The Boston New Media Library is a comprehensive project designed to serve the Haymarket district. Although the program aims to be a “New Media library”, the term “New Media” is indeterminate, so the library was designed with a flexible zone to incorporate both the nature of new media and the designated square footage required for the print collection. The program called for many functions aimed at attracting the general public of Boston, including an auditorium, cafe, gallery, reading spaces, study rooms, digital lounges, and outdoor gathering spaces.
