This Event is brought to you for free and open access by the Conferences and Symposia at Iowa State University Digital Repository. It has been accepted for inclusion in International Textile and Apparel Association (ITAA) Annual Conference Proceedings by an authorized administrator of Iowa State University Digital Repository. For more information, please contact digirep@iastate.edu.

Eco Blossom

Jenna Sato, University of Hawaii, USA

Keywords: Design, sustainability

Purpose: To follow Akihiko Izukura's zero waste philosophy and all natural dyeing process.

Process: The garment was made from 100% raw silk made by Akihiko Izukura. I started with a silk tube 109 inches by 51 inches in dimension. I sun-dyed the fabric in sections using blueberries, raspberries, and blackberries to create different shades of purple. Once I achieved the color I wanted, I started the smocking process. I Canadian smocked using a large rectangular piece for the skirt. Once the smocking was complete, I used elastic for the waistband. I patterned the top bodice and incorporated more hand sewed embellishments. To follow Akihiko Izukura's zero waste philosophy, I used all my scrap fabric to make ruched flower embellishments for the neckline of my bodice. I also create covered buttons for the back of my bodice.

Techniques: Canadian smocking, ruched flower embellishments

Materials: 100% raw silk, white shantung lining, blueberries, raspberries, blackberries

Date Completed: 03/27/13

Measurements: Size 4 mannequin. Bust: 31". Waist: 25". Hips: 35"
