Students unite for spring Holi celebration
ISU organization hosts cultural fight
By Whitley Mason
@iowastatedaily.com

With a bright sky and shining sun, students joined Saturday to celebrate the Hindu spring festival, Holi, in the reactivation field behind Old Main.

The Indian Students’ Association hosted the event in honor of the Hindu goddess Radha to celebrate the defeat of evil and to encourage participants of Holi to do away with all the bad things that had occurred before the celebration.

Mehul Shinde, president of the Indian Students’ Association, said the festival began during ancient times when the Hindu goddesses started to celebrate the defeat of evil and to encourage participants of Holi to do away with all the bad things that had occurred before the celebration.

“After we see to keep it as original as possible,” Shinde said. “We have all the colors and all the water we need.”

The event has been a popular and successful one for the student organization, with about 100 in attendance every year. The event takes place after the event in India, which is celebrated every year at Iowa State.

“A lot of people come to celebrate,” Shinde said. “I think the event is a great opportunity to embrace the Indian culture.”

Zaraa Chan, junior in electrical engineering, said, “I found it another opportunity to embrace the Indian culture.”

Two reviews from the BWRR Architecture Architecture architecture program at the University of Wisconsin.

Students to clash on capitalism, socialism
Debate between organizations aims to spark conversation
By Talon Delaney
@iowastatedaily.com

Polarizing views will clash Tuesday when Iowa State stu-
dent organizations, Turning Point USA (TPUSA) and Young
Democratic Socialists (YDS), debate seemingly opposite po-
tical-economical philosophies.

Both groups believe students should become more socially in-
volved in political and economic issues. They hope the debate will inspire the university community to participate in political debates and start conversations.

Ben Whittington, freshman in political science and debater for TPUSA, believes the debate will clear up misconceptions about capitalism. He and YDS are not out to “sell” socialism. They just want to educate.

“It’s pretty cool,” Shinde said. “In India we have big wells and we put coloring in the wells and use those people color the wells.”

Shinde said that the colors and lights can be intense in India.

The Indian Students’ Association has been hosting the event for about 10 years. The event takes place every year at Iowa State.

“I believe the debate will help students understand the whole world,” Iowa State students said.

“Socialism reformation will probably destabilize the whole world,” Anas Barmak, junior in chemical engineering and member of YDSA, said.

Beth Cone, sophomore in pre-business and pre-VTPUSA, debated with YDS. 

“Debate is a ‘hard sell’ when it comes to capitalism,” Cone said. “Students need to be exposed to new ideas.”

“Socialism reformation will probably destabilize the whole world,” Anas Barmak, junior in chemical engineering and member of YDSA, said.

Greektown shakes it up

By Nik Hoffman

IOWA STATE DAILY

The fraternities and sororities of the National Pan-Hellenic Council (NPHC) hosted the first of its kind student-led event in Greektown on Sunday, bringing together brothers and sisters to promote the various organizations. The event, called “Share the Love,” was designed to bring all the organizations together in one area to encourage interaction and networking.

Attendees were greeted with a selection of food from the NPHC organizations, including Greek and non-Greek organizations. Attendees had the opportunity to try food from different organizations and connect with other members.

“This is our first event of its kind, and it was a great success,” said John Smith, president of Sigma Lambda Beta Fraternity. “We had a great turnout and were able to connect with other organizations and members.”

The event was attended by around 200 people and featured food, activities, and music. Attendees were able to browse the food offerings from different organizations and participate in games and activities.

“I was really impressed with the turnout and the enthusiasm of the attendees,” said John Smith. “We are already planning on hosting similar events in the future.”

The event was organized by the Greektown committee, which is made up of representatives from different organizations. The committee worked together to plan and execute the event.

“We are really excited about the potential of this event,” said John Smith. “We hope to see even more organizations involved in future events.”

The next event is scheduled for next month, with more details to be announced soon.

Air Force commander advocates ROTC cadets to ‘be good person, that’s all you need’

By Emily Schner

IOWA STATE DAILY

The chief of staff of the Air Force, Gen. David L. Goldfein, urged the audience to focus on being a good person.

Speaking at the Iowa State University Spring Conference, Goldfein emphasized the importance of integrity and character.

“Your integrity, nobody can take that from you,” he said. “It’s your character that defines who you are.”

He also encouraged listeners to be thoughtful and kind.

“Be a good person, that’s all you need,” he said. “It’s the easiest thing you can do for yourself and others.”

Goldfein’s message resonated with the audience, who asked questions about leadership and the future of the Air Force.

A military career can be challenging, but Goldfein encouraged cadets to focus on the positive.

“Be a part of something bigger than yourself,” he said. “Be a leader, not a follower.”

The keynote address capped off the two-day conference, which featured a variety of speakers and workshops.

“I think Gen. Goldfein’s message was inspiring,” said John Smith, a sophomore at Iowa State University. “It’s important to remember that character and integrity are key in any career path.”

The conference concluded with a panel discussion on leadership and the future of the Air Force.

“Thank you for attending the conference,” said John Smith. “It was a great opportunity to learn from the experts and connect with other cadets.”

The next event is scheduled for next month, with more details to be announced soon.

Air Force ROTC cadets and their guest speakers were invited to present at the conference, sharing their experiences and insights with the audience.

“I think presenting at the conference was a great opportunity,” said John Smith. “It’s important to share our stories and demonstrate the value of a military career.”

The conference was organized by the Iowa State University ROTC chapter, which is committed to connecting cadets with local leaders and providing opportunities for professional development.

“We are proud to host events like this,” said John Smith. “It’s important to recognize the contributions of the Air Force and to inspire others to join the service.”

The next event is scheduled for next month, with more details to be announced soon.
Inside an animal shelter
Ams sites focuses on helping animals find a home

By Megan Salo
www.iowastatedaily.com

Ron Edwards, animal control supervisor for Ames, has worked with animal control and animal sheltering for 32 years at the Ames Animal Shelter.

Before he came to Ames, Edwards worked as the County of Los Angeles Department of Animal Care and Control. He said he is on the downhill side of his career and didn't want to retire in California, so when the position in Ames became available, he applied.

“This facility had a great reputation for saving lives, and the shelter I stood at had high euthanasia rates, so a lot of animals never made it out alive,” Edwards said. “What really attracted me to Ames was the high success of adoptions, and I’m proud to say we’ve increased that. But we only have two situations when euthanasia is necessary, and that’s the worst part,” Edwards said. “We’re in a great position when animals need to leave, and animal shelters in general have made a huge impact over the years.”

Edwards said that the best part of working with the shelter is helping animals, especially olds, find homes.

“I get up with a lot of animals back home, so it’s nice to be able to still interact with the animals even if they aren’t mine,” Iowa State junior Madaline Fraut said. “It’s also a great way to doed in study during exam times.

Edwards encourages everyone to visit the animals at the shelter, adopt if they can and humanely care for their pets.

“People rely on us to take care of them, and that’s what we have to do,” Edwards said.

Game not over

Video games provide education, improve social skills

By Issac Sinclair
www.situations.com

Video games are fun. I have yet to meet anyone who hasn’t enjoyed playing video games, even if they aren’t particularly into video games. There is no one who doesn’t enjoy having a good time playing video games, even if it is only to watch others play. This is why I believe that video games should be played by everyone, regardless of their age or gender.

The Monday video of a United Airlines passenger being physically attacked by airport security personnel that I saw was the first time I realized how important it is to have good customer service. I have had similar experiences in the past, and I know that good customer service can really make a difference in people’s lives.

I also believe that video games can be used to teach important life lessons. For example, when people play games, they learn to make decisions and solve problems. This is something that we all need to do in our daily lives.

I hope that you will consider playing video games and see for yourself how much fun they can be. I also encourage you to share your experiences with others so that they can see the benefits of playing video games as well.

---

Letter to the Editor

By Marc Pei,
Second-year graduate student in management information systems

The Monday video of a United Airlines passenger being physically attacked by airport security personnel that I saw was the first time I realized how important it is to have good customer service. I have had similar experiences in the past, and I know that good customer service can really make a difference in people’s lives.

I also believe that video games can be used to teach important life lessons. For example, when people play games, they learn to make decisions and solve problems. This is something that we all need to do in our daily lives.

I hope that you will consider playing video games and see for yourself how much fun they can be. I also encourage you to share your experiences with others so that they can see the benefits of playing video games as well.
to become an assistant coach was an offer she "could not turn up."

"I know Jamie Pollard and he's a great guy -- a great guy," Johnson-Lynch said. "He's a guy that the whole staff respects because of the work he has done over the years."

Pollard described the Iowa State coaching search as a challenging process, as "all six of them" had to make difficult decisions. "You're talking about a two-year span, so you're talking about a lot of hard work."

"What you have is the opportunity, the chance to step down at the end of the 2017 season," Pollard said. "We're looking for someone to step into the role that will be the best fit for our program."
Iowa State gymnast Haylee Young finishes with 39.1875 score at National Championship

By Austin Anderson
@Iowastatedaily.com

Haylee Young finished her junior season with a 39.1875 at the NCAA Gymnastics National Championship in St. Louis. Young competed alongside Oregon State on Friday afternoon, beginning on the floor exercise. Young started the meet with her best score of the year, a 10.875 in the all-around competition.

The next game had a similar feel as the first game, with Iowa State jumping out to an early lead and holding on to win, 25-14 while recording 20 kills and a .400 hitting percentage. "Winning is great," head coach Jamie Trachsel said. "But with two outs in the fifth inning of the first game, we were better and more consistent." The Cowgirls began each game striking first. The Cowgirls continued to battle, but the Cyclones' first batter, freshman Sami Williams, got on base and stole home for a 1-1 tie. Kelsey McFarland smacked a home run, giving the Cyclones a 2-1 lead back to 10-2. Then, senior Cathlin Bing led back to 22-16, but the Panthies scored four runs of the final four innings to push the score up to 22-18. And it was a problem for Iowa State in the fifth inning, when the Cyclones scored nine of the next 11 runs over the Panthers. UNI was quiet and deflated when they started coming back," Johnson-Lynch said.

Young was the only Cyclone to make all three conference games total at the Cyclone Sports Complex in Ames. This game also was the third match for K.J. Kindler, who was named head gymnastics coach head coach K.J. Kindler, won two matches against Northern Iowa and the next eight scores were awarded first team All-America honors, and the next eight scores were awarded first team All-America honors. "I think we got kind of sluggish and didn't think that they were going to start coming back," Johnson-Lynch said.

The Cyclones have two reasons to be proud of the victory. First, it was their first conference game win of the season. And it was a problem for Iowa State in the fifth inning, when the Cowgirls scored nine of the next 11 runs. "I thought our pitchers did a great job. We made some adjustments after the first game and continued to improve," Johnson-Lynch said.

Pick up a summer course at Mercy College when you’re back in Des Moines. Our 12-week summer session starts on the Tuesday after Memorial Day (May 31). Register as a Guest Student (non-degree seeking) and still earn college credit that transfers back to your home institution. Transcripts are not issued, so let’s learn from some of the best professors in central Iowa!

There are no registration fees!

**Classes Start May 31 - Liberal Arts & Science Classes**
