Iowa State soccer faces a brand new challenge this weekend; two games in Colorado, where the altitude changes team strategies.

Cyclones sweep No. 17 Panthers

BY SPENCER SUCKOW
@iowastatedaily.com

It was the first-ever sellout for a Northern Iowa volleyball match in the McLeod Center — 7,000 fans watched as purple-clad Panther fans packed the arena hoping to make life miserable for in-state rival Iowa State.

But the Cyclones were unfazed. After falling to the Panthers the last two seasons in five-set marathons, Iowa State took care of the state’s only ranked team Wednesday night in straight sets, 25-20, 25-20 and 32-30.

The win moved Iowa State’s record to 3-0 on the season, and dropped the 17th-ranked Panthers, fresh off wins over No. 13 Creighton and No. 5 Kentucky, to 2-2. After the match, Iowa State head coach Christy Johnson-Lynch praised her team for cohesiveness in the handling of UNI’s constantly fired-up crowd.

“That atmosphere was pretty amazing,” Johnson-Lynch said. “I thought last weekend was a little disappointing in that I thought we didn’t really ever look like a team. I’m so happy to see that we looked like a team tonight, not just a bunch of great players.”

In terms of the actual game, there was quite a bit of sloppiness from both teams despite the 3-0 sweep by Iowa State.

The Cyclones and Panthers combined for a total of 19 service errors. Jess Schaben, outside hitter, goes to hit the ball toward Ole Miss during the Aug. 24 game in Hilton Coliseum. Cyclones won 3-0.

EMPOWERING FARMERS
If elected, Tim Gannon aims to increase ISU ag research

BY DEVYN LEESON
@iowastatedaily.com

Tim Gannon, Democratic candidate for the Iowa Secretary of Agriculture, has a long list of policy goals relating to research, conservation and empowering farmers.

Gannon grew up in Mingo, Iowa on a century farm his family had owned since 1888. Growing up, Gannon said he learned the importance of agriculture to the state of Iowa, especially as he saw first-hand what the farm crisis of the 1980s did to the state’s economy:

“That ripples out to Iowa’s economy,” Gannon said.

“Those small towns suffer, manufacturing suffers because we build so much for agriculture and also our state budget ends up suffering.”

This idea, central to his platform, is why Gannon said he wants to improve Iowa’s farm economy.

“I’m excited because I think there is a lot of opportunities in Iowa agriculture and its economy, but we have to make sure our economic opportunities are there for people to want to live in rural Iowa. We have got to figure out how we can add value so people will farm knowing they can make a living doing it,” Gannon said.

Gannon said although Iowa is growing in population, it is not growing everywhere, possibly because of a lack of opportunities for Iowa farmers.

“Iowa has grown by 90,000 people, but 71 of 99 counties lost population partially due to the state of our rural economy,” Gannon said.

Gannon said investment in research institutions like Iowa State and putting priorities on conservation efforts could ensure Iowa has a strong economy for years to come.

“In the past we had increased funding for ag research, but for the last five years our funding has flattened,” Gannon said. “I would support raising our funding to the ag research station so that by fiscal year 2023 we would be spending $37 million at the ag experiment station.”

“If we did that, it would send a very strong message that we want to be involved in the next generation of research that we are very much open for business when it comes to research,” he said. “That would help us bring in the top research talent and also make us much more competitive for grants.”

In 2001, the funding for the ag research station was at its peak at around $37 million. Today that number is slightly less than $30 million.

This research is what keeps Iowa farmers productive and effective, Gannon said.

“The claim that we feed the world is largely due to our productivity,” Gannon said. “But to increase that productivity and stay at the top we need to continue investing in research.”

Investment in conservation efforts, specifically protecting Iowa’s topsoil, is another focus Gannon says will support Iowa’s farmers.

“Voters in the state of Iowa in 2010 supported by over 60 percent the creation of a trust fund that would take ⅜ of a cent on sales tax money and put it towards conservation efforts on soil and water,” Gannon said.

This fund was never created as the legislature never passed the bill. But for the past five years our funding has flatlined,” Gannon said. “I would support raising our funding to the ag research station so that by fiscal year 2023 we would be spending $37 million at the ag experiment station.”

“When it comes to biofuels, Gannon would ask for a waiver from the EPA to allow for ethanol and biodiesel to be sold year round.

“A lot of retailers don’t want to take on the expenses of carrying some parts of the year and others, having to change pumps as the seasons change,” Gannon said. “The EPA said it was close to signing that waiver back in May and now here we are, nearly four months later, with nothing to show. It doesn’t seem we are any closer.”

Gannon said other industries have gotten waivers that are impacting biofuels negatively.

“They have given these waivers to oil refineries and that has reduced demand for ethanol by 2.25 billion gallons and biodiesel demand by 300 million gallons,” Gannon said. “If they relocated that demand it would mean nearly 1 billion bushels of corn, nearly half of the carryover from last harvest, could be used.”

“In the past we had increased funding for ag research, but for the last five years our funding has flatlined.”

- Tim Gannon, Democratic candidate for the Iowa Secretary of Agriculture.
The incident involving airsoft guns took place near and around building 32 of Fredericksen Court.

Campus-wide, a text, a call and an email all conveyed an unerving message.

"ISU Alert: Report of two possibly armed individuals near building 32 in Fredericksen Court."

The first Iowa State alert since the news system's implementation warned students to stay away from the area and residents to stay in their apartments while police investigated. Iowa State engagement officer Anthony Greiter said they were pleased with the timeliness of the news system, a 12-minute response.

A couple hours later, the threat of gunmen on campus resulted in the confiscation of airsoft guns, which police said looked very realistic, and had the regulation orange tip removed, which is illegal.

Police spoke with four suspects, who were cooperative, and confiscated one airsoft rifle and three airsoft handguns. Two were cooperative, and confiscated one airsoft rifle and three airsoft handguns. Two were cooperative, and confiscated one airsoft rifle and three airsoft handguns. High school seniors across the United States wait for their first wave of letters from prospective universities. With eager parents at their side, college life is imminent. Among these seniors are the first-generation students. According to the U.S. Department of Education, a first-generation student is defined as a “[student] whose parents have never earned a bachelor’s degree but may have some postsecondary experience.” These students are the first generation in the family to attend, and receive a bachelor degree at a four-year institution. In fall 2017, Iowa State had 36,321 students enrolled. Among the numbers, at least 20 percent of the student population are first-generation students. But what does it mean to be a first-generation student? How do they go through college differently than traditional students?

I was born to two immigrants of Mexico, both of whom traveled to the United States in search of a better future. Neither of my parents attended college. My mother attended a few classes to better her English and to be a working citizen. My father did not attend any college. Working any job that could provide for my family, my mother always stressed the importance of college. Eighteen years later, I got accepted at Iowa State. Fast forward to the end of my junior year and college has definitely been one of the hardest experiences I have faced. Entering college was like entering a parallel universe, a culture shock like no other. Feeling like an outsider and not knowing where to turn, carrying a confidence that burns dimly but fights to stay. It often feels like a stumble uphill just to stay afloat.

My story isn’t unique. My experience can be shared with the thousands of students that battle a label silently, tucked away in daily life. These students have faced a similar dilemma before, during and after college. Katie Seifert, a Peace Corps Coverdell Fellow and graduate student at Iowa State, works with students of color, low-income and diverse backgrounds in the Des Moines area. The ISU 4U Program partners with students at Des Moines Public Schools and awards tuition assistance for those who meet requirements. Students that pass fifth grade are eligible for the enrollment process and can apply when enrolling for admission to Iowa State. The program strives to assist students to transition successfully between high school and college.

What happens when these students enter their first year of college? Seifert says students translate between two different worlds. One may be an environment with supportive peers who understand the stress of college and living on a campus that celebrates adventure. The other may be a home where there is no mental understanding of the successes and hard-work put in toward a degree; or perhaps a family still needs financial support from the student. Often, there’s a layer of guilt when these students are in the first generation of a family to pursue the dream of a college education.

“They learn to navigate through academic procedures, social procedures and leaving home, a big challenge for first generation students,” Seifert said. Kenyatta Shamburger, assistant dean of students at Iowa State, said these students are faced with doubt, questioning their abilities. A shackle wraps around their mentality of breaking the cycle to become among the first in the family to own a degree.

“Coming to college is a huge step. Feelings around, ‘Can I do this? Am I prepared? Will I do well?’” Shamburger said. “Most students have these thoughts, but first-generation students may add to that. ‘If I struggle, who do I go to?’” A student may receive unlimited support from their family, but that support can create a pressure to succeed. That added element from a community that may not have prior experience in higher education, causes a fear to not let anyone down. Nothing feels worse than feeling like a failure, and in this population, failure isn’t an option.

Shamburger says it takes a little bit longer for first-generation students to adjust. Without the help of parents, the college environment can feel overwhelming. A major barrier can be adjusting to the language used in a university setting. Deadlines, syllabi, award letters and locating resources can feel like walking through a labyrinth.

“We have to challenge ourselves not to assume that everybody comes into university with the same information or knowledge,” Shamburger said. “Is it something I should already know?” Navigating through these different spaces can be difficult. The Iowa State community provides spaces for first-generation students to be able to relate to each other. According to Seifert, extra-curricular activities prove beneficial. Having other peer support creates a space of understanding, helping them feel less like outsiders on campus.
Minatta’s tips for altitude adjustments

BY ZANE DOUGLAS
@iowastatedaily.com

What do cherry juice and dark chocolate have to do with college soccer? The sport of soccer is so heavily dictated by endurance and health. The Iowa State soccer team saw it when it had to play Purdue last Sunday in considerable heat, and they'll see it again this weekend as they travel to Colorado to take on Denver on Friday and Colorado on Sunday.

“He has a theory that cherry juice and dark chocolate is the way to go,” said redshirt sophomore midfielder Marin Daniel about coach Tony Minatta’s tips. “I think it’s going to take staying focused defensively in the first five minutes and last five minutes of each half,” Minattenberg said.

“More than anything, taking care of our bodies,” Steil said.

Steil has been a force this year for the Cyclones and after a few tough losses, Iowa State will need to use Minatta’s expertise and Steil’s leadership effectively as they head to the challenging climate.

“Keep grinding,” Steil said.

Iowa State’s weekend kicks off at 8 p.m. Friday against Denver. The game against Colorado begins after a few tough losses, Iowa State will need to use Minatta’s expertise and Steil’s leadership effectively as they head to the challenging climate.

“Just like the Purdue game, the team expects to see a heavy dose of substitutions to keep players fresh on Sunday. Dayja Schwichtenberg, the team’s sophomore goal-tender, will not need a substitution, so she needs to be at her best if the team wants to end the recent misfortune.

“We're expecting a battle,” Johnson-Lynch said. “Obviously we were a little concerned how we would’ve come back out of that.”

If the Cyclones were nervous, then those errors were their only ornaments later in the season.

Invitation, where they’ll play two matches on Friday and one note, she explained what it will take to stay healthy this weekend.

Minatta’s affinity for cherry juice and dark chocolate to help with the altitude shift, but on a more serious note, she explained what it will take to stay healthy this weekend.

“More than anything, taking care of our bodies,” Steil said.

Students, faculty and community members gather to do yoga on the lawn in front of the Campanile on Aug. 30 as a part of the Live Green! Initiative and its partnership with ISU Outdoor Recreation.

Molly Breen, Madelene Blandin, Sam Kunde and Alice Kenawell follow the instructors directions as they participate in the "Yoga on the Lawn" event held by a partnership between the Live Green! Initiative and the ISU Outdoor Recreation Services.

Sunny Camacho and Scott Nemec follow the instructors directions as they participate in the "Yoga on the Lawn" event held by a partnership between the Live Green! Initiative and the ISU Outdoor Recreation Services.

Participants take up a resting position after a session of yoga on the lawn in front of the Campanile on Aug. 30 as a part of the Live Green! Initiative and its partnership with ISU Outdoor Recreation.
While the new policy has already been approved and will likely change trademark officials plan to work with student organizations throughout the transition. Landon Wolfe, SCC advisor, met with officials briefly to voice the confusion many clubs faced. “Last week was the first time the students had heard any of the new policies. So, there were plenty of questions,” Wolfe said. “I feel lucky that the trademark officials have worked with our sport clubs.”

Yesterday Wolfe explained the guidelines to the clubs during the weekly SCC meeting. With the implementation of an SCC patch, clubs will be able to use trademarked images and words for competitive gear.

“Originally it was solely uniforms that were going to be able to use the Sport Club Council mark and then drop the ‘club’ of the end of the name,” said Wolfe. “Some of our sport clubs don’t necessarily have a uniform that it works with, for example, the ballroom dance club and wrestling robes.”

According to Leesha Zimmerman, Director of Trademark Licensing at Iowa State, SCC clubs will use the patch as a replacement for the word “club.” For example, instead of uniforms saying “Swimming Club at Iowa State,” with the use of the patch, the uniforms can say “Iowa State Swimming.”

Events such as Rodeo Clubs “Cyclone Stampede” will be allowed to keep the trademarked words in their name, as long as it is clear the event is sponsored by SCC.

Zimmerman said that she along with other trademark officials will be meeting with different clubs throughout the month to explain the guidelines and clear any confusion.

Sen. Sam Freestone voiced his concerns about the new trademark policy to university officials at the Student Government meeting Wednesday. Freestone introduced a controversial resolution regarding trademark at the previous meeting.

“Last week was the first time the students had heard any of the new policies. So, there were plenty of questions,” Wolfe said. “I feel lucky that the trademark officials have worked with our sport clubs.”

According to Freestone, this aspect of the policy is still being worked on and officials will continue to discuss this issue, and rewrite a resolution as they felt that the language in the current bill was too large of an issue to consider.

“I, too, think the wording of the bill is rather harsh and detrimental to the cause that Freestone is advocating for, which I think is noble,” said Speaker Cody Woodruff. “But I do think the language is a bit much.”

The point was also brought up by Woodruff that the resolution denouncing the trademark policy calls for the termination of the author of the policy, and the massive implications and ramifications of this bill with that in it. “This resolution calls for and could potentially result in a termination,” Woodruff said. “We are potentially talking about taking away someone’s job, someone’s livelihood, someone who calls themselves a Cyclone.”

The resolution was killed at the meeting tonight, but senators are looking forward to continue to discuss this issue, and rewrite a resolution as they felt that the language in the current bill was too large of an issue to move forward.

IOWA DEPARTMENT OF NATURAL RESOURCES
National Pollutant Discharge Elimination System Notice Date: 8/24/2018
The Iowa Department of Natural Resources is preparing to issue a NPDES (National Pollutant Elimination System) permit for the discharge described below:

DISCHARGER NAME AND ADDRESS
Iowa State University Municipal Separate Storm Sewer System Ames, IA 50010

LOCATION: Story County

RECEIVING WATERBODIES: Squaw Creek, College Creek, Lake LaVerne and other, undesignated waterbodies

Super Creek at the point of discharge is class A1 and WQW-07 river. Class A1 streams are rivers in which spawning is a major concern. Class WQW-07 is a river in which fish or other physical characteristics are superior or improved. The NPDES permit do not control water pollution from the discharge of potentially toxic materials. Class A1 streams are found in areas with pristine water that is free from serious harmful or hazardous contamination.

DESCRIPTION OF PROPOSED DISCHARGES:
The permit will authorize the discharge of storm water from the municipal separate storm sewer system. The effluent will be collected and discharged to Clew Creek, College Creek, Lake LaVerne and Squaw Creek. Anyone wishing to comment on or object to the proposed permit must do so by writing to The Office of the Adjunct General, 501 E. Fifth, Des Moines, IA 50309. Any comments must be submitted in writing in the form of a written statement to be read in open meeting or mailed to the address indicated above. If objections are received within 30 days of the date, the Department will issue a notice of objection. You may request a hearing by following the procedures described in the revised NPDES permit. Comments, objections, and requests for hearings must be addressed to: Department of Natural Resources, Storm Water Coordinator, 501 E. Fifth St., Des Moines, IA 50309.

Copies of this column, the proposed permit and other information are on file and available for public inspection from 8:30 AM to 4:30 PM Monday through Friday at the above address.
