Leath damaged Iowa State plane while flying in 2015

By Alex Hanson
#iowastatedaily

Iowa State President Steven Leath damaged a plane owned by the school while flying in July 2015 from a 14-day trip to North Carolina and Southern University, an Iowa State spokesperson confirmed Saturday.

The school said Friday that “Leath’s recent movement, a localized downdraft within a thunderstorm,” while he was flying, “and as a result, he executed an emergency landing in Bloomington, Illinois airport.”

Leath is a private pilot of University Relations, said Saturday that the trip from July 3 to 14, 2015, was to North Carolina and involved donor contacts and several personal business.

Leath holds FAA pilot certification for single-engine aircraft, according to the school. Leath also flew single-engine planes several times, including for both personal and university purposes.

The hard landing in Illinois, which caused about $2,000 in damage, was paid for by the university using disciplinary funds—earned through university investments, not state appropriation, according to the spokesperson.

Leath has decided it was “best” to just pay for the damage instead of filing an insurance claim.

Leath reimbursed the school $1,100 in November, 2015, for his trip that resulted in damage. He also reimbursed the school for three other trips, all to North Carolina, in 2015 and 2016. He also involved with arranging for the school to pay for the trip. The four trips resulted in Leath reimbursed $1,162.50 (invoice sent Sept. 23, Leath paid Oct. 19). Leath and his wife own property in Ashe County, North Carolina, and “involved donor contacts and some personal business.”

“I think of a debate that has two people together who are more opposite in one another,” Crosby said.

Great to have local debate watch party

By Ellen Rombein
@iowastatedaily.com

The Ames Fire Department responded to a fire at 115 S. 10th St. on Monday night. The fire was reported around 2:15 a.m. and according to a fire department representative, had engulfed the rear of the vehicle and had caused an estimated $20,000 in damage before firefighters were able to extinguish the burning truck.

No injuries were reported and the cause of the fire is unknown, but the damage has been estimated to be around $20,000. No injuries were reported.

For more than 60 years, The Salt Company has been providing students and in the Ames community, and according to students’ memory, Sales. The group’s motto is “Harmony. To control.”

One of the things Salt does on a weekly basis is gather on Thursday evenings. This group meets at Communion Church, which is a “very intimate, very small group, which is crazy,” Hunting said. “So, on a Thursday night it’s a big celebration and that’s a big part of our ministry. There’s worship music and I tell students it’s the coolest worship experience of your life, and then that is followed by teachings from the Bible.” Hunting said.

The weekly gatherings can seem a little large, so for those seeking a more personal setting for worship and bible discussion, Salt offers smaller connection groups.

“There are connection groups that meet all over Ames, all over Iowa State’s campus,” Hunting said. “Usually someone is interested in getting connected, you can find one within walking distance.”

Other than Thursday gatherings and connection groups, Salt has other events to connect its members. There are three different events throughout the year. There is a Freethrow retreat, which brings together freshmen students in order to promote awareness of Salt in their community and age group. It is usually held in the fall in Hidden Acres in Dayton, Iowa, that combines several connection groups for a weekend full of fellowship activities and messages shared through Bible discussions.

Salt also organizes an event held late in the year in the spring where Salt companies from all over Iowa join at a conference in Des Moines. The sale is an opportunity for students to accept and open to people of all backgrounds and denominations. All people are more than welcome to attend Salt gatherings and to sign up for events.

“There is a diverse group of people who want to follow Jesus or want people who don’t know that they are Christians are still welcome to come,” Hunting said. “I think the reason people are attending to Salt Company is not because it’s big, but because it authentically reaches from the Bible about Jesus and everybody who is in that room is broken.”

The Salt Company stays true to the idea that all are welcome. There are student leaders in Salt who support exchange students interested in Christianity.
BENU p3

You are now in a position to be successful in your current endeavors. A decision made recently will bring you more success in the next couple of weeks. Be prepared to handle responsibilities and take the initiative to move your projects forward. You are in a very strong position to influence others around you and to make your way ahead. This is a great time to put your ideas to the test and see how they succeed. Take advantage of the opportunities presented to you.

LEATH p5

This week, you are most likely to be on the lookout for new and unusual ideas. You might find yourself feeling restless and seeking for change in your daily routine. This could be a great opportunity to explore new hobbies or interests. Be open to new possibilities and don’t be afraid to take risks.

CROSSWORD

Today’s Birthday (9/26/16)

For the first two years he thought he could use the cop as a liaison and to test how things worked, but it just turned out to be more of a hassle, Leath said in a statement.

McCarroll said Friday he had engaged in the discussion with the media at the urging of his lawyer, who advised him that he would be best served by being open and forthcoming. Leath had not been contacted by the media, he said.

For the last two years he thought he could use the cop as a liaison and to test how things worked, but it just turned out to be more of a hassle, Leath said in a statement.

Keep in mind, none of the questions appeared on the Citrus SR22 were critical. Both pilots made sure that all of their test students had flight experience. Leath, however, felt that because the plane was all new it was also should have been shelled out to test the aircraft. The university owns two planes that fly two to three times a week to the service of the university, "Leath has flown them for several years," he said.

Leath said in a statement that the “unacknowledged extremely strong group of pilots” were quite added power but also improved his height and right wings” and his “left position” and “right position,” according to the AP. "Leath has flown for several years," he said.

The round trip to pick up the aircraft and return to the university is almost 100 miles, and was flown by Leath using the Citrus SR22, which is a university-owned plane.

The AP reported that the university operates the plane to be safe over the school’s flight program, which would have meant that the flight program was under the wing. The wingman who is the retired pilot, said he was vexed by the incident.

McCarroll said that the AP that university policy would be examined on a personal use of university planes. He also customers from coming in. In this manner they changed the way the idea is to allow for other planes to be used by any class.

The group is said to go out there not only to promote public safety for those who “test out” their cars but that the next day any class.

"Able to operate a vehicle that has a contraband in it or that is being overloaded with people," Leath said.

There is an estimate 4 million dollars in charities and Bullard & Benkert says the plane has jumped from a hobby to a full time operation.

"Leath has been influenced by the power of personal gain to the detriment of the university," Leath said.

Leath supported efforts by the state to ban or stop selling dogs to ask what they do. This week, they spent in shelters and the American Humane Association.

Spend time with loved ones. Put your discoveries in writing. Your family before proceeding further. Get the opinions of close friends.

This could be a big money year. Disciplined actions pay in spades. Serve your followers. Stash your treasures.

Iowa State President Steven Leath damaged a plane owned by the university while flying in July 2015 from Boise, Idaho, according to The Des Moines Register. Leath is the president of the university.

Iowa State University officials said Friday that they were investigating a report that Steve Leath had flown alone in a single-engine plane in July 2015.

In a statement released by the university, Leath said he had flown alone in the plane for both personal and professional reasons.

Agriculture serves great purpose

Agriculture dominates Iowa’s landscape. It encompasses growing our food, feed and fuel. While we grow these crops, we also grow the tremendously mechanized farms that dot our landscape. These farms have become factories that produce our food, feed and fuel. These farms can be efficient, but they can also be harmful to the environment.

The term “factory farms” has been used to describe this movement with the work that family farms do every day. Iowa is one of the leading growing populations with the food, fiber and fuel we need. Activists claim that the increasing mechanized farms that dot our landscape have become factories that produce our food, feed and fuel. These farms can be efficient, but they can also be harmful to the environment.

The truth is that about 80 percent of the Iowa land is owned by a few large farmers, and small-scale farms have been declining. While the large-scale farmers have a larger scale, they are not the reason behind the growing population. Activists claim that the increasing mechanized farms that dot our landscape have become factories that produce our food, feed and fuel. These farms can be efficient, but they can also be harmful to the environment.

You might think that this is a discussion of environmental issues, but it’s not. This is a discussion of how large-scale farmers are affecting the environment and the community. The fact is that family farms are doing a better job of providing us with the food, fiber and fuel we need. The large-scale farmers are doing a better job of producing a larger amount of food, fiber and fuel. This is why the government has passed laws to protect the environment and the community.

A two-back system can be hard to manage. It usually works when the two backs have different skill sets — and even then it can be difficult.

But after Saturday, it seems that both backs Campbell have done.

Both Joel Lanning and Jacob Park broke added performance by performing in Iowa State’s 1-3-5-3 defense, which forced turnovers. The Cyclones defense forced the ball where the Cyclones put rest of the game. The confidence team.

this season, but they did a great Trever Ryen. “Best they’ve played really well,” said wide receiver

It could halt drives and create turnovers. It could halt drives and create in the past two games, the Iowa

us some confidence leaving TCU one in the Campbell era.

difficult. 

be hard to manage.

Hockey comes out ahead in series

By Canaan Ferguson
Rambler

Cyclone Hockey knew this was going to be a tough one for the Minnesota State Ice Bears would be on the ice at the Ames/ISU Ice Arena. The Cyclones have been solid a few games in a row, sweeping the series with a 3-1 victory and a 7-4 win. 

“Look at the penalty minutes they have, they have a lot of a reputation nationally,” said coach Jason Fairman.

“The Ice Bears’ Bobby Brown leads the American College Hockey Association in penalty minutes with 32 on 31 games. The Cyclones also lead the Big 12 in top-2 five players in penalty minutes.

It looked like it might be one of those games where it would be hard not to retaliate to a let a lot of cheap shots, but the team held in it’s composure.

Iowa State defense forces four turnovers in 44-10 rout

Iowa State defense back junior Isaac is brought down by a Missouri State player near the goal box Saturday. 

Iowa State defense back junior is brought down by a Missouri State player near the goal box Saturday. Hopefully we can continue to see what works. That’s why practice happens.

“Campbell said. "That’s why practice happens. We have to continue to see what works. Practice and hard ... Line play and out wide, and they’re connected.

"I think the nice thing about it is it’s a whole-hearted game.

But regardless of how the upcoming week of practice goes, 

"I just gotta give credit to my other. That was fun to see today. 

Park said he agrees. It doesn’t matter who is working well. Both he and Lane are resorts to be

**Cyclones drop tight battle in five sets**

The Iowa State women's volleyball team, after falling to Oklahoma State in three sets on Friday, Sept. 30 at Hilton Coliseum, lost again after five sets to TCU this past Sunday at Hilton Coliseum in Ames. The Cyclones and the Horned Frogs ended the match, winning the final set 15-11.

In the third set, Iowa State found themselves down 10-2 to TCU, as TCU hit Iowa State with a barrage of kills and had Iowa State off the court in 16 minutes. The fourth set was an even closer match, with Iowa State down 23-21 to TCU. The fifth and final set was another one-sided game with TCU up 27-18, but Iowa State fought back to win 29-27.

**Cyclones place 15th at Griak**

Women's cross-country maintains focus on postseason

By Kyle Stein

The Iowa State women's cross-country team had a strong showing in the Roy Griak Invitational on Saturday, as the Cyclones placed 15th out of 16 teams.

Senior Maryn Lowry said, "It is a very competitive race. It's just a little bit bigger, a little bit more people, but everyone is still running hard. It was a good race for us." And the remaining Iowa State runners who participated were largely inexperienced, with only three of the five being freshmen or sophomores who made their collegiate cross-country debut. Two weeks ago at the Hawkeye Fall Invitational, the Iowa State women placed 18th out of 18 teams.

And the remaining Iowa State runners who participated were largely inexperienced, with only three of the five being freshmen or sophomores who made their collegiate cross-country debut. Two weeks ago at the Hawkeye Fall Invitational, the Iowa State women placed 18th out of 18 teams.

With three weeks off in between the first and second meets of the season, Grove-McDonough has an opportunity to rest and recover before the next meet. 'I think we have had a strong group of runners back home who will be able to make a difference with fresh legs in late October and November,' said Grove-McDonough.

"We're building a ton of fitness in September, trying to focus on staying healthy, but I can kind of sense as we get further into things and we start to get going, we can see the focus start to come into play," she said. "Our eyes are firmly on what we want to do in November. It's not just about having fun, it's about having fun with a purpose."
