The 1965
PRUNE TREES, PICK FRUIT and SHAKE WALNUTS
60 ft. up with LIGHTWEIGHT SECTIONAL or
TELESCOPIC ALUMINUM or INSULATOR POLES

RECOMMENDATIONS FOR PRUNING

For Tree Pruning, we recommend a 12 ft. Telescopic Pole which telescopes from 6 ft. to 12 ft. To this pole you can add as many sectional 6 ft. poles as you may need to reach up to 60 or 90 feet.

The Telescopic Poles permits you to keep the bottom end on the ground, thereby letting the ground do most of the heavy work. As you add a 6 ft. pole added to telescopic pole, all you do is slip it over the end of telescopic pole and secure it with two bolts with wing nuts. With this type of pole, an elderly man or woman can prune tall trees with 1/3 the effort required with a pole that is too long, that requires slanting or a pole that is too short, that requires holding arms over your head in a tiring position.

- A 12 ft. Telescopic Pole is $15.00
- 2-6 ft. Sectional Poles at $5.50 each 11.00
- A #1 saw is $8.95
- A #7 trimmer is $18.95
- A #9 saw is $11.95

Additional 6 ft. sections are $5.50 each plus delivery of approximately $4.00 out of state.

The #1 saw is adjustable to 13 positions and is ideal for cutting trees 24 feet and more in height.

NEW IMPROVED PINE CONE HOOK KNIFE CUTTER

Fits our aluminum poles

Cuts on both the upward and downward strokes. Cuts weeds, bushes, suckers, and small green palm fronds. It will not cut dead palm fronds. It will clean trees and cut vines. Ideal for cutting pine cones up to 75 feet in the air. Entomologists find it very valuable in cutting specimens of diseased branches. Fits our aluminum poles.

#111 PRICE – $10.95

STANDARD pressures

STEEL OR ALUMINUM WINDOW SQUEEGEE

$3.95

When ordering additional attachments for poles you have to specify type and diameter of pole to assure perfect fit. • SWIM POOL — 34
