Students to vote on raised fees for MU renovations

The Board of Regents spoke heavily on the issue of student enrollment and campus usage during the first day of a two-day meeting Wednesday at Iowa State.

The regents began by allowing each public university to present facilities governance reports. Kate Gregory, senior vice president for university services, presented on the current usage of Iowa State classrooms and collaborative spaces. Gregory said Iowa State is expected to have more courses added in the fall, but the number of available courses has only increased 184 percent, with enrollment in the courses increasing by 111 percent. Gregory also pointed to more classes shifting to after-hour times — those that are available between 6 a.m. and 5 p.m. — as a reason for the lowered enrollment.

Gregory’s team hopes to “optimize the space we have to make the most useful classrooms for our students and teachers.” This vision is being implemented into several new and current renovations.

Innovations include larger classrooms found on the Life Sciences-to-be Pearson Hall project, mobile furniture for collaborative learning with the newly-renovated Bessey Hall and two large-scale classrooms to be featured in the upcoming Flowers Hall update.

Gregory also expressed interest in using book ports.

Iowa State falls below goal on class usage

The collegiate Greek community is largely sneered at for its bad habits, but that doesn’t mean Iowa State’s chapters aren’t doing everything they can to prove that wrong.

Junior Jill Itzen led seminars at various Iowa State locations for the Greek community on how to change the stigma it is currently facing. Novak is an industry leader in risk prevention as well as alcohol and hazing education.

Novak started NovakTalks, a company dedicated to consulting on-campus safety in 2005, but worked in risk prevention on the collegiate level for many years prior.

Her background in risk management, anti-hazing efforts and campus safety has made her a successful consultant.

Her presentation to Iowa State’s Greek chapter presidents on Wednesday night focused largely on solving issues in Greek chapters and her linear concept of problem-solving.

Throughout her lecture, Novak called on various chapter presidents to discuss their challenges and as a leader in the chapter, she offered solutions.

Two templates provided to social media can make leading their chapters difficult, which Novak knew from experience.

She went on to analyze a specific problem common throughout the Greek community, which is members coming and going:

A “good leader isn’t going to say, ‘What are we going to do?’” Novak said.

She didn’t have to worry about fraternity or sorority dues. Today, students used to “come from a place of wealth” and didn’t have to worry about those things. She added that she now has a student president at one of her large chapters who is a former fraternity and sorority member, and that makes leading their chapters difficult, which Novak admitted.

“Social media has made it more complex,” she said.

“Do we have access to social media and use it in a positive way?” Novak asked.

Many were drawn to the Memorial Union’s Grand Ballroom Wednesday evening to learn more about Novak. The program was founded and is now a member of the National Fraternity and Sorority Management Association.

“Most of the time, members don’t come to events because they are ‘overprogrammed’ or have other commitments,” she said.

Novak explained that most of the time, members can’t make large commitments to events, so presidents need to ask, “What are we going to do?”

Instead, Novak said presidents need to ask “What can we make more complex?” She added that they should “figure out how to raise member attendance at events, rather than be looking at the percentage of students who are attending.”

One president suggested that chapters host fewer events in order to make leading their chapters easier.

Novak explained that most of the time, members don’t come to events because they are “overprogrammed” and adding another program to their schedule would make leading their chapters more difficult.

She concluded her explanation of her linear approach to problem-solving by offering final, reiterated advice to the chapter presidents.

“Too often it is not about the information, but rather the approach to problem-solving,” she said.

The nature of texting someone and seeing these three bouncing dots appear and disappear multiple times is known by many. What could they mean? How can the recipient respond? What’s the worst thing you could do? What’s something you should do? How can you make the best of it? Effective communication can be difficult. Our generation is gifted with more forms and methods of communication than any generation before us. We’ve evolved from face-to-face interactions to a complex system of words, symbols, pictures, gifs, and beyond. These new methods of conveying thoughts and emotions are fun and allow for a level of creativity and expression that previous generations did not have. But all these new methods have their pitfalls that can lead to misunderstandings and unintended consequences. Many know the struggle of waiting for a text to load or the fear of receiving a text featuring a sarcasm detector that doesn’t load on time. Or, we’ve been the victim of misunderstandings because the author’s intention and tone have not been conveyed properly. The advent of emojis has opened up the door to new forms of communication, but our intentions as well.

In a 2010 statement an effective communicator must be clear, unambiguous, and precise. Especially when you’re conveying information in a particular way, especially when they’re conveying information in a particular situation, especially when they’re conveying information in a particular form. In non-professional communications, whether in social media or other forms, adding context, such as emojis, pictures, or other information can go a long way. But it’s only good if we actually know what the author is trying to convey. Our ignorance is conveyed in the manner we respond.

Using “I” statements can be an effective way of discussing interpersonal situations, especially when they’re more personal. It’s a way of being as clear and as unambiguous as necessary. If clarification is needed, readers can ask questions and paraphrase the other person’s words to make sure they are understood. In non-professional communications, whether in social media or other forms, adding context, such as emojis, pictures, or other information can go a long way. But it’s only good if we actually know what the author is trying to convey. Our ignorance is conveyed in the manner we respond.

Unwanted sexual advances have been a part of our society for far too long, and too many people have been subjected to these unwanted advances. Sexual harassment is never OK, and an end to getting ready to enter the workforce, it’s important to know how to protect yourself in case you ever experience it. Uber has been making headlines in a negative way, sparking the conversation of sexual harassment.

It first surfaced when an ill-timed promotion was issued during a New York City crisis. According to President Donald Trump issued an executive order on immigration. The same thing is happening because a former employee, Susan Fowler, a software engineer for a Hogst’s unicorn, did not properly handle her workplace harassment complaint. As Fowler and her direct supervisors did not want to take the necessary disciplinary actions to ensure her workplace was comfortable, the person who made the unwanted sexual advances had a guaranteed promotion. Fowler said Uber’s higher-ups at Uber did not want to risk his work record with a sexual harassment complaint.

Fowler heard similar stories from friends and decided to leave Uber. As a southern graduate and start new careers, it is important to know our rights and how to protect ourselves in these types of situations. Because none of us should feel uncomfortable or threatened in their workplace.

In class, we learn the pros of what must be the followed when harassment occurs, including contacting your immediate supervisor, leaving your position, filing an official complaint. If these steps don’t work, the next step is reporting the harassment to someone on campus resources and telling them you already launched your complaint.

Filing a complaint with the Equal Opportunity Employment Commission is beneficial as well. It can allow the administration to determine whether to move forward with more formal investigations. Online feedback posted on social media or other forms, adding context, such as emojis, pictures, or other information can go a long way. But it’s only good if we actually know what the author is trying to convey. Our ignorance is conveyed in the manner we respond.

The #MeToo movement is about standing up for our rights and protecting ourselves in these types of situations. Because none of us should feel uncomfortable or threatened in their workplace. Your workplace’s human resources department should be your No. 1 defense. But if it fails, you have to know your rights and get in touch with someone who does so you can protect yourselves.

Unfortunately, Fowler chose to report the harassment to Uber because she did not feel comfortable elsewhere and decided that seeking other employment was in her best interest. Online feedback posted on social media or other forms, adding context, such as emojis, pictures, or other information can go a long way. But it’s only good if we actually know what the author is trying to convey. Our ignorance is conveyed in the manner we respond.

Hopefully, because of Fowler’s courage to self-reflect, our rights will take these #MeToo stories too much in terms of communication, effective communications and meaningful relationships.

To add it, it is important that communication in recreational relationships is equally clear. Too many conflicts or arguments begin with simple misunderstandings, and effective communication is essential to resolving those conflicts or arguments.

You may tell me that you’re hearing those three bouncing dots too much in terms of communication, effective communications and meaningful relationships. You may tell me that you’re not getting it to you red on the side of being informal. To add it, it is important that communication in recreational relationships is equally clear. Too many conflicts or arguments begin with simple misunderstandings, and effective communication is essential to resolving those conflicts or arguments.

“Of course, the #MeToo movement is about standing up for our rights and protecting ourselves in these types of situations. Because none of us should feel uncomfortable or threatened in their workplace. Your workplace’s human resources department should be your No. 1 defense. But if it fails, you have to know your rights and get in touch with someone who does so you can protect yourselves.”
Pat Downey has been kicked off of the Iowa State wrestling team due to multiple violations of team rules, the school announced Wednesday.

"That's the situation that we're in," said Dresser is business-like in how he coached Dresser when he wrestled at Iowa, turned it into a national power that's cur...gram on the downtrend in 2006 and quickly...a CEO of wrestling," Pollard said. "We need step two in hiring new coach Kevin Dresser.

"Growing up in Humboldt, Iowa, having...wedding."

"The overriding consensus was, we need...down the hill," Dresser said. "That's...out of the lineup...and was expected to be one of the leaders this season.

"To keep a team in the top five is incredibly hard,..." Dresser said. "But that's what we have to do. That's...exciting and that's the challenge I'm looking for.

"The Iowa State wrestling program was in the top five, now, that would indicate if the Iowa State wrestling room," Athletic Director Jamie Pollard said. "But in the end, it's all about building a great program always this season.

"When I started at Virginia Tech we had 400 to 500...for Iowa State wrestling, the better it will be for the state of Iowa," Dresser said. "I think there's so much tradition here and so many levels... It's great for the sport," Pollard said. "We've had fun with it. Who wouldn't? Tom and Terry [Brady] did all the..."
**CHICAGO** brings Broadway to ISU

By Tommy Crook
@iwostatedaily.com

"Chicago the Musical" is coming to Stephens Auditorium this weekend. The show is one of the most well-known and beloved musicals of all time, and it's sure to be a hit with audiences of all ages.

Starting up a band can be a complex and challenging process, but Margaret Butler and her band GGOOLLDD had a pretty specific idea of what they wanted to create. "We wanted to be a band that was a little more experimental," Butler said. "We wanted to explore different sounds and styles, and we wanted to have fun doing it as well."

Innovation occurs every day at a research university, said Widgery’s commissioning signifies with the public."

Among her own body of public art, Widgery also tries to get to know her friends and fellow artists, which is one of the most exciting parts of working in music, Butler has taken on roles that include singing, guitar playing, songwriting, and producing.

The center will provide an opportunity to work together collaboratively, said Erin Malcy, the Om Center’s coordinator of arts.

"I enjoy the songwriting process just the same to the school when I go," she said. "I like to take on roles that include singing, guitar playing, songwriting, and producing."

Widgery said that the center's goal is to provide a unique and engaging experience for students and the community.

"The center provides an opportunity to work with scientists and students, and to create a space for collaboration and learning," Widgery said.

The center will host a variety of events, including music performances, workshops, and artist residencies. "We want to create a space for students to come together and share their ideas, and to explore new ways of thinking and creating," Widgery said.

The center is located in the Om Center for Arts, which is part of the university's College of Liberal Arts and Sciences. It is open to all university students, staff, and faculty, as well as the public.

### First dates that just went horribly wrong

By Morgan Miller

The word “ghosting” may be a new term, but it is not a new practice. With new forms of technology in the world, constant communication has become the norm. But what happens when the person you strike up a conversation with goes silent, leaving you to wonder what may have happened? Ghosting can be shown through ignoring calls and messages with no explanation and canceling plans unexpectedly. It can be difficult, especially in the dating world. Being the ghostee who is a member of the dating community can be a common trend for anyone. Whether you're going on your first date or have been in a relationship for a while, you've heard of it, experienced it, or avoided it. “I feel that the person is uninterested and it shows they have any hard feelings about each other,” said Kelly Fant, a sophomore in mechanical engineering. The rejection can take a toll on a person’s mental health and can be justified. According to Psychology Today, many people ghost another to avoid feeling awkward due to fear or because they are uncomfortable and hurtful. “Ghosting is perfectly fine as long as people understand that they are ghosting and not just dropping communication off the hook. If the person is uninterested in the person, then they shouldn’t be talking to them anymore.”

### Ghosting occurs when someone you have been in contact with stops communicating with you without an explanation.

**By Nicole Miller**

Whether you’re going on your first date or have been in a relationship for a while, you’ve heard of it and experienced it, or avoided it. “I asked a girl to dinner on Valentine’s Day single, but time means nothing. I fell for who I was flying to New York to meet up with another girl.”

Ciarra Michael, Junior in management, said. “I got a call from a guy who was going to be a Valentine’s Day single, but time means nothing. I fell for who I was flying to New York to meet up with another girl.”

### Ghosting and cancelling plans

Ciarra Michael, Junior in management, said. “I asked a girl to dinner on Valentine’s Day single, but time means nothing. I fell for who I was flying to New York to meet up with another girl.”
