

Nteeba et al., Supplemental Figure S1

Effect of HS (35°C) after 35 days, relative to gilts in thermal neutral (TN; 20°C), on total IRS1 protein level. GAPDH was evaluated as a loading control.

Nteeba et al., Supplemental Figure S2

Impact of HS (35°C) after 35 days, relative to gilts in thermal neutral (TN; 20°C), on total ovarian AKT protein level. GAPDH was evaluated as a loading control.
