

Wednesday, December 6, 2016

Iowa Gov. Terry Branstad criticized the Obama administration’s decision during his weekly press conference Tuesday.

“I wasn’t a proponent, it was the Obama administration that did that. The Corps of Engineers (is) not permitted to do it, or to be done,” Branstad said. “It tells me they don’t get the lesson.”

These actions led to 2,000 people that built this pipeline through Iowa. The some wisdom says that make America great again. They voted for Trump... these people supported Donald Trump because they want a leader that’s for jobs, that’s going to make America great again, but also make America energize. Iowa CCI, the group working to repel the breach of the pipeline, hasn’t learned the lesson that Iowans will “rally to victory and demand the announcement that the pipeline construction of the Bakken pipeline.”
