HOWELL, JOSEPH, Jr., Box 711, Clarendon, Tex. Head of the Dept. and Prof. of Science, Clarendon Junior College.
LOUGH, WILLIAM M., 5641 Cerritos Ave., Long Beach, Cal.

Nineteen Fifty
there's a CARCO winch or hoist
for nearly every crawler tractor ever made

Each CARCO winch and hoist, like each CARCO arch, log cart, and dozer, is engineered for matched performance with the particular tractor for which it is designed.

Modern selective logging methods demand tools that are both efficient and tough—two good reasons why Carco tractor equipment is first choice of high production operators.

Each Carco tractor logging tool is built to utilize its tractor's full power to deliver full pay loads in a hurry. And it's built to stay on the job day after day. The Carcometal used in Carco products is twice the strength of ordinary steel. All moving parts are oversize. All wear parts are hardened and well lubricated.

From the first days of tractor logging, Carco equipment has accounted for a sizeable share of the world's selective log production. This, in itself, is ample proof of Carco value as an essential addition to any logging tractor.

Schipull, Walter L., Room 4204, South Bldg., USDA, Washington 25, D. C. Chief of Division of Watershed Management, USFS.
The quality of LEADERSHIP is essential to success!

Hundreds of leading logging engineers, sawmill engineers, operating heads and engineers in the forest products industry formed the habit—while still in their university and college days—to depend month after month upon every issue of THE TIMBERMAN to bring them information and ideas on new methods, new practices and new procedures developed in all major departments of the industry.

THE TIMBERMAN editorial staff travels thousands of miles each month to bring you the latest in pictures and text directly from on-the-job observations and reports.

You will benefit greatly in your career by making every number of THE TIMBERMAN a “must” in your reading and studying. To be well informed is a requisite of leadership—make it your habit.

Modern methods and the right equipment for the job will increase logging output—and reduce operation costs. There are many models and sizes of Allis-Chalmers equipment from which to choose, with accessories to fit the application—and to meet your requirements.

**MOTOR GRADERS**

Five sizes, ideal for constructing and maintaining haul roads—so vital to the logging industry. The Model D, and the BD and AD Series (HP from 34.7 to 104) have increased capacity to handle more dirt, enough power to move that full capacity—and enough traction to use all available engine power. The "Roll-away" moldboard rolls the dirt, cutting down friction of dirt against board. High axle clearance; speeds from 2.08 M.P.H. to 16.64 M.P.H.

**CRAWLER TRACTORS**

Four powerful smooth-operating, A-C 2-cycle Diesel crawler tractors with HP ranging from 40.26 and up are designed to give you the right size for the right job. Operate on ordinary Diesel fuels, require less gear shifting, start instantly. Positive seal truck wheels and idlers require lubrication only once in 1000 hours.

**POWER UNITS**

Designed for tough tractor service, high in torque. A-C heavy-duty power units provide rugged power for every type of job, steady or intermittent. Available in open or enclosed styles with various accessories. Choice of fuels—gasoline, low-grade fuel, natural gas or butane.
