New information at Agronomy Extension Corn Production Web site

Abstract

As the growing season approaches, remember to find the corn management information you need at the recently released Extension Corn Production Web site. The link to this Web site can be found in the left sidebar of the [Agronomy Extension homepage](#). You also can access it directly at www.agronext.iastate.edu/corn. Corn management articles contained in this ICM issue can be found at the Web site along with numerous other articles. Much of the existing information on the site has been updated this past month to reflect current recommendations and observations.

New information at Agronomy Extension Corn Production Web site

by Lori Abendroth and Roger Elmore, Department of Agronomy

As the growing season approaches, remember to find the corn management information you need at the recently released Extension Corn Production Web site. The link to this Web site can be found in the left sidebar of the Agronomy Extension homepage www.agronext.iastate.edu. You also can access it directly at www.agronext.iastate.edu/corn.

Corn management articles contained in this ICM issue can be found at the Web site along with numerous other articles. Much of the existing information on the site has been updated this past month to reflect current

recommendations and observations. So even if you read an article two months ago on the Web site, you should check again to see if it has been changed. Our goal is to continue to update recommendations as new research and information become available. This allows you to be sure that every time you visit the site you are finding the most current written information available.

Our contact information is located on the Web site. We look forward to hearing from you concerning your ideas and questions.

The screenshot shows the Iowa State University Agronomy Extension website. At the top, there is a navigation bar with 'ISU INDEX' and a list of letters (A-Z). Below this is a search bar and links for 'Calendar' and 'Phonebook'. The main heading is 'Corn Production'. On the left, there is a sidebar menu with options like 'Home', 'News', 'Corn Production', 'Corn Management', 'Tillage and Soil Fertility', 'Pest Management', 'Weather and Crop Data', 'Alternative Agriculture', 'End Uses of Corn', 'Corn Production Economics and Statistics', 'Image Gallery', 'Resources', and 'Contact Us'. The central part of the page features a photograph of corn plants with a caption 'L. Abendroth 2006'. To the right of the photo is a 'News & Updates' section with a link for 'More News'. Below the photo, there is a paragraph of text: 'University research and extension are critical in equipping producers and agronomists with the information they need to continue advancing corn production in Iowa. Incorporating new scientific findings and recommendations into today's agricultural systems must be our priority to consistently produce a high quality crop that is also economically feasible.' At the bottom of the page, there is a disclaimer: 'Information from this website can be copied and distributed for educational use. Please give proper credit to Iowa State University and this website as the source of the information. Refer to this website by name and URL: Corn Production, Agronomy Extension, Iowa State University (www.agronext.iastate.edu/corn).

*Lori Abendroth is an agronomy specialist with research and extension responsibilities in corn production.
Roger Elmore is professor of agronomy with research and extension responsibilities in corn production.*
