ICM News Subscribers Asked to Comment

Abstract

As we turn our attention to the 2009 growing season, we want to hear from Integrated Crop Management (ICM) News subscribers. Subscribers received an email on Jan. 6 requesting them to complete a short survey. The survey offers a chance to comment on the research brought to you through ICM News. We would like to learn if the research information provided in ICM News has helped you make agronomic decisions or take action. Participating in this brief online survey will assist us in measuring the value of ICM News articles/topics, and help us continue to be responsive to your needs.

ICM News Subscribers Asked to Comment

By Gerald A. Miller, associate dean, College of Agriculture and Life Sciences, and Director, Agriculture and Natural Resources Extension

As we turn our attention to the 2009 growing season, we want to hear from Integrated Crop Management (ICM) News subscribers. Subscribers received an email on Jan. 6 requesting them to complete a short survey. The survey offers a chance to comment on the research brought to you through ICM News.

We would like to learn if the research information provided in ICM News has helped you make agronomic decisions or take action. Participating in this brief online survey will assist us in measuring the value of ICM News articles/topics, and help us continue to be responsive to your needs.

Your feedback is critical in guiding us as we select research results that are timely and helpful to Iowa farmers and agronomic service providers. **Please complete the [online survey](#) by Jan. 16, 2009.**

ICM subscribers and all Iowa crop producers are important to us. We appreciate your time and thoughtful responses to the survey. Our goal is to deliver informative ICM news that helps producers make good decisions.

If you have questions about the survey, please contact the program evaluator, Sorrel Brown at sorrel@iastate.edu.
