SPENDING TIME

Time to eat . . . The average American consumes about 1,500 pounds of food a year.

Time to live . . . In the United States longevity has increased during the past 60 years at an average rate of half a year of additional life expectancy each year.

In saving time . . . American families spend close to one-seventh of their budgets for household equipment and operation which is more than spent for rent, but less than for food.
