Cyclones fall to Hawkeyes 44-41 in overtime

The end of Saturday’s Cy-Hawk game felt like a strange episode of “The Twilight Zone.”

In 2011, Iowa State knocked off Iowa in triple-overtime, 44-41 at Jack Trice Stadium. Iowa State's game-winning touchdown was scored in the west corner of the south endzone after Iowa had made a field goal in the previous half of overtime.

Just six short years later, the 2017 Cy-Hawk game ended with the same score, also in overtime, in the same corner of the same end zone.

The only difference was the winner — and if one or two plays had gone differently, maybe Iowa State could have walked out victorious.

What went right

Iowa State's offense answered the challenge presented by Iowa's defense. After the Hawkeyes shut down Wyoming in week one, holding the Cowboys and potential first-round NFL pick Josh Allen to only three points, the Cyclones moved the ball up and down the field Saturday.

Quarterback Jacob Park threw for 347 yards and four touchdowns. His favorite target, Allen Lazard, caught six passes, including two touchdowns, including a 74-yarder to give Iowa State a 38-31 lead with two touchdowns.

In two games this season, Butler already has 12 catches, 203 yards and three trips to the end zone.

Butler's emergence was a main theme of off-season workouts. Coaches and teammates alike raved about his improvement from last year, when he had nine total catches for 134 yards and two touchdowns.

Iowa led the game into overtime when Iowa State was near the end zone. Iowa had made a field goal in the previous half of overtime.

What went wrong

Iowa State couldn't have been in position to win without Butler's career-best performance.

In overtime, the Cyclones had two chances to end the game, but Butler also had a critical drop on third down that situation in the first place.

Additionally, Iowa State made costly mistakes with the lead during regulation.

Iowa State would have been in position to win without Butler's career-best performance.

Iowa State wouldn't have been in position to win without Butler's career-best performance, but Butler also had a critical drop on third down in overtime when Iowa State was near the end zone.

“People want to say Hakeem's drop at the end, that's the reason why [we lost],” Lazard said. "But that's really not. There's plays [that hurt] all over the game, including myself.

As a leader and as a senior on the team I'm going to push him and make sure that never happens for him again.”

Campbell pointed out that Butler and the other receivers with drops also made some “incredible plays” that allowed Iowa to be in that situation in the first place.

Because of the drop, Iowa State had to settle for a field goal.

Iowa’s touchdown on the ensuing possession won the game.

Additional, Iowa State made costly mistakes with the lead during regulation.

Iowa State's attack all day long, but with a three-point lead and just six minutes to go in the fourth quarter, Park threw a costly interception that allowed Iowa to tie the game.

Without that turnover, Iowa State could have taken valuable time off the clock for Iowa's comeback.

“People want to say Hakeem's drop at the end, that's the reason why [we lost],” Lazard said. “But that's really not. There's plays [that hurt] all over the game, including myself.

College looks back at big year

BY TRISTAN WADE
@IOWASTATEDAILY.COM

The College of Business will kick off Business Week Monday, which is five days packed with activities for students within and outside of the College of Business.

Business Week is an event that the College of Business has held since 1995, and is meant to provide students networking and professional development possibilities.

Over the past year, the College of Business has experienced many important beginnings and milestones, capped off with Thursday's enrollment announcement: Iowa State's College of Business is the fourth largest college at Iowa State at 4,921 students.

The 2016-17 academic year launched with a new program in the College of Business. In August 2016, a Ph.D., as well as a minor, in entrepreneurship was offered for the first time at Iowa State. It was the first of its kind at a public university in Iowa. Students could begin the program in fall 2016 and the program was listed in the catalog beginning fall 2017.

"Many of our graduates go on to work for small businesses, and to have that degree and experience in entrepreneurship is very valuable," said Judi Eyles, assistant director of the ISU Pappajohn Center for Entrepreneurship.

The fall of 2016 was a busy time for the College of Business. The college experienced a then-record enrollment of 4,772 students, and in September it began its CEO Speaker Series.

It was an idea of College of Business Dean David Spalding, and started with Dan Hous ton, CEO of Principal Financial Group.

“This is a unique opportunity for students that you don’t see in many business schools,” Spalding said.

The series has had a total of five installments so far, with a sixth coming during next week's Business Week.

Other speakers in the series so far include CEO of Union Pacific Lance Fritz and CEO of TIAA Financial Services Roger Ferguson, who each came to Iowa State in April of 2017.

The end of the school year brought good news for the College as well. On May 3, 2017, it was announced that the company Kingland, whose CEO and chairman, David Kingland, is a member of the College of Business Dean’s Advisory Council since 2009, donated $1.5 million to Iowa State, some of which went to the College of Business.

"Iowa State has been a tremendous collaborator with Kingland, and this is our way to say thank you and to continue to partner in the next generation of software, data and innovation," Kingland said.

The money was meant to support data analytics across three colleges at Iowa State, including the College of Business. It provided eight named faculty positions to support professors who taught material relating to data analytics. The gift also went toward a scholarship fund for the college, that can be awarded beginning this fall.

In the past year, the College of Business has created a new lecture series, minor and graduate opportunities for its students.

In the past year, the College of Business has created a new lecture series, minor and graduate opportunities for its students.

"We are deeply appreciative of their generosity to expand their namesake building, thus ensuring we have the necessary space to provide our students a world-class education for years to come," said Benjamin Allen, interim president at Iowa State.

The last year has positioned the College of Business to have an even more successful year this year.

Business Week will begin Sept. 11 and will last through Sept. 15. It will feature the latest part of the CEO Speaker Series Kenneth Sullivan, CEO of Smithfield Foods visiting Iowa State.

Information about all the events during the week can be found on the College of Business’s website.
Enrollment decrease first in a decade

BY DANIELLE GEHR
@dowastatedaily.com

Iowa State, after consecutive record enrollment over the past decade, will find relief in what administration called a "leveling off."

The difference between this year’s enrollment and enrollment 10 years ago for the College of Engineering is over 4,000.

Martino Harmon, the senior vice president for student affairs, said the college’s first drop in enrollment since 2007 is partially due to trying to manage their enrollment by becoming more selective.

“IT’s good that we’re still maintaining a good enrollment,” Harmon said. “I don’t know that the university could sustain, the massive growth like we were having a few years ago without the influx of significant resources.”

With growth comes a need for more space and more faculty. The College of Engineering raised some requirements to end the significant growth.

For other colleges, Harmon said, there isn’t really a clear reason why some went down and others went up in enrollment.

“It could just be a product of a particular major or set of majors are really hot now and students are gravitating towards those,” Harmon said. “So, really it’s a little bit hard to actually kind’ve break that down by college as for the reasons why.”

Harmon said he remembers forensic science became popular when CSI was on TV. Any college that offered that major was booming until the fad ended.

“I know what we are trying to do is become little bit more strategic in how we can be more predictive and calibrate recruiting by college a little more, so we can have a sense of where each college really wants to be,” Harmon said.

Laura Doering, former registrar at Iowa State, just started as associate vice president for enrollment management and student success. In the coming years more information may be available on why certain colleges have a raise in enrollment and others have a decrease.

David Acker, an associate dean in the College of Agriculture and Life Sciences, said they were expecting the decline after seeing Iowa high school graduation rates decrease over the past few years.

Harmon said he does not know if this has a correlation between this and Iowa State’s enrollment because the decline is slight.

“The decline in new direct from high school students is really a combination of a few different factors,” Harmon said. “I know that just about every institution in the country saw a decline in new international students.”

Iowa State saw a decline of 102 new international students. Harmon said this is fairly consistent with institutions around the country.

“We’ve been up for many years with new direct from high school students and at some point, sometimes you level off because maybe another institution is offering a really competitive scholarship program,” Harmon said.

Harmon said South Dakota started offering in-state tuition to Iowa residents though he doesn’t know if this had a direct correlation.

Harmon said the direct from high school enrollment last year, 6,325, was a record number. This year’s class of 5,944 is one of the highest in Iowa State’s history.

“So, we don’t necessarily panic to say, ‘Oh my gosh, we are down from last year.’ But if you look back historically, that’s a very strong number,” Harmon said. “I think sometimes we get too caught up in comparing to last year.”

Some colleges experienced a decrease in enrollment this year while others experienced an increase. However, enrollment is still higher than it was in the past.

Justin Robert Beales, age 19, of 245 Richardson Ct Unit 3290 - Ames, IA, was cited for possession of a controlled substance at Lot 63 (reported at 9:05 p.m.).

Jack Alexander Barbour, age 18, of 2152 Lincoln Way Unit 1248 - Ames, IA, was cited for possession of a controlled substance at Lot 63 (reported at 9:05 p.m.).
Propaganda about DACA is all lies

BY DAVID KARAYOF
@Iowastatedaily.com

Last Tuesday, Attorney General Jeff Sessions announced that the Obama-era executive order titled “Deferred Action for Childhood Arrivals,” DACA, would be rescinded in six months’ time.

Although DACA did not grant citizenship, it allowed children who were brought to the United States as children to apply for what is known as an “Individual Taxpayer Identification Number.” ITIN is issued by the IRS to provide a method for anyone ineligible for a social security number to still pay an income tax, which amounts to roughly $20 billion, annually.

Sessions also mentioned this administration’s dedication to the “rule of law”, which is hard to believe considering the executive pardon of former Arizona Sheriff Joe Arpaio just last month. Arpaio, who proudly referred to his jail as a “concentration camp” was convicted of criminal contempt after refusing to abide by a federal court order to cease his illegal detaining of suspected immigrants.

There can be zero nuance in the debate on immigration status, a civil matter, yet it’s justified for the president to abuse his executive privilege in a direct attack on our system of checks and balances? This pardon goes against the constitution — he does not have the power to strip the judiciary of their power. Nevertheless, this sends a clear message that outrageous violations against the rights of Americans will be excused if it is to further the current administration’s agenda.

By fanning the flames of intolerance and laying blame on the “them,” the GOP have convinced their voters to disregard reason, ethics and morality in exchange for regressive policy and tribal impulse. If Congress is unable to pass legislation by March, thousands will lose their status each week. Are we really going to deny amnesty for those who’ve been alongside us, pledging allegiance to our flag, since childhood?

Reflect with solidarity on Sept. 11

This year’s freshman class was born around 1999, three years before the terrorist attack on the World Trade Center and Pentagon. And whether you have memories from that horrific day or not, we all can agree that today is a day for remembrance, unity and solidarity.

Just as we have recently seen with Hurricane Harvey, our first responders are on the front lines when disasters strike. On Sept. 11, 2001, we witnessed the best New York City, Washington D.C. and the surrounding regions had to offer as first responders risked their lives to save others. Their courage and selflessness knew no bounds as men and women rushed into burning buildings in an unknown attack. Their sacrifices should be honored and revered how communities pull together in a time of need.

The world watched in the aftermath of the attacks as a nation came together to grieve the loss of innocent lives and heal the wounds of a nation senselessly attacked. NATO enacted Article 5 — a collective defense agreement that considers an attack against one member as an attack against all members — for the first, and only, time in history after the attacks on Sept. 11, 2001. Unity, both internationally and domestically, in peace time and war time, has served us well. Let us remember how nations can come together in defense of and support of one another so that we all may live happier, more peaceful lives.

“The only thing we have to fear is fear itself.” Wise words from Franklin D. Roosevelt’s first inaugural address still ring true today. Terrorism succeeds only if we let it change our daily lives for the worse and give up our freedoms and liberties. It is unlikely that there will be a drastic decline in terrorist incidences in the near future. However, it remains vital that we respond globally with words and actions of solidarity. This means on social media and also through better information sharing among allies. Our solidarity must be multifaceted, both symbolic and tangible, if we are to one day live in a more peaceful world.

Take some time today to reflect on how the world has changed since Sept. 11, 2001. Remember those who sacrificed their lives that day, and in all of the days that have followed, fighting terrorism and senseless violence.

Perhaps it was Kamari Cotton-Moya’s injury that doomed Iowa State in the Cy-Hawk. Or, maybe it was the tackle that should have been, but never happened in Iowa’s 44-41 overtime win.

“T hat’s what redshirt senior linebacker Joel Lanning used to describe the 46-yard touchdown pass Akrum Wadley caught late in the game — the touchdown pass that tied the game at 38.

“T missed that tackle on [Akrum] Wadley,” Lanning said. “It’s probably one of the biggest tackles of my career that I’ll have.”

Wadley caught the ball and ran to the outside, but once Lanning met him, Wadley eluded the former quarterback and scampered down field. Once down field, Wadley was able to pass players on Iowa State’s defense.

“Defensively, we did everything we could,” Lanning said. “We had them stopped. The offense put up a bunch of points for us and it just wasn’t our day.”

And, defensively, Iowa State certainly did everything that they could have to walk out of Jack Trice with a win in the Cy-Hawk game. From the start of the game, the Cyclones’ defense made it known that they were there to play.

On Iowa’s first offensive play of the game, redshirt senior Brian Peavy blew up Wadley in the backfield for a loss of three. The very next play Marcel Spears Jr. and Vernell Trent stuffed Wadley for no gain. Then, Joel Lanning tackled Wadley on a gain of three. That was a three-and-out for a defense that had been dubbed the weakness of Iowa State’s football team.

From that point on, Iowa was able to pick apart the defense with their potent rushing attack. Along with Wadley, Iowa also has James Butler and both were able to wear down the defense with a total of 38 rushing attempts between the two.

“At times Wadley was able to expose the front seven, specifically. The junior finished his day with 118 rushing yards and 72 receiving yards for two touchdowns.”

The Cyclones had just scored to cut Iowa’s lead to 21-17, which had Jack Trice buzzing. The very next drive, Spears had a tackle for a loss of three, a tackle for no gain and a tackle for a loss of three, consecutively. At that point Jack Trice was alive. Very alive.

That was one of the last times the crowd was a factor. Just when the defense had come back to life, they evaporated into the sunny skies of Ames and didn’t come out to save the game. It all came full circle for the defense on that Wadley touchdown and then in overtime. The constant running attack already had the defense on its heels and the overtime just continued that approach.

“We get into overtime, but we just couldn’t make the final dagger play that you’re going to need to win the game,” Campbell said. “At the end of it, hats off to them, but I’m really proud of our kids in terms of their effort and their attitude.”

Effort wasn’t a problem for this Iowa State team as they clawed back from several deficits and fed from their defense at times. Nonetheless, this game goes down as a loss and another Cy-Hawk loss. The defensive showing that was put on the field today was levels above the performance Iowa State brought last year though.

After two in-state foes, the Cyclones travel to Akron, Ohio, for their first road test of the season, but more importantly the first road test for the inexperienced front seven of the defense that, at times, has showed glimpses of a bright future.

“If you’re going to find out a lot about who we are and how we are able to respond [next weekend],” Campbell said. “I thought our team played as hard as we could, but you’re going to figure out a lot about who the Iowa State Cyclones are.”
Energy bites with fall flavor flair

BY JILL OBRIEN
@IOWASTATEDAILY.COM

Feeling in a funk this fall? Try a couple different energy bites to get you through the long days. Full of oats, peanut butter and other healthy ingredients, energy bites are easy to eat on the go, and will keep you fuller, longer.

**DARK CHOCOLATE PEANUT BUTTER ENERGY BITES**

**Servings:** 16

- 16 dates, pitted
- 1/2 cup peanut butter
- 1/4 cup unsweetened cocoa powder
- 1/4 cup dark chocolate chips

**Directions**
Add the dates, the peanut butter, the cocoa powder and the vanilla extract to a food processor (if you don’t have one, a blender should work). Process the mixture on high speed until smooth with no large chunks, scraping down the sides to make sure everything is incorporated.

Continue mixing on high speed, adding the water one tablespoon at a time until the mixture is soft.

Transfer the peanut butter mixture to a bowl. Add the oats and the chocolate chips.

Stir everything together with a wooden spoon or rubber spatula, and then roll the mixture into about 16 balls.

Line the bites on a parchment-lined container and store them in the refrigerator.

Recipe courtesy of thebusybaker.ca

**PUMPKIN PIE ENERGY BITES**

**Servings:** 14

- 1 cup oats
- 1/4 cup flaxseed meal
- 1 1/2 teaspoon cinnamon
- 1/4 cup peanut butter
- 2 tablespoons pumpkin
- 2 tablespoons maple syrup
- 1 tablespoon honey
- 1 teaspoon vanilla
- 1 teaspoon mini chocolate chips (optional)

**Directions**
In a medium sized bowl combine all of the ingredients. Stir together all of the ingredients until thoroughly combined.

Place the mixture in the fridge for 15 minutes. Roll the mixture into approximately one inch sized balls.

Store the bites in an airtight container lined with wax paper. The bites can be stored for up to a month.

Recipe courtesy of reciperunner.com

**APPLE CHAI ENERGY BITES**

**Servings:** 16

- 1 1/2 cups rolled oats
- 1/2 cup nut butter (peanut butter was used in this recipe)
- 1/4 cup honey
- 1 1/2 cup dried apples, chopped
- 1/4 teaspoon cinnamon
- 1/8 teaspoon ground cloves
- 1/8 teaspoon ground cardamom
- 1/8 teaspoon ground ginger

**Directions**
In a large bowl, mix together all ingredients with a wooden spoon. If the mixture is too dry, add honey. If it’s too wet, add oats.

Using a tablespoon, scoop dough out and roll between palms to create the balls.

Store in an air tight container or gallon-size bag in the refrigerator or freezer.
