Soil Management and Environment Website Launched by Extension

Abstract
Iowa State University Extension soil management and environment information can now be found on a new website www.agronext.iastate.edu/smse. The Soil Management/Environment website replaces the Soil Management and Conservation Practices website. It contains information that is useful to producers, agriculture business, and scientists.

Keywords
Agronomy

Disciplines
Agricultural Science | Agriculture | Agronomy and Crop Sciences | Soil Science

Soil Management and Environment Website Launched by Extension

By Mahdi Al-Kaisi, Associate Professor, Agronomy Department

Iowa State University Extension soil management and environment information can now be found on a new website www.agronext.iastate.edu/smse. The Soil Management/Environment website replaces the Soil Management and Conservation Practices website. It contains information that is useful to producers, agriculture business, and scientists.

Website content is based on past and current extension and research projects on tillage and cropping systems, soil carbon, residue management, and cover crops. ISU Extension publications, newsletter articles, refereed journal articles, and relevant links are listed under each area of interest. Descriptions of the most current projects are also included.

Several management tools are available, including residue and erosion calculators and other decision-making tools. The materials on this website are intended for public use and educational and research purposes with proper credit to the authors and Iowa State University Agronomy Extension. We welcome any feedback on the new format so continued improvements to the dissemination of our extension and research programs to the agricultural community in Iowa and elsewhere can be made.

Mahdi Al-Kaisi is an associate professor in agronomy with research and extension responsibilities in soil management and environmental soil science. He can be reached at malkaisi@iastate.edu or (515) 294-8304.
