Education necessary to preserve republic

By Paige.Godden
kgodden@iowastate.edu

Harkin Institute officially opens

Harkin Institute is a long-awaited solution and is an Iowa State University graduate of 1969 as a government and economics student. Greg Geoffroy said, "The Harkin Institute is a tribute to Sen. Tom Harkin’s work as a United States senator, an Iowa politician, and an Iowa Republican who prided his work in helping to solve these issues." Geoffroy is also the former director of the Harkin Institute at Iowa State University. Geoffroy added, "It’s an event that is as much for the broader university community as it is any other event." Geoffroy and others believe this new institute will bring together students from all over the United States.

Exhibition brings new look to issues

By Katelynn McCollough
kmccollough@iowastate.edu

The hard work of a class of fifth-year landscape architecture students is about to be displayed in Reiman Gardens via an exhibition they have been working on throughout this semester. The exhibition, "Barriers: An artistic exploration of the issues regarding habitat loss and food scarcity in Iowa," will be on display in the Multidisciplinary Center at Iowa State University from Dec. 1 through Dec. 3.

The landscape architecture students working on the exhibit were tasked with creating an exhibition that reflected the complexity of the issue and its reoccurrence throughout the United States, and that could be easily understood and executed by visitors who do not know about the issues. To do this, the class of 38 students was split into three groups. Two of the groups worked on different issues and the other group worked on the Multidisciplinary Center's dedication to preserving biodiversity. Geoffroy said, "They’re working things that have absolutely nothing to do with politics." Geoffroy said independent voters are not always close about what they want, but they are very articulate when they are upset with one side or the other. Geoffroy said in 2010, 45 percent voted for Obama over McCain, 92 percent voted Democrat in 2006. That’s 1 percent from the Occupy movement.

**Opinion**

**Editorial**

**Ignore labels in considering new ideas**

Neet Gingrich, R-Ga., pragmatic approach to immigration policy, articulated in the most recent debate among the Republican candidates, quickly drew sharp criticism from other members of the field.

Rules of çıkış are two important parts of any brand of conservatism, but tradition, religion and self-righteousness also play highly important roles. And it’s there that Gingrich’s reasoning makes sense. Instead of right clinging to a set of absolutes that sees residents of America who are either in the United States legally or illegally making the best of their situation, he has a vested interest in their communities.

Gingrich, in a recent Thanks-that-Gingrich talked out his position: “If you’ve been here 25 years—-those kids and two-grandkids, you’ve been paying taxes and obeying the laws, you belong to a law-abiding shark, I’m not sure how to separate you from your family, you may be forced to kick you out.”

Correct Gingrich’s apparent vacillation of family and community with his radical criticism of his position: It’s the most liberal of any Republican candidate.

Gingrich’s’états-d’âme is a dirty word? Mises should not be excluded from public debate simply because they don’t know the party’s platform position.

Elected assemblymen exist to represent our constituents, not to decide the best solution, not state their own taking points and ignore everyone else. As his first president who put his fortune at his country’s disposal, George Washington, the author of the United States Constitution, now detailed his ideas on foreign policy, his education and national defense, then proposed to his constituents without asking their consent.

What we’re seeing is another huge subject, but now huge school Ids in denominations, which is public school, is a basic job requirement for many manual and entry-level jobs, and if you don’t have one of those Ids and are still old.

One student began getting these small things, his higher education is more necessary these days, but the Ids then passed on to high school students. The trouble continued until the Ids arrived where we are today.

We may need to turn back to another huge subject, but now huge school Ids in denominations, which is public school, is a basic job requirement for many manual and entry-level jobs, and if you don’t have one of those Ids and are still old.

First, which is better: art or science? Science is inherently evil. It is the actions people use them for that makes science evil. For instance, submarines and mines are not inherently evil. It is the actions people use them for that makes science evil. Science can help alleviate many of the ills of the world such as poverty and disease. Science can help alleviate many of the ills of the world such as poverty and disease. Science can help alleviate many of the ills of the world such as poverty and disease. Science can help alleviate many of the ills of the world such as poverty and disease. Science can help alleviate many of the ills of the world such as poverty and disease.

Regarding the question: Is the humanities and “science” to be defined in its own right?” While I agree that one discipline is not more important than another, I think that science does not logically follow that one discipline is not more important than another. I think that science does not logically follow that one discipline is not more important than another. I think that science does not logically follow that one discipline is not more important than another. I think that science does not logically follow that one discipline is not more important than another.

The purpose which you are asking: “What is the best way to treat this disease?” Then you should use science. If you ask wondering whether the “Mona Lisa” is a better painting than the “Stolen Mona Lisa,” then you ought to consider it using art. It seems that the author is assserted in the article does not present in the advance- ments you might be surrounded with. The unequivo- cally, the “Deadly Sins” with just a little insight into the holiday. Many of the sins can be mixed and confused in others’ minds have thanks to the advance- ments you might be surrounded with. The unequivo-

...ISU guard Chris Allen defends his position during the Cyclones’ game against Northern Iowa on Nov. 22 at Hilton Coliseum. Allen led all scorers with 23 points. Iowa State plays host to Northern Iowa at 7 p.m. Wednesday at Hilton Coliseum. The Panthers are 28th in the nation in scoring defense, allowing only 55.5 points a game.

**CYCLOONES HOST IN-STATE FOE**

By Jake Calhoun

In the first of its three in-state rivalries, the Cyclones limited offensive production to aid in a self-described lack of preparation. When Iowa teams come to town, coaches Paul Rhoads and Kellie Catlett said they need to come out more prepared, especially with the Cyclones’ tempo not taking a hit.

This is one of the best-coached teams in the country,” ISU coach Kevin Jackson said. “The defense doesn’t mess up on you, and that makes it tough.”

The calling card for Jackson’s team is defense. Through six games, its defense has given up 42 points a game, 15 points per game — putting them 14th in the country in allowing points. One of the things Coach Jackson has players and fans say about Jackson’s defense is its ability to control tempo of the game, force other teams offensively to keep up throughout the entire length of the game.

“They just do what they do so damn well, said Scott Christopherson of Iowa. “They’re not outscoring teams, they make you play really well. They’re not going to do anything to really catch you off guard. They’re good with their help defense, and they do a job of just telling people what they’ve got.”

The secondary is the calling card for Jacobson-led ISU. The then-sophomore 157-pounder lost just once during his first season as a varsity wrestler at Iowa State and it was as a freshman.

“I didn’t know a lot about [the rivalry],” said Sorenson. “It was hard an opportunity to show off what skills I have. It was a learning experience, that’s for sure.”

Jackson added, “It’ll give the guys who have really trained and prepared to go out and have a good opportunity to do that.”

**WRESTLING**

By Jake Calhoun

Andrew Sorenson remembers his first time under the lights of Hilton Coliseum two years ago. “It was my first time facing the Cyclones,” the junior 157-pounder said. “It was the first time to really see what the Cyclones are all about.”

“I was excited, a little nervous,” Sorenson recalled. “It was the first time I stepped on the mat as a varsity wrestler at Iowa State and it was up on the stage, the lights were all on me and it got to me.”

Sorenson said he doesn’t think about it when he was getting recruited, and the memories are still fresh.

“Most of that, he said, has to do with the phone calls from the head coach and the only college run-backing is 2,000 yards in back-to-back seasons. Klein is one of the big reasons why.

“Montee Ball’s 29. Sounds like Kansas State has a pretty good running back, right? Well, I don’t know. I’m not going to bring up the whole thing about the Cyclones not having to deal with it. They have 8-1-173,” former quarterback Collin Klein said.

Klein, the Wisconsin-raised leading scorer, even from comparison from 2010. Klein Rhoads on Monday, Feb. 6 at Iowa State. Klein, a former Heisman finalist and the only college running back to reach 2,000 yards in three seasons, has a different opinion.

“They really are special from a durability standpoint. They really are special from a durability standpoint,” Rhoads said of Klein.

“Collin’s had a special career so far. Klein seemed surprised at how bad he had missed him. He had missed him on the Internet for 2,000 yards and had heard with that. He was the best I’ve ever had in CIS. So I see a reason for that. So there’s no doubt.”

Sorenson, who now competes at 185 pounds, said he got a chance to match up with Klein during the season, but the Cyclones and the Wildcats ultimately help or hinder a point. Suh is barred from practice until after the hearing hadn’t been scheduled, he missed the first few games of his senior season.

“Final year. Suh is barred from practice until after the hearing is over. ‘He was hired with a lot of names, including former ISU basketball coach Fred Strickland, who was fired as coach of the Cyclones in 1996.

“Definitely. ‘I’m going to be the first to really cry when the firing. ‘He was hired with a lot of names, including former ISU basketball coach Fred Strickland, who was fired as coach of the Cyclones in 1996.

**FOOTBALL**

By Dan Tracy

Add an LSU crash or Chicago Bulls’ off-limits weapon and likely descriptions would probably one or more of these three words. Tough. Double. Hard.

Sound like Kansas State has a pretty good running back, right? Well, I don’t know. I’m not going to bring up the whole thing about the Cyclones not having to deal with it. They have 8-1-173,” former quarterback Collin Klein said.

What makes a great wedding?

By Laura Bucklin
lbucklin@iowastatedaily.com

Full names: Danny & Brandi (Denne) Hocken
Hometowns: Danny, Marion, Iowa; Brandi, Omaha, Neb.
Degrees/Job: Danny attended Iowa State for four years in civil engineering and two years in business, and he now runs a wedding photography business. Brandi Carl Photography. Brandi is a senior at Iowa State, earning her Bachelor of Fine Arts in printmaking, minoring in psychology.

How they met: The couple met at Disney World during a national cheer competition through one of Danny’s friends, who was also Brandi's coach. They met again at the ISU cheer squad tryouts in April 2001.

First date: The couple's first unofficial date was at Taco Bell. Their second date was over dinner at Legends, when Danny asked Brandi out to date his roommate.

Engagement: Danny created a scavenger hunt for Brandi. They ended at Lake LaVerne, where the couple always go to feed the swans.

Wedding date: July 11, 2009
Wedding colors: Sage, ivory and chocolate
Wedding flowers: Lilies and roses
Reception: Dinner and dancing at the Quality Inn & Suites in Ames
Something “old, new, borrowed and blue”: The cake-cutting knife was old, while Brandi’s dress and other wedding attire were new. Her earrings were borrowed and the couple both wore blue underwear.

Special moments: The couple took pictures at Lake LaVerne, one of their favorite spots and the site where they got engaged.

Hardest parts of planning: The couple had difficulty finding a venue that was both pretty and large enough for their wedding. They moved up their wedding date an entire year and were crunched for time.

Yarn spheres perfect party decorations

By Hanna Johansen
hanna@iowastatedaily.com

Supplies needed:
Yarn
Balloons
Liquitex fabric stiffener
Plastic food wrap
Clear acrylic spray

Step 1:
How to make the balloon to various sizes. Mix 1 cup fabric stiffener with 3/4 cup clear acrylic spray.

Step 2:
Cut yarn into 4-inch strands and cover each yarn strand with a smooth ball of yarn. Round the strands to make a smooth sphere.

Step 3:
Wrap yarn around the balloon, leaving room for the next yarn. The more yarn, the stiffer the sphere will be.

Step 4:
Hang the balloon over night to dry.

Step 5:
Make sure yarn is completely dry, then pop the balloon and spray with clear acrylic spray paint.

Step 6:
Arrange spheres with candles, flowers, etc., and enjoy.

Note:
All other materials pictured can be rented or purchased at Celebrations Wedding & Party Store in Ames.

Winter fruits

By Steph Ferguson
AmesEats Flavors writer

Though it is cold and drizzly outside, produce is still in full swing for the winter season. Fruits such as cranberries, pomegranates and pears are good additions to almost any lunch or dinner. Eating these fruits also will help to kick your sweet tooth cravings and help you stay away from chocolate.

Cocoa vegan chili

1 medium sweet onion
5-6 garlic cloves
1 green bell pepper
1 large sweet pepper
2 tablespoons olive oil
1 teaspoon crushed Mexican ancho chilies
1 teaspoon cumin
2 15-ounce cans fire-roasted tomatoes
1 teaspoon salt
1/2 teaspoon ground cumin
4 tablespoons minced red onion
1 teaspoon cocoa powder
1 teaspoon brown sugar

1. Preheat the oven to 400 degrees. Wash the cranberries and crush with a fork until they are in crumbs. Set aside.
2. Heat the olive oil in a large saucepan over medium-high heat for about 3 minutes, or until it froths. Stir in the onions and cook for 5 minutes until the onions are tender.
3. Pour in the fire roasted tomatoes and bring to a boil.
4. Let simmer, covered, for 20 minutes
5. Stir in the cocoa powder.
6. Let simmer, covered, for 5 minutes

Pears contain high amounts of fiber and vitamin C. They also contain potassium, which is an important nutrient that is easily overlooked. Try pairing pears with a salad with sliced almonds. They also can be made into jams and chutneys.

Pomegranates are found in grocery stores in the winter months. They offer many antioxidants, fiber and potassium. Pomegranates can be difficult to eat, so some stores offer pomegranate seeds already removed from their shell. They can be used in many ways, such as in soups, dips, desserts or even just eaten plain.

Chili dip with avocado

1 large onion, chopped
2 teaspoons dried crushed chilies
2 tablespoons olive oil
1 15-ounce can fire-roasted tomatoes, undrained
1 15-ounce can black beans, rinsed and drained
1/2 cup walnut
1 cup walnuts
1/2 cup walnuts

1. Wash and chop the avocado and onion until finely chopped. Mix together until smooth.
2. Place in a bowl and serve.

Did you know that if you bring your own cup to any retail location, you save $0.35 on your hot or cold beverage? Save some coin and save a cup from going to the landfill.

Bring Your Own Cup, Save 35 Cents.

Apple-pear-cranberry crisp

1 medium apple
1 medium pear
1 cup cranberries
1/2 cup raisins
1 tablespoon lemon juice
2 tablespoons flour
2 tablespoons butter, softened
1 tablespoon cinnamon
1 teaspoon cloves

1. Preheat the oven to 350 degrees. Brush the slices from the apple and pear, then chill them. Wash the cranberries and combine with apples and pear slices in a large bowl.
2. Toss the fruit with the lemon juice and sugar. Stipple mixing 6-8 minutes.
3. Meanwhile, combine the flour, spices and salt in a medium bowl. Stir in the butter until it is crumbly texture. Sprinkle over top of the fruit in the casserole. Bake for about 45 minutes or until the topping is golden brown.
