A better economical understanding of the value of water is in progress at Iowa State University after a $500,000 award was given to researchers at The Center for Agricultural and Rural Development by the U.S. Environmental Protection Agency (EPA).

“The reason the EPA is interested in this kind of analysis is that they are tasked by the government to do a Cost Benefit Analysis of water quality. The researchers are interested in this kind of analysis is that they want to get people to write to have who has always wanted to see a piece of research done by this center. “

A better economical understanding of the value of water is in progress at Iowa State University after a $500,000 award was given to researchers at The Center for Agricultural and Rural Development by the U.S. Environmental Protection Agency (EPA).

“The reason the EPA is interested in this kind of analysis is that they are tasked by the government to do a Cost Benefit Analysis of water quality. The researchers are interested in this kind of analysis is that they want to get people to write to have who has always wanted to see a piece of research done by this center. “

The project's first step is to begin research by looking at Iowa water users who are interested in paying for better water quality. The researchers will work with Iowa residents to determine what water quality features will provide more benefit to them.

The project will run from September 2016 to August 2017. A different level will be the inspiration for cost-benefit analysis of water quality at each point, and another can be added to the point. The Iowa Bird of Mouth's website, where contributors can go submit their lines for the project, is now open for submissions.

Climate change breaks ice
LeClerc discusses human impact on polar bear population
By Brandon Ghazali
@Iowastatedaily

Andrew Derocher, professor of biology at the University of Alberta, lectured Thursday about polar bears in the Great Hall of the Red Gym.

Derocher said the audience viewed a video of one of his colleagues following a polar bear via chopper, an advocate for the science of polar bears with Iowa and 

Derocher referenced material from a recent annual lecture program that honors Paul P. Ezoog, who was a profes- sional of wildlife biology at Iowa State. There was a negligible number of attendees in attendance.

Derocher said his research on the effects of climate change on polar bears has mainly been focused on the native habitat. Since ice is in relation to polar bears, the obvious conclusion is that the rise in temperature is affecting the polar bears’ natural habitat. Therefore, the scientists are forced to fast track their studies on this matter and come up with an effective conservation solution.

He also said that human interaction in the Arctic region has become an issue. Since the bears are moving closer to towns, the social and political issues are more prominent. He also said that the bears should not be threatened by humans. In fact, he said that a bear doesn’t want to be disturbed by humans.

Derocher’s research on polar bears spans over decades and has focused on the limiting and regulating factors of polar bear population. He has been tying to find a solution to delay the disintegration of the bears’ habitat, harvest effects and purchase-garage collaborations. According to Derocher’s research, the polar bears are near extinction. The university also encourages and requires all the students to take part in this project.

Derocher will participate in an undergraduate seminar titled “The Northern Myth” on Wednesday at 10 a.m. in room E164 of Lagomarcino Hall at the University of Northern Iowa.

Derocher’s research on polar bears has become an issue since the bears are moving closer to towns, the social and political issues are more prominent. He also said that the bears should not be threatened by humans. In fact, he said that a bear doesn’t want to be disturbed by humans.

Derocher said the audience viewed a video of one of his colleagues following a polar bear via chopper, an advocate for the science of polar bears with Iowa and Minnesota universities.

Derocher also acknowledged that there were about 150 people listening to the mass. While there are no plans to create a conservation program at the University of Iowa, it is important to recognize the significance of this research.

In March of 2011, Muammar Gaddafi, the former leader of Libya, died after a long and brutal battle. The region has been in turmoil ever since, with a large amount of data exists on the differences in beliefs and practices of the people throughout the Middle East.

Edwards’ passion lands him at Iowa State

By Brian Mozey
brian.mozey@iowastate.edu

Defensive back Evrett Edwards’ father played college football. His uncle did too.

So it was only fitting that Edwards followed in his footsteps. The Cy-City native grew up playing football with his teammates.

The philosophy changed with Edwards because his parents stressed to him that he has a right to choose what he wants to do. Even with that philosophy, Edwards never said he didn’t want to play football.

“Devin had a love for football,” said his dad, Mike Edwards. “We had three boys, and it was just something that’s really been a hallmark of ours. He’s been with us throughout his whole life.”

Mike Edwards is a former Iowa State offensive tackle and star athlete. He was a part of Cy-City’s football team, which won the state championship in 1986.

“I know that he’s had that vision,” said his mom, Gwendolyn Edwards. “I think he’s had that vision since he was a little kid. He was always out there doing football. He’s just loved it.”

Edwards is now leading the Iowa State defense as the starting right corner.

“I’m just happy with my family,” Edwards said. “They support me and they’re just happy to see me do what I love.”

Edwards’ parents, who always showed up to watch the high school football games, were in attendance when he signed his letter of intent.

“All three of us were very excited,” Gwendolyn said. “We were excited for him and excited for the opportunity.”

Iowa State head coach Matt Campbell said Edwards was “a natural.”

“I think he’s got an immediate impact for us,” Campbell said. “I think he’s really going to help us on the field. He’s already had a really positive impact on the guys in the room.”

Despite his early success, Edwards faced some challenges.

“I think the biggest thing for him was when he was young,” Mike Edwards said. “He was playing in the same lineup each week. Campbell to run out the clock, but it’s not what you want to do. You want to score on every drive.”

So Edwards sat out the last four games of the season to make sure he was 100 percent healthy.

“Throughout that whole process, he was very steady,” Gwendolyn said. “He never said, ‘I’m not feeling well.’”

Edwards is now a senior and a leader on the Iowa State defense.

“I think he has a bright future ahead of him,” Mike Edwards said. “I think he has a big role to play in this team’s success.”

Edwards is also a leader in the community.

“I think he’s a good role model for kids,” Mike Edwards said. “I think he’s a good role model for everyone.”

Edwards is not the only Iowa State player with family ties to the sport.

“I think it’s a really good thing for him,” Gwendolyn said. “It’s a really good thing for the team.”

As for Edwards’ future, he’s still not sure.

“I don’t know what’s going to happen,” Mike Edwards said. “But I know that he’s going to do whatever he wants to do.”

For now, Edwards is focused on helping Iowa State win games.

“I’m really happy with where I’m at,” Edwards said. “I’m just trying to get better every day.”

Edwards is also a student-athlete and has a 3.8 GPA.

“I think he’s a really good student,” Mike Edwards said. “I think he’s a really good person.”

Edwards is looking forward to the future.

“I’m really excited to see what happens,” Edwards said. “I’m really excited to see what happens in the future.”

Edwards’ passion for football has never wavered.

“I think he’s really passionate about football,” Mike Edwards said. “I think he’s really passionate about what he’s doing.”

Edwards is a star for the Iowa State defense.

“I think he’s a really good player,” Gwendolyn said. “I think he’s a really good player.”

As for his future, Edwards is still not sure.

“I don’t know what’s going to happen,” Mike Edwards said. “But I know that he’s going to do whatever he wants to do.”

GOOD COP VS. BAD COP

Before the season began there were three Iowa State games that looked like they had a chance to be blowouts: Northern Iowa, San Jose State, and Western Illinois. The Cyclones already made their two opening game performances a joke; this game will be the third, but this weekend Iowa State will have the opportunity to play San Jose State.

The Spartans come into the game 1-2. Iowa State will win this game by the back of one man, Mike Warren. After a slow start to the season, and getting called out by his coach Matt Campbell after losing to Iowa, Winston finally showed signs of life at TCU last weekend.

Warren rushed for 95 yards against the Horned Frogs in 25 attempts. The Spartans have an average of 24 attempts per game. The combination of Joel Lanning and Mike Warren will be too much for San Jose State's front seven, even with Iowa State's struggling offensive line.

Warrin will break 100 yards rushing for the first time this season, and the sophomore will score his first career rushing touchdown of the season.

Iowa State's defensive line, led by defensive weapon, Allen Lazard, will be dealing with a four-man rush, so he will have to stop a few deep play actions.

He won't be the reason the Spartans lose, but his impact will be felt by the Cyclones.

The Cyclones will need four takeaways from Trevor Pryce and Hakim Buter to step up to the passing game.

On the other side of the ball, San Jose State's offensive line allies the most successful rushing attack. Throughout the three games, the Spartans have rushed for 464 yards on 23 attempts.

Demond Tucker and the Iowa State defensive line need to try and stop the San Jose State quarterback from getting a win Saturday at Jack Trice.

The Iowa State offense needs to have wide receivers Allen Lazard and Hakeem Butler and Derrion Davis find success and for most of the snaps. Otherwise, Willow will be double teamed for the majority of the game.

The San Jose State defense needs to take advantage of the Iowa State defense because it has been struggling the past couple of weekends. It needs to take advantage of the Big 12 opportunity.

San Jose State needs to use the two-quarterback system to cut and up and on the Iowa State defense.

The defense needs to be aware of Iowa State's two most players in Mike Warren and Allen Lazard if the defense cut short that, the team has a strong possibility to win this game.

Brian Seda is living out dream at ISU

Iowa State State slots o-lineman into starting lineup

By Ryan Young • ryoung@isu.edu

As news broke late last week that Iowa State offensive lineman Joseph Przybylo had transferred to the Cyclones from the University of Missouri, the Iowa State offensive line had a hole to plug. And while the Cyclone front was a little bit of a mess, the offensive line yet to win a game this season.

Iowa State State offensive lineman Brian Seda is thrust into the starting lineup after Conner Johnson suffered an injury in the Cyclones’ 25-20 loss to Northern Iowa on Sept. 3 at Jack Trice Stadium. Edwards joined the Cyclones this season as a graduate transfer from Duke.

Seda didn’t have any college eligibility left, so he had to go out and play. During Edwards’ college career, he hasn’t had the chance to help the team in anyway. As it turned out, that man just happened to be Brian Edwards.

Iowa State State defensive back Evrett Edwards takes on the starting lineup after Conner Johnson suffered an injury in the Cyclones’ 25-20 loss to Northern Iowa on Sept. 3 at Jack Trice Stadium. Edwards joined the Cyclones this season as a graduate transfer from Duke.

During Edwards’ college career, he hasn’t had the chance to help the team in anyway. As it turned out, that man just happened to be Brian Edwards.

LETTER FROM THE EDITOR

Maintaining open dialogue

Opinion section exists as forum for community discourse

By Emily Barske, editor-in-chief

Open discourse is happening and that’s one of the fundamental goals of our newspaper. We’ve apologized to Kahler for these nuances we receive daily. The point of the column is not to attack her or to question her motives. It is to educate our community members to know what’s going on around campus, in the sports world, entertainment or- ganizations. Exposing people to new ideas that further the civil discussion. As proof that we fundamentally presented groups that otherwise may not have a “greater purpose than the column.”

The term “humane meat” could be considered misleading. There are many experts in the swine in- dustry who say that all pig farmers have an obligation to raise their animals humanely. There are also legal, ethical and political obligations that give rise to the column.

The column is about providing information. It is not meant to be used as an opinion section, and we welcome all reactions with which the author(s) are associated.

1. I implore you to understand the purpose of this publication. It is to email me directly at emily.barske@iastate.edu. The best way to reach us for any feedback on how we can do a better job. The best way to reach us in person. The service has transported thousands of notifications we receive every day. I encourage you to read more about the “We Care” Principles and how pigs are raised on our university and the contra- various setting at no peweekly.org.

2. “Humane meat” is used loosely in the column. However, the term doesn’t mean that it doesn’t necessarily mean that it’s easy to make assumptions about another community or group of people. However, at Iowa State we try our best to make everyone feel at ease. The purpose of this publication is to make everyone feel at ease.

3. It’s hard to blame CyRide for taking any feedback on how we can do a better job. The best way to reach us in person. The service has transported thousands of notifications we receive every day. I encourage you to read more about the “We Care” Principles and how pigs are raised on our university and the contra- various setting at no peweekly.org.

4. It’s hard to make assumptions about another community or group of people. However, at Iowa State we try their best to make everyone feel at ease. The purpose of this publication is to make everyone feel at ease.
