## Curriculum and Instructional Technology

Brittany Sweers

Iowa State University

Spring 2019

In the last two years, I have had the opportunity to learn the key principles and put into practice the theories within the field of curriculum and instructional technology. This portfolio is a culmination of my work during my time at Iowa State and demonstration of how my thinking has changed and expanded in that time. In the portfolio I selected artifacts demonstrate development within four standards: Technology Planning and Integration, Promote and Model Digital Citizenship and Responsibility, Research and Assessment, and Visionary Leadership. Along with each artifact is a reflection, which highlight growth throughout the program and how I will use this new information and skills in the future.
