ADVERTISERS
MORE TIMBER—The Mall Gasoline Engine Chain Saw cuts trees closer to the ground—leaves shorter stumps—adds lumber to every tree. It is readily portable through all kinds of brush and over all terrain to reach trees practically inaccessible to many types of power saws.

MORE EFFICIENCY—The powerful two cycle, gasoline engine gives the power that enables crews to fell and buck trees many times faster than with a hand operated cross-cut saw. Operator fatigue is kept at a minimum. The Mall Power Saw has a stall-proof clutch and handle throttle. Will start easily in all kinds of weather and runs all day on very little fuel. Pneumatic and electric models are also available. Write for literature today.

OFFICES IN PRINCIPAL CITIES
YOU DON'T FIND Armchair Loggers among THE TIMBERMAN'S readers... What you do find is the top production, management and directing personnel in the plywood, box, woodworking, sawmilling and logging fields.

Hundreds of logging engineers, sawmill engineers, operating heads and managers in the forest products industry formed the habit—while still in their university and college days—to depend, month after month, upon every issue of THE TIMBERMAN to bring them information and ideas on new methods, new practices and new procedures developed in all major departments of the industry.

THE TIMBERMAN'S editorial staff travels thousands of miles each month to bring you the latest in pictures and text directly from on-the-job observations and reports.

You will benefit greatly in your career by making every number of THE TIMBERMAN a "must" in your reading and study.

Prove Themselves Champs
When You Put the Pressure On.

They did it all through the war all over the world; they're doing it here now during the critical lumber shortage—day in, day out; month after month. Fine lumber fast! Corinth No. 2 is a sturdy, accurate mill which may be used as a portable outfit or set up on a permanent foundation.

These and other economical Corinth units are now becoming available in increasing numbers. Send for complete specifications and delivery dates. For out-of-the-ordinary sawmill problems, ask for the services of a Corinth engineer. You can depend upon him to find a practical solution.

Don Beam MEN'SWEAR

Ames Forester
It has long been recognized that the forester gets the greatest return from forest areas by following a carefully balanced multiple-use program.

The student, like the forester, should take advantage of the multiple resources of his college in order to derive the greatest possible benefits from it.

The Memorial Union is an invaluable resource offering a necessary balance of friendship, recreation and culture.

CREATING A FOREST WITH MACHINES

The nation's 200 pressure-treating plants impregnate about 3½ billion board feet of wood annually. That's the equivalent of creating about nine billion feet in comparative service, because treated timber lasts that much longer. American Lumber & Treating Company, the "Wolmanized Lumber" people, believe that forestry and industry make a good team . . . the one producing more and better trees, the other finding more and better ways of treating and using wood.
