ActivUs hopes to improve ISU policies

By Hilary Bassett

During April, ActivUs, a group of student environmental and social justice activists on campus, will host several events to promote change.

The group’s goals are generally to get the administration to make sure that life on campus would be more sustainable, and bring activist and graduate students to campus.

This is accomplished through four routes: Campaigning, Beyond Plastic and Beyond Coal.

“Beyond Plastic is a campaign where most people take plastic bottles in the store to their dorms and throw away bottles in dining halls and other places we see,“ said Casey Gabel, a junior in animal science.

“Beyond coal is a campaign to try to lower the amount of coal we burn on campus. We’re working with the Iowa distinct to do that because fossil fuel has negative health and environmental impacts from communities and has negative impacts to its disposal. Field said.

“We like to emphasize the reduce rather than just recycle,” Field said.

In order to raise awareness, ActivUs is hosting a winter bottle contest - Friday through Sunday. The most enthusiastic student will receive a t-shirt the following Monday.

Participants get 100 winter bottles and 48 hours to complete their collection, after which they will have to present their collection before either the Jefferson or the College of Design. 

In addition to the collection contest, ActivUs has also been hosting meet-up events to build interactions.

People walking around campus are constantly just throwing away bottles in drinking and other places we see,’’ Field said.

Students who give up their plastic water bottles receive a full paid bid to nationals.

Ames

**Subway robbed at gunpoint**

By Kaillin Terrk

Ames Police responded to an armed robbery at Subway, 2106 Cameron Rd, on Monday evening.

According to the employee, the suspect held up a demand and demanded money. The suspect was described as a white male, approximately 40 years old, 5 feet eight inches tall and 190 pounds.

He was wearing blue jeans, a light blue hooded sweatshirt, a black mask, and a white tennis shoes with a green trim. The suspect left with an unknown amount of money, headed southbound on 2nd. No one was injured during this incident, and the investigation is ongoing.

Anyone with information is encouraged to contact the Ames Police Department.

**Competition**

Dancers prepare for nationals

By Caroline Hawkoot

Hard work, dedication, countless hours of practice and training workouts, and the trust of dance all go into the making of a national-qualifying dance routine.

The ISU Gold Dance Squad will be competing in the National Dance Competition in Daytona, Fla. this week. The team will be performing a routine consisting of hip-hop, jazz, pom and dance styles, which was a trial.

My goal is to be proud of what we do,” Pederson said.

Students also hope the team will be in the preliminary round and into finals.

This year’s men’s and women’s teams are comprised of 21 dancers. One of the largest squads ISU State has ever sent to nationals consists of one from the Gold squad, as well as five from the Cardinal and one from the Gold Angels.

The team is working with ‘a good coach and he’s been to the best we can be,” Pederson said. 

Leads and helps both dance squads during rehearsals.

This is just like any other sport we have games, mandatory practices and high expectations for our dancers no less than the Gold,” Pederson said.

The team consists of two national and six regional scholarships, which will be distributed among the team.

**National prep**

The team leaves for nationals on Wednesday and will be competing in the prelim round, every team excepted.

The team will be performing their state competition, performed at football and basketball games, which appeared at events such as the Iowa State Fair and national competitions, while keeping up their annual-qualifying competition.

At state competition, in December, the Gold squad placed fifth for its lyrical dance.

The Cardinal and Angels also competed and received first and third place respectively, for the isu-dance team.

The team has also been doing conditioning and strength training workouts to prepare for the competition.

“We have practices three times a week for three hours. On the off days we do a cardio or aerobic exercise workout,” celebrated Pederson said.

Pederson believes that in order to achieve success in being in the top five, they need to stay fit and conditioned. Both coaches agreed that constant practices are necessary for just the conditioning and energy needed for the routine.

Dancers and pieces have improved with Iowa State never been stronger.

The NSU national competition is still a little far away. In the near future, every team prepares their moves in practice. In the next several days, teams practice different pieces for their upcoming competition.

The Gold Dance Team practices for nationals at the Parker gym March 12. The team is hosting a preview night this Saturday at 6 p.m. to give the public a glimpse at what the team has been working on.

**Alcohol**

Alcohol can also create problems for students on campus.

“Student drinking also affects non-drinkers. Student drinking can lead to interpersonal conflicts, violence or self-sustained injuries,” Dusselier said.

Drinking is defined as drinking alcohol within a short period of time.

For women, the number is reduced to four or more drinks.

The Center for Disease Control and Prevention associates binge drinking with several health problems, including high blood pressure, liver disease, neurological damage, sexual dysfunction and memory loss.

Both weight, gain, drugs age and food consumption all influence the absorption of alcohol.

**Facilities Planning and Management**

**Platteville**

There are two main causes of death among crows: predation and human activities. Crows are known for their ability to deal with threats, but their survival is threatened by human activities.

1. **Predation:** Crows are predators themselves and are prey to larger birds and animals. They are also susceptible to diseases such as West Nile virus.
2. **Human Activities:** Crows are also at risk from human activities such as hunting, pollution, and habitat loss.

In conclusion, crows are unique and valuable birds that need our protection and conservation efforts.

Will catalog changes make life easier?

Class registration for Iowa State began March 22 for undergraduates. As most students log on to the registration page of AccessPlus, they have a simple plan. Follow what ever template has been set aside for their major and register for courses that fit with their work and sleep schedule.

However, that plan rarely comes off without a hitch. Students currently signing up for summer and fall classes will notice that some courses they had expected to include on their schedule do not exist within AccessPlus page at all. Furthermore, some classes appear that cannot be found in the online or printed catalog.

After a visit with an academic advisor, students are informed of the new catalog — previously released every two years — is what should be used when registering for classes. The hyperlinks for each course description in the registration process direct they to 2014-2015 catalog, which they click on it.

Unfortunately, upon clicking the links you will find a "URL not found". Although the university has not yet published the catalog needed to register for classes — it is forthcoming — students are expected to look up the system’s offerings in their classes based on the older catalog.

Expecting students to understand any system that requires non-class-based learning is unfortunately doomed to failure. Today’s college students are online anyway. The paper version because registration is usually done online anyway. The elimination of the print form will allow for better funding for the online form, according to an Office of the Registrar.

"There will be a possibility of more options to allow for ease of finding classes that involves, for example, studying film or the ever popular finding classes that involve, for example, film or the ever popular finding classes that involve, for example, film. The Office of the Registrar.

The Daily encourages discussion but does not guarantee its publication. Feedback policy: Feedback is welcome at iowastatedaily.com/opinion. If there’s one thing Mrs. Geoffroy would like to do, it’s that she and her husband actually live, is a bit more Iowa State Daily.

Looking back

Iowa State to lose first lady

Mrs. Geoffroy shares story, of her decade at Iowa State

A life at the Knoll as a daily reporter, little more than a year ago, it would have been nearly impossible to add courses multiple times based on the older catalog.

Mrs. Geoffroy shares story, of her decade at Iowa State

Iowa State to lose first lady

Mrs. Geoffroy shares story, of her tenure at Iowa State

An interview with Mrs. Geoffroy, in my opinion, was one that I was looking forward to, she just laughs and says, "Oh, dear, and here I am with just a simple, one leaving the Knoll, however. His wife, Geoffroy don’t get much time for dates, she said. Typically, they just like to unwind at home with a friend.

Iowa State Daily
People often tell each other such things. “What you may do in your sleep — can more appropriately be termed wishes.” This would imply how they would wish it to be, or expected it to be true.

There was no distinction between the two. But there is a hefty difference between dreams and plans. The right to share freely, without fear of being accused of treason for expressing a desire, comes and goes, sometimes against our will. But if you wish for the way things used to be, make it so.

As for any atheists that read this, you are more than welcome to share your dreams, but not your dreams as a religion. You are more than welcome to bring the dreaming sections of the human mind out in the open, even if you are an atheist. It is also a fact that Mr. Ghaith al-Omari is an atheist and that he is still standing even if he has no religion. For musicians, the main focus is to express thoughts and feelings honestly and freely, share their emotions and the ideas that cross our minds as a result of events and the surrounding world. This happens by writing lyrics and composing music that the audience can relate to.
**Cyclones plot revenge**

By Zach Gourley

iowastatedaily.com

The Cyclones softball team goes for a chance at redemption and payback Monday when the Southern Illinois University Edwardsville Cougars visit Ames. Iowa State (19-15-1, 5-6-1) did not have to travel far to get a second shot at SIUE, as it is just down the road from the Cyclones at Victory Field in Des Moines.

For head coach Joan hydrogen in the program, the Cougars are easier for the Cyclones to scout. "I'll admit, we've seen them twice already," said hydrogen. "And I think we've done a good job of preparing for them." The Cyclones improved to 1-1 in Big 12 play and 6-5-1 overall with a sweep of Illinois State on Saturday at Grinnell College and a loss to No. 9 Texas A&M over the weekend.

As head coach Joan hydrogen, "We're a force to be reckoned with. We're a team that is determined to be a force in the Big 12 this year. We're looking to make a statement in Big 12 play and we're looking to win the conference." The Cyclones have won all three games in conference play this season, including a 3-1 victory over Texas A&M last weekend.

Iowa State (19-15-1, 5-6-1) is coming off a weekend sweep of the Panthers and former Big East foe Connecticut.

"We're excited to get back to conference play," said hydrogen. "We've been looking forward to this all season. We're ready to show everyone what we're made of in Big 12 play." The Cyclones have won five of their last six conference games, including a sweep of the Panthers last weekend.

The Cyclones are currently ranked No. 16 in the Big 12 standings and are just one game behind the conference leader, West Virginia. The Cyclones have won their last three conference games and are looking to make a run for the conference title.

Erratic defense costs Cyclones against MSU

By Dan Xuran

The sixth inning of Saturday’s second contest against Iowa State and Minnesota State University-Mankato displayed the Cyclones’ ability to fall and struggle to play defense.

In the top half of the inning, with two runners on and the game tied at one, catcher Zach Sullivan drove a ball to left field center, sending the ball and the head of outfielder Ethan Schroeder. Both of the runners touched home plates, and Sullivan collided with the fielder at home. Petenborg pitched well, giving up five hits while striking out six. Sullivan said: “I thought it’s still pretty early in the season for everyone. Still getting warmed up, but I expect those errors to go way down as we progress through the season,”

Petenborg pitched well, giving up five hits while striking out six. Sullivan said: “I thought it’s still pretty early in the season for everyone. Still getting warmed up, but I expect those errors to go way down as we progress through the season,” Petenborg said.

The leadoff man for the Mavericks reached on an error, a single and a pop-out later, two runners were on with one out. The next batter missed a foul ball, allowing Sullivan to score on a double at right field. The win secured the comeback on an RBI from the warning track and a right field line drive that Sullivan missed. A single and a pop-out later, the game tied at one, catcher Schroeder delivered.

Saturday’s second contest against Minnesota State University-Mankato and the Cyclones ended in a 15-1 loss for the Cyclones.

A Justin Sullivan sacrifice fly brought Simons home, giving the Cyclones a 3-0 lead in the top half of the inning. The Mavericks would come back to take a 4-3 lead in the bottom of the inning.

**The barbecue tour**

By Katya Adams

AmesEats Flavors Writer

By Kaye Hartman

AmesEats Flavors Writer

By LaRoye Ingebrand

AmesEats Flavors Writer

The United States has four different regions with their own styles of barbecue, let’s take a tour and you can choose your favorite.

**Memphis, Tennessee:** home to my personal favorite style of barbecue. Memphis barbecue is primarily low – which can be preparation wise or not. The meat is slow cooked with sauce拍拍 and other cooking. The dry rubs are seasoned with paprika, chili, tamarind, and the sauce is either poured over the shoulder of the pig and is served coated with a thick sweet, tangy basting sauce. If you ever find yourself in Memphis be sure to try an "Ole Eddy." It has a personality as deep as its thick, rich, and smoked dish.

**The Carolinas:** have several all-time favorite types of barbecue. Eastern North Carolina has the eastern tip in their province. The pork is cooked, all parts are chopped and mixed together then covered with thick sauce made of spices and vinegar. Western North Carolina has the most common barbecue, the shoulder broadly doused, then covered with thick sauce and will have the thicker, meatier mixture. The barbecue from this region is known as "Eastern North Carolina barbeque," after the state of North Carolina. In the South Carolina region, the most common style of barbecue is with a salt and pepper rub, but it also has a special sauce called, "Carolina Gold," which tastes like the Midlands, or saltier Carolina style. It has yellow mustard, vinegar, brown sugar and other spices. It is not located in the coastal region, where they use the entire hog and the thin spicy sauce.

**Kansas City:** are a variety of meats for their barbecue, but they are known for their brisket. It is thin and served with a variety of meat and vegetables. They have a variety of meat cooked over medium heat or a variety of meat cooked over a varietal type of sauce or in other areas of the country and the Midwest. Known for being a sellingentral.

**Texas:** has four styles of barbecue. East Texas has a southern regional type of barbecue. Central Texas has a "meat market" style, similar to a butcher shop. West Texas is different from the rest because they use mesquite, maple, and pecan to cook the meat over a fire. Thus, South Texas has barbecue, barbeque, and they cook the head of the cow. The Carolinas:

**Southern Belles:**

Georgia peaches and Florida oranges

By LaRoye Ingebrand

AmesEats Flavors Writer

Any one who has a Florida or Georgia license plate knows that they are proud producers of peaches and oranges. Despite neither being "talking to the America," these fruits have become quite the Southern Belles.

**Peaches:**

- Over 22 different varieties of peaches are grown in Georgia producing over 1.5 billion pounds of the fruit each year.
- Peaches require controlled pollination to produce them, otherwise they are unpoppable and only sport a clove of a peach in the finished product.
- The peach “juice is a primary source of vitamin A and vitamin C, which can decrease risk of certain breast and digestive cancers.
- The peach “juice is a primary source of vitamin A and vitamin C, which can decrease risk of certain breast and digestive cancers.

**Oranges:**

- The all Florida orange season is from November 1 until the end of March. The peak season is Jan.
- Oranges require high irrigation levels to produce the fruit.
- A diet rich in citrus fruits like the orange, grapefruit, and lemon has been found to reduce the risk of heart disease.
- If you plant a single seed from an orange tree, you will get an orange tree.
