

ACKNOWLEDGEMENTS

I would like to thank those who helped me during my graduate studies. I especially thank my advisor Dr. Patrick Schnable who continuously provides opportunities, encouragement and guidance for my research. A special thank to Dr. Dan Nettleton for his long time help in statistical consultation which helped me to setup mathematical framework of this thesis. I also thank other members of my Program of Study Committee, Drs. Srinivas Aluru, Thomas Peterson and Xun Gu for their helpful advice. Besides my POS member, I need to thank our excellent collaborator Dr. Nathan Spring who worked with me for the first maize CNV paper and many other important papers, Dr. Camille Rustenholz who worked with me for the teosinte novel gene project, Dr. Zhendao Wang who worked with me to develop an approach for CNV discovery, Dr. Sanzhen Liu for his many suggestions for my science. I also need to thank Dr. Tieming Ji, Dr. Yi Ja, Dr. An-Ping Hsia, Dr. Yan Fu, Dr. Wei Wu, Dr. Ruth Swanson-Wagner, Dr. Wang Heng, Jinliang Yang and other members of Schnable lab for their helps. Finally, I thank my family: my parents for their unconditional support and encouragement.
