## Building burns

**By Paige Golden**

An apartment building at 230 Campus Ave. caught fire Thursday afternoon. Brett Sprungheiser, freshman in electrical engineering, and Bill Finney, sophomore in electrical engineering, live in a nearby apartment building and said they saw the fire first.

**Fire**

A fire burns at an apartment building at 230 Campus Ave. on Thursday afternoon. According to witnesses, the fire started in a pile of leaves outside the building and moved inside.

## Public education

**By Breanne Hunter**

The Ames League of Women Voters will host a series of panels in support of the federal government’s role in public education by the League of Women Voters of the United States at the Ames City Council Chambers from 10 a.m. to noon Saturday.

The public is invited to come listen to panelists discuss the role of the federal government in public education, the history of funding and equity issues and the confusion that comes with many federal grant programs. Panelists will include ISU professors Dr. Isaac Blumenfeld and Dr. Carl Hoben, as well as Timberline High School principal Dr. Warren Brinkom and Carl DeSoto.

## State funding

**Regents discuss tuition**

**Increase would cost students $240 a year**

By Paige Golden

The Iowa Board of Regents discussed raising tuition and fees for fiscal year 2013 at their meeting Thursday.

The board said it has received $944 million in permanent state funding since 2005, but maintained that raising tuition would cover the cost of inflation, not permanent state funding losses.

The amount of the proposed tuition increase would be $240, less than the inflation rate of 40 cents.

In 2003, Iowa Governor Tom Vilsack said he hadn’t received any complaints about the proposed increase from students.

“Students, we understand the difficult times. We have pushed and sharply declared, and environed the idea of more tuition,” Hoben said.

He added that students have dealt with their fair share over the past five years. Hoben said that the most permanent cut in the most important capital.

He said the wants to make sure the universities are accessible and affordable to all.

“Understanding the role that higher education plays in the future of Iowa is essential,” Hoben said. “And we ultimately supported the increase.”

Students find the increase more fair than paying the inflationary costs,” Hoben said. “We support the proposed tuition and fees for students.”

Spencer Walrath, student body president at the University of Northern Iowa, said he was in tears at hearing his support for the tuition increase.

He said the University of Northern Iowa is in a unique position.

## Courses

**Friday marks drop deadline**

**By Ben Theobald**

Friday will be the deadline for students to drop a full-semester course without any extenuating circumstances, or as the administration would like to refer to the financial aid act.

Information released by the police indicated that a staff member reported a motor vehicle in a “towed vehicle.” Investigators are currently conducting an investigation to determine whether any criminal action has occurred.

## Inside

**Police receive reports of lewd behavior**

**By Alex Erb**

Iowa State Policecommanderspecialconfirmedthere were no felonies in the crash on Interstate I-35 that happened near the Indianola exit.

According to the crash report, a Toyota Corolla, driven by Robert Turner, of Indianola, was stopped at the 111th Street exit for a traffic accident.

A second vehicle, driven by Larry Turner of Indianola, was also involved in the accident.

A third vehicle, driven by Kent Harms, of Roland, Iowa, was stopped at the 111th Street exit for a traffic accident.

According to the report, a fourth vehicle driven by John Sandorn, according to the report, was injured and transported to Mercy Medical Center, and Turner was served.

“Students find the increase more fair than paying the inflationary costs,” Hoben said. “We support the proposed tuition and fees for students.”

Spencer Walrath, student body president at the University of Northern Iowa, said he was in tears at hearing his support for the tuition increase.

He said the University of Northern Iowa is in a unique position.

Defence to call last witness in trial of Jackson’s doctor
LOS ANGELES — Michael Jackson’s defense team was expected to call its last witness Thursday in the pop star’s trial, in a move that could help defend the singer against charges of child molestation.

The defense hopes to use its last two witnesses to make a point that the prosecution is not credible. The defense hopes to prove that any allegations are not based on facts.

Medicine

A new method of giving vaccines could be more affordable and accessible for many people, said R. Floyd, professor of biological chemistry and co-author of the work. "Given the choice of a needle in the arm and a food of load of corn seeds, which would you prefer? Would you mind if it's a bowl of fried soybean containing a vaccine, or take it from the table?"

There are many applications down the road, including edible vaccines. "There is no readily available way to discern corn seeds, and there is the potential to reduce the epidemic caused by the swine flu virus," said Blevins. "A student may want to think differently to different schools and programs." Rupp said. "It kind of sucks. ... I'm pretty sure it was a bike rack and the back side of the building. ... I thought it was the back side of the building." Doll said. "I heard a pop," Doll said. "It was a tire from the building. It was a hydraulic lift, so the fire department decided to leave it there."

It also saves on the costs of needles and other healthcare, which would still be necessary if the vaccine were not in corn. "A new method of giving vaccines could be more affordable and accessible for many people," said Floyd. "There are many applications down the road, including edible vaccines." Floyd said. "There is no readily available way to discern corn seeds, and there is the potential to reduce the epidemic caused by the swine flu virus." Blevins said. "A student may want to think differently to different schools and programs." Rupp said. "It kind of sucks. ... I'm pretty sure it was a bike rack and the back side of the building. ... I thought it was the back side of the building." Doll said. "I heard a pop," Doll said. "It was a tire from the building. It was a hydraulic lift, so the fire department decided to leave it there."

For more information on the possibilities of the actual application of the edible vaccines, Floyd said that they would take more time for the decision-makers and the researchers. "We need to make sure cuts to the tune of $140 million stop, and ar- rare."

So far, positive results are shown on human tests of edible vaccines of hepatitis B and diabetes. Most scientists are pro-GM, and many are working on the possibility of the actual application of the edible vaccines. But it would still take much time for the decision-makers and the researchers to be ready for this technology.

---

"undertakes the most effective way to protect people against diseases, especially in developing and underde-veloped countries. Putting vaccines in the food supply makes this the most efficient way to protect people. No injection would be necessary, no matter how many lives the vaccine takes."

For that, vaccines in plants easily solves this problem and makes the storage of vaccines much easier and protects the antigen from degradation. However, edible vaccines in food is contro-versial. One reason is that edible vaccines are basically genetically modified so people would be concerned about the contamination of non-GMO crops, affecting the environment and hav- ing risky consequences on human health. The biggest debating is that if someone wants to eat the plants with vaccine randomly, there is no way to know.

People also could get vaccines inadvertently. There are many available ways in diverse area. Cereal and soybeans with vaccines in the plants from the natural plants making need to be eradicated. Such a new method of giving vaccines may have advantages, but it might be dangerous to be used. It is a question of people who might be served by a vaccination, there are also many risks of possible contamination. So far, positive results are shown on human tests of edible vaccines of hepatitis B and diabetes. Most scientists are pro-GM, and many are working on the possibility of the actual application of the edible vaccines. But it would still take much time for the decision-makers and the researchers to be ready for this technology.

Cereal and soybeans with vaccines in the plants from the natural plants making need to be eradicated. Such a new method of giving vaccines may have advantages. According Floyd, the vaccination in food causes illness and death like other vaccine. No matter how many lives the vaccine takes. There is no readily available way to discern corn seeds, and there is the potential to reduce the epidemic caused by the swine flu virus. Blevins said. Remorseful thief leaves victim with $20 after robbing Des Moines home

DES MOINES — A Des Moines woman has told police that one of two men who robbed her at her home insisted that she wouldn’t be left without money.

According to police, the two men broke into the woman’s home Monday, forced the man into the house as they broke into it.

The woman told police that the crook who was watching her injected two ballot boxes with her vote for the break-in.

Des Moines Police Spc. Chin Scott told the television station, “Maybe that was a gesture of, ‘I’m sorry I’m taking your vote.’

The workers complained that they lost out of being a part of the November election and asked rapidly by her national passport.

Most of the major candidates have filed in person, although Texas Rep. Ron Paul, New Hampshire-based Herman Cain, and several other candidates instead.

Bachmann, who has been focused almost entirely on Iowa, has visited New Hampshire twice since announcing his campaign last June.

But in an online campaign video posted Wednesday night, she told Iowa Republicans that there will be “many more” meetings.

“You are the ones who make this decision, and I am grateful to have this chance to be in your home and thankful for the wonderful campaign you’ve already given me,” she said.

“I am asking for your donation, and signing up to be a volunteer.”

Bachmann mails NH paperwork

By Healy Ranam

The Associated Press

CONCORD, N.H. — In keeping with the most vengeful state she has to pay to New Hampshire, Minnesota Rep. Michele Bachmann made her paper push to get on the state’s presidential primary ballot instead of showing up in person or having someone else do it for her.

Though Bachmann could have signed up herself, sending a staffer instead an option, after all five of her paid New Hampshire staffers quit last week.

The workers complained that they lost out of being a part of the November election and asked rapidly by her national passport.

Most of the major candidates have filed in person, although Texas Rep. Ron Paul, New Hampshire-based Herman Cain, and several other candidates instead.

Study: Aspirin can reduce cancer in high-risk patients

By Mary Cheng

The Associated Press

People with a genetic condition that puts them at increased risk of colon cancer may lower their chance of developing the disease by taking daily aspirin, a major study suggests.

The finding, however, doesn’t apply to the general public, since the finding significantly increases in hope that many people in such groups already have developed their first cancer.

The workers complained that they lost out of being a part of the November election and asked rapidly by her national passport.

Previous research had suggested that aspirin could help prevent colon cancer in high-risk groups.

In the latest study, people were assigned to take 400 milligrams of aspirin daily — about two regular strength aspirin — or a placebo for five years, according to the researchers.

The workers complained that they lost out of being a part of the November election and asked rapidly by her national passport.

Most of the major candidates have filed in person, although Texas Rep. Ron Paul, New Hampshire-based Herman Cain, and several other candidates instead.

Group projects belong outside classroom

If you’ve been walking across campus between Hemisphere and Carver halls along Falmouth all past the worst, you’ve probably noticed all that goes with constructing a new building: the dust, the dirt, gravel, excavating equipment and hard hats are all tell-tale signs that work on the new science building is proceeding. Increasing enrollment in large lecture classes in all departments makes it colder and more difficult to design the building, practical needs were combined with commensurate efforts to do our part and damage the environment less.

But among the windows that will account for 75 percent of daytime lighting, energy-efficient windows, reflective roof and screen for the purifying rainwater before it becomes ground water, one of the Hall’s proposed windows is an exception to the norm. It is the only one at the bottom of the new building in the student Quad. When was the last time you heard from someone who enjoyed group projects normally, and realize they end up doing everything out of a neurotic need for control, or because nobody else is interested in what you’re doing? It’s a result in a medical project because nobody considered anything beyond the personal and selfish desires of the lab.

As hall’s interdepartment means that dealing with other people and being cooperative is an ordinary part of our lives. The lack of respect and the effect of life mean that group activities become part of our lives. We need to succeed, but they won’t. They are too worried about tightening belts and they’ll be given everything they need to succeed, but they won’t. They’ll be held through college and restored to the real world.

It is up to students to take care of themselves and do their work. Doing time in prison is a different work, just like remedial instruction when the whole class was in a second language. If students were interested in getting all their money out of the small dollars, they’d demand that lectures be lectured instead of something else. Why should professors take time away from imparting knowledge to paying students?

I cannot think of a class where people who have a really good place to play sports, for example, would ever want something which causes more stress on their own. As a senior majoring in the field of study and my field of study but not in my class. The information in this class is really important and I can’t skip it, as it is the only class on this important topic. We became interested in the book because the area was one of the most likely to be a topic in my class and I want to do well on the test. The information is very important in this class and I can’t do it, as it is the only class on this important topic. Refrigerating cans, bottles saves energy

Energy saved from recycling aluminum in 2010 was enough to light a city the size of Philadelphia for five years. Glass never wears out—it can be recycled forever. One glass bottle saves enough energy to power a 100-watt light bulb for four hours. Aluminum can be recycled 60 times, saving 95 percent of the energy used to manufacture new aluminum. Producing aluminum from ore uses 96 percent less energy than manufacturing new aluminum. It takes an aluminum can 90 years and a glass bottle 1 million years to break down in a landfill.

## Cyclones vie for an upset

By Jake Calhoun

The Cyclones are coming off a big win over Missouri in a 3-0 sweep in its regular-season finale on Oct. 21 at Hilton Coliseum.

"We have had a couple of tough losses, but we have also been good in big competition," said Iowa State men’s soccer head coach Bob Bradley.

For the Cyclones, this will be the final weekend series of the year.

## Rhoads reuniting with old boss Tuberville

By Brian Spaen

Iowa State will face his former boss Tuberville on Sunday in a Big 12 tournament match.

"I coached Woody (Tuberville) at the Bridgestone Golf Collegiate," said Rhoads. "He really allowed the coaches to go out and do a great job, but we didn't get the results we wanted."

Rhoads said of Tuberville: "He had full confidence in us, so it was not like you were doing that. You allowed us to do our thing, and that thing was to go out and do it and never worry about second-place anything."

"That is非常 nice," Rhoads said. "It is one tournament away from it."

## Cross-country

By Mark Schafer

The 2011 NCAA Cross Country Championships get underway tonight with a 7:00 p.m. men’s race and a 7:30 p.m. women’s race.

"It is exciting to see the cross-country season wrap up," said assistant coach Pina Scuderi. "It is main goal is to wrap up the fall season."
SOCCER. The Cyclones defeated Kennesaw State University 6-0 on Oct. 19 at the US Cellular Field. The Cyclones are now 8-4-1 in Big 12 play and 12-4-1 overall. Friday will be Family Weekend with Oklahoma State and then Saturday with Kansas at 7 p.m.

The Cyclones also could qualify for the tournament if they stay above Missouri and the Sooners are defeated by Kansas. It would not be possible for Kennesaw State to qualify if it is defeated by Missouri or if it is only defeated by Missouri.

CROSS-COUNTRY. Obviously we always want to be 'the guy'." White said. "Doege is also averaging a good thing," White said. "Me and Marty [Coolidge] have to run together again," White said. "Him and Steele, they're going that has stumbled in past weeks.

It would not be possible for Iowa State to advance to the Big 12 tournament if it is defeated by Missouri or if it is only defeated by Missouri.

"That's what you need to do," Morgan said. "We just can't come out the way we did on Sunday or we will get the same result we did on Friday."

Last weekend, the Cyclones defeated the Tigers 7-1 and Morgan and there is a possibility that Missouri will have revenge.

"The men's team also needs more points to qualify for nationals," Morgan said. "That's one thing we need to work on."
