EVERY Iowa State woman enrolled in the home economics curriculum, regardless of her major field, has an average of 13 personality questionnaires filled out by the home economics faculty during her 4 years in college. They may seem unimportant at the time, but these confidential reports follow her all the rest of her life as a basis for reference for future employment.

These evaluation sheets of personalities are made out by the home economics faculty. Every day the

instructor watches a student working and forms her own opinions. The questionnaire asks if the woman is above average, average, below average or has the instructor had little opportunity to judge.

The instructor may look in the files for the reactions of others to a student from whom she can get no response or cooperation. She does not want her judgment to be based on her own personal reaction. The profile of one woman is usually found to be uniform, with few evaluations ranging from high to low.

# How Does YOUR Personality Score?

A—Above Average

B—Average

C—Below Average
