## Additional soybean aphid resources

### **Abstract**

Some of the following Web sites were cited in this newsletter and others listed below also provide useful information about soybean aphid biology and management.

### **Keywords**

Entomology

### **Disciplines**

Agricultural Science | Agriculture | Entomology

Soybean aphids being tended by ants. (Marlin E. Rice)

## Additional resources

Some of the following Web sites were cited in this newsletter and others listed below also provide useful information about soybean aphid biology and management.

### Regional soybean aphid suction trap network

<http://www.ncipmc.org/traps>

This site summarizes all of the suction trap data from 2005 and will be updated as data come in during the 2006 growing season.

### Speed scouting

[http://www.soybeans.umn.edu/crop/insects/aphid/aphid\\_sampling.htm](http://www.soybeans.umn.edu/crop/insects/aphid/aphid_sampling.htm)

The speed scouting technique is an effective method to scout soybeans for aphids. You will find detailed instructions as well as blank worksheets.

### Iowa State University soybean aphid research

<http://www.soybeanaphid.info>

Check this site periodically for updates from ongoing research at ISU.
