This Book is brought to you for free and open access by the Iowa State Daily, 2016 at Iowa State University Digital Repository. It has been accepted for inclusion in Iowa State Daily, April 2016 by an authorized administrator of Iowa State University Digital Repository. For more information, please contact digirep@iastate.edu.
When Dan Brotherton and Megan Sesee started their reign as president and vice president of Iowa State Student Government, part of their goals was to increase faculty transparency and incorporating traditions back into campus life. They also added that in order to do that, it needs to focus on what is important, instead of what is popular.

That, and ideas of students overall exposure their disadvantage with university administration. The week after a Donald Trump-inspired post lead to what is often ripping a poster of a Latino student prominent, sending the campus community into a separate room growing up. For it to be open and honest, Monday through Friday, I met with student groups until 10 or 11 at night to try it. It was during this time and the weeks after that Brotherton and his team worked with administrators and leaders of multicultural student organizations to open the space in September that further exposed minority students’ experiences of racism, bigotry and personal. “That was the plan, and that was the goal,” Breitbarth said. “That was the plan, and that was the goal.”
Fisher Theater to feature ‘The Secret Garden’

By Megan Gilbert

Fisher Theater’s audience will be transported to 19th Century England through the lens of children’s author Frances Hodgson Burnett’s 1911 classic, “The Secret Garden.”

“The Secret Garden” is based on Burnett’s novel of the same name, which follows the story of an orphaned girl named Mary Lennox, who finds a way to get inside a garden. Much like Mary, the dormant plants seem to be alive and well, and she finds that the garden is her escape from a gloomy household. She meets a young boy named Dickon, who befriends the garden and teaches her how to bring new life to the garden. The two form a special bond and work together to revitalize the garden. The story is set in different parts of the world, including England and India, and follows the adventures of the main characters as they overcome challenges and obstacles.

In the production of “The Secret Garden,” the cast and crew will bring the story to life with vibrant costumes, scenic design, and original music. The production will feature a talented ensemble of actors and actresses who will bring the characters to life, creating a captivating and heartwarming experience for audiences of all ages.

The show will be performed at the Fisher Theater on campus, with tickets available for purchase through the ISU Department of Fine Arts. For more information, please visit the Fisher Theater’s website at http://fishertheater.iastate.edu or contact the box office at 515-294-2403.

Energy Secretary Ernest Moniz to give commencement address

By Alex Hanson

United States Secretary of Energy Ernest Moniz will deliver the undergraduate commencement address during a visit to Ames in May. He also includes a visit to the Ames Laboratory.

The commencement ceremony will be held at 10 a.m. on May 7 at Hilton Coliseum.

Moniz has been a strong advocate of science and technology, and his focus will likely be on the importance of scientific research and education. As the former director of Lawrence Livermore National Laboratory, he has been involved in many important scientific projects, including research into the development of new energy technologies.

The commencement will be broadcast on Iowa State’s website and will be available to all ISU students, faculty and staff.

Questions should be directed to Student Affairs, or to the ISU Office of the Advancement of Science.

Correction

The Iowa State Daily welcomes corrections and suggestions for improvement. To submit a correction, please contact our editors at 515-204-5684 or send an email to editor@iowastatedaily.com.

Richard McCarty speaks in an audience at the Great Hall of the Memorial Union about his views on Christian sexual ethics. McCarty talked about "the life to come" from Hebrew scripture. McCarty believes there are ultimately missed signals on this life to come within these scriptures. The cruel and ruthless soul of Judas helps guide receptions and discussions for the Hebrew scriptures. He said it has ultimately been stated that there will still be on past death and into the future.

One group on campus believes there needs to be more opportunities for international students, and how they can be better integrated into Iowa State’s campus, and it is presenting ideas at the upcoming International Student Leadership Conference, on Saturday, April 9, in Carver 204. The International Student Conference is expected to attract more than 200 students to attend the event, which will include a variety of presentations, round tables, and opportunities to register for various international opportunities. The event is expected to draw 100 students from the visiting student leaders, 50 students from the International Student Conference, and 30 students from the International Student and Faculty Association.

Iowa in danger of dog flu outbreak

By Tara Lawson
Features Editor

A dog flu outbreak has recently struck Chicago, and some experts expect it to spread to Iowa.

"We're worried about a potential outbreak in Iowa," said Matthew Pappas, veterinarian at the College of Veterinary Medicine. The outbreak was first reported in Iowa in 2013, and it has since spread to other states.

Pappas said the virus is currently spreading in Iowa, and it is expected to reach Iowa in the near future.

"We're concerned about the potential for this virus to spread in Iowa," he said. "The virus is currently spreading in Iowa, and it is expected to reach Iowa in the near future.

IOWA STATE DAILY
Mississippi law serves as excuse for bigotry

Mississippi Governor Phil Bryant signed House Bill 1326 into law on Tues- day, which is a sort of strengthening of the Religious Freed- dom Restoration Act of 1993. It allows businesses, landlords, and organizations the right to deny service to members of the LGBTQ community, single mothers, transgender individuals, and anyone else whose lifestyle offends the deep religious beliefs of the owner.

The law serves as an excuse for bigotry, where businesses can legally target the transgender community by refusing parking permits assigned at birth. By omitting the word “gender,” it also discriminates against those of different sexual orientations and those who do not share a fundamental view of sexuality, the state of Mississippi once again trumps itself in the battle of discrimination and acceptance, thereby devaluing and discriminating against those of different sexual orientations and those who do not share a fundamental view of sexuality. The state of Mississippi once again trumps itself in the battle of discrimination and acceptance, thereby devaluing and discriminating against those of different sexual orientations and those who do not share a fundamental view of sexuality.

Cyclones ready to return to court, continue success

By Los Abicht
@iowastatedaily.com

Now boasting the winningest season record in ISU tennis history, the 13-3 line-up has a chance to make history this weekend.

After picking up their first Big 12 road win against West Virginia (4-6, 3-5 Big 12) last weekend, the Cyclones look to win their third straight conference weekend.

The Cyclones filled days with two-a-day practices, which included team races and individual practices.

But the main focus was on preparing for the Kansas (12-2, 9-1 Big 12) and the Jayhawks (12-2, 2-1 Big 12).

The Cyclones have won all two-a-day practices, which included team races and individual practices.

But the main focus was on preparing for the Kansas (12-2, 9-1 Big 12) and the Jayhawks (12-2, 2-1 Big 12).

Softball remains positive, strides for more
Yener is currently an associate professor and chair of the board of governors of the IEEE Information Theory Society for the 2015–2017 term. She also served as their treasurer from 2012–2014 and the student committee chair from 2007–2011. She was the co-founder of the Annual North American Symposium on Information Theory. She also served as an editor for several IEEE publications. She is currently an editor for the IEEE Transactions on Mobile Computing as well as a senior editor for the IEEE Journal on Selected Areas in Communications.

Marlyn Wolf — professor in the School of Electrical and Computer Engineering at Georgia Institute of Technology and Illinois “Ray” Nesterke distinguished chair of embedded computer systems — will visit Monday and Tuesday and present at 10:30 a.m. Monday at 3043 CprE Addition. Wolf earned her bachelor’s, master’s and Ph.D. in computer engineering from Stanford University in 1986, 1987, and 1990. She was also a faculty member of Princeton University from 1990 to 2007.

Her research interests include cyber-physical systems, embedded computing, embedded video and computer vision and very large-scale integration systems.

She is a fellow of the IEEE and Association for Computing Machinery, and an IEEE Computer Society Golden Cist member.

Ashling Khokhar — professor and chair of the electrical and computer engineering department at Georgia Tech’s College of Engineering the Golden Core member.

Khokhar received his bachelor’s in electrical engineering from the Georgia Institute of Technology, Lahore, Pakistan, his master’s in computer engineering from the University of Southern California, and his Ph.D. in computer engineering from the University of Southern California in the 1980s. She was a faculty member of Princeton University from 1990 to 2007.

Her research includes context-aware wireless networks, computational biology, health care data mining, content-based multimedia modeling, retrieval and multimedia communication and high-performance algorithms in information technology.

She has contributed to five edited volumes and co-authored two textbooks, 53 publications in archival journals and 158 refereed conference papers. His research has been supported by the National Science Foundation and National Institutes of Health. In 2001, he was elected as a fellow of the Institute of Electrical and Electronic Engineers for his contributions to multimedia computer and hardware. He is also a member of the Phi Kappa Phi honor society.

Wolf and Khokhar are among the next two candidates who will visit Iowa State. Both said they are looking forward to visiting campus to learn about Iowa State and its traditions.

“...I’m looking forward to meeting people and getting a sense of what Iowa State has to offer. I’m especially looking forward to meeting the engineering students and learning more about their experiences and their interest in pursuing careers in engineering,” Wolf said.

And while traditions are fun, they are also looking toward the future success of the electrical and computer engineering departments.

The current and coming chair are focusing on student recruitment. The search, said Khokhar, “should be based at Iowa State’s College of Engineering in the top 20 universities in the nation.”

Wolf had similar comments. “It will be important to not be difficult to see the department in the top 20 within four to five years,” Wolf said. “A decision should be made sometime in May after the search committee meets with the remaining candidates.”

“...I hope to have an opportunity to visit with some of the students and other faculty who will be visiting campus. It will be great to see how Iowa State has continued to improve,” Wolf said.
