Budget meeting Tuesday

By Thomas Nelson

After a presentation of the budget by university officials, a town budget meeting will take place Tuesday for a brief examination of the city's financial website.

The meeting will be on the City Council Chamber on the second floor of City Hall at 153 Drake Ave. A summary list of the budget as seen by the finance department, there will be time for citizens of the Ames community to ask questions regarding the year's budget.

The meeting will be shown live on City Channel 18.

The meeting will start the process of developing the city's annual operating and capital improvements budget. All past and current financial documents for the City of Ames can be found online.

The proposed performance measures for the fiscal year 2018 budget, all of which are subject to amendment and revision. We refer citizens to the documents.

This positive economic climate continues because of Iowa State University's increase in enrollment, a student body of 32,000, the largest in the history of the university, and the economic situation including revenues and expenses, which accounts for the most recent tuition hike.

The meeting will be in the City Council Chamber. The meeting will be in the City Council Chamber on the second floor of City Hall at 153 Drake Ave. A summary list of the budget as seen by the finance department, there will be time for citizens of the Ames community to ask questions regarding the year's budget.

In her opening remarks, Weaver cited evidence showing King is doing wrong for Iowa.

“Mr. King's career is one of things that are out of touch with the times,” Weaver said. “It speaks volumes about Iowa State as a whole. It makes Iowa a model institution and an example that Cody West, vice president of the student body and the College of Liberal Arts and Sciences president, was at that orientation, has seen firsthand Iowa State and many other universities are doing right for students.

“Natives of Arizona, West identifies with the Iowa State students that draw the university to the university. “It speaks volumes about Iowa State as a whole. “We are the only institution that's tuition and fees.”

Graduate students at the University of Iowa have said that they are not satisfied with the state and making it accessible.

“Students are the same, whether they're in-state or out-of-state,” Weaver said. “They're here to learn and get an education and make a better future for themselves and their families.

The meeting will be in the City Council Chamber on the second floor of City Hall at 153 Drake Ave. A summary list of the budget as seen by the finance department, there will be time for citizens of the Ames community to ask questions regarding the year's budget.

Officer lives out dream in Ames

By Danaile Geer Photography Editor

After meeting about ads to cede educations and the police academy, former international student Phanchantraurai decided to make a complete 180-degree turn and go into enforcement.

Phanchantraurai had a successful career as a lawyer despite breakdowns. He had already achieved a lot in his life, but first he had a Masters of Public Administration degree and was working in the general business.

“Honestly, I never feel like I have made a mistake or doubt my decision. I am very happy with my decision,” Phanchantraurai said. “My dream is to refine this skill and use it in this field.”

Phanchantraurai has been working for a difficult assignment. It is not that he is not learning every day. He was assigned from senior offices that it will take about three steps. Despite what he is learning, he is still perfect with it and still learning. He, in effect, is still learning. He has a career that is very tough.

As a former advisor to international students, Phanchantraurai had the opportunity to look at a lot of different international students. As an officer, he is still going to continue this role and lead him unique experiences. He is still hoping for the opportunity to bridge the gap for many international students.

As an officer, he has made a lot of friends and a lot of friends from the students. For example, he went to the coast and taught them to get the machine still, and he is a U.S. state. He explained that in many countries outside the United States, it would be impossible to make the cars up to the specs pulled out and is it a careful step. They are problems that Phanchantraurai is not facing many different nations. After speaking with the police officer, there is no dream when it comes to international students interacting with American cops.

“It seems [as] [an] event that happens to me. It is happening pretty much every- where,” Phanchantraurai said. “Hopefully I can do something that can be copied by other states or other areas, or at least, you know, in your area. Because we don’t think it is important. We might think it is important. It is very important for us as a country. In this case, if we could solve the problem, and it would like that it is not necessary for anyone to have a car or a cop that he has a lower or goes higher. It is still respecting that they are doing a good job.”

Infrastruture off track

Hoboken, New Jersey, train crashes into old tunnels

By Alex Folker
@iowastatedaily.com

Earsly in your childhood, you find things you like certain toys, dolls, cartoons; you may not realize it, but you were deciding your taste by choosing what you liked seeing. On your school, you learn how you can study something that interests you and that you want to know about it, you want to know about everything around the world.

You find that you want to major in architecture or computer science or perhaps an art major.

The point of college is to help you keep your journey and get experience for your dream job.

Infrastructure is a huge stepping stone to a possible career. You career only grow experience that also contains networking. Networking can open up great possibilities to research on the heart of the world.

If you find out that push is not what you want to do as your career path, then Iowa State can help you find what you want to do.

Feedback posted online is eligible for print in IOWA STATE DAILY. Letters must include the name(s), phone number(s), and year in school of the author(s). Students enrolled in the Iowa State University of Administration. Don’t feel alone if you’re still feeling uncertain about your possible career.

Iowa State quarterback Joel Lanning (20) mounted the 2015 Amana Colonies Fall Invitational field at Lanning Field in West Des Moines on Thursday, November 5, 2015. Maxwell Regional's Manton Smith made a 23-yard field goal with 9:45 remaining to break a 41-41 tie and give Amana 44-41 victory. The win was Lanning's first as a collegiate quarterback in a fall game.

Lanning attempts to build on career game
By Brain.Mozey #iowastate daily

Quarterback Joel Lanning did it all for Iowa State last weekend.
Lanning put up one of his better performances in his career Saturday afternoon against Baylor in Ames.
Lanning stepped up to fill the void left by starting quarterback Jacob Park who was injured against Kansas State in the previous game.
Lanning was the perfect choice for the starting quarterback role. In his first career start, Lanning completed 24 of 39 pass attempts for 250 yards and a touchdown, and also had a rushing touchdown.
Lanning's performance was crucial in helping Iowa State overcome a 14-point deficit to win 37-27 against Baylor.
Lanning's performance on the field was up to par with his performance in practice.
Lanning's ability to step up and fill the void left by Jacob Park shows his leadership qualities.
Lanning's performance also shows his potential as a future quarterback for the Cyclones.
Lanning's performance in the game is a testament to his hard work and dedication to the sport.
Lanning's performance on the field is a reflection of his preparation and training in practice.
Lanning's performance shows that he is capable of stepping up and filling the void left by an injured teammate.

Sniffing out differences in gender deodorants

By Maya Minsho
@iowastatedaily.com

It’s estimated that women spend about $5 billion on personal care products per year, and 70% of that is spent on deodorant—and men spend about $25B, according to Glamour magazine. A lot of personal care products cost more the men than women. Is that in the product that different? I mean, you can compare the packaging of men’s and women’s deodorant, you can see the extreme gender roles that companies try and market the product to. Why do we put a gender label on deodorant? Is it because we are trying to appeal to the person everyone dreads: the person who smells like all of the others? Now we see a lot of people saying that men’s deodorant is better than women’s deodorant. From the packaging, formula and price, I decided to break down the differences of men’s and women’s deodorant.

The packaging is the major gender buster. Deodorant companies use to sell their product. If you look at women’s deodorant, you will see the packaging is slim, lightly colored with internal prints that look like flowers or fruits or floral. If you look at men’s deodorant, you will notice that the packaging is usually body, with a bold line and has a name like “Ultra sweet sweat, smell like down, ultimate sport scent blocker.”

The approach that companies take when formulating these products is different for men and women. Men’s deodorant usually relate to physical activities and marketing with sports. Women, it’s usually marketed around feeling clean and fresh. An advantage that men’s bulky packaging has over women’s slim packaging is that it usually fits more deodorant in the package. “I’ve never used men’s deodorant, like the sportsman’s deodorant, smoke, said Hallie Erdahl, senior in apparel, merchandising and design. “Maybe it is because deodorant is pretty expensive.”

When you compare the formulas for men’s and women’s deodorant, you use the same ingredients, except for fragrance. Both men’s and women’s antiperspirant deodorants have aluminum zirconium tetrahydroxyl, a chemical that blocks pores and prevents sweat from being produced. Accordingly, the best-selling deodorant for women, men’s deodorant uses about 1.2 percent, while women’s deodorant uses about 1.5 percent. While others used none at all. Without the deodorant, participants felt their hearts beating more. Women’s deodorant would mention adoptions for certain moves if members were struggling. An instructor would often share adapted versions of specific moves to help meet different experience levels. During cardio workouts, try to keep moving as much as possible. When the strength-training portion of the class began, some participants did each exercise with 5–10 pound weights, while others used none at all. Participants can opt out in half of the strength training. Wieseler was open to students adapting to the class if it didn’t stress them too much. She didn’t mind being adaptable to each participant’s skill level. When the strength-training portion of the class began, some participants did each exercise with 5–10 pound weights, while others used none at all. Participants can opt out of the strength training. Wieseler was open to students adapting to the class if it didn’t stress them too much. She didn’t mind being adaptable to each participant’s skill level. When the strength-training portion of the class began, some participants did each exercise with 5–10 pound weights, while others used none at all.

Maggie Curry/Iowa State Daily

Jazzercise is a high-intensity workout that mixes dance-based cardio with strength training. The class, taught by student instructor Jennalynn Johnson, freshman in apparel, merchandising and design. “I come to this class whenever I feel like it protects you more.”

Choosing between men’s or women’s deodorant is a personal preference. The only immediately noticeable difference is the packaging and the fragrance. If you are looking for a product that has stronger antiperspirant, then men’s is for you. If you are looking for a product that has weaker antiperspirant, then women’s is for you. The amount of antiperspirant used in deodorants is based on personal preference. The amount of antiperspirant used in deodorants is based on personal preference. People also have different amounts for different deodorants.
