Ames citizens remain unsure as to whether the proposed renovations to the Iowa State convention center will provide benefits. Some citizens are worried the benefits are not worth the costs.

Plans for the Scheman Building renovation include expanding the facility to the north, utilizing some current parking space. Some citizens are worried the benefits are not worth the costs.

The renovations proposed by the Ames Convention & Visitors Bureau, the Iowa State convention center will benefit the community. The renovations would provide a new convention center by only paying for the additional space.

The Iowa State convention center will be renovated. The renovations proposed by the Ames Convention & Visitors Bureau, the Iowa State convention center will benefit the community.

In order for the project to pass, 60% of Ames residents must approve the changes. The project would include a renovation to the top floor of Hilton Coliseum.

Get a new convention center by only paying for the additional space. The Iowa State convention center will be renovated. The renovations proposed by the Ames Convention & Visitors Bureau, the Iowa State convention center will benefit the community.

Sometimes we will need assistance. In the winter after February, so another month or so of winter after February, we start the winter with our 1200-ton storage tank filled with salt, and we have 2500 tons cached. The streets of Ames are always safe for students.

Sometimes we will need assistance. In the winter after February, so another month or so of winter after February, we start the winter with our 1200-ton storage tank filled with salt, and we have 2500 tons cached.

When the snow doesn't actually stick to the ground, it's a problem. One thing Cole uses the money for is to buy salt for the streets. Another thing we do is to check the storm with a salt time schedule.

We start the winter with our 1200-ton storage tank full of salt, and we have 2500 tons cached. The streets of Ames are always safe for students.
Big 12 conference provides opportunities for black students to network, discuss concerns

By Jordan Delo
#iowastatedaily.com

“Now, 50 years after Martin Luther King, I Have a Dream speech, I wonder, have we yet realized the dream?” said Angela Franklin, president of Des Moines University, at the 37th annual Big 12 Conference on Black Student Government. Even though there are accomplishments that Martin Luther King would be proud of, there are still negative aspects of society that persist.

“So, have we realized the dream? Not yet, but there is hope,” said Franklin.

This weekend, the Scherian Building and Memorial Union were filled with conference participants dressed to impress. Groups of students and faculty moved from session to session, catching up with each other to make friends. The conference held more than 60 sessions, all using a different perspective to discuss leadership in the African-American community.

Sgt. Maj. Marvin L. Dixon was invited to present a session with former Marine Marvin Dixon also took the conference as an opportunity to learn from others.

“The reason why we’re here is diversity to the Marine Corps, we struggle with diversity. This is the prime opportunity to look for diversity and give those young men and women the information and opportunity to possibly serve in the military also,” said Dixon.

During the presentation about the Marines, there was a presentation called “Why I Don’t Hire Black People.”

“Empower yourself to lead yourself and do something,” said Dixon. ""Empower yourself to lead yourself and do something for the community.”

Iowa legislators suggest changes to HIV transmission law

By Jonathan North

Iowa has one of the hardest-hit states for individuals with AIDS. The number of new infections has been on the decline for the past 12 years due to the fact that the law has been toughened up.

The bill, introduced by state Rep. James Boyd, D-Iowa City, would make it a class-C misdemeanor to know that you are infected with HIV and not disclose this information to a sexual partner. The bill would also make it a class-C misdemeanor to know that you are infected with HIV and not disclose this information to someone with whom you are in contact or had contact with in the past 30 days.

The bill has a few provisions that would aid with the transmission of the virus. The bill would require the Department of Public Health to establish a database of people with HIV and require that health care providers report all cases of HIV to the database. The bill would also require the Department of Public Health to establish a program to educate the public about HIV and its transmission.

The bill has been met with some opposition. Some people have argued that the bill is too harsh and that it would stigmatize people with HIV. Others have argued that the bill is necessary to prevent the transmission of the virus.

The bill was referred to the Senate Public Health Committee, which is expected to meet soon to discuss the bill.

\section*{Editorial}

\textbf{Voting for GSB plays vital role in student life}

With the Government of the Student Body elections just a day away, hopefully many students will take the time to utilize their voice and vote wisely. It is not easy as students to decide who will be the most prominent of GSB. Yet many students do not even know who GSB is, let alone care or do on campus. Some even feel like voting from a distance or don’t know it is up to them to make the decision that you, the student, provides. Politically GSB is primarily designed to help clubs request funding for their operations, and developing a cabinet position exclusive to student body government. Simply logging onto vote.iastate.edu to no time out of everyone’s busy schedule may seem quite easy to many students. However, if you do not vote, you will not be able to have a say in any of this. We are an independent entity that the student body does not have to worry about the impact that the new incoming executive will have on our university. Voting is as simple as getting on your computer and typing in your email address. Many student life decisions impact GSB. Any student that feels strongly about something they do not like on campus should be voting. Any student who cares about the election do not know who is running for what position will have to cast their vote.

When Iowa State's Edward Kemboi stepped up to the line for his 1,500-meter and 800-meter run this season, he was perhaps the best 800-meter runner in the country by pick-up Lights. He was deadlocked behind the leading man, looking as if he was not going to make a move that the rest of the field knew he was ready to.

Kemboi stepped up to the line for his 1,500-meter and 800-meter run this season.

Kemboi crossed the finish line, hands in the air higher than ever before, and earned the congratulations and the awards ceremony which announced him as the top runner in the country by pick-up Lights.

Kemboi quickly jogged to the infield where he began to warm up.

Iowa State's distance medley relay team fea-
tured a lineup that was different than the usual 800-meter race it had run for two years. Wolfram Sudbury said.

“The 800-meter is my race, everybody knows that. No matter if someone is 10 first place team. With a
