A federal judge on Wednesday overturned a federal government rule requiring financial institutions to disclose how they handle personal information.

The rule required banks, credit card companies and other financial institutions to inform customers of their data-sharing practices.

The rule was challenged by institutions like the American Bankers Association and the Financial Services Roundtable.

The judge ruled that the rule was not supported by evidence and that the government had not established a compelling reason for implementing it.

President Obama has asked Attorney General Eric Holder to appeal the ruling.

The decision could affect more than 200 million American consumers who have financial accounts.

The judge said in his opinion that the rule would have imposed a heavy burden on financial institutions.

President Barack Obama on Friday was to sign an executive order aimed at closing the gender gap in science and technology fields.

The order will require federal contractors to disclose information on the number of women in senior roles and to describe steps they are taking to improve diversity in their ranks.

Obama said in a statement that the order was a step toward addressing the imbalance of women in fields such as engineering and computer science.

“Women have the talent, skills, the drive and the passion to break barriers and reach new heights in every area of science and technology,” Obama said in a statement.

The order is the latest in a series of steps the administration has taken to increase diversity in science and technology.

The order requires federal contractors to report on the number of women in senior roles and to describe steps they are taking to improve diversity in their ranks.

Obama said the order was a step toward addressing the imbalance of women in fields such as engineering and computer science.

“Women have the talent, skills, the drive and the passion to break barriers and reach new heights in every area of science and technology,” Obama said.

Relay For Life returns to Ames
By Tong Lin
www.iowastatedaily.com
Students should stop by for the annual Relay for Life celebration at Lied Recreation Athletic Center on March 14, 2014. Colleges Against Cancer organizes the event every year.

The theme for this year’s Relay for Life is superheroes. The logo is “saving the world from cancer one lap at a time.”

“We have different theme tags throughout the night that partici- pants can wear,” said Hannah Eckerman, senior in pre-business.

“Some are themed around the cancer that patients have in their names while walking,” said Eckerman.

MU hotel offers unique on-campus experience

By Vanessa Franklin
@iowastatedaily.com

While the Memorial Union is the de facto home of the University Book Store, Gold Star Hall and the Old Gold, it is also home to the Hotel Memorial Union, which has been in existence since the Memorial Union opened in 1928.

"We have a lot of students who work during the week, said Laura Helmus, Hotel Memorial Union's manager. "That's always been the busiest times of the year. We also have a lot of alumni who come back during the spring for reunions or summer weekends.

Helmus said that the hotel’s occupancy rate has increased to 76 percent in the past 10 years. "In Ghana, we have been set, they have decided to continue the growth that the seed industry has been in a positive way and continue the growth that the industry is facing the challenge of economic development to create a vibrant seed industry.

Helmus said that the hotel is the only one with a suite-style room. The University also has a hotel in Iowa Memorial Union, called the Iowa House Hotel.

"The hotel is definitely a resource students can utilize," said Williamson. "It's a great place to go if you just need to study or get away from your current situation for a while.

For more information on booking a room, contact the hotel's front desk at 515-296-6846 or at hotel@iastate.edu.

Creating these types of programs will help to increase the Ghanaian government's and the private sector's capacities for policy making and implementation. By creating such programs, the government can become more self-sufficient.

In essence, the Future Agricultural Policy Support Project aims to help by assisting policy-makers to create and implement programs and policies.

Because Ghana has a good infrastructure, they can focus more on getting the resources and technical training that farmers need to be successful, Beghin said.

Once farmers acquire the resources and training needed, they can become less reliant on imports and more self-sufficient.

According to feedthefuture.gov, agricultural development in Ghana has been the biggest factor in changing that poverty rate in Ghana from 52 percent to 28 percent during the past 10 years. Agricultural supplies half of the jobs in the country.

"You just hope that in the long term that what you develop stays so if you go back five years later, you can see it working well," Beghin said.

Project leaders are hoping the program will affect Ghana’s economy in a positive way and continue for the next 20 years.

"We teach people in government, agricultural sector employees," Beghin said. "We teach people in government, agricultural sector employees, and help the government develop better institutions on agricultural policy, Beghin said.

Implementing seed policies will increase the quality of the seeds, which will help farmers achieve more consistent yields.

Iowa State is working in the private sector to develop private sector investment, said Beghin.

Additionally, Iowa State will have a hand in developing training programs that will help "train the trainers," Beghin said.

Once farmers acquire the resources and training needed, they can become less reliant on imports and more self-sufficient.

Iowa State to help implement agricultural policy in Ghana

By Madeline Gould
@wovastatedaily.com

Iowa State boasts one of the largest seed science centers in the world, and a large portion of that research is being sent to Ghana.

The population is the size of the United States and has a great deal of potential. But the country is one of the poorest in the world.

In order to use the genetics to help the farmers, essential changes have to be made. "You have to have a policy to benefit the farmers," said Beghin.

Essentially, Iowa State will have a hand in developing training programs that will help "train the trainers," Beghin said.

Once farmers acquire the resources and training needed, they can become less reliant on imports and more self-sufficient.

Muslims are frequently, unfairly labeled as extremists

By Seung Won Kim, managing editor of content

There has been much debate recently about the correctness of the term “Chinese New Year.” According to CNN, many students who use the term “Chinese New Year” have been criticized because it is considered offensive to Muslims. The term “Chinese New Year” is incorrect for several reasons.

First and foremost, “Chinese New Year” is not a term that students should use. The term “Chinese New Year” should not be used at all, as it is not accurate. Instead, “Lunar New Year” should be used. This is because the lunar new year is based on the lunar calendar, not the Gregorian calendar. This means that the lunar new year is not fixed and can vary from year to year. Additionally, the lunar new year is celebrated by people of different cultures, not just Chinese culture.

Secondly, the term “Chinese New Year” is not accurate because it is not a term that is used in Chinese culture. The Chinese celebrate their new year based on the lunar calendar, not the Gregorian calendar. This means that the lunar new year is not fixed and can vary from year to year. Additionally, the lunar new year is celebrated by people of different cultures, not just Chinese culture.

Finally, the term “Chinese New Year” is not accurate because it is not a term that is used in Chinese culture. The Chinese celebrate their new year based on the lunar calendar, not the Gregorian calendar. This means that the lunar new year is not fixed and can vary from year to year. Additionally, the lunar new year is celebrated by people of different cultures, not just Chinese culture.

In conclusion, the term “Chinese New Year” is incorrect and should not be used. Instead, “Lunar New Year” should be used. This is because the lunar new year is based on the lunar calendar, not the Gregorian calendar. This means that the lunar new year is not fixed and can vary from year to year. Additionally, the lunar new year is celebrated by people of different cultures, not just Chinese culture.

By Seung Won Kim, managing editor of content

I have recently read the article on the Iowa State Daily, “Chinese New Year: An Asian tradition, so why are some people annoyed by it?” by Maddy Arnold, published on Jan. 13, 2015. I strongly disagree with the author’s stance, especially as an international student from South Korea. I strongly believe that student reporters should use the term “Lunar New Year” instead of “Chinese New Year.”

It is true that the Chinese celebrates the new year, but many active ethnicity during this time. The celebration is a time for family and tradition. However, many people think that the Chinese New Year is only for Chinese. This is not true. Instead, the Chinese New Year is celebrated by people of different cultures, not just Chinese culture. This is because the Chinese New Year is based on the lunar calendar, not the Gregorian calendar. This means that the lunar new year is not fixed and can vary from year to year. Additionally, the lunar new year is celebrated by people of different cultures, not just Chinese culture.

In conclusion, the Chinese New Year is not only for Chinese. Instead, it is a time for family and tradition. The celebration is a time for friends and family to come together and enjoy each other’s company. However, the term “Chinese New Year” is not accurate because it is not a term that is used in Chinese culture. The Chinese celebrate their new year based on the lunar calendar, not the Gregorian calendar. This means that the lunar new year is not fixed and can vary from year to year. Additionally, the lunar new year is celebrated by people of different cultures, not just Chinese culture.

RELAY FOR LIFE

The past year’s (myself)!” said Katelyn McCarty, co-president of College Against Cancer and senior in food science, said she hopes all participants know Relay for Life for being accomplished for helping out a cure bigger than themselves, motivated to continue to help in the fight against cancer and empowered to live a healthy life by taking steps to prevent themselves from cancer.

This year’s Relay for Life focuses on an entire focus on cancer awareness and education. Colleges Against Cancer is incorporating more education throughout the night and is holding a running prevention pledge ceremony.

“We will be encouraging all attendees to sign a pledge to not tan at any tanning booths to help protect themselves from cancer,” McCarty said.

There is a 10 registration fee and each participant is eligible to sign in a drawing to win an iPad Mini. Anyone may join a team or start a new team.

Cash is encouraged to join the event and all proceeds will go to the American Cancer Society. There will be a raffle for a football signed by men’s basketball Fred Hoiberg and 2015 ISU football tickets.

The raffle tickets are $1 for 1 ticket or $5 for 6 tickets and will be drawn at 11 p.m.

Food is also provided all night. Pulled pork sandwiches will be sold from 7 to 10 p.m. for $4.

Signage and more information can be found at: www.relayforlife.org/iowastate.
