Fall Semester 2001

Classwork begins, Monday, August 27
University holiday, offices closed Monday, September 3
Thanksgiving, classes recessed Monday-Friday, November 19-23
University holidays, offices closed Thursday and Friday, November 22 and 23
Classes resume, Monday, November 26, 7 a.m.
Commencement, Friday and Saturday, December 21 and 22
University holidays, offices closed Monday and Tuesday, December 24 and 25

Fall Semester 2002

Classwork begins, Monday, August 26
University holiday, offices closed Monday, September 2
Thanksgiving, classes recessed Monday-Friday, November 25-29
University holidays, offices closed Thursday and Friday, November 28 and 29
Classes resume, Monday, December 2, 7 a.m.
Commencement, Friday and Saturday, December 20 and 21
University holidays, offices closed Tuesday-Wednesday, December 24 and 25

Spring Semester 2002

University holiday, offices closed Tuesday, January 1
Classwork begins, Monday, January 14
University holiday, offices closed Monday, January 21
Spring break, classes recessed Monday-Friday, March 18-22
Classes resume, Monday, March 25, 7 a.m.
Commencement, Friday and Saturday, May 10 and 11

Spring Semester 2003

University holiday, offices closed Wednesday, January 1
Classwork begins, Monday, January 13
University holiday, offices closed Monday, January 20
Spring break, classes recessed Monday-Friday, March 17-21
Classes resume, Monday, March 24, 7 a.m.
Commencement, Friday and Saturday, May 9 and 10

Summer School 2002

Classwork begins, Session I Monday, May 20
University holiday, offices closed Monday, May 27
Classwork begins, Session II Monday, June 17
University holiday, offices closed Thursday, July 4
Commencement, Saturday, August 10

Summer School 2003

Classwork begins, Session I Monday, May 19
University holiday, offices closed Monday, May 26
Classwork begins, Session II Monday, June 16
University holiday, offices closed Friday, July 4
Commencement, Saturday, August 9
The University

Iowa started an education revolution as the first state to accept the 1862 Morrill Act terms. The act allowed Iowa to sell federal land to finance a new college open to all regardless of wealth, race or gender; offering a practical education in agriculture, engineering and military science as well as classical studies; and sharing research knowledge with all Iowans. Iowa State University officially opened in 1869 and was the first coeducational land-grant school. Iowa State’s mission statement reflects our institutional commitment to these founding qualities.

Mission, role and scope statement
(Approved by the Board of Regents, State of Iowa, November 1989)

Iowa State University of Science and Technology is a public land-grant institution serving the people of the nation, and the world through its interrelated programs of instruction, research, extension, and professional service. With an institutional emphasis upon areas related to science and technology, the University carries out its traditional mission of discovering, developing, disseminating, and preserving knowledge.

Iowa State University provides high quality undergraduate programs across a broad range of disciplines, as befits the institution’s stature as a university. In its dedication to excellence in teaching, the University strives to instill in its students the discernment, intellectual curiosity, knowledge and skills essential for their individual development and their useful contribution to society. A common goal of undergraduate education is to assure that all students, regardless of disciplinary major, acquire literacy in science and technology, an understanding of humane and ethical values, an awareness of the intellectual, historical, and artistic foundations of our culture, and a sensitivity to other cultures and to international concerns. Consonant with its role as a teaching and research institution, Iowa State University has a strong commitment to graduate education that, at both the master’s and doctoral levels, emphasizes the development of professional, research, and scholarship skills.

As an integral part of the learning process, Iowa State University fosters the discovery and dissemination of new knowledge by supporting research, scholarship, and creative activity. The University also uses existing knowledge to address problems and issues of concern to the state of Iowa in particular, as well as to the national and global community. The University’s research and scholarly endeavors are supported by public and private resources and are conducted in an environment of open scientific inquiry and academic freedom. Extension, professional service, and continuing education activities are conducted through innovative and effective outreach programs that provide the people of Iowa, and beyond, with practical knowledge and information derived from leading instructional and research efforts at Iowa State University and elsewhere. Through its outreach programs, the University stimulates and encourages progressive change.

Iowa State University enrolls academically qualified students who represent diverse age groups, socio-economic levels, racial ancestries, ethnic heritages, and international cultures, and who provide a gender balance. Through the use of a variety of educational opportunities, advanced instructional technologies, and student services, the University supports the development of both traditional and non-traditional students, preparing them for citizenship and life-long learning in a rapidly changing world.

Finally, Iowa State University participates in international efforts to alleviate world hunger and poverty, to prepare students and faculty to be productive and responsible citizens of the world, and to contribute to increased cultural, educational, economic, scientific, and socio-political interchange and understanding between and among Iowans and other members of the world community.

Role Statement
The role of Iowa State University is defined by the institution’s status as a land-grant university and by its relationship to the other institutions of higher education within Iowa.

- Iowa State University must strive to develop and maintain instruction, research, extension, and professional service programs that fulfill the responsibilities of a major land-grant institution.

- Iowa State University shares with the other public institutions of higher education within Iowa the joint responsibility of providing a full range of high quality educational opportunities. Coordination among these institutions with respect to programs, clientele, and geographic areas is necessary to ensure that the priority needs of all Iowans are addressed and to avoid unnecessary duplication.

- Iowa State University of Science and Technology, a public land-grant institution, Iowa State University has an institutional emphasis upon areas related to science and technology.

- Iowa State University contributes to the economic development of the state of Iowa by attracting public and private organizations seeking proximity to leading authorities in particular fields, by participating in technology transfer, and by assisting efforts to strengthen and diversify the economic base of Iowa.

- Iowa State University assumes responsibility for helping to protect, maintain and improve Iowa’s natural resources through the discovery and diffusion of knowledge and technology.

Scope Statement
Consistent with the university’s role and mission statements, the current scope of Iowa State University is described below.

- Iowa State University of Science and Technology, a broad-based university with an orientation towards science and technology, has sufficient scope and depth in its instruction, research, and extension and professional service functions to enable it to continue to be a distinguished land-grant university. In addition to its undergraduate and graduate work in the physical, biological, mathematical, and social sciences, it will maintain and develop strong undergraduate programs in the arts and humanities, and will offer such master’s and Ph.D. programs in this area as are justified to meet the needs of the state of Iowa and to maintain the overall strength and desirable balance of the university as a whole.

- In Iowa State University’s professional programs, principal emphasis will be given to the maintenance and development of strong programs in the sciences, agriculture, engineering, veterinary medicine, design, education, business, and family and consumer sciences. Interdisciplinary programs are offered that seek to combine the perspectives and methods of more than one discipline to better address the questions and problems confronting Iowa, the nation, and the world. The international efforts of Iowa State University are to be expanded and enhanced.

- Future programs will be determined by the continuing assessment of existing programs and of developing needs. Programs will be curtailed or eliminated when the assessment of need and resources dictates that the resources could be better used for other programs. The university approaches the addition of new programs with considerable caution. Generally, new programs are fashioned out of existing programs in response to developing needs. But if the university is to remain vital, it must be prepared and able to develop, at appropriate times, new programs that are within its general mission and that meet the changing needs of the students and society.
Iowa State’s values

As Iowa State University works toward creating an environment where continual learning serves the promises of a better world, all members of the university community are called upon to act in harmony with our core values.

- Land-grant values of:
  - access to education and success
  - learning, encompassing practical and liberal education
  - discovery, encompassing basic and applied research
  - engagement, encompassing service and outreach
- excellence
- quest for knowledge
- shared leadership
- integrity
- commitment
- collaboration
- mutual respect
- inclusiveness
- global perspective

Non-discrimination and affirmative action policy

Iowa State University is committed to developing and implementing a program of nondiscrimination and affirmative action, a responsibility the university accepts willingly because it is the right and just thing to do. Because an educational institution exposes the youth of Iowa and of the nation to a multitude of ideas that strongly influence their future development, it is an area of our society where removing barriers is critical. ISU insists on promoting the concept of inclusion and participation.

This commitment is part of a larger commitment to developing a safe and supportive climate for all members of the ISU community in classrooms and laboratories, in offices, in the residence hall system, and throughout the campus. Iowa State University recognizes that a non-discriminatory environment complements a commitment to academic inquiry and intellectual and personal growth.

The goal is to provide a non-discriminatory work environment, a non-discriminatory living and learning environment and a non-discriminatory environment for visitors to the campus. Iowa State University herein recommits itself to comply with all federal and state laws, regulations, and orders, including the policies of the Iowa Board of Regents, which pertain to nondiscrimination and affirmative action. All administrators and personnel providing input into administrative decisions are directed to ensure that all decisions relative to employment, conditions of employment and access to programs and services will be made without regard to race, color, age, religion, national origin, sex, sexual orientation, sex, marital status, disability, or status as a U.S. Vietnam Era Veteran.

Exceptions to this directive may be made in matters involving bona fide occupational qualifications, business necessity, actions designed to eliminate workplace underutilization, and/or where this policy conflicts with federal and state laws, rules, regulations, or orders. Iowa State University does not and will not tolerate unlawful discrimination. Iowa State will recruit, hire, train and promote persons without regard to race, color, religion, sex, national origin, age, disability, veteran status, marital status, or sexual orientation. Iowa State University will base employment decisions so as to further the principle of equal employment opportunity and diversity.

No otherwise qualified person will be denied access to, or participation in, any program, activity, service, or the use of facilities on the basis of factors previously enumerated. Reasonable accommodation will be made to facilitate the participation of persons with disabilities in all such activities consistent with applicable federal and state laws, orders and policies.

Further, all supervisory personnel will be responsible for maintaining an environment that is free of racial, ethnic or sexual abuse and harassment. The University has adopted policies and procedures on Racial and Ethnic Harassment and Sexual Harassment. Copies of these policies and procedures may be obtained from the Affirmative Action Office, at the address listed below. Acts by anyone that adversely affect another person’s employment, conditions of employment, academic standing, receipt of services, and/or participation in, or enjoyment of, any other activity, will be regarded as a violation of university policy and thereby be subject to appropriate disciplinary action. Retaliation against persons filing complaints, for bringing the violation of this policy forward for review, or for assisting in a review, pursuant to a filed complaint or grievance, is prohibited.

Iowa State University’s commitment to nondiscrimination and affirmative action is of the highest priority and is to be adhered to as such. It applies to all university-sponsored programs and activities as well as those that are conducted in cooperation with the university.

Iowa State University has designated Carla Espinoza as the affirmative action officer and assigns overall program responsibility to her as the Director of Affirmative Action. Questions regarding complaints and/or compliance with affirmative action or equal opportunity should be directed to:

Iowa State’s points of pride

- The first electronic digital computer was designed by Iowa State math and physics professor John Vincent Atanasoff and graduate student Clifford Berry. Their invention, the ABC computer, built in the late 1930s, has been called the most important technological innovation of the 20th century, and is an excellent example of the ongoing spirit of innovation and advancement at Iowa State. Today the Iowa State community benefits from that innovation through Project Vincent, a computing system that provides students with powerful software for class work and research, e-mail access, space for their own Web pages and a speedy on-ramp to the Internet.

- More than 16,000 workstations on campus are networked with access to Internett and vBNS, fast new connections that allow work with complex computer models and links to supercomputers throughout the nation. Excellent computing facilities and Internet services to students have landed Iowa State on Yahoo! Internet Life magazine’s “100 Most Wired Colleges” list.

- The university is a leader in virtual reality research and its C6 is the first six-sided virtual reality theater in the United States, designed to completely immerse the user in images and sound. The C6 provides students and companies a world-class facility for research and product development. It is housed in the College of Engineering’s new Howe Hall, the first building of the Engineering and Teaching Research Complex to be completed.

- As evidence of the university’s reputation for excellence, Iowa State is one of only 62 major research universities in the United States and Canada named to the prestigious Association of American Universities.

- Iowa State consistently ranks in the top four percent of the private and public institutions enrolling National Merit Scholars.

- At Iowa State, more than 500 student-run organizations and academic clubs offer between 7,000 and 8,000 student leadership positions, allowing students to exercise and develop all of their skills and interests.

- Our nationally and internationally renowned professors teach classes for both majors and non-majors, extending students’ opportunities to study with leaders in a variety of disciplines.

- Every state and more than 100 foreign countries are represented in the student body, exposing students to ideas from other cultures both in and out of the classroom.

- Our nearly 2,000 acre, park-like campus includes 161 buildings, many of which are included on the National Register of Historic Places. The campus is rated one of the 25 most beautiful in the nation and is one of only three university campuses in the nation to be named a 1999 Centennial “Medallion Site” by the American Association of Landscape Architects.
ISU graduates include George Washington Carver, an internationally respected plant scientist; Darleane Hoffman, a 1997 National Medal of Science winner, who discovered the new element 106 - seaborgium; David Nicholas, whose process to more efficiently convert text into digital information resulted in facsimile machines becoming an office staple around the world; Carrie Chapman Catt, who helped women win the right to vote and start the League of Women Voters; and Randy Dvorak, who designed Comiskey Park, home of the Chicago White Sox. Our alumni also include CEO’s of Fortune 500 companies, Pulitzer Prize winning journalists, and elected government officials both in the United States and abroad.

Iowa State’s history

Iowa State is one of the nation’s oldest and most respected land-grant universities. Created by the Iowa General Assembly in 1858, the Iowa Agricultural College and Model Farm was designated the nation’s first land-grant college when Iowa became the first state to accept terms of the federal Morrill Act in 1864.

The school, which was the first land-grant institution to be co-educational from the beginning, opened its doors in the fall of 1868. A class of 26 was graduated at the first commencement in 1872. Graduate study was offered almost as soon as classes began, and the first graduate degree was conferred in 1877. Experimentation and research also started early in agriculture, home economics, engineering, science, and veterinary medicine.

As Iowa State adapted the land-grant philosophy to the changing needs of the 20th century, it adopted special teaching responsibilities in science and technology, an extension education program throughout the state, and extensive research interests to advance the frontiers of learning. Since 1958, it has been known as Iowa State University of Science and Technology.

Strategic Plan - to become the best.

Strategic Plan - to become the best land-grant institution in the nation.

The aspiration to become the nation’s best land-grant university was set forth in the strategic plans that have guided Iowa State University since 1990, and Iowa State’s new plan for 2000-2005 continues this commitment. In addition, Iowa State’s new strategic plan reflects the expectations of the Board of Regents, State of Iowa, Strategic Plan and its four key result areas of quality, access, diversity, and accountability.

The Engaged University

In order to become the nation’s best land-grant university, Iowa State embraces the concept of engagement as defined by the Kellogg Commission on the Future of State and Land-Grant Universities. Engagement is an evolution and a transformation of traditional outreach. It is two-way outreach; an institution reaching out to provide programs and services to constituents, resulting in a greater connectedness between public universities and the larger society they serve. Intrinsic to engagement is the creation of partnerships with government, business, and the nonprofit world. These partnerships are defined by mutual respect for what each partner brings to the table in addressing the issues that confront us. This definition of engagement encompasses all aspects of our mission—academic and research programs, as well as extension and other outreach programs and services.

Goal 1: Learning - enhance learning through exceptional learner-centered teaching, services, and enrichment opportunities.

Iowa State believes that learning is at the heart of our university. It occurs in many contexts and by all members of the community. As a land-grant institution, Iowa State University is among the world leaders in providing post-secondary access. However, access to success through Iowa State University will mark our commitment to enhancing learning, and it will be accomplished by providing exceptional learner-centered teaching, services, and enrichment opportunities; and by paying attention to lifelong learning needs.

Goal 2: Discovery - Promote discovery and innovation characterized by preeminent scholarship, including increasingly interdisciplinary and collaborative activities.

Iowa State believes that discovery and innovation is characterized by preeminent scholarship encompassing research, creative activities, teaching/learning, and extension/professional practice, will mark our commitment to discovery, thereby enhancing our national and international distinction. Institutional agility and interdisciplinary collaboration will allow Iowa State to undertake bold visionary initiatives with special attention to ethics and social, economic, and environmental responsibility.

Goal 3: Engagement: Engage with key constituencies through synergistic sharing and partnership of knowledge and expertise to address needs of communities and society.

Iowa’s engaged land-grant university, Iowa State will synergistically devote its knowledge and expertise toward increased responsiveness and productive involvement in improving Iowa’s communities and the larger society, at home and abroad. This will be marked by our commitment to sharing- to enrich and to learn, two-way partnerships with internal and external constituencies to achieve shared goals and to demonstrate the public purposes of Iowa State University.
The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Des Moines.

Assistant Registrars: Robert Bosanac M.A.; Judy Minnick, B.L.S.
Systems Support Specialist: Clare Smith-Larson, B.A.
Communications Coordinator: Charlene Hulsebus, B.S.

Admission
When to Apply
Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted six to nine months in advance of the desired entry date.

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See Index, College of Veterinary Medicine, Application and Admission.

How to Apply
Applications for admission may be obtained by writing the Office of Admissions, Alumni Hall, Iowa State University, Ames, Iowa 50011-2010; by calling 515-294-5836 or 800-262-3810; or by e-mail to admissions@iastate.edu. Applicants should describe their educational backgrounds and indicate the area in which they plan to study. An application form and detailed information concerning admission will then be sent by the Office of Admissions. Applications are also available on the Web at www.iastate.edu/~adm_info.

Applicants seeking admission for the fall semester may be notified of the action taken on their applications as early as the September preceding enrollment, upon receipt of all application materials. Applicants for other terms will be notified approximately two to three weeks after receipt of all materials. Admission offers are issued for a specific term and are valid only for the term specified.

Visits to the Campus
Visitors to Iowa State University are always welcome!

The Office of Admissions, located in Alumni Hall, is open Monday through Friday from 8 a.m. until 5 p.m., and most Saturday mornings from 9 a.m. until noon. Counselors are available to speak with prospective students and their families about admission, financial aid, housing, student life, and academic programs and opportunities.

Student-guided walking tours of the campus are offered weekdays at 10 a.m. and 2 p.m., and most Saturdays at 10 a.m. Prospective students and parents are encouraged to visit the campus and the Office of Admissions. Arrangements for a campus visit or registration for a special open house program called “Experience Iowa State” can be made electronically at www.iastate.edu/~adm_info/visit or by calling the Office of Admissions at 515-294-5836 or 800-262-3810.

Admissions policies are established by the Faculty Senate. Admission decisions are made by the admissions officers in accordance with these policies.

Undergraduate Admission into Degree Programs Directly from High School

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission, together with a $20 application fee ($50 for international students), and have their secondary school provide an official transcript of their academic record, including credits and grades, rank in class, and certification of graduation.

Applicants must also arrange to have their scores from either the ACT Assessment (ACT) or the Scholastic Assessment Test (SAT I) reported to Iowa State directly from the testing agency. The Test of English as a Foreign Language (TOEFL) is also required of applicants whose first language is not English, if their scores on the ACT or SAT are not adequate to place them into freshman composition courses at Iowa State. Applicants may be required to submit additional information or data to support their applications.

a. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who rank in the upper half of their graduating class will be admitted. Students who do not rank in the upper half of their graduating class may be admitted to the university if they achieve the following combination of high school rank and ACT or SAT I scores:

<table>
<thead>
<tr>
<th>High School Rank</th>
<th>ACT composite score</th>
<th>SAT I combined score</th>
</tr>
</thead>
<tbody>
<tr>
<td>(99% is high)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>49-47%</td>
<td>20</td>
<td>930</td>
</tr>
<tr>
<td>46-45%</td>
<td>21</td>
<td>970</td>
</tr>
<tr>
<td>44-42%</td>
<td>22</td>
<td>1010</td>
</tr>
<tr>
<td>41-39%</td>
<td>23</td>
<td>1050</td>
</tr>
<tr>
<td>38% or below</td>
<td>24</td>
<td>1090</td>
</tr>
</tbody>
</table>

Those who do not meet these requirements but who have a high school rank of 20% or above may be given the opportunity to enroll for a trial period during a preceding summer session to establish their qualifications for fall admission. Those who have a high school rank below 20% (and an ACT below 24) will be denied admission.

b. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

c. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

d. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

e. Students with superior academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

f. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.
Undergraduate Admission into Degree Programs by Transfer from Other Educational Institutions

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application form for admission, together with a $20 application fee ($50 for international students), and request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable credit will be completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT I scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

The Test of English as a Foreign Language (TOEFL) is required of students whose first language is not English.

a. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point average required by Iowa State for specific programs, will be admitted. A 2.00 grade point average (on a 4.00 grading scale) is the minimum transfer grade point average requirement. Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

b. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

c. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

d. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

Transfer Credit Practices

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO, is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

a. Students from regionally accredited colleges and universities. Credit earned at regionally accredited colleges and universities is acceptable for transfer, except that credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature, or credit in courses or programs in which the institution granting the credit is not directly involved, may not be accepted, or may be accepted to a limited extent.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State.

b. Students from colleges and universities which have candidate status.

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is acceptable to the bachelor’s degree at Iowa State University.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State.

c. Students from colleges and universities not regionally accredited.

When students are admitted from colleges and universities not regionally accredited, they may validate portions or all of their transfer credit by satisfactory academic study at Iowa State, or by examination. The amount of transfer credit and the terms of the validation process will be specified at the time of admission.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

d. Students from foreign colleges and universities.

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.
Additional Transfer Credit Policies

a. Students with credit obtained during military service.
Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication A Guide to the Evaluation of Educational Experiences in the Armed Services.

b. Students with credit obtained through correspondence courses.
Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication The National Guide to Educational Credit for Training Programs.

c. Students with credit obtained through correspondence courses.
Although Iowa State does not offer correspondence courses, college-level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

d. College Level Examination Program (CLEP).
Iowa State University will award credit for each of three CLEP general examinations (social sciences and history, humanities, and natural sciences) for test scores at or above the 60th percentile on national norms. Iowa State University will also award credit for each of nine subject examinations, for test scores at or above the 50th percentile on national norms. American government, introductory psychology, principles of accounting, general biology, calculus with elementary functions, introductory sociology, macroeconomics, microeconomics, and trigonometry.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations.

e. Students with “test-out” credit.
Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State’s requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

f. Articulation/Transfer Agreements.
1. Iowa Regent Universities General Education Articulation Agreement.
Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State’s College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements).

2. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.
Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester (90 quarter) credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of the college (with the possible exception of the foreign language and library requirements).

3. Vocational-technical credit from Iowa public community colleges.
Iowa State University will accept up to 16 semester (24 quarter) credits earned in vocational-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain vocational-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The hours earned in these articulated courses would transfer in addition to the 16 semester hour vocational-technical maximum. Please refer to the course equivalency guides on the Web (www.iastate.edu) or contact the Office of Admissions for more information.

4. AP and CLEP credit from Iowa public colleges and universities.
Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree students in the College of Liberal Arts and Sciences, and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as degree-seeking students. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

Reentering Students
Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. The reentry process for students who left Iowa State in good academic standing is described in the Iowa State University Bulletin, Courses and Programs. (International students need to reapply after an absence of one full semester, exclusive of summer session.) See Index, “Reentry” for more information.

Reentering graduate students do not need to complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University.

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and grade point average considerations.

Residency
Classification of Residents and Nonresidents for Admission, Tuition, and Fee Purposes

These criteria are contained in the Iowa Administrative Code: Board of Regents.

General
A. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

B. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as...
a resident of Iowa for such purposes as voting, or holding an Iowa driver’s license, and not meet the residency requirements as established by the Board of Regents for admission, tuition, and fee purposes.

C. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student. A student may be required to file any or all of the following:

1. A statement from the student describing employment and expected source of support
2. A statement from the student’s employer
3. A statement from the student’s parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years
4. Supporting statements from persons who might be familiar with the family situation
5. Iowa state income tax return.

D. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

E. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

F. Review committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the Board of Regents, State of Iowa.

Guidelines

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

A. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

B. In deciding why a person is in the state of Iowa, the person’s domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

C. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is re-established. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and re-establishes an Iowa domicile.

A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

1. Has not acquired domicile in another state;
2. Has maintained a continuous voting record in Iowa; and
3. Has filed regular Iowa resident income tax returns during absence from the state.

D. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

E. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

F. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the student is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the student is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

G. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States, who enrolls as a student at a university governed by the Board of Regents, State of Iowa, may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

1. Comes directly to the state of Iowa from a refugee facility or port of debarkation, or
2. Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

H. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

Facts

A. The following circumstances, although not necessarily conclusive, have probable value in support of a claim for resident classification:

1. Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
2. Reliance upon Iowa resources for financial support.
3. Domicile in Iowa of persons legally responsible for the student.
4. Former domicile in the state and maintenance of significant connections therein while absent.
5. Acceptance of an offer of permanent employment in Iowa.
6. Other facts indicating the student’s domicile will be considered by the universities in classifying the student.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:

1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver’s license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.
Summer Orientation

The summer orientation program consists of one-and-a-half-day sessions scheduled in June. Each spring, new students and their parents or spouses are asked to select a convenient time from among a number of orientation sessions that are scheduled during June. In addition to preparing their class schedules for fall semester, new students with their parents or spouses participate in guided tours of the university, attend informational meetings about policies and procedures at the university, and meet formally and informally with faculty, staff, and other new students and their families. These meetings, held in a comfortable, informative atmosphere, lessen existing anxieties, assist each person in the development of a clearer understanding of the challenge of the university environment, and make it possible for new students—with support from their parents or spouses—to begin to make the academic and social decisions that are faced by all students at the university.

Cyclone Aides, Iowa State undergraduate students with widely varying backgrounds and interests, help acquaint new students and their families with the university. Housing and meals are provided in campus residence halls at a nominal cost. Cyclone Aides live in the residence halls with the new students and are available at all times for informal discussion.

Registration/Enrollment

In order to register for classes students must first accept the offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls. For more information, see Index, Registration.

Enrollment Status

Enrollment status is defined for certification purposes as either full-time or half-time.

Full-time status is defined as follows:
Undergraduates: 12 credits for fall or spring semester; Graduates: 9 credits for fall or spring semester.
Half-time status is defined as follows:
Undergraduates: 6 credits for fall or spring semester; Graduates: 5 credits for fall or spring semester.

Summer status depends on the number of weeks a student is enrolled. Always contact the Office of the Registrar to verify a student’s status for a summer session.

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of CBE Programs

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP).

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Correspondence concerning the Advanced Placement Program should be addressed to the College Board Advanced Placement Examinations, P.O. Box 9775-15, Princeton, New Jersey 08541, or visit their Web site at www.collegeboard.org/ap/students/index.html.

International Baccalaureate Examinations

The International Baccalaureate Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments, require a minimum score of 5.

Correspondence concerning the International Baccalaureate Program should be addressed to International Baccalaureate, North America, 200 Madison Avenue, Suite 2301, New York, New York 10016, or visit their Web site at www.ibo.org.

Departmental Examinations

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested. If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing student’s grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements.

A list of the most frequently requested exams and the date(s) and time(s) they are administered each semester is published in each semester’s Schedule of Classes. Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program

The following information pertains to CLEP credit earned before July 1, 2001. Beginning July 1, 2001 CLEP will be available on computer only. At time of printing, information about the new computer version is not available. Therefore, for information about CLEP credit earned after June 30, 2001, see the URL www.iastate.edu, Index, Credit by Examination. Updated information will be posted as it occurs.

Iowa State University will award up to six semester credit hours in each of three general CLEP tests (Social Sciences and History, Humanities, and Natural Sciences) if the test score places the student at or above the 60th percentile on national norms. Iowa State University does not accept the general CLEP tests in either mathematics or English. In addition, the College of Engineering does not allow credit earned from CLEP general tests to be used in their students’ degree programs.

Subject CLEP tests accepted at Iowa State University include American Government (Pol S 215); Introductory Accounting (Acct 284 and 285). engineering majors should consult with their academic adviser before registering for this examination); General Biology (Biol 109, not for biology or engineering majors); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Macroeconomics (Econ 102); Microeconomics (Econ 101);Trigonometry (Math 141); and Calculus with Elementary Functions (Math 165). Students must score at or above the 50th percentile on national norms to qualify for credit.
A nonrefundable fee is charged for each CLEP test requested and all requests must be made one week prior to the test date in order to guarantee that a test booklet is available. CLEP tests are administered by the Student Counseling Service Testing Office Monday through Friday at 8 a.m. and 10 a.m. For information on whether to take any of the CLEP tests, contact the department that offers the course. To obtain information on any of the CLEP tests, contact the Testing Office, 2030 Student Services Building, Iowa State University, Ames, Iowa 50011. To print a copy of the Institutional CLEP registration form see the URL www.iastate.edu, Index, Testing (Student Counseling Service). Then click on the link, “CLEP Testing.”

Policies and Procedures Governing CBE Tests

1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a re-test may be taken upon approval of the department in which the course is offered.

4. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

5. There is a nonrefundable fee for all departmental and CLEP tests. The fee is set by the Board of Regents and is subject to change.

6. Examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should check the Schedule of Classes, or contact the department that offers the class.

7. Credit for the CLEP general examinations is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow CLEP general credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisors to determine whether such credit is to their benefit.

8. Listed below are policies for transferring CBE from another college or university to Iowa State University:

   a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State’s AP and CLEP policies.

   b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State’s IB policies.

   c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.

9. Credit earned from CBE will be posted to the student’s academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

10. Some professional programs do not accept T credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.

11. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Office of New Student Programs

Director: Elizabeth Kurt, B.S.

Orientation

The purpose of orientation is to help new undergraduate students make a smooth transition to Iowa State University. At orientation, students plan their academic programs, take tests to ensure placement in appropriate courses, register for classes, learn about university policies and procedures, and prepare for their personal and social adjustment to the university. The University Orientation Committee, composed of Iowa State University students, faculty, and staff, is responsible for the orientation programs; the undergraduate colleges of the university, in cooperation with the Office of New Student Programs, have responsibility for the implementation of orientation programs for new students and their families.

The Orientation Committee conducts an extensive orientation program during the summer, with additional programs held prior to each term. Special orientation sessions are conducted for transfer students during the spring. Special orientation programs are also held for older-than-average students, international students, and graduate students. New students receive a written invitation to attend an orientation program before their first semester at the university. Parents or spouses are encouraged to accompany students.

New Student Days

The New Student Days program is held on the Thursday, Friday, and Saturday before classes begin fall semester. The program helps new students develop academic, computer, and social strategies to ensure a successful transition to Iowa State University.

WelcomeFest

WelcomeFest activities are scheduled during the first week of fall semester to welcome students to campus. All students, including transfer students, are invited to participate in WelcomeFest.
**Extended and Continuing Education**

**Off-Campus Credit Courses and Programs**

Iowa State University remains true to the land-grant tradition of extending knowledge far beyond campus borders. Annually thousands of students enroll in ISU courses without setting foot in Ames. In addition to the traditional method of Iowa State University instructors traveling to classrooms off campus, technology has provided new ways for Iowa State University faculty to reach out to students. Iowa State University offers distance education courses over the Iowa Communications Network (ICN), by videotape and on the World Wide Web.

Courses are the same as those offered on campus, carry residential credit, and are taught by ISU faculty members. Credit earned in off-campus courses becomes a part of your academic record at Iowa State University and may be used to meet degree requirements in the same manner as credit earned on campus.

ISU Extended and Continuing Education personnel provide leadership and support to faculty in their efforts to identify the needs of Iowans and to reach and satisfy adult learners who wish to earn college credit without attending classes on campus. The Extended and Continuing Education staff also helps off-campus students access student services and information at Iowa State.

For a list of currently available courses or to request specific courses and programs, see www.lifelearner.iastate.edu, or contact Extended and Continuing Education in Ames (515) 294-6222 or (800) 262-0015.

Also, the following ISU Extension offices can provide additional information:

- ISU Outreach Center in Cedar Rapids
  (319) 398-1272
- ISU Outreach Center in Ottumwa
  (515) 682-8324
- ISU Industry Outreach Center in Cedar Falls
  (319) 266-3260
- ISU Outreach Center in Urbandale
  (515) 727-0656
- ISU Outreach Center in Mason City
  (641) 424-5432
- ISU Outreach Center in Sioux City
  (712) 274-0048
- Southwest Area Outreach in Lewis
  (712) 769-2600

Some off-campus credit courses are offered to serve the special interests or needs of a particular group. Often courses are offered to fulfill certification or degree program objectives. Following are descriptions of the off-campus programs currently offered from Iowa State University:

**College of Agriculture**

The faculty of the College of Agriculture offers one bachelor’s and three master’s degrees off-campus. For information on any of the programs, e-mail proaginfo@iastate.edu or call (515) 294-1438 or (800) 747-4478.

**Bachelor of Science in Professional Agriculture**

In Iowa via the Iowa Communications Network; U.S. and Canada via videotape and the World Wide Web

Students who have completed or are in the process of completing foundation college courses, and want an agriculture degree, can tailor their program in professional agriculture based on their interests and goals. First delivered off-campus in 1991, the program provides a high-quality, flexible curriculum. The degree program appeals to a diverse group of students, including those who left college years ago without a degree to those who need new knowledge to use on-the-job or for career enhancement.

The course of study encompasses three major areas: animal ecology and sciences, agricultural social sciences and economics, and plant and soil sciences. The agricultural course work, a minimum of 45 credits, is a well-rounded mix of topics. All 15 departments in the College of Agriculture participate in the degree program. Students take a portion of their course work, particularly non-agriculture courses, from colleges in close proximity to their home and transfer the credits to ISU.

**Master of Agriculture**

In Iowa via the Iowa Communications Network; U.S. and Canada via videotape and the World Wide Web

The Master of Agriculture prepares students for a proactive role in addressing and responding to personal, professional, and societal issues and challenges in a changing agriculture and food system. The intent of the program is to enable agriculturists to grow and develop as professionals, positioning them for emerging opportunities within or outside their current employment. Individuals enroll in the Master of Agriculture program for a variety of reasons, which include career advancement, teacher certification renewal, professional development, or personal interests.

The core 13 credits of the program consists of a set of courses and workshops that emphasize leadership development, technological change, use of statistics, economic issues, and sustainability issues. The remaining 14 credits, are selected in consultation with a graduate committee to meet the student’s needs and interests. The program capstone is a creative component of four credits that lets students explore a particular interest area. The creative component is a demonstration of independent creativity with a written report of laboratory, field, or library research. The non-thesis off-campus program began in 1979.

**Master of Science in Agronomy**

U.S. and Canada via the World Wide Web and CD-ROM

Iowa State’s first computer-based degree program, the professional Master of Science in Agronomy, debuted in 1998. The degree program emphasizes practical, professional and technical skills involved in crop management, soil and water management, and integrated pest management. Most of the program is accessed remotely, however, the orientation session, a summer workshop and a creative component seminar require travel to the Ames campus.

The curriculum consists of 12 courses plus a one-credit workshop and a three-credit creative component, for a total of 30 credits. The course prerequisites for admission to the program are limited to fundamental agriculture courses, recognizing that many potential students in the degree program will not have majored in agronomy as undergraduates. Generally, students who have completed a degree from a College of Agriculture will meet the requirements.

**Master of Science in Microbiology**

U.S. and Canada via videotape and the World Wide Web

The Department of Microbiology offers the non-thesis master program in microbiology. The program is designed primarily for working professionals who do not intend to continue work towards a doctor of philosophy. The program is 30 credits, not including research, and includes five credits of creative component. At least 25 credits must be in didactic courses.

**College of Business**

A Master of Business Administration is offered in Des Moines as part of ISU’s initiative in the capital city.

**Master of Business Administration**

On-site evenings in Des Moines

The Des Moines MBA program debuted fall semester 1999. Currently, classes meet twice per week from 5:45-9:15 p.m. For information, e-mail busgrad@iastate.edu or call (515) 294-8188 or (877) ISU-4MBA.

**College of Education**

The College of Education endeavors to identify needs of educators across the state and provide suitable courses and programs to satisfy those needs.

**Certificate of Advanced Studies Superintendent Certification**

In Iowa via the Iowa Communications Network

A post master’s curriculum of 30 credit hours provides training for the school superintendent license. The program stresses administrative and leadership skills, including knowledge of child and adolescent development, the educa-
The Teaching and Learning for Community College (TL2C2) is for mid-career faculty who have a passion for providing teaching and learning leadership. TL2C2 helps community college faculty maximize their own effectiveness as educators, as well as the students’ potential for learning. This is a 30 credit-hour graduate program that leads to a master’s degree in higher education with an emphasis in community colleges, or applies up to 30 credit-hours towards a Ph.D. in the Educational Leadership and Policy Studies Department.

The program features an integrated curriculum, offering exposure to the vast variety of related subject matter simultaneously. This is a unique opportunity to learn teaching and leadership skills to move from an instructional paradigm to the learning paradigm; from providing instruction to students to facilitating “learning in learners”, to discover and teach the many ways in which learning can be stimulated in every student; and to implement learning environments that address multiple learning styles and needs. For information, call (515) 294-1241 or (800) 262-0015.

College of Engineering

The College of Engineering at Iowa State University, in cooperation with the University of Iowa and local industries, offers two off-campus Master of Science programs. Each program totals 30 graduate credits; a thesis or non-thesis option may be selected. The thesis option is recommended for those who intend to continue toward the doctor of philosophy degree or a career in research and development. The non-thesis Master of Science degree requires a creative component. A typical schedule might include one class per semester, allowing students to finish the entire graduate program in five years.

Master of Science in Computer Engineering

The distance education program is built around the role and function of learning, change, and performance management in effective organizations.

Develop the skills and knowledge to design, manage, and evaluate organizational learning and human resource development provides the knowledge and skills for leadership roles in public and private organizations. The program focuses on the role and function of learning, change, and performance management in effective organizations.

The Teaching and Learning for Community Colleges (TL2C2) is for mid-career faculty who have a passion for providing teaching and learning leadership. TL2C2 helps community college faculty maximize their own effectiveness as educators, as well as the students’ potential for learning. This is a 30 credit-hour graduate program that leads to a master’s degree in higher education with an emphasis in community colleges, or applies up to 30 credit-hours towards a Ph.D. in the Educational Leadership and Policy Studies Department.

The program features an integrated curriculum, offering exposure to the vast variety of related subject matter simultaneously. This is a unique opportunity to learn teaching and leadership skills to move from an instructional paradigm to the learning paradigm; from providing instruction to students to facilitating “learning in learners”, to discover and teach the many ways in which learning can be stimulated in every student; and to implement learning environments that address multiple learning styles and needs. For information, call (515) 294-1241 or (800) 262-0015.

College of Engineering

As one of the first universities in the nation to offer videotaped credit courses for practicing engineers, Iowa State University has 28 years of experience working with off-campus students. For information about the five degree programs offered off-campus, call (515) 294-7470 or (800) 854-1675.

Bachelor of Science in Electrical Engineering

The College of Engineering and local community colleges can develop a distance education program for an undergraduate degree in electrical engineering. Students may transfer up to 65 hours of basic work to ISU from a community college. In some cases, credit from four-year colleges or other universities may also be transferred. Classes are scheduled in the early morning and late afternoon hours to fit around work schedules.

The distance education program is built around a cycle of courses that begins each summer. Many students are able to finish five courses a year (one in the summer and two each in the fall and spring) and complete the degree program in four calendar years. The bachelor’s degree requires a total of 126.5 semester credits.

Master of Engineering in Systems Engineering

A professional degree, the Master of Engineering in Systems Engineering, is designed to enable engineers, regardless of undergraduate discipline, to develop the analytical abilities needed to design, evaluate and build complex systems involving many components and demanding specifications. The program supports work across disciplinary boundaries and provides opportunities to develop management capabilities needed in today’s work environment.

The College of Engineering developed this broad-based degree program in 1995 for engineers employed in a wide variety of industries.
Financial Counselor Certification
U.S. and Canada via the World Wide Web

New fall 2000, the Financial Counselor Certification is a joint effort between Iowa State University’s Financial Counseling Clinic and ISU Extension to provide high quality educational training for financial counselors. The certification program provides skills and training to individuals who work with families in making financial decisions. The program is based on a solution-focused approach that provides training in three primary areas: personal/family finance, credit, and counseling. The four-course program is available online and consists of five total college credits. For information, call (515) 294-8044 or (800) 262-0015.

Master of Family and Consumer Sciences
In Iowa via the Iowa Communications Network

Delivered off-campus since 1994, the non-thesis Master of Family and Consumer Sciences is designed for working professionals to enhance skills in their current position and increase their chances for promotion. The comprehensive degree requires a minimum of 18-21 credits in two or more of the College of Family and Consumer Sciences departments:

- Family and Consumer Sciences Education and Studies
- Food Science and Human Nutrition
- Hotel, Restaurant, and Institution Management
- Human Development and Family Studies
- Textiles and Clothing

At least six credits must be earned in each of the selected departments. In addition, credits are required in research methods and statistics. With electives, the degree program totals 36 credits. For information, email mfcsinfo@iastate.edu or call (515) 294-5982 or (800) 262-0015.

College of Liberal Arts and Sciences
The political science and mathematics departments offer graduate-level programs off-campus. The Bachelor of Liberal Studies degree combines courses from the entire college and can cross over into other colleges at Iowa State.

Bachelor of Liberal Studies
On-site at Des Moines Area Community College (DMACC), Ankeny and via the World Wide Web

The Bachelor of Liberal Studies (BLS) is a general studies degree in the liberal arts. It offers the opportunity to earn a degree with the flexibility to choose courses based on a student’s interest and goals. Instead of a traditional major, students select course work from three of the following five distribution areas: humanities, communications and arts, natural sciences and mathematical disciplines, social sciences, and professional fields.

The BLS degree is offered with similar requirements by all three Iowa regent universities, and provides a framework to assemble all the educational opportunities available locally into a coherent four-year educational program. Up to three-fourths of the total degree requirements can be transferred from accredited institutions. Credits can be earned by proficiency or test-out examinations. Admission to the BLS program is granted after students complete an associate in arts or associate in science degree from an accredited two-year college or complete at least 62 semester credits acceptable toward graduation at ISU with a grade-point average of at least 2.0. The BLS degree program totals 124 semester credits. For information, call (515) 294-4831 or (800) 262-0015.

Certificate of Public Management
In Iowa via the Iowa Communications Network and on-site in Des Moines

Designed for active public administrators who wish to pursue a quality program within a reasonable time frame, the certificate program improves or refreshes skills while on the job. The 15-credit graduate study program includes at least nine credits from core and methods courses. The remaining six credits are selected from a list of electives.

To enter the certificate program, applicants must be accepted into the Master of Public Administration (MPA) degree program. All courses taken towards the certificate may be applied to the MPA without further admissions requirements. For information, call (515) 294-3764 or (800) 262-0015.

Master of Public Administration
On-site in Des Moines

Students prepare for a career in the public sector or for further graduate work in political science and related areas with the Master of Public Administration. The degree is designed to improve the level of performance of public managers and administrators in government and not-for-profit organizations. Students become skilled at conducting research and preparing thorough research summaries. Graduates can identify and address complex political questions, taking into account related ethical, legal, economics, and social issues.

The program, totaling 37 credits, includes core and methods courses central to both the theory and practice of public management, a concentration area for specialization, and a creative component. Students select from these concentration areas: public management; public policy analysis; and public budgeting and finance. For information, call (515) 294-3764 or (800) 262-0015.

Master of School Mathematics
In Iowa via the Iowa Communications Network

The Master of School Mathematics (MSM) program is designed for current secondary mathematics teachers. The degree program is built on three themes:

- enhancement of knowledge of geometry, calculus, and discrete mathematics
- importance of problem solving in learning and teaching mathematics
- use of computing technology in learning and teaching mathematics

The course work includes geometry, topics in discrete optimization, intermediate calculus, a seminar on current literature in mathematics education, a statistics course, electives, and a creative component, totaling 36 semester credits. The creative component may be taken during a summer, with most of the actual research and writing done during the preceding year. For information, e-mail: msm@math.iastate.edu or call (515) 294-8169 or (800) 262-0015.

Continuing Education Units
Extended and Continuing Education awards Continuing Education Units (CEUs) for short courses, workshops, and other educational activities sponsored by Iowa State University which do not carry academic credit. A given activity may award CEUs to some participants and academic credit to others, under the following policies:

1. The activity must be administered through Iowa State University Extended and Continuing Education.
2. The dual arrangement must have received prior approval by the department head or chair, upon recommendation of the course instructor and the department curriculum committee.
3. Participants may enroll for either CEUs or for credit, but not for both.
4. Credit enrollees must meet the same academic standards they would have to meet if the course did not also award CEUs to some participants.
5. Assignments for credit enrollees must be clearly articulated. Substantial sequential learning experiences and careful evaluation of outcomes are required for academic course credit; these standards will not be reduced to accommodate the participation of CEU learners. Whenever graduate credit is offered, course prerequisites will be enforced and not routinely waived.

Once CEUs have been awarded, no participant may change his or her enrollment to academic credit. Standard university policies for determining fees will be applied to all participants, depending on the status of their enrollment. Participants must be informed ahead of time that once CEUs have been awarded to them, Iowa State cannot and will not convert them to academic credit. Further, a student can switch from CEU to credit during an offering only at the discretion of the course instructor.
All fees, tuition, and expenses listed in this publication are effective as of summer session 2001 and are subject to change without notice. For the most complete information see www.iastate.edu/~registrar/fees

A registration fee is charged to all students of the university. A full registration fee covers most laboratory fees, use of the library, membership in the Memorial Union, and a number of student activities. In certain courses involving special expenses, an additional fee may be charged. These fees are indicated in the course description of the specific courses involved.

Students who are not residents of Iowa pay an additional tuition fee each semester. This tuition fee is assessed in accordance with regulations of the Board of Regents, State of Iowa which are found in this bulletin under Admissions and Registrar.

Fee Payment

The Receivables Office bills students for tuition, room and board, and various other university charges. A statement of charges will be mailed on the first of each month to students at their in-session or interim address. It is the university charges. A statement of charges will be mailed on the first of each month to students at their in-session or interim address. It is the student’s responsibility to ensure the Office of the Receivables Office to learn the amount of their account balance due. Failure to receive a billing statement will not exempt students from late penalties or from having a hold placed on their registration.

If payment of the minimum due is not made by the deadline printed on the billing statement, all fees become due immediately. A one-percent finance charge will be assessed on the total amount due at that time, and a “hold” will be placed on the student’s registration until payment of the total amount due has been made.

If a student’s registration has been canceled for nonpayment of fees, he or she may be reinstated with written permission from their college.

Deferred Payment

Students who do not pay their first payment in full by the due date will automatically select the deferred option, and will be charged a $15 administrative fee. Deferred billing is not an option for the summer term.

University fees are payable in three installments for fall and spring semesters. Payments for fall semester will be due August 20, September 20, and October 20. All fees are due in full on June 20. Payments for spring semester will be due January 20, February 20, and March 20. If any of the payment dates fall on a holiday, Saturday or Sunday, the payment is due the next day the university is open for business.

Twelve-Month Payment Plan

Under the Twelve-Month Payment Plan, students pay the academic costs for fall and spring semesters in 12 installments beginning April 20 and ending the following March 20. A $40 enrollment fee is due with the first monthly payment. All payments are deducted from the student’s designated bank account. For more information about the Twelve-Month Payment Plan, contact the Receivables Office.

Past Due Accounts

Students with past due accounts receivable charges prior to the beginning of classes will be dropped from enrollment if these past due accounts are not paid before the first day of classes.

Saturday MBA, Des Moines MBA, and MED classes will be assessed at the graduate rate in the current fee schedule plus a $62 per credit supplemental tuition fee. Fees for students enrolled for less than a full course load are given below in the Fee Schedule Per Credit. There is a minimum 2-credit fee for most students. Audits and zero credit courses are assessed on contact hours and there is a maximum charge for zero credit courses of 3 credit hours. R credits are assessed for the minimum fee only if no other credits are taken. The continuous registration fee for graduate students is $70. If the total number of credits includes .5 credit, such as 6.5, fees are assessed on the next larger whole number of credits. Therefore 6.5 credit hours would be assessed as 7 credit hours.

Summer session fees are charged per credit as indicated in the fee schedule.

Tuition assessment for study abroad credits, up to a maximum of 12 credits, is above and beyond tuition for other courses taken during the same term.

*Resident rate charged for 4 credits or less for Fall, Spring, and Summer Semesters
Fees

Following are the descriptions of several commonly assessed fees for Iowa State University students. The list is not inclusive.

Activity: All students will be charged a $28 activity fee per fall and spring semester, $14 per summer semester, except for students exclusively registered for the following: extended education courses; courses for which no tuition is assessed; continuous registration status courses; and high school students enrolled under the PostSecondary Enrollment Options Act. Students who are exempt from the activity fee may elect to pay the fee, which allows them to pay student admission rates to concerts, lectures, debates, and athletic events.

For students who withdraw or change to an exempt status as defined above, the tuition adjustment schedule will also be used for the activity fee.

Application: A fee of $20 must accompany the application for admission and is nonrefundable. The application fee for international students is $50. This fee does not apply to special students or workshop applicants.

Camp: A special tuition rate is assessed to students participating in camp programs. The undergraduate assessment is $520 and the graduate rate is $824. Summer camp programs entitled to the special rate are Anthropology and Geology. Students will be charged other fees in addition to tuition for enrolling in these programs. To obtain total fee information, students should contact the director of the individual program.

Change of Schedule: Starting the sixth day of classes a $5 fee is charged for course drops, additions, and section changes. One fee is assessed for multiple changes processed at the same time for the same term.

Computer: All students will be charged a computer fee each semester. Full-time students enrolled in the College of Engineering (including Biomedical Engineering and Systems Engineering) are charged $183 per semester. Full-time students in the Department of Computer Sciences or undergraduates in the major of Management Information Systems are charged $146 per semester. All other full-time undergraduate students are charged the standard computer fee of $72 per semester. Full-time graduate students are charged a $58 per semester computer fee. Students enrolled less than full-time are assessed prorated computer fees according to the number of credits for which they are enrolled. For students who withdraw, the adjustment schedule for tuition will also be used for computer fees. Students enrolled exclusively in any one of the following categories will not be assessed computer fees: Ag travel program; courses for which no tuition is assessed; extended education courses; foreign group study programs; continuous registration status courses; and high school students enrolled under the Postsecondary Enrollment Options Act. Students who withdraw or change to an exempt status as defined above, the refund schedule for tuition will be used for the health facility fee. These exceptions do not apply to international students (except where noted) or graduate students on “C Base” assistantships.

Health Facility: All students are charged $8 Health Facility Fee each semester except for students exclusively registered for the following: extended education courses; courses for which no tuition is assessed; continuous registration status courses; and high school students enrolled under the Postsecondary Enrollment Options Act. For students who withdraw or change to an exempt status as defined above, the refund schedule for tuition will be used for the health facility fee. These exceptions do not apply to international students (except where noted) or graduate students on “C Base” assistantships.

Health Fee (Student Health): A $55 student health fee, which partially finances the services of the Student Health Center, is charged to all students each semester. This fee is not assessed to students enrolled for four credits or less or students exclusively registered for the following: extended education courses; courses for which no tuition is assessed; foreign group study programs; continuous registration status courses; weekend MBA courses; Lakeside Laboratory courses; practicum programs; summer camps. The credit adjustment schedule for reduction from a full load to light classification is 100 percent through the third week, with no refunds after the third week.

Students who change their major will be charged the full computer fee for the major into which they transfer if the change occurs before the end of the third week. If the change occurs after the third week, then no change in the computer fee assessment will occur.

Developmental Mathematics: Students enrolled in Math 10-30 courses will be charged $260. This is a separate fee which is charged in addition to other fees and tuition. Students will be charged the developmental math fee each term they are enrolled in a Math 10-30 course.

Extended and Continuing Education: Undergraduate students pay $130 per credit with a maximum charge of $1,558; graduate students pay $206 per credit, with a maximum of $1,851, and students enrolled in MBA, MPA, M.Ed courses pay $268 per credit with a maximum of $2,409.

Graduation Fee: Undergraduate and graduate students are charged a $15 graduation fee the term they receive their degree.

Health Facility: All students are charged an $8 Health Facility Fee each semester except for students exclusively registered for the following: extended education courses; courses for which no tuition is assessed; continuous registration status courses; and high school students enrolled under the Postsecondary Enrollment Options Act. For students who withdraw or change to an exempt status as defined above, the refund schedule for tuition will be used for the health facility fee. These exceptions do not apply to international students (except where noted) or graduate students on “C Base” assistantships.

Health Fee (Student Health): A $55 student health fee, which partially finances the services of the Student Health Center, is charged to all students each semester. This fee is not assessed to students enrolled for four credits or less or students exclusively registered for the following: extended education courses; courses for which no tuition is assessed; foreign group study programs; continuous registration status courses; and high school students enrolled under the Postsecondary Enrollment Options Act. For students who withdraw or change to an exempt status as defined above, the refund schedule for tuition will be used for the health facility fee. These exceptions do not apply to international students (except where noted) or graduate students on “C Base” assistantships.
after the third week. Students who add courses at any time during the semester will be assessed the student health fee if applicable according to the guidelines stated above.

Students who carry the ISU sponsored insurance must also be assessed the student health fee. If spouse or domestic partner is covered under the insurance plan, the spouse (domestic partner) must also be covered under the Health Plus Plan.

Health Insurance: All international students and their accompanying dependents must enroll in the ISU Student and Scholar Health Insurance Program. ISU requires nonimmigrant international students and their dependents to purchase and maintain coverage through the ISU health insurance plan for the duration of their tenure at the university. Insurance plans purchased outside the university may be used for supplemental coverage, but cannot be substituted for the ISU plan. Students not assessed the mandatory Student Health Fee and spouses of students are eligible to participate in the Health Plus Plan. Contact the Student Health Insurance Office at 515-294-2394 for more information.

Late Fee Payment: If payment of the minimum due is not made by the deadline printed on the billing statement, all fees become due immediately. A one-percent finance charge will be assessed on the total amount due at that time. These students will also have a hold placed on their registration until payment of the total amount due has been made.

Late Registration: Students who do not complete their registration before the first day of classes are charged a late registration fee of $20. Graduate students who do not complete their registration before the first day of classes are charged a late registration fee of $20 during the first week of classes, $50 the second week of classes, and $100 the third week of classes or anytime later.

New Student Programs/Matriculation: A non-refundable fee of $105 is assessed to all new degree-seeking undergraduates (including new direct from high school and new transfer students) who are admitted for summer or fall semesters. This fee is charged to all new students except nondegree seeking students, veterinary medicine students, graduate students, and students enrolled in only off-campus courses.

Senior: A $2 fee covers the cost of special senior activities. This fee is optional and is assessed spring term only.

Sponsored International Student: Agencies and foreign governments which require special administrative and fiscal reporting services of ISU will be assessed an administration fee. The fee for 2001-2003 will be 5 percent of the total tuition charge billed the sponsor. In succeeding years, the fee may be raised after 90 days advance notice to the sponsoring agency.

Study Abroad: Tuition assessment for study abroad credits, up to a maximum of 12 credits, is above and beyond tuition for other courses taken during the same term.

Transcript: Students may obtain an official transcript of their student academic record for $6. An additional $2 service charge for each transcript is assessed if same day service is requested.

Workshops: The fee for one-credit workshops, with no other course enrollments, is $130 for undergraduate students and $206 for graduate students. The two-credit minimum charge does not apply to workshops.

Other Fees
Additional copies of Bulletin $5
Diploma Replacement $10
Duplicate Registration Materials $2
Identification Card Replacement $15
Returned Check Charge $20
Thesis
  Masters $50
  Ph.D. $100

Refunds
Withdrawal Registration and Refund Schedule: To cancel their registration students must notify the Office of the Registrar before the first day of classes to avoid tuition assessment. Beginning on the first day of classes, it will be necessary for students to formally withdraw from the university to terminate their registration. Tuition adjustments for all students are made for withdrawals of registration according to the following schedule:

<table>
<thead>
<tr>
<th>Student Pays</th>
<th>Before first day of classes</th>
<th>During class days 1-8</th>
<th>During class days 9-20</th>
<th>During class days 21-40</th>
<th>After the fortieth day of classes</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0%</td>
<td>10%</td>
<td>50%</td>
<td>75%</td>
<td>100%</td>
</tr>
</tbody>
</table>

Students who wish to appeal tuition and fee assessment for withdrawals should contact the fees section of the Office of the Registrar. Decisions of the Office of the Registrar will be based on the existence of extenuating circumstances beyond the control of the student.

Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

Fee refund for students who drop into light classification (less than full-time): 100 percent if change is made during first three weeks.

No adjustment is made after the third week.

Appropriate prorated adjustments in the refund schedule are made when partial term courses are involved.

Workshop and Short Courses Refunds: Students who drop workshops or short courses of one or two weeks on or before the first class meeting receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes.

Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day of classes, a 90% adjustment if they drop on the second day of classes, and no adjustment after the second day of classes.
**Student Financial Aid**

**Director:** Earl E. Dowling  
**Associate Director:** Roberta Johnson  
**Assistant Director:** Deborah Burdick  
**Assistant Director:** Ann Wessman  
**Advisers:** Clay Gurganus, John Lueth, Ted Maakestad, Linda Younger

**Program Coordinator, Assessment and Data Analysis:** Julia Sullivan

The Office of Student Financial Aid staff helps families afford Iowa State University. Grants, scholarships, loans, and part-time employment opportunities are available in various combinations to pay the difference between the amount the student and his or her parents can reasonably be expected to provide and the cost of attending Iowa State University.

All state and federal aid programs are subject to review by their respective governing agencies and may be changed without notice.

Eligibility for many forms of financial aid is determined by the Free Application for Federal Student Aid (FAFSA). These applications are available from high schools or online at www.fafsa.ed.gov by November of each year. Students should submit the FAFSA by mid-February prior to the fall term of enrollment, in order to receive priority consideration. A new application must be completed each academic year. Applications must be received no later than March 1. Applications received after March 1 will be awarded as funds are available. New students enrolling spring semester or summer session should complete the current year’s aid application to apply for any available financial aid. To be eligible for financial aid, a student must be a U.S. citizen or permanent resident, enrolled on at least a half-time basis, and making satisfactory academic progress toward a degree. If signed copies of the student’s and parents’ income tax returns are requested, they should be sent directly to the Office of Student Financial Aid.

Students may use their financial aid for study in other countries if they have clearance from the Office of Student Financial Aid, Beardshear Hall.

Financial aid programs generally consist of three types: gift aid (scholarships and grants), loans, and part-time employment. Laws, regulations, and policies governing these programs are subject to change.

**I. Gift Aid**

**A. Scholarships**

1. **ISU Scholarship/Grants.** These awards are based on financial aid eligibility as determined by the FAFSA. A student must complete the FAFSA to be considered. Many of these awards are based on academic or special talent in addition to financial eligibility.

2. **Entering freshmen** can obtain information on the Web at www.iastate.edu/~fin_aid_info.

3. **College and Departmental Scholarships.** Students are encouraged to contact the scholarship chair in their department or college. Scholarships based on academic achievement and/or financial need are available in most areas of study, but students may need to complete separate applications to be considered.

4. **Military Officer Education (ROTC) Scholarships:**

   - **Army:** The Military Science Department offers 4-, 3-, and 2-year Army ROTC scholarships to qualified students on a competitive basis in virtually any academic discipline. These scholarships provide payment of tuition, all required fees (except student health), books and supplies allowance, and a monthly cash subsistence allowance. For applications or additional information, contact the Military Science Department at 132 Armory or call 515-294-1872.

   - **Navy:** The Naval Science Department offers several scholarship programs to qualified students. The scholarships cover payment of tuition, fees, books, and $200 a month. Information is available from the Naval Science Department, 3 Arromy, or by calling 515-294-6050 or 515-294-0328.

   - **Air Force:** The Air Force Aerospace Studies Department offers Air Force ROTC scholarships covering two or three years of college to qualified students. The scholarships provide payment of tuition, book fees, laboratory fees, and $200 a month. Express scholarships are also available to students qualified in certain technical academic majors. Details on scholarship qualification, application procedures, and eligibility are available from the Department of Air Force Aerospace Studies, 515-294-1716.

5. **Other Scholarship Sources:** Students are encouraged to pursue funds from agencies and private organizations on campus and in their hometowns. An excellent resource is the Financial Aid Web site: www.iastate.edu/~fin_aid_info.

**B. Grants**

1. **Federal Pell Grant.** The maximum annual award under this program is $3,300. All undergraduate applicants for financial aid must apply for the Federal Pell Grant by completing the FAFSA. These forms are available from high school counselors, the Office of Student Financial Aid, or online at www.iastate.edu/~fin_aid_info.

2. **Federal Supplemental Educational Opportunity Grant.** An eligible undergraduate student may be awarded a grant of $100 to $4,000 on the basis of financial need. A student must complete the FAFSA in order to be considered.

3. **Iowa Grant.** Iowa residents demonstrating financial need may be eligible for a $1,000 Iowa Grant. Students must complete the FAFSA to be considered.

4. **Officer Education (ROTC) Financial Assistance Grants.** All students enrolled in Advanced ROTC (third and fourth years) in the Army, Navy, and Air Force programs are provided an allowance of $200 per month for up to 10 months per year. The Navy program also includes a 4-year program which provides $200 per month for up to 10 months per year. For further information, contact the appropriate ROTC department in the Armory.

5. **Tuition Assistance Grant for Undergraduate Foreign Students.** Undergraduate foreign students who are faced with financial hardship resulting from unforeseen circumstances may apply for this grant. The maximum award is $700 per academic year. Apply to the Office of International Students and Scholars, 4 Hamilton Hall.

6. **International Student Financial Aid.** International students may contribute a small voluntary fee to this fund. These monies will be used to assist international students who have unforeseen financial emergencies. For further information, contact the Office of International Education Services, 4 Hamilton Hall.

**II. Loans**

**A. Federal Perkins Loan.** An eligible undergraduate student may borrow up to $4,000 per year, depending on financial need and the availability of funds. A maximum total of $40,000 may be borrowed for undergraduate and graduate programs combined. Interest of 5 percent on the unpaid balance begins with repayment of the loan principal 9 months after ceasing at least half-time enrollment. A student must complete the FAFSA in order to be considered for a Federal Perkins loan.
B. University Long-Term Loans (ULTL). Private donors contribute the funds for these loans, which are awarded on the basis of need to undergraduate and graduate students. The interest rate of 5 percent begins with repayment of principal 6 months after ceasing at least half-time enrollment. Defeather provisions are available in some instances. A student must complete the FAFSA in order to be considered.

C. Federal Health Professions Loans and Scholarships. These programs are limited to those students accepted for enrollment in the College of Veterinary Medicine. The loan funds have a 5 percent interest rate. Defeather and cancellation provisions are available in some instances. The FAFSA is required, and parental information must be provided, regardless of age or dependency of the student.

D. University Emergency Loans. The Emergency Loan Program is intended to meet students’ unplanned and unexpected education-related expenses. (These loans are not available to students who are enrolled only in off-campus courses.) Applicants must demonstrate that they have a verifiable means by which to repay their loans by the due date. Interest on emergency loans will begin on the date the loan is processed in the Treasurer’s Office and is computed at the simple monthly rate of .75 percent of the unpaid balance (an annual percentage rate of 9 percent). Emergency loan applications can be obtained at the Office of Student Financial Aid, Room 12, Beardshear Hall. Students should allow 48 hours for processing the emergency loan application.

E. William D. Ford Federal Direct Loans. Several types of Federal Direct loans are available to students.

1. The Federal Direct Subsidized Stafford Loan and the Federal Direct Unsubsidized Stafford Loan are low-interest loans made by the government to help pay for education after high school. Subsidized Direct Stafford loans will have all interest charges paid by the federal government while the student is enrolled in school on at least a half-time basis. The interest on the unsubsidized Direct Stafford loan will be the responsibility of the student and can be paid while the student is in school or added to the outstanding loan balance for payment after graduation.

Students must complete a FAFSA form to be considered for either loan. Students are eligible to borrow up to the amount of their financial need in the subsidized loan. The student may then choose to borrow any remaining amount, up to the federal maximum, in an unsubsidized Direct Stafford loan. Freshmen students may borrow a combined total through either program of up to $2,625 per year. Sophomore students may borrow up to $3,500 per year, and junior and senior students may be eligible for up to $4,000 per year, with a $23,000 undergraduate maximum for all years combined. Graduate students may be eligible for up to $18,500 per year, with a $63,500 maximum, including all undergraduate loans.

For new borrowers, the interest rate is a variable rate which is tied to the 91-day treasury bill plus 1.7 percent. The interest rate is adjusted annually and is capped at 8.25 percent. Repayment does not begin until six months after graduation. Students are strongly advised to counsel with a financial aid adviser as increased loan indebtedness occurs.

2. Federal Direct Unsubsidized Stafford Loan for Independent Students. To be eligible, a student must be either an independent undergraduate student or a graduate/professional student. Completion of a FAFSA form is required. Eligible freshman and sophomore students may borrow up to $4,000 per year. Eligible juniors and seniors may borrow up to $5,000 per year, with a cumulative undergraduate maximum of $23,000. Graduate/professional students may be eligible to borrow up to $10,000 per year, with a cumulative total of $73,000.

Eligible independent students who borrow through both the subsidized and the unsubsidized Federal Direct Stafford Loan programs and are freshmen can borrow up to a total of $6,625 per year. Independent sophomores can borrow up to $7,500 per year, and independent juniors or seniors, $10,500 per year. Cumulative borrowing for undergraduate years could reach a total of $46,000.

Eligible graduate students can borrow up to $18,500 per year between the subsidized and the unsubsidized programs. Total indebtedness for a graduate student borrowing through both programs may not exceed $135,500. This amount includes undergraduate debt in these two programs.

All students are strongly advised to discuss their loan indebtedness with a financial aid adviser before combining several types of loans.

3. Federal Direct PLUS Loan. The interest rate for Federal Direct Parent Loans for Undergraduate Students (PLUS) is tied to the 91-day treasury bill rate plus 1.7 percent, with maximum interest being 9 percent. Through the Federal Direct PLUS program, parents may borrow the entire cost of education, less the amount of any financial aid the student is receiving. There is no limit on loan indebtedness, although a credit analysis will be conducted before funds can be disbursed.

F. Alternative Loans. Private financial institutions provide these loan funds, which are approved on the basis of a credit analysis. Amounts, interest rates, and repayment terms will vary, depending upon the financial institution selected. Interest will begin to accumulate immediately, although forbearance of the interest and principal can be made until after graduation. Some programs will require the student to obtain a credit-worthy cosigner. A FAFSA form is not required to apply for this loan.

III. Part-time Employment

A variety of employment opportunities are available for students to earn a portion of their educational expenses.

A. Federal Cooperative Education Program. This program combines classroom learning with paid work experience designed to develop students into the federal government’s future professionals and managers. The federal government seeks highly motivated, flexible, and creative students to fill co-op assignments across the country in laboratories, offices, forests, parks, hospitals, and in ocean and space programs in a wide variety of occupational fields. There are two different types of work schedules: alternate periods of work and study (full-time student and full-time worker the next) or part-time (parallel periods of work and study). Students interested in the Federal Cooperative Education Program can contact the director of ISU Career Planning and Placement Services by calling 515-294-9490.

B. Internship Programs. Most college departments offer internship programs to enhance the student’s education and career preparation by integrating classroom theory with on-the-job performance. These programs enable students to test career and professional goals; develop confidence, maturity, and work-related skills; and establish professional contacts and interests. Contact the respective department for specific program information.

C. Work-Study Programs. Both federal and state funds subsidize need-based programs that permit students to be employed on campus or off campus in nonprofit agencies. A portion of the student’s total earnings is paid by federal or state funds, and the remainder is paid by the employing department. Students apply for Work-Study by completing a FAFSA by the priority deadline, and indicating that they wish to work. Part-time job listings are available at the following URL: www.iastate.edu/~fin_aid_info/employment

D. University Student Employment. University employment is available to all students who are U.S. citizens or to those international students who have obtained a work permit. Wages are paid 100 percent by the employing department. Many students who live in university residence halls apply for work in the residence hall food service to help meet the cost of room and board. Students interested in food service employment may apply directly to the assistant director of residence in charge of food service, Residence Department, Friley Hall, Iowa State University, Ames, Iowa 50012. Part-time job listings are available at the following URL: www.iastate.edu/~fin_aid_info/employment

E. Off-Campus Employment. The off-campus employment program seeks part-time employment opportunities for students who would like to work while they are in school. Restaurants, hotels, service stations, and retail stores are examples of local employers that offer part-time work schedules: alternate periods of work and study (full-time student and full-time worker the next) or part-time (parallel periods of work and study). (full-time student and full-time worker the next) or part-time (parallel periods of work and study). Students interested in the Federal Cooperative Education Program can contact the director of ISU Career Planning and Placement Services by calling 515-294-9490.

IV. Other Financial Aid

Many other forms of financial aid are available to students who qualify, including Vocational Rehabilitation, Veterans Benefits, and Department of Human Services programs. For further information on these programs, contact the appropriate government office.
Student Housing

Director: Randy Alexander, M.S.

Associate Directors: Virginia Arthur, Ph.D. (Residence Life); Gary Schwartz, M.A. (Residence Operations)

Assistant Directors: James Judy (Facilities Planning); Doug Gruenewald, Ph.D. (Academic Services); Gregory Lee, (Business Operations)

The university provides residence hall housing facilities for approximately 3,000 single undergraduate women and 4,000 single undergraduate men. In addition, more than 1,000 apartments are available on campus for families and for single students.

Each newly admitted student to the university will receive a housing application form following his/her admission. The student’s name will be placed on a list for room assignment according to the date on which the completed application and application fee are received in the Department of Residence Administrative Office. Admission to the university is necessary before a housing application will be accepted.

Address correspondence concerning residence halls or single student apartments to the Administrative Office, Department of Residence, 1215 Friley Hall, Iowa State University, Ames, Iowa 50012. For information regarding family apartments, contact the Director of University Family Housing, 100 University Village, Ames, Iowa 50010; e-mail: halls@iastate.edu or apartments@iastate.edu, or phone toll free: (800) 854-9050. Additional information may be obtained via www.public.iastate.edu/~residence_info/.

Undergraduate Residence Halls

Most of the rooms in residence halls are planned for double occupancy, however, some rooms accommodate three persons. In addition, a limited number of private rooms are available. All rooms are furnished with single beds, innerspring mattresses, chests of drawers, individual study desks, chairs, telephones, and cable television connections. An Ethernet connection is available for a fee. Students provide their own bed linens, throw rugs, blankets, pillows, towels, and study lamps (except in Maple, Willow and Larch Halls, where study lamps are furnished). Students are responsible for maintaining the cleanliness and order of their own rooms.

Housing options include (1) room provided for academic year, excluding academic breaks; (2) room provided for academic year including breaks; and (3) room provided for full calendar year including breaks (Union Drive-Friley only).

Cafeteria-style food service is provided for all residents in the halls. Students living off-campus may also purchase a residence hall meal plan by visiting the Administrative Office at 1215 Friley Hall. Meal plan options include the following:

20 meals per week (three meals per day, except Sunday evening meal)
15 meals per week (three meals per day, Monday-Friday)
14 meals per week (any two meals per day, Monday-Sunday)
10 meals per week (any two meals per day, Monday-Friday)

A single student who resides in an undergraduate residence hall must sign a contract for room and board for the academic year or the remainder thereof if contract is signed after fall semester begins. All charges are subject to change. The rate for the academic year 2000-01 was $4,378 for a double occupancy room and full meal plan.

Students may move out of the residence halls at any time during the academic year upon payment of room and board for the term of occupancy plus forfeiture of the prepayment and a charge of 8 percent of the remainder of the contract if the student remains enrolled. For additional information concerning the residence hall contract, students should contact the administrative office (1215 Friley Hall) before making the final decision.

In addition to the basic necessities, several special facilities are available for use by residents. These include house dens for informal get-togethers and relaxation, student government-purchased TVs, newspapers, magazines, lounge areas for meeting and entertaining guests, vending areas for snacks, hall desks with fax and copy machines, entertainment and recreational equipment, mail delivery and check-in and check-out location within the residence halls, indoor and outdoor recreation areas and intramural equipment owned by student government, fitness centers, coin-operated laundry facilities in each hall, special study areas in each complex, private dining rooms for specially-prepared house and organization dinners, meeting rooms and offices for student organizations, music listening and practice rooms, computer labs and parking lots assigned to the residence halls.

The residence halls are organized geographically into three autonomous student associations: The Towers Residence Association (TRA), the Richardson Court Association (RCA), and the Union Drive Association (UDA). The students in each of these coeducational associations elect a group of executive officers to be responsible for coordinating association events and activities. Each association funds and maintains a social program, an intramural program, and numerous committees that supplement the total social educational development of the individual residents. The three associations also are joined in an Inter-Residence Hall Association (IRHA) with an all-residence hall parliament; they jointly sponsor the KURE FM stereo radio station, Residence Hall Week, weekly movies, scholarships, leadership conferences, and more.

Each association is further organized into smaller living groups called houses. These houses of 55 to 75 members are the foundation of Iowa State University’s residence hall program. Members of the houses elect their own officers, and the majority of all programs are planned on a house participation basis. The individual’s educational experience is augmented by active participation in the total house program.

Students who choose to do so may live in a coed house. These houses have male and female students living at opposite ends of the house. They have separate bathroom facilities, but share lounge facilities and house activities.

A variety of special interest housing options is available within the residence halls. Special interest housing includes coed houses, quiet houses, nine- and 12-month continuous occupancy houses, a cross-cultural house, alcohol-free houses, and smoke-free houses. Learning communities, which bring together students who have similar academic goals, are also available in the residence halls.

These communities offer a collaborative living and learning environment, increased student-faculty interaction, social and academic networks essential to student success, and a sense of membership in the ISU community. Currently, the following learning communities are available: ACES (Agriculture Community Encourages Success); ABE (Agricultural and Biosystems Engineering); Animal Ecology; BEST (Biology Education Success Team); Business; Casa Hispanica; CCLC (Cross-Cultural Learning Community); Computer Engineering; Design Exchange; Honors; HDFS (Human Development and Family Studies); IMSE (Industrial Manufacturing Systems Engineering); LEAD (Leadership Through Engineering Diversity); MLC (Multicultural Learning Community); and WISE (Women in Science and Engineering). New learning communities are being developed. For an updated listing of special interest housing, please contact the Department of Residence, 1215 Friley Hall, Ames, Iowa 50012, or call (800) 854-9050. For the most up to date information on learning community opportunities at Iowa State, see www.iastate.edu/learncommunity/ on the Web.
Undergraduate and Graduate Single Student Apartments

Hawthorn Court is a new and yet-expanding development at Iowa State, providing on-campus apartments to single students aged 20 and above, including graduate and upper-class undergraduate students. The apartments, which are brand new, include such amenities as central air-conditioning, living room and bedroom furniture, microwave, dishwasher and garbage disposal, as well as a washer and dryer in each apartment. The Hawthorn Court Community Center, which is scheduled to open soon, will aid in creating a community atmosphere in which students can learn and interact while enjoying the independence that comes with apartment life.

The apartments, which are available in two- and four-bedroom layouts, accommodate four persons of the same gender. Rent for Spring 2000 was $1,530 per semester for a two-bedroom and $1,665 per semester for a four-bedroom. Rent includes electricity, water, garbage pickup, basic phone service, basic extended cable, and Ethernet, and rent is conveniently paid as part of the resident’s university bill.

University Family Housing

The university provides 760 apartments in University Village and Schilletter Village. As of December 1, 2000, rates for these apartments were $336-$424 per month for University Village, and $447 per month for Schilletter Village. The apartments are furnished with stove and refrigerator, and central air conditioning units are being added to the University Village apartments. Rental rates include cable television, high-speed internet connection, water and garbage removal service. Residents pay for their own gas, electricity and telephone.

Applications for University Family Housing will be accepted not more than one year in advance of the semester of assignment. Applicants must be admitted to Iowa State University to apply for housing.

To be eligible for a university family housing, applicants must be registered for classes during the semester of move-in. Preference for University Family Housing is given to the following groups in order of priority:
- graduate student families on appointment.
- single parents living with dependent children.
- legally married couples residing together with or without dependent children.

Address correspondence concerning family housing to University Family Housing, 100 University Village, Ames, Iowa 50010; Fax: (515) 294-0651 or e-mail: apartments@iastate.edu

Off-Campus Housing for Students

Availability and cost are factors to be considered when living off campus. Sleeping rooms in older houses, apartments, and duplexes make up the bulk of off-campus housing.

The Off Campus & Adult Student Services, B6 Memorial Union, keeps a listing of off-campus rental units. Other housing may be obtained through real estate agents, local newspapers, or by contacting individual owners.

It is best that the student come to Ames well in advance of the time he or she plans to begin academic work, as many units are rented 3 to 6 months in advance. The single occupancy room rental rates average $200 to $500 per month. Average rental rate per student sharing an apartment or house would be in the $250 to $400 range per month. Board for students living in off-campus rooms may be obtained in residence hall dining rooms, private restaurants, or the Memorial Union.

A meal plan is available in the Department of Residence to off-campus students that provides any one meal per day, Monday through Friday, while classes are in session. Information may be obtained from the Administrative Office, Department of Residence, 1215 Friley Hall, Iowa State University, Ames, Iowa 50012-0003.

Fraternities and Sororities

Of the 51 fraternity and sorority chapters on the Iowa State University campus, 43 have chapter houses, and provide housing for about 1,800 undergraduate students. The seven historically Black Greek fraternities and sororities do not provide residential facilities for members, but are active in scholastic, service, and social projects.

The chapter house facilities are similar to a private residence: living room, den, kitchen, dining room, laundry room, etc. The staff in the Office of Greek Affairs, a department in the Dean of Students Office, provide advising, programs, and services for the Greek chapters and organizations. Local alumni work with each fraternity and sorority to ensure that the chapter structure meets all the state and local building, safety, and fire codes that are required with incorporation under the State Law of Iowa.

The average cost of living in a fraternity or sorority chapter house ranges from $300 less to $300 more per year than living in the residence halls, or an off-campus apartment. The cost includes room, board, and social dues. Fees average $50 for a pledging fee and $150 for the initiation fee.

Men may move directly into a fraternity house at the beginning of an academic year if they pledge a chapter that has a house. Typically, they continue living there throughout their college years. Women pledging a chapter during formal recruitment or informally throughout the year generally live in the residence halls for the academic year. However, as space becomes available in a chapter house, sorority members often move into the house as sophomores or upper-class women.

If a student moves into a chapter house from the residence halls and has to break a contract, the student will forfeit the deposit and owe a percentage of the cost of the contract. Most of the chapters compensate a student to a degree. Because the compensation amount differs among houses, a student should communicate with the chapter before changing residences.
The University Library

Dean of Library Services: Olivia M.A. Madison, M.L.A.

General Information: (515)-294-3642

Library Hours: (515)-294-4849

The University Library provides a wide array of print, non-print, and electronic information resources, which are housed in the main Parks Library, the Veterinary Medical Library, and four subject-oriented reading rooms (design, economics and sociology, mathematics, and physical sciences). The library’s extensive collections support research and study for all ISU graduate programs, with the strongest support at the Ph.D. level. These collections are nationally recognized for their strengths in basic and applied fields of biological and physical sciences. Library holdings include more than 2,203,800 volumes and approximately 21,600 serial subscriptions.

The library encourages use of its collections and many services, and assistance is provided at nine public service desks. These desks include the Reference Desk, Reserve and Media Services, Interlibrary Loan, the Circulation Desk, the Periodical and Newspaper Room, the Microforms Center, Special Collections, the Map Room, and Document Delivery/Photoduplication. In addition, instruction in the use of library resources is offered to graduate and undergraduate students.

The library’s e-Library, accessed through the Internet, provides access to the local on-line catalog; indexing and abstracting databases; electronic journals; and selected Internet sites. Assistance in using this vast body of electronic resources is available at the Reference Desk and through individually arranged appointments with reference librarians.

The Parks Library has a limited number of research studies available for faculty, graduate students and professional and scientific staff. They are intended for research and other scholarly activities that require extensive use of library material. Normally, assignments are made for a semester at a time.

Student Counseling Service

Director: Terry Mason, Ph.D.

Interim Assistant Director for Clinical Services: Ron Jackson, Ph.D.

The Student Counseling Service (SCS) assists students in enhancing their academic and personal well-being with a staff of professional psychologists and counselors. Services are available to help students sort through their feelings, strengths, and options to develop new perspectives and coping skills.

Available services include individual counseling, relationship/couples counseling, career counseling and exploration, substance abuse assessment, and learning disabilities screening. Group counseling is also available for a variety of issues including adult children of alcoholics, depression, eating disorders, self-esteem and relationships, problem solving, and relaxation/stress management. SCS also offers a number of outreach programs and workshops.

Counseling services are offered at no cost to ISU students. However, a nominal fee for testing may be required. Counseling is strictly confidential. SCS staff will not release any information to anyone outside of the Student Counseling Service without the written permission of the client.

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

During the fall and spring semesters, SCS hours are Monday through Thursday, 8 a.m.–6 p.m. and Friday from 8 a.m.–5 p.m. During the summer (and when classes are not in session) office hours are Monday through Friday, 8 a.m.–5 p.m. The Student Counseling Service phone number is 515-294-5056.

Student Health Center

Physicians: Mark Blaedel, M.D.; Charlotte Cleavenger, D. O.; Robin Engstrom, M.D.; Rebecca Fritzschke, M.D.; Malhar Gore, M.D.; Pauline Miller, M.D.; Cosette Scallon, M.D.; Marc Shulman, M.D.; Lee Wilkins, M.D.

The Student Health Center is located on the corner of Sheldon Avenue and Union Drive, just west of Beyer Hall. Services include doctor and nurse consultations, physical exams, laboratory and x-ray services, sports medicine and physical therapy, immunizations, pharmacy, diet and nutrition consultation, fitness consultation, computerized health risk appraisal, stress management, wellness assessment, workshops, free and confidential HIV testing, and referral services.

The student health fee partially finances the services of the Student Health Center and is charged to all students taking 5 or more credits each semester. Those taking 4 or fewer credits may access services at reduced cost by paying the health fee. Spouses/domestic partners of students who opt to pay the health fee also have access to services. Students with less than 5 credits who elect not to pay the health fee may still be seen at the Student Health Center, but will be charged for the services provided. International students and their spouses/domestic partners are required to participate and pay the health fee. The health fee is not a substitute for health insurance. It is a prepayment plan that complements the student’s individual insurance coverage.

Clinic hours:
- Monday and Tuesday, 8 a.m.–8 p.m.
- Wednesday, 9 a.m.–6 p.m.
- Thursday and Friday, 8 a.m.–6 p.m.
- Saturday, 8 a.m.–12 noon.

Hours vary during breaks. Patients are seen by appointment. Each patient has the option of seeing the provider he/she requests.

The Student Health Center operates on an appointment/assessment system. Students are encouraged to call ahead for an appointment. For urgent medical needs, no appointment is needed to come to the clinic. Those students will be assessed by a staff nurse to determine whether they need to see a physician immediately, or if they should make an appointment for later in the day. Students with urgent medical needs will see a physician right away. Those with less urgent needs will see a physician at a later time. For more information, call 515-294-5801. Service is available for emergency problems after regular clinic hours at Mary Greeley Medical Center Emergency Room. The cost is the responsibility of the student and/or the student’s insurance plan.

All records are confidential. Student records are not available without the student’s written permission.
Career Services Offices

Director: Beverly S. Madden, M.S., Beardshear
Agriculture: Michael Gaul, B.S., 141 Curtiss Hall
Business: Steven Kravinsky, M.S., 208 Carver
Design: Margaret Hutcheson, M.Ed., 297 College of Design
Education: Toni Humphfer, M.S., E105 Lagomarcino
Engineering: Larry Hanneman, M.S., 301 Marston
Family and Consumer Sciences: 131 Mac Kay
Liberal Arts and Sciences: Steven Kravinsky, M.S., 208 Carver
Veterinary Medicine: Eidon Uhlenhopp, Ph.D., 2520 Veterinary Medicine

Career services are provided in each college to assist students, undergraduate and graduate, and alumni with their career-related needs. A broad range of programs and services are offered including online registration, position listing and interview scheduling; résumé referral; coordination of co-op and internship programs; workshops and seminars on career exploration, résumé preparation, letter writing, job search techniques, interview skills, applying to graduate and professional schools, and adjusting to the first job.

Each year career services sponsor five college career-information days, the graduate and professional school day, an international opportunities festival, and a summer job fair. Extensive career and job search information is provided on-line. Each college career services office serves as a point of entry for students, alumni, and employers to the entire ISU network of coordinated, decentralized career services.

Office of Minority Student Affairs

Director: Rafael Rodriguez, M.A.

Program Coordinators: Karen Webb, M.Ed.; Eddie Weatherington, B.S.

Program Assistants: Meaghan Kozar, B.A.; Yanira Pacheco, B.A.; Irma White, B.A.

The Office of Minority Student Affairs is designed to give leadership to the university’s mission in the area of equal educational opportunity. The office strives to maximize the educational and personal growth of students by identifying and assisting in the development and promotion of programs which will enable students and staff to achieve their full potential.

In addition, the Office of Minority Student Affairs works closely with all units in the university to achieve the following objectives:

1. Strengthen Iowa State University’s efforts in recruiting, retaining, and graduating ethnic minority students.
2. Work in collaboration with Minority Liaison Coordinators in reviewing the concept of equal educational opportunity and recommending changes to university policies that may limit or prevent the achievement of educational and cultural goals of minorities.
3. Ensure access and persistence of minority students in every discipline and area of study offered by the university.
4. Maintain liaison with all departments and organizations interested in the growth and development of students.

These objectives are designed to assist in the achievement of the major purpose of the Office of Minority Student Affairs: the identification, recruitment, retention, graduation, and placement of minority students. This purpose is accomplished through the following programs:

- Academic Program for Excellence
- Carver Academy Program
- George Washington Carver Scholarships
- Martin Luther King, Jr., Loan Program
- American Indian Symposium
- Ethnic Cultural Celebrations
- Early Success Program
- College Bound activities

International Education Services

www.public.iastate.edu/~internat_info/

Study Abroad Center:
www.iastate.edu/~study-abroad/

Director: Dennis Peterson, M.A.
Assistant Director, International Students and Scholars: Brenda Thors-Thorp, Ph.D.
Program Assistant, Study Abroad Center: Trevor Nelson, Ed.D.
Coordinator of International Services: Rebecca Matters
Coordinator of Special Projects: Deborah Vance, M.B.A.

Program Coordinators:
- Luiza Dreasher, Ph.D.; Jane Edwards, M.S.; Kamal Elbasher, Ph.D.; Nancy Guthrie, B.A.; Catherine Marshall, Ph.D.; Amy Mukamuri, B.A.; Wei Wei, M.S.

International Education Services (IES) is committed to courteous, accurate, timely service and informative programs for international students and visiting scholars, Americans seeking overseas opportunities, and citizens of Iowa interested in international education. IES staff members orient and advise internationally on university procedures, community resources, U.S. visas and personal concerns. Persons interested in study and/or work abroad find a wealth of information at the IES Study Abroad Center. The Center maintains information on scholarships, health and safety abroad, world cultures, and travel, as well as over 200 ISU programs and thousands of opportunities through other institutions. Staff assist not only students, but also faculty and staff traveling abroad. Project Assist provides logistical and other support to faculty developing new group study abroad programs. IES intercultural programs, such as the Culture Corps, Friendships International, Conversational English and activities developed with the International Student Council and dozens of international student organizations, bring international students and Americans together for mutual learning. We welcome volunteers to join these and other programs.

Dean of Students Office

www.public.iastate.edu/~deansdt_info

Interim Dean of Students: Peter Englin, M.S., Student Services Building

Associate Director: Michael Harvey, M.S., 2220 State Gymnasium

Business Manager: Scott White, M.S., 2220 State Gymnasium

Coordinator, Intramural Program: Garry Greenlee, M.S., 1264 State Gymnasium

Program Coordinator, Intramural Sports: Linda Marticke, M.S., 1262 State Gymnasium
The Office of Greek Affairs oversees ISU’s fraternities, sororities, and affiliated Greek organizations. Greek Affairs provides advising, consultation, and educational services to the fraternities and sororities at Iowa State. Professional staff and graduate assistants work with student leaders, members, and chapter advisers to provide support to the chapters and to advise Interfraternity Council, Panhellenic Council, National Panhellenic Council, Greek Week, Dance Marathon, Fall Blood Drive, and other student organizations and activities affiliated with the Greek community.

The 53 fraternities and sororities at Iowa State University have approximately 3,000 student members (1,800 men and 1,200 women), or about 14 percent of the undergraduate student population. The Greek Affairs staff and local alumni work with each fraternity and sorority to ensure that the chapter is meeting the educational objectives of the university, their national affiliates and the developmental needs of the student. Fraternities and sororities have been active with Iowa State University since 1875. Since that time, many of Iowa State’s total alumni have graduated with fraternity or sorority affiliation. For more information visit B6 Memorial Union, call 515-294-1023, or view from the web, www.public.iastate.edu/deanstdt_info/greek/ga_home.htm.

Judicial Affairs
The Office of Judicial Affairs is responsible for the university’s Centralized Judicial System. Representatives from the Office of Judicial Affairs interpret university policies and conduct student disciplinary hearings for academic and non-academic violations of the ISU Student Disciplinary Regulations. As members of the Iowa State University community, all students have certain rights and responsibilities. When an alleged violation of the Student Disciplinary Regulations occurs, a hearing officer from Judicial Affairs investigates the complaint, interprets general university regulations and guidelines, conducts student discipline hearings which ensure the standards of due process, and consults with faculty, staff, and students regarding student conduct issues.

Student discipline hearings are conducted in accordance with the rules and regulations as set forth in university policies and procedures. Disciplinary hearings are administered by a member of the Judicial Affairs staff or by members of the All-University Judiciary (AUJ) committee. The Office of Judicial Affairs serves as a resource for anyone with questions regarding a student conduct issue and is located in the Dean of Students Office, 2222 Student Services Building, (515) 294-1021, www.public.iastate.edu/deanstdt_info/auj.

Lesbian Gay Bisexual Transgender Student Services (LGBTSS)
LGBTSS is a safe space for all members of the ISU community to explore aspects of sexual orientation and gender issues in an open non-judgmental atmosphere. LGBTSS is committed to providing information and education that enhances the educational experience and overall quality of student life on campus.
LGBTSS, its staff, and advisory board work to promote assistance, support, visibility, and diversity through programming, a variety of services, and referral. In achieving its mission, LGBTSS strives to promote full inclusion of LGBT persons and their allies at ISU and to eliminate homophobia, heterosexism, and sexism on campus.

Programs and services of LGBTSS include the speakers bureau, Lavender Graduation, National Coming Out Days events, supporting campus LGBT organizations, the Safe Zone sticker project, the lending library, and brochures and workshops on various LGBT issues. For more information: 2222 Student Services Building, (515) 294-5433, lgbtss@iastate.edu, or www.public.iastate.edu/~lgbtss.

Margaret Sloss Women's Center
The Margaret Sloss Women's Center promotes the educational, personal and career development of all women in the ISU/Ames community. Along with other departments, the Women's Center shares the university's responsibility of creating a safe and supportive environment for all individuals. The purpose of the Women's Center is to promote and sustain women through assistance, programs and information and referral services. The Women's center provides:

- A clearinghouse of information including a lending library, resource files, a newsletter entitled Womenews, a calendar of events, and magazines including Ms., Essence, Working Woman, Curve, Connections, Mother Jones, About Women on Campus, and Harvard Women's Health Watch.
- A program center that focuses on helping students, staff and faculty thrive in an academic environment by motivating them toward a greater understanding of, and involvement with, women's issues. Educational programs presented in residence halls, departments and organizations include workshops on a variety of topics (e.g., self-esteem, images of women in the media, sexual assault, sexual harassment, domestic violence, dating violence, relationships between women and men, homophobia/heterosexism, sex roles and stereotypes, etc.).
- Coordination and co-sponsorship of special events including Women's Week, National Coming Out Day, Sexual Assault Awareness Week, Rosa Parks Day Celebration, and Women's History Month. Throughout the year, the Women's Center also sponsors a number of speakers on current issues, hosts conferences, and coordinates support and discussion groups.
- Assistance and support for women who work toward changing situations which adversely affect them, both individually and institutionally.
- A space for women to meet, study, eat, network, discuss, find support, watch a video or just relax.
- A place to gain experience and/or credit as a journalism or design intern, practicum student, student programmer, board member, or volunteer.
- Other services include an electronic breast pump, lockers to rent, free condoms, meeting rooms for campus and community organizations, kitchen facilities, and a TV and VCR.

The Women's Center is open Monday through Friday, 8 a.m.-5 p.m. and is housed in the Sloss House, located between Curtiss Hall and the Memorial Union. Call 515-294-4154 or view www.iastate.edu/~mswc.

Off Campus and Adult Student Services (OCASS)

Through various programs and services, the Off Campus and Adult Student Services seeks to meet the unique needs of current and prospective adult, commuter, and off-campus students. This is accomplished through the following:

- Providing information and consultation about tenant/landlord rights and responsibilities
- Serving as a clearinghouse for general campus and city information and referral
- Advocating for campus-wide awareness and responsiveness to the needs of current and prospective adult, commuter, and off-campus students
- Offering opportunities for interactions and connection for adult and commuter students
- Offering leadership opportunities to student employees and interns
- The office is funded in part by the Government of the Student Body.

For assistance and information, visit B6 Memorial Union, call 515-294-2364, or view www.o cass.iastate.edu/.

Parents Association (ISUPA)

All parents of ISU undergraduate students are automatically considered to be members of the ISU Parents Association. The ISUPA serves as a link between the University and parents and families. Its mission is to serve and inform parents and to enhance the quality of student life at Iowa State.

There are no membership fees in the ISUPA; it is funded exclusively by contributions and fundraisers, like the annual tuition raffle. The ISUPA Board of Directors, comprised of 36 parents, along with members of the Dean of Students Office staff, administer the programs of the ISUPA, that include:

- Family Handbook, distributed to all new ISU parents at June orientation
- Parents Advisory Line (PAL), 1-800-772-8546, toll free assistance for parents
- Parent Calling Project, phoning to new ISU parents each autumn
- Family Weekend, the annual fall event largely funded by the ISUPA
- Involvement in ISU admissions events

For more information on the ISUPA, call the Dean of Students Office, 294-6054 or view www.dso.iastate.edu, then Web site Index, Parents Association.

Recreation Services

Recreation Services is dedicated to the provision of quality recreational opportunities for the campus community. Programs include intramural sports, sport clubs, informal recreation, outdoor recreation, special events, fitness programs, and recreation facility scheduling. Assistance for other recreational services is provided.

The informal recreation program includes the opportunity for recreational sports activity in Beyer Hall, State Gymnasium, Forker Building (east campus), Lied Recreation/Athletic Center, outdoor tennis courts near the Forker Building, intramural fields east of the Towers and Maple-Willey-Larch Residence Halls, Clyde Williams Field and the southeast field complex east of the football stadium.

The fitness program provides several opportunities for staying fit. The types of aerobic classes available include step, kickboxing, step, toning and water. The semester is divided into two sessions, each offering 35 classes. The Rec Milers Program is designed to help students stay interested and involved in a regular exercise program. Participants have the flexibility to choose their own activities and can exercise at their own pace and convenience. Participants keep track of their recreational mileage for each month. To get mileage credits, progress slips must be deposited in the Rec Milers’ boxes at the Recreation Services Office, 2220 State Gym, or at the Lied Recreation/Athletic Facility. Monthly totals for each participant are posted at State Gym.

Participants may earn awards for specific milestones. Aerobic activities for Rec Miler credit include: bike, walk, basketball, handball, cross country skiing, stationary bike, fitness class, jump rope, soccer, jog/run, swim, racquetball, and tennis.

The outdoor recreation program is composed of four basic elements: the camping-outdoor equipment checkout program; the organized trip program; basic instruction activity workshops; the Outdoor Equipment and Resource Center. All of these programs and activities are designed to provide opportunities for natural environment experiences. Two regulation golf holes north of the Armory are open for ISU recreation golf use at no charge.

The sports clubs program is designed to serve individual interests in different sports club activities and is student-oriented in every aspect. Sports clubs offer team or individual recreational opportunities. Following are the sports clubs: badminton, ballroom dance, bowling, cycling, equestrian, fencing, flying, frisbee, hapkido, hockey, judo, karate, kayak, lacrosse, racquetball, rifle and pistol, rodeo, rugby, sailing, scuba, ski, shotokan karate, sky diving, soccer, table tennis, tae-kwon-do, trap and skeet, volleyball, water polo, water ski and weightlifting.

These clubs offer instruction and competition at the local and intercollegiate levels. The club members set dues, and most clubs receive financial subsidy from the Government of the Student Body to enable students to participate regardless of their financial situation.

The intramural program involves competition among participants who enter as teams or individuals and play according to specific schedules. There are a total of 50 intramural...
activities ranging from football to innertube water basketball and curling. Activities include men's, women's and co-rec divisions.

Numerous special events add spice to the recreation program. These activities are of an endless variety and usually take place in a short time span. In general, they encompass demonstrations, performances, special contests, mass group participation, social occasions, excursions, displays, or special instruction.

Other physical, cultural, and social recreation programs are sponsored in coordination with various departments, organizations, and groups on and off campus. For further information concerning campus recreation activity, contact the Recreation Services Office, 2220 State Gym, or call (515) 294-4980, or www.public.iastate.edu/~rec_services_info.

Student Activities Center

The Student Activities Center is committed to student involvement and retention. Its programs and services, including leadership development and organization participation, strive to ensure student success. These practical experiences work toward enhancing the quality of student life. With over 500 organizations from which to choose, students learn about themselves and appreciate the diversity in others. The staff of the SAC is dedicated to utilizing their knowledge and experience to provide unique living and learning opportunities for all Iowa State students.

The SAC is responsible for registering the 500+ student, campus, and community organizations. The staff provides consultative services to student leaders, members, and advisers of organizations on an individual and group basis. They also provide training workshops and facilitate retreats for student groups. This office produces Newsline, a newsletter distributed twice each semester to presidents and advisers of registered student organizations. The SAC also annually publishes the Student Organizations Resource Manual, which informs the campus community about university policies and procedures that affect student organizations. Information about substance abuse prevention and peer education training is a priority at Iowa State University and is provided through the SAC. The staff of the SAC also advises students involved in the Government of the Student Body (GSB) and VEISHEA.

For more information visit the SAC, B6 Memorial Union, 294-1023, or view www.sac.iastate.edu/.

Student Answer Center

Students who have questions but are not sure where to find an answer may contact the Student Answer Center located on the ground floor of Beardshear Hall. A staff member will answer questions on the spot or provide referrals to other university departments as needed. In addition, students can pick up forms, information brochures, and campus maps and also receive assistance in getting information from the Web.

Answers to frequently asked questions are available on the Student Answer Center Web site at www.answer.iastate.edu. Students also may e-mail their questions to the Student Answer Center at answercenter@iastate.edu or call 515-294-4469.

Student Assistance Services

When student life at Iowa State becomes overwhelming or situations arise when students need some advice, the staff of Student Assistance Services is ready to help. The associate dean of students, along with his/her graduate assistant and other DSO colleagues, provide resources for students to work through issues including:

- Academic concerns
- Personal concerns
- Personal and family emergencies, and
- Formal grievance procedures.

Assistance in understanding and navigating the University judicial systems and other university policies and procedures is also provided. Personalized referrals to other University resources and services is key in providing proactive and comprehensive assistance to students. Consultation and assistance is provided in an atmosphere of confidentiality and concern for each student’s personal well being and educational objectives. For more information visit 2222 Student Services Building, call (515) 294-1020, or see Web site Index at www.dso.iastate.edu.

Student Legal Services (SLS)

Student Legal Services is a cost-free legal aid office available to any student currently enrolled at Iowa State and registered student groups. SLS is staffed by full-time, practicing attorneys who are available to consult with students and offer advice with respect to most legal problems. While SLS is a part of the Dean of Students Office, its financial support comes from the Government of the Student Body (GSB). The types of cases most often handled by the staff of the SLS include:

- Family Law and Divorce
- Criminal Law
- Landlord-Tenant Problems
- Off-Campus Employment Problems
- Consumer Issues
- Administrative Issues

However, SLS cannot actively represent students in controversies involving student vs. student, student vs. ISU, and ISU student judicial matters and does not handle the following cases: fee generating cases; felony defense; Federal Court matters; cases involving excessive time.

More information is available at SLS, B11 Memorial Union, (515) 294-0978, see Web site Index at www.dso.iastate.edu.

Student Support Services Program (SSSP)

SSSP, a federally funded program, provides academic support to eligible students and is designed to increase the retention and graduation rates of low-income individuals who are first generation college or individuals with disabilities. The needs of the students who are accepted into SSSP are thoroughly assessed through testing and counseling. SSSP participants receive personal and career counseling, along with academic advice, tutoring, and assistance in receiving financial aid.

Participants in SSSP are encouraged to work with an SSSP student mentor to become acclimated to the ISU environment. These relationships also encourage participants to fully access ISU resources.

Study skills improvement sessions and basic skills instruction are provided in the areas of math and writing. In addition, cultural enrichment (i.e. theatre, dance, and musical events) and educational (leadership conferences, graduate/professional, etc.) activities are planned. These services are provided free of charge to eligible students after they are accepted into the program. SSSP is located in the Student Services Building; call (515) 294-0210 or view Web site Index at www.dso.iastate.edu.

Vocational Rehabilitation

The State of Iowa Division of Vocational Rehabilitation Services Office provides services to students who are able to provide medical documentation that they have a substantial impediment to employment. Rehabilitation services may include the following: medical assessment; vocational evaluation; counseling and guidance; special adaptive equipment or devices; financial assistance toward training; job placement assistance. No direct fees are charged, but there may be some costs through involvement with services. Financial assistance towards tuition costs is based on student financial need. For more information, contact Vocational Rehabilitation, 515-294-5059, 2222 Student Services Building, or see www.dso.iastate.edu/dept/vocrehab.
Child Care

Child Care Resources, a unit of Human Resource Services, supports Iowa State University families by linking them with programs and services that can help meet their child care needs. The university child care consultant is available to assist families in accessing services available both on the campus and in the community.

Child care programs located on campus include:
- Center for Child Care Resources: Assistance in locating community child care services, 1038 Pammel Court; 515-294-9833 or 1-800-437-8599
- University Community Childcare at Pammel Court, 991 Pammel Court, 515-294-8838
- The Comfort Zone: Daycare for kids who don’t feel so good, 1019 Pammel Court, 515-294-3333.
- Flex-Care: Part time care for children of ISU students, 1052 Pammel Court, 515-294-2471.
- University Child Care Center at Veterinary Medicine, 1700 Christensen Drive, 515-294-2273.
- ISU Child Development Laboratory School, Palmer HDFS Building, 515-294-3040.

For more information about child care options, contact the university child care consultant at 515-294-8927.

Forensics: Individual Events

ISU Forensics, the Iowa State speech team, participates in several kinds of competitive speech activities. Please contact Speech Communication Program at 515-294-7670 for further information.

Honor Societies

Alpha Epsilon—Agricultural Engineering
The purpose is to promote the high ideals of the engineering profession, to give recognition to those agricultural engineers who manifest worthy qualities of character, scholarship, and professional attainment, and to encourage and support such improvements in the agricultural engineering profession that make it an instrument of greater service to humanity. Membership is based on scholarship, leadership, and character.

Alpha Lambda Delta/Phi Eta Sigma — Freshmen
First-year students who achieve at least a 3.5 GPA for one or more semesters their first year may be members of these national honor societies. These societies encourage superior scholastic attainment among students in their first year at institutions of higher education.

Alpha Pi Mu—Industrial Engineering
Members are chosen for character, achievement, and scholarship in industrial engineering. The group provides social and educational interaction for industrial engineering.

Alpha Upsilon Alpha—Education
An educational honorary that recognizes and encourages scholarship and leadership in the field of reading.

Alpha Zeta—Agriculture
Members must have completed three semesters of study in the College of Agriculture or Veterinary Medicine and be in the upper two-fifths of their class. Meetings are held to foster high standards of scholarship, character, and leadership. Alpha Zeta sponsors lectures, service projects, and promotes the agricultural programs at ISU.

Beta Beta Beta Biological Honor Society
A national organization for students in the biological sciences with a purpose to recognize undergraduates with exceptional scholarship, leadership and character.

Beta Gamma Sigma
Honor society for collegiate schools of business.

Cardinal Key—Senior Leadership
The Senior Honor Society of Cardinal Key recognizes those persons who have been outstanding leaders in college life, who have rendered noteworthy service to Iowa State, who are of high moral character, and who rank high scholastically. Members are selected by application and interview.

Chi Epsilon—Civil Engineering
The purpose is to develop the profession of civil engineering through the interaction of members, fellow civil engineering students, and faculty. Scholarship, character, practicality, and sociability are the fundamental requirements for membership.

Epsilon Pi Tau—Education in Technology
Members are selected from the upper one-fourth of the juniors, seniors, and graduate students in industrial technology. The group strives to promote skill, social and professional efficiency, and research.

Eta Kappa Nu—Electrical Engineering
Members are selected from the upper one-fourth of the junior class and upper one-third of the senior class in both electrical and computer engineering. Eta Kappa Nu promotes scholarship and citizenship through guest lectures and service projects.

Golden Key—All University
A national nonprofit academic honors organization, Golden Key is dedicated to recognizing and encouraging scholastic achievement in all undergraduate fields of study and to uniting collegiate faculty and administrators.

Iota Sigma Pi—Females in Chemical Sciences
An organization open to female students in the chemical sciences which provides functions for members to socialize and discuss science issues in chemistry.

Kappa Delta Pi—Education
In an effort to promote excellence in and recognize outstanding contributions to education, Kappa Delta Pi maintains a high degree of professional fellowship among its members, quickens professional growth, and honors achievement in educational work. Membership invitations are extended to second semester sophomores, juniors, and seniors with a GPA of 3.25 or above.

Kappa Delta Pi—Females in Chemical Sciences
A national honor society for collegiate schools of business.

Kappa Delta Pi—Education
In an effort to promote excellence in and recognize outstanding contributions to education, Kappa Delta Pi maintains a high degree of professional fellowship among its members, quickens professional growth, and honors achievement in educational work. Membership invitations are extended to second semester sophomores, juniors, and seniors with a GPA of 3.25 or above.

Kappa Omicron Nu, Gamma Chapter
Objectives of the honor society are to promote graduate study and research, and to stimulate scholarship and leadership toward the well-being of individuals and families throughout the world. Top 10 percent of junior and top 20 percent of senior students maintaining at least a B average, and outstanding graduate students in family and consumer sciences, are eligible for selection. Research within the college is shared at monthly meetings.

Kappa Tau Alpha—Journalism
Kappa Tau Alpha is the national society dedicated to the recognition and promotion of scholarship in the field of journalism. Members are selected from the upper 10 percent of the senior class. Graduate students and faculty who qualify are also eligible for membership.

Beta Gamma Sigma
Honor society for collegiate schools of business.

Berkens National Ceramic Engineering Honor Fraternity
A national honorary that recognizes students with outstanding academic achievement and encourages interaction between students and alumni.

Mortar Board
Members are recognized for superior academic achievement and community service.
Phi Kappa Phi—All University
This national honor society recognizes and encourages superior scholarship in all academic disciplines. Membership is open to qualified undergraduates and graduates by invitation and occasionally to faculty and alumni.

Phi Sigma Theta
Phi Sigma Theta is dedicated to recognizing and rewarding academic achievement, and encouraging community service, leadership, and continued academic excellence.

Phi Upsilon Omicron—Family and Consumer Sciences
Members are selected from junior and senior families and consumer sciences students who have demonstrated academic excellence and professional leadership qualities. Membership is a means of furthering professional goals. Outstanding graduate students are also eligible for selection.

Phi Zeta—Veterinary Medicine
Phi Zeta is the national honor society of veterinary medicine whose aim is to stand for the constant advancement of the veterinary profession, higher educational requirements, and high scholarship. Active members are students in the third and fourth year of the veterinary curriculum who have achieved high scholarship, and those who have been in possession of a veterinary medical degree for at least two years and are engaged in a veterinary graduate program, internship, or veterinary research.

Pi Alpha Xi—Horticulture
This honor society’s purpose is to promote high scholarship, foster good fellowship, increase efficiency of the profession, and establish cordial relations among the students, educators, and professional horticulturists. Membership is open to academically qualified upperclass and graduate students in horticulture.

Pi Kappa Lambda-Gamma Nu Chapter
Pi Kappa Lambda is the national music honor society.

Pi Mu Epsilon—Mathematics
Pi Mu Epsilon is the national mathematics honorary society whose purpose is the promotion of scholarly activity in mathematics among students and staff. Members are students and faculty who have completed at least two years of college-level mathematics with honor (at least 3.33 GPA) and have maintained an overall GPA of at least 3.0.

Pi Sigma Alpha
Pi Sigma Alpha is the national honor political science honor society.

Pi Tau Sigma—Mechanical Engineering
Members are juniors and seniors in the upper ranks of their classes in mechanical engineering. Meetings and social functions are held to recognize and encourage outstanding scholastic achievement.

Psi Chi—Psychology
This national honor society in psychology recognizes and honors individuals maintaining high scholarship and documented interest in psychology.

Rho Lambda
Contact the Student Activities Center (515-294-1023) for more information.

Sigma Gamma Epsilon—Geological Sciences
The objectives of this national honorary society are the scholastic and scientific advancement of its members and the promotion of friendships and assistance among colleges, universities, and scientific schools devoted to the advancement of the earth sciences. Membership is intended for those scientists and students of science whose primary concern is the study of the earth.

Sigma Gamma Tau—Aerospace Engineering
Sigma Gamma Tau is the national honorary for aerospace-aeronautical engineering students who have displayed outstanding scholarship, leadership, and personal characteristics. Members are selected from the upper fourth of the junior class and upper third of the senior class who have maintained a 3.00 or better cumulative grade point average.

Sigma Lambda Chi—Construction Engineering
The purpose is the recognition of outstanding students in construction engineering. Upperclass students in construction engineering may be initiated into the society providing they have an overall scholastic average in the upper 20 percent of their class.

Sigma Xi—Research
Sigma Xi, the scientific research society, is a broad-based scientific honor society with over 500 chapters and clubs at universities and nonacademic scientific institutions. Sigma Xi awards associate membership to undergraduates and graduate students who have demonstrated research potential through participation in an original scientific research activity. Full membership in Sigma Xi recognizes a significant scientific research contribution.
gram office and become involved in the plan-spring. The Committee on Lectures also spon-
student creativity in the arts, is held in the
an annual fine arts festival with emphasis on
tional interest held in the fall. Spring semester,
speakers include scholars E.O. Wilson and
focus, the Institute on National Affairs is held with a
tional affairs, the sciences, and the arts. In addition
to giving formal lectures, a number of these
speakers meet with students informally for
discussions. Through these lectures and dis-
cussions the students are given a well-round-
ed discussion on subjects and areas affect-
ing their culture, educational and economic
philosophy, and scientific development. Past
speakers include scholars E.O. Wilson and
Stephen J. Gould; activists Gloria Steinem and
Anita Hill; actor and comedian Bill Cosby; poet
Maya Angelou; and astronaut Sally Ride.
The Institute on World Affairs is an annual
series of speakers and on a topic of interna-
tional interest held in the fall. Spring semester,
the Institute on National Affairs is held with a
topic of national concern as its focus. Focus,
an annual fine arts festival with emphasis on
student creativity in the arts, is held in the
spring. The Committee on Lectures also spon-
sors or co-sponsors dramatic, dance, and
musical events. In addition, a film series is
scheduled during summer session. Students are
encouraged to contact the lectures pro-
gam office and become involved in the plan-
ing of these events.

Memorial Union
The Iowa State Memorial Union is regarded as
the heart of campus life and the campus cen-
ter of informal education at Iowa State
University. It is the meeting place and head-
quarters for most student organizations and
houses several university offices. Lectures, ex-
hibits, films, concerts, banquets, dances,
and other campus gatherings are accommod-
ated in its meeting rooms and ballrooms.
A food court with eight food vendors and a
large variety of choices, the Cardinal dining
room, catering service, and a 24-hour vending
area provide food service to the university
community. The Maintenance Shop hosts
some of the finest in blues, jazz, rock, and folk
music performances at night and is a deli
during the day. The Recreation Center offers
bowling, billiards, pinball, and video games,
and a large screen television.
Art is a way of life in the Union that includes
special film showings, galleries, and a browing-
library that offers reading, music, and video
materials. The Workspace studios are staffed
and equipped for individuals who wish to
express themselves creatively. A small, quiet
chapel is available for services, weddings, or
meditation. In addition, four study lounges are
available to students.
Campus visitors may choose to stay overnight
in the guest rooms on the third, fourth, and
fifth floors. The Memorial Union also has a
convenience store, automatic teller machines,
a TicketMaster outlet, the University Book
Store, a copy center, a full service post office,
and an attached 640 car parking ramp.
Opened in 1928 as a proud memorial to the
Iowa State men and women who served in the
Armed Forces during World War I, the
Memorial Union is now a living memorial to all
Iowa Staters who have served in the United
States military.

Motor Vehicles and Bicycles
Students are permitted to own and operate
motor vehicles - automobiles, motor scooters,
and motorcycles. However, motor vehicles are
in no way necessary for an Iowa State
University student. Iowa State University is
primarily a pedestrian campus. Those who
operate a motor vehicle or bicycle on campus
must abide by the rather extensive traffic and
parking regulations. Fines are levied for infrac-
tions of these regulations. All motor vehicles
and bicycles owned or operated by students
on university property must be registered with
the Parking Division Office located in the
Armory. Copies of the traffic and parking regu-
lations also are available at this office.

Music Activities
Many opportunities to perform and listen to
music are provided to Iowa State students.
The Department of Music offers a full instruc-
tional program including applied vocal and
instrumental instruction, music theory, music
history and literature, and music education.
The Department of Music offers a wide variety
of opportunities to participate in large perform-
ing groups, including five choral ensembles,
six bands, ISU Symphony Orchestra, and
numerous chamber groups. Nearly one-fourth
of all undergraduate students participate in
some aspect of music while attending ISU.
Campus concerts, student operas, musical
shows, the Holiday Festival of Music, the
Madrigal Dinner, and concert tours are among
the musical events offered.
Musical events by world renowned artists are
presented throughout the year in the Iowa
State Center. In addition, the Department of
Music presents many faculty and guest artist
recitals.
Sigma Alpha Iota and Phi Mu Alpha, profes-
sional music fraternities for women and men,
are represented on campus.

Religious Life
Iowa State University is a state-supported,
nonsectarian institution, but it recognizes the
importance of spiritual life and cooperates with
the many off-campus groups that fulfill the reli-
gious needs of the community.
Most of the larger denominations have places
of worship within easy walking distance of the
campus. Several denominations have attrac-
tive student centers and conduct extensive
student programs under the direction of pro-
fessionally trained persons. A number of cam-
pus student organizations also address the reli-
gious needs of many students.

Theatre and Dramatics
The Iowa State University Theatre,
Department of Music, produces a season of at
least five major presentations each year. The
season’s bill endeavors to offer a variety of
theatrical fare, including a musical, well-known
dramatic literature and unusual and lesser-
known plays. Practical experience in all phases
of theatrical production is open to all interest-
ed, registered students within the university.
The season is partially subsidized by an alloca-
tion from the Government of the Student
Body; therefore, all students paying activity
fees may purchase tickets to a performance at
the reduced student price.
Other theatre-sponsored programs include stu-
dent-produced plays, readers theatre pro-
grams, Theta Alpha Phi (a national dramatics
honorary), the ISU Theatre Lab productions,
the Minority Theatre Workshop, and the ISU
Studio Theatre program.
Research Organizations

Research is an important activity at Iowa State University. Faculty members engage in research pursuits as well as teaching. Graduate students, and in some cases undergraduates, play an active part in this search for new knowledge.

Support for research at Iowa State University comes from state and federal appropriations as well as from contracts and grants involving the federal government and nonfederal organizations. As part of its total program, the university also operates extension services, special laboratories, centers, and institutes.

An abbreviated description of many of the various research organizations and their activities is presented here. Additional information concerning any of these organizations and student research opportunities they support may be obtained from their administrative offices.

Airworthiness Assurance Center of Excellence–Lisa Brasche, interim director. The purpose of this center is to develop advanced technologies that will be a key factor in maintaining the U.S. leadership role in aviation safety and global competitiveness in aviation systems.

Ames Center for Animal Health–James Roth, professor in charge. The purpose of the Ames Center for Animal Health (ACAH) is to further integrate and enhance animal health research and service activities at the animal health institutions in Ames to better serve the animal health needs of the state, the nation and the world. ACAH is a cooperative effort between Iowa State University, the USDA Agriculture Research Service (ARS), National Animal Disease Center (NADC), the USDA Animal and Plant Health Inspection Service (APHIS), National Veterinary Services Laboratories (NVSL), and the USDA APHIS Center for Veterinary Biologics (VБ). In April 1995, ISU and the USDA signed a Letter of Intent to work together to build the animal health infrastructure in Ames through the Ames Center for Animal Health. It includes the following five components: expansion and consolidation of APHIS activities in Ames; construction of a biosafety level 3 large animal biocontainment facility that would be shared by ISU, ARS, and APHIS; development of a collaborative training program; formation of a technology transfer program; and increased sharing of resources among animal health institutions located in Ames.

Ames Laboratory of the United States Department of Energy–Thomas J. Barton, director. The laboratory staff conducts basic and intermediate-range applied investigations that seek to discover new scientific knowledge, improve understanding of natural laws and phenomena, and develop relevant technologies pertinent to energy production, conversion, and transmission, as well as to other critically important national programs. The laboratory prepares scientists for work in the physical sciences, engineering, and energy-related fields through research appointments for Iowa State University graduate students and postdoctoral associates.

Analog and Mixed-Signal VLSI Design Center–William Black, director. The purpose of this center is to educate graduate students in the analog and mixed-signal VLSI field, to conduct research that will advance the state of the art in the field, to promote industrial interactions and codevelopment, to promote extended learning opportunities for off-campus students, and to provide substantive exposure to undergraduate students to analog and mixed-signal design issues.

Biotechnology Council–Walter R. Fehr, chair. The council, composed of faculty members engaged in biotechnology research from the colleges of Agriculture, Engineering, Family and Consumer Sciences, Liberal Arts and Sciences, and Veterinary Medicine, coordinates the university’s interdisciplinary biotechnology program. Council responsibilities include establishing and operating university-wide instrumentation facilities for molecular biology research, recommending allocations of biotechnology funds, and assisting in public education, technology transfer, and economic development activities.

Bridge Engineering Center–Terry Wipf, manager. Faculty and student researchers at the Bridge Engineering Center study the design, behavior, repair, and rehabilitation of highway and railroad bridges. They work closely with state and national transportation departments and offer short courses and seminars on bridge inspection and rehabilitation for engineering professionals.

Carrie Chapman Catt Center for Women & Politics–Dianne Bystrom, director. This center offers leadership development and educational opportunities to women and men of all ages who are interested in politics, public administration and policy, and public service; it fosters research on issues related to women and politics; sponsors conferences, workshops, and lectures on important national and international issues; and encourages women to pursue careers in politics, public administration, and public service.

Center for Academic Information Technology–Dorothy Lewis, interim director. Academic Information Technology provides academic computing and networking for the university. Instructional and research support ranges from microcomputing and local area networking to supercomputing and wide-area networking. The center’s research computing group is active in the development of advanced computing techniques and aids researchers in efficiently carrying out the computing needed for research projects. The center also provides support for SCHOLAR, the library’s on-line information system, and management services for Project Vincent, high-performance workstations networked via a high-speed campus backbone. In conjunction with off-campus network Project Vincent provides computation capabilities for supercomputing, visualization, and numeric computation. In the increasingly distributed academic computing environment, the center seeks to promote computing standards and to achieve commonality of operations and economies of scale where appropriate.

Center for Advanced Technology Development–Robert Harris, interim director. The Center for Advanced Technology Development (C ATD) is a research and business development organization for technology transfer. In this capacity it bridges the traditional gap between university basic research and industrial commercialization. The technical work performed by the center is predominantly applied research in the field of materials and related technologies. CATD broadly supports this type of research in other research and academic centers throughout the university.

Center for Agricultural and Rural Development–Bruce A. Babcock, director. The Center for Agricultural and Rural Development (CARD) is devoted to agricultural economic policy research, education and publication in both domestic and international arenas encompassing four broad areas: trade and agricultural policy, natural resources and conservation policy, food and nutrition policy, and rural and economic development policy.

Center for Building Energy Research–Michael Pete, director. The Center for Building Energy Research develops new technologies and improves existing ones to help reduce energy consumption while maintaining performance and productivity. In joint efforts with industry and government, center researchers develop refrigeration equipment that can allow for a rapid shift to new, efficient, and environmentally desirable refrigerant fluids. The center also provides opportunities for technical and continuing education for engineering students, practitioners, building operators, and others involved in building energy management.
Center for Crops Utilization Research—Lawrence A. Johnson, director. The center conducts basic research on crop properties and applied research directed at developing products and processes that will expand demand for food crops such as corn and soybeans, as well as demand for alternative crops. It also acts as a technology-distribution center for processors, export customers, and foreign scientists and visitors.

Center for Designer Crops—Basil Nikolau, interim director. The purpose of this center is to undertake fundamental research that allows the design of crops specifically suited to their end use. Such uses include improved human and animal nutrition, novel and environmentally friendly industrial feedstocks and production of medicinal chemicals.

Center for Designing Foods to Improve Nutrition—Diane Birt, director. The Center for Designing Foods to Improve Nutrition was established at Iowa State University to improve nutrition and health maintenance through a more integrated understanding of food selection and consumption; nutrient utilization; and food production, formulation, processing, and distribution. Research focuses on designing new foods; modifying food consumption; nutrient utilization; food safety; and policy alternatives and implications.

Center for Excellence in Science and Mathematics Education—Brian Hand, director. This center helps Iowa schools develop their science and mathematics programs.

Center for Family Policy—Jacques Lemperas, director. The purpose of this center is to address current and future policy issues, particularly focusing on infants, children, adolescents, adults and the elderly and their families and communities, whose quality of life is constrained by economic, social and/or developmental circumstances.

Center for Interfacial Materials and Crystallization—Glenn L. Schrader, manager. The Center for Interfacial Materials and Crystallization researches the chemical and physical phenomena that occur at interfaces—the thin films or layers at the boundaries between solids, liquids, and gases. The properties of these interfacial materials are crucial to the preparation and use of a wide array of industrially significant materials. Center researchers use advanced processing technology to develop new materials and then work with industrial partners to apply them to social and industrial needs.

Center for Nondestructive Evaluation—R. Bruce Thompson, director. The Center for Nondestructive Evaluation (CNDE) sponsors an interdisciplinary program that conducts fundamental and applied research leading to improved NDE technology. Research areas include ultrasonics, electromagnetic techniques, thermal wave imaging, microfocus x-ray techniques, artificial intelligence and expert systems with application to NDE measurements, signal processing routines, NDE of composites, NDE for material properties, and new instruments.

Center for Physical and Computational Mathematics—Bruce Harmon, interim director. This center develops new mathematical tools and researches the application of computers to special problems.

Center for Plant Genomics—Patrick Schnable, director. The purpose of this center is to conduct biological research and training at the frontiers of genomics and to develop advanced technologies for this work.

Center for Plant Responses to Environmental Stresses—Charlotte Bronson, interim director. The purpose of this center is to obtain fundamental information on the ways plants respond to environmental stresses and how they can be modified to tolerate those stresses.

Center for Plant Transformation and Gene Expression—Patrick Schnable, director. The purpose of this center is to develop more efficient methods for producing transgenic plants that will be safe for human health and the environment and to develop gene expression technologies to ensure that transgenes are stably expressed in the desired parts of plants and under the correct conditions.

Center for Portland Cement Concrete (PCC) Pavement Technology—Dale Harrington, director. This center advances the state-of-the-art of Portland Cement Concrete pavement technology (including design, materials science, construction and maintenance) to produce a durable cost-effective sustainable product.

Center for Sustainable Environmental Technologies—Robert C. Brown, director. This center develops and demonstrates renewable energy and chemical technologies and environmental technologies related to fossil fuels.

Center for Technology in Learning and Teaching—Jerry Willis, director. This center promotes, supports and facilitates research, development, use and evaluation of applications of technology which enhances learning and teaching.

Center for Transportation Research and Education—Stephen Andrle, director. This center draws faculty from several different disciplines to enhance education and research in computer security. Through its efforts, the center strives to help address the national concern for producing more information assurance professionals and for advancing the state-of-the-art.

Institute for International Cooperation in Animal Biologics—James Roth, executive director. In October 1995, the Iowa State University (ISU) of Science and Technology, the USDA Animal and Plant Health Inspection Service’s (APHIS), National Veterinary Services Laboratories (NVSL), and the USDA Agriculture Research Service’s (ARS), National Animal Disease Center (NADC) jointly formed the Institute for International Cooperation in Animal Biologics (IICAB). The overall goal of the IICAB is to improve the availability, safety, efficacy, and use of veterinary biologics (vaccines) throughout the world. The institute works with the veterinary biologics industry, government regulatory and research agencies, Department of Economic Development, and the United States Department of Agriculture.

Information Assurance Center—Doug Jacobson, director. This center draws faculty from several different disciplines to enhance education and research in computer security. Through its efforts, the center strives to help address the national concern for producing more information assurance professionals and for advancing the state-of-the-art.

Industrial Relations Center—Peter Orazem, director. The central focus of research is on the behavior of individuals and organizations in an employment and labor force relationship. It provides an interdisciplinary approach to related studies.

Information Management and Technology—J. Richard Caperton, director. The center provides support for GIS training for GIS software products. Software supported by the facility includes the ARC/INFO GIS software, ERDAS for image processing, and Oracle for relational database management.

Institute for International Cooperation in Animal Biologics—James Roth, executive director. In October 1995, the Iowa State University (ISU) of Science and Technology, the USDA Animal and Plant Health Inspection Service’s (APHIS), National Veterinary Services Laboratories (NVSL), and the USDA Agriculture Research Service’s (ARS), National Animal Disease Center (NADC) jointly formed the Institute for International Cooperation in Animal Biologics (IICAB). The overall goal of the IICAB is to improve the availability, safety, efficacy, and use of veterinary biologics (vaccines) throughout the world. The institute works with the veterinary biologics industry, government regulatory and research agencies, Department of Economic Development, and the United States Department of Agriculture.

Information Management and Technology—J. Richard Caperton, director. The center provides support for GIS training for GIS software products. Software supported by the facility includes the ARC/INFO GIS software, ERDAS for image processing, and Oracle for relational database management.

Industrial Relations Center—Peter Orazem, director. The central focus of research is on the behavior of individuals and organizations in an employment and labor force relationship. It provides an interdisciplinary approach to related studies.

Information Assurance Center—Doug Jacobson, director. This center draws faculty from several different disciplines to enhance education and research in computer security. Through its efforts, the center strives to help address the national concern for producing more information assurance professionals and for advancing the state-of-the-art.
universities, veterinarians, and producers in an effort to improve the availability and use of biologics for animals worldwide. The ICAB objectives are to serve as an internationally recognized body that works to build consensus on policy issues, and that works for the establishment of international standards in animal biologics, and in harmonization efforts; to coordinate assistance for countries in receiving and/or manufacturing veterinary biologics to meet specific needs; to serve as an international resource center that conducts impartial testing, and assists in the development and supply of reagents and technology transfer; to implement cooperative research programs involving government, university and industry scientists to conduct basic research; and to develop new technologies for targeted diseases in specific regions of the world.

Institute for Physical Research and Technology-Thomas J. Barton, director. The institute consists of a federation of basic and applied research entities (primarily U.S. government and industrially funded). The coordination and unified planning provided by the institute result in a significant enhancement of the overall effectiveness of the enterprise and facilitate the achievement of the specific goals and objectives of its components. The laboratories and centers of the institute represent a major consortium for the pursuit of vital educational, research, technology transfer, and technology development thrusts of the university, state, and nation.

Institute for Social and Behavioral Research-Ron Simons, director. Research and educational efforts in the Institute for Social and Behavioral Research are directed toward improving the quality of life in Iowa’s communities. The center improves cooperative efforts among universities, hospitals, businesses, and other state and community agencies in promoting rural health by expanding the knowledge base to develop and deliver innovative health promotion and care technologies; improves accessibility to health services; enhances the use of limited health care resources; and provides collaborative research and educational programming opportunities in the area of rural health.

International Institute of Theoretical and Applied Physics-Alan Goldman, interim director. The purpose of this institute is to empower scientists of developing countries to carry out research and teaching in their own countries and thereby to help strengthen the science and technology infrastructure of their regions; and to foster collaborations between U.S. scientists and their colleagues throughout the world.

Iowa Energy Center-Floyd Barwig, director. The State of Iowa created the center in 1990 to support efforts to increase energy efficiency in all areas of Iowa energy use. The center is administered by Iowa State University, with input from an advisory council representing Iowa educational institutions, utilities, and state agencies. Competitive grants are awarded by the center to nonprofit organizations in Iowa, including universities. Research and demonstration projects supported by center grants focus on energy efficiency, assessment of energy-related technology, development of alternative energy systems based on renewable sources, and educational programs encouraging energy efficiency. Conferences and workshops are also supported through center grants.

Iowa Space Grant Consortium-William J. Byrd, director. The Iowa Space Grant Consortium (ISGC) is part of the NASA National Space Grant College and Fellowship Program, authorized by Congress in 1987 to promote interest in aerospace and related scientific, mathematics and technology fields. The ISGC was formed in 1990 by ISU, the University of Iowa and the University of Northern Iowa and now includes Drake University and affiliates from government, industry and non-profit organizations. The base program at ISU is the Spacecraft Systems and Operations Laboratory. Through this lab, many student activities are supported including senior design projects and the High Altitude Balloon Experiments in Technology project which launches weather balloons to develop technology and techniques for all levels of educational development.

Iowa State University Industrial Assessment Center-Greg Maxwell, project director. This center provides energy audits to small and medium-sized manufacturing companies and recommends ways to reduce their energy consumption and become more profitable. ISU teams that include both professional researchers and students visit the site, collect data, conduct analyses, and write reports for each company.

Laurence H. Baker Center for Bioinformatics and Biological Statistics-Hal Stern, interim director. The purpose of this center is to develop advanced methods, algorithms and programs for acquiring massive amounts of genetic data on thousands of individual plants, analyzing the data and providing the analysis back to plant scientists all over the world for further interpretation and use in their studies.

Leopold Center for Sustainable Agriculture-Fred Kirschenmann, director. Named for conservationist Aldo Leopold, the center was established to conduct research on the environmental and social impacts of farming practices and to help develop and demonstrate profitable farming systems that preserve the productivity and quality of natural resources and the environment.

Materials Preparation Center-Lawrence Jones, director. The purpose of this center is to support basic research and provide to researchers worldwide materials unavailable from domestic suppliers.

Meat Export Research Center-Joe Cordray, contact person. The Meat Export Research Center (MERC) conducts research to develop a stronger agricultural economy through increased exports of U.S. meats and meat products. Research areas include trade policy, cultural preferences in potential export markets, and development of meat products and processing technologies. MERC is a technology-distribution center for meat processors, export customers, and foreign scientists and visitors.

Microanalytical Instrumentation Center-Marc Porter, director. This center addresses challenges presented by environments hostile to conventional analytical instrumentation and/or alien to experience.

Microelectronics Research Center-Vikram Dalal, interim director. The Microelectronics Research Center conducts mission-oriented basic and applied research on electronic materials, devices, and applications. The center works closely with academic departments to promote and support graduate education in electronic sciences.

Midwest Agribusiness Trade Research and Information Center-Bruce A. Babcock, executive director. This center is one of several international trade development centers established by the USDA. It was founded in 1987 as a joint effort of ISU and the Greater Des Moines Chamber of Commerce to link the research capabilities of the university with the needs of agribusiness in Iowa and surrounding states. The center is working to enhance trade in agricultural products produced by small-to-medium-sized businesses in the Midwest.

NASA Food Technology Commercial Space Center-Anthony L. Pometto III, director. The NASA Food Technology Commercial Space Center (FTCSC) is leading a national effort to develop foods and food-processing technologies that enhance space missions and advance commercial food products for terrestrial use. As a commercial space center, NASA FTCSC develops partnerships with companies to meet the challenges of developing food systems for space exploration and habitation through cooperative efforts with NASA scientists and technologists and academic researchers.

National Soil Tilth Laboratory-Jerry L. Hatfield, director. The laboratory is a federal research facility administered by the Agricultural Research Service, U.S. Department of Agriculture, at Iowa State University. Activities involve research on the fundamentals and management of soil tilth to solve national problems such as maintaining water quality, enhancing soil quality, controlling soil erosion, improving air quality and developing a profitable, sustainable agriculture. The laboratory has a scientific staff from the areas of agronomy, soils, physics, chemistry, microbiology, agricultural engineering, and micrometeorology.
North Central Regional Aquaculture Center—Joseph E. Morris, associate director. This center is administered jointly by Michigan State University and Iowa State University. It is one of five regional centers established to develop collaborative interstate research and cooperative extension programs for commercial aquaculture—the culture or husbandry of aquatic organisms under controlled conditions.

North Central Regional Center for Rural Development—Cornelia B. Flora, professor in charge. The center is supported by the land-grant universities of the North Central Region and the U.S. Department of Agriculture. The major purpose of the center is to conduct a multidisciplinary research and extension program addressed to improving the social and economic opportunities of both farm and non-farm people of rural America.

North Central Regional Plant Introduction Station—Candice Gardner, research leader. One of four regional centers, the station is a joint venture among the USDA Agricultural Research Service, agriculture experiment stations of the 12 north-central states, and the Iowa Agriculture and Home Economics Experiment Station. The station’s three main areas of activity are: (1) conservation to accomplish long-term viability of the germplasm collections, (2) to conduct research to characterize and evaluate the collections, and (3) to serve as a distribution center for plant scientists around the world.

Nutritional Sciences Council—Donald Beitz, chair. The Nutritional Sciences Council consists of faculty members and qualified collaborators who are engaged in research, extension, or teaching in the nutritional sciences and closely related disciplines. The council develops symposia on topics of international interest, sponsors an interdepartmental seminar, “Modern Views of Nutrition,” and arranges short courses designed to fill specific needs in the total nutrition program.

Plant Sciences Institute—Stephen Howell, director. This institute administers and coordinates a cluster of nine centers focused in specific areas of the plant sciences. Researchers are seeking fundamental knowledge about the functioning of plants. They are developing ways to help feed the growing world population, strengthen human health and nutrition, improve crop quality and yield, foster environmental sustainability and expand the uses of plants for biobased products and bioenergy.

Raymond F. Baker Center for Plant Breeding—Arnel Hallauer, director. The purpose of this center is to further enhance the plant breeding research programs in corn, forages, soybeans, popcorn, small grains and potential new crops while educating high-quality graduate students and postdoctoral fellows for employment in both the public and private sectors.

Seed Science Center—Manjit K. Misra, director. The purpose of this center is to serve as a focus for research, teaching and outreach and international programs on seeds including the scholarly study of seeds, seed services, publications, training of seed specialists and scientists and extending of the information to growers, conditioners and sellers of this commodity.

Statistical Laboratory—Dean L. Isaacson, director. This research and service institute conducts research in statistical theory and methodology. It promotes and fosters the use of sound statistical methods in university research through on-campus consulting. Similar consulting aid, research cooperation, and services are extended to off-campus groups, other colleges and universities, and government agencies when such activities are of mutual benefit or otherwise in the public interest.

Veterinary Diagnostic Laboratory—Gary D. Osweiler, director. The laboratory provides a research, teaching, and service facility to which the veterinary medical profession may bring animal health problems for counsel and diagnostic assistance. Disciplines utilized are pathology, bacteriology, virology, serology, chemistry, racing chemistry, molecular diagnostics and toxicology. A graduate residency program for pathology, microbiology, and toxicology is active.

Virtual Reality Applications Center—James E. Bernard, director. The mission of the Virtual Reality Applications Center (VRAC) is to develop ways to improve manufacturing productivity and support Iowa manufacturers through technology transfer. VRAC emphasizes visualization techniques.

Water Resources Research Institute—Rameesh Kanwar, director. The institute coordinates and administers an interdisciplinary program in water resources research. It administers the research funds received from the U.S. Department of the Interior, as made available through the Water Resources Research Act of 1983, and from the State of Iowa. Funds received from private, state, and federal sources are allocated for research in all aspects of water resources, and are directed primarily at solving state, regional, and national water problems. Technology transfer and information dissemination are additional elements of the program.

College Research Institutes

Agriculture and Home Economics Experiment Station—Richard Ross, director. The Experiment Station supports research in the biological, physical, and social sciences to contribute to the advancement of the agricultural industry and to improve the economic and social conditions of families and communities. Scientists in about 30 departments across campus work in campus laboratories, at 12 outlying research farms, and in the fields and business places of cooperators throughout the state. The station’s work is organized into two dimensions—academic departments and research centers. The research centers focus on problems that require an interdisciplinary research effort.

Business Research Institute—Benjamin J. Allen, director. A component of the College of Business’s mission is to create and disseminate knowledge and to offer innovative programs to prepare managers and leaders for a technologically oriented world. The BRI plays an important role in carrying out this mission. Through the institute, support is provided for applied research by college faculty and graduate students, resulting in the advancement of new knowledge for the business world. A concerted effort is made to encourage research within each of the college’s departments.

Engineering Research Institute—James L. Melsa, director. The institute coordinates staff research in areas involving all engineering academic departments and maintains major laboratories and technical service groups to support the various research programs. Funds are derived from state appropriations and from industrial and government grants or contracts. Activity is directed toward graduate instruction, basic research, and applied research.

Family and Consumer Sciences Research Institute—Mary Winter, associate dean. The focus of the institute is to improve the quality of life for individuals and families through basic and applied research. Graduate education, support of college research facilities, and staff support comprise the bulk of the remaining activities.

Institute for Design Research and Outreach—Mark C. Engelbrecht, director. The institute coordinates and facilitates research, artistic and creative design efforts of faculty and graduate students of the College of Design. It also coordinates the integrated outreach efforts of the college by providing a linkage between design extension and the research and instructional efforts of the college. The institute maintains the Design Simulation Laboratory, the Design GIS Laboratory, and the Architecture Technology Laboratory.

Research Institute for Studies in Education (RISE)—Walter Gmelch, director. RISE provides leadership for and participates in research and contract and grant activities conducted by faculty, staff, and students of the College of Education. RISE promotes and conducts research that is consistent with and related to the mission of the College of Education and Iowa State University of Science and Technology. RISE emphasizes efforts to secure external funding for research and development activities related to the mission of the college and the university. The institute provides linkage with other units on and off campus and facilitates collaborative research activities through financial and personnel support. To support its mission, RISE is organized administratively into two primary components: research, and contracts and grants.

Veterinary Medical Research Institute—Harley Moon, professor in charge. The institute is multidisciplinary with a responsibility to conduct research and offer research training in animal diseases. Research and research training are conducted in the areas of viral, bacterial and parasitic diseases, immunology and basic biology.
University Extension

ISU Extension builds partnerships and provides research-based learning opportunities to improve quality of life in Iowa. Extension is the institution-wide mechanism through which ISU shares its research and educational capacities, and through which these programs are informed of the priorities and interests of Iowans.

ISU Extension also is part of a national network, including the U.S. Department of Agriculture, 104 land-grant institutions, and 3,150 county programs. ISU Extension has offices and staff in every Iowa county. These offices provide Iowans easy access to ISU and a local presence for the University. ISU Extension also partners with Iowa community colleges, the other Regents universities, and the private colleges and universities, providing an array of inter-institutional technical assistance, training and education programs. ISU Extension serves Iowans and other clients in six program areas—Agriculture and Natural Resources, Business and Industry, Communities, Families, 4-H Youth Development, and Extended and Continuing Education. A description of the units follows.

Extension to Agriculture and Natural Resources

Agricultural programs serve primarily producers and agricultural support service industries statewide through education and service. Agricultural programs lead to increased profitability through enhanced management and marketing in an environmentally and socially acceptable system.

Extension to Business and Industry

Extension programs that assist business and industry firms are provided statewide through several cooperating organizations, including the College of Business, the College of Engineering, the Iowa Manufacturing Extension Partnership (IMEP), and the Center for Industrial Research and Service (CIRAS). Educational services are provided to contractors, consultants, manufacturers, the food service industry, and utilities to help maintain and increase profitability. IMEP provides consulting services to small and medium-sized manufacturers throughout the state.

Extension to Communities

ISU Extension to Communities helps organizations and local governments develop and build their capacity to make Iowa communities better places to live and work. The aim is to help Iowa communities analyze and understand their needs, identify alternative courses of action, make informed decisions, plan for the future, and evaluate their efforts.

Extension to Families

The Extension to Families unit provides education for families on: aging, child care, consumer decisions, family financial management, family relationships, housing choices, nutrition and health, parent education, and public policy affecting families.

Extension to 4-H Youth Development

This unit helps youth become self-directing and contributing members of society. 4-H youth programs teach through experiential learning, use prevention and early intervention approaches, and promote a sense of closeness between every youth and at least one significant adult. Subject matter is built on the knowledge base of ISU and other land-grant universities.

Extended and Continuing Education

As part of ISU Extension, the Extended and Continuing Education program supports ISU faculty and staff in developing and delivering off-campus credit programs and noncredit conferences and seminars to meet the lifelong learning needs of more than 270,000 adults each year. These distance education programs are offered via the Iowa Communications Network (ICN), the World Wide Web, and through videotapes shipped directly to students. Extended and Continuing Education is working with the ISU colleges and extension field staff to explore the possibilities for expanding the use of existing degree programs and adding new distance education opportunities.
The Academic Advising Program

Iowa State University’s academic advisers are dedicated to enhancing each student’s academic and career aspirations.

Each student is assigned an adviser when he or she arrives on campus, usually a faculty member or professional adviser in the student’s academic department. If a major has not yet been declared, a member of the college faculty or staff will be assigned as adviser. The adviser can serve as a primary resource for the wide variety of university support services available to Iowa State University students, but it is the student’s responsibility to ask for assistance.

Advisers assist in the development of an academic program that meets students’ career objectives as well as curriculum requirements. Advisers can help students achieve their academic objectives by advising them about course requirements, recommended electives, and procedures for registration and schedule changes. It is the student’s responsibility, however, to be knowledgeable about Iowa State policies and procedures and the graduation requirements for his or her individual program and to ensure that these requirements are met. Advisers will help students to get the most out of their educational experience.

In most departments, students may change advisers. A student who wants to change advisers should first obtain the agreement of another member of the department to become their adviser and then request permission from the department. Students who for any reason are unable to obtain the services of an adviser, should ask their department or college office to assign them to an adviser.

Learning Communities

Learning communities are a university-wide initiative that provide new students with an opportunity to connect with peers who have similar academic goals. Advantages include seeing familiar faces in classes, making a smooth transition from high school to college by developing academic and social networks, developing links between in-class and out-of-class learning opportunities, communicating with instructors, and reducing scheduling conflicts by registering for a block of classes.

Students are offered the opportunity to join learning communities during freshman summer orientation. Learning community students take specific courses together, work with mentors (including faculty, staff and students), create their own study groups and, in some cases, live on the same residence hall floor. Students are encouraged to make their requests for learning communities early because space is limited. For information on ISU learning community opportunities, see www.iastate.edu/~learncomunity/

ISU AccessPlus Information System

AccessPlus is a confidential, campus information system that is available via the World Wide Web or from various kiosks around campus. A social security number and university PIN are required to view personal information. Students can use AccessPlus to register for classes; view and verify information such as current term schedules, meeting rooms, and instructor information; and view their academic record including their latest term grades, their financial aid status, and their current university bill. The system allows a student to review other personal information such as academic adviser assignment and date of graduation. Students may print information from AccessPlus on the kiosks or computer labs for a nominal charge. Information about and access to AccessPlus may be found at www.iastate.edu/~registrar/info/access.html.

Registration and Advising

Registration is a process by which students become officially enrolled in classes for a given term. Students who attend classes must complete registration and pay their assessed fees. Registration is not complete until all fees are paid, including board and room fees for those living in residence halls.

The registration process starts with an advising period, which begins three days prior to the first day of registration. Advisers provide important information to students that allow them to register for classes.

Dates for advising and registration are included in the University Calendar, the ISU Directory, the Schedule of Classes, and the Iowa State Daily. The dates also are posted on departmental bulletin boards and the World Wide Web at the URL www.iastate.edu/~registrar/calendar/. Continuing students will register for the following semester the middle of the current term. For example, registration for spring term begins the middle of the previous fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester. The registration period lasts four weeks.

Responsibilities

The registration process includes advising, enrollment in courses, and schedule changes. This process involves the student, the student’s adviser, and the student services staff of the student’s college, and in some cases, the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

The student is responsible for the following: knowing university policies and procedures that apply to registration and schedule changes, and for carrying out those procedures; the accuracy of their schedule, including schedule adjustments (i.e., adds, drops, section changes); knowing the degree requirements of his or her major and/or curriculum; planning course schedules to meet those requirements; and monitoring the accuracy of the advisement/degree audit.

The adviser is responsible for the following: consulting with advisees during the advising/registration period; providing information about student’s major and curriculum requirements; providing guidance in the student’s course selection; assisting the student in monitoring the advisement/degree audit for accuracy; and for notifying the college student services office with corrections to the advisement/degree audit.

The college student services staff is responsible for the following: assisting new and reentering students with the registration process; resolving unusual scheduling problems; and solving problems or updating the advisement/degree audit.

The dean is responsible for the following: making decisions with respect to requests for deviations from university policies, deadlines, etc. (Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.)

Registration Process

To register for classes, students need the following materials and information:

1. Registration Worksheet (provides registration instructions, and a place to list course reference numbers). Students should use this form to plan their schedule before meeting with their adviser.
2. A RAN (registration access number) from their adviser; and PIN (personal identification number) for Web registration on AccessPlus.
3. Course information from the World Wide Web or the Courses and Programs Bulletin, available for a fee from campus bookstores.
4. Schedule of Classes available from the World Wide Web at www.iastate.edu/~catalog, the Parks Library reserve desk, departmental and college offices, and for purchase at campus bookstores.
5. Other departmental information applicable to their curriculum, available from their adviser.

The following outlines the steps in the advising and registration process:

1. Students meet with their adviser, who will provide the following:
   a. advisement/degree audit
   b. guidance in course selection
   c. signature for the Registration Worksheet
   d. Registration Authorization Card.
If the Registration Authorization Card is not available from the adviser, students may present a picture I.D. and Registration Worksheet with their adviser’s signature to the Registrar’s Student Scheduling Office, 10 Alumni Hall. A duplicate authorization form will be prepared.

2. Choose specific sections of each course. Students are responsible for choosing their course sections. In most cases advisers will not be involved in selecting meeting times.

3. Review Registration Authorization Card for the following:
   a. assigned date and time to register
   b. registration access number (printed on the Registration Access Card, a tear-off section of the authorization card)
   c. registration holds (prevents registration)
   d. the date and the address used to mail their class schedule

4. Register for courses using either the Web or Touch-tone Registration systems. Instructions for registration through the systems are printed on the Registration Worksheet and in the Schedule of Classes bulletin.

Students are assigned a registration start date and time, which is the first day and time they can use the registration system. In general, registration start dates are assigned according to each student’s projected year in school based on the sum of total credits earned and current term credits. Dates are available on the Web at www.iastate.edu/registrar/registration. Students may choose to delay their registration until a later date, but courses will begin to fill on the first day of registration and any delay may reduce their course selection.

All students are encouraged to register for courses through either the Web or Touch-tone Registration systems. However, students who are unable to use either system may register in person by processing their signed Registration Worksheet in the Registrar’s Student Scheduling Office, 10 Alumni Hall.

Web or Touch-tone Registration systems. In order to access the Web or Touch-tone Registration systems, students must use their student I.D. number in combination with the registration access number printed on their authorization card. (The Web registration system also requires a personal identification number (PIN) to use AccessPlus.) Students are held accountable for all changes made to their schedules. To ensure the security of their schedule, students should memorize or record their registration access number in a secure location and destroy the Registration Access Card portion of their authorization form. If necessary, students may present their signed Registration Worksheet and picture I.D. to the Registrar’s Student Scheduling Office, 10 Alumni Hall to change their registration access number or to get their current number.

As students register for classes through the Web or Touch-tone registration systems, messages after each entry indicate whether each request has been processed. As requests are processed, students should note changes on their Registration Worksheet.

Students may review their schedules through a “list” action on the Touch-tone Registration system; or on AccessPlus, from www.adp.iastate.edu/accessplus.html; and on the kiosks at several locations on campus.

Schedule Changes. Students who need to add courses or make other schedule changes may process their requests through the Web or Touch-tone Registration systems. The last day for schedule changes through either system is the fifth day of classes.

Student schedules are printed and mailed approximately one month before classes begin. Students who process schedule changes after this date should note the changes on their printed schedules.

Replacement copies of the student data verification and schedule form are available for a fee. Classroom locations not listed on the printed schedules can be obtained by requesting a “list” action on the touch-tone system or by accessing the online Schedule of Classes at www.adp.iastate.edu/cgi-bin/class.

All changes processed before the first day of classes will be reflected on beginning class lists for instructors.

Registration holds. Students with holds on their registration will not have access to registration until the holds have been released. Those who attempt to register before the holds have been released will receive a message indicating which offices have placed holds on their registration.

Credit limits. For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer session, the limit is 12 credits for undergraduates and 10 credits for graduate students. Add requests beyond a student’s credit limit will be denied. A student must drop credits before they may add another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a change in their credit limit by contacting their adviser. Advisers should notify the student’s college student services office if the credit limit needs to be changed.

Restricted courses/sections. Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during June orientation. A department may waive a restriction for a student who has extenuating circumstances. The student must obtain the authorization from the department on a Schedule Change/Restriction Waiver form. The form is processed in the Registrar’s Student Scheduling Office, 10 Alumni Hall.

Permission Required courses/sections. To register for these sections, students must obtain authorization on a Schedule Change/Restriction Waiver form and process the approved form in the Registrar’s Student Scheduling Office, 10 Alumni Hall.

Canceled courses/sections. In some cases, courses or sections may be canceled due to low enrollment or departmental staffing considerations. If students are registered for a canceled course or section, they will be notified by the Office of the Registrar, the department, and/or on their printed schedule.

Registration for disabled students. Disabled students who need assistance with any phase of registration should contact the Registrar’s Student Scheduling Office, 10 Alumni Hall.

Student Data Verification Form (SDVF). The SDVF includes the registration schedule, student information, and registration receipt and is mailed approximately one month before classes begin. It is the student’s responsibility to review this information and contact the Office of the Registrar with changes or corrections.

Fee Payment
The Receivables Office bills students for tuition, room and board, and various other university charges. A fee statement is mailed on the first of each month to each student’s in-session or interim address. Students also may view their account status on AccessPlus (www.adp.iastate.edu/accessplus.html) and on the kiosks at several locations on campus. It is the student’s responsibility to ensure that the Office of the Registrar has a correct billing address. A student who does not receive a billing statement before the term begins should go to the Receivables Office to learn the amount of the account balance due. Failure to receive a billing statement will not exempt students from late penalties or from having a hold placed on their registration. Also see Index, Fees and Expenses.

Additional Registration Regulations
A late registration fee is charged beginning on the first day of classes for fall and spring terms to initiate a registration. (This fee is not charged for the summer term.) If registration is not completed by the end of the fifth day of classes, students must obtain written permission from their advisers, the instructors for the courses they plan to take, as well as approval from the dean of the college in which they are registered. During the summer session, these approvals must be obtained in order to register after the third day of classes.

Registration is closed after the tenth day of classes for fall and spring semesters, and after the fifth day of classes for summer session.

Students may not enroll in courses with time conflicts without the approval of the departments concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during the term when the experience is taking place, whether or not they are taking courses on campus during that time.

Students may obtain academic credit for an activity, either on or off campus, for which they are also paid, provided the activity is academically relevant. In order for an activity to be defined as academically relevant, prior arrangements must be made with a faculty member in an appropriate department and must include agreement on (1) the academic objectives, which the activity is expected to achieve, and (2) the procedure by which the student’s learning will be assessed. This policy does not apply to registrations for R (required) credit.
Validating Enrollment
To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails both to attend and to obtain prior approval of the instructor. However, those students are not automatically dropped from the course; they must drop the course or they will receive an F grade.

Making Schedule Changes
Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date on which the change is entered into the registration system. Schedule change periods are as follows:

**Period 1**
ends on the fifth day of classes of the semester. Schedule changes during period 1 are free and do not require adviser signatures. Instructor or departmental approval may be required for adds or section changes in some courses during period 1. Course drops during this period do not count toward a student’s ISU course drop limit, and will not appear on a student’s grade slip or permanent record. Schedule changes during period 1 may be processed through the Web or Touch-tone Registration Systems or by presenting a Schedule Change/Restriction Waiver form to the Registrar’s Student Scheduling Office, 10 Alumni Hall.

**Period 2**
ends the third Friday of classes after the day midterm grades are due. During this period, schedule changes require signatures of adviser and instructor and are processed on a Schedule Change/Restriction Waiver form. A $5 fee per visit is assessed for adds, drops, and section changes during this period. Course drops after period 1 count toward a student’s ISU drop limit and appear as an X on the grade slip and permanent record. A course section change replaces the section on the schedule and therefore does not require a drop.

Drop Limit
Students are limited in the number of courses they may drop during their academic career. (This refers to drops processed after the fifth day of classes of each semester.) Students who entered Iowa State as freshmen are allowed to drop a maximum of five courses during their undergraduate career. If they entered at a level above freshman classification or in the College of Veterinary Medicine, they are allowed to drop a maximum of four courses. Courses dropped during their first term at Iowa State are not included in this limit, nor does the summer count as a first term for this purpose. Students who enroll at Iowa State University as undergraduates after receiving a bachelor’s degree are permitted two drops.

Exceptions may be made for courses that must be dropped for reasons beyond the student’s control. These exceptions are granted only by the dean or other authorized person on the dean’s behalf in the student’s college. The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not exceeding their limit. Students who attempt to drop a course beyond the limit without special permission of the dean of the student’s college will continue to be enrolled in the course and will receive a grade at the end of the term.

Course Prerequisites
A prerequisite indicates the specific academic background or general academic maturity considered necessary for the student to be eligible to undertake the course. Since an instructor has the prerogative to direct a student who lacks a stated prerequisite to drop the course, students are advised not to enroll in a course for which they lack a stated prerequisite without checking first with the course instructor. Permission of the instructor is understood to be an alternate to the stated prerequisites in all courses.

It is university policy that the instructor shall inform the students at the beginning of each course if students who have not met the prerequisite requirements must drop the course.

Course prerequisites are presented in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cancellation/Withdrawal
Students who decide not to attend classes before the date class work begins must cancel their registration to avoid tuition and fees assessment. Students who decide not to attend classes beginning the first day of class must withdraw from the university.

Registration Cancellation
A cancellation is processed when a student notifies the Office of the Registrar prior to the day class work begins, of their decision not to attend classes for the current semester. All courses are removed and no tuition and fees are assessed.

Students may cancel their registration by contacting the Office of the Registrar at 210 Alumni Hall, 515-294-1889. Students who call should request the name of the person taking the call and make a record of the name as well as the time and date called. A confirmation letter will be sent to the student after the cancellation is processed.

Withdrawal
A withdrawal is processed beginning the first day of classes when a student notifies their academic adviser and College of their decision not to continue attending courses for a semester. Per the student’s request, the “Request for Withdrawal” form is initiated and submitted by the College to the Office of the Registrar. The student is withdrawn from all courses based on the withdrawal date on the form, and tuition and fees are prorated, if appropriate.

Student-Initiated Withdrawal
Students who find it necessary to leave the university before the end of a term, should follow the procedures described in this section. Otherwise, students’ records may be adversely affected and reentry or transfer to another institution may be difficult.

Students who are considering withdrawal from the university should immediately consult their academic adviser, who may be able to provide guidance for more advantageous alternatives.

A request for withdrawal during period 3, (i.e., after the last day to drop a course without extenuating circumstances) will not be approved except for circumstances that are beyond the student’s control. The dean of the student’s college must approve such requests. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Students should not expect to withdraw during or after the final examination week. In a situation beyond a student’s control, when examinations cannot be completed, arrangements should be made for incompletes rather than withdrawal during final exam week. Students who are on temporary enrollment and withdraw during period 3 will not be permitted to enroll the following term, except under extenuating circumstances.

Procedures
To withdraw from the university, students must do the following:

1. Complete a Request for Withdrawal form, with adviser’s signature.
2. Request the approval and obtain the signature of the college in which they are enrolled. (If the request is approved, the withdrawal form will be forwarded to the Office of the Registrar where it will be recorded; the information is sent to the appropriate offices.)

The effective date of the withdrawal is the date on which it is approved by the college dean. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

If students complete the withdrawal procedure, the courses they are taking will not be included on their permanent record nor will they be counted as part of their drop allowance. Half semester courses completed prior to withdrawal will be included on their permanent record. Incompletes will not be accepted for withdrawals.
Withdrawal procedures must be followed otherwise instructors of the courses involved will assign whatever grades or marks they consider appropriate. Since these grades may be Fs, students are warned that failure to follow the prescribed withdrawal procedures may adversely affect a later application for reentry or transfer to another institution.

**University-Initiated Withdrawal**

In addition to the above procedures, exceptional circumstances may arise in which the university may initiate the withdrawal of a student, including the following:

1. **Extreme medical situations where the student is hospitalized and/or otherwise unable to implement the withdrawal process.** The academic adviser or the office of the college dean usually initiates the withdrawal.

2. **Behavioral situations where it is determined that the student should not remain at the university due to behavior that demonstrates that the student is a clear and present danger to self or others.** In these circumstances, it is the duty of the university to take responsible action for the good of the student and/or others in the university community.

Justification for university-initiated withdrawal of a student for behavioral reasons is determined by the dean of students, director of the Student Counseling Service, the director of the Student Health Center (or their designated agents) and appropriate academic representative, in consultation with the student, if possible. These persons may receive and/or solicit information, professional evaluation, etc., concerning the student’s status. In the event that they concur that the student should leave the university, the student (and, in appropriate situations, next of kin) is to be informed in writing of the decision with recommendations concerning treatment or therapy, and the conditions required for consideration for readmission. This letter will be sent by the dean of students, who will also coordinate the review by the same panel.

When the decision has been made to withdraw a student, the student’s adviser will be notified and requested to process the withdrawal form. The Dean of Students Office will place a “hold” on the student’s records to prevent registration until a readmission decision has been reached by the behavioral review team.

**Tuition and Fees Adjustments for Withdrawals**

Tuition and fees adjustments are made for withdrawals according to the following schedule for full term courses (appropriate adjustments will be made when partial term courses are involved):

<table>
<thead>
<tr>
<th>Withdrawal Date</th>
<th>Student Pays</th>
</tr>
</thead>
<tbody>
<tr>
<td>Days 1-8</td>
<td>10%</td>
</tr>
<tr>
<td>Days 9-20</td>
<td>50%</td>
</tr>
<tr>
<td>Days 21-40</td>
<td>75%</td>
</tr>
<tr>
<td>After 40th class day</td>
<td>100%</td>
</tr>
</tbody>
</table>

Students may appeal a tuition and fees assessment for withdrawal by obtaining a “Procedures for Appealing Assessed Tuition” form from the fees section in the Office of the Registrar. The Office of the Registrar will review appeals for possible tuition and fees adjustment for the semester in question only after the written appeal and appropriate support documentation are received from the student. Determinations will be made by the Office of the Registrar based on extenuating circumstances beyond the control of the student. The results will be sent to the student in writing.

Students may appeal the decision of the Office of the Registrar by writing an appeal letter to the Tuition Appeals Review Committee. This letter should be submitted to the Office of the Registrar within 10 calendar days after receiving the original decision. A final appeal of the Tuition Appeals Review Committee decision can be made by submitting a request in writing to the Office of the Provost.

**Room and Board Fee Refund**

Refund of the unused portion of the contract is based on the daily rate of the remaining room and board fee. If fees have been paid, a refund will be authorized. If fees have not been paid, a charge will be made for the used portion of the contract. A refund is not authorized for any student leaving the residence halls after December 1 in fall semester or May 1 in spring semester.

Any student living off campus who has contracted for the meal plan to eat in a residence hall dining room and later terminates the contract will be refunded as above.

**Returning/Reentry to the University**

A student who has been absent from Iowa State University less than 12 months may be admitted as a returning student. If more than 12 months have elapsed, a student must apply for reentry to the University.

**Returning Students**

American undergraduate and nondegree undergraduate students planning to return to Iowa State University after an absence of less than 12 months do not complete a reentry form; however, international undergraduate and nondegree undergraduate students planning to return to Iowa State University after an absence of less than 12 months must complete a reentry form.

Returning students who want to change their curricula should follow the same procedure as in-school students. Students who were dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college that initiated the drop. (See below for policies that apply to requests for reinstatement.)

**Reentry Students**

Undergraduate and non-degree undergraduate (special) students who plan to attend Iowa State University after an absence of twelve months or more must complete a reentry form. Forms are available for download from the World Wide Web at the following URL: www.iastate.edu/~registrar/info/reentry.html

Students with a bachelor’s degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as non-degree [special] students and who now seek to earn an undergraduate degree should request an undergraduate application.

International students should contact the Office of Admissions, 100 Alumni Hall (direct 515-294-5836 or toll-free 1-800-262-3810) for reentry instructions. Financial certification of ability to cover all educational and living expenses will be required.

The reentry form should be completed and returned to the Office of the Registrar in advance of the term of reentry. Students who have attended another college or university since enrollment at Iowa State University must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Alumni Hall. Reentering students must also contact their departmental office/adviser to prepare a class schedule. Reentry must be approved prior to registration.

Iowa State University requests the information on the reentry form for the purpose of making a reentry decision. If the required information is not provided, the university may not consider the request to reenter.

**Reentry Approval Process**

Generally, a request to reenter Iowa State University will be approved within the Office of the Registrar. However, the Office of the Registrar will refer the reentry form to the college to which a student plans to return if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00 or has a last term average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average.

Students who have been dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college into which they plan to return. The following policies apply:

1. Students may not be reinstated until at least one term has elapsed since they were academically dismissed. The summer session is not considered as one term out of school.
2. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters have elapsed since their last academically dismissial.
3. Students who have been dismissed by a college and subsequently reinstated by another college cannot transfer back unless the Academic Standards Committee of the original college grants permission. This procedure must be followed regardless of the student’s current academic standing.
4. Students must submit a petition to the Academic Standards Committee of the college in which they plan to enroll at least 45 days before the beginning of the term. The petition should not be to the college that dismissed the student. (Students who have been dropped twice and want to return in the College of Liberal Arts and Sciences must submit their petition at least 70 days before the beginning of the term.)

5. Reinstated students will return on temporary enrollment status.

**Academic Renewal Policy**

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations. See Index, Academic Renewal Policy.

**Academic Regulations**

**Class Attendance**

Students are expected to attend all class meetings as scheduled. Each instructor sets their policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course. See Index, Validation of Enrollment for regulations concerning attendance to validate students’ enrollment in a class.

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course.

**Veteran Attendance**

Students receiving benefits from the Veterans Administration are identified on class lists and are required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available on the Web, www.iastate.edu/~registrar/info/vabenfit.html

**Field Trips**

Trips away from campus are sometimes arranged as a means of enriching the students’ learning experience in a given course. Such trips may not take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday through Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

In order to go on a field trip, students must first obtain permission from the instructors whose classes they will miss. If permission to miss class is not granted, students cannot be required to go on the field trip nor can they be penalized for missing the trip.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes.

**Ownership of Course-related Presentations**

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell the notes or recordings must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Student Disciplinary Regulations.

**Recording and Transmission of Classes**

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom notetaking, and giving the instructor feedback on his or her classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to request permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases the recordings may be preserved and used for other classes as well.

**Credit Involving a Paid Activity**

Students may obtain credit for an activity either on- or off-campus, for which they are also paid, provided the activity is academically relevant. In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department. The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student’s learning will be assessed. This policy does not apply to registrations for R credit.

**Academic Dishonesty**

Academic dishonesty occurs when a student uses or attempts to use unauthorized information in the taking of an exam; or submits as his or her own work, themes, reports, drawings, laboratory notes, computer programs, or other products prepared by another person; knowingly assists another student in such acts or plagiarism. Such behavior is abhorrent to the university, and students found guilty of academic dishonesty face suspension, conduct probation, or reprimand. Instances of academic dishonesty ultimately affect all students and the entire university community by degrading the value of diplomas when some are obtained dishonestly, and by lowering the grades of students working honestly.

Examples of specific acts of academic dishonesty include but are not limited to:

- Obtaining unauthorized information. Information is obtained dishonestly, for example, by copying graded homework assignments from another student, by working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, or by looking at one’s notes or other written work during an examination when not specifically permitted to do so.

- Tendering of information. Students may not give or sell their work to another person who plans to submit it as his or her own. This includes giving their work to another student to be copied, giving someone answers to exam questions during the exam, taking an exam and discussing its contents with students who will be taking the same exam, or giving or selling a term paper to another student.

- Misrepresentation. Students misrepresent their work by handing in the work of someone else. The following are examples: purchasing a paper from a term paper service; reproducing another person’s work (even with modifications) and submitting it as their own; having another student do their computer program; or having someone else take their exam.

- Bribery. Offering money or any item or service to a faculty member or any other person to gain academic advantage for oneself or another is dishonest.

- Plagiarism. Unacknowledged use of the information, ideas, or phrasing of other writers is an offense comparable with theft and fraud, and it is so recognized by the copyright and patent laws. Literary offenses of this kind are known as plagiarism.

One is guilty of plagiarism when: the exact words of another writer are used without using quotation marks and indicating the source of the words; the words of another are summarized or paraphrased without giving the credit that is due; the ideas from another writer are borrowed without properly documenting their source.

Acknowledging the sources of borrowed material is a simple, straightforward procedure that will strengthen the paper and assure the integrity of the writer. The English 104-105 Student Manual provides guidelines to aid students in documenting material borrowed from other sources, as does almost every handbook in writing style.

Academic dishonesty is considered to be a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found guilty of academic dishonesty is therefore subject to appropriate academic penalty, to be determined by the instructor of the course, as well as to penalty under the university student conduct regulations.

If an instructor believes that a student has behaved dishonestly in a course, these steps are to be followed:

1. The instructor should confront the student with the charge of dishonesty and arrange a meeting with the student to discuss the charge and to hear the student’s explanation.

2. If the student admits guilt, the instructor shall inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade. Because academic dishonesty is also a student conduct violation, the instructor must report the incident in writing to the dean of students. The latter, or his/her designee, will meet with the student
and, depending on the severity of the offense as well as on the student’s past conduct record, may schedule a hearing before the All-University Judiciary Committee. This hearing, conducted according to the procedures outlined in the Student Information Handbook, is to determine the disciplinary action to be taken. In any case, the student’s academic adviser will be informed of the incident but may not insert any record of it in the student’s academic file.

3. If the student claims to be innocent of the charge, the instructor may not assign the student a grade for the work in question until the question of guilt is resolved, unless circumstances require that an interim grade be assigned. The instructor shall consult with his or her department chair and report the incident in writing to the dean of students. The latter will schedule a hearing before the All-University Judiciary Committee, to be conducted according to the procedures outlined in the Student Information Handbook. Both the student and instructor will be invited to attend the hearing and present pertinent information. If the student concurs, his or her academic adviser will be informed of the charge. If the Judiciary Committee finds the student guilty of the charge, the instructor will inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade. The Judiciary Committee will determine the appropriate disciplinary action with respect to the student conduct violation. If the Judiciary Committee finds the student not guilty, the instructor will grade the student accordingly on the work in question and the student’s grade in the course will not be adversely affected. If the student is found guilty, the student’s adviser will be informed of the decision but shall not insert any record of the action in the student’s academic file.

4. If a student either admits dishonest behavior or is found guilty of academic dishonesty by the All-University Judiciary Committee, the committee may impose any of the following sanctions:

Disciplinary Reprimand—An official written notice to the student that his/her conduct is in violation of university rules and regulations.

Conduct Probation—A more severe sanction than a disciplinary reprimand, to include a period of review and observation during which the student must demonstrate the ability to comply with university rules, regulations, and other requirements stipulated for the probation period.

Suspension Deferred—The suspension is deferred subject to a definite or indefinite period of observation and review. If a student is found guilty of further violation of the University Code of Conduct or an order of a judiciary body, suspension will take place immediately.

Defined Length—The student is dropped from the university for a specific length of time. This suspension cannot be for less than the remainder of the semester in progress or for the next full semester.

Indefinite—The student is dropped from the university indefinitely. To be reinstated the student must appear at a hearing conducted by the All-University Judiciary Committee, which makes the reinstatement decision. Reinstatement may be contingent upon meeting written requirements specified by the All-University Judiciary Committee at the time of the reinstatement hearing.

5. A student accused of cheating has the option to stay in the class or to drop the class if the drop is made within the approved time periods and according to the regulations established by the university. If the student chooses to drop the class the student will be required to sign a statement of understanding that if the student is later found guilty of cheating, then the student will receive an “F” for the course.

6. Procedures for appeal of either the All-University Judiciary Committee’s conduct decision or the instructor’s grade are outlined in the Student Information Handbook.

7. In instances in which the student admits guilt or is judged to be guilty by the Judiciary Committee, a staff member of the Dean of Students Office will counsel with the student in an effort to deter any further such incidents.

8. Student records concerning academic dishonesty are maintained in the Dean of Students Office for a period of 7 years, after which the file records are purged. These student records are confidential; nothing from them appears on a student’s academic transcript.

9. In the event that an instructor is uncertain how to handle an incident of suspected academic dishonesty, the dean of students is available at any time to provide advice and assistance to the instructor in deciding a proper course of action to be taken.

10. Students enrolled in the College of Veterinary Medicine are bound by an honor code. A charge of academic dishonesty may be made by a student or instructor to the Interclass Honor Board chairperson according to the procedures outlined in the Honor Code, or the instructor may follow the procedures outlined above. The Interclass Honor Board functions as the judiciary of the College of Veterinary Medicine for all allegations presented to it.

Other violations related to academic misconduct may include subsection 4.1.11 Misuse of Computers and subsection 4.2.20 Unauthorized Sale of Others’ Intellectual Works. These subsections are located in the Iowa State University Student Disciplinary Regulations under section 4 of the Conduct Code.

Progressing Toward a Degree

Classification

An indication that a student is making progress toward a degree is the change in classification. Classification is determined by the number of credits completed and reported to the registrar prior to the beginning of the term; and is based on credit hours earned, not merely hours attempted. The grades F and NP and the marks I and X do not count in this classification system.

Classification in all colleges except Veterinary Medicine is as follows:

Sophomore: 30 credit hours earned
Junior classification: 60 credit hours earned
Senior classification: 90 credit hours earned

Students who have a bachelor’s degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, may be classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special student. Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as a special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. Credits applied toward a degree will be determined by the student’s college based on relevance to the student’s program requirements as well as the level of performance deemed necessary for successful progress in that program. Courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student’s Iowa State cumulative grade point average.

A student who is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point
average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student has a transfer quality-point deficiency. This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any deficiency at time of entrance.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain it will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning transfer credits applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average. For information on applying to the program see Index, Regent Universities Student Exchange Program.

**Degree Planning**

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. Each college has a procedure to determine whether a student will fulfill all degree requirements for graduation.

At each fall and spring registration, students receive an advisement/degree audit printout. This printout shows in a degree program format those courses that have been completed and those courses in which the student is currently enrolled. Also shown are the graduation requirements that have not been completed.

Students should use the information on this printout to help them select courses for the next term and to evaluate their progress toward their degree. Graduation evaluators in the Office of the Registrar use a similar printout during the term a student will graduate to evaluate a student’s graduation status.

For information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their adviser.

**Two Bachelor’s Degrees**

Students may receive two bachelor’s degrees if the requirements for each major (curriculum) are met and the total number of semester credits earned is at least 30 more than the requirements of the curriculum requiring the greater number of credits. The same rule applies to degrees that are not awarded at the same time. Students should have an academic adviser in each major (curriculum), with one adviser being designated as the registration adviser. Students should request approval to pursue two degrees by completing the form Request for Double Major/Curriculum or Two Degrees. This form is available from advisers and classification offices. Each adviser will receive grade reports and schedule information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor’s Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.

**Double Major/Curriculum**

A double major is a program for a single degree in which all requirements for two or more majors (curricula) have been met. The majors (curricula) may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors (curricula) that are completed at the same time.

To declare a double major (curriculum), students should complete the form, “Request for a Double Major/Curriculum or Two Degrees.” This form, available from advisers and classification offices, should be completed no later than the beginning of the senior year. One major (curriculum) should be designated as primary and the other secondary for purposes of record keeping, but the student’s rights and responsibilities are the same in both majors. The adviser of the primary major will serve as the student’s registration adviser, but both advisers will receive grade reports and schedule information. Degree programs must be approved for each major (curriculum) by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

In addition to their engineering degree, students in the College of Engineering may earn majors in other colleges of the university. A major must meet all requirements of the offering department or program and its college and contain a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each major area of study. Within the College of Engineering, only double degrees are permitted.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. curriculum in the College of Liberal Arts and Sciences do not have majors.

**Second Major (Curriculum) Completed after the Bachelor’s Degree**

After receiving a bachelor’s degree, a person may wish to complete all requirements for another major (curriculum). Approval of the department of the second major (curriculum) is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major/curriculum by the department and by the dean’s office.

**Changing Curriculum or Major**

A student’s freedom to change their major, and the procedure that should be followed, depend on the student’s academic standing as well as on policies of individual colleges as approved by the provost.

1. If students are not on temporary enrollment and have never been dismissed and reinstated, they may change their major by consulting first with their adviser. (If, however, they have been on temporary enrollment in the past, they may also be subject to regulation 4, below.) Beyond that, they should follow these procedures:
   a. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
   b. If the change involves majors in different colleges, they should obtain a Change of Curriculum/Major form and their file from their adviser, present these materials to the classification office of their present college, then to the classification office of the college to which they are transferring, and finally to the office of their new major.

2. Students on temporary enrollment must first obtain permission to enter the new major. Permission comes from the dean of the college responsible for that major in consultation with the department head. If permission is granted, students should then follow the procedures described above. If they are on temporary enrollment and want to transfer to another college in the university, they must do so before the last day to drop a course in period 2 (see Index, Making Schedule Changes).

3. Students who have been reinstated may not transfer to another college during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

4. Students who transferred from one college to another while on temporary enrollment, may not transfer back unless they have the permission of the academic standards committee of the college from which they originally transferred.

**Declaring a Minor**

Many departments and programs in the university specify requirements for an undergraduate minor. A record of requirements completed appears on students’ transcripts. All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above.
taken at Iowa State. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. For additional information regarding policies which govern minors, see Index, Minor. To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

Graduation
Seniors must file a graduation application with the Graduation Office, 10A Alumni Hall, by the Friday of the first week of classes for students who plan to graduate in fall and spring semesters, and the last day of spring semester for students who plan to graduate in summer. Applications may be obtained from the adviser; college office; for download from www.~registrar/forms; the Student Answer Center, on the ground floor of Beardshall; or the Graduation Office, 10A Alumni Hall. Students will be notified by mail approximately four weeks after the semester begins of their graduation status.

Individual college ceremonies take place at the end of fall and spring semesters. The formal commencement ceremony for graduation students takes place on the Friday at the end of the semester, and the undergraduate ceremony takes place on Saturday. A combined undergraduate and graduate college commencement ceremony takes place at the end of the summer term.

Final grade checks will be made approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates.

In order to graduate, students must be certain:
1. Registration for the term has been completed and the date of graduation is correct on their advisement/degree audit printout.
2. They will have earned sufficient credits, acceptable toward graduation, to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have been certified by their major department as having achieved an adequate level of proficiency in written communication.
4. They have attained a cumulative grade point average of at least 2.00 in all work taken at Iowa State and have also met any special grade point averages required by their college, department, or program in specified groups of courses.
   a. If they were admitted from another college or university with a quality-point deficiency, they must have earned sufficient quality points above a 2.00 at Iowa State to offset the deficiency with which they entered.
   b. If they have taken work at another college or university prior to or after having been a student at Iowa State, they must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against them. Failure to submit such a transcript is grounds for dismissal.
5. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.
6. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior written permission of their major department.) Iowa State University must receive a transcript of all transfer work by midterm of the term of graduation.
7. They have paid all outstanding financial obligations they owe the university. If they owe an outstanding obligation to the university, a hold will be placed on their records and they will not receive their diploma or transcript. If students have questions about this policy, they should contact the graduation section of the Office of the Registrar, 10A Alumni Hall.

Evaluation of Academic Progress

Evaluation Procedures
It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records
Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file test and grade records with their college office before departure.

Examinations
Examinations are one of the major means by which an instructor assesses students' performance in a course. In order that examinations can be a useful part of the educational process, the following policies have been instituted:
1. One purpose of examinations is to help students' learning activity. Therefore, examinations shall be evaluated as soon as possible after they are given and the results shall be made available to the students.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may request permission to administer a separately scheduled examination if all of the following criteria are met: (a) the course is multi-sectioned; (b) a common departmentally developed examination will be administered to all students in all sections at the same time; and (c) the test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted. Students who are unable to take a separately scheduled examination at the scheduled time because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor; the instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.
3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a period normally of two hours scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
   a. Final exams in courses of two or more credits may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week. The instructor shall change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
   b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.
   c. The final exam for a class that regularly meets in the evening must be held at the time the class would normally meet during the final exam week. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
   d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.
   e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.
   f. All faculty members are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.
   g. Dead Week. The last week of classes has been designated Dead Week by the Government of the Student Body. The intent
is to provide students with time for review and preparation for final examinations. Therefore, no activities sponsored by student organizations under the jurisdiction of GSB may be held during that week. For academic programs, however, the last week of classes is considered to be a normal week in the semester. Instructors are reminded that most students are enrolled in several courses each semester and their workloads often increase as final examination week approaches. Instructors are encouraged to give major assignments and examinations prior to the last week of classes so students can budget their time better for final examination preparation.

**The Grading System**

Grades represent the permanent official record of a student’s academic performance. The grading system at Iowa State operates according to the following regulations:

1. **Student performance or status is recorded by the grades and marks described below.** A student’s grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor’s degree.

**P**—Passing mark obtained under the Pass-Not Pass system. See Index, Pass-Not Pass.

**NP**—Non-passing mark obtained under the Pass-Not Pass system. See Index, Pass-Not Pass.

**S**—Satisfactory completion of a course offered on a Satisfactory-Fail grading basis. May also be reported to indicate satisfactory performance in R (non-credit) courses, and in courses numbered 290, 490, 590, and 690.

**T**—Satisfactory performance (equivalent to a grade of C or better in courses numbered 100-499, and a grade of B or better in courses numbered 500-699) in a special examination for academic credit.

**X**—The course was officially dropped by the student after the first week of the term.

**N**—No report was submitted by the instructor. This is not a recognized grade or mark; it merely indicates the instructor has not submitted a grade and that a grade report has been requested.

**I**—Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student’s control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.

The student and instructor must complete and sign an incomplete contract (Incomplete Mark Report form) that states the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year. The instructor then enters an I on the final grade report, attaches the form to the report, and submits both to the registrar.

If the student is not available at the end of the term to sign the Incomplete Mark Report form because of ill health or other reasons, the instructor may assign an incomplete mark and submit the form without the student’s signature. The Office of the Registrar will record the incomplete mark and mail a copy of the form to the student. If the student chooses not to accept the incomplete, the student has until midterm of the following semester to contact his or her instructor and request a grade be submitted to the registrar. If the student has not contacted the instructor by midterm, the student must resolve the incomplete according to the conditions set forth in the Incomplete Mark Report form.

When a student completes the requirements specified on the Incomplete Mark Report form, the instructor submits the appropriate grade, which becomes part of the student's cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

A final course grade, once submitted to the registrar, may not be changed to anIncomplete except to correct an error at the request of the registrar and with the approval of the instructor’s department head and the dean of the instructor’s college. The instructor should send a card (Grade Report to the Registrar) reporting the change, and an Incomplete Mark Report form to the appropriate dean who will forward them to the registrar if the change is approved.

Incomplete in all courses must be resolved by the middle of the student's term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to an F after one calendar year (whether or not the student was enrolled during the period).

2. To change a grade or mark already reported to the registrar, the instructor submits a change card (Grade Report to the Registrar). This card is used for replacing an I with a grade, for correcting an instructor error, or for the late report of a grade.

3. **Midterm Grades.** The registrar will transmit notification of C-, D, and F midterm grades and incorrect registrations to advisers, and will also attempt to notify students of midterm grades and incorrect registration. In addition to returning the midterm list, the instructor is responsible for informing the class of the basis on which midterm grades have been submitted.

4. Grades in all courses attempted remain on each student’s record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

5. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average. If a course is repeated, the cumulative grade point average is calculated according to the process described in item 6a below.

6. **Repeating Courses.**

a. The most recent grade for a course a student repeats will be used in computing the student’s cumulative grade point average rather than the previous grade(s), up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student’s record.

b. Students may repeat any course for which an F grade or any passing grade except P or S was received, but they may not elect to repeat the course under the Pass-Not Pass system.

c. Beyond 15 credits of repeats, both grades will be included in computing the cumulative grade point average.

d. Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in number of credits. Approval to repeat a course after more than three semesters has elapsed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student’s adviser, and then taken to the Office of the Registrar. This form must also be used in cases in which the course number or number of credits has changed.

Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the University Calendar.

e. Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a designated repeat form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.

f. A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.

7. Students who want to protest a grade submitted by an instructor should follow the procedures described in the section on Appeal of Academic Grievances.

**Academic Progress**

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and
minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate. Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional requirements that are not lower than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if they should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval. The college committees are responsible for actions involving individual students with respect to placing students on temporary enrollment, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed. For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in the administrative office of their college.

The university’s academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on temporary enrollment or dismiss a student from enrollment in the university when, in the college committee’s judgment, the student’s academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules.

Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student’s ISU cumulative grade point average, are subject to Iowa State University’s academic standards.

Temporary Enrollment Status and Academic Dismissal

Students are placed on temporary enrollment status as a warning that their academic progress is not satisfactory and that they must improve their academic performance to avoid dismissal from the university. Students who are placed on temporary enrollment should immediately seek assistance in academic improvement from such sources as academic advisers, instructors, the Student Counseling Service, and the University Tutoring Office.

Students may be admitted to Iowa State University on temporary enrollment or may subsequently be placed on temporary enrollment as a result of unsatisfactory academic performance. Students on temporary enrollment status who do not meet the minimum requirements described below will be dismissed from enrollment in the university.

Decisions regarding temporary enrollment and academic dismissal are based on the student’s cumulative quality-point deficiency. The number of deficient quality-points is determined by subtracting the total number of ISU quality-points from twice the number of ISU credits attempted. If a student enters Iowa State University with a quality-point deficiency, this deficiency will be added to any deficiency accumulated at Iowa State University to determine the cumulative quality-point deficiency. Example: A student has attempted 65 credit hours of coursework, and has a cumulative grade-point average of 1.80. The student currently has earned 117 quality points (i.e., 65 credit hours x 1.80 grade point average). Thus, the student currently is deficient by 13 quality points (i.e., 130–117).

Assume the student must remove this 13 quality-point deficiency over the next 30 credit hours. The student would need to earn 73 quality points (i.e., 30 credit hours x 2.00 quality points = 60 quality points) in order to not add to the deficiency. Thus, a grade-point average of 2.44 (i.e., 73 quality points/30 credit hours) for the next 30 credit hours is needed to remove the deficiency.

Students who are placed, or continued, on temporary enrollment at the end of the spring semester may enroll for the summer term without being placed in jeopardy of academic dismissal from the university at the end of that summer term. However, the cumulative quality-point deficiency at the end of the summer term will be used for temporary enrollment decisions. This is true for all students enrolled in the summer term. Students considered for academic dismissal at the end of spring semester will be permitted to enroll for the summer term. The cumulative quality-point deficiency at the end of the summer term will be used to determine whether the student should be permitted to continue. The individual colleges determine if students reinstated for the spring semester will be permitted to utilize the summer term option. (Reinstated students should also see the section on Reinstatement.)

1. Students with fewer than 90 credits attempted or earned, * whichever is greater, will be placed on temporary enrollment at the end of any semester or summer term when their cumulative quality-point deficiency equals 10 or more quality points. At the end of any term in which a student is on temporary enrollment, the student will be:
   a. dismissed from enrollment in the university if the cumulative quality-point deficiency has increased;
   b. continued on temporary enrollment if the cumulative quality-point deficiency has not increased but remains greater than zero;
   c. removed from temporary enrollment if the cumulative quality-point deficiency has been removed.

2. Students with 90 or more credits attempted or earned, * whichever is greater, will be placed on temporary enrollment at the end of any semester or summer term when they have any quality-point deficiency. At the end of the term in which a student is on temporary enrollment, the student will be:
   a. dismissed from enrollment in the university if the cumulative quality-point deficiency has increased;
   b. continued on temporary enrollment if the cumulative quality-point deficiency has not increased but remains greater than zero;
   c. removed from temporary enrollment if the cumulative quality-point deficiency has been removed.

3. A student on temporary enrollment may transfer to another college within the university only with the permission of the department executive officer (DEO) of the new department and dean of the new college. Transfer during period 3 (after the last day to drop a course) may be approved by the DEO of the new department and dean of the new college only under exceptional circumstances. The student will be subject to any additional specific academic requirements determined by the academic standards committee of the college to which the transfer is made.

4. A student who has transferred from a college while on temporary enrollment cannot transfer back unless permission is granted by the academic standards committee of the original college.

5. A student on temporary enrollment who withdraws during period 3 will not be permitted to enroll the following term, except under extenuating circumstances as judged by the college academic standards committee.

Additional Academic Progress Regulations

1. Colleges, departments, or programs may have special grade point requirements for admission, continuation, or graduation. These are presented in connection with statements of college and department curriculum requirements.

2. Engineering: In addition to the requirements listed above, students enrolled in the College of Engineering with 60 or more credits attempted or earned, * whichever is greater, will be placed on temporary enrollment at the end of any semester when they earn less than a 2.0 grade point average for that semester. Students placed on temporary enrollment under provisions of this requirement will be dismissed from enrollment in the university if they fail to achieve, for the following semester, at least a 2.00 semester grade point average.

Summer term grades will be combined with the student’s grades for the prior term completed to form a single semester grade point average to be used for temporary enrollment and academic dismissal decisions. Credit hours and quality points will be combined for the purpose of obtaining the average. When courses are repeated, both grades will be used in this computation.

Students considered for academic dismissal at the end of a spring semester under provisions of the preceding paragraphs will be permitted to enroll for the following summer session.

3. Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.
4. Special students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

Reinstatement
The procedures delineated in this section apply to students who were dismissed from Iowa State for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. A student who has been dismissed for academic reasons should contact the Dean’s Office in the college he or she wishes to enter for instructions specific to that college. The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. The student must identify the causes of her or his poor academic performance, and demonstrate that he or she has taken actions to avoid or eliminate these causes. The student must submit a plan for academic success.

2. A student can only be reinstated when at least one academic semester has elapsed since she or he was academically dismissed. The summer session is not a semester for the purpose of being out of school one semester.

3. A student who has been dismissed from enrollment two or more times is not eligible for reinstatement until at least two academic semesters have elapsed since his or her last academic dismissal.

4. A student who was dismissed by one college and subsequently reinstated by another college cannot transfer back unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student’s current academic standing.

5. To be considered for reinstatement to the university, a student must file a reentry form and submit a petition to the Academic Standards Committee of the college in which she or he desires to enroll at least 45 days before the beginning of the semester. (A student dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit his or her petition 70 days before the beginning of the semester.)

6. As conditions of reinstatement, a student will reenter on temporary enrollment, and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Some examples may include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling. Other conditions may also be imposed.

Student Appeal
1. Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee’s action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

2. If the student is dissatisfied with the committee’s action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days. The dean must respond in writing within seven calendar days of receipt of the appeal.

3. If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Removal of Unmet High School Requirements
In some instances, students are admitted to Iowa State University and permitted to enroll with a limited number of unmet high school requirements. Any unmet high school requirement must be removed within one year (12 months) of enrollment at Iowa State University. The following procedures apply.

1. Students may remove their unmet requirements by satisfactorily completing the necessary ISU courses. Courses taken to remove deficiencies will be used in the student’s degree program as they normally would be used.

2. Students may also take coursework at another institution to remove their unmet requirements. However, students will be informed that evidence of satisfactory completion of the courses must be available to ISU officials by a specified deadline.

3. Students are required to remove their unmet requirements within one year of their enrollment at ISU, even though they may withdraw or drop out of school during the first year. The College of Liberal Arts and Sciences allows students until the end of their third year to remove unmet Foreign Language requirements.

4. The college Academic Standards Committee determines whether a student should be granted an extension due to extenuating circumstances.

5. Students will be permitted to register for each succeeding term at ISU during the year they are trying to remove unmet requirements. If the unmet requirements are not removed by the end of that year, the student’s registration will be canceled and a hold placed on their record.

Academic Renewal Policy
Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:
   a. Students must not have enrolled at Iowa State University for five or more consecutive years.
   b. Students must not have graduated from Iowa State University.
   c. Students must currently be in good academic standing. (If the student was previously dismissed, he or she must be reinstated.)

2. Conditions. Academic renewal is based on the following conditions:
   a. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine courses from multiple terms to comprise the semester(s) or quarter(s) dropped. Degree requirements met during the dropped terms will ordinarily have to be repeated.
   b. Renewal may be applied only to academic terms completed prior to the students’ extended absence.
   c. All courses and grades for the chosen terms will remain on the students’ academic record.
   d. Designated repeats, drops and P/NP options will be reinstated for the terms dropped.
   e. Students who have used all of their drop options will be given one extra drop.
   f. Students may be granted only one academic renewal.

To be eligible for a degree, students must complete a minimum of 24 credit hours at Iowa State after the granting of academic renewal.

3. Procedures.
   a. Students should discuss their desire to pursue academic renewal with an adviser in the college they wish to enter.
   b. Students should submit a petition for academic renewal to the Office of the Registrar. Students may obtain a petition from their college office.
Satisfactory Academic Progress for Financial Aid Recipients

In order to remain eligible to receive financial aid from the student aid programs listed below, a student must meet both quantitative and qualitative academic standards as described within this policy. These standards are minimum expectations; specific aid programs may require a higher level of progress. A student not in compliance will be unable to receive aid from these programs until the deficiency has been corrected. Progress toward a degree will be reviewed each term and enforced at intervals no longer than one year. The programs affected by this policy are:

- Pell Grant
- Robert C. Byrd Scholarship Supplemental Educational Opportunity Grant (SEOG)
- Iowa State University Grant
- College Work-Study Program (CWSP)
- Perkins Loan
- Health Professions Student Loan (HPSL)
- Federal Direct Subsidized Loan
- Federal Direct Unsubsidized Loan
- Federal Direct PLUS Loan
- ISU Partnership Loan
- University Long-Term Loan

1. All students must meet the quality standard for continued enrollment in order to remain eligible to receive financial aid. See Index, Academic Progress, Quality Standard.

2. The quantity standard for full-time undergraduate students is described below:
   a. Duration of eligibility. Students may receive federal and institutional aid for a maximum of six academic years or twelve semesters. Students who have not accumulated sufficient credit hours at the end of this time period to complete their course of study will not be eligible to continue to receive financial aid.
   b. Annual credit hours to be earned. An undergraduate student who receives financial aid from one or more of the programs cited above must complete credit at a rate at least equal to the scale below, where the numbers in the top row indicate academic years completed, and those in the bottom row indicate credit hours required:

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>15</th>
<th>30</th>
<th>51</th>
<th>72</th>
<th>96</th>
<th>120</th>
</tr>
</thead>
</table>

3. The quantity standard for all part-time students:
   a. The duration of eligibility for part-time students is the same as above, but adjusted by the rate of attendance. For example, a student with a maximum duration of six years who is attending school half-time would have the duration of eligibility adjusted to twelve years.
   b. Part-time students who are otherwise eligible for financial aid must maintain the academic standards or rate of completion as stated above, adjusted by the number of hours attempted at the time the financial aid was disbursed. 9 to 11 credit hours = 3/4 time 6 to 8 credit hours = 1/2 time

4. Regaining eligibility. If a student is denied financial aid because of failure to comply with the above standards, the additionally required credit must be earned at the student’s own expense at Iowa State University, or the student must transfer sufficient hours taken at another institution to make up the deficiency.

5. Transfer students. A student transferring to Iowa State University for the first time will be treated as a first-term student and will not be held responsible for previous terms or credit hours taken at former institutions. If a student attends Iowa State University, transfers to another institution, and then transfers back to Iowa State, the credits earned at the other institution will be added to the student’s total earned credit hours.

6. Noncredit courses. Noncredit courses may be converted to credit hours by translating weekly contact hours as defined by the Office of the Registrar.

7. The programs affected by this policy are:

- University Long-Term Loan
- ISU Partnership Loan
- Federal Direct Subsidized Loan
- Federal Direct Unsubsidized Loan
- Federal Direct PLUS Loan
- Health Professions Student Loan (HPSL)

These academic progress criteria are defined in minimal terms. If the student earns only the minimum credit hours for financial aid eligibility, the student’s total eligibility for particular programs may be exhausted prior to degree completion. (See Duration of Eligibility and Credit Hour Earning Scale.) In addition, the student’s college or department may require more credit hours than required by this policy.

Sources of Help with Academic Problems

If students are having trouble in a course, the following persons and places may be able to provide help:

1. The instructor of the course may be able to help the student determine the problem with the course and recommend methods for improvements.
2. The student’s adviser may be able to recommend support services or remedial strategies.
3. The office of the department that offers the course may have a list of persons qualified to provide tutoring services for the course. The locations of the department offices are listed in the front of the ISU Directory.
4. The Student Counseling Service provides professional counseling services for students with problems which affect academic performance. Tutoring may be arranged through Tutoring Services in the Dean of Students Office.

Scholastic Recognition

The university recognizes those students who are doing exceptionally well in several ways.

1. Dean’s List. Each semester the university issues a dean’s list made up of those students who have carried at least 12 hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-hour requirement. No dean’s list is issued for summer school.

2. Annual Recognition Ceremony. In the spring the university sponsors a ceremony at which high scholarship students in all classes are recognized.

3. Graduation with Distinction.

Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are graduated “with distinction” provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate. Of these 60 credits, 50 graded credits are required. This recognition appears on the student’s permanent record and diploma, and in the commencement program. Recognition for students graduating in veterinary medicine is based only on the courses graded while enrolled in that college. Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have achieved a cumulative grade point average of 3.50 or higher for all ISU credits; (b) have achieved a cumulative grade point average of 3.50 or higher for all other credits taken at the other Iowa Regent universities; and (c) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation.
Academic Privileges and Opportunities

A. Credit by Examination

Academic credit may be earned by means of special examinations. The Credit by Examination (CBE) program is available to current Iowa State students as well as prospective and entering students. Students with college-level proficiency in particular areas are encouraged to take credit by examination early in their college careers. For more information, see Index, Credit by Examination.

B. Pass-Not Pass Grading

Students who want to broaden their education at Iowa State may choose to take a maximum of 9 semester credit hours on a Pass-Not Pass basis. The purpose of P-NP grading is to encourage students to take courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who have earned at least 40 semester credits and who are not on temporary enrollment at the beginning of the semester are eligible. A special student must obtain approval from their academic adviser and college dean.

2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.

3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.

4. Courses offered on a satisfactory-fail basis may not be taken P-NP.

5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser’s signature in the P-NP approval section of the form.

6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.

7. Changes to or from a P-NP basis must be made before the last day to drop (usually the Friday of week 10 of the term). The change from P-NP to a graded basis is made after the first 10 class days of a semester (first five days of summer session), the course will count toward the total P-NP credits allowed.

8. Registration on a P-NP basis is not indicated on the instructor’s class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.

9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating GPA.

10. Students who pass a course taken under the P-NP system may not repeat the course. When students have taken a course and received a grade, they may not repeat it for P-NP credit.

11. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.

12. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student’s degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student’s degree program.

C. Auditing

To audit a course means to enroll in the course without receiving credit for it. The instructor must approve all audits and students must register for audits by day 10 of the semester. Students are assessed fees as though they were taking the course for credit, but the course does not count in determining full-time student status. Changing a course from credit to audit requires dropping the course for credit and adding it as an audit on a schedule change request form. If this occurs after day 5 of the semester, the drop will count toward the total allowable ISU drops.

Requests to audit a course will be honored only if there is space available in the course after the four-week touch-tone registration period has ended. Once enrolled in a course, auditors have the same rights and privileges as any student taking the course for credit. Their names appear on the class list with a notation that they are auditing. To change the status of an audited course to a graded course, students must process the schedule change request form by day 5 of the semester. Audited courses do not appear on the student’s permanent record except by special request from the student and the student’s adviser with evidence showing that the student was actively involved in the course. Audited courses do not apply toward V.A. benefits.

An agreement to audit a 500 or 600 level course must be negotiated between the student and the course instructor. An audited course counts for only one credit in the graduate student’s allowable course load; however, fees will be assessed for the full number of credits for the course.

D. Independent Study

Most departments offer opportunities for independent study through a 490 course listing. Usually a minimum of 6 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department’s prerequisites to register for 490. 490H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 490. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student’s work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work he or she will do for that credit, and the system by which she or he will be graded (A-F or S/F). Students should not expect to register for or add 490 credit without an instructor’s permission. Some colleges and/or departments have limits on the number of credits of 490 that may be applied toward graduation.

Appeal of Academic Grievances

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an appeal more than one year following completion of the course, and may not initiate the appeal of a course grade beyond mid-term of the semester following her or his completion of the course.

Prior to initiating a formal appeal, a student may wish to discuss the situation informally with a staff member of the Dean of Students Office, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the individual instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, a student should discuss the grievance with the instructor’s department chair and submit it in writing to him or her. The department chair will discuss the grievance with the instructor involved and/or refer it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance. If resolution of the grievance cannot be made with the department chair, the student may appeal in writing to the dean of the instructor’s college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair’s decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor’s college.) The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward a written appeal to the provost, who will convene a quorum of the Committee to Review Student Grievances (see below) to hear the appeal within ten class days of receipt of the written notice of the appeal. Within five class days following the hearing, the provost will make a decision in regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the i
nstructor. An appeal of the provost’s decision may be made to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Government of the Student Body. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute the quorum for a grievance hearing.

Information Disclosure
Iowa State University is required by law to make available to enrolled students, prospective students, and their parents certain information about the University. The information disclosure is available at the following URL: www.iastate.edu/disclosure. Students without electronic access can obtain the information from the Office of the Registrar, 214 Alumni Hall, 515-294-1840 or from the Office of Admissions, 100 Alumni Hall, 515-294-5836. A paper copy of the information will be provided upon request.

Student Records
Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

Public Information
Certain information concerning students is considered to be open to the public upon inquiry. This public information is of two types: directory information and other information not included in the ISU Directory. Directory information includes local address, telephone number, and electronic mail address; home town, college, curriculum, year in school, and enrollment status. Other public information includes mailing address, date and place of birth, dates of attendance at Iowa State, expected date of graduation, names of advisers, awards and academic honors, Iowa State degree(s) and date(s) awarded, previous educational institutions attended, degrees received, dates of attendance, full- or part-time status, participation in officially recognized activities and sports, and weight and height of members of athletic teams.

Public information will be released by the registrar to anyone upon inquiry, unless students have requested that their information not be released. A request to have public information withheld should be made at the Office of the Registrar, 214 Alumni Hall. If the request is granted, the registrar will notify the appropriate university offices.

It is the policy of the university to respect the privacy of students; therefore, only lists and labels containing names of students with directory information will be made available to members of the public. This directory information will be provided on a time-available basis for the cost of producing the information. Directories are also available in the bookstores for those persons needing directory information. Directory information is available on the World Wide Web using the on-line phonebook; and from printed directories, which may be purchased at the bookstores.

Confidential Information
With the exception of the information noted above, all student records are considered to be confidential and are open only to university personnel; to offices and agencies carrying out their accreditation and audit functions of university programs; to persons in compliance with a judicial order; to organizations conducting studies for or on behalf of educational institutions or agencies for the purpose of developing, validating, or administering predictive tests, administering student aid programs, and improving instruction; and to persons in an emergency in order to protect the health or safety of students or other persons.

The following policies govern access to student records:

1. Each type of student record is the responsibility of a designated university official, and only that person or the dean or director to whom that person reports has authority to release the record. The responsible officials are:
   a. Academic records: registrar
   b. Admissions records: director of admissions
   c. Financial aid records: director of student financial aid
   d. Business records: university controller
   e. Traffic and security records: director, ISU Department of Public Safety
   f. Medical records: director, Student Health Center
   g. Counseling records and test scores: director, Student Counseling Service
   h. Actions of Academic Standards Committees: college deans
   i. Disciplinary records: dean of students
   j. Residence hall records: director of residence
   k. Placement records: college placement officers
   l. Evaluations for admission to ISU graduate or professional programs: deans or department chairs
   m. Special academic programs: faculty member in charge of the program and the dean of the college.

2. The responsible official may release records to university personnel who have a legitimate need for the information. “University personnel” includes students appointed to specified committees. A list of those persons who normally have access to each type of student record is available in 214 Alumni Hall.

3. All student records are reviewed periodically. Information concerning the frequency of review and expurgation of specific records is available in 214 Alumni Hall.

4. Students have the right to review upon request any records that pertain directly to them, and may obtain a copy of the record for a fee. This provision does not apply to records to which the student has waived his or her right to review, nor does it apply to medical and counseling records.
5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.

6. A file containing copies of records pertinent to advising is maintained on each student for use by the student’s adviser. Ordinarily this file is kept in the possession of the adviser, but for convenience it may be stored elsewhere such as in the department office. When the student changes majors, or changes advisers within the same major, the file is transferred to the new adviser. Under the university’s student records policy, the student is considered to have the right of access to this file.

7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.

8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.

9. Confidential information may be released to parents by obtaining the student’s written consent or by having the parent establish the student’s dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent’s most recent federal income tax return.

10. Iowa high schools receive a freshman year report containing first year academic progress data of all their graduates attending Iowa State University for the purpose of evaluating and improving their instructional programs.

11. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable non-public information. The records of requests, whether granted or not, shall include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by school officials in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditations of university programs, or any of the other exceptions listed previously.

**Posting Grades and Test Scores**
The test scores or course grades of students may be posted in public locations to inform students of their performance provided that the information is presented in such a way as not to reveal the name or entire ID number of specific individuals.

**Release of Grades**
Reports of a student’s grades are not routinely sent to the student’s parents. Parents of students under 18 years of age may obtain grades by writing to the Office of the Registrar. The grades of other students will be sent to their parents only with written permission of the student, or by establishing dependency as outlined in item 9 under Confidential Information.

**When Records May Be Withheld**
The appropriate university official may request that a student’s record not be released if that student is delinquent in an account with the university or an affiliated organization. The effect of this action is that a transcript will not be released and registration will be withheld.

The appropriate official may also request that records be withheld in instances when official disciplinary action has been taken against a student. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code.

In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation. Further information about this policy can be obtained from the Office of the Registrar.

**Review and Challenge of Records**
A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content.

Students who question their records should discuss the issue first with the individual staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

**ISUCard and Identification Number**
Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, along with a current registration receipt, may be required for some services and/or activities. At the time the ISUCard is issued each student also selects a personal identification number (PIN), which is required for electronic access to personal student information.

Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

**Social Security Number**
Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus or to receive financial aid are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

**Policy on Student Names**
Iowa Regents universities have a common policy regarding student names and name changes. The name on the student record should be the student’s complete and legal name. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation as warranted.

The university is organized into nine colleges, including the Graduate College. Seven colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Commission of Institutions of Higher Education of the North Central Association of Colleges and Schools.

The main undergraduate academic programs of each college are listed below, together with the degrees awarded upon completion. In many cases certain majors, minors, options, or electives allow for increased specialization within the programs. Programs which are administered jointly by two colleges are listed within both colleges.

**College of Agriculture**

Agricultural Biochemistry, B.S.
Agricultural Business, B.S.
Agricultural Education, B.S.
Agricultural Extension Education, B.S.
Agricultural Studies, B.S.
Agricultural Systems Technology, B.S.

Bachelor's Degree Requirements

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer from another college or university is normally required to have a 2.00 cumulative average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, but will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor's degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student's major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor's degrees if he or she meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. Each major in a double major must include a minimum of fifteen credits not simultaneously used to meet any other department, college, or university requirement. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Minors

Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student's transcript. Lists of undergraduate minors offered by each college appear in the college description; minors offered by cross-disciplinary programs not administered by a single college include gerontology, and international studies. Undergraduate students in any college may elect to meet the requirements of any undergraduate minor offered at the university. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Some students may, however, have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.

All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass/not pass basis. Specific requirements and/or restrictions are available from the department or program offering the minor.

English Proficiency Policy

Iowa State University believes that written communication is a fundamental skill of an educated person; therefore its graduates are expected to acquire reasonable competence in written communication during their educational careers. The following are designed to ensure that this competence is developed and maintained:

1. All students must earn credit in a sequence of basic composition courses (English 104 and 105) normally in the freshman year.
2. Continued development of communication skills following the freshman year is the responsibility of the student’s major department. This development may be promoted by requiring and critically evaluating term papers and other written assignments as part of courses offered by the department and by encouraging students to enroll in advanced English composition courses that meet their particular needs.
3. Each department is responsible for certifying that its majors have achieved an adequate level of proficiency in written communication at the time of graduation.

English Requirement: Students Whose First Language is not English

Students whose first language is not English must demonstrate ability to study in this English-speaking university. Such students—beginning as well as those who transfer from other institutions—must take an English placement test when they arrive on campus. The test is administered by the English Department and is offered at the opening of each semester.

Students whose performance on this placement examination is satisfactory will follow the regular English requirements of their major department. Students who have deficiencies will enroll in special English classes, as determined by the test results.

Library Study

Independent study and investigation through the use of books and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library, including practice in how to locate the published literature of their respective fields of study.

U.S. Diversity and International Perspectives Requirements

One of Iowa State University’s goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students’ fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student’s college or requirements of the student’s major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S. The focus of the International Perspectives requirement is the global community. Its objective is to promote students’ understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are “studying abroad” from their home country’s
to introduce students to an honors education, consists of special honors sections of English 105 and Library 160, a Freshman Honors Seminar, and advising by specially selected honors advisers. Students may also choose to participate in the Mentor Program, designed to introduce students to the research arena. Participants select an area of interest and are matched with one or more members. NSE participants do not apply to cooperative students, nor are students allowed time off for university activities. A student may not enroll in classes at any educational institution during a period of full-time cooperative employment without university approval. Those in a cooperative program are considered by the university to be students subject to university regulations concerning conduct during this period and are liable to dismissal from the university for misconduct on the job. They may continue living in university housing during work periods. Cooperative students pay no fees to the university during work periods, but may attend student activities provided they pay the activity fee.

The Washington Center Program
Iowa State University, in conjunction with The Washington Center, offers its students the opportunity to gain academic credit and firsthand professional work experience in the governmental, non-profit, and private sectors through a semester-long internship in the nation’s capital. The Washington Center, the largest non-profit organization of its kind, places students in a variety of internships and also offers a wide array of academic programs and seminars to complement their internship experience. Further information about the requirements can be obtained from Career Services, 12 Alumni Hall, 515-294-9490.

Regent Universities Student Exchange Program
Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)
Iowa State University is a member of the National Student Exchange (NSE) through either alternate (full-time) or parallel (concurrent, part-time) periods of work and study. In general, students under this program will require one year more to complete the usual curriculum requirements. Initial placement usually comes after completion of the first or second year. The student must observe regulations of the employer and not expect special treatment. Undergraduates do not apply to cooperative students, nor are students allowed time off for university activities. A student may not enroll in classes at any educational institution during a period of full-time cooperative employment without university approval. Those in a cooperative program are considered by the university to be students subject to university regulations concerning conduct during this period and are liable to dismissal from the university for misconduct on the job. They may continue living in university housing during work periods. Cooperative students pay no fees to the university during work periods, but may attend student activities provided they pay the activity fee.

The Washington Center Program
Iowa State University, in conjunction with The Washington Center, offers its students the opportunity to gain academic credit and firsthand professional work experience in the governmental, non-profit, and private sectors through a semester-long internship in the nation’s capital. The Washington Center, the largest non-profit organization of its kind, places students in a variety of internships and also offers a wide array of academic programs and seminars to complement their internship experience. Further information about the requirements can be obtained from Career Services, 12 Alumni Hall, 515-294-9490.

Regent Universities Student Exchange Program
Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)
Iowa State University is a member of the National Student Exchange (NSE). NSE has 160 colleges and universities in many locations across the United States as members. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be approved well in advance of registration. Detailed information and application forms are available from the NSE coordinator 314 Alumni Hall.
Group Programs -- On most group programs, students are being met. Consequently, a variety of programs with diverse backgrounds, needs, abilities, and interests. Therefore, there are options for students to challenge themselves academically, intellectually, and emotionally.

The Study Abroad Center

The Study Abroad Center is a unit of International Education Services and the office with primary responsibility for study abroad. Staffed by experienced international travelers, the Center has a wealth of information on educational and work opportunities abroad, travel information, and resources within ISU college and academic disciplines.

The Study Abroad Center
6 Hamilton Hall
Tel: (515) 294-6792
Fax: (515) 294-8263
Studyabroad@iastate.edu
www.iastate.edu/~study-abroad/

Types of Programs

Students attending Iowa State University have diverse backgrounds, needs, abilities, and interests. Consequently, a variety of programs are offered to ensure the needs and wants of students are being met.

Group Programs -- On most group programs, an ISU professor leads the group abroad and oversees academic work. Group programs range from one to eight weeks during a break (Spring Break, Winter Break, or Summer) up to a whole semester. Programs have been offered on every continent including the Antarctic. These are "non-integrated" programs, meaning students are taught with other ISU students and no students from the host country. On most group programs, students earn ISU credits and take courses designed especially for members of the group.

Regents’ Semester Programs -- These programs provide an opportunity to study at a university in Wales or Australia with a group of students from the Iowa Regents’ Universities. These are "semi-integrated" programs, in which participants have specially arranged programs with the other Regents’ students in addition to being able to select from regularly offered courses at the host institution. Participants pay a negotiated rate and receive transfer credit.

Exchange Programs -- Participants take regular classes at a foreign university and pay tuition, and sometimes room and board, at ISU. These programs last for one or two semesters, and transfer credit is awarded.

Practical Experience -- ISU students can gain experience in their academic discipline while living abroad. Choices include service learning, internships, student teaching, and study-and-work programs.

Other Opportunities -- Students can participate in programs organized by other U.S. or foreign institutions. The Study Abroad Center has a wealth of information on these opportunities. In most cases, participants in these programs will receive transfer credit and can use their ISU financial aid.

Financial Questions

Students earning academic credit toward their ISU degree can use most, if not all, of their financial aid to fund the study abroad experience. This is true for ISU programs or ones offered through other institutions. Staff in the Student Financial Aid Office, can provide more information on how financial aid may be applied toward the cost of studying abroad and adjusted, if necessary, to reflect costs that are different from campus-based courses.

Recognizing the importance of this educational activity, ISU provides study abroad scholarships for summer, spring, and fall academic year programs. Applicants must have at least a 2.50 GPA. An application can be downloaded at www.iastate.edu/~study-abroad/

In addition to ISU aid, numerous organizations and foundations offer funding for study abroad. The Study Abroad Center library has information on funding for study abroad (including Fulbright awards for graduate students) as well as a list of fund-raising ideas that have been used successfully by students in the past.

Several reputable travel agencies and discounters offer reduced airfare to students. Discounted student health insurance is available, as well. Other student discounts (lodging, car rental, etc.) are available to holders of the International Student Identity Card. Hostelling International offers its members discounts on stays in hostels worldwide.

Program Options (By Language of Instruction)

Iowa State University provides students with the opportunity to develop second language skills in a variety of languages and countries. Students without prior language study can take courses in Spanish, French, Mandarin Chinese, and Korean. Students with prior language study can further develop their skills in Spanish, French, German, Portuguese, Mandarin Chinese, and Korean. Programs last five weeks to an academic year.

Program Options (By College)

Regardless of the college in which a student is enrolled, there is an array of study abroad options lasting from a week to a full academic year. For a complete and current list of study abroad programs, access Globetrotter, a database of ISU programs, at http://www.iastate.edu/~study-abroad/.

Additional information is available at the Study Abroad Center, 6 Hamilton Hall.

Military Training

Iowa State University students may elect to participate in one of the Reserve Officers Training Programs (ROTC) offered at Iowa State by the Army, the Navy, and the Air Force. Descriptions of the specific programs are found under the departments of Air Force Aerospace Studies, Military Science, and Naval Science. A student who completes a four-year program in any of these fields may be commissioned as a military officer at the time of graduation.

Late Afternoon, Evening, and Saturday Classes

In order to make on-campus courses available to those who live within commuting distance of Ames, classes are scheduled in the late afternoon and evening so that persons with full-time employment or other responsibilities may commute and continue their education. On-campus Saturday and evening course information, including registration information, is available on the Web at the following URL: www.iastate.edu/~catalog/schedule
Departments of the College

Agricultural Education and Studies

Food Science and Human Nutrition
Forestry
Horticulture
Microbiology
Plant Pathology
Sociology
Zoology and Genetics

Students enrolled in the College of Agriculture are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter.

Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates include production agriculture, business and industry, public agencies, education, biological and environmental sciences, value-added processing, natural resource management, rural development, animal and human health professions, and graduate studies.

High School Preparation
Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of biology and chemistry, or biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture.

Majors in the College of Agriculture
A student has many majors from which to choose. Each major is unique but there are courses common to many. This is helpful to students in that they may transfer from one agriculture major to another before the second year with little, if any, loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture are:

Primary Majors
Agricultural Biochemistry
Agricultural Business
Agricultural Education
Agricultural Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Dairy Science
Dietetics
Entomology
Environmental Science
Food Science
Forestry
Genetics
Horticulture
Microbiology
Nutritional Science
Plant Health and Protection
Professional Agriculture (off-campus)
Public Service and Administration in Agriculture
Zoology

Secondary Majors
Agricultural Extension Education
Environmental Studies
International Agriculture
Pest Management
Seed Science
A secondary major must be taken in conjunction with a primary major.

Minors
Agricultural Biochemistry
Agricultural Education and Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Entomology
Environmental Science
Environmental Studies
Food Science
Forestry
Genetics
Horticulture
International Agriculture
Microbiology
Nutrition
Pest Management
Plant Health and Protection
Zoology
See statement on minors in the Colleges and Curricula section of this catalog.

Special Programs
General Agriculture
General Agriculture is a starting place for students who wish to pursue careers in agriculture but who are unsure of which majors to choose. The Agriculture Student Services Office provides advising for general agriculture students until they select their majors.

Preventive Veterinary Medicine
Students in the College of Agriculture may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with prevent veterinary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements).

Students who are undecided about choice of major may enroll in general veterinary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preventive veterinary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture Honors Committee.

Honors Program
The College of Agriculture Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture Honors Committee, or your department Honors contact person.

Off-Campus Programs
Coursework leading to bachelor of science and master of agriculture degrees in professional agriculture and a nonthesis master of science in microbiology are offered to students who choose to study off-campus; see Extended and Continuing Education for further information.

Study Abroad and International Travel Opportunities
Agriculture is being transformed into a highly interconnected global system; decisions made in one agricultural sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the central role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture provides study abroad and international travel opportunities in several locations around the world. For additional information, contact the Office of International Agriculture Programs in the College of Agriculture.
Internships and Cooperative Education Programs

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.

College of Agriculture Core Curriculum and Electives

All curricula in the College of Agriculture lead to a bachelor of science degree. Each major has specific degree requirements for graduation. These include the College of Agriculture’s core curriculum.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture must fulfill the core curriculum requirements of the College of Agriculture and all the requirements of the second major. The College of Agriculture core curriculum follows.

Minimum Credits Subject Area
9.5 Interpersonal and public communication skills
6 credits of English with grades of C or better in both required core English courses (104 and 105); 3 credits of speech fundamentals with grades of C or better; 0.5 credit in Lib 160
17 Mathematical, physical, and life sciences
3 credits of mathematics; 3 credits of statistics; 5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics); 6 credits of life science (e.g., biochemistry, biology, botany, ecology, genetics, microbiology, physiology, zoology).
15 Humanities, ethics and social sciences
3 credits of ethics from an approved list; 3 credits of humanities; 3 credits of social sciences; 3 credits of U.S. diversity from an approved list; 3 credits of international perspectives from an approved list.

The College of Agriculture is committed to enhancing student proficiency in four areas: 1) ability to write, discuss and present subject matter within the major (communications), 2) ability to consider many dimensions of a problem and develop a solution (problem-solving), 3) ability to use computers for computation, document processing and communications, and 4) ability to analyze issues related to human impact on natural resources and the environment. Courses required by each major, courses within the College of Agriculture’s core curriculum or free elective courses are used to develop these proficiencies. The specific requirements are:

Communications: Equivalent to 3 credits from one or more courses. Communication activities are incorporated into designated courses within each major field. The requirement is fulfilled by taking one or more of these communication-intensive courses.

Problem-solving: Equivalent to 3 credits from one or more courses. Problem-solving activities (disciplinary and multidisciplinary) are incorporated into designated courses within each major field. The problem-solving requirement is fulfilled by taking one or more of these problem-solving-intensive courses.

Computer proficiency: All College of Agriculture students must demonstrate computer proficiency according to procedures established by each department.

Environmental issues: Equivalent to 3 credits from one or more courses. Students are strongly encouraged to select course work in this area which will give them an appreciation of both ecological and human/societal dimensions of the environment.

Electives

Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements.

Advising

Each student in the College of Agriculture works closely with an academic adviser who is associated with the major in which the student is enrolled. All entering students and their parents are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes. The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisers make a special effort to adjust course schedules in accordance with students’ interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu.

Graduate Study

Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture also participate in the following graduate-level interdepartmental offerings:

Electives

21.5-22.5 Total credits

Typical Program for the First Year

Cr. Fall
4 General Chemistry—Chem 177M
1 Laboratory in General Chemistry—177N
4 Calculus I—Math 165
3 First-Year Composition—Engl 104
3 Principles of Biology—Biol 201
1 Principles of Biology Laboratory—Biol 201L
Curriculum in Agricultural Business

Administered by the Department of Economics. Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

Cr. Degree Requirements
12.5 Interpersonal and public communication skills
Lib 160, Engl 104, 105
Engl 302 or Engl 309 or Engl 314
Sp Cm 212 or AgEds 311
15 Mathematical and computer science
Math 150, 151; Stat 227
Com S 103
4-5 Physical Sciences
Chem 163-163L or Phys 111
6 Life and Environmental Sciences
Biol 109 or 201
A Ecl 120 or Biol 123 or other credits that meet the environmental intensive requirement
12 Humanities, ethics and social science
Courses in individual areas below may overlap but the total credits taken must equal 12 or more
Ethics
International perspectives
U.S. diversity
Humanities
Social science other than economics
12 Business
Acct 284, 285; Fin 301
One of the following:
Mgmt 310, 370, Mkt 340,
CIS 330, POM 320, Sp Cm 360
3 Agricultural sciences electives
32-34 Economics and Agricultural Economics
Econ 101, 101L, 102, 110, 135,
301, 302 or 353, 335, 492
Nine credits of the following:
Econ 401, 402, 415, 430, 431 or
432, 437, 451, 455, 460, 466, 470,
472, 480
Five additional credits of
Economics at the 300 level or higher
30-34 Free electives
128 Total credits

Typical Program for the First Year

Cr. Fall
4 Microeconomics—Econ 101, 101L
3 First-Year Composition I—Engl 104
0.5 Library Instruction — Lib 160
13-14 Electives

Cr. Spring
4 Microeconomics—Econ 101, 101L
3 First-Year Composition II—Engl 104
15 Mathematical and computer science
Math 150, 151; Stat 227
Com S 103
12-13 Electives

Cr. Fall
4 First-Year Composition—Engl 104
3 Fundamentals of Algebra for Science and Higher
Mathematics—Math 140
3 Principles of Micro Economics—
Econ 101
3 Speech elective
3 Psychology elective
0.5 Library Instruction—Lib 160
Curriculum in Agricultural Extension Education

Administered by the Department of Agricultural Education and Studies. Agricultural extension education may be taken only as a secondary major in a double major program.

Cr.  Degree Requirements
12.5  Interpersonal and public communication skills
      Engl 104, 105; written communications elective (3 cr.); AgEdS 311; Lib 160; communications intensive requirement.
20  Mathematical, physical, and life sciences
      Chem 163, 163L or 177, 177L; Math 104 or 150; Stat 104; Biol 201; entomology elective (3 cr.); life sciences elective (3 cr.); environmental intensive requirement; demonstration of computer proficiency.
18  Humanities, ethics, and social sciences
      Psychology elective (3 cr.); from approved lists: 3 cr. in ethics, 3 cr. in international perspectives; 3 cr. in U.S. diversity; humanities electives (6 cr.); problem-solving intensive requirement.
35  Agricultural sciences and economics
      Animal science electives (6 cr.); agronomy electives (9 cr.); economics elective (3 cr.); horticulture elective (2 cr.); electives (15 cr.).
16.5  Professional credits
      AgEdS 110A, 211, 310, 315, 414, 415 (8 cr.)
26  Electives
128  Total credits

Typical Program for the First Year

Because agricultural extension education is a secondary major that has requirements that are similar to those of the agricultural education major, courses taken by the student during the first year will be similar to those taken by first-year agricultural education majors. Differences in individual programs will reflect the student's choice of a primary major.

Cr.  Degree Requirements
12.5  Interpersonal and public communication skills
      Engl 104, 105; written communications elective (3 cr.); speech elective (3 cr.); Lib 160; communications intensive requirement.
20  Mathematical, physical, and life sciences
      Chem 163, 163L or 177, 177L; Math 104 or 150; Stat 104; Biol 109 or 201; life science elective (6 cr.); demonstration of computer proficiency; environmental intensive requirement.
18  Humanities, ethics, and social sciences
      Econ 101; humanities electives (3 cr.); AgEdS 315; from approved lists: 3 cr. in ethics; 3 cr. in international perspectives; 3 cr. in U.S. diversity; problem-solving intensive requirement.
42.5  Agricultural sciences and economics
      AgEdS 110B, 215, 450; Agron 114, 154, 212; An S 114 and 114L, electives (6 cr.); Econ 135, 330; AST electives (4 cr.); agricultural sciences and economics electives (9 cr.), 300-400 level.

Other required courses
3  Acct 284
32  Electives
128  Total credits

Curriculum in Agricultural Studies

Admistered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Cr.  Degree Requirements
12.5  Interpersonal and public communication skills
      Engl 104, 105; written communications elective (3 cr.); speech elective (3 cr.); Lib 160; communications intensive requirement.
20  Mathematical, physical, and life sciences
      Chem 163, 163L or 177, 177L; Math 104 or 150; Stat 104; Biol 109 or 201; life science elective (6 cr.); demonstration of computer proficiency; environmental intensive requirement.
18  Humanities, ethics, and social sciences
      Econ 101; humanities electives (3 cr.); AgEdS 315; from approved lists: 3 cr. in ethics; 3 cr. in international perspectives; 3 cr. in U.S. diversity; problem-solving intensive requirement.
42.5  Agricultural sciences and economics
      AgEdS 110B, 215, 450; Agron 114, 154, 212; An S 114 and 114L, electives (6 cr.); Econ 135, 330; AST electives (4 cr.); agricultural sciences and economics electives (9 cr.), 300-400 level.

Other required courses
3  Acct 284
32  Electives
128  Total credits

Curriculum in Agricultural Systems Technology

Administered by the Department of Agricultural and Biosystems Engineering. A minor in agricultural systems technology is available; the requirements appear under Agricultural Systems Technology, Courses and Programs.

Systems Technology and Management Option

Cr.  Degree Requirements
12.5  Interpersonal and public communication skills
      Engl 104, 105; Sp Crn 212 or AgEdS 311; Engl 302 or 309 or 314; Lib 160
28-30  Mathematical, physical, and life sciences
      Math 140 and 142, or 151, or 160, or 165; Stat 104; Chem 163, 163L; Phys 106 or 111; AST 115, 215; Biol 109; A E 271 or 272 or Biol 123 or A Ecl 120
15  Humanities, ethics, and social sciences
      Humanities elective (3 cr.); Econ 101; from approved lists: 3 cr. in ethics, 3 cr. in international perspectives; 3 cr. of U.S. diversity; and environmental-intensive requirement.
6  Agricultural sciences
      Select from department-approved list
30  Agricultural systems technology
      AST 110, 210, 324, 330, 360, 373, 403 and 496

Other required courses
3  Acct 284; Econ 330 or Mgmt 370 or Econ 336
6  Other required courses
3  Acct 284; Econ 330 or Mgmt 370 or Econ 336

Areas of specialization

Production Agriculture: Credits selected from department-approved list of agricultural science courses

Agribusiness Management: Credits selected from department-approved list

Grain Operations: Acct 285; AST 362; Econ 135; Mkt 340; a minimum of 6 credits from the following: An S 319; Econ 301, 332, 335; Ent 376; Mgmt 371; TrLog 360, 460

Applied Technology: Select credits with adviser assistance for specialization in one of these areas: water quality, safety, seed science, construction technology, machine testing, food processing, environment, computer operations, international studies, industrial technology

11-13  Free electives
128.5  Total credits
Environmental Systems Technology Option

Cr.   Degree Requirements
12.5  Interpersonal and public communication skills

Engl 104, 105; Sp Cm 212 or AgEdS 311; Engl 302 or 309 or 314; Lib 160

40-42  Mathematical, physical, and life sciences

Math 140 and 142, or 160, or 165; Stat 104; Chem 163, 163L, 164, 231, 231L; Phys 106 or 111; AST 115, 215; A E 271 or 272; Biol 201, 201L, 202, 202L; Micro 201, 201L

15  Humanities, ethics, and social sciences

Econ 101; Hist 472; from approved lists: 3 cr. in ethics, 3 cr. in U.S. diversity, and environmental-intensive requirement

12  Agronomic sciences

Select a minimum of 12 credits from Agron 114, 154, 206, 260, 317, 354, 356, 360, 485

14  Environmental Sciences

Select a minimum of 14 credits from A Ecl 410, 513; Biol 312; Bot 330, 487, 500, 564; Env S 123, 324, EnSci 401, 402, 404; For 407

6  Environmental Studies

Select a minimum of 6 credits from: Env S 201, 293, 340, 380, 382, 450, 482, 491

22  Agricultural systems technology

AST 110, 120, 210, 324, 326, 333, 403, 425, 475 or 476, 496.

5-7  Free electives

128.5  Total credits

Mechanical Systems Option

Cr.   Degree Requirements
12.5  Interpersonal and public communication skills

Engl 104, 105; Engl 302 or 309 or 314; Sp Cm 212 or AgEdS 311; Lib 160

28-31  Mathematical, physical, and life sciences

Stat 104 or 101; Math 140 and 142, or 160, or 165; Chem 163, 163L; Phys 106 or 111; AST 115, 215; A E 271 or 272; Biol 109; Biol 123 or A Ecl 120

15  Humanities, ethics, and social sciences

Econ 101; humanities elective (3 cr.); from approved lists: 3 cr. in ethics, 3 cr. in international perspectives; 3 cr. of U.S. diversity; and environmental-intensive requirement

6  Agronomic sciences

Agron 114, 154

30  Agricultural systems technology

AST 110, 210, 330, 333, 335, 337, 360, 403, 430, 435, 460, 496

24  Areas of specialization

Management: Acct 284, Econ 336, Mgmt 370, Mkt 340; a minimum of 12 credits from the following: Acct 215, 285, 316; I Tec 231, 244, 360; Mgmt 371; MIS 330; Mkt 442, 446, 447

Precision Agriculture: Credits selected from department-approved list.

Technological: Math 166, E M 274, 324, 327; Phys 112; a minimum of 9 credits from the following: E M 378, 417; I Tec 231, 244, 360; Mat E 362, 362L, Stat 401

9-12  Free electives

128.5  Total credits

Typical Program for the First Year

Cr.   Fall
1  Experiencing Agricultural Systems Technology—AST 110
3  Fundamentals of Algebra—Math 140
3  First-Year Composition—Engl 104
5  General Chemistry—Chem 163, 163L
3  Agricultural science elective

Cr.   Spring
2  Computer-aided Graphics
3  Introductory Biology—Biol 201
3  First-Year Composition—Engl 105
3  Trigonometry and Analytic Geometry—Math 142 or Calculus for Business and Social Sciences—Math 151
3  Agricultural science elective
0.5  Library Instruction—Lib 160

Curriculum in Agronomy

Students majoring in agronomy study crop science, soil science, and agricultural meteorology in one of three options: (1) general agronomy, (2) environmental science, (3) science. A minimum of 15 credits in agronomy must be earned at Iowa State for both the major and the minor.

General Agronomy Option

Cr.   Degree Requirements
12.5  Interpersonal and public communication skills

Engl 104, 105; Lib 160; Sp Cm 212 or AgEdS 311; 3 cr. elective from Engl 302, 309, or 314

7  Mathematical sciences

Math 181 or 160, Stat 101 or 104; demonstration of computer proficiency

17  Physical sciences

Chem 163, 163L, 231, 231L; Geol 100, 100L; Phys 111

13  Biological sciences

Biol 201, 201L, 202, 202L; Micro 201; 3 cr. from the following: A Ecl 410, Agron 320, Biol 312, BBMB 301, Ent 376, PIP 407

15  Humanities, ethics, and social sciences

3 cr. each in ethics, U.S. diversity, international perspectives, humanities, and social sciences (from approved list)

6  Economics and business

Econ 101; Env S 380

33  Agronomic sciences

Agron 105, 110, 114, 154, 206, 210, 230, 306, 310, 354, 354L, 392, 410, and 492 and 9 cr. of electives (no more than 2 cr. total from Agron 331, 370, 490, 491, and 496 allowed to meet the 9 cr. requirement; Agron 320 may be used only as a biological science by Agronomy majors)

23.5  Free electives

128  Total credits

Environmental Science Option

Cr.   Degree Requirements
12.5  Interpersonal and public communication skills

Engl 104, 105; Lib 160; Sp Cm 212 or AgEdS 311; 3 cr. elective from Engl 302, 309, or 314

7  Mathematical sciences

Math 181 or 160, Stat 101 or 104; demonstration of computer proficiency

17  Physical sciences

Chem 163, 163L, 231, 231L; Geol 100, 100L; Phys 111

13  Biological sciences

Biol 201, 201L, 202, 202L; Micro 201; 3 cr. from the following: A Ecl 410, Agron 320, Biol 312, BBMB 301, Ent 376, PIP 407

15  Humanities, ethics, and social sciences

3 cr. each in ethics, U.S. diversity, international perspectives, humanities, and social sciences (from approved list)

6  Economics and business

Econ 101; Env S 380

30  Agronomic sciences

Agron 105, 110, 114, 154, 206, 210, 260, 310, 360, 410, 473, 485, 492 and 4 cr. of electives (no more than 2 cr. total from Agron 331, 370, 490, 491, and 496 allowed to meet the 4 cr. requirement) (A minimum of 15 cr. in agronomy must be earned at Iowa State.)

9  Environmental sciences

Select 9 credits from Bot 340; For 407; Env S 201, 293, 324, 330, 425, 450, 491; EnSci 401, 402, 404; AST 425, 475

18.5  Free electives

128  Total credits
Agriculture

Science Option

The science option is recommended for individuals who want a stronger basic science orientation. See an agronomy adviser for specific recommendations.

Curriculum in Dietetics

Administered by the Department of Food Science and Human Nutrition.

General Dietetics
The student is prepared for admission to dietetic internship programs and other professional experience programs approved/accredited by The American Dietetic Association. Courses included have been approved as meeting the academic requirements of the American Dietetic Association. There is a $30 fee for a statement of verification of completion of the approved program.

Cr. Degree Requirements
9.5 Interpersonal and public communication skills
Engl 104, 105; Lib 160; and communications-intensive requirement

33-34 Mathematical, physical, and life sciences
3 cr college-level math; Stat 101 or 104; Chem 163, 163L, 231, 231L; BBMB 301, 311; Biol 201, 202; Micro 201; Zool 156, 255

17 Humanities, ethics, and social science
Econ 101; Env S 201; Psych 101; select 3 credits each in international perspective and ethics (see approved lists); 3 cr. in humanities.

50.5 Food science and human nutrition

Humanities, ethics, and social sciences
15 credits including at least 3 credits each in the humanities, social sciences, ethics, international perspectives and U.S. diversity chosen from an approved list.

Environmental horticulture option
Hort 424 must be among the courses that fulfill the horticultural sciences requirement.

Greenhouse production and management option:
Hort 233, 322, 332, 422, 434, and 435 must be among the courses that fulfill the Horticultural Sciences requirement.

Fruit and vegetable production and management option:
Hort 422, 461, and 471 must be among the courses that fulfill the Horticultural Sciences requirement.

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize prior to reaching junior standing and will fulfill the requirements described below under Specialization Options.

A minor is available. The requirements appear under Horticulture, Courses and Programs.

Degree Requirements

<table>
<thead>
<tr>
<th>Cr.</th>

</tbody>
</table>

Mathematical sciences
Math 140 or 150 or 165 or 181; and Stat 101 or 104 or 227 or 401

Physical sciences
Chem 163, 163L or 177, 177L; and 231, 231L, or 331, 331L; and one course from the following group: Chem 164, 164L; 178, 178L; or Phys 106 or 111. A student must take either (1) Chem 163/163L and Chem 231/231L series or (2) Chem 177/177L and 178/178L series and Chem 331/331L.

Biological sciences
Biol 201, 202; select 13-14 credits from the following group: Bot 320, 326, 484; Biol 312; Agron 230; Agron 260; Agron 317; Agron 354; Ent 370 or 376; Ent 375; Bot 404; PI P 407; For 416; PI HP 391; Biol 201L; Biol 202L; Gen 320 or Biol 301, 301L; Biol 302, 302L

Humanities, ethics, and social sciences
3 credit course from each of the following areas: humanities, ethics, social science, U. S. diversity, and international perspectives; see department for procedure in meeting problem-solving, environmental-intensive, and communication-intensive requirements.

Soil science
Agron 154 or 155

Horticultural sciences

Specialized Options
(a minor in an approved area of study may be substituted for the specialized option with permission of student’s advisor)

Environmental horticulture option:
Hort 424 must be among the courses that fulfill the horticultural sciences requirement.

Greenhouse production and management option:
Hort 233, 322, 332, 422, 434, and 435 must be among the courses that fulfill the Horticultural Sciences requirement.

Fruit and vegetable production and management option:
Hort 422, 461, and 471 must be among the courses that fulfill the Horticultural Sciences requirement.

Horticultural communications and public education:

128 Total credits  

Program for the First Year  

Because international agriculture is a second-year major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).  

Curriculum in International Agriculture  

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture. A minor is available to interested students regardless of their major.  

Cr. | Degree Requirements  
--- | ---  
9.5 | Interpersonal and public communication skills  
Engl 104, 105; Lib 160; Sp Cm 212  
10-12 | Mathematical sciences  
Stat 101 or 104 required; 2 semesters of math with at least one semester of calculus  
24-30 | Physical sciences  
Chemistry—Chem 177, Chem 177L, Chem 178  
Biochemistry—BBMB 404 & BBMB 405 (recommended) or BBMB 420  
Physics: 8 credits from Phys 111, 112, 221, 222  
11 | Biological sciences  
Biol 201, 201L, 202, 202L, and 301.  
15 | Humanities, ethics, and social sciences  
Minimum of 3 credits each in courses in humanities and social sciences. Also, 3 credits each in ethics, international perspectives, and U.S. diversity courses selected from approved lists.  
35 | Microbiology  
Required: Micro 110, 302, 310, and 320; 11 credits of laboratory modules: Micro 341, 342, 343, 344, 345, 441, 442, 443, 444, 445, and 446; a minimum of 3 cr. each in infectious disease courses, microbial physiology/genetics courses, and microbial ecology/environmental courses.  
14.5-19.5 | Electives  
128 | Total credits  

128.5 Total credits  

An official minor will be accepted in place of a specialized option with the permission of the student’s adviser.

Engl 104, 105, Lib 160, ComSt 214 or Sp Cm 212  
51-58  |  Mathematical, physical, and life sciences  
4 credits in calculus (2 semesters preferred), Stat 104 or 101, Chem 177, 177L, 178, 331, 331L, 332, 332L; Phys 111, 112, Biol 201, 201L, 202, 202L, 301, 302; Micro 201L, 302; Zool 355  
15  |  Humanities, ethics, and social science  
Env S 201; select at least 13 additional credits to include 3 credits each for U.S. diversity, international perspective and ethics (see approved lists). Total credits should include 6 each in humanities and social science category.  
27.5-31.5  |  Food science and human nutrition  
FS HN 110, 203, 214 or 311, 261, 360, 480; select 14-16 credits from: FS HN 361, 403, 412, 419 or 519, 461, 463, 464, 466, 490C, 499, 560, 562, 565, 575  
6-17  |  Electives  
120  |  Total credits  
Graduate Program:

Cr.  |  Degree Requirements  
30  |  Graduate-level coursework including research  
See department for graduate requirements.

Curriculum in Pest Management

Administered by the departments of Agronomy, Animal Ecology, Entomology, Forestry, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. Students with primary majors in other than the sponsoring departments also are encouraged to enroll in the pest management program. Additionally, a minor in pest management is available; the requirements appear under Pest Management, Courses and Programs.

Cr.  |  Degree Requirements  
12.5  |  Interpersonal and public communication skills  
Engl 104, 105 and a minimum of 3 cr. in speech fundamentals with grades of C or better; Lib 160; electives and a communication-intensive requirement  
6  |  Mathematical sciences  
Stat 104; 3 cr. in mathematics, statistics or computer science; students must demonstrate computer proficiency according to procedures established by their primary major  
9  |  Physical sciences  
Chem 162, 163L, 231, 231L

128 Total credits

Typical Program for the First Year

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

Curriculum in Seed Science

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study include: seed production, conditioning, pathology, physiology, quality control, and marketing, as well as seed plant designs.

Curriculum in Zoology

Administered by the Department of Zoology and Genetics.

Objectives of the Curricula in Business

The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the social, technological, political, legal and economic forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate ethical and social values; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curricula in business are accredited by the International Association for Management Education (AACSB), the national business accrediting agency.

Organization of Curricula

The undergraduate curricula in business are divided into two phases: a general education (pre-business) program and a professional program. The pre-business requirements provide a broad foundation in the liberal arts. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major curriculum. The seven major curricula offered for the degree bachelor of science (B.S.) are accounting, finance, management, management information systems, marketing, production/operations management or transportation and logistics. The College also offers a secondary major in international business. An opportunity to take elective courses is also a part of the curricula.

Bachelor of Science

The bachelor of science (B.S.) degree offers a high quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting, finance, management, management information systems, marketing, production/operations management or transportation and logistics.

Required High School Preparation

Students entering the pre-business curriculum must present evidence of the following high school preparation:

a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.

b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.

c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics.

d. Two (2) years of social studies.

Admission Standards to Professional Programs

All new entering students are enrolled in a pre-business curriculum. To enter the professional program in the College of Business, students must complete a minimum of 30 credits including the foundation courses and Engl 104 and Engl 105. Any unmet high school requirements and Engl 101 courses must also be complete. See Curriculum in Business.

Achievement of an Iowa State University cumulative grade-point average of 2.5 or a grade-point average of 2.5 in the foundation courses guarantees admission to the professional program in the College of Business for all majors except Management Information Systems, which requires a 2.75 grade-point average in one of these areas. Students that have not achieved guaranteed admission may be considered on a case-by-case basis.

Eligibility to apply for the University Honors Program also qualifies a student for admission to the professional program. Students who meet this criterion must still apply for admission to the professional program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If courses are repeated, foundation grades from Iowa State University are used instead of transfer foundation grades. With the exception of Acct 285 and MIS 330, pre-business students do not have access to business core classes. To facilitate registration, students may be conditionally admitted during the semester in which they complete the admission requirements.

Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available from the Andersen Undergraduate Services Center in the College of Business.

Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained from the Andersen Undergraduate Services Center in the College of Business. Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2001-2003 catalog: (1) A minimum of 124.5 semester credits are required. (2) At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college. (3) A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major. (4) The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned. (5) Students must achieve English proficiency by earning a grade at C or better in two of the three required English courses. (6) A student must earn a grade of C or higher in a minimum of 30 credits applied to the business major and the major. (7) A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution. (8) Business majors may not take business courses pass-fail. (9) Undergraduate Services Center in the College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2001-2003 catalog: (1) A minimum of 124.5 semester credits are required. (2) At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college. (3) A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major. (4) The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned. (5) Students must achieve English proficiency by earning a grade at C or better in two of the three required English courses. (6) A student must earn a grade of C or higher in a minimum of 30 credits applied to the business major and the major. (7) A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution. (8) Business majors may not take business courses pass-fail. (9) General education courses may not be taken P/NP. (10) No more than 9 elective credits may be taken P/NP.
Curriculum in Business

Leading to the degree bachelor of science with a major in accounting, finance, management, management information systems, marketing, production/operations management or transportation and logistics. The College also offers a secondary major in international business.

Total credits required: 124.5

</table>

1. Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curricula.

2. Substitutions can be made. See the Andersen Undergraduate Services Center in the College of Business.

3. Approved list of courses is available from the Andersen Undergraduate Services Center in the College of Business.

4. Courses for this requirement may also be used to fulfill other curriculum requirements or electives and therefore credits are not included in the sum needed.

Professional Program

Advising System

Students in the pre-business curriculum in the College of Business will be advised by a pre-business adviser. Following admission to the professional program students will be assigned a faculty adviser in their declared major. The adviser assists students to develop an academic program, access pertinent university resources and meet their educational objectives.

The college offers an orientation program each summer for new entering students. All students and family members are encouraged to attend the orientation session. During orientation the adviser and the student prepare an appropriate schedule and the student registers for courses. Placement examinations may be required in mathematics and English to assist in placing students in the appropriate level of courses if this cannot be determined by ACT/SAT scores, high school preparation classes or transfer courses.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.

Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.35 can be admitted either as associate or full members of the Honors Program. To qualify for full membership, students must have declared a major, developed a program of study, and have a minimum of 48 credits remaining before graduation.

Pre-business students in the College of Business may apply for associate membership in the honors program; students may apply for full membership after admission to the professional program. Special advisers will assist honors students in developing an appropriate program of study.
Internships
Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the College prior to the beginning of the internship. An internship adviser will assist students in making these arrangements.

Double Majors
Undergraduates with a primary major in the College of Business may complete another major in the College of Business. Those desiring a second major outside the college should refer to the catalog section of the appropriate college and department for the second major requirements.

Undergraduates with a primary major outside the College of Business wanting a second major in business must meet the admission requirements for the professional program, complete the business core courses, and the major specialization.

All students pursuing double majors or double degrees within the College of Business are required to have 15 credits of coursework in each major that is not used in the other major.

International Business Secondary Major
A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor
The College of Business offers a structured minor in general business to students outside the College. Requirements for the minor are Acct 285, Fin 301, Mgmt 370, MIS 330, Mkt 340, POM 320, and TrLog 360. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher.

Students wishing to earn a minor in business must meet the admissions requirements of the College of Business professional program (see admission standards to professional programs).

Students with a primary major in the College of Business may qualify for a minor specialization in one of the college’s departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher.

Students with a major outside the College of Business are eligible for a general business minor only—not a specialization in a business department.

Entrepreneurial Studies
Cross-Disciplinary Minor
The College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is only available to students outside the College of Business. Requirements for the minor include Mgmt 310, 313, and 9 credits from an approved list. The approved list is available in the Andersen Undergraduate Services Center in the College of Business. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University.

Nondegree Seeking Students
Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as nondegree seeking students. Nondegree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college’s admission requirements. Students who desire to take more than 9 credits, however, must meet the College’s professional program admission requirements and have approval of a department chair. Nondegree seeking students must meet all course prerequisites.

Graduate Study
Three programs are offered at the graduate level: a master of business administration (M.B.A.) program, a master of accounting (M.Acc.), and a master of science (M.S.) in business. These programs are intended to meet three sets of educational objectives.

The M.B.A. is the professional management education program for those pursuing careers in business. The purpose of this professional program is to provide professional business education by preparing students to understand the impact of technology on business organizations in a global environment. The M.B.A. program consists of a 48-credit curriculum leading to a nonthesis, noncreative component master of business administration. Students may pursue a specialization in accounting, agribusiness, finance, human resource management, information systems, manufacturing and quality or marketing.

The masters of accounting (M.Acc.) is a 32-hour degree. The program requires 15 hours of graduate accounting courses, at least 9 hours of nonaccounting graduate electives, a communications course and an international course from an approved list, and a 2-hour creative component. The M.Acc. is appropriate for any student wanting to pursue a variety of accounting careers. Additionally, the program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa.

The M.S. program, consisting of 30 minimum credits, is oriented toward further business specialization at the master’s level for students with undergraduate degrees or academic backgrounds in business. The program is intended to serve those students who desire specialized study of an area within business. Students in the program must complete a thesis. This program is also a suitable vehicle for students planning to pursue a Ph.D. in business.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), and statistics (M.B.A./M.S.-Statistics). Various departments in the College of Business participate in the following graduate level interdepartmental offerings: Industrial Relations (interdepartmental program), Information Assurance (interdepartmental program) and Transportation (interdepartmental major). The College of Business also offers a business administration minor to students with majors outside the college.
The College of Design is among a small, elite number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific environmental design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college’s undergraduate curricula are structured along three areas: general education, general design education, and discipline-specific education. General education and general design education are composed to insure that students receive a well-rounded undergraduate education and exposure to allied design disciplines. The intense, discipline-specific course sequences focus on developing students’ ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

The college’s programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, interior designers, studio artists, arts administrators, art educators, and environmental designers.

The College’s world wide web site includes additional information: www.design.iastate.edu

**Secondary Majors**
- Environmental Studies*
- International Studies*
- Transportation*

**Minors**
- Design Studies
- Entrepreneurial Studies*
- Environmental Studies*
- Gerontology*
- International Studies*
- Technology and Social Change*

*The College of Design participates in these interdepartmental secondary majors and minors.

**Graduate Curricula**

The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

**Majors**
- Architecture
- Architectural Studies
- Art and Design
- Art Education
- Community and Regional Planning
- Graphic Design
- Integrated Visual Arts
- Interior Design
- Landscape Architecture
- Transportation Planning*

**Double Degree Programs**
- Architecture/Community and Regional Planning
- Community and Regional Planning/Landscape Architecture
- Architecture/Business
- Community and Regional Planning/Public Administration

**Minors**
- Gerontology*

*The College of Design participates in these interdepartmental graduate programs.

**High School Preparation**

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended though not required for entrance. Students planning to enroll in an academic program of the College of Design must complete the following high school course requirements: 4 years of English to develop communication skills, critical reading and writing ability, including coursework in composition and literature, and, up to 1 year of speech and/or journalism; 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra; 3 years of science, including at least two of the following: 1 year of biology, 1 year of chemistry, or 1 year of physics; 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

**Special Requirements**

Students admitted into the departments of Architecture and Landscape Architecture are enrolled in preprofessional programs. Admission into the professional programs requires a separate application after completing the preprofessional program, depends on available resources, and is subject to review by faculty committee. Applicants must complete a specified core of courses and are reviewed on the basis of a portfolio of original work, scholastic performance, and a written essay.

Students enrolled in all curricula in the Department of Art and Design must complete a set of basic course requirements before entering a specific program of study. Admission into the graphic design and interior design programs depends on available resources and is subject to review by a faculty committee. Applicants are reviewed on the basis of a portfolio of original work, scholastic performance, and a written composition.

**Advising**

Each student receives personal assistance from an academic advisor within the student’s curriculum area. Students enrolled in the college’s preprofessional programs are advised by professional advisers. Once admitted to professional programs, students are assigned to faculty advisers. Advisers help students develop a program of study, access pertinent university resources, as well as provide information on career choice.

The college’s career services office works with students to develop their career goals as well as prepare and search for employment.

**Honors Program**

The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See Index, Honors Program.

**Requirements in the College of Design**

All students in the College of Design are expected to meet the following requirements of the college.
General Education

Minimum Credits

6 Biological sciences, physical sciences and mathematics
Includes courses in the fields of agronomy, astronomy and astrophysics, biology, botany, chemistry, civil engineering, computer science, geology, mathematics, physics, statistics, and zoology.

9.5 Communications
Engl 104*, 105*, Lib 160.
Includes courses in the fields of English (composition), and speech communication (interpersonal and rhetorical).

6 Humanities
Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women’s studies, and university studies.

6 Social sciences
Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, political science, psychology, sociology, and women’s studies.

9 Selected from the above areas.
Six credits must be at the 300 level or above.

36.5 Minimum credits
See departmental curricula for specific course requirements within the general education areas.

General Design Education

Cr.

3 History requirement:
A history course in the College of Design but outside the student’s curriculum area.

6-9 Options in studio, history, theory, criticism, and methods
At least two studio, history, theory, criticism, and/or methods courses in the College of Design but outside the student’s curriculum area.

9-12 Total credits (at least 3 credits must be at the 300 level or above)

*To meet requirements for graduation, a minimum grade of C– must be received.

Minor in Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of course work: three credits of history selected from College of Design course offerings and twelve additional credits selected from College of Design course offerings.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses in their major to satisfy this minor.

Curriculum in Architecture

The department offers undergraduate and graduate degree programs:

A 140-credit undergraduate professional program, preceded by a 29.5-credit preprofessional program, leading to the bachelor of architecture degree.

A three-part 100-credit program leading to the master of architecture. Applicants holding B.S. or B.A. degrees in architecture or environmental design are given advanced standing in this program. For applicants holding professional degrees in architecture (B.Arch. or M.Arch.), a 30-credit post-professional course of study is available.

A 30-credit graduate program leading to the degree master of science in architectural studies, a research oriented degree.

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

Students are advised to seek faculty counsel regarding a career in architecture. Most states require that an individual intending to become an architect hold an accredited degree. There are two types of degrees that are accredited by the National Architectural Accrediting Board: (1) The bachelor of architecture, which requires a minimum of five years of study, and (2) the master of architecture, which requires a minimum of three years of study following an unrelated bachelor’s degree or two years following a related preprofessional bachelor’s degree. These professional degrees are structured to educate those who aspire to registration or licensure as architects.

The four-year preprofessional degree, where offered, is not accredited by the NAAB. The preprofessional degree is useful as preparation for further study in a professional architecture degree program or for employment options in a related field.

Curriculum in Art and Design—B.F.A.

Leading to the degree bachelor of fine arts degree. Total credits required: 120.5.

This curriculum offers two concentrations for the student: visual communications and studio research.

Admission into the art and design B.F.A. curriculum is subject to completion of a minimum of 24.5 credits including Art 108, 109, 110, 130, Art H 181, Engl 104 and 105, Lib 160, 6 credits in general education coursework, and 15 credits in recommended studio coursework. A portfolio review will take place at the end of the second year to guide the student into the appropriate BFA concentration.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present this portfolio of work upon admission and prior to registration for classes.

Cr. Degree Requirements

36.5 General education

6 min. Biological and physical sciences and mathematics
Select from Astro 120, 150, Biol 109, 123, 201, 202, Bot 102, 202, Chem 160, 163, 183L, Com S 103, 107, Geol 100, 101, Gen 260, Math 104 or 150, 105, 140, 141, 151, Mteor 206, Phys 101, 106, Stat 101, 104, Zool 155, 258, or any higher level course in these disciplines for which these courses are prerequisite.

9.5 min. Communications

6 Engl 104 and 105
3 Select from CmDis 286, ComSt 101, 102, Sp Cm 212
0.5 Lib 160

6 min. Humanities

6 min. Social sciences
Select from Anthr 201, 202, 306, Econ 101, 102, Pol S 215, 230, 241, 251, Psych 101, 230, Soc 130 or 134, or any higher level course in these disciplines for which these courses are prerequisite, or select from Am In 210, Env S 201, 223, HD FS 102, 239, 276, 283, 349, 367, 370, 373, 377, 378, 380, 395, Jl MC 101, 205, 320, 453, 474, 476, W S 201, 301, 321, 323, 327, 346, 350, 385, 386, 401.

9 min. Selected from the above areas and/or from CmDis 275, 286, ComSt 101, 102, 214, 310, 311, 314, 317, 318, Engl 205, 219, 220, 302, 303, 304, 305, 306, 309, 310, 314, 315, 316, Fin 351, 357, Mgmt 370, Mkt 340, Sp Cm 212, 305, 312, 321, 322, 323, 325, 327. Six credits must be at the 300 level or above.

6 min. General design education*

3 History of Design—Art H 181**
3 Select from Dsn S 129, or other approved course from Arch, Art H, C R P or L A.

24 Art and design core

6 Visual Foundations I and II—Art 108, 109
R Orientation to Art and Design—Art 110
6 Drawing I and II—Art 130, 230
6 History of Art I and II—Art H 280, 281
6 Art history selections (300 level or above)

** The general design education requirement of 6 credits will be fulfilled within the studio requirement of the individual concentration.

** Transfer students with more than 60 credits must substitute another design studies course to meet this requirement.

Visual Communications Concentration

(Note: Portfolio review at end of second year)

6 Visual Communications Foundation
ArtIS 301—Foundations of Visual Literacy
ArtIS 310—Sources of Visual Design

9 ISA Studio Exploratory
Select three (3) courses from the following ArtIS offerings:

18 Visual Communications Career Focus Approved program of study. At least 6 credits must be at or above 300 level.

3 Art 497—Internship

3 Select from Art History or Studio

2 Art 499 FBA Seminar and Exhibition

120.5 Total credits

Studio Research Electives

(Note: Portfolio review at end of second year)

15 Introduction to Studio Concentration

24 Studio options
Select from a combination of two and three dimensional studio courses, ArtIS 300-400 level. Recommended: Art 497 Internship.

3 Art History
Select from Art H 300-400 level courses

2 Art 499 FBA Seminar and Exhibition

10 Electives

120.5 Total credits
**Curriculum in Art and Design—B.A.**

Leading to the degree bachelor of arts degree. Total credits required: 120.5.

This curriculum offers a general concentration in studio in combination with an applied career minor or approved program.

Admission into the art and design B.A. curriculum is subject to completion of a minimum of 24.5 credits including Art 108, 109, 110, 130, Engl 104 and 105, Lib 160, 3 credit selected general design education course, and 6 credits in general education coursework.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in these courses in order to have the credits apply toward studio requirements. Students are advised to present this portfolio of work upon admission and prior to registration for classes.

**Curriculum in Community and Regional Planning**

Leading to the degree bachelor of science. Total credits required: 128.5.

Areas of specialization include: land use and transportation planning; housing and social planning; community economic development; environmental planning and urban design. Students can also work with their advisors to design their own areas of specialization.

Curriculum in Graphic Design

Administered by the Department of Art and Design. Leading to the bachelor of fine arts degree. Total credits required for graduation: 123.5. Curriculum is planned for students preparing to enter the professional field of graphic design.

Consideration for admission into the graphic design curriculum requires completion of at least one year of study at ISU. Admission is based on department resources and will be determined by overall cumulative grade point average following completion of 23 credits including the following courses: Art 108, 109, 110, 130, ArtGr 177, Art H 181, Engl 104 or 105, and 6 credits of general education. A portfolio review also will be a significant factor in the admission review process.

On admission to the program, the faculty strongly recommend the purchase of a laptop computer and software. Specifications for the laptop computer and software are available at www.design.iastate.edu under the “Students” link.

Transfer students with studio credits from other colleges and universities must present for departmental review a portfolio of work done in these courses in order to have the credits apply toward studio requirements. Students are advised to present this portfolio of work upon admission and prior to registration for classes.

Curriculum in Interior Design

Administered by the Department of Art and Design. Leading to the bachelor of fine arts degree. Total credits required for graduation: 127.5. Curriculum is planned for students preparing to enter the professional field of interior design.

Admission is based on department resources and will be determined by rank order, based on three factors: A. Overall cumulative grade point average following completion of 27 credits including the following courses: Art 108, 109, 110, 130, ArtID 160, 160S, Art H 181, Engl 104 or 105, and 6 credits of general education; B. A written composition and; C. Portfolio review.

Transfer students with studio credits from other colleges and universities must present for departmental review a portfolio of work done in these courses in order to have the credits apply toward studio requirements. Students are advised to present this portfolio of work upon admission and prior to registration for classes. Admission of transfer students is contingent on available places in the program.

## Curriculum in Landscape Architecture

The department offers a 5-year curriculum, requiring 149.5 credits, leading to the degree bachelor of landscape architecture. These credits are distributed between a one-year preprofessional program of 32.5 credits and a 4-year professional program of 117 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the preprofessional program. Applicants must complete a specified core of courses and are reviewed on the basis of a portfolio of original work, scholastic performance, and a written essay.

149.5 Total credits

1. Select from department approved list.

At least two elective courses must be from an L A professional elective list approved by the department.

Graduate students pursuing the M.L.A. may concurrently enroll in the undergraduate program to earn the B.L.A. The actual courses required will vary according to each student’s landscape architectural skill level upon admission as determined by a faculty committee.

For more information, students should contact the department office.
## Department of the College

**Curriculum and Instruction**

Educational Leadership and Policy Studies

Industrial Education and Technology

The College of Education is a diverse college guiding students as they prepare to work with people in different organizations. Degree programs include teacher education, preparation for professions in health and exercise, manufacturing and safety in industry, and professional programs at the graduate level. The College of Education, in conjunction with other colleges, offers licensure programs for early childhood education, elementary, secondary, and community college teaching; school principals and superintendents, as well as school media specialists, special education and school counseling. In addition, certification programs also exist for students in the Department of Health and Human Performance and the Industrial Technology program.

A person who is to work effectively with people needs broad personal and professional knowledge and understanding. The College of Education strives to provide each student with a sound general education as well as preparation in an area of specialization.

**Recommended High School Preparation**

Recommended preparation for students entering most departments of the College of Education should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and 3 years of social science and/or humanities. In addition, students interested in Elementary Education or Early Childhood Education are advised to complete three or more years of high school study in one foreign language.

**Advising System**

Each student in the College of Education works closely with an academic advisor who is associated with the curriculum in which the student is majoring. Advisors assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisors attempt to adjust each student’s schedule of course work in accordance with the student’s interests and capabilities.

The college offers an orientation program during the summer for students planning to enter in the fall. Incoming students are encouraged to attend the orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

## Curricula and Special Programs in the College of Education

### Community Health Education—Options: Community and Public Health, Substance Abuse Prevention, Wellness/Fitness.

### Early Childhood Education—(Administered jointly by the Department of Curriculum and Instruction in the College of Education and the Department of Human Development and Family Studies in the College of Family and Consumer Sciences.)

### Elementary Education.

### Exercise and Sport Science—Options: Athletic Training, Exercise Science, General Exercise and Sport Studies, Physical Education Licensure, Sport Management.

### Industrial Technology—Options: Manufacturing, Occupational Safety.

### Secondary Education. The College of Education provides secondary education licensure programs in conjunction with subject matter areas of agriculture, art (master’s program only), biology, chemistry, earth sciences, English, foreign languages, general sciences, health, family and consumer sciences education, mathematics, music, physical science, physics, social studies, and speech. See Index, Teacher Education.

The College of Education offers coaching and health endorsements to students who want to add additional teaching areas to their primary licensure program.

The Departments of Educational Leadership and Policy Studies and Curriculum and Instruction offer work for the degrees master of education, and doctor of philosophy with a major in education. They also offer minor work to students majoring in other fields of study. In the Department of Educational Leadership and Policy Studies, students may complete the Ph.D. with a major in education and a specialization in educational leadership. At the master’s level, students may specialize in counselor education; educational administration; higher education; organizational learning and human resource development; and research and evaluation.

### Minors

Athletic Coaching

Athletic Training

Dance

Educational Computing

Health Studies

**Graduate Curricula**

Graduate study in the College of Education is conducted through the Graduate College. Details are found in the Graduate College section of this bulletin.

### Honors Program

The College of Education Honors Program provides an opportunity for students with a 3.35 grade point average or higher to complete their course of study in the University Honors Program. For more details, contact the academic advisor, the College Honors Committee, or see Index, Honors Program.

### International Studies (secondary major only)

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see Index, International Studies).

### The General Education Requirement

Students in the College of Education and all prospective teachers are required to complete a program in general education which is integrated with their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific vocational preparation. It is recognized that many contributions to general education may be made by courses which have other primary objectives.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in five groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

This total will include Engl 104 and 105, Lib 160, and credits used to satisfy University requirements in the areas of U.S. Diversity and International Perspectives.
**Teacher Education and Licensure**

All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the teacher education program and be recommended by the College of Education.

Each student will be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.

For details concerning the professional teacher education requirements and the areas of specialization requirements, see *Teacher Education, Courses and Programs*. Information disclosure for students and employees is available at www.iastate.edu/~disclosure/.

---

**Curriculum in Community Health Education**

Administered by the Department of Health and Human Performance, the curriculum in community health education was developed to prepare professionals in diverse fields within health education. Students electing to major in Community Health Education may select one of three career options: 1. Community/public health; 2. Substance abuse prevention; or 3. Wellness/fitness. Various certifications are available upon successful completion of the options within the curriculum.

For students preparing to teach grades 7-12, health studies may be added to their primary licensure area. See *Teacher Education*.

**English Proficiency**

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in Engl 104 and Engl 105, with neither grade below a C-. Students not meeting this condition must earn a C or better in an advanced writing course (select from Engl 220, 302, 309, or 314).

**U.S. Diversity and International Perspectives**

In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See university approved list.

Total credits required: 124 (46 credits in courses number 300 or above.)

**Option 1: Community/Public Health (20 cr.)**

This option emphasizes health promotion and disease prevention and prepares students for professional involvement in community health agencies which incorporate health services and the educational process. Students will be prepared for employment in state and public health agencies, volunteer health agencies, hospitals (patient education), and industry (health and wellness programs). Graduates are eligible to take the National Certified Health Education Specialist (CHES) exam which recognizes qualified specialists in the diversified field of health education.

**Option 2: Substance Abuse Prevention (24 cr.)**

This option is designed to meet the needs of students who are interested in becoming certified substance abuse prevention specialists. To be eligible for Iowa Board of Substance Abuse Certification, students need 2000 hours of an approved supervised internship within the CHE major. Preventionists are employed in state health departments, state education departments, school districts and private and public agencies which have prevention programs.

6.5-7.5 Electives
Curriculum in Early Childhood Education

The curriculum in early childhood education is planned for students preparing to teach early childhood (preschool and primary) classrooms or home-based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies including schools. This curriculum has been approved by the Iowa Department of Education and meets the state requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home-based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies including schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is jointly administered by the Department of Curriculum and Instruction within the College of Education and the Department of Human Development and Family Studies within the College of Family and Consumer Sciences.

For details concerning the professional teacher education requirements and admission to the undergraduate teacher education program, see Teacher Education, Courses and Programs.

English Proficiency
In order to meet graduation requirements, all students must earn a C (2.0) or better in Engl 104 and Engl 105.

U.S. Diversity and International Perspectives
In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See department advising office for approved lists of courses.

Foreign Language Requirement
Early childhood education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language). The requirement may be met by completion of three or more years of high school study in one foreign language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101-102 on a remedial basis, they will be graded S-F.

Total credits required: 129.5

Curriculum in Elementary Education

The curriculum in elementary education is planned for students preparing to teach in grades kindergarten through six. For additional information, see Index, Elementary Education. Teaching endorsements in areas closely related to elementary education, including a special education endorsement in multicategorical resource teaching, are available for elementary education majors. See Teacher Education, Courses and Programs, for information about specific endorsements. Additional teaching endorsements, available at the graduate level to individuals who hold a valid Iowa teaching license, include the following: K-6 foreign language, reading, special education (behavior disorders, learning disabilities, multicategorical self-contained), and talented and gifted.

English Proficiency
In order to meet graduation requirements, all students must have a C (2.0) or better for each of Engl 104 and Engl 105.

U.S. Diversity and International Perspectives
In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See department for approved lists of courses.

Foreign Language Requirement
Elementary education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language). The requirement may be met by completion of three or more years of high school study in one foreign language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101-102 on a remedial basis, they will be graded S-F.

Total credits required: 135.5
Curriculum in Exercise and Sport Science

The curriculum in Exercise and Sport Science is planned for students preparing to teach physical education or to enter related professional areas. The student majoring in Exercise and Sport Science may select one of five options: (1) physical education licensure; (2) exercise science; (3) athletic training; (4) sport management; or (5) general exercise and sport studies.

Minors in dance, and athletic coaching are available; the requirements appear under Health and Human Performance, Courses and Programs.

A major in Performing Arts with a dance emphasis is available; the requirements appear under Curriculum in Performing Arts in Theatre.

English Proficiency

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in Eng 104 and 105, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course (select from Eng 220, 302, 309, or 314).

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See university approved list.*

Total credits required: 124 (46 credits in courses numbered 300 or above).

Option 2. Exercise Science

This option prepares students for careers in the physical fitness/health field. It is designed for those who wish to prepare for professional roles as exercise specialists or program directors in corporate fitness programs, health clubs, cardiac rehabilitation programs, or other public and private agencies providing physical fitness activities.
Option 3. Athletic Training

The CAAHEP accredited athletic training option prepares students for the NATA BOC certification examination or for graduate work in athletic training. Admission to the athletic training option is competitive and based on available department resources and will be determined on the basis of grades in foundation courses and other performance factors. Details are available from the Health and Human Performance Advising Office or the Athletic Training Education Program Director.

Option 5. General Exercise and Sport Studies

The general exercise and sport studies option is planned for students who are interested in an interdisciplinary approach to the study of human movement. In this option, exercise and sport science is combined with a concentration in another area of study to support an individualized program, such as sports information, or other sport related fields. This option also provides preprofessional training for students who are preparing for advanced study leading to careers in physical therapy, medicine, or other allied health programs.

R Search Strategies for Field Experience and Employment—Ex Sp 385

26 Meet the requirements of a specialization area in a related field (area and program must be approved by the Department of Health and Human Performance).

5-5-29.5 Electives
Curriculum in Industrial Technology

The industrial technology curriculum prepares students for professional positions that emphasize technical management in industry, business, or government. The Bachelor of Science degree program stresses computer applications, technical management, production processes and product quality. The curriculum has been designed to assist students to develop a comprehensive understanding of the interaction of people, planning, machines, tools, equipment, safety and production processes, in manufacturing settings. Extensive laboratory experiences are incorporated into most courses. The program seeks to develop problem solving abilities and creativity to assist graduates in meeting technical requirements, human expectations, and regulatory requirements in contemporary manufacturing settings.

Students majoring in industrial technology select one of the two options: manufacturing or occupational safety.

English Proficiency In order to meet graduation requirements, all students must earn an average of C (2.0) or better in all English courses taken, including Engl 104, Engl 105, and one of the following: Engl 309 or Engl 314.

U.S. Diversity and International Perspectives In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. Courses that are acceptable for meeting these requirements are listed on the University website.

Total credits required: 120.5-123.5.

For additional information see Index, Industrial Technology.

Industrial Technology Major

Cr. 44.5

1 Introduction to Industrial Technology—I Tec 110
2 Introduction to Design in Industrial Technology—I Tec 120
3 Introduction to Non-metallic Manufacturing Materials and Processes—I Tec 130
4 Electrical Fundamentals—I Tec 140

Materials Science and Engineering
Mechanical Engineering

Engineers occupy a uniquely important position in our modern civilization. They have the responsibility for taking the discoveries of basic science and translating them into processes, materials, products, structures, facilities, and services for society.

Objectives of Curricula in Engineering
Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work.

Experiences contained within the programs are intended to develop in each student an ability to apply knowledge of mathematics and science to engineering problems; an ability to design and conduct engineering experiments, including analyzing and interpreting data from experiments; an ability to design a system, component, or process to meet desired needs; an ability to function on multi-disciplinary teams in the solution of engineering problems; an ability to identify, formulate, and solve engineering problems; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and national context; a recognition of the need for and an ability to engage in lifelong learning; a knowledge of contemporary issues; and, an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states. Seniors in accredited curricula (accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology) of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Four engineering departments offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The departments offering concurrent B.S./M.S. degree programs are: Agricultural and Biosystems Engineering, Chemical Engineering, Civil and Construction Engineering, Electrical and Computer Engineering, and Materials Science and Engineering. Refer to the Graduate Study section for each department for more information.

Advanced work in engineering is offered in the postgraduate programs. See the Graduate College section of this catalog.

Accreditation
Twelve curricula in the college of engineering are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). The Engineering Accreditation Commission Accreditation Board for Engineering and Technology 111 Market Place, Suite 1050 Baltimore, MD 21202-7700 Phone: 410-347-7700 WWW: http://www.abet.org
Accreditation status is indicated at the beginning of the courses and programs section of each engineering curriculum.

Organization of Curricula
All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students must complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula
High school credits particularly important to students wishing to study engineering include 2 years of algebra, 1 year of geometry, and 1/2 year of trigonometry; 1 year each of chemistry and physics, and 4 years of English. See Index for specific admission requirements.
Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Basic Program for Professional Engineering Curricula
The first year program is much the same for all professional curricula in the College of Engineering. Each curriculum requires completion of the basic program as well as the curriculum designated requirements. The basic program is a set of courses common to all engineering curricula, while the curriculum designated requirements are courses required by individual curricula. The student who desires to receive the bachelor’s degree in a minimum time will find it desirable to select a curriculum as soon as possible.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing one of Math 141, 142 or 149 before enrolling in Math 166 or C E 160.

The Department of English may recommend placement in one or more sections of Engl 101 because of unsatisfactory performance on the English placement test administered to students whose first language is not English.

Curriculum Designated Requirements

Aerospace Engineering—Aer E 161 (3 cr.), Aer E 192 (R)
Agricultural Engineering—Chem 167L (1 cr.) or 177L (1 cr.), A E 110 (1 cr.), Engr 170 (3 cr.)
Chemical Engineering—Chem 177*, 177L (1 cr.), 178 (3 cr.), 178L (1 cr.)
Civil Engineering—Chem 177*, 177L1 (1 cr.), Chem 178* (3 cr.), Chem 178L1 (1 cr.), C E 104 (1 cr.), C E 160**, C E 170 (2 cr.), C E 111 (3 cr.)

(Physics 221 scheduled in sophomore year for students selecting option 1 of the chemistry/physics sequence.)
Computer Engineering—Com S 227 (3 cr.), 228 (3 cr.), Cpr E 183** (2 cr.) and 184 (2 cr.) E E 166 (R cr.)

Construction Engineering—Com E 110 (R cr.), Psych 101 (3 cr.), Engr 170 (3 cr.)

Electrical Engineering—E E 183** (2 cr.) and 184 (2 cr.) Com S 207 or 227 (3 cr.), E E 166 (R cr.)

Engineering Applications—SSH elective (3 cr.)

Engineering Science—Chem 167L (1 cr.), Engr 170 (3 cr.)

Industrial Engineering—E 101 (R cr.), SSH elective (3 cr.), Engr 161**

Materials Engineering—Chem 177*, 177L (1 cr.), 178 (3 cr.), 178L (1 cr.), Engr 170 (3 cr.), (Physics 221 scheduled in sophomore year.)

Mechanical Engineering—Chem 167L (1 cr.), Engr 170 (3 cr.), M E 102 (R cr.)

The student’s adviser may require or recommend courses in addition to those specified above if the preparation and progress of the student are such that additional courses are necessary or desirable.

*Students planning to enroll in A E (Biosystems Engineering Option), C E, Cpr E, or Mat E will find Chem 177 to be a better preparation for Chem 178. However, Chem 167 is accepted as a substitute for 177 for those students declaring one of these curricula after having completed 167. Chem 155-165 sequence is an acceptable substitute for Chem 167.

**Recommended choices by program:
C E: E E 160 (3 cr.)
Cpr E: Cpr E 183 (2 cr.) and Cpr E 184 (2 cr.) E E: E E 183 (2 cr.) and E E 184 (2 cr.)
I E: Engr 161 (3 cr.)

Students enrolling in Cpr E and E E must take both 183 and 184 in order to meet basic program requirements. However, credit hours for graduation will be given for any of Engr 160, Engr 161, Cpr E 183 and 184, E E 183 and 184, or C E 160 without increasing a curriculum’s minimum number of credits required for graduation. Students in Cpr E or E E who take 160 or 161 will have their technical elective requirement increased by 1 credit hour.

Students in the general emphasis in C E have two chemistry/physics sequence options.

Option 1—Students taking Chem 177, 177L, 178, 178L are required to take only one physics course, Phys 221.

Option 2—Students may substitute Phys 222 for Chem 178, 178L.

The following are the only exceptions to this rule:

a. Students who have completed all of their coursework while enrolled in the College of Engineering, but have not met the two basic program requirements, may enroll for more than one semester in 200-level or above courses offered by departments in the College of Engineering. This exception may be extended to two semesters for students whose curriculum requires Chem 178 and 178L (i.e. Ch E, C E 1, and Mat E).

b. Students transferring to the College of Engineering from another college or university, or from a program outside this college, who have not met the two basic program requirements may enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering.

c. Iowa State students not pursuing an engineering degree may generally take engineering courses without restrictions provided they meet the prerequisites and space is available.

d. Only the first two semesters of 200-level and above engineering courses, taken at ISU while a student is not enrolled in the College of Engineering, can be applied toward an engineering degree.

1General Emphasis Program option 1 with Chem 177, 177L, 178, and 178L, and Environmental Specialization Program.

**Requirement for Graduation**

In order to graduate in a professional engineering curriculum, a student must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 nor more than 48 semester credits.

**Engineering Minors**

The College of Engineering offers an undergraduate minor in Nondestructive Evaluation. It is open only to engineering students who have met the basic program requirements and are not on temporary enrollment. The NDE minor consists of one common core course, at least two NDE specific technique courses and at least two supporting courses. Both technique and supporting courses must be selected from lists approved by the advisory committee. A student’s minor program in Nondestructive Evaluation must include at least nine credits which are beyond the total used to meet curriculum requirements. The minor is supervised by an interdisciplinary faculty committee. Interested students may contact the AEEM department to obtain more specific guidelines and requirements.

**Advising System**

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to maintain close contact with students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall and during the fall for students planning to enter in the spring. All entering students are encouraged to attend an orientation session. Tests given during the orientation program help determine the student’s level of achievement and enable the adviser to prepare an appropriate program for the student.

**Special Programs**

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience.

**a. Cooperative Education Program**

The College of Engineering offers, through its curriculum, a cooperative education program. Enrollment in the program allows students to gain practical experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional year to complete curriculum requirements.

These programs are arranged so that the student alternates academic work with employment periods. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student’s potential as a future full-time employee. Both domestic and international co-op programs are available.

Cooperative education students pay no fees to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (298, 398, or 498) for each work period and are considered full time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

**b. Internship Program**

Internships are a mechanism by which a student may work full-time for one semester while maintaining her/his status as a full-time student.

Internship students pay no fees to the university during their work periods and do not receive credit hours for their work experience. Students may register for the internship course (397) for a fall or spring semester work period or (396) for the summer term are considered to be full time students. For additional information contact your academic adviser and the Office of Engineering Career Services.
## Curriculum in Aerospace Engineering

Administered by the Department of Aerospace Engineering and Engineering Mechanics.

Leading to the degree bachelor of science. Total credits required: 127.5. See also Basic Program and Cooperative Programs.

### English Proficiency

The department requires a grade of C (2.0) or better in Engl 104 and 105 to be eligible for English Proficiency Certification. Students satisfying this requirement who are not cited for deficiencies in reports, laboratory reports, or other writings required in other courses, are certified during the semester prior to their semester of graduation. Students not satisfying these requirements are referred to the department’s Academic Standards Committee for corrective action.

1The social sciences and humanities (SSH) electives are to be selected from the department-approved list of courses, subject to department guidelines. Not to be taken under the P-NP policy.

2Twelve elective credits scheduled to be taken at the senior year are of three types: (1) Aerospace Program Technical Electives, 3 credits; (2) Technical Electives, 3 credits; and (3) Career Electives, 6 credits. Aerospace Program Technical Electives and the Technical Electives must be chosen from department-approved lists for each type. All electives must be chosen following published department guidelines. These courses are not to be taken under the P-NP policy.

### Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

With options in biosystems engineering, environmental and natural resources engineering, food and process engineering, power and machinery engineering, and structures and environmental systems engineering. Administered jointly by the College of Agriculture and the College of Engineering. Leading to the degree bachelor of science. Total credits required: 127.5. See also Basic Program and Cooperative Programs.

English Proficiency
The department requires a grade of C or better in Engl 104 and 105 (or 105H) and a grade of C or better in the course taken to meet the communication requirement.

Social sciences and humanities (SSH) electives are to be chosen from the department-approved list. The courses chosen must meet departmental requirements.

After the freshman year, each student elects one of the options and takes courses listed for the selected option. The elective courses must be selected from the department-approved list.

One course must be taken from Sp Cm 212, Engl 309, Engl 314.

*Core professional curriculum. A student must have a minimum grade-point average of 2.00 in this group of courses in order to graduate.

Options

**Biosystems Engineering**—A E 363, 409; 6 credits from A E 451, 465, 469; 6 credits from Micro 201, 302; Biol 301, BBMB 301, 451; Biol 202; Ch E 356, 357; Chem 178, 231, 231L; and 11 credits from department-approved electives list.

**Environmental and Natural Resources Engineering**—A E 303, 363, 409, 422; Agron 154; Biol 202; Chem 231, 231L; C E 326, 360, 372; E M 378; Micro 201 and 8 credits from department-approved electives list.

**Food and Process Engineering**—A E 363, 409, select 6 credits from A E 451, 465, 469; Biol 202; Chem 231, 231L, Ch E 356 or E M 378; Ch E 357; FS HN 311, 420, Micro 201; and 12 credits from department-approved electives list.

**Power and Machinery Engineering**—A E 303, 342, 363, 413, 447; select one course from A E 404, 408, 422, 478, ME 436; Agron 154; E M 345, 378; Mat E 272; M E 324, 325; 3 credits in biological and natural resource science from department-approved list; 7 or 8 credits from department-approved electives list.

**Structures and Environmental Systems Engineering**—A E 363, 404, and 3 credits from A E 342, 422, 451, 465, 469; and 6 credits from A E 471, 472, 473, 478; M E 378; ME 436; 6 credits biological and natural sciences from department-approved list; and 17 or 18 credits from department-approved electives list.

**Curriculum in Chemical Engineering**

Leading to the degree bachelor of science. Total credits required: 125.5. See also Basic Program and Cooperative Programs.
Students appointed to advanced Engineering.

English Proficiency
Students receiving a grade of C or better in Engl 104 and 105 meet the proficiency requirement of the department. Students not meeting this condition must fulfill an advanced composition requirement specified in the 2001-2003 Student Guide to Civil Engineering.

Junior Year

First Semester
1 General Education Elective
4 Computer Systems Organization and Architecture—Cpr E 305*
3 Data Structures and Algorithm Analysis—Com S 311*
1 The Engineering Professional—E E 391
3 Technical Communication—Engl 314
14

Second Semester
3 Computer Engineering elective
3 Technical elective
3 Mathematics elective
3 General education elective

2 Digital Systems Design II—Cpr E 492
3 Computer Engineering elective
3 Computer Science elective
3 Technical elective
3 General education elective
14

Transfer Grade Requirements
The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1General Education Electives—Students must propose and have approved by their faculty adviser a general education program of 15 credits that meets the university diversity and international perspectives requirements and an objective developed by the student. Courses chosen must not be remedial courses in the university, six (6) credits must be chosen at the 300 level or higher, and courses in engineering, physical and mathematical sciences must not be included. Pass-Not Pass credit is not accepted.

2Computer Engineering, Computer Science, and general technical electives must be chosen to satisfy departmental requirements concerning content, distribution, and level. All technical electives must be chosen from lists approved by the department. Details are available in the E CPE Undergraduate Student Services Office or on the Web. Pass/not pass credit not accepted. Six credits of Computer Engineering, three credits of Computer Science, and six credits of general technical electives are required. One credit of 490 may be used to partially meet these requirements.

3The student must choose one of the following math courses (pass/not pass credit not accepted): Math 273, 307, 314, 317, 365, 385, 395, 471 or 481. Credit in 490 may not be used to fulfill this elective requirement.
Outcomes Assessment: Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses. Prerequisite material exams are given at key points in the curriculum. These exams are to assist student evaluation of progress made during the academic experience as the material covered in several courses are the foundation of more advanced courses. The results of these assessments are also used to evaluate the curriculum and to implement improvements.

Core professional curriculum. A student must have a minimum grade-point average of 2.00 in this group of courses in order to graduate.

Curriculum in Construction Engineering

Administered by the Department of Civil and Construction Engineering.

Leading to the degree bachelor of science. Total credits required: 122.5 Building emphasis; 123.5 Heavy emphasis; 125.5 or 126.5 Mechanical/Electrical emphasis. See also Basic Program and Cooperative Programs.

B - Building construction emphasis.

H - Heavy construction emphasis.

M/E - Mechanical/Electrical construction emphasis.

Undesignated courses are for all emphases.

English Proficiency

All English courses taken, including those in the Basic Program, require a grade of C or better. A C– grade or less requires additional composition coursework.

¹ Chosen from curriculum-approved lists. All electives must be taken for a grade. Pass-Not Pass grades are not acceptable.

² Social sciences and humanities (SSH) electives chosen from curriculum-approved list. One of these must have a prerequisite of Psych 101 or a previously taken social sciences and humanities elective. Most students meet university requirements for diversity and international perspective by selecting appropriate courses from this area.

³ All English courses taken, including those in the basic program, require a C or better. C- or less requires additional composition coursework. All electives must be taken for a grade. Pass/not pass credits are not acceptable.

¹Core professional curriculum. A student must have a minimum grade-point average of 2.00 in this group of courses in order to graduate.

Curriculum in Electrical Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree bachelor of science. Total credits required: 125.5. See also Basic Program and Cooperative Programs.

Sophomore Year

Cr. First Semester
4 Electric Circuits—E E 201
4 Introduction to Digital Design—Cpr 210
4 Elementary Differential Equations and Laplace Transforms—Math 267
5 Introduction to Classical Physics II—Phys 222
17

Cr. Second Semester
4 Electronic Devices and Circuits—E E 333
4 Introduction to Microcontrollers—Cpr E 211
4 Calculus III—Math 265
3 Theory of Matrices—Math 307
15

Junior Year

Cr. First Semester
3 Energy Systems and Power Electronics—E E 303
3 Introduction to Electromagnetic Fields—E E 312
3 Semiconductors Materials and Devices—E E 332
3 Signals and Systems—E E 321
3 General education elective¹
1 The Engineering Professional—E E 391
16
Curriculum in Engineering Applications

Administered by a supervisory committee appointed by the dean of the College of Engineering.

Leading to the degree bachelor of science.

Total credits required: 121.5. Additional credits required for some emphases. See also Basic Program and Cooperative Education Program.

English Proficiency

The department requires a grade of C (2.0) or better in Engl 104 and 105 to be eligible for English Proficiency Certification. Students satisfying this requirement who are not cited for deficiencies in reports, laboratory reports, or other writings required in other courses are certified during the semester prior to their semester of graduation. Students not satisfying these requirements are referred to the department’s Academic Standards and Program Quality Committee for corrective action.

¹Any of the following courses are acceptable for satisfying the communications skills elective: Engl 220, 302, 309, 314, 415; Sp Cm 212.
²These electives are to be chosen from the department-approved list of social sciences and humanities (SSH) courses. At least one sequence consisting of two or three courses is required as part of the 15 credits of social sciences and humanities electives.
³Each student will select electives that support their educational goals and objectives statement. Electives must be approved by the adviser.
⁴Design courses in Aerospace Engineering, Computer Engineering, Electrical Engineering, Industrial Engineering, or Mechanical Engineering may be appropriate for some students based on the area of emphasis selected by the student. Appropriate substitutions may be made with the advice and approval of the student’s advisor.
⁵Any of the following courses are acceptable for satisfying the computational methods requirement: Aer E 361, Math 273, 471, 481.

*Core professional curriculum. A student must have a minimum grade-point average of 2.00 in this group of courses in order to graduate.

English Proficiency

The department requires a C grade (2.0) or better in Engl 104 and 105.

*Core professional curriculum. A student must have a minimum grade-point average of 2.00 in this group of courses in order to graduate.

¹These electives are to be chosen from department-authorized lists with advance approval.
²These social sciences and humanities (SSH) electives must be chosen from a department-approved list and must include at least one 6-credit sequence of prerequisite or related courses. At least 6 credits of 200 level or above electives must be included.
³The IMSE curriculum provides students with the opportunity to obtain depth in a topic area of their choice. Two courses, selected from a department-approved list, must be taken from one of the following areas:

Operations Research: which is concerned with the design and analysis of quantitative models and methods having applications in production and service systems such as inventory control, scheduling, transportation, and logistics.

Manufacturing: which is concerned with the design, analysis, operation, and control of manufacturing processes and systems.

Human Factors: which is concerned with the relationships between people and their work tasks, machines, information, and environment.

Enterprise Computing and Information Management: which is concerned with the integration of information within the functional units of an enterprise as well as between multiple enterprises.

Engineering Management: which is concerned with the strategies necessary for solving internal and external problems of a company in areas such as production, quality, project management, sales, and marketing strategies.

General: for students who did not want to specialize in any of the four focus areas above, can choose to combine electives from a number of areas.

Courses. At least 6 credits of 200 level or above electives must be included.

**English Proficiency**

The Department requires a minimum of C– in both Engl 104 and 105 with at least a 2.00 average for the two courses.

1 General Education electives must be chosen from department-approved lists and must include Econ 101 or 102, at least six credits in the social sciences. Students must select courses that also satisfy the diversity and international perspective requirements of the university. No more than three 100 level courses are allowed.

2 All technical electives must be chosen from a department-approved list. Students must take a minimum of six credits of electives identified on the approved list as mechanical engineering technical electives. Suggested areas of specialization are the following:

- Energy conversion and utilization—M E 444, 446, 447, 448, 449; E E 456, 457; I E 305.
- Materials and Manufacturing—M E 520, 521, 522, 529; E M 514, 568, 569, 580; Mat E 318, 443, 444.
- Thermal and environmental engineering—M E 441, 442, 444, 445, 446, 447, 448, 449, 475, 530, 531, 532, 536, 538, 539, 540, 542, 545, 546, 547, and applicable courses in other departments.
- Propulsion—M E 445, 447, 448, 542, 548; Aer E 312, 412.
- Nuclear Power—M E 431, 585.

3 The design elective must be chosen from M E 415, 442, 446, 449 or 466.

*Core professional curriculum. A student must have a minimum grade-point average of 2.00 in this group of courses in order to graduate.
The College of Family and Consumer Sciences (CFCS) is committed to advancing the well-being of families, consumers, and related business organizations through the creation, application, and dissemination of knowledge. These objectives are accomplished by fostering a supportive community committed to optimizing student learning, promoting high quality scholarship that addresses important issues for individuals, families, communities, and related business organizations, and engaging key constituents and partners in addressing needs of families, communities, societies, and related business organizations around the world. The fields of study encompassed by the College are represented within the departments described above. The College faculty and staff work to create and communicate knowledge not only in a given field, but to combine that knowledge into an integrated whole. Each part of that whole is needed to achieve the goal of enhancing quality of life for all people.

Students in CFCS learn how to contribute to the well-being of society through a variety of careers. At the baccalaureate level, students are prepared to become family and consumer sciences educators, early childhood educators, childcare providers, housing specialists, personal financial managers, apparel designers, merchandisers and entrepreneurs; also restaurant, hotel and institution managers; food scientists, dietitians and nutritionists. They also are prepared to pursue postbaccalaureate education at other institutions in such areas as social work, law, medicine or other health care professions. In addition, the College offers masters and doctorate programs in each department. Graduates are prepared for careers as researchers, educators, marriage and family therapists, or upper level managers and administrators in professional fields.

Faculty and staff members of the College of Family and Consumer Sciences aspire to create personal well-being. There is a strong commitment to a love of learning and to nurturing students through rigorous and dynamic curricula. Extensive extracurricular opportunities, both local and international, for the personal and professional development of students are provided. These commitments are the foundation for becoming the best FCS College in the nation.

**Accreditation**

All degree programs in the College of Family and Consumer Sciences are accredited by the American Association of Family and Consumer Sciences (AAFCS). Accreditation includes commitment to self-regulation, ongoing self-study, peer and external evaluation, and regular review by the Council for Accreditation for the AAFCS. These accreditation activities ensure that graduates of the College of Family and Consumer Sciences have had educational experiences of high quality and relevance as judged against nationally accepted standards. Throughout the United States, only a small number of colleges and universities offering bachelors degrees in Family and Consumer Sciences meet the high standards of the AAFCS accreditation.

In addition to the College accreditation, the following program-specific accreditation/registrations have been attained by Departments within the College:

- **Department of Family and Consumer Sciences Education and Studies:** Family and Consumer Sciences Education Teacher Licensure Program by the Iowa Department of Education and the Iowa Board of Educational Examiners.

- **Department of Food Science and Human Nutrition:** Food Science and Technology by the Institute of Food Technologists; Dietetics Internship has initial accreditation and the Didactic program in Dietetics is currently granted approval status by the Commission on Accreditation/Approval for Dietetics Education of The American Dietetic Association.

- **Department of Hotel, Restaurant, and Institution Management:** by the Accreditation Commission for Programs in Hospitality Administration, the accrediting agency of the International Council on Hotel, Restaurant, and Institutional Education.

- **Department of Human Development and Family Studies:** Early Childhood, Birth - Grade 3 by the Iowa Department of Education; Early Childhood Education-Unified by the Iowa Department of Education; Marital and Family Therapy by the Commission on Accreditation for Marriage and Family Therapy Education; Child Development Laboratory by the National Academy for Early Childhood Programs; Financial Counseling and Family Resource Management curricula by the Association for Financial Counselors and Planning Education.

**Curricula in Family and Consumer Sciences**

The College of Family and Consumer Sciences is fully accredited by the American Association of Family and Consumer Sciences Council for Accreditation. The curricula are planned to meet a variety of academic interests, abilities, and goals of the student. Each curriculum requires depth in a discipline. Breadth is acquired through general education and careful use of electives.

- **Apparel Merchandising, Design, and Production**—Options: Merchandising; Design; Production
- **Child and Family Services**—Options: Child Programs; Youth Programs; Adult Programs; Family Programs; Policy and Advocacy
- **Dietetics**
- **Early Childhood Education**
- **Family and Consumer Sciences Education and Studies**—Options: Teacher Licensure; Educational Services; General Studies
- **Family Resource Management and Consumer Sciences**—Options: Family Resource Management and Consumer Sciences; Family Financial Counseling
- **Food Science**—Options: Food Science and Technology; Consumer Food Science; Food Science and Industry
- **Hotel, Restaurant, and Institution Management**
- **Housing and the Near Environment**
- **Nutritional Science**

**Minors**

Minors are available to all Iowa State students including family and consumer sciences majors. Minors consist of at least 15 credits and are available in the following areas:

- **Apparel Merchandising, Design, and Production**
- **Child and Family Services**
- **Educational Services in Family and Consumer Sciences**
- **Family Resource Management and Consumer Sciences**

Special Interest Programs

International and Cross Cultural Programs

Study abroad opportunities are available and encouraged through the College of Family and Consumer Sciences to broaden international and cross-cultural perspectives. Scholarships and other forms of financial assistance are available which provide partial support for students studying abroad. The college has established programs with Glasgow Caledonian University, Glasgow, Scotland; University of Otago, Dunedin, New Zealand; and the International College of Hospitality Administration, Brig, Switzerland. Students also study at the London College of Fashion, London, England, and participate in group study abroad programs to Europe, Africa, Costa Rica, and Mexico. Other opportunities may be developed through consultation with the associate dean of undergraduate programs and the student’s adviser; for example, students have acquired internships and studied in such countries as Kenya, Spain, Puerto Rico, Ireland, Guatemala, Switzerland, England, Australia, Germany, and France. Faculty members bring diversity and global perspectives to instruction and research, through their work in the Pacific Rim, India, South Korea, Latin America, Asia, Africa, and many countries in Europe.

Families Extension

Students may prepare for a career in the Cooperative Extension Service by enrolling in any curriculum in the College of Family and Consumer Sciences that provides them with a broad subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the associate dean and director of Iowa State University Extension to Families programs, the director of Iowa State University Extension to Youth and 4-H programs, or the Extension Human Resources Office.

Honors Program

High achieving students, with a grade point average of above 3.35, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars and complete an honors project. For further information, contact the College Honors Committee or academic adviser. Also see Index, Honors Program.

Dietetics Internship (DI)

This postbaccalaureate program, administered by the Department of Food Science and Human Nutrition, has initial accreditation from the American Dietetic Association (ADA). The purpose of the program is to enable those who meet the academic requirements of the ADA to obtain at least 900 hours of practice supervised by registered dietitians in medical nutrition therapy, community nutrition, and foodservice management to meet ADA performance requirements for entry level dietitians.

Students who satisfactorily complete the DI will be eligible to take the national registration examination administered by the Commission on Dietetic Registration.

Open Option Status

The College of Family and Consumer Sciences offers an open option for entering students who have not selected a specific area of study. Family and Consumer Sciences Orientation (FCEDS 110) helps students explore the opportunities available. Program planning information can be obtained from general college advisers.

Secondary School Preparation

Preparation required for admission is: 4 years English/language arts; 3 years mathematics; 3 years science; 2 years social studies.

Advising System

Each student in the College of Family and Consumer Sciences works closely with an academic adviser. Freshmen are advised by general college advisers. After the freshman year, each student is assigned an adviser in the department of the chosen curriculum. Freshmen students in Food Science and Human Nutrition are advised by a departmental adviser. The adviser assists the student in making adjustments to the university and provides information and guidance on course work, opportunities for professional and personal development and career choices.

Planned Transfer Programs

By careful planning with the College of Family and Consumer Sciences Academic Programs Office, students may begin their education at another college, then transfer their courses to a curriculum within the College of Family and Consumer Sciences with maximum efficiency in meeting the degree requirements. The College has developed program-to-program transfer plans with community colleges in Iowa and surrounding states. In addition, personalized plans may be developed for students attending other colleges. For more information, call 1-800-522-0683 or contact the associate dean for undergraduate programs, College of Family and Consumer Sciences, 124 Mackay, Iowa State University.

Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in public and private institutions and for teaching, research, and extension positions in colleges and universities.

Professional Career and Employment Opportunities in Family and Consumer Sciences

Employment of Family and Consumer Sciences graduates remains at a high level. The flexibility of College of Family and Consumer Sciences programs allows for a wide range of career opportunities in diverse areas such as government, industry, education, health and human services, business, extension, and community agencies, locally, nationally, and internationally. A few examples of the positions in these various fields are: dietitian; housing specialist; vocational family and consumer sciences teacher; infant, preschool, or special education teacher; hotel, club, or restaurant manager; financial counselor; apparel merchandiser, designer, or production specialist; food or textile researcher; sales representative; early childhood educator; consumer product specialist; and supervisor for a human service agency. Some students prepare for professional programs such as medicine, law, or health administration while pursuing a B.S. degree. The strength of the College programs lies in its capacity to enhance the graduate’s ability to develop and deliver products, programs, or services to families and consumers, as well as to strengthen the communication and leadership skills needed in representing the interests of families and consumers.

In a required career opportunity course students learn to identify their strengths, interests, and values related to professional goals and to match them to career opportunities. Students learn to write resumes and letters, network with professionals, and develop interviewing skills. Technologically up-to-date services such as Web Walk-up facilitate contacts with potential employers using resume referrals, and a “Positions Available List”. Career related materials and employer information are available in the College and in departments.

General Education

Each department within the college requires students to select and/or elect courses to fulfill a specific number of credits in prescribed areas.

Independent Study

Students may pursue independent work by enrolling in 490 courses in individual departments. No more than a total of nine semester credits of independent study may be applied to a degree in family and consumer sciences.

*Assumes additional credits will be necessary for meeting the objectives of the College of Family and Consumer Sciences, including the areas of management, aesthetics, educational principles, public policy, and requirements in specific degrees.
Curriculum in Apparel Merchandising, Design, and Production

Administered by the Program of Textiles and Clothing. Leading to the degree bachelor of science. Total credits required: 123.5 including a minimum of 18 credits in AMDP at Iowa State University for the degree.

The major in apparel merchandising, design, and production provides a broad based program of study with flexibility in creating program options. Courses are required in the following groups: general education, family and consumer sciences core, and textiles and clothing core. To complete the program, a student combines structured clusters of courses to form primary and secondary program options.

A minor in apparel merchandising, design, and production is available; the requirements appear under Textiles and Clothing, Courses and Programs.

Curriculum in Child and Family Services

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science. Total credits required: 128.5.

The child and family services curriculum, with options in child programs, youth programs, adult programs, family programs, and policy and advocacy, prepares students for professional work with children, adults, and families in a variety of public and private human service agencies and organizations. Examples include schools, child care programs, youth programs, adult programs, services to the elderly, community action, policy/advocacy work, and crisis intervention.

A minor in child and family services is available; the requirements appear under Human Development and Family Studies, Courses and Programs.

The following requirements are for the child programs, youth programs, adult programs, family programs, and policy and advocacy options:

Curriculum in Early Childhood Education

The curriculum in early childhood education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms and home based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets the requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is administered jointly by the Department of Curriculum and Instruction within the College of Education, and the Department of Human Development and Family Studies within the College of Family and Consumer Sciences.

For details concerning the professional teacher education requirements and admission to the undergraduate teacher education program, see Teacher Education, Courses and Programs.

Foreign Language Requirement
Early childhood education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language). The requirement may be met by completion of three or more years of high school study in one foreign language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate exam. Students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior, and senior high schools. With additional credits students may also be approved to teach in specific occupa-

### Curriculum in Dietetics

Administered by the Department of Food Science and Human Nutrition.

The student is prepared for admission to dietetic internship programs and other professional experience programs approved/accredited by The American Dietetic Association. Courses included have been approved as meeting the academic requirements of The American Dietetic Association. There is a $30 fee for a statement of verification of completion of the approved program.

### Curriculum in Family and Consumer Sciences Education and Studies

Administered by the Family and Consumer Sciences Education and Studies Program Unit. Leading to the degree bachelor of science.

Total credits required: 128.5.

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community participation. Courses are required in general education, the family and consumer sciences core, and the program core. Students select one program option.

There are three choices for this curriculum.

Option 1, teacher licensure, Option 2, educational services, and Option 3, general studies. In all options, students are prepared with a broad-based understanding of family and consumer sciences.

Option 1, teacher licensure, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior, and senior high schools. With additional credits students may also be approved to teach in specific occupa-

**Curriculum in Family Resource Management and Consumer Sciences**

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science. Total credits required: 128.5.

This curriculum focuses on the behavior of families as they allocate and manage their resources and function as consumers. Upon graduation, the student will be prepared to advise clients in the wise use of personal resources, in effective money management, and in sound financial planning. A minor in family resource management and consumer science is available; the requirements appear under Human Development and Family Studies, Courses and Programs.

Curriculum in Hotel, Restaurant, and Institution Management

Administered by the Hotel, Restaurant, and Institution Management program. Leading to the degree bachelor of science. **Total credits required:** 128.5.

The curriculum in Hotel, Restaurant and Institution Management prepares men and women for a variety of managerial positions in hotels, restaurants, clubs, university foodservice, and other types of institutions and establishments providing lodging and foodservice.

*These courses fulfill the requirements for the CFCS core.  **These courses fulfill the requirements for the CFCS core.

**3 credits each of U.S. diversity and international perspectives should be included in at least one of these sections.

**Credit allowed for FS HN 101 only if taken prior to enrollment in or during the first year in FS HN department.

*These courses fulfill the requirements for the CFCS core.

**3 credits each of U.S. diversity and international perspectives should be included in at least one of these sections.

**Credit allowed for FS HN 101 only if taken prior to enrollment in or during the first year in FS HN department.

*A student who has not had high school biology is required to take Biol 109.

**A student who has not had high school chemistry is required to take Chem 106.
Curriculum in Housing and the Near Environment

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science. Total credits required: 128.5.

The curriculum in housing and the near environment focuses on housing needs, issues and trends, such as housing alternatives for families and children; housing for the elderly and persons with disabilities; residential property management; and public policy. Graduates of this curriculum are prepared for employment in the housing industry, including housing-service organizations; public and private (profit and not-for-profit) agencies; real estate and lending institutions, housing management and administration; housing equipment/ furnishings industries; and housing advocacy. A minor in housing and the near environment is available; the requirements appear under Human Development and Family Studies, Courses and Programs.

In the College of Liberal Arts and Sciences, students select from a wide and rich range of program options. The goal of the college is to prepare the student to enter the world beyond the university with skills in reasoning, analysis, and communication; with an appreciation of history and culture, an understanding of the challenges of the future, and a sensitivity toward people and their environments. To achieve this goal, the college asks students to acquire depth in learning within disciplines of their own choice, by way of single or multiple majors and breadth through elective courses and courses fulfilling general education requirements.

The College of Liberal Arts and Sciences is the academic home, the foundation, for many essential learning disciplines. The college provides students with all the components of a modern liberal education. Students may choose to study in various fields of the physical, biological, and social sciences; in mathematical disciplines; in methods and systems of communication; and in the arts and humanities.

The flexible degree requirements in the curriculum in Liberal Arts and Sciences permit programs of study suited to a variety of interests and goals. Students having academic interests not fully met by a departmental major may pursue a major offered by one of the College’s interdepartmental programs or may apply for an undergraduate major in interdisciplinary studies (See Index, Liberal Arts and Sciences, Cross-Disciplinary Studies). The college participates in the University Honors Program; thus, students of exceptional academic promise can develop unique and challenging programs of study.

The college has three curricula: a curriculum in Liberal Arts and Sciences, leading to the bachelor of arts or the bachelor of science degree; a curriculum in music, leading to the bachelor of music degree; and a curriculum in liberal studies, leading to the bachelor of liberal studies degree.

High School Preparation/Admission Requirements

Students entering the college are required to present evidence of the following high school preparation:

4 years of English (Typically this preparation includes courses in British, American, and world literature in which critical reading and writing skills are emphasized and courses in speech and composition, including at least one senior-level writing course.)

3 years of social studies (Typically such preparation includes two semesters of world history, two semesters of American history, and a semester of American government. Electives can be chosen from areas such as economics, sociology, or psychology.)

2 years of a single foreign language (Three years or more of a single foreign language are strongly recommended for students who wish to continue their work in that language. Three years of a single foreign language will also exempt students from the foreign language graduation requirement in the College of Liberal Arts and Sciences.)

3 years of mathematics (Such preparation shall include two semesters of beginning algebra, two semesters of geometry, and two semesters of intermediate algebra. A fourth year of study involving analytic geometry, trigonometry, linear algebra, and/or calculus is strongly recommended for students who will major in mathematical or scientific disciplines.)

3 years of science (At least two years of such preparation shall be chosen from biology, chemistry, and physics.)

Recommended but not required as a condition of admission to the College of Liberal Arts and Sciences is one semester of computer science. (Such a course should stress problem-solving with computers and should not substitute for courses in mathematics. In schools where computer use is an integral part of most courses, separate instruction in computers is not necessary.)

Students who transfer from another college or university with at least 24 credits of satisfactory coursework may be exempt from most of these requirements. Students who do not meet the requirements listed here may be admitted with a limited number of deficiencies, provided that they can be removed by the end of the first academic year. Iowa State courses taken to remove deficiencies are subject to certain restrictions with regard to their applicability to students’ college degree programs. Contact the college office for further information about these restrictions and about remediating deficiencies in general.

Transfer Students

To graduate from the College of Liberal Arts and Sciences, a transfer student must complete the general requirements of the college as well as those of the university. Students planning to transfer to Iowa State University for the purpose of enrolling in the College of Liberal Arts and Sciences are advised to contact the college office for information concerning degree program requirements. Prospective transfer students are urged to learn about the academic programs that are of interest to them well before arriving on campus so that pretransfer courses are appropriate to the planned major and transferable toward graduation from ISU. Additional information concerning transfer credit evaluation may be obtained through the Office of Admissions as well as the department in which a student is interested.

A transfer student in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of his or her graduation or under one of the two immediately preceding catalogs, provided that it covers the period of his or her enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed. A transfer student is responsible for reviewing his/her transfer credit evaluation with the academic adviser during the first semester of enrollment.

University Requirements

The university requirements for the bachelor’s degree, including statements of academic standards, the university residence requirement, the English proficiency requirement, U.S. diversity and international perspectives requirement, and the library requirement, appear in the Colleges and Curricula portion at the beginning of this bulletin.
Curriculum in Liberal Arts and Sciences

To obtain a bachelor’s degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, an undergraduate student must earn a minimum of 124.5 semester credits including a minimum of 32 semester credits earned in residence at Iowa State University. In addition, the student must meet general education, English proficiency, library proficiency, foreign language, and advanced credit requirements, as well as the requirements of a major. Courses taken on a pass/not pass basis may be counted toward the required total of 124.5 credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement. No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.

General Education Requirements

Students must earn the minimum credits listed in each of the four general education groups in courses outside the department of the first major listed on the degree program. Interdisciplinary courses may be used to satisfy requirements in any group for which they have been approved, but a student may not apply the same course to more than one group.

Credit by Examination Program

Individual departments may use CLEP Subject Tests for testout of specific courses. Students in the College of Liberal Arts and Sciences may use CLEP General Test credits as free electives but not toward any of the general education group requirements.

General Education Groups

I. Arts and humanities (minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.*

II. Verbal communication (minimum 2 credits). The student should develop skill in and an understanding of the principles involved in effective communication among people.*

III. Natural sciences and mathematical disciplines (minimum 11 credits including 3 in the mathematical disciplines and 8 in the natural sciences). The student should experience science as a rational search for understanding the structure and behavior of the natural world, and should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking.*

IV. Social sciences (minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions. Courses must be taken in at least two disciplines represented in Group IV. *

*Lists of approved courses are available from advisers or the Office of the Dean, College of Liberal Arts and Sciences.

Other Requirements

English Proficiency

The faculty of Iowa State University believes that its graduates should acquire competence in written communication during their undergraduate careers. All students must earn an average grade of C– or better in required basic composition courses (e.g., Engl 104 and 105). This should be regarded as a minimally acceptable grade standard. Departments may have stricter criteria as appropriate to their disciplines.

The continued development of communication skills following the freshman year is the responsibility of the student’s major department. The department shall promote this development by adopting measures to certify the writing proficiency of its own majors. Certification is to occur a reasonable time before graduation and shall be based upon satisfactory completion of a designated course in the student’s program in which writing is evaluated or an advanced writing course offered in the English department (e.g., Engl 302, 308, or 314).

Library Proficiency

A library minimum proficiency requirement must be met by satisfactory completion of one of the following options:

1. Library 160

2. A test-out examination for credit to be administered by the library staff, who will control the testing procedure and will determine those students who are eligible to take the examination.

Foreign Language Requirement

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, and should begin to develop an understanding of a second culture through study of that culture’s language. As a means of achieving this objective, a student must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language).

Students who have completed three or more years of high-school foreign language study are deemed to have completed the LAS Foreign Language requirement. These students may not enroll in or receive credit for 101–102, 110, or 160 in those languages; test-out credit may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. 101–102 may not be taken on a remedial basis.

Students who have completed more than one year but less than three years of high-school foreign language study may not enroll in 101 in the same language. These students may satisfy the foreign language requirement by (a) passing the test-out exam at the 101-102 level, (b) receiving a passing grade in a 102 foreign language course, or (c) receiving a passing grade in a foreign language course at the 200-level or higher. (Courses taught in English do not satisfy the foreign language requirement). Certification is through the American Sign Language Language is recognized by the University and satisfies the LAS foreign language requirement.

Students with disabilities who need to satisfy the foreign language requirement may meet the requirements of their major department or program, as directed by the Office of Disability Resource Services. Students with disabilities who meet the requirements of an approved alternate language may direct questions to the Advising Coordinator in the Foreign Language Department and the Disability Resource Office.

Credits applied toward the foreign language requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the foreign language requirement may apply additional courses in foreign languages toward the appropriate general education groups.

Majors in any foreign language are deemed to have fulfilled the college foreign language requirement. International students for whom English is a second language may satisfy the foreign language requirement by completion of Engl 104 and 105 at ISU with an average grade of C– or better. See Foreign Languages and Literatures for additional information on international students.

Advanced Credit Requirements

To obtain a baccalaureate degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. Three of the 45 credits must be earned in a group outside of the group of the major. Credits earned in electives taken on a pass/not pass basis or in the major or a minor may be used to meet this requirement.

Major

Students must complete the requirements of a major which will include 24 to 48 credits in the major discipline as specified by the major department or program. Tracks within a major must have a common 24 credit core. Some courses outside the major discipline may also be required as supporting work for the major. (See Index for page reference to individual department and program requirements.) The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student’s grade is C or higher. In addition, the average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. Courses in the department or discipline of the first major listed on the degree program may not be counted in the general education groups. Courses in general education may be counted in meeting the requirements of additional majors. Students must check each additional major as some majors do not allow double majors with certain other majors.
The major shall be chosen from the following list, which also indicates the degree(s) offered in the respective majors.

**Advertising, B.A.**
**Anthropology, B.A., B.S.**
**Applied Physics, B.S.**
**Biochemistry, B.S.**
**Biological/Pre-Medical Illustration, B.A.**
**Biology, B.S.**
**Biophysics, B.S.**
**Botany, B.S.**
**Chemistry, B.A., B.S.**
**Communication Studies, B.A.**
**Computer Science, B.S.**
**Earth Science, B.A., B.S.**
**Economics, B.A.*, B.S.**
**English, B.A., B.S.**
**Environmental Science, B.S.**

Environmental Studies (may be taken as a second major with the degree to be determined by the first major)
**French, B.A.**
**Genetics, B.S.**
**Geology, B.S.**
**German, B.A.**
**History, B.A., B.S.**

Interdisciplinary Studies, B.A., B.S.

International Studies (may be taken as a second major with the degree to be determined by the first major)
**Journalism and Mass Communication, B.A., B.S.**
**Linguistics, B.A.**
**Mathematics, B.S.**
**Meteorology, B.S.**
**Music, B.A., B. Mus.**
**Performing Arts, B.A.**
**Philosophy, B.A.**
**Physics, B.S.**
**Political Science, B.A.**
**Psychology, B.A., B.S.**
**Religious Studies, B.A.**
**Russian Studies, B.A.**
**Sociology, B.A., B.S.**
**Spanish, B.A.**
**Speech Communication, B.A., B.S.**
**Statistics, B.S.**
**Women’s Studies, B.A., B.S.**

*Available only to students who were enrolled as majors before the 1995-1996 year. (See Index, Economics.)*

The major in interdisciplinary studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and electives. (See Index, Interdisciplinary Studies.)

A curriculum in liberal studies leading to a bachelor of liberal studies degree (B.L.S.) is also available. (See Index, Liberal Studies.)

**Double Majors**

Students may elect a second major from the departments and program areas listed above, or from a major field offered for the bachelor’s degree in another college of the university. Double majors between the following are prohibited: Chemistry with Biochemistry and Agricultural Biochemistry; Biology with Animal Ecology, Agricultural Biochemistry, Biochemistry, Botany, Genetics, Microbiology, and Zoology.

The major departments must then approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major. Majors from the Curriculum in Liberal Arts and Sciences may not be added to a Bachelor of Liberal Studies degree or a Bachelor of Music degree.

A student may earn two degrees in this curriculum with two appropriate majors and at least 30 additional credits. Either the B.A. or the B.S. in this curriculum may be earned with the bachelor of music. Any degree offered by this college may be earned together with a degree with a major in any other college of the university. For the requirements for two degrees, see Index, Bachelor’s Degree Requirements.

**Minor**

A minor, which is optional, must consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. (See Index, Minors.)

The following minors are offered by the college of Liberal Arts and Sciences:

**Advertising**
**African American Studies**
**American Indian Studies**
**Anthropology**
**Astronomy**
**Biochemistry**
**Biological Illustration**
**Biology**
**Botany**
**Chemistry**
**Classical Studies**
**Criminal Justice Studies**
**Economics**
**English**
**Environmental Science**
**Environmental Studies**
**French**
**Genetics**
**Geology**
**German**
**History**
**International Studies**
**Journalism and Mass Communication**
**Latin**
**Linguistics**
**Mathematics**
**Meteorology**
**Military Studies**
**Music**
**Performing Arts**
**Philosophy**
**Physics**
**Political Science**

Portuguese
Psychology
Religious Studies
Russian Studies
Sociology
Spanish
Speech Communication
Statistics
Technology and Social Change
Women’s Studies
Zoology

Courses applied toward the general education groups may be used to meet the requirements of a minor. (For restrictions, see the Index, Minors.)

If a student declares a minor and completes the requirements specified by the offering department/program, the minor will be recorded on the transcript.

**Electives**

Students will take additional courses, freely elected, sufficient to accumulate a total of 124.5 credits. These additional courses together with the general education courses may be used to meet the requirements of a minor or of another major, provided that they are taken on a graded basis.

**Planning the Program of Study**

Careful, comprehensive planning is important for meeting graduation requirements and taking advantage of the resources offered by the university. Each student is encouraged to work with his or her academic adviser in developing a four year plan as soon as possible after declaration of the major. A degree audit listing all completed courses and those remaining to be taken for fulfillment of the degree requirements in the student’s chosen major is provided to the student and the adviser each semester. The student should review the audit each semester and consult with the adviser when changes are required. Any changes to the audit must be approved by the academic adviser and by the dean’s office. It is essential that the audit be reviewed and updated in a timely fashion in order to avoid delay in the student’s graduation.

During the first year, students should meet proficiency requirements in English and in library. They should also make progress toward meeting the general education requirements, a large part of which should be completed by the end of the second year. The third and fourth years should emphasize completion of the major (and minor, if elected) and of general education requirements, and should give the student an opportunity to take electives.

**The Open Option**

Recognizing the fact that many students entering Iowa State University will not have selected a major, the College of Liberal Arts and Sciences provides the open option in order to give them time to explore possible majors and programs. Open option students who enter as freshmen are expected to declare a major by the beginning of the third semester of enrollment. Entering students who have completed three semesters in another school and stu-
ents who wish to change majors but are not yet ready to declare the new major may register under the open option for one semester, provided they have completed no more than 75 credits.

Program planning information is available through advisers of open option students, in departmental offices, and in the office of the dean of the College of Liberal Arts and Sciences. Early enrollment in certain course sequences is essential for students who are considering sciences or mathematical disciplines, and selection of a major field by the end of the first year is strongly recommended.

Honors Program
For information on the Honors Program in the College of Liberal Arts and Sciences, see Index, Liberal Arts and Sciences, Cross-Disciplinary Programs, Honors Program.

ROTC Programs
The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in the Army, Navy, and Air Force.

Teacher Licensure
Students in the College of Liberal Arts and Sciences may be recommended for the Iowa Professional License for full-time teaching of certain subjects in secondary schools. For further information see Index, Teacher Education Program.

Preprofessional Programs
Students in the College of Liberal Arts and Sciences may participate in preprofessional programs in human health-related fields, law, and theology by taking the courses required for admission to professional schools. Students may enter the college with the designation Premed, Prelaw, or Preprofessional Health Programs. Most will earn a bachelor’s degree by choosing a major and meeting the requirements for the major while taking the preprofessional courses. Others will spend one to three years as students in the college before transferring to a professional school to which they have applied and been accepted. For further information, see Index, Preprofessional Study.

Experiential Learning (Internship/Co-op) Program
The Experiential Learning (Internship/Co-op) Program assists students in gaining career-related experience while going to school. Internships/Co-ops provide students with the opportunity to gain specific skills, apply academic knowledge in practical situations, pretest their career choice, earn a salary, and establish a network of professional contacts. Most internships are full-time and last for a semester or a summer, but a part-time experience is possible. Students wishing to receive academic credit for their internship must make arrangements with a faculty member in their major department. In contrast, co-op students work full-time on an extended basis (work two semesters) or on an alternating basis (work, school, work, etc.) during any semester (fall, spring, summer).

It may take students participating in the Experiential Learning (Internship/Co-op) Program an additional semester or more to complete their academic curriculum requirements. For additional information, contact Business/Liberal Arts and Sciences Career Services.

Curriculum in
Music
This curriculum leads to the degree bachelor of music and is an alternative to the curriculum in liberal arts and sciences with a major in music. To obtain a bachelor of music degree, a student must earn a minimum of 124.5 credits including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits (credits in courses numbered 300 or above) and must meet all of the requirements specified below. Courses taken on a pass/not pass basis may be counted toward the required total of 124.5 credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement. No more than 9 credits in 490 (Independent Study) courses in a single discipline may be counted toward graduation. See Index, Music.

Students interested in pursuing an emphasis in music theater should see Index, Theater and Performing Arts.

A minor in music is available; the requirements appear under Music, Courses and Programs.

†A student must earn an average grade of C- or better in Engli 104 and 105.
oru or test-out examinations. Students may also earn credits by proficiency in courses, including those with distance-learning flexibility, Saturday and evening courses; off-campus correspondence courses; telecourses; and other learning opportunities. To complete the degree, students may be able to apply credits earned in various study formats: traditional on-campus courses, K-12 options include 16 weeks of student teaching, K-6 and 7-12 options include 12 weeks of student teaching. All students will complete at least 50 hours of field experiences, of which at least 40 must occur after admission to teacher education but before student teaching. Music education students should refer to the Teacher Education section of this catalog for further information.

Curriculum in Liberal Studies

The bachelor of liberal studies degree (B.L.S.) was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The degree may be earned from Iowa State University, the University of Iowa, or the University of Northern Iowa. The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

Up to three-fourths of the total degree requirements can be transferred from accredited institutions. Work done in community colleges or other accredited colleges and universities can be applied toward the degree, as can applicable courses taken at any of the three Iowa Regent universities, whether on or off campus. The B.L.S. program has no residence requirements. To complete the degree, students may offer credits earned in various study formats: correspondence courses; telecourses; Saturday and evening courses; off-campus courses, including those with distance-learning formats; and regular on-campus courses. Students may also earn credits by proficiency or test-out examinations.

Admission

Admission to the B.L.S. program is open to persons who meet either of the following levels of previous educational attainment:

- Hold the associate in arts (A.A.) or associate in science (A.S.) degree from an accredited two-year college. (Holders of the associate in applied science or associate in applied arts degree are not automatically eligible, although some courses may be found applicable upon review.)
- Have at least 62 semester credits of collegiate work acceptable toward graduation at ISU with a total cumulative grade point average of at least 2.00 (a C average).

Requirements for the B.L.S. Degree

The B.L.S. candidate must earn a total of 124 credits in accordance with requirements listed below. Courses taken at Iowa State University on a pass/not pass basis may be counted toward graduation only as electives. No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.

- **K-12 options include 16 weeks of student teaching, K-6 and 7-12 options include 12 weeks of student teaching. All students will complete at least 50 hours of field experiences, of which at least 40 must occur after admission to teacher education but before student teaching. Music education students should refer to the Teacher Education section of this catalog for further information.**

### Requirements

**General Education Requirements**

- **48 Cr.**
- **6 Basic English composition**
- **8 Foreign language**
- **12 Arts and humanities**
- **3 Mathematics, statistics, or computer science**
- **9 Natural sciences**
- **3 Social sciences from at least two different disciplines**

A list of courses acceptable in the general education groups can be obtained from the college office.

**Distribution Requirements**

A minimum of 12 credits is required in each of three of the five distribution areas listed below.

- **Humanities** (literature, philosophy, history, religion, art and music appreciation)
- **Communications and arts** (journalism, speech, writing, drama, art, foreign language)
- **Natural sciences and mathematical disciplines** (chemistry, physics, biology, geological and atmospheric sciences, mathematics, statistics, computer science)
- **Social sciences** (sociology, psychology, economics, political science, anthropology, geography)
- **Professional fields** (business, education, family and consumer sciences, social work, agriculture, engineering, nursing)

At least 24 upper-level credits are required in the three distribution areas with a minimum of 6 upper-level credits in each of the areas.

- **40 Electives**
- **124 Total credits required for graduation**

*The requirement may be met by completion of three or more years of high school study in one foreign language.**

Other Requirements

Included in the total of 124 credits must be the following:

- **45 upper-level credits from a four-year college**
- **32 credits from ISU earned during the junior/and or senior year**

Three credits of course work in U.S. Diversity and 3 credits in International Perspectives.

A grade average of at least 2.00 (a C average) in all coursework applied to the B.L.S. degree, in all upper-level coursework, and in all work completed after admission to the B.L.S. program.

Proficiency in English demonstrated by completion of an approved composition course from a four-year college or by faculty evaluation, as advised.
College of Veterinary Medicine

Noran F. Cheville, Interim Dean
Elizabeth A. Riedesel, Associate Dean
Donald L. Reynolds, Associate Dean

Departments of the College
Biomedical Sciences
Veterinary Clinical Sciences
Veterinary Diagnostic and Production Animal Medicine
Veterinary Microbiology and Preventive Medicine
Veterinary Pathology

Other units of the college include the Veterinary Medical Research Institute, the Veterinary Medical Diagnostic Laboratory, the Veterinary Teaching Hospital, and Biomedical Communications. The college also participates in interdisciplinary majors in genetics, molecular cellular and developmental biology, toxicology, immunobiology, and neuroscience.

The instructional objective of the College of Veterinary Medicine is to enable students to assume vital roles in society as productive health care deliverers and biomedical scientists. Such an education provides students with general learning, communication, and problem solving abilities; veterinary medical practice and research skills; and professional and ethical values.

The curriculum incorporates basic biomedical and clinical principles, clinical decision making skills, and exceptional clinical experience in production medicine, food animal medicine and surgery, companion animal medicine and surgery, and equine medicine and surgery.

The college is uniquely qualified to provide education in veterinary medicine. Located in the heart of one of the world’s most intensive livestock producing areas, the college provides diverse and extensive production animal medicine experiences and numerous diagnostic cases for study. A nearby metropolitan area and a regionally recognized referral hospital and community practice provide experience in companion animal and equine medicine and surgery.

The professional curriculum is a progressively integrated four-year course of study leading to the doctor of veterinary medicine degree. Students are admitted into the fall semester of the first year of the professional curriculum after completing a minimum of 60 semester credits in a preprofessional program. A strong and reputable basic science education during the first two years of the professional curriculum prepares veterinary students for a wide range of clinical experience during the last two years of the educational program. The students’ education can be enhanced during the fourth year of the curriculum by participation in preceptorships in private practice, other colleges, research laboratories, industry, or government agencies. Outstanding research programs in neuroscience, immunobiology, infectious diseases, and other areas provide opportunities for qualified students to participate in research.

Concurrent D.V.M./M.S., Ph.D. programs are available for exceptionally qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor’s degree or a minimum of 128 semester credits in preprofessional and professional curricula in order to participate in the concurrent degree program. Admission to the concurrent D.V.M./graduate degree program is subject to the approval of the dean of the College of Veterinary Medicine and the dean of the Graduate College.

The College of Veterinary Medicine is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; laboratory animal medicine agencies; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. A career development office is available to help match students with appropriate employers.

Preventive Medicine Preparation

Admission Requirements
The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice. Preventive students are strongly encouraged to complete a bachelor’s degree before enrolling in the College of Veterinary Medicine. When deciding which major to pursue as an undergraduate, the preventive student should consider the area of veterinary medicine in which they intend to emphasize when they become a veterinarian. For example, those interested in food animal practice may wish to pursue a degree in biological science, animal science, agricultural economics, or business. Future companion animal practitioners may wish to consider a biological science, physical science, business, social science, or humanities degree. These examples are only suggestions. They should be considered as but a few of the numerous possibilities. For the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College website at http://www.vetmed.iastate.edu/.

Applicants for admission to the College of Veterinary Medicine must have attended a regionally accredited college or university, have completed 40 semester credits prior to the deadline for filing an application for admission, and have completed 60 semester credits prior to the end of the spring term of the year in which the applicant seeks to be admitted to the College of Veterinary Medicine. Beginning with the 2002-2003 application cycle for students entering Fall 2003, all preveterinary science requirements must be fulfilled by the time of filing or scheduled for completion by the end of fall term of the year in which the applicant applies. Credits earned must include the following Iowa State semester course offerings or their equivalents:

- English Composition (may include business and/or technical writing) (Engl 104, 105, 302, 309, or 314) 6 cr.
- Public Speaking (Sp Cm 212, ComSt 214 or Ag Ed 311) 3 cr.
- General Chemistry with Laboratory (Chem 177, 177L, 178) 8 cr.
- Organic Chemistry with Laboratory (Chem 331, 331L, 332) 7 cr.
- Biochemistry (BBMB 301 or Biol 302) 3 cr.
- General Physics with Laboratory (Phys 111, 112) 8 cr.
- Biology with Laboratory (Biol 201, 201L, 202, 202L) 8 cr.
- Genetics (Biol 301) 3 cr.
- Mammalian Anatomy or Physiology (An S 214, BMS 329) 7 cr.
- Zool 155, or Zool 255 or Zool 355) 9 cr.
- Humanities or Social Sciences 9 cr.
- Electives 2 cr.

TOTAL 60 cr.

Credits in the previously specified courses will normally be earned on the traditional four-letter grading system with A as the highest grade and D as the lowest passing grade. All required courses must be completed with a grade of "C" or better. It is generally expected that required courses have been completed within the past eight (8) years. However, credits earned by the credit by examination program in accordance with the regulations relating to this procedure at Iowa State University are also acceptable. Credits in the preceding specified courses will not be accepted if earned under the pass-not-pass grading system or similar options.

Application and Admission
Request for the professional curriculum application packet should be addressed to the Office of Admissions, 100 Alumni Hall, Iowa State University, Ames, Iowa 50011. Residents applying to multiple schools and non-residents may also apply through Veterinary Medical College Application Service (VMCAS). For further information contact the College of Veterinary Medicine at 515-294-6808. Applicants with any international course work, including study abroad, must apply directly to Iowa State University. Completed applications and all supporting materials (transcripts, recommendations, and GRE scores) must be postmarked by October 1 of the year prior to the year in which the applicant seeks to be admitted.
All preveterinary requirements must be fulfilled by the time of filing or scheduled for completion by the end of Spring term of the year in which the applicant seeks to be admitted. Beginning with the 2002-2003 application cycle for students entering Fall 2003, all preveterinary science requirements must be fulfilled by the time of filing or scheduled for completion by the end of Fall term of the year in which the applicant applies. A list of courses in progress at the time of filing or scheduled for completion by the end of spring term should accompany the application and transcripts. Preprofessional college credits must average at least 2.50 on a 4.00 marking system for the application to be accepted. The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Admission to the College of Veterinary Medicine is on a competitive and selective basis. Scholastic performance in preprofessional courses, Graduate Record Examination scores (General), general achievement and experience related to veterinary medicine are given consideration in the selection of candidates.

The majority of the positions in the entering class are reserved for residents of Iowa. Two states, North Dakota (10) and South Dakota (6), have contracts for up to 16 students in each entering class. A similar contract is in place with the state of New Jersey for up to 4 positions. In addition, a number of positions are available to residents of other states. A few highly qualified international students may also be accepted. Consideration is given equally to all applicants without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

Fourth Year

The fourth year of the veterinary medical curriculum is designed to be flexible and to provide for species emphasis. Students must complete 38 credits during their fourth year. They must take a required block and at least one option block. The remainder of the fourth year credits are acquired by selecting additional option blocks, elective Veterinary Teaching Hospital clinical assignment, off-campus clinical electives, or other electives. Additional off-campus clinical elective credits can be earned through V C S 419/VDPAM 420 at approved agencies, research labs, veterinary practices, and other university hospitals. As many as 7 of the 38 credits required in the fourth year can be applied toward the general veterinary curriculum requirement of 11 elective credits.

**Graduation Requirements**

To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, have earned at least 4 elective credits on a graded basis of A, B, C, D while enrolled in the College of Veterinary Medicine, have at least a 2.0 grade-point average in the veterinary medicine curriculum, and have passed the prescribed comprehensive examinations during the third and fourth years.

**Reinstatement**

Any student who voluntarily withdraws from the College of Veterinary Medicine or who is dropped for cause, after having successfully completed one or more semesters forfeits his/her standing and must make written application for reinstatement to this college a minimum of 60 days prior to the opening of the semester for which they seek to re-enter. Any student who voluntarily withdraws from the College of Veterinary Medicine prior to completion of one semester must re-apply for admission to the college in the general applicant pool.

**Veterinary Medical Societies**

All veterinary students are encouraged to become active members of the Iowa State Student Chapter of the American Veterinary Medical Association. The monthly meetings of the chapter serve to promote the professional development of the members. Students of veterinary medicine may also qualify for membership in the national honor societies of Phi Zeta, Phi Kappa Phi, Alpha Zeta, and Gamma Sigma Delta. Graduate students may qualify for membership in Sigma Xi.
Graduate College

James R. Bloedel, Dean
George A. Jackson, Assistant Dean
Patricia M. Keith, Assistant Dean
John E. Mayfield, Associate Dean

The Graduate College and graduate faculty at Iowa State University are responsible for the quality of graduate education, for supervising students’ graduate programs, and for obtaining research support from various governmental, industrial, and private agencies.

The graduate faculty in various programs handle admission and classification of graduate students, establish requirements for advanced degrees, and have charge of instruction and research at the graduate level. Graduate faculty members also teach graduate courses, serve on program of study (POS) committees, and direct work of master’s and doctoral students. All graduate courses offered for major or nonmajor credit are taught by graduate faculty members or graduate lecturers.

Graduate study was offered soon after the university was founded, and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science, and veterinary medicine. In 1913, the graduate faculty was organized formally and an executive graduate committee was appointed. In 1915, the graduate faculty held its first meeting, and in 1916, it granted the first doctor of philosophy degree.

Graduate education is vital to the quality of university teaching. The creative efforts of graduate faculty members and graduate students result in knowledge necessary to help society solve problems in educational, scientific, technological, and socio-economic areas. The Graduate College encourages educational exchange and contact with undergraduate areas of the university to promote improved teaching on both the undergraduate and graduate levels. A part of this exchange is accomplished by the publication of books and technical articles which are made possible by graduate research.

The degrees master of arts, master of science, and doctor of philosophy are research oriented. In many fields master’s degrees are also awarded without a thesis, but a written report of independent study, called a creative component, is generally required. For those individuals interested in advanced study directed toward meeting vocational or professional objectives, the following degrees are offered: master of accounting, master of agriculture, master of architecture, master of business administration, master of community and regional planning, master of education, master of engineering, master of family and consumer sciences, master of fine arts, master of landscape architecture, master of public administration, and the master of school mathematics.

The Graduate College Handbook lists policies and procedures of the Graduate College. It is available in the Graduate College, in program offices, and at the Graduate College’s Web site: www.grad-college.iastate.edu. Each new graduate student is urged to obtain a copy. It is mailed to graduate faculty members. Most of the forms in this bulletin are also available online at www.grad-college.iastate.edu

Admission

Admission to the Graduate College may be granted to a graduate of an institution in the United States that is accredited by a recognized regional association or to a graduate of a recognized institution in another country whose requirements for the bachelor’s degree are substantially equivalent to those of Iowa State University. For information concerning graduate study in a particular academic discipline, prospective students should correspond with the chair of the major program in which they wish to study.

Application forms, available from the Office of Admissions, should be completed and returned to 100 Alumni Hall with a $20 application fee ($50 for international applicants). An electronic application is also available on ISU’s graduate college web site at www.grad-college.iastate.edu. The electronic application fee must be paid by credit card. The fee is $25 for domestic students and $57 for international students. University application deadlines are: June 1 for fall, November 1 for spring, and March 1 for summer, prior to the term for which admission is sought. (International applicants should apply at least six months before the term in which they wish to enter.) Because many programs have earlier admission deadlines, the applicant should check with the appropriate program for this information. The application fee is required of all applicants except those who have attended Iowa State as undergraduates, or those applying for admission in the nondegree admission status. In addition, an applicant must request that each previous college or university attended send official transcripts of grades and credits earned, and request that the institution from which the degree was granted provide a statement of the degree received and the applicant’s quartile class rank.

Categories of Graduate Admission

An applicant pursuing an advanced degree must be recommended by the program in which he/she will be pursuing an advanced degree and must be approved by the Dean of the Graduate College.

There are three admission categories for students who wish to pursue an advanced degree:

1. Graduate in the upper one-half of the graduating class with a bachelor’s degree from a regionally accredited U.S. institution; or
2. Graduate in the upper one-half of the graduating class from a recognized foreign institution where the requirements for the bachelor’s degree are similar to those at Iowa State.

 Provisional admission status may be granted to students who meet the requirements for full admission (listed above), but have academic or prerequisite deficiencies to remedy. Transfer from provisional admission to full admission status requires the completion of the graduate English requirement, completion of the coursework prescribed to remedy the background deficiencies with a grade average of B or better, and the written recommendation of the major professor and approval by the dean of the Graduate College.

Restricted admission status may be granted to students who do not rank in the upper one-half of their graduating class and/or lack adequate undergraduate preparation in the proposed field of study. Restricted admission may be granted to graduates of non-English-speaking foreign institutions, even though the student ranks in the upper one-half of the graduating class. Advancement from restricted to full admission status requires completion of 9 semester credits of graduate level coursework as a graduate student with a cumulative grade average of B or better and satisfaction of the Graduate College English requirement. The recommendation is submitted in writing by the major professor and must be approved by the Dean of the Graduate College.

Graduate Admission Without a Declared Major

Admission without a declared major is a category for graduates of regionally accredited institutions in the United States who do not intend to seek an advanced degree from Iowa State University. Such students usually include:

1. Those who intend to transfer graduate credit earned at Iowa State University to other institutions.
2. Those who intend to use graduate credits earned for professional certification.
3. Those who enroll for personal satisfaction.
4. Those who enroll occasionally in off-campus graduate courses.

Students who wish to apply to Iowa State University without a declared major need to contact the Office of Admissions, 100 Alumni Hall (1-800-262-3910) for the nondegree application form for students in this category.

Applications and schedules for such students with an undeclared major are processed directly by the Office of Admissions and the Graduate College office; no program approvals are required. Applications and schedules for
students declaring a major require program evaluation and approval.)

A student without a declared major who subsequently seeks full, provisional, or restricted admission must apply to and be accepted by a graduate program and by the Graduate College for degree study. A new application, the application fee (unless the student attended Iowa State University as an undergraduate), and transcripts from all colleges attended are required.

For those students originally admitted to the Graduate College on a nondegree basis, no more than 9 semester hours of graduate credit earned under the nondegree option may be applied if the student later chooses to undertake a graduate degree program. The student’s program of study committee will recommend to the Graduate College which courses (if any) taken on a nondegree basis may be included in the degree program.

Graduate Admission of International Students
An applicant who is a graduate of a recognized foreign institution is subject to the same criteria for admission as a graduate from an institution in the United States and may be recommended for the same admission categories described above except that of the nondegree option. International applicants for nondegree status may be considered for admission at the discretion of the Graduate College dean. Application and admission deadlines for international students can be obtained from the publication Information for International Graduate Applicants.

International students are required to show evidence of financial support and to carry adequate health and accident insurance while in residence.

Admission Examinations
Graduate Record Examination. The Graduate Record Examination (GRE) is not a university-wide requirement for all applicants. However, many programs require or recommend submission of GRE scores; individual program statements appearing in the publication Graduate Admissions Bulletin should be consulted for this information.

English Requirement for Native Speakers
The English requirement for native speakers is fulfilled by passing the Graduate English Examination, a test of English grammar, usage, spelling, and punctuation. Performance on this test will determine whether a student must take an additional writing proficiency test.

Students (except those admitted on a nondegree) should satisfy the Graduate College English requirement before completing 12 credit hours of graduate work at Iowa State University.

English Requirements for Non-native Speakers
Applicants whose native language is not English and who have not earned a bachelor’s or master’s in a country where the official language is English are required to submit Test of English as a Foreign Language (TOEFL) scores as part of their application for admission. A minimum score of at least 173 on the computer-based TOEFL test is required for admission to the Graduate College. Because some programs require a higher score, applicants should check directly with the program to which they desire admission or see the bulletin Information for International Graduate Applicants for this information.

Graduate students whose native language is not English and who do not have an undergraduate degree from Iowa State University must also take the English Placement Test at the beginning of their first semester of enrollment. This test is administered by the Department of English in lieu of the Graduate English Examination. Students who do not pass this examination are assigned to one or more courses in the English 101 series. This coursework must be completed during the first year of study.

Graduate students whose native language is not English, but who have an undergraduate degree from Iowa State University, must take the Graduate English Examination for International Students, also administered by the Department of English, at the beginning of their first semester of graduate work. Students who do not pass this examination must complete English 101D during their first year of study.

New teaching assistants whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. Tests of oral proficiency and teaching skills (SPEAK and TEACH) are given before the beginning of each semester. A prospective teaching assistant who does not pass is required to complete coursework in speaking and teaching skills and must be retested.

Graduate Appointments
Graduate assistantships, fellowships, and research grants have been established at Iowa State University to encourage graduate work and to promote research. Such appointments and research opportunities are available through the various departments of instruction and the research centers on campus.

Graduate assistantships, the most common form of graduate student support, are available in three categories: the research assistantship, the teaching assistantship, or the administrative assistantship. A half-time graduate assistantship permits the holder to enroll for a maximum of 12 semester credits. Recipients of these assistantships are assessed fees at full Iowa resident rates regardless of the number of credits for which they register. Students who are graduates of a nationally accredited college or university in the United States or of a recognized institution in another country whose requirements for the bachelor’s degree are substantially equivalent to those of Iowa State University, who graduated in the top half of their respective classes and who present the requisite undergraduate or graduate preparation, may apply for these appointments. Students registered on a restricted basis or those placed on academic probation are eligible for assistantship appointment only on a term by term basis. Students admitted without a declared major are not eligible for assistantship appointments. Further information may be obtained by writing to the appropriate graduate program.

The satisfactory completion of one appointment, plus satisfactory academic performance, will ordinarily make a student eligible for reappointment. After a period of three years of full time study for the master’s degree or five years for the doctorate, the student will not normally be continued on assistantship support (shorter periods may be stipulated by the student’s program or department).

Postdoctoral Study
Opportunities are provided for postdoctoral study through the extensive research programs of the university. Inquiries should be directed to the appropriate program, institute, or to the dean of the Graduate College.

Graduate Study by Staff Members
Any full-time member of the research, instructional, or extension staff at the rank of instructor, research associate, or assistant scientist may carry up to six course credits per semester and three credits per summer session, subject to the approval of the head of the program or section, and provided it does not interfere with other duties. This privilege may be extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.

Registration
Graduate students are encouraged to register for courses through the Touch-tone Registration System or on the ISU web site (www.iastate.edu) via Access Plus. Students who are unable or who choose not to register through these systems may use a walk-through registration procedure. Students who do not register by the published deadline for initiation of a schedule through the touch-tone or Access Plus systems must use the walk-through procedure. The approved Touch-tone Registration Worksheet must be presented to the Student Scheduling Office, 10 Alumni Hall. New graduate students should report to their program offices for assistance in completing the ISU Touch-tone Registration Worksheet. For complete information on registration, see the ISU Schedule of Classes.

Credit Limits
Registration is limited to a maximum of 15 credits per semester. Schedules for graduate assistants on one-half time appointments are limited to a maximum of 12 credits. For full-time staff members, the limit is 6 credits. (Different credit limits apply during the summer session; see the Graduate College Handbook for more details.)

Interim Registration
Registration for special work between semesters and during certain vacation periods cannot exceed one credit for each week that the student is in residence.
**In Absentia** Registration

Students completing research or thesis preparation may register in absentia; these credits do not apply toward residence requirements.

**Off-campus Course Registration**

Students who take off-campus courses taught by members of the graduate faculty must register for off-campus credit. Instructions for registering for off-campus credits are available from the ISU Extended and Continuing Education Office (102 Scheman, 515-294-6222, www.lifelearner.iastate.edu/).

**Continuous Registration**

Even when Ph.D. graduate students have completed course work and residence requirements, they are required to register and pay fees whether or not university facilities and equipment are used or staff consulted—either in person or in absentia.

After the preliminary oral examination is taken and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major department or program and pay the appropriate graduate tuition and fees.

After the preliminary oral examination is taken and if university facilities, equipment, and staff time are not used, the Ph.D. candidate may register for Gr St 680 (Continuous Registration) and pay the Continuous Registration fee.

The Ph.D. candidate must be aware that registration for Gr St 680 is allowed only after the Ph.D. candidate passes the preliminary oral examination, is required only in fall and spring semesters, is not allowed after the completion of the final oral examination, and is not sufficient registration for the terms of the preliminary or final oral examinations.

If students take the final examination during the interim between terms (including the first day of classes), registration can be for the term either before or after the examination is held.

**Auditing**

Audit registration means taking courses without receiving formal credit. An agreement to audit a 500 or 600 level course must be negotiated between the student and the course instructor. An audited course counts for only one credit in the graduate student’s allowable course load; however, fees will be assessed for the full number of credits for the course. Audited courses do not appear on the student’s permanent record unless the “Request for Audit(s) to Appear on Transcript” form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College’s web site at www.grad-college.iastate.edu/forms/forms.html, must be filed with the Graduate College, 207 Beardshear Hall. After the fifth class day, if a student changes a regular course to an audit, that course will appear on the student’s permanent record as a drop.

**Graduate Courses Taken by Seniors**

Certain graduate level courses listed in the ISU General Catalog may be used in the program of study even though they were taken for graduate credit by the student as an undergraduate senior at ISU. If the POS committee approves the Dean of the Graduate College that up to nine hours of such credit may be applied toward meeting advanced degree requirements (these courses must be clearly marked on the POS); credits earned in these courses must be in addition to those used to meet requirements for the bachelor’s degree and must have grades of B or better; the student must be classified as an undergraduate senior and not special student (credits taken as a special student are not allowed); a letter of certification must be obtained from the Graduation Office (10A Alumni Hall) indicating that the courses were not taken as a special student and were not used toward fulfillment of the undergraduate degree program. This letter must be submitted with the POS form.

**Admission of Undergraduates to Concurrent Graduate Degree Programs**

Programs in nine departments (Agricultural and Biosystems Engineering, Animal Science, Biochemistry and Biophysics, Civil and Construction Engineering, Electrical and Computer Engineering, Food Science and Human Nutrition, Materials Science and Engineering, Psychology, and Zoology and Genetic) provide opportunities for well qualified ISU juniors and seniors majoring in those curricula to apply for admission to programs leading to both an M.S. and a B.S. awarded at the end of a fifth year of study. Students interested in a research career may apply for graduate research assistantships during their fourth and fifth years of study. Students should contact the above departments about applying to these programs early in their undergraduate careers. Undergraduate students seeking admission to concurrent graduate degree programs in fields other than the nine above must submit a written proposal for an individualized program, co-sponsored by their advisors, to the Graduate College for review and approval.

Official enrollment and fee payment will be as a graduate student. Credits transferred from the graduate permanent record to the undergraduate permanent record are no longer available for use on a graduate program of study.

**Veterinary Medicine Students in Concurrent Graduate Degree Programs**

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 128 semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must complete a graduate application, complete a “Concurrent Enrollment Request” form available in the Graduate College office or on the web site at www.grad-college.iastate.edu/forms/forms.html, submit both forms with appropriate transcripts and letters of recommendation to the Office of Admissions (100 Alumni Hall). (Copies of the forms may be obtained from the Office of Admissions.) and state on the application that the application is for a concurrent degree program.

Students completing research or thesis preparation may register in absentia; these credits do not apply toward residence requirements.

**Courses Taken as a Special Student**

A person classified as a “special student” is considered an undergraduate and may not use courses taken under that status in a graduate degree program. A student who has received the baccalaureate degree must register as a graduate student if he/she is to receive graduate credit for courses.

**Grading**

**Grade Point Average (GPA)**

The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester’s average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. Creative Component/Research (599 and 699) credits are not used in the calculation of the GPA. In the case of repeated courses, only the grade achieved the last time the course is taken is used in computing the grade point average.

**Grading Research and Creative Component Credits**

Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student’s GPA.

**Pass (P)/Not Pass (NP) Course Credit**

Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS, nor do P/NP marks contribute to the student’s GPA. Full credit for P/NP courses is used in calculating tuition assessment and credit load limitations. For more information, see the Graduate College Handbook.
Satisfactory/Fail (S/F) Grading
S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a D- grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative component, thesis or dissertation research) in the program of study may be earned on an S/F basis.

S/F grading may be used only for approved courses offered as seminars, symposia, workshops, special topics, and research. Programs must submit requests for S/F grading to the Dean of the Graduate College. The Graduate College Curriculum and Catalog Committee reviews and approves or rejects all S/F courses.

Grievances about Grades
A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in the Graduate College Handbook.

Probation
If a graduate student does not maintain a cumulative 3.0 grade point average on all course work taken, exclusive of research credit, he or she may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in course work only.

While on academic probation a student will not be admitted to candidacy for a degree and if appointed to a graduate assistantship, the student will not receive a Graduate College tuition scholarship.

To insure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review his or her record and recommend whether the Graduate College should continue to permit registration. Some programs conduct reviews by their entire graduate faculty; others assign the responsibility to POS committees. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.0 GPA or greater. Exceptions must be recommended in writing by the student’s POS committee and DOGE and approved by the Dean of the Graduate College.

Master’s Degrees
General requirements for all master’s degrees are as follows:

General Requirements
Appointment of the Student’s Program of Study (POS) Committee. Faculty in a major field have the responsibility for establishing specific course requirements and research requirements appropriate to the master’s programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s POS committee beyond those listed in this bulletin or the Graduate College Handbook as deemed appropriate to the goals of the major program.

New graduate students at ISU may be assigned a temporary academic adviser by the major program in the first semester of the student’s residence. This faculty member guides the student in selection of a field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A master’s POS committee consists of at least three members of the graduate faculty. For a complete listing of graduate faculty and associated majors, see the Graduate College’s web site at www.grad-college.iastate.edu. It must include two members, including the major professor, from inside the major or program. The committee must include members from different majors or different departments so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student’s master’s research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study.

Program of Study. The student and major professor develop the program of study with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed and the POS form submitted as early as the second semester of graduate study. In no case can the committee be formed later than the term before the final oral examination.

Residence. There is no on-campus residence requirement for the master’s degree.

Credits. Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master’s programs. At least 22 graduate credits must be earned from Iowa State University unless noted in the descriptions under “Specific Master’s Degree” in this bulletin.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses taken at another university as an undergraduate student, it is the student’s responsibility to provide verification by letter from that institution that these graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Major. A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student’s POS committee. The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved on the program of study, listed on all examination reports, and recorded on the "Application for Graduation" form (diploma slip).

Department/Program Change. To change from one program to another, a graduate student must obtain the written permission of the directors of graduate education (DOGEs) and the approval of the Dean of the Graduate College. A “Request to Transfer From One Program to Another” form must be completed. This form is available from the department, the Graduate College office, or on its web site at www.grad-college.iastate.edu/forms/forms.html.

Time Limits. It is expected that work for the master’s degree shall be completed within five years. In special circumstances the student’s POS committee may recommend that the Dean of the Graduate College extend these degree time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student’s POS committee and the Graduate College. The inclusion in the student’s program of study of course work that is beyond the time limits (“over-age” courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.
Specific Master's Degrees

The number of credits in a major for a master's degree will vary according to the degrees listed below. General credit requirements for all master's degrees include a minimum of 30 graduate credits for all master's programs at ISU; at least 22 graduate credits must be earned at ISU unless noted in descriptions; any transfer of graduate credits from another institution must be recommended in the program of study by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned.

Master of Arts or Master of Science—Thesis

At least 30 credits of acceptable graduate work must be completed, not less than 22 of which must be earned from ISU. Students are expected to research and write a thesis that demonstrates independent and creative work. A minimum of 3 semester credits is required for thesis research.

Master of Arts or Master of Science—Nonthesis

In certain programs a nonthesis degree program is offered. (For more information on requirements, contact the individual program or department.) This option requires the satisfactory completion of at least 30 graduate credit hours of acceptable work (not including research credit), not less than 22 of which must be earned from Iowa State University, and satisfactory completion of a comprehensive final oral examination. In addition, every nonthesis master's program must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, or other creative endeavor). A minimum of two semester hours of such independent work (referred to as the creative component) is required on every program of study for a nonthesis master's degree and is applied toward the credit-hour requirement. This element of creative independent study must be explicitly identified on the program of study. Detailed requirements may vary with fields. Reference should be made to the Courses and Programs section in this catalog.

Master of Accounting

The Department of Accounting offers a 32-credit Master of Accounting graduate degree. The program requires 15 credits of graduate accounting courses, at least 9 credits of non-accounting graduate electives, a communications course, an international course from an approved list, and a creative component. The degree is appropriate for any student wanting to pursue a variety of accounting careers. Additionally, the program is designed to help interested candidates meet the 150-hour education requirement for the CPA certification in Iowa.

Master of Agriculture

The major in professional agriculture is an off-campus, nonthesis program leading to the master of agriculture degree. It is available to students wishing to pursue graduate study in agriculture without taking formal coursework on campus. The program is considered to be a terminal master's degree. Students are required to take a minimum of two courses in each of three discipl-
plines and complete 24 semester credits of formal coursework. In addition, a minimum of four credits of creative component experience and four credits of workshops are required, resulting in a total of 32 graduate credits of coursework. Courses are offered in agricultural mechanization, agronomy, animal science, horticulture, and economics.

Master of Architecture. The Department of Architecture offers a two-part program leading to the master of architecture, a professional degree. Beyond the bachelor of architecture degree, a minimum of 30 graduate credits is required. Beyond the B.A. or B.S. degrees in architecture or environmental design, a minimum of 60 credits is required. For students with other baccalaureate degrees, a program of more than 100 credits may be tailored to each student’s experience, training, and education. For programs of 60 credits or more, 40 must be graduate credits.

Master of Business Administration. The College of Business offers a 48 graduate credit-hour program leading to a nonthesis master of business administration degree. Students may select courses in the traditional business disciplines or choose areas of specialization in accounting, agribusiness, finance, human resource management, information systems, marketing, and manufacturing and quality.

Since no final oral examination is required, M.B.A. students must be registered for the equivalent of 2 credits the term of graduation or Gr St 601 (required registration) if no course work is required.

Master of Community and Regional Planning. The master of community and regional planning degree requires a minimum of 48 graduate semester credit hours. This degree is available as a thesis or nonthesis option.

Master of Education. For the master of education degree, a range of 30 to 40 graduate credits are required. The student demonstrates an ability to perform independent study through the completion of a creative component or a field-based activity.

Master of Engineering. The academic standards and the general level of attainment are the same for the master of engineering and master of science degrees. Master of engineering programs are offered to meet the needs for professionally oriented programs on campus and for off-campus professionally oriented programs at locations with adequate library and laboratory facilities. An appropriate number of credit hours in design, laboratory work, computation, or independent study is required as evidence of individual accomplishment. Of the minimum 30 graduate credits required, 22 credit hours must be earned at ISU.

Master of Family and Consumer Sciences. The College of Family and Consumer Sciences offers two nonthesis options leading to the degree master of family and consumer sciences. Both options are designed to enhance the skills of those holding the bachelor’s degree so that they may meet the requirements of their present jobs or progress in their careers. The comprehensive option can be followed on- or off-campus and requires 36 graduate credits covering a variety of family and consumer sciences subject matter. The specialization option requires 36 credits and is offered on-campus from the following departments: Hotel, Restaurant, and Institution Management; Human Development and Family Studies; and Textiles and Clothing. Both options require a written and oral integrative final exam.

Master of Fine Arts. For this degree a minimum of 60 graduate credits is required, 61 for the M.F.A. in Integrated Visual Arts, including the completion of a thesis-exhibition or a thesis.

Master of Landscape Architecture. The master of landscape architecture degree requires a minimum of 36 graduate credits and the satisfactory completion of a thesis or a creative component.

Master of Public Administration. This is a professional program designed to provide training necessary for an administrative position in a public or quasi-public bureaucracy. A minimum of 37 graduate credit hours is required in six subject areas. Either an internship in a governmental unit or a thesis is required.

Master of School Mathematics. This degree is designed primarily for inservice secondary mathematics teachers. Its prescribed program of study requires 36 graduate credits, two of which come from the writing of an approved creative component, 15 from courses offered for graduate credit, and 13 from courses offered for nonmajor graduate credit. At least 22 credit hours must be earned at ISU.

Master’s Double Degree Programs

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master’s degrees and two diplomas are granted at the same time. For double degrees the final project (thesis or creative component) must integrate subject areas from both departments. One final oral examination must be held covering the combined thesis or creative component. Students planning to pursue double degrees must complete a double degree request form and submit it to the Dean of Graduate College. The POS committee must include members from within the student’s major or co-major professor and jointly accepts responsibility for direction of the dissertation.

Doctor of Philosophy General Requirements

The degree doctor of philosophy is strongly research oriented. The primary requirements for the degree are: (1) high attainment and proficiency of the candidate in his or her chosen field, (2) development of a dissertation which is a significant contribution to knowledge and which shows independence and creative thought and work, and (3) successful passing of detailed examinations over the field of the candidate’s major work, with a satisfactory showing of preparation in related courses. General requirements for Ph.D. candidates are as follows:

Appointment of the Student’s Program of Study (POS) Committee. The POS committee for a doctoral program consists of at least five members of the graduate faculty. For a complete listing of graduate faculty and associated majors, see the Graduate College’s web site at www.grad-college.iastate.edu. It must include at least three members, including the major professor, from within the student’s major or program. The committee must include members from different majors or different departments so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student’s dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.
Program of Study. The student and the major professor develop the program of study with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of a program of study are very important. It is recommended that the committee be formed as early as the second semester of graduate study. In no case can the committee be formed later than the term before the preliminary oral examination.

Credits. A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. At least 24 of these credits must be earned during two consecutive semesters or during a continuous period including two semesters and a summer session while in residence at the university. (This requirement does not apply to doctoral students who are employed more than half time at ISU). There is no specific university requirement regarding the number of credits to be taken inside or outside the major/program.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is that student’s responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted by the university if requirements only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Residence. At least 24 semester credits must be earned during two consecutive semesters or during a continuous period including two semesters and a summer session. This requirement does not apply to doctoral students who are employed at least half-time by Iowa State University and government laboratories located in Iowa. The 72 graduate credits required for a Ph.D. at least 36 credits, including all dissertation research credits, must be earned under the supervision of the student’s POS committee.

Major. A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed at the end of this section of the bulletin. Opportunities also exist for majoring in more than one area of study (co-major or joint major programs).

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student’s POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the program of study, listed on all examination reports, and recorded on the “Application for Graduation” form (diploma slip).

Time Limits. A student beginning a Ph.D. degree program at Iowa State with a master’s degree from another institution is expected to complete the Ph.D. within five years, while a student beginning a Ph.D. degree program without the master’s degree is expected to complete the program within seven years. If warranted, the Program of Study (POS) Committee may request by letter that the Dean of the Graduate College extend these time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student’s program of study committee and the Graduate College. The inclusion in the program of study of coursework that is beyond the time limits (“over-age” courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Preliminary Examination. The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student’s knowledge of major, minor, and supporting subject areas as well as the student’s ability to analyze, organize, and present subject matter relevant to the field. A “Request for Preliminary Examination” form must be submitted to the Graduate College by the major professor at least two weeks before the proposed date of the examination.

The following conditions should be met before the “Request for Preliminary Examination” form is submitted to the Graduate College: admitted to full admission status in a Ph.D. granting program, approved “Recommendation for Committee Appointment” form, approved POS form, English requirement met, not on probation, time limit not exceeded, qualifying examination (if required by program) passed, and registration for at least the equivalent of 2 credits, or for the R-credit course GR ST 600 (Examination Only) if no course work is needed, during the term in which the preliminary oral examination is taken. (Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the preliminary oral examination.)

A preliminary oral examination will not be scheduled for a student on provisional or restricted admission or on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, he/she may be allowed to retake it. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request, signed by the entire POS committee, is approved by the Dean of the Graduate College.

Application for Graduation. Application for graduation should be made by the end of the first week of the semester (fall or spring) in which the student expects to receive the degree, or by the last day of the spring semester if graduation is planned during summer session. To apply for graduation, the student is required to submit to the Graduate College a signed “Application for Graduation” form, available in the program office or on the web at www.grad-college.iastate.edu/forms/forms.html. Before submitting this form, a student must have submitted and had approved by the Graduate College a “Recommendation for Committee Appointment” form and a “Program of Study” form. Also the student must have been fully admitted to a program and have met the Graduate English requirement. Graduation may be delayed if the “Application for Graduation” form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she should call the Graduate College (515-294-4831) and cancel the previously submitted “Application for Graduation” form. The student must then file a new form for the next planned term of graduation.

Dissertation. A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results obtained, and a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defence of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Thesis Office. The Graduate College
does not permit joint authorship of dissertations.

The Graduate College Thesis Manual, available free of charge from the Thesis Office (203 Beardshear Hall, 515-294-2666) or online at www.grad-college.iastate.edu/thesis/thesis.html, outlines the details of Graduate College requirements covering the preparation and submission of dissertations.

An unbound copy of the dissertation must be submitted to the Thesis Office for a format review at least two weeks prior to the final oral examination or not later than the First Submission deadline for the term in which the student intends to graduate whichever date falls first. Copies must be submitted to the members of the POS committee at least two weeks before the final oral examination.

After the final oral examination, two unbound, signed copies of the dissertation must be submitted to the Thesis Office no later than the Final Submission deadline for the term of graduation. Some colleges, programs, and departments require the submission of additional copies of the dissertation either to the Thesis Office or directly to the program (see the Graduate College Thesis Manual for a list of the units requiring submission of an additional copy to the Thesis Office).

During the term of graduation, a fee for processing the dissertation is billed by the university accounting system.

Final Oral Examination. The Ph.D. final oral examination, conducted after the dissertation is finished, is oral and often limited to a defense of the dissertation. To receive the degree at the end of a given semester, the student must hold the final oral examination before the final oral examination deadline for the semester.

The candidate is responsible for initiating the “Request for Final Oral Examination” form, which must be submitted to the Graduate College at least two weeks before the examination. The entire POS committee must be convened for the final oral examination. Any request to change the makeup of the committee needs to be submitted in writing to the Graduate College and approved by the Dean of the Graduate College before the final oral examination is held. For more information on the requirements, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a “Graduate Student Approval Slip for Graduation” form. It is sent to the major professor or program to give to the student after the “Request for Final Examination” form is received and approved by the Graduate College. Signatures are required by the major program, the Thesis Office, and the Graduate College. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Summary of Graduate Majors
(More information on each major can be found in the Courses and Programs section of this catalog under the department or program listed in parentheses after the degree information.)

Accounting: M.Acc. (see Accounting)
Aerospace Engineering: M.Eng., M.S., Ph.D. (see Aerospace Engineering)
Agricultural Economics: M.S., Ph.D. (see Economics)
Agricultural Education: M.S., Ph.D. (see Agricultural Education and Studies)
Agricultural Engineering: M. Eng., M.S., Ph.D. (see Agricultural Engineering)
Agricultural History and Rural Studies: Ph.D. (see History)
Agricultural Meteorology: M.S., Ph.D. (see Agronomy)
Agronomy: M.S. (see Agronomy)
Analytical Chemistry: M.S., Ph.D. (see Chemistry)
Animal Breeding and Genetics: M.S., Ph.D. (see Animal Science)
Animal Ecology: M.S., Ph.D. (see Animal Ecology)
Animal Nutrition: M.S., Ph.D. (see Animal Science)
Animal Physiology: M.S., Ph.D. (see Animal Science)
Animal Science: M.S., Ph.D. (see Animal Science)
Anthropology: M.A. (see Anthropology)
Applied Mathematics: M.S., Ph.D. (see Mathematics)
Applied Physics: M.S., Ph.D. (see Physics and Astronomy)
Architectural Studies: M.S. (see Architecture)
Architecture: M. Arch., M. Arch./M.B.A., M. Arch./M.C.R.P. (see Architecture)
Art and Design: M.A. (see Art and Design)
Astrophysics: M.S., Ph.D. (see Physics and Astronomy)
Biochemistry: M.S., Ph.D. (see Biochemistry, Biophysics and Molecular Biology)
Bioinformatics and Computational Biology: M.S., Ph.D. (see Bioinformatics and Computational Biology)
Biomedical Engineering: M.S., Ph.D. (see Biomedical Engineering)
Biophysics: M.S., Ph.D. (see Biochemistry, Biophysics and Molecular Biology)
Botany: M.S., Ph.D. (see Botany)
Business: M.S. (see Business Administration)
Chemical Engineering: M. Eng., M.S., Ph.D. (see Chemical Engineering)
Chemistry: M.S., Ph.D. (see Chemistry)
Civil Engineering: M.S., Ph.D. (see Civil Engineering)
Computer Engineering: M.S., Ph.D. (see Computer Engineering)
Computer Science: M.S., Ph.D. (see Computer Science)
Condensed Matter Physics: M.S., Ph.D. (see Physics and Astronomy)
Crop Production and Physiology: M.S., Ph.D (see Agronomy)
Earth Science: M.S., Ph.D. (see Geological and Atmospheric Sciences)
Ecology and Evolutionary Biology: M.S., Ph.D. (see Ecology and Evolutionary Biology)
Economics: M.S., Ph.D. (see Economics)
Education: M.Ed., M.Ed. Practitioner, M.S., Ph.D. (see Curriculum and Instruction, Educational Leadership and Policy Studies)
Electrical Engineering: M.S., Ph.D. (see Electrical and Computer Engineering)
English: M.A. (see English)
Entomology: M.S., Ph.D. (see Entomology)
Exercise and Sport Science: M.S. (see Health and Human Performance)
Family and Consumer Sciences: M.F.C.S. (see College of Family and Consumer Sciences)
Family and Consumer Sciences Education: M.Ed., M.S., Ph.D (see Family and Consumer Sciences Education and Studies)
Fisheries Biology: M.S., Ph.D. (see Animal Ecology)
Food Science and Technology: M.S., Ph.D. (see Food Science and Human Nutrition)
Forestry: M.S., Ph.D. (see Forestry)
Genetics: M.S., Ph.D. (see Genetics)
Geology: M.S., Ph.D. (see Geological and Atmospheric Sciences)
Graphic Design: M.F.A. (see Art and Design)
Health and Human Performance: Ph.D. (see Health and Human Performance)
High Energy Physics: M.S., Ph.D. (see Physics and Astronomy)
History: M.A. (see History)
History of Technology and Science: M.A., Ph.D. (see History)

Horticulture: M.S., Ph.D. (see Horticulture)

Hotel, Restaurant, and Institution Management: M.S., Ph.D. as a joint major in a related department (see Hotel, Restaurant, and Institution Management)

Human Development and Family Studies: M.S., Ph.D. (see Human Development and Family Studies)

Immunobiology: M.S., Ph.D. (see Immunobiology)

Industrial Education and Technology: M.S., Ph.D. (see Industrial Education and Technology)

Industrial Engineering: M.S., Ph.D. (see Industrial Engineering)

Industrial Relations: M.S. (see Industrial Relations)

Information Assurance: M.S. (see Information Assurance)

Inorganic Chemistry: M.S., Ph.D. (see Chemistry)

Integrated Visual Arts: M.F.A. (see Art and Design)

Interdisciplinary Graduate Studies: M.A., M.S (see Interdisciplinary Graduate Studies)

Interior Design: M.F.A. (see Art and Design)

Journalism and Mass Communication: M.S. (see Journalism and Communication, Greelee School of)

Materials Science and Engineering: M.S., Ph.D. (see Materials Science and Engineering)

Mathematics: M.S., Ph.D. (see Mathematics)

Meat Science: M.S., Ph.D. (see Animal Science, Food Science and Human Nutrition (offered as Ph.D. only jointly with Animal Science))

Mechanical Engineering: M.S., Ph.D. (see Mechanical Engineering)

Meteorology: M.S., Ph.D. (see Geological and Atmospheric Sciences)

Microbiology: M.S., Ph.D. (see Microbiology)

Molecular, Cellular, and Developmental Biology: M.S., Ph.D. (see Molecular, Cellular, and Developmental Biology)

Neuroscience: M.S., Ph.D. (see Neuroscience)

Nuclear Physics: M.S., Ph.D. (see Physics and Astronomy)

Nutrition: M.S., Ph.D. (see Food Science and Human Nutrition)

Operations Research (must be a joint major with Statistics): M.S. (see Industrial Engineering/Statistics)

Organic Chemistry: M.S., Ph.D. (see Chemistry)

Physical Chemistry: M.S., Ph.D. (see Chemistry)

Physics: M.S., Ph.D. (see Physics and Astronomy)

Physiology: M.S., Ph.D. (see Biomedical Sciences)

Plant Breeding: M.S., Ph.D. (see Agronomy)

Plant Pathology: M.S., Ph.D. (see Plant Pathology)

Plant Physiology: M.S., Ph.D. (see Plant Physiology)

Political Science: M.A., M.P.A. (see Political Science)

Professional Agriculture: M.Ag. (see Professional Agriculture)

Psychology: M.S., Ph.D. (see Psychology)

Public Administration: M.P.A., M.P.A./M.C.R.P. (see Political Science)

Rhetoric and Professional Communication: Ph.D. (see English)

Rural Sociology: M.S., Ph.D. (see Sociology)

School Mathematics: M.S.M. (see Mathematics)

Sociology: M.S., Ph.D. (see Sociology)

Soil Science: M.S., Ph.D. (see Agronomy)

Statistics: M.S., M.B.A./M.S., Ph.D. (see Statistics)

Sustainable Agriculture: M.S., Ph.D. (see Sustainable Agriculture)

Systems Engineering: M.Eng. (see Systems Engineering)

Textiles and Clothing: M.S., Ph.D. (see Textiles and Clothing)

Toxicology: M.S., Ph.D. (see Toxicology)

Transportation: M.S. (see Transportation)

Veterinary Anatomy: M.S., Ph.D. (see Biomedical Sciences)

Veterinary Clinical Sciences: M.S. (see Veterinary Clinical Science)

Veterinary Microbiology: M.S., Ph.D. (see Veterinary Microbiology and Preventive Medicine)

Veterinary Pathology: M.S., Ph.D. (see Veterinary Pathology)

Veterinary Preventive Medicine: M.S. (see Veterinary Microbiology and Preventive Medicine)

Water Resources: M.S., Ph.D. (see Water Resources)

Wildlife Biology: M.S., Ph.D. (see Animal Ecology)

Zoology: M.S., Ph.D (see Zoology and Genetics)
Information About Courses

Course Numbers
The courses in each department are numbered from 1 to 699, according to the following groups:

- 1-99 Courses not carrying credit toward a degree.
- 100-299 Courses primarily for freshman and sophomore students.
- 300-499 Courses primarily for junior and senior students.
- 500-599 Courses primarily for graduate students, but open to qualified undergraduates.
- 600-699 Courses for graduate students only.

Credits and Contact Hours
The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, Com S 103 is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term "Cr. arr." means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the entire semester is required for each credit.

The term "Cr. R." means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted.

Semester of Offering
Within each course description may be found one or more of the following letters: F. S. SS., indicating which term—fall, spring, summer session—of the academic year the course is offered. "Alt." is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite
A prerequisite indicates the specific academic background or general academic maturity considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite for a course for which he or she is responsible. Thus, permission of the instructor is understood to be an alternate to the stated prerequisites in all courses.

Cross-listed Courses
A course may be listed with its complete description in one department, and without its description in another department. In both cases, the department with which the course is cross-listed is noted in parentheses. The department in which the full description appears is responsible for the course, but credit for the course may also be obtained through the department in which it is cross-listed.

Co-listed Courses
A course, including its complete description, may be listed in two or more departments, with the department or departments co-listing the course being noted in parentheses in each case. All departments in which the course is listed share responsibility for its offering, and credit for it may be obtained through any of the departments in which it is listed.

Dual-listed Courses
Dual-listed courses permit undergraduate and graduate students to be in the same class but to receive credit under different course numbers. Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase "Dual-listed with," although the student's official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

Priority Enrollment
High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course. After those needs are met, priority is based on the classification of the student, with those nearest graduation receiving first consideration. The Schedule of Classes, published semiannually, contains current information as to the courses for which priority enrollment is in use.

Special Course Fees
Courses for which special course fees are assessed are designated in the Schedule of Classes. Special course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental math fees, and camp fees. In some cases, special course fee amounts vary from term to term. Billing and collection of special fees are handled through the university's Accounts Receivable system.

Additional information on camp fees and the developmental math fee may be found in the fees and expenses section. See Index, Fees.

Designators
For a list of abbreviations designating departments and programs see Index, Designators.

Graduate Programs
Graduate Major
A major in the Graduate College is the area of academic professional concentration, approved by the Board of Regents, in which the student chooses to qualify for the award of a graduate degree.

Graduate Area of Specialization
Areas of specialization are indicated in the graduate statements of some departments. This is a subdivision of a major in which a strong graduate-level program is available. When approved by the Graduate College, such areas of specialization are shown parenthetically after the major on official records, including transcripts and thesis/dissertation title pages.

Interdepartmental Programs
Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.
Nonmajor Graduate Credit

All courses included on the Program of Study of a graduate student must be approved by the student’s program of study committee. Usually courses in the major are selected from 500- and 600-level courses in the major. Courses outside of the major can be selected from other 500- and 600-level courses and from 300- and 400-level courses which have been approved for nonmajor graduate credit. In the catalog, the approved 300- and 400-level courses are indicated by the words “Nonmajor graduate credit” in the course description.
The primary purpose of accounting is to provide relevant information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, and controlling the activities of the firm. Accounting is needed by external users in order to make investment decisions, grant or withhold credit, and, in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with: (1) a mastery of basic accounting concepts; (2) an ability to think critically and creatively about accounting problems; (3) an ability to communicate effectively and work with others as a member of a team; (4) an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession. The require-
Acct 490. Independent Study. Cr. 1 to 3 each time taken. F.S.S. Prereq: 285, senior classification, permission of instructor.

Acct 495. Advanced Accounting Problems. (3-0) Cr. 3. Prereq: 387. Partnerships, branch operations, accounting for business combinations and affiliated companies, consolidated financial statements; reporting for multinational operations. Nonmajor graduate credit.

Acct 497. Introduction to Auditing. (3-0) Cr. 3. F.S. Prereq: 284 and 386. The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing. Nonmajor graduate credit.

Courses Primarily for Graduate Students, open to qualified undergraduate students

Acct 508. Survey of Financial and Managerial Accounting. (2-0) Cr. 2. Prereq: Graduate classification. A general introduction to both financial and managerial accounting information. Financial topics covered include the use and analysis of financial information, the regulatory environment, and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data. Managerial topics covered include the use of accounting information as a basis for management decisions, basic cost concepts, cost-volume-profit analysis, strategic cost issues and performance measurement.

Acct 585. Tax Implications of Business Decisions. (3-0) Cr. 3. Prereq: 285, 6 credits in accounting or 508. The impact of federal tax legislation on the formation, operation and liquidation or reorganization of entities. Income-tax planning for executives.

Acct 589. Accounting and Taxation of Agricultural Entities. (3-0) Cr. 3. Prereq: 285, 6 credits in accounting or 508. Financial and cost accounting concepts and procedures for agribusiness operations, including ABC costing, managerial decision-making including present value analysis and break-even point analysis. Procedures and planning of income tax, including entity selection. Transfer taxes as related to farming and ranching.

Acct 590. Special Topics. Cr. 1 to 3 each time taken. F.S.S. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of accounting.

Acct 592. Financial Statement Analysis. (3-0) Cr. 3. Prereq: 284 or 508. The presentation and analysis of financial data from the point of view of the primary users of such data: owners and creditors. Topics covered will include the financial reporting system, the primary financial statements, and effects of accounting method choice on reported financial data, and firm valuation.

Acct 596. International Accounting. (3-0) Cr. 3. Prereq: 284 or 508. Accounting and reporting requirements and managerial issues faced by multinational corporations. The international environment of standard setting will be examined. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

Acct 597. Advanced Auditing and Assurance Services. (3-0) Cr. 3. Prereq: 497. A study of advanced auditing and assurance issues. Topics include risk analysis, internal control, fraud detection, analytical procedures, evaluating operational and strategic objectives, and reporting and implementing audit findings.

Acct 598. Financial Accounting: Theory and Contemporary Issues. (3-0) Cr. 3. F. Prereq: 386 and 508. Theoretical discussion of the financial accounting and reporting environment. The usefulness of financial accounting information for decision making will be the role of statistical data of current financial accounting issues and the financial accounting standard setting process will be discussed and examined.

Acct 599. Creative Component. Cr. 2. Prereq: Be admitted to the Master of Accounting Program. This course prepares students to complete their creative component project required in the Master of Accounting degree.

Aerospace Engineering

(Administered by the Department of Aerospace Engineering and Engineering Mechanics)

Thomas J. Rudolph, Chair of Department

Distinguished Professors: R. B. Thompson

Professors: Chimenti, Greer, Holger, Inger, McDaniel, Munson, Pierson, Rogge, Rothach, Rothmayer, Rudolph, Schnerr, Tannehill, Tsai, Zachary

Professors (Adjunct): Hsu

Distinguished Professors (Emeritus): D. Thompson, Young

Professors (Emeritus): Akers, Iversen, Jenison, McConnell, Rizzo, Weiss, Wilcox

Associate Professors: Daval, Flattau, Hilliard, Hindman, Lu, Mann, Mitra, Rajagopalan, Sarkar, Sherman, Sturges, Trulin, Vogel

Associate Professors (Adjunct): Roberts

Associate Professors (Emeritus): Hermann, Severiske

Assistant Professors: Bastawros, Chavez, Jacobson

Assistant Professors (Adjunct): Gray, Legg

Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in an atmosphere, a fluid medium, or outer space as well as on water and land surfaces. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight mechanics, propulsion, structural mechanics, controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, and transportation problems play major roles.

A cooperative education program in aerospace engineering is available in cooperation with several industries and government agencies. The usual four-year curriculum is extended over a five-year span to permit alternate industrial experience periods and academic periods. This arrangement offers valuable practical work experience and financial assistance during the college years. See College of Engineering, Cooperative Programs.

Undergraduate Mission, Educational Objectives and Learning Outcomes:

The Department of Aerospace Engineering and Engineering Mechanics maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of academic improvement to provide the best possible education for our students.

Mission Statement: The mission of the Aerospace Engineering Program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

1. Coordinate the Aerospace Engineering Program’s mission, educational objectives, and learning outcomes with the Iowa State University, College of Engineering, and AEM Department mission, objectives, and outcomes.

2. Educate students to be proficient in the application of fundamental principles of aerodynamics, flight mechanics, propulsion, structural mechanics, controls, design, testing, and space technologies to the solution of significant aerospace problems.

3. Prepare students to be successful in the workplace utilizing non-technical skills that include: communication skills, teamwork, leadership, ethical and societal responsibility considerations.

4. Provide students with applied engineering experiences through hands-on laboratory courses, internships, and cooperative education experience.

5. Maintain an ongoing consultation with students, faculty, industry, and aerospace professionals for the continuous process of academic improvement.

Program Learning Outcomes:

1. Apply a basic knowledge of mathematics and/or science and the knowledge of engineering to aerospace engineering problems.

2. Identify, formulate, and solve aerospace engineering problems.
programs in aerospace engineering, a student whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite background. A prospective graduate student is urged to specify the degree program and the specific field of interest on the application for admission.

Courses normally will be offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Courses open for nonmajor graduate credit: 311, 312, 322, 331, 343, 351, 356, 361, 412, 421, 422, 423, 426, 432, 441, 442, 446, 451, 461, 464, 471.

Courses Primarily for Undergraduate Students
Aer E 161. Numerical and Graphical Techniques for Aerospace Engineering. (2-2) Cr. 3. F.S. Prereq: Math 141 or 142 or satisfactory scores on mathematics placement examinations; credit or enrollment in Math 165, proficiency in FORTRAN or C programming languages. Solutions to numerical engineering problems using the FORTRAN language. Development of algorithms. Graphical description of geometrical objects with freeshand techniques. Introduction to geometric modeling with parametric modeling software. Emphasis on visualization for aerospace design.

Aer E 192. Aerospace Seminar. (1-0) Cr. R. S. Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, short course and departmental symposium participation.

Aer E 201. Introduction to Aerospace Engineering. (3-0) Cr. 3. F.S. Prereq: Math 161, Math 166, Phys 221, Engr 160 or 161. Introduction to aerospace disciplinary topics, including: aerodynamics, structures, propulsion, flight mechanics and performance.

Aer E 202. Instrumentation Laboratory. (1-2) Cr. 2. F.S. Prereq: Math 165, Engr 160 or 161, credit or enrollment in Phys 243, 242L. Proficiency with basic instrumentation utilized in other Aer E laboratory courses. Computer usage. Probes and data acquisition equipment for fluid mechanics and structural mechanics. Operation, accuracy and troubleshooting of instruments, experiment design, reporting results, and observation of basic phenomena.

Aer E 265. Scientific Balloon Engineering and Operations. (Same as Mteor 265) (0-2) Cr. 1. F.S. Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Operations team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control.

Aer E 291. Aerospace Seminar. (1-0) Cr. R. F. Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, short course and departmental symposium participation.

Aer E 292. Aerospace Seminar. (1-0) Cr. R. S. Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, short course and departmental symposium participation.

Aer E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course prior to commencing work.

Aer E 301. Flight Experience. Cr. R. F.S.S. Prereq: Credit or enrollment in 256. Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering and Mechanics Department. Four hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course.

Aer E 311. Thermodynamics and Gas Dynamics for Aerospace Engineers. (4-0) Cr. 4. F.S. Prereq: 243, enrollment in 311L. 1st and 2nd laws of thermodynamics, properties of liquids and gases, thermodynamic processes and relations, energy equation, compressible flow, shock and expansion waves, isentropic flow, Fanno and Rayleigh flow. Nonmajor graduate credit.

Aer E 311L. Gas Dynamics Laboratory. (0-3) Cr. S. S. F. (8 weeks) Prereq: 243, 243L, enrollment in 311L. Introduction to experimental compressible flow and propulsion principles, techniques and instruments through laboratory studies and experiments. Report writing.

Aer E 343. Aerodynamics II. (3-0) Cr. 3. S. Prereq: 311, enrollment in 343L. Incompressible, subsonic, supersonic, supersonic hypersonic flow over airfoils and wings. Viscous flow theory. Laminar boundary layers. Transition and turbulent flow. Nonmajor graduate credit.

Aer E 361. Computational Techniques for Aerospace Design. (1-4) Cr. 3. S. Prereq: Credit or enrollment in 322, 343 and 396. Advanced programming, workstation environment, and development of computational tools for aerospace analysis and design. Nonmajor graduate credit.

Aer E 391. Aerospace Seminar. (1-0) Cr. R. F. Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering applications and related professional activities. Academic program planning, short course and departmental symposium participation.

Aer E 392. Aerospace Seminar. (1-0) Cr. R. S. Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, short course and departmental symposium participation.

Aer E 396. Summer Internship. Cr. R. SS. Prereq: Permission of department. Summer professional work period.

Aer E 397. Engineering Internship. Cr. R. F.S. Prereq: Permission of department. Professional work period, one semester maximum per academic year.

Aer E 398. Cooperative Education. Cr. R. F.S.SS. Prereq: 298, permission of department. Second professional work period in the cooperative education program. Students must register for this course prior to commencing work.

Aer E 412. Aerospace Vehicle Propulsion II. (3-0) Cr. 3. F. Prereq: 312, 343. Liquid and solid rocket propulsion, including cold gas, bi-propellant and mono-propellant rocket propulsion. Magnetohydrodynamics, Hall thrusters and electric propulsion. Space mission requirements. Advanced and exotic space propulsion concepts. Nonmajor graduate credit.

Aer E 422. Advanced Aerospace Structural Analysis. (3-0) Cr. 3. S. Prereq: 322. Advanced topics in flight structural analysis and testing. Application of finite element techniques to beams, frames and inelastic loads on structures. Laboratory demonstrations. Nonmajor graduate credit.

Introduction to concepts of expert systems in design. Nonmajor graduate credit.

Aer E 442. V/STOL Aerodynamics and Performance. (3-0) Cr. 3. F. Prereq: 356. Introduction to the aerodynamics of hovering, stability, control and critical maneuvering characteristics of V/STOL vehicles. Topics include hovercrafts, jet flaps, ducted fans and thrust vector engines. Nonmajor graduate credit.

Aer E 461. Modern Design Methodology with Aerospace Applications. (2-2) Cr. 3. F.S. Prereq: 361. Modern engineering design process including quality and manufacturability, design optimization, probabilistic design, materials and strength considerations, durability, reliability and damage tolerance. Nonmajor graduate credit.

Aer E 471. Theory and Practice in Modern Experimental Aerothermal Sciences. (2-2) Cr. 3. S. Prereq: 343, 343L. Introduction to the experimental and theoretical aspects of experimental aerodynamics and propulsion measurement techniques and instruments. Subsonic, transonic and supersonic wind tunnels and their use. Nonmajor graduate credit.

Aer E 491. Aerospace Seminar. (1-0) Cr. R. F.S. Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, short course and departmental symposium participation.

Aer E 492. Aerospace Seminar. (1-0) Cr. R. F.S. Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, short course and departmental symposium participation.

Aer E 493. Aerospace Symposium. (1-0) Cr. R. F.S. Prereq: Senior classification. Presentation of a technical paper at the departments fall or spring Aerospace Symposium or at a recognized student or professional meeting of the American Institute of Aeronautics and Astronautics (AIAA).

Aer E 498. Cooperative Education. Cr. R. F.S.SS. Prereq: 386, permission of department. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Aer E 499. Senior Project. Cr. 1 to 3 each time taken. F.S. Prereq: Senior classification. Development of aerospace principles and concepts through individual or group projects.

Courses Primarily for Graduate Students, Open to qualified undergraduate students

Aer E 517. Experimental Stress Analysis. (Same as E M 517.) See Engineering Mechanics.

Aer E 521. Airframe Analysis. (3-0) Cr. 3. F. Prereq: 421 or M E 425. Analysis of static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

Aer E 525. Finite Element Analysis. (Same as E M 525.) See Engineering Mechanics.

Aer E 531. Automatic Control of Flight Vehicles. (3-0) Cr. 3. S. Prereq: 331. Applications of classical and modern linear control theory to automatic control of flight vehicles. Linear-quadratic regulator and pole-placement design applications.

Aer E 546. Computational Fluid Mechanics and Heat Transfer I. (Same as M E 546.) (3-0) Cr. 3. F. Introduction to finite difference and finite volume methods used in modern engineering. Basic concepts of discretization, consistency, and stability. Applications of numerical methods to selected model partial differential equations.
Aer E 547. Computational Fluid Mechanics and Heat Transfer II. (Same as M E 547.) (3-0) Cr. 3. S. Prereq: 546. Application of computational methods to current problems in aerodynamic, atmospheric, and space flight. Transfer methods for solving the Navier-Stokes and reduced equation sets such as Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to turbulence aspects of grid generation and turbulence modeling.

Aer E 561. Modern Aerospace Design Methodology. (2-2) Cr. 3. S. Prereq: 322, 331, 343, 381, and proficiency in FORTRAN programming. Principles and methodology of optimal and statistical design applied to aerospace structural, fluid dynamic, flight dynamic, control systems, and applications.

Aer E 565. Systems Engineering and Analysis. (Same as E E 565, I E 565.) (3-0) Cr. 3. S. Prereq: 547, Graduate classification in engineering. Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test evaluation, and systems engineering planning and organization.

Aer E 566. Avionics Systems Engineering. (Same as E E 566.) (3-0) Cr. 3. S. Prereq: 565. Avionics functions. Applications of systems engineering principles to avionics. Top-down design of avionics systems. Automated design tools.

Aer E 571. Environmental Aerodynamics. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 541. Survey of atmospheric turbulence, turbulent diffusion, and velocity profile within the atmospheric boundary layer with emphasis on modeling by means of the environmental wind tunnel.

Aer E 599. Creative Component. Cr. 1 to 5.

Courses for Graduate Students

Aer E 620. Seminar. (1-0) Cr. 1.

Aer E 631. Modern Flight Control Systems. (3-0) Cr. 3. S. Prereq: 547, 576. Application of modern control theory to flight control. Controller design based on optimal control techniques. Nonlinear system theory applications. Typical aerospace control methods such as model following, load alleviation, and flight envelope expression. Recent advances in aerospace vehicle control.

Aer E 635. Optimization in Aerospace Engineering I. (3-0) Cr. 3. Prereq: 531, 541, 551. Applications of unconstrained and constrained parameter optimization, dynamic programming, and optimal control theory to problems in aerodynamics, aerospace structures, flight dynamics and control, and aerospace design. Special emphasis on numerical methods of optimization.

Aer E 636. Optimization in Aerospace Engineering II. (3-0) Cr. 3. Prereq: 635. Applications of unconstrained and constrained parameter optimization, dynamic programming, and optimal control theory to problems in aerospace structures, flight dynamics and control, and aerospace design. Special emphasis on numerical methods of optimization.

Aer E 646. Computational Methods for Internal and Low Speed Flows. (Same as M E 646.) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 547. Emphasis is on algorithms suitable for internal and external low speed flows at speeds up through transonic. Topics include pressure-based schemes, pseudo-compressibility methods, use of preconditioning to develop algorithms suitable for all speed regimes. Godunov first and second order finite difference and finite volume methods, algorithms for unstructured grids, and finite elements in fluids.

Aer E 650. Fluid Mechanics Seminar. (Same as M E 650.) (1-0) Cr. 1 each time taken. F. Prereq: Permission of instructor. Special topics of current research interest to students and staff of departments concerned.

Aer E 699. Research.

2001-2003
African American Studies

www.iastate.edu/~catalog/catalog/courses/afican.htm

(Interdepartmental Undergraduate Program)

Program Committee: D. Anderson, R. Baum, J. Berry, H. Blake, S. Dunlap, K. Hickok, D. Rollins, V. Sheares, G. Tartakov, Y. Teshome

Undergraduate Study

African American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers an opportunity to explore African Americans’ contributions to American culture. Analysis of the African American experience—in history, literature, art, religion, and society—provides students with skills, sensitivities, and information to help them function more effectively in today’s diverse society.

African American Studies at Iowa State University is an expanding program. Most of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university’s diversity requirement. At present students can minor or even design their own. Interdisciplinary Studies major with an emphasis in African American Studies.

A minor in African American Studies requires six courses in the program with a minimum of 18 credits, including Introduction to African American Studies (Af Am 201) and Seminar in African American Culture (Af Am 460). The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

Graduate Study

Courses open for nonmajor graduate credit: 334, 347, 348, 349, 350, 460, 475.

Courses Primarily for Undergraduate Students

Af Am 201. Introduction to African American Studies. (3-0) Cr. 3. F. S. An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.

Af Am 252. African American Theatre Production. (Same as Thtr 252.) See Theatre.

Af Am 310. Introduction to African History I. (Same as Hist 310.) See History.

Af Am 311. Introduction to African History II. (Same as Hist 311.) See History.

Af Am 325. Peoples and Cultures of Africa. (Same as Anthr 325.) See Anthropology.

Af Am 333. African American Ethnology. (Same as Anthr 333.) See Anthropology.

Af Am 347. Survey of African American Literature. (Same as Engl 347.) See English. Nonmajor graduate credit.

Af Am 348. Contemporary African American Literature. (Same as Engl 348.) See English. Nonmajor graduate credit.

Af Am 350. African American Women. (Same as W S 350.) See Women’s Studies. Nonmajor graduate credit.

Af Am 354. History of African Americans II. (Same as Hist 354.) See History.

Af Am 460. Seminar in African American Culture. (3-0) Cr. 3. S. Intensive study of a selected topic in African-American Studies in one or more disciplines. Selected readings of various authors, movements, eras, or genres. Primary and secondary source materials. Nonmajor graduate credit.

Af Am 490. Independent Study. Cr. 1 to 3 each time taken, maximum of 3. Prereq: 6 credits in African American Studies, and permission of instructor and of the chair of the African American Studies Program.

Courses Offered by Other Departments

Engl 349. Selected Topics in Multicultural Literatures of the United States. See English. Available only when offered as a course in African American literature. Nonmajor graduate credit.

Relig 475. Seminar: Issues in the Study of Religion. See Religious Studies. When content is appropriate, may be taken as Relig 475. Nonmajor graduate credit.

Agricultural Education and Studies

Robert A. Martin, Head of Department

Professors: Acker, Carter, Crawford, Martin, W. Miller, Williams

Professors (Emeritus): Gamon, Gauger, Hoemer, Lawrence, Parsons

Associate Professors: Bogue, Honeyman, Jones, G. Miller, Tred

Associate Professors (Emeritus): Bruene

Assistant Professors: Grudens-Schuck, Morris, Polito, Tred

Assistant Professors (Adjunct): Brown

Undergraduate Study

For undergraduate curricula in agricultural education, agricultural extension education, agricultural studies, and professional agriculture (off campus) leading to the degree bachelor of science, see College of Agriculture, Curricula.

The department offers four curricula major with an emphasis in agricultural education, agricultural extension education, agricultural studies, and professional agriculture (off campus). The agricultural education curriculum prepares persons for careers as agricultural education instructors and educational specialists in industry and governmental agencies. The agricultural education curriculum has two options, teacher certification and communications. The agricultural extension education curriculum prepares persons for careers in extension. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. The professional agriculture curriculum is an off-campus program that prepares persons for careers in production agriculture industry. Graduates of each curriculum accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates are able to communicate effectively. They have a broad base of agricultural knowledge. They have the ability to live and work in a global society and have an understanding of today’s technical society. They are skilled in making decisions and have the ability to plan, organize, present, and evaluate information.

The department offers a minor in agricultural education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. Courses that can be taken for a minor are 211, 310, 311, 315, 411, 412 or 418, 414, 450, 490, 496, and 499.

Visit our departmental website at www.ag.iastate.edu/departments/aged/
Courses open to students for nonmajor graduate credit: 412, 414, 416, 417, 458, 450, 466.

Courses Primarily for Undergraduate Students

AgEds 110. Orientation. (1-0) Cr. 0.5 F. Orientation to the department. Careers in agriculture. A. Agricultural Education B. Agricultural Studies C. General Agriculture.

AgEds 112. Orientation for Agricultural Excellence Scholars. (1-0) Cr. 1 each time taken, maximum of 2 credits. F. Prereq: Enrollment as an agricultural excellence scholar. The roles of professionals in agriculture, academic preparation for assuming the role of a professional in agriculture, and meeting the demands of the scholar’s curriculum.

AgEds 211. Early Field Based Experience. (1-0) Cr. 1 each time taken, maximum of 3 credits. F.S.S. Prereq: 110. Five days on-site in an agricultural setting observing competencies and issues in problem solving, decision-making, initiative taking, teamwork, leadership, written and oral communications, critical thinking and creativity. When students register it is their responsibility to make an appointment with the departmental coordinator (very early in the semester) to plan their experience.

A. High School Agriculture Program B. Extension C. Agricultural Industries and Agencies

AgEds 282. Educating Youth Through Horticulture. (Same as Hort 282.) (2-3) Cr. 3. S. Planning, developing, and implementing science-based educational programs in a public garden setting. Through hands-on experiences at Reiman Gardens, students will learn about horticulture, learning theory, and the application of science principles as they pertain to educating youth.

AgEds 310. Foundations of Agricultural Education Programs. (2-0) Cr. 2. F.S. Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.

AgEds 311. Presentation and Sales Strategies for Agricultural Audiences. (3-0) Cr. 3. S. Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

AgEds 315. Personal and Professional Leadership in Agriculture. (3-0) Cr. 3. F.S. Develop leadership skills and learn leadership theories for personal and professional applications in agricultural education, industry, and communities.

AgEds 401. Planning Agricultural Education Programs. (Dual-listed with 501.) (3-0) Cr. 3. F. Prereq. 310. Responsibility of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AgEds 402. Methods of Teaching in Agricultural Sciences/Agribusiness. (Dual-listed with 502.) (3-0) Cr. 3. S. Prereq. 401. Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AgEds 412. Internship in Agricultural Education and Studies. 2 to 12 weeks. Cr. 2 to 6 each time taken, maximum of 8. F.S. Prereq. 211, junior classification in AGEDS and permission of instructor.

A supervised learning experience in an approved learning setting with application to educational, agricultural and/or environmental practices and principles. Nonmajor graduate credit.

AgEds 414. Developing Agricultural Education Programs in Non-Formal Settings. (2-0) Cr. 2. S. Prereq. 211 and permission of instructor. Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programs organized for youth and adult audiences, agricultural industry, and related agencies. Nonmajor graduate credit.

AgEds 416. Pre-Student Teaching Experience in Agricultural Education. Cr. 1. F. Prereq. 211, 402 and permission of instructor. A one-week field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required. Nonmajor graduate credit.

AgEds 417. Supervised Teaching in Agricultural Education Programs. Cr. 12. F.S. Prereq. 211, 402 and permission of instructor. Supervised teaching in public schools. Nonmajor graduate credit.

AgEds 418. Supervised Extension Experience. Cr. 2 to 8. May be repeated to a maximum of 16 credits. F.S.S. Prereq: 211, junior classification, permission of instructor. Supervised professional experience in an approved county, area or state Cooperative Extension Service office. Nonmajor graduate credit.

AgEds 450. Farm Management and Operation. (1-6) Cr. 3. S. Prereq: Econ 125, Econ 330, junior classification. Participation in the management and operation of a diversified farm enterprise. The class is responsible for the plans, records, and decisions for buying and selling the farm’s livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year by permission of the instructor. Nonmajor graduate credit.

AgEds 490. Independent Study in Agricultural Education and Studies. Cr. 1 to 3. F.S.S. Prereq: Junior or senior classification, permission of instructor. A maximum of 6 credits of 490 may be used toward the total of 128 credits required for graduation.

AgEds 496. Agricultural Travel Course. Cr. 1 to 3. F.S.S. Prereq: Permission of instructor. Study and tour of agricultural areas. Topics include economics, geography, history, livestock, marketing, and soils of host country. Nonmajor graduate credit.

Courses Primarily for Graduate Students, open to qualified undergraduate students

AgEds 500. Short Course in Agricultural Education. Cr. 1 to 3 each time taken. F.S.S. Prereq: Permission of instructor. Specific problems, issues, and content areas in agricultural education. On-campus or as off-campus experience.

AgEds 501. Planning Agricultural Education Programs. (Dual-listed with 401.) (3-0) Cr. 3. F. Prereq. 310. Responsibility of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AgEds 502. Methods of Teaching in Agricultural Sciences/Agribusiness. (Dual-listed with 402.) (3-0) Cr. 3. S. Prereq. 401. Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AgEds 510. Introduction to Research in Agricultural Education. (3-0) Cr. 3. F. Prereq. Permission of instructor. Determining your research focus; developing research objectives and hypotheses; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues. The primary outcome is the development of a thesis, dissertation or creative component proposal.

AgEds 511. Instructional and Organizational Issues for Beginning Teachers of Agricultural Programs. Cr. 1 to 2. F. Prereq: Permission of instructor. Planning and implementing agricultural programs in secondary schools.

AgEds 514. Organizing Agricultural Information for Professional and Scientific Meetings. (1-2) Cr. 2. S. Prereq. Graduate classification in agriculture. Concepts and practices in planning, preparing, and presenting oral and written papers and scientific papers by agriculturalists with special emphasis on computerized delivery methods.

AgEds 520. Instructional Methods for Teaching in Agricultural Education. (3-0) Cr. 3. F. Prereq: Permission of instructor. Preparation of graduate students to become college or university instructors. Addresses the principles of teaching and learning as they influence teaching activities; psychological aspects of learning, developing teaching plans; laboratory teaching; evaluating student learning; motivating students; examining personal teaching behaviors that influence learning, and choosing appropriate teaching methods.

AgEds 521. Leadership Development in Agricultural Education. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: Permission of instructor. Principles and practices of leadership and group dynamics. Designing, organizing, implementing, and evaluating leadership programs for developing exemplary leaders of agricultural teams and groups.

AgEds 530. Distance Teaching and Learning in Agriculture. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: Permission of instructor. Understanding distance learners in agriculture and their educational needs and preferences. Technology options to enhance distance teaching. Methods of teaching at a distance and administrative issues.

AgEds 560. Role of Agricultural Education and Agricultural Extension in Technology Transfer. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: Permission of instructor. Processes in formal and informal Extension and other agricultural education programs influence introduction and acceptance of agricultural technology, including strategies for technology transfer.

AgEds 561. Agricultural and Extension Education in Developing Countries. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Permission of instructor. Utilizing systematic approaches to identifying, analyzing, and solving problems in intercultural education, with emphasis on the impact of agricultural education, formal and nonformal, on development.
AgEds 590. Special Topics in Agricultural Education. Cr. 1 to 3. F.S.SS. Prereq: 12 credits in agricultural education.
A. Curriculum
B. Methods
C. Philosophy
D. Evaluation
E. Administration
F. Leadership
G. Guidance
I. Instructional Technology
J. Extension
K. International Agriculture
L. Program Planning

AgEds 593. Workshop in Agricultural Education. Cr. 1 to 3 each time taken. F.S.SS. Prereq: 12 credits in agricultural education.
A. Curriculum
B. Methods
C. Evaluation
D. Administration
E. Leadership
F. Extension
G. Program Planning
H. Instructional Technology
M. Biotechnology Workshop

AgEds 599. Creative Component. F.S.SS. For non-thesis M.S. degree programs.

Courses for Graduate Students

AgEds 615. Seminar in Agricultural Education. (1-0) Cr. 1 each time taken. F.S.SS. Offered on a satisfactory-fail grading basis only.

AgEds 625. Administration and Supervision of Agricultural Education Programs. (3-0) Cr. 3. Alt. S., offered 2003. Prereq. 521. Management principles and practices of planning, organizing, directing, staffing, and evaluating as applied to administration and supervision of programs in agricultural education.

AgEds 699. Research.
pline other than agricultural engineering. Supporting work will be required depending on the student’s background and area of interest with requirements defined by departmental guidelines.

Well qualified juniors or seniors in Agricultural Engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both B.S. and M.S. degrees. Under current enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

For the master of science program at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 31 and 27. For the degree of doctor of philosophy, the corresponding numbers are 72 and 49; plus an additional 6 hours of coursework are required as an “enrichment component” in some important subject area apart from the major, minor, or other principle thrust area. All graduate students are also expected to have some teaching/extension experience.

The department also participates in the interdepartmental majors in water resources, sustainable agriculture, and toxicology (see Index).

Courses open for nonmajor graduate credit: 342, 363, 405, 409, 413, 422, 445, 446, 447, 478.

Courses Primarily for Undergraduate Students

A E 110. Experiencing Agricultural and Biosystems Engineering. (0-3) Cr. 1. S. Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.

A E 215. Fundamentals of Agricultural and Biosystems Engineering I. (2-2) Cr. 3. F. Prereq: A E 110, Engr 100 or enrollment in Math 166. Application of mathematics and engineering sciences to energy and mass balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of hydrologic systems; precision farming; and machine systems.

A E 216. Fundamentals of Agricultural and Biosystems Engineering II. (2-2) Cr. 3. S. Prereq: A E 110, Engr 160 or 161, credit or enrollment in Math 166. Application of mathematics and engineering sciences to energy and mass balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of air and water vapor systems; electrical systems, grain systems; food systems and bio-processing.

A E 271. Engineering Applications of Parametric Solid Modeling. (1-2) Cr. 1. 8 weeks. F.S. Prereq: Engr 170 or AST 215 or equivalent. Creation, editing, organizing, and documenting two-dimensional and three-dimensional geometric entities.

A E 272. Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER. (1-2) Cr. 1. 8 weeks. F.S. Prereq: Engr 170 or AST 215 or equivalent. Application of the Pro/ENGINEER software to create 3D solid models of parts and assemblies. Utilizing the solid models to create design documentation: standard drawing views, dimensions, and notes.

A E 298. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

A E 396. Summer Internship. Cr. R. S.S. Prereq: Permission of department internship coordinator. Summer professional work period.

A E 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: 298, permission of department. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

A E 404. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with 504) (2-2) Cr. 3. F. Prereq: 363 or Cpr E 210 or E 441. Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems.

A E 405. GIS and Natural Resources Management. (Same as EnSci 405) (3-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. Nonmajor graduate credit.

A E 409. Engineering Quantification of Biological Processes. (2-2) Cr. 3. S. Prereq: 216, Math 266; Biol 109 or 201 or 202; M E 330. Development of models to quantify response of biological systems to environmental conditions. Bioenergetics, thermodynamics, enzymes, kinetics, metabolism, bioregulation, mechanical processes applied to plant, animal, and microbial systems. Nonmajor graduate credit.

A E 413. Practical Fluid Power Circuits. (Same as Ch E 357) (3-0) Cr. 3. F. Prereq: CSE 101 and CSE 447 or E 447 or M E 441. Properties of fluids. Pump and motor efficiencies. Analysis and assembly of fluid power systems and experimental investigation of appropriate control systems. Application to hydrostatic transmissions. Nonmajor graduate credit.

A E 422. Natural Resource Conservation Engineering. (2-3) Cr. 3. F. Prereq: 215, E M 378 or Ch E 356. Planning and design of systems to conserve and utilize natural resources in the agricultural environment. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices for control of erosion, and agricultural water management graduate credit.

A E 437. Crop Harvesting Dynamics. (Dual-listed with 537) (3-2) Cr. 3. F. Prereq: 215, 303, Math 266, or equivalent. Physical principles behind the harvesting and handling of all types of crops: grains and foods, fuels, biomass and fibers, fragrances and fertilizers. Technological principles, performance measures and design of agri-cultural systems for harvesting crops, with principal emphasis on grain harvesting. Physical properties of grain, forage, fibers and other harvested biological materials. Environmental factors that affect crop quality and influence machine operation and design. Harvesting equipments design, test, operating and manufacturing criteria.

A E 446. Agricultural Engineering Design II. (1-2) Cr. 2. F. Prereq. 445. Development of processing solutions to design problems identified in 445 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

Agricultural Systems Technology

(Administered by the Department of Agricultural and Biosystems Engineering)

Stewart Melvin, Head of Department

University Professors: Baker

Professors: Bern, Bundy, Hurburch, L. Johnson, Kanwar, Melvin, Misra

Professors (Adjunct): Quick

Professors (Collaborators): Colvin, Deboer, Lafien

Distinguished Professors (Emeritus): H. Johnson

Professors (Emeritus): Beer, Bekkum, Bockhop, Buehle, Hazen, Hoerner, Hull, Keeney, Lovely, Mangold, Marley, Meyer, Pedersen, Smith

Associate Professors: Anderson, Batchelor, Glanville, Greiner, Harmon, Hoff, Mickelson, Schwab, Tim, Xin

Assistant Professors: Birrell, Briggs, Brunn, Freeman, Lorimor, Powers-Schilling, Richard, Steward

Agricultural Systems Technology

Courses and Programs

B. Biosystems Engineering
C. Computer-aided Design
E. Environmental Systems
F. Food Engineering
H. Honors
P. Power and Machinery
Q. Structures
R. Process Engineering
S. Environmental and Natural Resources Systems
U. Waste Management Design

A E 498. Cooperative Education. Cr. R. F.S.S.
Prereq: 298, permission of department. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses Primarily for Graduate Students, open to qualified undergraduates

Prereq: Math 267, E E 441. Modeling dynamic systems with ordinary differential equations. Linear differential equations and solution by Laplace transforms. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. Analysis of selected systems from fluid power controls for agricultural equipment. Introduction to state variable methods of system analysis. State variable feedback using pole placement. MATLAB will be used throughout the course for modeling.

A E 504. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with 404.) (2-2) Cr. 3. F. Crop 363 or Opr E 210 or E E 441. Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A E 505I. Watershed Modeling and GIS. (Same as la LL 505I.) See Iowa Lakeside Laboratory.

A E 510. Applied Crop Growth Modeling. (3-0) Cr. 2. F. Crop 363 or Bot 320, Com S 205 or equivalent. Development of mathematical models and simulation techniques to describe physiological processes of crop growth including nutrient and water uptake, photosynthesis, accumulation (vegetative and reproductive), water and nutrient uptake, and effects of biotic and abiotic stress. Evaluation of existing models. Criteria for selecting models.

A E 515. Integrated Crop and Livestock Production Systems. (Same as Agrin 515, AgSci 515, SusAg 515.) (3-0) Cr. 3. Alt. F., offered 2001.
Prereq: SusAg 509. Managing productivity and minimizing ecological impacts of agricultural systems by understanding nutrient cycles, crop residue and manure management, grazing systems, and multispecies interactions. Consideration of crop and livestock production within landscapes and watersheds.

Prereq: Crop 163 or 167, Agron 154 or Geol 201, AST 324 or Agron 402 or CE 372. Physical and chemical properties and processes that affect the transport and fate of chemicals that occur in the vadose zone. Design of surface and subsurface drainage systems; design of sprinkler, trickle, and subsurface irrigation systems. Management of irrigation systems in developing countries.

Prereq: C R P 482. Introduction to geographic information science. Advanced topics in GIS, spatial and non-spatial data acquisition, spatial data structures and algorithms. GIS options and applications. Decision making in a GIS context. GIS planning and implementation. GIS standard. GIS applications. GIS policy, ethical, and legal issues. Multimedia, 3D, intelligent and virtual GIS. Emerging issues.

Prereq: 215, 230 and Math 266 or equivalent. Physical principles behind the harvesting and handling of all types of crops: grains and foods, fuels, biomass and fibers, fragrances and fertilizers. Technological principles, practice, performance analysis and design of engineered systems for harvesting crops, with principal emphasis on grain harvested biological materials. Environmental factors that affect crop quality and influence machine operation and design. Harvesting equipment design, test, operating and manufacturing criteria. Extra individual/team projects required.

Prereq: Ch E 357 or M E 436. Application of momentum, heat, and mass transfer in food processing. Analysis of selected unit operations used in food processing. Emphasis on design of food processing systems. Individual and/or group projects required for graduate credit.

Prereq: 216. Cereal grain and oilseed preservation, quality measurement, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems. Individual and group projects required for graduate credit.

Prereq: 216. Cereal grain and oilseed preservation, quality measurement, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems. Individual and group projects required for graduate credit.

A E 573. Manure Treatment and Bioconversion. (Dual-listed with 473.) (3-0) Cr. 3. Alt. S., offered 2003.
Undergraduate Study

The Department of Agricultural and Biosystems Engineering offers the bachelor of science degree with a major in agricultural systems technology (see College of Agriculture, Curricula).

The curriculum prepares men and women for careers requiring integration and application of agricultural and mechanical technology, physical and biological sciences, and business to manage human and natural resources, environmental systems, and systems for producing, processing, and marketing food and other biomaterials worldwide. Graduates have the ability to apply science and technology to problems related to agriculture and manage complex agricultural systems for sustainability. They are able to communicate effectively, have problem-solving skills and awareness of environmental issues. Graduates have developed team building skills and computer proficiency. Graduates find careers with agricultural machinery industries; environmental organizations; governmental agencies; farm builders; grain, feed, seed, fertilizer, and chemical companies; or in production agriculture.

The Department of Agricultural and Biosystems Engineering offers a minor in agricultural systems technology which may be earned by completing a minimum of 15 credits of agricultural systems technology courses, with a maximum of 6 credits of 100- and 200-level courses and at least two credits in 400-level courses. Students may select courses to provide emphasis in areas such as:

1. Machine and energy management,
2. Livestock production systems,
3. Soil and water resource management,
4. Electrical systems,
5. Grain operations,
6. Environmental systems technology.

For undergraduate curriculum in agricultural systems technology leading to the degree of bachelor of science, see College of Agriculture, Curricula.

Visit our departmental website at www.ae.iastate.edu

Graduate Study

The Department of Agricultural and Biosystems Engineering offers courses for nonmajor graduate credit in agricultural systems technology for students taking major work in other departments, and cooperates in the interdepartmental program in professional agriculture. A minor in agricultural systems technology is offered.

Courses open for nonmajor graduate credit:

Courses Primarily for Undergraduate Students

AST 110. Experiencing Agricultural Systems Technology. (0-2) Cr. 1. F. Prereq: AST majors only.

Laboratory-based, team oriented experiences in a spectrum of topics common to the practice of agricultural systems technology. Report writing, internships, careers, industry visits.

AST 120. Introduction to Renewable Resources. (Same as Agron 120, A Ecl 120, Env S 120, For 120.) (3-0) Cr. 4. F. Study of soil, water, plants, and animals as renewable natural resources in an ecosystems context. History and organization of resource management. Concepts of integrated resource management.

AST 210. Fundamentals of Agricultural Systems Technology. (3-0) Cr. 2. F. Prereq: 115, Math 140. 142. Introduction to problem solving related to systems in agricultural power and machinery, environmental and natural resources, structures and animal environments and electrical circuits. Basic energy and force laws, definitions, and units.

AST 297. Work Experience in Agricultural Systems Technology. Cr. 1 to 2. F.S.SS. Prereq: AST major and approval of advisor required prior to commencing work experience. Work experience must be related to career objectives. Written report and oral presentation required on the work experience. A maximum of 4 credits of 297 may be used toward the total of 128 credits required for graduation.

AST 298. Cooperative Education in Agricultural Systems Technology. Cr. R. F.S.SS. Prereq: Sophomore classification in AST and approval of cooperative coordinator. All cooperative education students must register for this course prior to commencing each work period.

AST 324. Soil and Water Conservation Management. (2-0) Cr. 2. F. Prereq: Math 140. Introduction to engineering principles applied to the planning of erosion control systems, water control structures, water quality management, drainage and irrigation systems, and farm water resource development.

AST 326. Conservation Surveying and Design. (0-3) Cr. 1. F. Prereq: Credit or enrollment in 324. Agricultural surveys for field area measurement and mapping. Handbook design of drainage systems and farm water control structures. Layout of conservation structures.

AST 358. Small Power Equipment. (1-2) Cr. 2. F.S. Principles of operation, adjustment, maintenance and repair of small internal-combustion engines and associated equipment.

AST 398. Cooperative Education in Agricultural Systems Technology. Cr. R. F.S.SS. Prereq: Junior classification in AST and approval of cooperative coordinator. All cooperative education students must register for this course prior to commencing each work period.

AST 425. Impacts of Agriculture on Water Quality. (2-0) Cr. 2. F. Prereq: One of the following: 324, Agron 154, Math 150. Relationship between agriculture and water quality; chemical use; erosion and conservation tillage; water quality monitoring techniques; animal waste and water quality; nonpoint source pollution; management systems to reduce chemical leaching to groundwater. Nonmajor graduate credit.

AST 425. Agricultural Safety. (1-3) Cr. 2. F. Prereq: One of the following: 324, Agron 154, Math 150. Relationship between agriculture and water quality; chemical use; erosion and conservation tillage; water quality monitoring techniques; animal waste and water quality; nonpoint source pollution; management systems to reduce chemical leaching to groundwater. Nonmajor graduate credit.

Agronomy

Steven L. Fales, Chair of Department

Distinguished Professors: Fehr, Hallauer

Professors (Collaborators): Hatfield, Jaynes, Karlen, Kaspar, Lantkey, Palmer, Shoemaker

Distinguished Professors (Emeritus): Black, Brenner, Frey, Pesek, Russell, Shaw

Professors (Emeritus): Anderson, Atkins, Benson, Burns, I. Carlson, R. Carlson, George, Green, Hodges, Imsande, Keeney, Larson, Pearce, Schafer, Schaller, A. Scott, Shibles, Shradar, Skrdla, Stritzel, H. Thompson, L. Thompson, Troeh, Voss, Wedin, Woolley

Associate Professors: Brummer, Dekker, Knapp, Liebman, Mallarino, Manu, Peterson, Salvador, Sawyer, M. Thompson, Westgate, Wiedenhoft

Associate Professors (Adjunct): Wang

Associate Professors (Collaborators): Cambardella, Grant, Kelling, Laird, Logsdon, Moorman, Olson, Pollak

Assistant Professors: Al-Kaisi, Becraft, Bhattacharyya, Burns, Delate, Farnham, Gibson, Goggi, Gu, Halverson, Henning, Jannink, Muenschlacht, Polito

Assistant Professors (Adjunct): Borges, Heuchelin, Today

Assistant Professors (Collaborators): Gardner, Guan, Prueger, Sauer, M. Scott, Widlechner

Instructors: Ziegler

Undergraduate Study

For undergraduate curriculum in agronomy, see College of Agriculture, Curricula.

The Department of Agronomy provides a curriculum for students interested in crop science, soil science, agricultural meteorology and environmental science.

Students selecting agronomy as a major will elect an option in general agronomy, environmental science, or science.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, and fiber. They have a broad understanding of the role and diversity of plants, soils, and climates of the world. Graduates are skilled in communication, critical thinking, problem solving, and working effectively with others. Students develop these skills in our required courses. They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

Courses and Programs Agronomy

An agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, farm management, and governmental agencies. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, and in regulatory agencies as plant, food, and grain inspectors. Additional areas of work open to agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers a minor in agronomy. Students are required to complete an approved minor program that includes Agron 114, 154, 212, 354, and 6 additional credits, of which a minimum of 3 credits must be at the 300+ level. A minimum of 15 credits in agronomy must be earned at Iowa State for both the minor and the major. Students work with an agronomy advisor to select courses in crops, soils, and meteorology that are appropriate to their career goals. A list of approved courses is available from an agronomy advisor.

Students can also design a strong basic science education in crop science, soil science, agricultural meteorology, or biotechnology to prepare themselves for science-based jobs, graduate study, or for research careers.

Graduate Study

The department offers the degrees master of science and doctor of philosophy, with majors in agricultural meteorology, crop production and physiology, and specializations in seed science and weed science; plant breeding; and soil science with specialization in soil chemistry, soil fertility, soil management, soil microbiology and biochemistry, soil morphology and genesis, or soil physics. Minor work is offered for students with majors in other departments. A M.S. nonthesis option is available for students desiring a general degree program with additional coursework and a written creative component substituting for thesis research. The nonthesis option is not intended to prepare students for entering a Ph.D. program.

Graduates have a broad knowledge base germane to their area of study. They are trained to integrate and apply knowledge to different situations. Students develop skills in scientific reasoning, organization, and logical presentation of ideas.

A master of science degree in agronomy designed for the continuing education of professional agronomists is offered by the department. The program is taught at a distance using computer-based instructional media. It is a nonthesis degree requiring completion of a written creative component.
Agron 105. Leadership Experience. Cr. R. F. S. SS.
Staff. A project in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See adviser for departmental requirements.

Orientation to college life, the profession of agronomy, and the agronomy curriculum.

Agron 114. Principles of Agronomy. (2.3 to 4 individualized study). Cr. 3. S. F. Mullen. A foundation course in crop production and soil management principles for the basic agronomic crops. Includes introductory concepts of plant, soil, tillage, pest, environmental, and sustainable aspects of crop production.

Agron 120. Introduction to Renewable Resources. (Same as A Ecol 120, AST 120, Env S 120, For 120.) (3-0) Cr. 3. S. F. Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

Agron 154. Fundamentals of Soil Science. (2-2 to 4 individualized study) Cr. 3. S. F. Preq. Chem 163. Manu. Introduction to physical, chemical, and biological properties of soils, their formation, classification, and distribution. Use of soil survey and computer database information in balancing agronomic, economic, and environmental concerns in soil management. Credit for only one of 154, 155, or 156 may be applied toward graduation, not both.

Agron 156. Soils for Urban Use. (2-2 to 4 individualized study) Cr. 3. S. F. Restricted to students outside the College of Agriculture. Manu. Fundamental properties of soils and their application to urban settings. Development of a site plan for area of land using data from soil survey and computerized data bank information. Field trip. Credit for only one of 154, 155, or 156 may be applied toward graduation, not both.

Agron 206. Introduction to Meteorology. (Same as Mteor 206.) (3-0) Cr. 3. S. F. R. Taylor or Yarger. Basic concepts in meteorology, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, El Nino, world climates, weather safety, and atmospheric optics. Self-study section available to resident and distant education students all semesters.

Agron 283. Pesticide Application Certification. (Same as Ent 283.) Cr. 2. S. F. Preq. An examination for state certification as a pesticide applicator.

Agron 298. Cooperative Education. Cr. R each time taken. F. S. S. Preq. Permission of department coordinator, sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Agron 306. Use of Weather Data in Agriculture. (Same as Mteor 306.) (1-1) Cr. 1. S. F. Preq. 206. R. Carlson. Instrumentation, collection, and analyses of weather data relative to crop production in the Midwest. Weather parameters are described by using computer application examples and laboratory exercises. Nonmajor graduate credit.

Agron 320. Genetics, Agriculture and Biotechnology. (3-0) Cr. 3. S. F. Preq. Biol 201 and 202. Transmission genetics with emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations, principles of recombinant DNA technology, and use of genetic engineering. Credit for graduation will not be allowed for more than one of the following: Gen 260, 301, 320 and Biol 301 and 301L.

Agron 330. Crop and Seed Identification Laboratory. (2-4) Cr. 2. S. F. Staff. Identification, agronomic and binomial classification of crops, weeds, and diseases. Analysis of crop seed samples for characteristics of weed and other crop seeds.

Agron 331. Intercollegiate Crop Identification, Agronomic and Binomial Classification. (4-0) Cr. 2. F. S. Preq. 154, 202, 330, permission of instructor. Staff. Intensive training in crop, weed, and disease identification, seed analysis, and grain grading for intercollegiate competition in remote from crop and seed contests.

Agron 338. Seed Science and Technology. (Same as Hort 338.) (2-2) Cr. 3. S. F. Preq. 114 or Hort 221, Biol 201. Knapp. Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

Agron 342. World Food Issues: Past and Present. (Same as FS HN 342, T SC 342, U St 342.) (3-0) Cr. 3. S. Salvador. World food problems in context of historical development of agriculture in major cradles of civilization. Emphasis on population trends and socioeconomic policies and disparities between potential agricultural production and present energy and nutritional deficiencies in key areas of the developing world. Team projects. Nonmajor graduate credit.

Agron 351. Turfgrass Establishment and Management. (Same as Hort 351.) See Horticulture. Nonmajor graduate credit.

Agron 351L. Turfgrass Establishment and Management Laboratory. (Same as Hort 351L.) See Horticulture. Nonmajor graduate credit.

Agron 356. Soil, Fertilizer, and Water Management. (3-0) Cr. 4. F. Preq. 354; 114 recommended. Polito, Staff. Integration of crop, tillage, drainage, irrigation, erosion, fertility, and fertilizer information for decision-making. Ecological and environmental implications of these decisions on long-term sustainability. Suitability and accuracy of soil evaluation methods. Handling characteristics and soil reactions of organic and mineral fertilizers. An in-depth farm plan will be developed for a client. Nonmajor graduate credit.

Agron 360. Environmental Soil Science. (Same as EnSci 360) (2-3) Cr. 3. S. S. Preq. Agron 280 or Geol 100 or 201. Burtras and Killorn. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

Agron 370. Field Experience in Soil Description and Interpretation. (0-3) Cr. 1. Can be taken four times. F. S. Preq. 154 and permission of instructor. Sandor. Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests.

Agron 398. Cooperative Education. Cr. R each time taken. F. S. S. Preq. Permission of department cooperative education coordinator, junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Agron 402. Watershed Hydrology and Surficial Processes. Cr. 2. S. Preq. Geol 402. (3-0) Cr. 4. F. Preq. Credit or enrollment in EnSci 330 or Geol 100 or 201, Phys 111, 3 credits in biology and 6 credits in chemistry. Burtras, Simpkins. Examination of watershed wherein biologic and physical factors control hydrology, soil formation, and nutrient transport. Laboratory empha-
sizes field investigation of watershed-scale processes. Nonmajor graduate credit.

Agron 402. Watershed Hydrology and Surficial Processes. (Same as la LL 402.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Agron 404. Global Change. (Same as EnSci 404, Emn S 404.) Prereq: Mte 114. 3 Cr. Sr. S. Prereq: Four courses in physical or biological sciences or engineer ing. Takle. Biogeochemical cycles, ozone chemistry, global energy balance, structure and circulation of the atmosphere and ocean. Climate, modeling climate variability, implications for agriculture, water resources, energy use, sustainable development and public policy. Human dimensions and ethical aspects of global environmental change. Nonmajor graduate credit.

Agron 406. Climate of the Continents. (Same as Mteor 406.) (2-0) Cr. 2. F. Prereq: Agron/Mteor 206. Arritt. The major climate controls and how they affect the world climate. Climate classification. Combining controls and classification to explain the pattern of climates of the different continents and the world. Nonmajor graduate credit.

Agron 410. Professional Development in Agronomy: Senior Forum. (1-0) Cr. 1. F. Prereq: Senior classification. Staff. Development of an appropriate context for career, personal, and social skills. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions.

Agron 421. Introduction to Plant Breeding. (3-0) Cr. 3. F. Prereq: 320 or Biol 301. Campbell. Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing agronomic crops. Applications of molecular techniques and biotechnological advancements as breeding tools in the development of improved cultivars and transgenic plants. Nonmajor graduate credit.

Agron 434. Forage Utilization. (2-0) Cr. 2. Alt. F. Prereq: 334. Barnhart. Systems of forage utilization including grazing, hay, and silage. Nutritional chemistry of forage plants and the genetic, environmental, and post-harvest factors that influence their use. Students enrolling for graduate credit will be expected to complete an additional class project. Nonmajor graduate credit.

Agron 446. World Agronomic Systems. (3-0) Cr. 3. S. Prereq: 114, 154, 206. Muenchra. Interdisciplinary study and comparison of agricultural systems around the world, including analysis of bio-physical, social, economic, and political determinants of the system. Emphasis on the interrelationships among system determinants. Analysis of system constraints and solution strategies. Evaluation of the productivity and sustainability of the systems. Team project and report.

Agron 450. Issues in Sustainable Agriculture. (Same as EnSci 450.) (2-0) Cr. 2. F. Salvador. Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of development of industrial agricultural practices.

Agron 457. Agronomic Applications of Site-Specific Management. (2-2) Cr. 3. F. Prereq: 212, 384; Stat 101 or 104 or 105. Staff. Introduction and exploration of agronomic applications of site-specific management for improved resource management and environmental quality. Emphasis on developing a better understanding of the evolving technologies that are applicable to production agriculture and how these technologies can contribute to an improved environment.

Agron 459. Environmental Soil and Water Chemistry. (Dual-listed with 559, same as EnSci 459.) (3-0) Cr. 3. Alt. F. Prereq: Agron/Mteor 496. Evangelou. An introduction to the chemical properties of soils, chemical reactions and transformations occurring in the soils and their impact on the environment. Topics include cation exchange, soil aggregation, soil mineral dissolution and precipitation, speciation, ion exchange, redox reactions, adsorption phenomena, soil pollution and chemical-equilibria computer programs. Nonmajor graduate credit.

Agron 466. Agronomy Systems. (Dual-listed with 461; same as For 460.) See Forestry.

Agron 473. Soil Genesis and Landscape Relationships. (Same as EnSci 473.) (2-3) Cr. 4. S. Prereq: 154 or 402 or EnSci 402. Sandor. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Nonmajor graduate credit. Credit for only 473 or 473I may be applied for graduation, not both. Nonmajor graduate credit.

Agron 473I. Soil Genesis and Landscape Relationships. (Same as la LL 473.) Cr. 4. Alt. S. offered 2002 at Lakeside Laboratory. Prereq: Agron 154 or 402. Burras. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only 473 or 473I may be applied for graduation, not both. Nonmajor graduate credit.

Agron 490. Independent Study. Cr. 1 to 3 each time taken; 4 cr. maximum allowed toward the total of 128 credits required for graduation. F.S.S.S. Prereq: Junior or senior classification with at least 8 credits in agronomy, or instructor in specialty area consultation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student. H. Honors.

Agron 491. Seed Science Experience. Cr. 2 to 4. F.S.S.S. Prereq: 338, advance approval and participation of employer and instructor. Staff. A professional work experience and creative project for seed science majors. The project requires the prior approval and participation of the employer and instructor and a written report.

Agron 492. Agronomic Issues: Science, Policy, and Resource Management. (2-2) Cr. 2. F. Prereq: Senior classification. Knapp. Objective investigation of current agronomic issues in climate and agricultural resource manage ment. Students will develop positions on or solutions to current agricultural issues by investigating the scientific, technical, economic, environmental, and social ramifications of agriculture and agricultural policy.

Agron 493. Workshop in Agronomy. Cr. arr each time taken, maximum of 4. Prereq: Permission of instructor. Staff. Workshop experience in crops, soils, or agricultural meteorology. Nonmajor graduate credit.

Agron 495. Agricultural Travel Course Preparation. (0-1) Cr. May be repeated. F.S. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course also register for Agron 496. Students enrolled in this course also register for Agron 496 and Agron 496 the following term. Topics will include the agricultural industries, climate, crops, culture, economics, geography, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

Agron 496. Agricultural Travel Course. Cr. arr. (Approximate half-credit per week traveled each An S 496 and Agron 496). May be repeated. Prereq: Permission of instructor. Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, history, livestock, marketing, and other factors on crop and livestock production. Location and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

A. International Tour
B. Domestic Tour

Agron 495. Cooperative Education. Cr. 1 each time taken. F.S.S.S. Prereq: Permission of department; cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses Primarily for Graduate Students, open to qualified undergraduates

Agron 500. Orientation Seminar. (2-0). Cr. 1. F. Prereq: International agronomy graduate students only. Pesek and staff. An introduction to Iowa and U.S. agriculture for international scholars in agronomic majors. Field trips where possible, landscape tours, and the role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university. Offered on a satisfactorily-fail grading basis only.

Agron 502. Chemistry, Physics, and Biology of Soils. (2-0) Cr. 2. F. Prereq: Agron 114, 154, Biol 109, Chem 163, and Math 140. Borges. Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant/soil interactions, and soil classification. Basic concepts in soil science and their applications. Required course for the Master of Science in Agronomy degree program. Restricted to graduate students enrolled in degree programs at Iowa State University.

Agron 503. Climate and Crop Growth. (2-0) Cr. 2. F. Prereq: Agron 114 and Math 140. Today, Taylor. Applied concepts in climate and agricultural meteorology, with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction. Required course for the Master of Science in Agronomy degree program. Restricted to graduate students enrolled in degree programs at Iowa State University.

Agron 504. Global Change. (Dual-listed with 404; same as Mteor 504.) See Geology and Atmospheric Sciences, Meteorology.

Agron 561. Population and Quantitative Genetics for Breeding. (Same as An S 561.) (3-0) Cr. 4. F. Prereq: Stat 401. Population and quantitative genetics for plant and animal breeding. Topics include: forces that change gene frequency, covariance between relatives, response to artificial selection, inbreeding depression, heterosis, cross-breeding, genotype-by-environment interaction, linkage analysis, mapping of quantitative trait loci, and marker assisted selection.

Agron 577. Soil Physics. (3-0) Cr. 3. S. Prereq: 354; Math 186 recommended. Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

Agron 578. Laboratory Methods in Soil Physics. (0-3) Cr. 1. S. Prereq: 577 concurrent. Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

Agron 585. Soil Microbiology and Biochemistry. (Same as Micro 585.) (2-0 or 2-3) Cr. 2 or 3. S. Prereq: 485, one course in biochemistry. Lownachan. Ecological and environmental considerations of soil microorganisms, organic matter, enzymes, carbon, and other nutrient cycles. Laboratory emphasizes creative component.

Agron 590. Special Topics. Cr. arr. Prereq: 15 credits in agronomy. Literature reviews and conferences on selected topics in crops, soils, or agricultural meteorology according to needs and interest of student.

Agron 591. Agronomic Systems Analysis. (3-0) Cr. 3. S. Prereq: 517, 513, 531, 532, 533. Wiedenhoeft. Analysis of cropping systems from a problem-solving perspective. Case studies will be used to develop the students’ ability to solve agronomic problems. Required course for the Master of Science in Agronomy degree program. Restricted to graduate students enrolled in degree programs at Iowa State University.

Agron 592. Current Issues in Agronomy. (3-0) Cr. 3. S. Prereq: 501, 503, 511, 512, 514. Knapp. Study and discussion of topics of current interest to the field of agronomy. While Agron 591 deals with agronomics at the farm and landscape level, Agron 592 seeks to address issues on a broader scale in the field of agronomy. While Agron 591 deals with agronomics at the farm and landscape level, Agron 592 seeks to address issues on a broader scale in the field of agronomy. The general military course (GMC) and the professional officer course (POC), although it is recommended by the student’s advisory committee.

Agron 594. Workshop in Agronomy. (0-1) Cr. 1. SS. Prereq: 4 credits completed in the M.S. in Agronomy Distance Education Program. Today. Hands-on field and laboratory experience including integrated pest management, climatology, soils, crops, and statistics. Required course for the Master of Science in Agronomy degree program. Restricted to graduate students enrolled in degree programs at Iowa State University.

Agron 599. Creative Component. Cr. arr. Prereq: Nonthesis M.S. option only. A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Courses for Graduate Students

Agron 600. Seminar. (1-0) Cr. 1 each time taken. Reports and discussion of recent literature and research. A. Plant Breeding, M. Lee (F); K. Lamkey (S). B. Soils, F. S. Staff. C. Crop Production and Physiology, F. S. Staff. 600Cr offered on a satisfactory-fail grading basis only.

Agron 609. Agricultural Meteorology Conference. (1-0) Cr. 1 each time taken. F.S.S. Prereq: Permission of instructor. Staff. Literature reviews and equivalent. Staff. Research methodology used to evaluate forage production and quality. Advanced concepts in the design and analysis of forage experiments.

Air Force Aerospace Studies

www.iastate.edu/~airforce/

Kenneth H. Schindele, Chair of Department Professors: Schindele

Assistant Professors (Adjunct): Bergman, Brandau, Pierce

Undergraduate Study

The objectives of the Department of Air Force Aerospace Studies are to provide qualified students the opportunity to earn a commission as an officer in the active duty Air Force, and to build better citizens for those not interested in joining the Air Force. The curriculum is divided into two basic phases, the general military course (GMC) and the professional officer course (POC). The GMC is introductory and consists of four consecutive 1-hour courses normally taken during the freshman and sophomore years. GMC completion is not a prerequisite for entry into the POC, although it is recommended by the department.
Prior to entry into the POC, most students complete field training at an Air Force base. Students who have completed the GMC participate in a 4-week program, which provides a concentrated experience in the Air Force environment. The training program includes junior officer training, aircraft and aircrew orientation, career orientation, survival training, an introduction to typical base functions, and physical training. A 5-week training program is provided for those students entering the POC who did not complete the GMC. This program includes all that is offered in the 4-week program, plus academic and leadership laboratory experiences included in the on-campus GMC courses.

Selection for the professional officer course is on a competitive basis, and cadets enrolling in this course must meet certain academic, mental, physical, and moral standards. Qualified cadets may be selected as flight candidates and receive flight instruction prior to attending Undergraduate Pilot Training (UPT). Upon enrollment in the POC, all cadets are required to complete a contractual agreement with the Air Force, which obligates them to 4 years of active duty as an officer in the United States Air Force. Air Force active duty commitment is 10 years for pilots and 6 years for navigators. Uniforms and AFROTC texts are supplied to the cadets, and those in the POC receive a subsistence allowance of $200 per month.

Students who fail to observe the contract terms may be called to active duty in an enlistment grade or be required to repay monies received from the Air Force.

Air Force ROTC scholarships are available and provide payment of full tuition, fees, and textbooks. In addition, Scholarship cadets receive a $200 monthly subsistence allowance. Upon acceptance of a scholarship, the student executes a contract with the Air Force. Scholarships may be awarded for periods of 2, 3, or 4 years, with up to 1 additional year for qualified applicants in selected majors. To determine eligibility and initiate application procedures for the scholarship program, interested students should contact the department.

Entry into the program is not dependent on departmental major or year in the university. The AFROTC program is open to both male and female students. The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credit hours of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credit hours must be in courses numbered 300 or above.

Courses Primarily for Undergraduate Students

AFAS 101. Leadership Laboratory I. (0-2) Cr. 1. Air Force customs and courtesies; drill and ceremonies, issuing military commands, instructing, directing and evaluating the preceding skills, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. This laboratory is required if taking AFAS 142 and considering application in the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Offered on a satisfactory-fail grading basis only.

AFAS 102. Leadership Laboratory I. (0-2) Cr. 1. Air Force customs and courtesies; drill and ceremonies, issuing military commands, instructing, directing and evaluating the preceding skills, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. This laboratory is required if taking AFAS 142 and considering application in the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Offered on a satisfactory-fail grading basis only.

AFAS 141. The United States Air Force Today. (1-0) Cr. 1. T. F. Development of the Air Force, its mission and organization, emphasis on functions of U.S. strategic offensive, defensive, and special purpose forces; relationships and interaction with Army and Navy forces. Introduction of oral, written, and interpersonal communication skills. Initial military training related to officerhood and professionalism, engaging in military customs and courtesies, and participating in military ceremonies.

AFAS 142. The United States Air Force Today. (1-0) Cr. 1. T. Development of the Air Force, its mission and organization, emphasis on functions of U.S. strategic offensive, defensive, and special purpose forces; relationships and interaction with Army and Navy forces. Introduction of oral, written, and interpersonal communication skills. Initial military training related to officerhood and professionalism, engaging in military customs and courtesies, and participating in military ceremonies.

AFAS 201. Leadership Laboratory II. (0-2) Cr. 1. Air Force customs and courtesies, drill and ceremonies, issuing military commands, instructing, directing, and evaluating the preceding skills, the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Continued military training related to wearing the uniform, engaging in military customs and courtesies, and participating in military ceremonies. This laboratory is required if taking AFAS 241 and applying for the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Offered on a satisfactory-fail grading basis only.

AFAS 202. Leadership Laboratory II. (0-2) Cr. 1. Air Force customs and courtesies, drill and ceremonies, issuing military commands, instructing, directing, and evaluating the preceding skills, the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Continued military training related to wearing the uniform, engaging in military customs and courtesies, and participating in military ceremonies. This laboratory is required if taking AFAS 241 and applying for the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Offered on a satisfactory-fail grading basis only.

AFAS 241. The Development of Air Power. (1-3) Cr. 1. F. Study of military air power through historical events, leaders, technology and politics. Introduction into the basics of military interaction and organization. Analysis of civil-military interactions. Demonstration of oral, written and interpersonal communication skills.

AFAS 242. The Development of Air Power. (1-3) Cr. 1. S. Study of military air power through historical events, leaders, technology and politics. Introduction into the basics of military interaction and organization. Analysis of civil-military interactions. Demonstration of oral, written and interpersonal communication skills.

AFAS 301. Leadership Laboratory III. (0-3) Cr. 1. Developing an understanding, motivation, and performance of other cadets. This laboratory is required if taking AFAS 341 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Offered on a satisfactory-fail grading basis only.

AFAS 341. Air Force Management and Leadership. (0-3) Cr. 3. Study of military air power through historical events, leaders, technology and politics. Introduction into the basics of military interaction and organization. Analysis of civil-military interactions. Demonstration of oral, written and interpersonal communication skills.

AFAS 342. Air Force Management and Leadership. (0-3) Cr. 3. Communication skills, management, and leadership: listening, speaking, and writing skills required by an Air Force officer; management tools, practices, and controls; management principles and functions; leadership theory and practices. Introduction to Quality Air Force. Advanced leadership training pertaining to planning, organizing, supervising, and conducting military activities through experiential exercises.

AFAS 401. Leadership Laboratory IV. (0-3) Cr. 1. Advanced leadership experiences involving the planning and controlling of the military activities of the AFROTC cadre corps, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This laboratory is required if taking AFAS 442 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Offered on a satisfactory-fail grading basis only.

AFAS 402. Leadership Laboratory IV. (0-3) Cr. 1. Advanced leadership experiences involving the planning and controlling of the military activities of the AFROTC cadre corps, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This laboratory is required if taking AFAS 442 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Offered on a satisfactory-fail grading basis only.

American Indian Studies

(Interdepartmental Undergraduate Minor)

Program Director: Sidner Larson

The American Indian Studies Program is a cross-disciplinary program in the College of Liberal Arts and Sciences which offers an opportunity to learn more about the cultural heritage of American Indians, their historical relationship with non-Indians, and their participation in contemporary American society. This program emphasizes perspectives from American Indian Studies, anthropology, art, history, literature, political science, and sociology.

The courses in the American Indian Studies Program provide added background for students whose career interests may include multicultural services, legal services, or public administration.

Within the College of Liberal Arts and Sciences, courses in American Indian studies can be used as electives, in a minor, or in an interdisciplinary studies major (for details, see Index, Interdisciplinary Studies). Students majoring in another college who wish to use these courses should consult with their advisors.

A minor in the College of Liberal Arts and Sciences must include at least 15 credits of courses in the field. A minor in American Indian studies must include 210, two courses chosen from among the following: 310, 322, 332 and 346, and two additional courses chosen from the program courses listed below. The American Indian Studies Program Committee will, upon application by the student and review of the program, certify that the student has completed a minor in American Indian Studies.

Because course offerings vary from year to year, any student interested in a minor in American Indian Studies should contact the American Indian Studies office for advising. (See Index, LAS Cross-Disciplinary Programs.)

Courses open for nonmajor graduate credit: 346.

Courses Primarily for Undergraduate Students

Am In 210. Introduction to American Indian Studies. (3-0) Cr. 3. Each course taken, maximum of 6. F. S. Issues within specific topical areas of American Indian society and culture, such as social work with Indian families, tribal government, and environmental policy.

Am In 310. Topics in American Indian Studies. (3-0) Cr. 3. Each time taken, maximum of 6. F. S. Issues within specific topical areas of American Indian society and culture, such as social work with Indian families, tribal government, and environmental policy.

Am In 315. Archaeology of North America. (Same as Anthr 315.) See Anthropology.

Am In 322. The American Indian. (Same as Anthr 322.) See Anthropology.

Am In 323. Peoples and Cultures of Latin America. (Same as Anthr 323.) See Anthropology.

Am In 328. American Indian Religions. (Same as Relig 328.) See Religious Studies.

Am In 346. American Indian Literature. (Same as Engl 346.) See English. Nonmajor graduate credit.

Am In 420. Cultural Continuity and Change on the Prairie-Plains. (Same as Anthr 420.) See Anthropology.

Am In 432. American Indians Today. (Same as Anthr 432.) See Anthropology.

Am In 490. Independent Study. Cr. var. Prereq: 6 credits in American Indian studies; permission of instructor. Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits in Am In 490 may be counted toward graduation.

Courses Offered by Other Departments

Anthr 428. Archaeological Laboratory Methods and Techniques. See Anthropology.

Anthr 429. Archaeological Field School. See Anthropology.

C 180C. Native American Tutoring. See Curriculum Instruction.

Hist 370. History of Iowa. See History.

Pol S 312. Minicourse in American Government and Politics. See Political Science. Acceptable only when offered as a course in American Indian tribal government and political theory.

Animal Ecology

Bruce W. Menzel, Chair of Department

University Professors: Atchison

Professors: Best, Clark, Dinsmore, Downing, Menzel, Summerfelt

Professors (Collaborator, Emeritus): Kaas

Distinguished Professors (Emeritus): Carlander

Professors (Emeritus): M. Bachmann, R. Bachmann, Franklin, Mooman

Associate Professors: Danielson, Debinski, Morris

Assistant Professors: Pease

Assistant Professors (Collaborators): Hohman, Koford, Pierce

Undergraduate Study

The department offers work for the bachelor of science degree with a major in animal ecology (see College of Agriculture, Curriculum). For further information visit our departmental home page at: www.aeci.iastate.edu

The animal ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. It is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Students may select from six options: Aquaculture, Ecology, Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife. Graduates find employment as aquaculturists, wildlife biologists, fisheries biologists, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators.

Graduates of the Animal Ecology program understand the basic principles of animal biology, ecology and management, and relevant aspects of scientific communication, basic mathematics and sciences, computing applications, and personal and professional development. Six specific options prepare students for careers in aquaculture, fisheries and aquatic sciences, ecology, wildlife, interpretation of natural resources, wildlife care and veterinary sciences. Each option has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management.

This curriculum requires three months of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university’s affiliate field stations: Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the department’s Student Services Center.

The department participates in interdisciplinary programs in biology, environmental studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a secondary major in environmental studies or pest management. Preveterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.

Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Majors preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Education as well as those of the Department of Animal Ecology. In addition, they must apply formally for admission to the teacher education program (see Index, Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Index, Journalism and Mass Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Index, Criminal Justice Studies).
The Department of Animal Ecology provides several scholarships; application information is available in the departmental Student Services Center. The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including 120, 310, 312 plus five additional credits of Animal Ecology courses at the 300 level or above.

Graduate Study

The department offers work for the degrees of master of science and doctor of philosophy with majors in animal ecology, fisheries biology, and wildlife biology. Students may also major in interdepartmental graduate majors in ecology and evolutionary biology, toxicology, or water resources (see Index).

An M.S. in Animal Ecology nontechnical option is available for students desiring a general degree program with additional coursework and a creative component substituting for thesis research. Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the Biological Resources Division of the U.S. Geological Survey, through the Iowa Cooperative Fish and Wildlife Research Unit, and the Iowa Department of Natural Resources contribute to the graduate programs of the department.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Courses open for nonmajor graduate credit: 350, 410L, 410L, 413, 419I, 430, 451, 455, 460.

Courses Primarily for Undergraduate Students

A Ecl 104. Practical Work Experience. Cr. R. Three months of relevant work experience or study at a summer biological station. See adviser for specific requirements.

A Ecl 120. Introduction to Renewable Resources. (Same as Agron 120, AST 120, Env S 120, For 120.) (3-0) Cr. 3. F.S. Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

A Ecl 130. Wildlife and Agriculture. (2-0) Cr. 2. S. Survey of the ecology and management of fish and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Wildlife conservation and management principles for private agricultural lands. Designed for nonmajors.

A Ecl 301L. Iowa Natural History. (Same as la LL 301L) See Iowa Lakeside Laboratory.

A Ecl 303. Internship. Cr. 1 to 3. F.S.S. Prereq: Permission of instructor and sophomore standing. Placement with county conservation boards, camps, zoos, parks, etc., for experience as interpreters, rangers, and technicians. A total of 6 credits may be used toward degree requirements.

A Ecl 303L. Undergraduate Internship. (Same as la LL 303L) See Iowa Lakeside Laboratory.

A Ecl 305. Seminar. (2-0) Cr. 1 each time taken; may be taken more than once for graduation credit. F.S. Prereq: Permission of instructor. Current topics in animal ecology, fisheries and wildlife biology, and environmental issues.

A Ecl 312. Ecology. (Same as Biol 312.) See Biology.

A Ecl 312L. Ecology. (Same as la LL 312L.) See Iowa Lakeside Laboratory.

A Ecl 321. Fish Biology. (Dual-listed with 521.) (2-3) Cr. 3. F.S. Anatomy, physiology, behavior, and ecology of fishes.

A Ecl 326L. Ornithology. (Same as la LL 326L.) See Iowa Lakeside Laboratory.

A Ecl 330. Interpretation of Natural Resources. (2-3) Cr. 3. S. Prereq: 6 credits in biological sciences. History, objectives, forms, and techniques of natural resources interpretation in the settings of county, state, and national parks.

A Ecl 350. Ecological Methods and Analyses. (2-2) Cr. 3. S. Prereq: 120, 312, Stat 101 or 104. Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor graduate credit.

A Ecl 361. Natural History of Fishes. (0-3) Cr. 1. F. Prereq: 310, 312. Natural history and ecology of Midwest fishes, including identification, survey methods, habitat requirements, foods and feeding, reproduction, communities and other ecological factors which affect species well-being.

A Ecl 362. Natural History of Reptiles and Amphibians. (0-3) Cr. 1. S. Prereq: 310, 312. Natural history and ecology of Midwest reptiles and amphibians, including identification, survey methods, habitat requirements, foods and feeding, reproduction, communities and other ecological factors which affect species well-being.

A Ecl 363. Natural History of Birds. (0-3) Cr. 1. S. Prereq: 310, 312. Natural history and ecology of Midwest birds, including identification, habitat requirements, distribution, foods and foraging, and reproduction.

A Ecl 364. Natural History of Mammals. (3-0) Cr. 1. F.S. Prereq: 310, 312. Natural history and ecology of Midwest mammals, including identification, survey methods, habitat requirements, foods and feeding, reproduction, communities and other ecological factors which affect species well-being.

A Ecl 404L. Behavioral Ecology. (Same as la LL 404L.) See Iowa Lakeside Laboratory.

A Ecl 410. Aquatic Ecology. (Same as EnSci 410.) (2-0) Cr. 2. F. Prereq: Biol 202, 202L. Recommended. Structure and function of aquatic ecosystems with application to management, fisheries, and pollution problems. Nonmajor graduate credit.

A Ecl 410L. Aquatic Ecology Laboratory. (Same as EnSci 410L.) (0-3) Cr. 1. F. Prereq: Concurrent enrollment in 410. Field trips and laboratory exercises to accompany 410. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

A Ecl 413. Community Ecology and Management. (2-2) Cr. 3. S. Prereq: Biol 312. The effect of interspecific interactions on the structure and dynamics of natural and managed communities, including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates. Nonmajor graduate credit.

A Ecl 419L. Vertebrate Ecology and Evolution. (Same as la LL 419L.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

A Ecl 420L. Amphibians and Reptiles. (Same as la LL 420L.) See Iowa Lakeside Laboratory.

A Ecl 425. Aquatic Insects. (Dual-listed with 525; same as Ent 425.) See Entomology.

A Ecl 430. Media Techniques in Natural Resources Interpretation. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 330. Media techniques used by interpreters for teaching the public about natural resources. Nonmajor graduate credit.

A Ecl 440. Fishery Management. (Dual-listed with 540.) (2-3) Cr. 3. F. Prereq: 120, 312, credit or enrollment in 410. Star 101 or 104. Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A Ecl 442. Aquaculture. (Dual-listed with 542.) (2-3) Cr. 3. S. Prereq: 410, 410L, credit or enrollment in 321. Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, and diseases.

A Ecl 455. International Wildlife Issues. (3-0) Cr. 3. S. Prereq: 120, 310, 312 or graduate standing. Biological, political, social, and economic factors affecting the management of international wildlife resources. Nonmajor graduate credit.

A Ecl 460. Controversies in Renewable Resource Management. (3-0) Cr. 3. F. Prereq: 120, 312 or For 301. Junior classification. Analysis of controversial renewable resource issues using a case approach that considers the adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of each issue will be analyzed. Nonmajor graduate credit.

A Ecl 490. Independent Study. Cr. arr. F.S.SS. Prereq: Junior or senior classification, 10 credits in biological sciences and permission of instructor. Student-initiated field, laboratory, or library project. A total of 6 credits may be used toward degree requirements.

A Ecl 490L. Undergraduate Independent Study. (Same as la LL 490L.) See Iowa Lakeside Laboratory.

A Ecl 493. Workshop. (1-0) Cr. 1. S. Prereq: Permission of instructor. Ecological concepts and fishery and wildlife management practices for landowners and farm managers. Not for students majoring in animal ecology. May be taken more than once for graduation credit.

A Ecl 496. Animal Ecology Travel Course. (Dual-listed with 596.) Cr. 1-3. May be repeated. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study ecological topics in forests, grasslands, deserts, wetlands, coastal, marine or other environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. A. International B. Domestic
Courses for Graduate Students

A Ecl 60I. Seminar. (2-0) Cr. 1 each time taken. May be taken more than once for graduation credit. F.S. Curren
tel admission to the University of Southern Mississippi, 2003.

A Ecl 59L. Graduate Independent Study. (Same as Ia LL 590L.) See Iowa Lakeside Laboratory.

A Ecl 59I. Workshop in Animal Ecology. Cr. 1 to 3. Prereq: 6 credits in biological sciences. May be taken more than once for graduation credit.

Extended field trips to study ecological topics in forests, grasslands, deserts, wetlands, coastal, marine or other environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

A. International
B. Domestic

A Ecl 59I. Creative Component. Cr. arr. Prereq: Nonthesis M.S. option only.

Courses Offered at the Gulf Coast Research Laboratory (GCRL), Ocean Springs, Mississippi

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for the following University of Southern Mississippi/GCRL courses and transfer them to their ISU degree programs. Written permis
sion of the ISU coordinator for the GCRL, 201 Bessey, is required for this arrangement. Inquire at 201 Bessey for further information.

MAR 405. Marine Ecology. Cr. 3. SS. Prereq: 16 hours of biological sciences including general zoolo
gy, general botany, and invertebrate zoology. A consideration of the relationship of marine organisms to their environment, including the effects of tempera
ture, salinity, light, nutrient concentration, currents, and food on their abundance and distribution.

MAR 405L. Marine Ecology Lab. Cr. 2. SS. Lab to accompany MAR 405.

MAR 406. Fauna and Faunistic Ecology of Tidal Marshes. Cr. 1. SS. Prereq: 16 hours of biological sciences and junior standing. Survey and discussion of the taxonomy, distribution, trophic relationships, reproductive strategies and adaptation of tidal marsh animals with emphasis on those occurring in north
er Gulf marshes.

MAR 406L. Fauna and Faunistic Ecology of Tidal Marshes Lab. Cr. 3. SS. Lab to accompany MAR 406.

MAR 407. Marine Aquaculture. Cr. 3. SS. Prereq: General zoology or invertebrate zoology. A lecture, laboratory, and field course designed to introduce aquatic and marine biology students to the history, principles, problems, and procedures relating to the culture of commercially important crustaceans, fish, and mollusks along the Gulf Coast.

MAR 407L. Marine Aquaculture Lab. Cr. 3. SS. Lab to accompany MAR 407.

Courses for Graduate Students

A Ecl 508I. Aquatic Ecology. (Same as Ia LL 508I.) See Iowa Lakeside Laboratory.

A Ecl 509. Fish Biology. (Dual-listed with 320.) Cr. 3. Alt. F., offered 2002. Prereq: Biol 312 or equivalent plus 6 credits of bio
diversity sciences; permission of instructor. Exploration of institutions that help shape fish and wildlife man
agement and policies. Current research on interac
tion of humans with wildlife resources. Roles of social forces, politics and economics in wildlife man
agement.

A Ecl 535. Restoration Ecology. (Same as EnSci 535I.) (2-3) Cr. 3. F. Prereq: Bot 306 or 484; graduate standing or permission of instructor. Theory and practice of restoring animal and plant diversity, struc
ture and function of disturbed ecosystems. Restoration of freshwater wetlands, forests, prairies and reinintro
duced species populations will be used as case studies.

A Ecl 535I. Restoration Ecology. (Same as Ia LL 535I.) See Iowa Lakeside Laboratory.

A Ecl 540. Fishery Management. (Dual-listed with 440.) (2-3) Cr. 3. F. Prereq: Biol 120, 312, credit or enroll
ment in 410, Stat 101 or 104. Biological basis of fish
ery management, fishery problems, and practices for management of freshwater, anadromous, and
marine fisheries.

A Ecl 542. Aquaculture. (Dual-listed with 442.) (2-3) Cr. 3. S. Prereq: 410, 410L, credit or enrollment in 321. Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, and diseases.

A Ecl 544. Aquatic Toxicology. (Same as EnSci 544, Tox 544.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 410. Environmental chemistry and the bio
chemical, physiological, behavioral and population level effects of contaminants on aquatic organisms.

thesis of social organizational and behavioral conce
cepts important for wildlife conservation. Game and non-hunted wildlife species of the world treated.

312; Stat 101 or 104; graduate standing or permis
sion of instructor. Ecological and economical man
agement of sustainable biological resources. Unifying current management concepts and models in wild
life, fisheries, water quality, forestry, recreation, and agriculture. Research problems.

A Ecl 570. Landscape Ecology. (Same as Bot 570.) (2-3) Cr. 3. Alt. F., offered 2002. Prereq: 588; permis
sion of instructor. The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

A Ecl 573. Techniques for Biology Teaching. (Same as Bot 573.) (2-3) Cr. 3. S. Prereq: 312; a course in calcul
calculus.

A. Animal Biology (Same as Ia LL 573A)

G. Limnology (Same as Ia LL 573G)

H. Animal Behavior (Same as Ia LL 573H)

A Ecl 580. Research Methods in Ecology. (2-0) Cr. 2. F. Prereq: 20 credits in biological sciences and a course in statistics. Research design, proposal
preparation, technical writing, and professional pre
sentations.

A Ecl 588. Population Ecology. (Same as Bot 588.) (2-2) Cr. 3. F. Prereq: 312, Stat 401, a course in calcul
lus. Concepts and theories of population dynamics with emphasis on models of growth, predation, competi
tion, and regulation.

A Ecl 590. Special Topics. Cr. arr. F.S.SS. Prereq: Graduate classification, permission of instructor. A total of 6 credits may be used toward degree require
ments.
For undergraduate curricula in animal science and dairy science, see College of Agriculture, Curricula. Visit our web site at: www.iastate.edu/ans/ugrad.

The department offers the degrees bachelor of science in animal science, bachelor of science in dairy science, and complementary work toward admission to schools of law, medicine, and veterinary medicine in either curriculum. This may be done while satisfying requirements for the degree bachelor of science in animal science or dairy science (see Index). A combined bachelor of science and master of science in animal science is also offered. The department offers a minor in Animal Science. The 16-credit minor includes: 114, 114L, 214, 214L, plus courses from a list maintained in the department. Students interested in the minor should contact an Animal Science advisor.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; animal nutrition; meat science; animal physiology; animal science; and molecular, cellular, and developmental biology. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for those students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agronomy, anatomy, microbiology; biochemistry; chemistry; economics; food science and human nutrition; genetics; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and developmental biology), and toxicology (see Index).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Courses Primarily for Undergraduate Students

An S 110. Orientation in Animal Science and ISU. (1-0) Cr. R. F. Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

An S 114. Survey of the Animal Industry. (2-0) Cr. 2. F.S.SS. Ways domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.

An S 114L. Working with Animals. (0-3) Cr. 1. F.S. Prereq: Credit or concurrent enrollment in 114. A hands-on introductory workshop in the skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

An S 211. Issues Facing Animal Science. (0-2) Cr. 1. F.S. Prereq: 114, sophomore classification. Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Offered on a satisfactory-fail grading basis only.

An S 214. Domestic Animal Physiology. (3-0) Cr. 3. F.S. Prereq: Biol 201, Chem 163 or 177. Introduction to anatomy and physiology of the neural, circulatory, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

An S 216. Equine Science. (2-0) Cr. 3. S. Prereq: Course in biology. Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

An S 224. Companion Animal Science. (2-0) Cr. 3. S. Prereq: Course in biology. Introduction of students to contemporary concepts, and basic practices and decisions necessary when caring for the companion animal through stages of its life.

An S 250. Food Animal Science. (2-2) Cr. 3. F.S. Prereq: 114, 114L; course in biology. Introduction to contemporary concepts, and basic practices and decisions necessary when managing beef, dairy, poultry, sheep and swine through stages of their respective production cycles.

An S 305. Livestock Evaluation. (0-6) Cr. 3. F.S. Prereq: Junior classification. 250, 270 recommended. Fall semester leads to 475A or D. Breeding and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills practiced in the context of making selection decisions.

An S 313. Exercise Physiology of Animals. (2-0) Cr. 2. F.S. Prereq: 214, Biol 201, one course in chemistry. Interaction of physiological development relative to athletic performance in domestic animals, primarily equine performance.

An S 316. Training the Horse. (0-6) Cr. 3. F.S. Prereq: 115 or permission of instructor. 216, 313. Modifying the behavior of the horse for performance objectives through bitting, longeing, saddling, and riding.

An S 332. Laboratory Methods in Animal Reproduction. (0-4) Cr. 2. F.S. Prereq: Credit or enrollment in 331. Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction, principles of artificial insemination in farm animals; and selected laboratory exercises with written report.

An S 333. Embryo Transfer and Related Technologies. (2-0) Cr. 2. F.S. Prereq: 331 or 332. Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Economic and genetic aspects of embryo transfer. Nonmajor graduate credit.

An S 334. Embryo Transfer Laboratory. (0-2) Cr. 1. F.S. Prereq: Credit or concurrent enrollment in 333. Selected laboratory exercises related to embryo transfer such as superovulation, embryo evaluation, microsurgery, sexing techniques, in vitro fertilization, and embryo manipulation technologies will be demonstrated and/or performed. Nonmajor graduate credit.

An S 336. Livestock Behavior and Well-Being. (2-2) Cr. 3. F. Prereq: One course in physiology. Principles of behavioral care, management and environmental design to ensure animal well-being. Examination of basic neural-endocrine mechanisms involved in the animal’s response to its environment.

An S 337. Lactation. (2-0) Cr. 2. S. Prereq: 214. The structure, development and evolution of the mammary gland. Mammary physiology, milk synthesis; neural and endocrine regulation of mammary function, immune function and health of the mammary gland.

An S 345. Growth Related to Value Based Marketing. (2-2) Cr. 3. S. Prereq: 214, 270. Application of principles of growth and development related to value based marketing. Postnatal growth and development of fat, muscle and bone of food animals. Techniques to evaluate carcass composition and value.

An S 353. Animal Breeding Programs Design. (0-4) Cr. 2. S. Prereq: 352. Evaluation of alternate breeding programs and genetic improvement techniques in the context of case study. Experiential and cooperative learning techniques employed. Nonmajor graduate credit.

An S 360. Fresh Meats. (2-2) Cr. 3. F. S. Prereq: 270, course in organic or biochemistry. Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, cooking, and processing on the palatability, nutritional value, yields, market value, and safety of fresh meat. Nonmajor graduate credit.

An S 411. Addressing Issues in Animal Science. (0-2) Cr. 1. F.S. Prereq: Senior classification in An S. Life skill development emphasized in the context of one’s perspective of the most pressing moral and scientific issues facing animal agriculture.Clarification and communication of personal conclusions in small and large settings expected.

An S 470. Processed Meats. (2-2) Cr. 3. S. Prereq: 270. Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausages products. Nonmajor graduate credit.

An S 490. Independent Study. Cr. 1 to 3. F.S.S.S. Prereq: Permission of the instructor. A maximum of 6 credits of 490 may be used toward the total of 28 credits required for graduation. Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A. Animal Science B. Dairy Science C. Meat Science D. Senior Seminar E. Poultry Science H. Honors

An S 493. Workshop in Animal Science. (Dual-listed with 593) Cr. 1 to 3. May be repeated. Offered as demand warrants. Prereq: Permission of instructor. Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry. Nonmajor graduate credit.

An S 495. Agricultural Travel Course Preparation. (0-1) Cr. May be repeated. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course will also register for Agron 495 and intend to register in Agron 496 and An S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

An S 496. Agricultural Travel Course. Cr. arr. May be repeated. Approval. One-half credit per week traveled in each An S 496 and Agron 496. Prereq: Permission of instructor, 30 college credits. Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Location and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students. A. International tour B. Domestic tour
AN S 500. Computer Techniques for Biological Research. (2-0) Cr. 1. F. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation. A. (1st half of semester)UNIX and SAS B. (2nd half of semester) Problem solving using matrix algebra

AN S 501. Survey of Animal Disciplines. (1-0) Cr. 1. F. An S 501: Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the industry. Offered on a satisfactory-fail grading basis only.

AN S 503. Seminar in Animal Production. (1-0) Cr. 1. May be repeated. F. Prereq: Permission of instructor. Discussion and evaluation of current topics in animal production and management.

AN S 518. Digestive Physiology and Metabolism of Non Ruminants. (3-0) Cr. 3. F. Prereq: 419. Digestion and metabolism of nutrients. Nutritional requirements and feeding and feeding problems for poultry and swine.

AN S 519. Digestive Physiology and Metabolism of Ruminants. (2-2) Cr. 3. S. Prereq: 419. Digestive physiology and nutrient metabolism in ruminant and primate animals.

AN S 536. Perinatology. (3-0) Cr. 3. S. Prereq: One course in physiology. Regulation of metabolism and development in the mammalian fetus and neonate will be explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships at birth. Classes will incorporate maximal stu
dent participation and development of critical thinking skills.

AN S 549. Advanced Vertebrate Physiology I. (Same as BMS 549.) See Biomedical Sciences.

AN S 551. Animal Molecular Biology. (Dual-listed with 451.) (2-3) Cr. 3. F. Prereq: 352, BBMB 221 or organic chemistry, Biol 301. Introduction to use of molecular biology techniques in domestic animal research and production. Restriction endonuclease mapping, gene mapping, gene cloning, DNA sequencing and amplification, and analysis of genetic differences at the molecular level.

AN S 552. Advanced Vertebrate Physiology II. (Same as BMS 552.) (4-0) Cr. 4. Prereq: Zool 355, credit or enrollment in BBMS 420 or 420. Cardiovascular, renal, respiratory, and digestive physiology.

AN S 552L. Advanced Vertebrate Physiology Laboratory. (Same as BMS 552L.) (0-3) Cr. Prereq: Credit or enrollment in BMS 552. Laboratory for cardiovascular, renal, respiratory, and digestive physiology.

AN S 556. Current Topics in Genome Analysis. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Biochem 450 or Gen 510. Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes. Survey of statistical methods and computer programs for bioinformatics, linkage mapping, radiation hybrid mapping, and mapping quantitative trait loci.

AN S 561. Population and Quantitative Genetics for Breeding. (Same as Agron 561.) (4-0) Cr. 4. F. Prereq: Stat 401. Population and quantitative genetics for plant and animal breeding. Topics include: forces that change gene frequency, covariance between relatives, response to artificial selection, inbreeding depression, heterosis, cross-breeding, genotype-by-environment interaction, linkage analysis, mapping of quantitative trait loci, and marker assisted selection.

AN S 570. Advanced Meat Science and Applied Muscle Biology. (2-0) Cr. 3. S. Prereq: 470. Ante and postmortem factors impacting composition and structure, and chemistry of red meat and poultry muscle meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats. One lecture and research reports and a research proposal.

AN S 571. Advanced Meat Processing Principles and Technology. (2-2) Cr. 3. F. Prereq: 470 or 570. Physical/chemical relationships during processing. Effects of modern technology, non-meat additives and contaminants on quality and safety of processed meat. Laboratory demonstration of principles and technology.

AN S 580. Sustainable Agriculture Seminar. (Same as AE E 580, Ent 580, For 580) (1-0) Cr. 1. May be repeated. S. Issues, opportunities, and research associated with production systems for sustainable agriculture.

AN S 593. Workshop in Animal Science. (Same-listed with 493.) Cr. 1 to 3. May be repeated. Offered as demand warrants. Prereq: Permission of instructor. Graduate workshops in animal science and the technologies that impact the animal industry.

AN S 599. Creative Component. Cr. 1-8. F.S.S.S. Prereq: Nonthesis M. A. Written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee. A. Animal Breeding and Genetics B. Animal Nutrition C. Animal Physiology D. Animal Science E. Meat Science

Courses for Graduate Students

AN S 603. Seminar in Animal Nutrition. (1-0) Cr. R. May be repeated. F.S. Prereq: Permission of instructor. Discussion of current literature, preparation and submission of abstracts.

AN S 618. Advanced Nutrition and Metabolism—Minerals and Vitamins. (Same as FS HN 618.) (3-0) Cr. 3. Alt. F., offered 2003. Prereq: BBMB 405. Role of vitamins and minerals in mammalian intermediary metabolism. Integration of cellular biochemistry and physiology of vitamins and minerals.

AN S 633. Seminar in Animal Reproduction. (1-0) Cr. 1. May be repeated. F. Prereq: Permission of instructor. Discussion of current literature and preparation of reports on selected topics concerning physiology of reproduction.

AN S 653. Applied Animal Breeding Strategies. (2-0) Cr. 2. S. Prereq: 652. Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an...

Michael B. Whiteford, Chair of Department
Professors: Butler, Huang, Whiteford
Professors (Emeritus): Bower, Gad vomh
Associate Professors: Coinman, Tiffany
Associate Professors (Collaborators): Lange
Associate Professors (Emeritus): Schuster, Wolff
Assistant Professors: Ilahiane, Kessel, Wagner
Instructors (Adjunct): Johnsen

Undergraduate Study

An undergraduate major in anthropology can serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology graduates develop a well-rounded professional education in four fields of anthropology: cultural anthropology, linguistic anthropology, archaeology, and biological anthropology. They learn what it means to be human through the study of culture and social relations, human biology and evolution, languages, music, art, architecture, and through the study of past human communities.

Graduates learn the important historical and contemporary issues of our subdisciplines, and they learn what it means to be a "modern" anthropologist and a citizen in an international and global community. Graduates develop an appreciation of the value of cultural diversity at the local, national and international level. They acquire a particular holistic vision that requires using a repertoire of methods in order to forge a deeper understanding of cultural contexts, both past and present.

Undergraduate students may obtain experience in archaeological and ethnological research.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Groups I, II, and/or IV. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Group III.

Undergraduate students with majors in anthropology are required to take the following anthropology core courses: 306, 307, 308, and 309. One course in statistics and one course in computer science are required.

Undergraduates majoring in anthropology are required to have a minor or a second major. A minor usually consists of 15 credits minimum.

Courses and Programs Anthropology

A minor in anthropology consists of at least 15 credits and must include 306 or 309 and 307, and at least 6 other credits in courses numbered 300 or above.

English proficiency requirement: The department requires that a student earn a grade of C or better in Engl 105 and either English 302 or 309 or 314.

The principal subdisciplines of anthropology are represented by the following:

3. Linguistic anthropology: 309, 490D.

Graduate Study

Anthropology offers the degree master of arts with a major in anthropology. Graduate courses are offered in the areas of biological anthropology, archaeology, cultural anthropology, linguistic anthropology, history and theory, and methodology. Competence in one foreign language and in statistics is to be demonstrated. A thesis, generally based on original fieldwork, is required.

Courses open for nonmajor graduate credit: 427I.

Courses Primarily for Undergraduate Students

Anth 201. Introduction to Cultural Anthropology. (3-0) Cr. 3. F. S.SS. Comparative study of culture as key to understanding human behaviors in different societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined.

Anth 202. Introduction to Biological Anthropology and Archaeology. (3-0) Cr. 3. F. S. Human biological and cultural evolution; survey of the evidence from fossil forms and archaeology, as well as living primates and traditional cultures; introduction to methods of study in archaeology and biological anthropology.

Anth 230. Third World Cultures in Global Perspective. (3-0) Cr. 3. F. S. An introduction to understanding other cultures in today’s world with a focus on contemporary life, the arts, and social issues in Latin America, Asia, and Africa.

Anth 306. Comparative Studies of World Cultures. (3-0) Cr. 3. S. Prereq: 201 recommended. A survey of similarities and differences in the world’s major societal types; examination of social institutions in hunting-and-gathering, agricultural, pastoral, and industrial societies; techniques of cross-cultural comparison.

Anth 307. Biological Anthropology. (2-2) Cr. 3. S. Prereq: 202 recommended. Human evolution as known from fossil evidence, comparative primate studies, and genetic variations in living populations. Laboratory-tutorial sessions include study and discussion of human osteology, fossil hominids, simple Mendelian traits, and bio-ethics in applied biological anthropology.
Anth 308. Archaeology. (2-2) Cr. 3. F. Prereq: 202. Methods and techniques for the recovery and interpretation of archaeological evidence, its role in reconstructing human behavior and past environments. Laboratory sessions include experience in the interpretation of archaeological evidence, the use of classification systems, and prehistoric technologies such as ceramics and stone tools. Field trips.

Anth 309. Linguistic Anthropology. (Same as Ling 309.) (2-2) Cr. F. Prereq: Anth 210 recommended. Language as a human attribute; language versus animal communication; human communication in cultural context; paralanguage, kinesics, proxemics, artifacts as communication; culture and language; cross-cultural sociolinguistics; ethnolinguistics; and language policies. Participatory lab: focus on analysis of a non-Western language and communication system.

Anth 313. The Family and Kinship in Cross-Cultural Perspective. (Dual-listed with 515.) (3-0) Cr. 3. S. Prereq: 201 recommended. Comparative and historical study of the family and kinship systems in cross-cultural perspective; discussion of the structure, role, and functions of family and kinship systems in ethnographic, in the family in Western culture; theoretical issues in contemporary family and kinship studies.

Anth 315. Archaeology of North America. (Dual-listed with 515; same as Am In 315.) (3-0) Cr. 3. Alt. S., offered 2001. Survey of prehistoric North American culture and early history of North America as reconstructed from archaeological evidence; peopling of the New World; cultural-historical major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.

Anth 319. Skeletal Biology. (Dual-listed with 519.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: Anth 202, 307 or college level biology recommended. Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.

Anth 321. World Prehistory. (Dual-listed with 521.) (3-0) Cr. 3. S. Prereq: 202 recommended. An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica and the Western Hemisphere. Emphasis is on the interpretation of material cultural remains in reconstructing past societies.

Anth 322. The American Indian. (Dual-listed with 522; same as Am In 322.) (3-0) Cr. 3. F.S.S. Prereq: 201 or Am In 210. Origin, distribution, and traditional life of native peoples of the Americas. Survey of culture areas; ecology and subsistence, language, kinship, life cycle, political, economic, and religious systems; impact of European contact.

Anth 323. Peoples and Cultures of Latin America. (Dual-listed with 523; same as Am In 323.) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 201 or 308 and 315 or 321. Prehistory of the American Southwest as reconstructed from archaeological evidence. Includes an introduction to the intellectual framework of anthropological study of the American Southwest; survey of Pueblo and Anasazi cultures, prehistory of the Paleoindians and Archaic cultural periods, the adoption of agriculture, and the emergence of pueblo societies and regional cultures.

Anth 324. Environmental Archaeology. (Dual-listed with 524; same as Am In 324.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 308. Examination of relationships between the biophysical environment and socio-cultural organization in the archaeological record. Survey of methodological issues in environmental archaeology.

Anth 325. Peoples and Cultures of Africa. (Dual-listed with 525; same as Am In 325.) (3-0) Cr. 3. Alt. F., offered 2001. Origin and distribution of peoples of Africa; geographical characteristics related to culture types, including early civilizations; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African societies.

Anth 335. Peoples and Cultures of the Middle East. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 201 or 306 recommended. Anthropological approaches to the study of the Middle East; study of Middle Eastern culture, areas of discussion, economic, political, and social and religious issues and systems. Examination of contemporary social movements.

Anth 337. Andean Archaeology. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: Anthropol 335 recommended. Survey of prehistoric Andean cultures of Peru, Bolivia and Ecuador; the archaeology of the Incas and their ancestors. Emphasis on prehistoric economic, religious, and political organization, the rich material culture recovered through archaeological records; and the use of ethnohistoric texts and modern ethnographers to reconstruct the prehistory of Andean societies.

Anth 340. Magic, Witchcraft, and Religion. (Dual-listed with 540; same as Relig 340.) (3-0) Cr. 3. S. Prereq: 201 or 306. Origin and development of indigenous magico-religious systems; myth and ritual; therapeutic aspects; symbols and meanings; religious and political organization, the rich material culture recovered through archaeological records; and the use of ethnohistoric texts and modern ethnographers to reconstruct the prehistory of Andean societies.

Anth 411. Cultural Change and Applied Anthropology. (Dual-listed with 511.) (3-0) Cr. 3. F. Prereq: 301 or 306. Theoretical and practical considerations of human adaptability. Examination of theories of cultural change, culture contact and acculturation. Dynamics of directed change in contemporary world cultures. Principles, theories, and ethical issues for international development projects from a sociocultural perspective.

Anth 412. Psychological Anthropology. (Dual-listed with 512.) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 301 or 308. Relationship of cultural, social and personality functioning in Native American Indians; historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal status, the reservation system, treaty violations, Indian militancy, education and urbanization, self-determination, social impact of resource development, and other current concerns.

Anth 431. Ethnographic Field School. (Dual-listed with 531.) Cr. 4 or 6. SS. 4 or 6 weeks. Prereq: Permission of instructor. Summer field school for training in ethnographic field methods; students will carry out research projects in social anthropology; process will involve learning a variety of investigative research techniques commonly used in social sciences.

Anth 432. American Indians Today. (Dual-listed with 532; same as Am In 432.) (3-0) Cr. 3. S. Prereq: 201 or 306; 322 or Am In 210 recommended. Contemporary and usual history of Native American societies. Historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal status, the reservation system, treaty violations, Indian militancy, education and urbanization, self-determination, social impact of resource development, and other current concerns.

Anth 439. Medical Anthropology. (Dual-listed with 539.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 201 or 306. Study of human health in cultural and environmental context; comparison of current health and disease patterns of western and non-western populations; healing systems; use of epidemiological models in understanding illness and disease etiologies cross-cultural variation and interrelationships between disease and culture.

Anth 441. Evolution of Human Disease. (Dual-listed with 541.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 307; 319/519 recommended. Study of the co-evolution of humans and pathogens beginning with early hominids and continuing with the continued impact of infectious diseases on human populations today. The evolution of infectious diseases in humans is studied as complex interaction of cultural, biological and environmental change. Human disease and the role of infectious disease in human existence is examined through the interpretation of skeletal lesions and the application of epidemiological models, paleodemographic principles and paleopathological theory.

Anth 444. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 544.) (3-0) Cr. 3. S. Prereq: 201; 306 recommended. Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western societies. Topics, perspectives and examination of etiological data will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Anth 450. Survey of Historical and Theoretical Approaches in Anthropology. (Dual-listed with 545.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: Senior classification, Anth majors or consent of instructor. Examination of topical and current research directions in the field;
Courses Primarily for Graduate Students, open to qualified undergraduate students.

Anthr 500. Language and Culture. (Same as Ling 500) (3-0) Cr. 3. Alt. S., offered 2003. Approaches to the study of the relationship between language structure, world view, and cognition; social and structural linguistic variation; cross-cultural aspects of verbal and non-verbal communication; linguistic change; contemporary applications of linguistic anthropology.

Anthr 509. Agroecosystems Analysis. (Same as Agron 509) See Agronomy.

Anthr 513. The Family and Kinship in Cross-Cultural Perspective. (Dual-listed with 313) (3-0) Cr. 3. S. Prereq: 6 credits in anthropology, 201 rec. 2001. Comparative and historical study of the family and kinship systems in cross-cultural perspective; discussion of the structure, cycle, and functioning of family and kinship, including the family in Western culture; theoretical issues in contemporary family and kinship studies.

Anthr 514. Southwestern Archaeology. (Dual-listed with 414) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 202 or 300. History of the American Southwest as reconstructed from archaeological evidence. Includes an introduction to the intellectual frameworks of Southwestern archaeology and surveys of the Paleoindian and prehistoric periods, the adoption of agriculture, and the emergence of pueblo societies and regional cultures.

Anthr 515. Archaeology of North America. (Dual-listed with 315) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 308. Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnographically known Native American groups.

Anthr 516. Environmental Archaeology. (Dual-listed with 416) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 308. Examination of relationships between the biological environment and socio-cultural organization in the archaeological record. Survey of methods used in environmental sciences by archaeologists to understand the human ecosystem.

Anthr 521. World Prehistory. (Dual-listed with 321) (3-0) Cr. 3. S. Prereq: 202 recommended. An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructions.

Anthr 522. The American Indian. (Dual-listed with 322) (3-0) Cr. 3. F. SS. Prereq: 201 or Am In 210. Origin, distribution, and traditional life of native peoples of North America. Survey of culture areas; ecology and subsistence, language, kinship, life cycle, political, economic and religious systems, impact of European contact.

Anthr 523. Peoples and Cultures of Latin America. (Dual-listed with 323) (3-0) Cr. 3. S. Prereq: 6 credits in anthropology, 201 or 306 recommended. Origin and distribution of peoples; blending of Old and New World cultures; theoretical problems of peasant and tribal societies; discussion of economic, social, political, and religious systems; processes of change.

Anthr 524. Forensic Anthropology. (Dual-listed with 424) (3-0) Cr. 3. S. Prereq: Biol 202 or Zool 156; 307 or 319 recommended. Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, commingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain, including human variation, taphonomy, entomology archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of mediocolegal and bioethical issues will also be gained.

Anthr 525. Peoples and Cultures of Africa. (Dual-listed with 325) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 201 or 306 recommended. Origins and distribution of peoples of Africa; geographical characteristics which are related to its present day distributions; including early cultural traditions; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the archaeology of Africa; and the natural history of contemporary African societies.

Anthr 526. Peoples and Cultures of East and Southeast Asia. (Dual-listed with 326) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 6 credits in anthropol- ogy, 201 or 306 recommended. Origin and develop- ment of early civilizations on the western rim of the Pacific, including China, Japan, and insular Southeast Asia. Survey of current issues in ecological, historical, and ideological contexts.

Anthr 528. Archaeological Laboratory Methods and Techniques. (Dual-listed with 428) (3-0) Cr. 3. Alt. S., offered 2003. Laboratory processing and analysis of archaeological materials, experiments in technologies such as stone tools and ceramics, the organization and interpretation of archaeological data. Laboratory emphasis on methods and techniques of analyzing and recording various categories of material culture.

Anthr 529. Archaeological Field School. (Dual-listed with 429) Cr. 4 or 6. SS. 4 or 6 weeks. Prereq: 308, permission of instructor. Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

Anthr 531. Ethnographic Field School. (Dual-listed with 431) Cr. 4 or 6. SS. 4 or 6 weeks. Prereq: Permission of instructor. Summer field school for training in ethnographic field methods; students will carry out research projects in social anthropology; process will involve learning various research techniques commonly used in social sciences.

Anthr 532. American Indians Today. (Dual-listed with 432) (3-0) Cr. 3. S. Prereq: 6 credits in anthropology, 201 or 306 recommended. Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal status, the reservation system, treat- y violations, Indian military, education and urbaniza- tion, self-determination, social impact of resource development, and other current concerns.

Anthr 535. Peoples and Cultures of the Middle East. (Dual-listed with 335) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 201 or 306 recommended. Anthropological approaches to the study of Middle East cultures. Survey of major culture areas. Discussion of economic, political, and social and religious issues and developments. Examination of contemporary social movements.

Anthr 537. Andean Archaeology. (3-0) Cr. 3. F. Prereq: 202 or 321 recommended. Survey of prehis- toric Andean cultures of Peru, Bolivia and Ecuador; the archaeology of the Incas and their ancestors. Emphasis on prehistoric economics, religious, and political organization, the rich material culture recovered through archaeological records; and the use of ethnohistoric texts and reservation systems to reconstruct the prehistory of Andean societies.

Anthr 538. Medical Anthropology. (Dual-listed with 439) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 6 credits in anthropology, 201 or 306 recommended. Study of human health in cultural and environmental con- text: examination of health and healing systems of western and non-western populations; healing sys- tems; use of epidemiological models in understand- ing illness and disease etiologies cross-culturally; interrelationships between culture and health.

Anthr 540. Magic, Witchcraft, and Religion. (Dual-listed with 340) (3-0) Cr. 3. S. Prereq: 6 credits in anthropology, 201 or 306 recommended. Origin and development of indigenous magico-religious sys- tems; myth and ritual; therapeutic aspects; symbols, change processes, the impact of colonialism, and the nature of contemporary African societies.

Anthr 541. Evolution of Human Disease. (Dual-listed with 441) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 307; 319/319 recommended. Study of the co-evolu-
tion of humans and pathogens beginning with early hominids and concluding with the continued impact of infectious diseases on human populations today. The evolution of infectious diseases in humans is studied as a complex interaction of cultural, biological and environmental changes in both pathogen and host. The impact of disease throughout human existence is examined through the interpretation of skeletal lesions and the application of epidemiological models, paleodemographic principles and paleopathological theory.

Anthr 544. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 444.) (3-0) Cr. 3. S. Prereq: 201; 306 recommended. Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Anthr 555. Seminar in Archaeology. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 308 or 429; permission of instructor. Examination of the history of anthropological archaeology and current issues and debates concerning methods, theories and the ethics of modern archaeology.

Anthr 590. Special Topics. Cr. 1 to 5. Prereq: 10 credits in anthropology; senior or graduate classification.

Courses and Programs

Architecture

www.arch.iastate.edu

Calvin F. Lewis, Chair of Department

Professors: Block, Bloomer, Engelbrecht, Findlay, Heemstra, Lewis, Mukerjea, Osterberg, Segrest, Shao

Professors (Emeritus): Kainlauri, Kitzman, McKeown, Shank, Stone

Associate Professors: Bassler, Cardinal-Pett, Chan, Horwitz, Inghram, Palermo, Rakatansky

Associate Professors (Adjunct): Masterson, Rice

Assistant Professors: Bermann, Leslie, Maves, Muecke, Paxson, Schwenssen, Stankard

Assistant Professors (Adjunct): Fisher

Undergraduate Study

The undergraduate program in architecture is a five-year curriculum leading to the bachelor of architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth year students.

The undergraduate curriculum includes one year of preprofessional coursework and four years of professional coursework. Admission to the professional degree program is based on the applicant’s performance in the completed preprofessional curriculum; previous high school record or transfer record where applicable; portfolio and essay evaluations; and on available departmental resources.

Objectives of the Bachelor of Architecture program:

The Department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural designs through which those questions are addressed; that they develop a working method for designing and that they have the communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tempered; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in society.

For students entering the professional program, the department highly recommends purchase of a laptop/notebook computer and appropriate software. See the Graduate Coordinator or the departmental web pages for hardware and software specifications.

The one-year option is a post-professional course of study leading to the master of architecture and is designed for individuals with an accredited professional degree in architecture (B.Arch. or M.Arch.). The post-professional option affords the opportunity for advanced study in architectural theory and design leading to the thesis. Thirty credits are required.

The graduate program also offers a course of study leading to the degree master of science in architectural studies. This course of study is designed for students without architecture backgrounds and students with previous degrees in architecture wishing to conduct specialized graduate level research in architecture. Students work closely with faculty who are engaged in high-level research and scholarship. Thirty credits are required.

Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch./M.C.R.P.) and the College of Business (M.Arch./M.B.A.). Financial support in the form of teaching and research assistantships is available.

Contact the department office for specific curricula.

Courses open for nonmajor graduate credit: 420, 421, 422, 423, 424, 425, 426, 427, 434, 437, 451, 467, 471

Courses Primarily for Undergraduate Students

Arch 102. Pre-Architecture Design. (1-6) Cr. 4. F.S.

A studio course focused on three-dimensional design and drawing, with emphasis on creative conceptualization, exploration of materials, and analytical thinking. Includes study of architectural precedents and exercises to develop ability to communicate about form and space.

Arch 132. Two-Dimensional Studio. (0-6) Cr. 2. F.S.

Prereq: Enrollment in the preprofessional program. Introduction to free-hand drawing concepts and practices. Course will engage in an exploration of the
sketch as a means of inquiry, conceptualization and representation of form and space. Exercises focus on acquiring proficiency in the perceptual and experimental aspects of drawing. Various media, subjects and environmental contexts.

Arch 182. An Introduction to Architecture. (3-0) Cr. 3. S. Prereq: Open to non-majors. Through the study of architects, buildings, and theories, this course is designed to introduce the discipline of architecture, professional process and architectural works as culturally grounded events and artifacts.

Arch 201. Architectural Design I. (1-15) Cr. 6. F. Prereq: Completion of the preprofessional program and admission into the professional program. Introduction to architectural design. An exploration of fundamental architectural ideas - form, space, meaning - through studio projects that focus on human inhabitation of the material environment. Introduction to design processes: research, invention, problem solving, visualization, and communication. Opportunities to develop design media skills. Special emphasis on materials and methods of building construction.

Arch 202. Architectural Design II. (1-15) Cr. 6. S. Prereq: Architectural Design I, Part 1. A continuation of 201. Studio projects demand more sophisticated exploration of the relations between ideas and materiality and of the complex cultural interactions within which design occurs. Further development of design process skills with a special emphasis on the relations between design media and design processes.

Arch 221. History of Western Architecture I. (Same as Dsn S 221.) (0-6) Cr. 3. S. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Ancient through Renaissance.

Arch 222. History of Western Architecture II. (Same as Dsn S 222.) (3-0) Cr. 3. S. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.

Arch 230. Design Communications I. (0-6) Cr. 2. F. Prereq: Admission to the professional program. Investigations of various design media - including computer graphics and freehand drawing - and their applications to design, specifically to the coursework in 201. Exercises to develop manual skill and perceptual sensitivity.

Arch 232. Design Communications II. (0-6) Cr. 2. S. Prereq: Architectural Design I. Advanced study of various design media - including computer graphics - and their applications to design, specifically to the coursework in 202. Exercises to develop manual skill and perceptual sensitivity.

Arch 240. Materials and Assemblies I. (3-1) Cr. 4. F. Prereq: Completion of the preprofessional program and admission into the professional program. Introduction to common architectural materials, their behavior. Prereq: Admission to the professional program. Prereq: Architectural Design I.

Arch 335. Three-Dimensional Studio. (Same as ArtS 335.) (I-II) Cr. 2 each time taken, up to a maximum of 8 credits for 335 and 525 combined. F.S. Investigation of basic sculptural media; modeling in clay, wood carving, stone carving, casting in plaster and metal, welding, and other constructing techniques.

Arch 344. Architectural Structures III. (2-1) Cr. 3. S. Prereq: Architectural Structures II. Preliminary design of low to medium rise reinforced concrete and prestressed concrete members and systems. Wind and seismic lateral forces and the principles of equilibrium and material behavior.

Arch 346. Architectural Structures IV. (2-1) Cr. 3. S. Prereq: Architectural Structures III. Structural performance and preliminary design of low to medium rise reinforced concrete and prestressed concrete concrete members and systems. Wind and seismic lateral forces and the principles of equilibrium and material behavior.

Arch 351. Solar Home Design. (Same as Dsn S 351.) (3-0) Cr. 3. S. Prereq: Architectural design and technical analysis of residential structures with emphasis on energy construction and solar energy utilization.

Arch 357. Environmental Forces in Architecture. (3-0) Cr. 3. F. Prereq: Completion of the preprofessional program and admission into the professional program. Introduction to environmental forces that design must deal with: the structural needs of human comfort and patterns of occupancy. Emphasis on analytical rules of thumb and calculation methods that contribute to design synthesis. A design process is developed uisitology, control of thermal, luminous, and acoustic environments.

Arch 372. Design Inquiry. (3-0) Cr. 3. S. Prereq: 271. An overview of methods of inquiry in design. Different ways of thinking about design and design processes in architecture, associating appropriate programming and design activities with project objectives, planning and implementing an effective process to meet those objectives.

Arch 401. Architectural Design V. (1-15) Cr. 6. F. Prereq: Architectural Design IV. Examination of architecture’s dialectical relationship with technology and culture; the consideration of the constitution and configuration of public space in its historic and contemporary conditions. Studio projects stress the invention and integration of structural, environmental, and communication systems within the architectural construct.

Arch 403. Architectural Design VII. (1-15) Cr. 6. S. Prereq: Architectural Design VI. This course provides advanced forums for the development of sophistication in architectural design. Experimentation and innovation are encouraged.

Arch 404. Architectural Design VIII. (1-15) Cr. 6. S. Prereq: 403, 405. This comprehensive studio provides a forum for the demonstration of individual competence in architectural design. The work is rigorously examined relative to the entire undergraduate program of study.

Arch 421. Topics in Ancient Architecture. (Dual-listed with 521.) (3-0) Cr. 3. S. Prereq: Junior classification. The history, theory, and principles of ancient architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Nonmajor graduate credit.

Arch 422. Topics in Medieval Architecture. (Dual-listed with 522.) (3-0) Cr. 3. F. Prereq: Junior classification. The history, theory, and principles of medieval architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Nonmajor graduate credit.

Arch 423. Topics in Renaissance to Mid-Eighteenth Century Architecture. (Dual-listed with 523.) (3-0) Cr. 3. S. Prereq: Junior classification. The history, theory, and principles of the transition from the Renaissance to the eighteenth century, with special emphasis on the design relationship to the culture, visual arts, site, and surroundings. Nonmajor graduate credit.

Arch 424. Topics in Nineteenth Century Architecture. (Dual-listed with 524.) (3-0) Cr. 3. F. Prereq: Junior classification. The history, theory, and principles of the transition from the Nineteenth to the Twentieth Century, with special emphasis on the design relationship to the culture, visual arts, site, and surroundings. Nonmajor graduate credit.

Arch 425. Topics in Twentieth Century Architecture. (Dual-listed with 525.) (3-0) Cr. 3. F. Prereq: Junior classification. Study of built environments of pre-conquest Mexico and Central America including the emergence, florescence, and demise of architecture styles, urban and ceremonial centers, religious structures and associated arts. Nonmajor graduate credit.

Arch 427. History, Theory, and Criticism of Pre-Columbian Mexican Architecture. (Dual-listed with 527.) (3-0) Cr. 3. S. Prereq: Junior classification. Survey of the history and theoretical concept of Pre-Columbian architecture with emphasis on the evolution of architectural form and its relationship to art, landscape design, and urban structure. Nonmajor graduate credit.

Arch 434. Computer-aided Architectural and Environmental Design. (3-0) Cr. 3. S. Prereq: 234, Com S 107 or 205. Emphasis on application of the computer as a design tool, topological applications and computer graphic methods, development of computer software for architectural and environmental problem solving. Nonmajor graduate credit.

Arch 436. Advanced Design Media. (0-9) Cr. 3. Each time taken to a maximum of 6 credits. F.S. Prereq: 230, 232. Special topics in design media applications.

Arch 573, Post-Occupancy Evaluation. (Same as Dsn S 573.) (3-0) Cr. 3. F. Prereq: Senior classification or graduate standing. Methods of evaluating the physical, social, and psychological performance of buildings following construction and occupancy, with emphasis on behavioral response to the environment and its role in the design process.

Arch 575. Contemporary Urban Design Theory. (Same as Dsn S 575.) (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Current urban design theory and its application to urban problems.

Arch 577. Social Impact of the Built Environment. (Same as Dsn S 577.) (3-0) Cr. 3. S. Prereq: Graduate standing. Interdisciplinary review and analysis of social scientific research applied to architectural design.

Arch 582. Professional Practice. (Dual-listed with 482.) (3-0) Cr. 3. F.S. Prereq: Graduate standing. Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

Arch 585. Theory I: Contemporary Theories. (3-0) Cr. 3. F. Prereq: Graduate standing. A select study of contemporary architectural texts. Readings will explore the nature of the text, its relationship to architectural practice, and the social, political, and intellectual context of its production.

Arch 587. Theory II: Theories and History. (3-0) Cr. 3. F. Prereq: Graduate standing or 401. The relevance of the theoretical device is discussed through the reading of architectural treatises. Interpretations of language, form, and meaning will seek to explore relationships to the production of contemporary architecture.

Arch 589. Theory III: Methods of Inquiry. (3-0) Cr. 3. S. Prereq: Graduate standing or 401. Seminar course examining the nature of architectural research, the development of the research topic and methods of inquiry. Research approaches include comparative case studies and evaluative and critical approaches in history; theory and criticism as related to architectural scholarship.

Arch 590. Special Topics. Cr. 1 to 5 each time taken. F.S.SS. Prereq: Written approval of instructor and department chair on approved form. Investigation of architectural issues having a specialized nature.

Courses for Graduate Students

Arch 603. Advanced Architectural Design III. (1-15) Cr. 6. Each time taken up to a maximum of 12 credits. S. Prereq: Professional degree in architecture or advanced standing in the graduate program. Architectural and urban design problems.

Arch 690. Independent Design Study. (1-15) Cr. 6. F.S.SS. Prereq: Admission to MSAS or M ARCH 30 credit program. Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Advisory Committee. 

Art and Design

Roger Baer, Chair of Department
Professors: Dake, Fowles, Singer, Smith, Steiglitz, Tartakov
Distinguished Professors (Emeritus): Heggen, Miller
Professors (Emeritus): Allen, Bro, Danielsson, Evans, Held, Petersen, Pickett, Sontag
Associate Professors: Akrutt, Baer, Croyle, Cunnally, Curran, Fontaine, Gibbs, Herrnstadt, Jones, Lehrer, Lilligren, Malven, McFarth, Mickelson, Stout, Warme
Associate Professors (Adjunct): DeMartino, Pohlman
Associate Professors (Emeritus): Bruene, McClain, Polster, Sreenivasan
Assistant Professors: Caldwell, Gould, Harris, Iasevoli, Kang, Katz, Martin, Paschke, Raverty, Richards, Satterfield, Tilden
Assistant Professors (Adjunct): Biechler
Instructors (Adjunct): Walton

Undergraduate Study

The department offers work for the degrees bachelor of fine arts and bachelor of arts. Programs in general studio art and/or art history, integrated studio arts (visual communications or studio research emphasis), graphic design, and interior design are possible within the four curricula: art and design—B.F.A., art and design—B.A., graphic design—B.F.A., and interior design—B.F.A.; see College of Design Curricula. Each of these curricula affords excellent preparation for a variety of career opportunities or a basis for graduate study in art and design disciplines.

The curriculum in art and design leading to the B.F.A. provides a studio concentration. Students select an emphasis in one of the following areas: (1) visual communications (calligraphy, photography, papermaking, computer aided art and design, illustration, mixed media); (2) studio research (calligraphy, wood design, ceramics, jewelry and metals, fibers, painting, printmaking, drawing, two and three dimensional mixed media). The two concentrations emphasize aesthetics, visual problem solving and skill development in a variety of media employing contemporary, historical and cultural thinking with visual languages.

The curriculum in graphic design leads to the B.F.A. degree. Emphasis is on creative problem solving, the design process, and the visual organization of communication media. Graphic design graduates effectively integrate abstract thinking skills; communication design theory, history, and methodology; technology; design process; and communication design systems including typography, symbology, and image creation with an understanding of professional practice.

The curriculum in interior design leads to the B.F.A. degree. Emphasis is on the student’s application of the design process to creatively solve problems of the interior environment based on a knowledge of techniques, materials, resources, human factors, and interrelated professional responsibility. Graduates in interior design are competent in visual communication (sketching, drafting and computer aided design), design problem solving, space planning, lighting for interiors, finish and furniture selection, and detailing interior construction. The curriculum is accredited by the Foundation for Interior Design Education Research (FIDER) as providing professional level education.

Students planning toward the B.A. in art and design pursue studies in a related or supporting area by means of a second major, minor, and/or approved program of study that meets the individual needs of a student. Art history, art education, integrated studio arts, pre- graphic design, and pre-interior design courses may be taken to fulfill the art and design program of study.

Students planning a career in art education, preparing for certification to teach art in grades kindergarten through twelve, should matriculate in the art and design curriculum leading to the B.F.A. degree. This sequencing will provide a strong studio background. Many requirements for teacher certification are course options within general education requirements. Students should work closely with a department adviser in planning their program of study to maximize their ability to meet entrance requirements to the teacher education program. For general requirements for teacher certification, see College of Education.

Transfer students with studio credits from other colleges and universities must present, for department review, a portfolio of work done in those courses in order to have the credits apply toward specific studio requirements. Students are advised to present this portfolio of work upon admission and prior to registration for classes.

A fee will be assessed when field trips are indicated. In many courses, fees for materials are required.

The department offers no minor but participates in the undergraduate minor in design studies.

Graduate Study

The department offers work for the degrees master of arts in art and design, and master of fine arts in graphic design, integrated visual arts, and interior design. Degree specializations leading to the master of arts degree are available in art education and interior design. Graduates have a broad understanding of visual communication, problem solving, and interdisciplinary studies.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Graduate students in the art education specialization leading to the M.A. degree participate in a 30 credit program of study which is linked...
with the New Art Basics research project. If they do not hold teacher certification, students may work toward acquiring this as part of their graduate study. A creative component is required for the master of arts degree and is fulfilled through individually focused discipline-specific classroom research, culminating in a written summary of research results. Graduates with a specialization in art education are competent as reflective teachers, experienced in applied, qualitative research in the K-12 classroom. Graduates gain a deep understanding of the New Art Basics approach to visual thinking skills and global, multicultural, visual arts education, with a learner-centered focus.

The master of arts program in interior design requires a minimum of 34 credits including an art and design seminar, a studio concentration, a history/criticism course, elective courses outside the department, and completion of a thesis or thesis-exhibition. Graduates in interior design selecting the M.F.A. degree focus on research.

The master of fine arts programs in graphic design and interior design require a minimum of 60 credits while the program in integrated visual arts requires a minimum of 61 credits including an art and design seminar, a studio concentration, history and criticism courses, a teaching practicum, elective courses outside the department or area of study, and the completion of a thesis-exhibition or thesis.

The M.F.A. thesis-exhibition is composed of two parts, a substantial exhibition and a written statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A thesis may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

Master of Fine Arts graduates in graphic design are skilled in communication design, problem solving, and are adept in the use of visual language and symbology. Graduates are proficient in the design of communications, the use of technologies that incorporate human interaction with environments, objects, electronic and traditional publications.

Interior Design graduate students selecting the M.F.A. are proficient in visual communication skills, design theory, and space planning. The M.F.A. degree is considered a terminal degree in the interior design field.

Integrated Visual Arts MFA graduates have skills that link traditional studio disciplines with emerging technologies. Graduates are prepared as visual artists to enter studio research, business, higher education or new interdisciplinary fields. The MFA is recognized as the terminal degree.

Credit earned at Iowa State University or other institution for the master of arts degree may be applied toward the master of fine arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students’ progress in their programs of study.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Art and Design, College of Design, Iowa State University, Ames, Iowa 50011-3092.

Courses open for nonmajor graduate credit:

Art (Art) Courses Primarily for Undergraduate Students

Art 110, Orientation to Art and Design. (1-0) Cr. R. F.S. Overview of the department and university with special emphasis on curricula, program planning, and study skills. Advising, policy and procedures, student services. Offered on a satisfactory-fail grading basis only.

Art 130, Drawing I. (1-0) Cr. 3. F.S.SS. The introductory course in drawing, focusing on the fundamentals of drawing from observation. Subject matter may include working from the still life, architectural settings, landscape and the human figure. Line, shape, perspective and value studies are explored through a variety of drawing media.

Art 230, Drawing II. (0-6) Cr. 3. F.S. Prereq: 130. A continuation of Art 130. (Drawing I). Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media.

Art 292, Dimensions of Art and Design. (Same as Dan S 292.) (3-0) Cr. 3. F.S. The work of the artist and designer through an examination of the design process, artistic style, and selected art and design forms. Cross-cultural viewpoints and issues of diversity in relation to the visual arts and design fields. Primarily for nonmajors. Offered on a satisfactory-fail grading basis only.

Art 494, Art and Design in Europe Seminar. (1-0) Cr. 1. Prereq: Permission of instructor and planned enrollment in 495. Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail grading basis only.

Art 495. Art and Design in Europe. (DUAL Listed with 495.) Cr. 3. F.S.SS. Prereq: 494, permission of instructor. International study abroad program in Western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Tour expenses to be paid by the student.

A. Fine Arts
G. Graphic Design
I. Interior Design
N. Art History

Art 496. Art and Design Field Study. Arr. Cr. R. Prereq: Enrollment in an art and design studio or art history course, permission of instructor. Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Offered on a satisfactory-fail basis. May be repeated.

Art 497. Studio Internship. Arr. Cr. 1 to 6 each time taken, maximum of 6. F.S.SS. Prereq: Advanced classification in a department curriculum. Written approval of supervising instructor and department chair on required form in advance of semester of enrollment. Supervised experience with a cooperating artist or studio. Offered on a satisfactory-fail grading basis only.

Art 498. Museum/Gallery Internship. Arr. Cr. 1 to 6 each time taken, maximum of 6. F.S.SS. Prereq: Advanced classification in a department curriculum. Written approval of supervising instructor on required form in advance of semester of enrollment. Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail grading basis only.

Art 499. BFA Seminar and Exhibition. Arr. Cr. 2. S. Prereq: Senior classification in the Art and Design-BFA curriculum, portfolio review and written approval of supervising instructor on required form in advance of semester of enrollment. Participation in a group exhibition. Statement of artistic philosophy and career goals; resume development; assembly of final portfolio of work. As the capstone course in the BFA degree program, the work in this class will reflect an integration of the media, processes, historical and theoretical components of each student’s individual degree program. Students should enroll in this course the spring semester prior to completion of the BFA degree.

Courses Primarily for Graduate Students, open to qualified undergraduate students

Art 501. Art and Design Seminar. (3-0) Cr. 3. F.S. Prereq: Permission of instructor. Presentation and discussion of basic issues in contemporary art and design.

Art 511. Seminar in Teaching. (3-0) Cr. 3. Alt. S, offered 2003. Prereq: Graduate classification. Readings and discussion of university level design education issues; studio/classroom observation; development of a teaching philosophy; lesson planning and presentation.

Art 595. Art and Design in Europe. (DUAL Listed with 495.) Arr. Cr. 3. Prereq: Graduate classification, 494 or equivalent; permission of instructor. International study abroad program in Western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Tour expenses to be paid by the student.

A. Fine Arts
G. Graphic Design
I. Interior Design
N. Art History

Art 598. Museum/Gallery Internship. Arr. Cr. 1 to 6 each time taken, maximum of 6. F.S.SS. Prereq: Graduate classification and permission of instructor. Written approval in advance of semester of enrollment. Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail grading basis only.
Courses for Graduate Students

Art 605. Research Methods. (3-0) Cr. 3. Prereq: Permission of instructor. Research strategies related to fine art and technology. Application of selected methods to specific issues.

Art 607. Intermedia. (0-6) Cr. 3. Exploration and application of media with various materials, methods and ideas.

Art 608. Advanced Computer-Aided Art and Design. (0-6) Cr. 3. Prereq: Permission of the instructor. Computer application applied to specific MFA studio concentration.

Art 698. Current Issues in Art and Design. Cr. 1 to 3, each time. Prereq: Permission of chair of graduate program. Selected issues in contemporary art and design. Topics and readings vary each time offered.

Art Education (ArtEd)

Courses Primarily for Undergraduate Students

ArtEd 211. Introduction to Art Education. (0-6) Cr. 3. F. S. Design art experiences for the K-12 classroom. Hands-on discipline specific and integrated art activities; emphasis on thinking skills.

ArtEd 313. Practicum: Art Education. Art. Cr. 1 each time taken, maximum of 3. F. S. Prereq: Credit or enrollment in 211, permission of instructor in advance of semester of enrollment. Field experience in K-12 or community art education program.

ArtEd 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed art and/or education coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. H. Honors

Courses Primarily for Graduate Students, open to qualified undergraduate students

ArtEd 513. Introduction to New Art Basics. Cr. 3 or may be taken for CEU credit. SS. Prereq: Permission of instructor. Taught entirely on the World Wide Web. Students, open to qualified undergraduates. Application of media with various materials, methods and ideas; emphasis on discipline-specific thinking skills. Some sections will be taught entirely on the World Wide Web.

ArtEd 514. Multicultural Perspectives. (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Understanding the nature, roles, and functions of the visual arts. Designing methodology for effective classroom instruction in human, cultural, and historical contexts. Design of discipline-specific thinking skills strategies. Some sections will be taught entirely on the World Wide Web.

ArtEd 515. Visual Thinking Skills Education. (0-0) Cr. 3. S. Prereq: Credit or enrollment in 513, admission to the graduate program in art education. Using theory to inform and direct the design of classroom activities and interactive classroom techniques for promoting visual ideation. Experience in applied teaching research at classroom based research site.

ArtEd 516. Classroom Research Seminar. (3-0) Cr. 3. F. Prereq: Credit or enrollment in 514, 515. Classroom based research theory and practice. Review of literature for individual research in visual education. Focused graduate research pilot project in K-12 classroom.

ArtEd 517. Teaching Practicum. Art. Cr. 3 to 6, maximum of 6. S. Prereq: 516, all courses in the art education program; advanced registration required. Supervised experience and individually designed applied research in teaching art in elementary school.

ArtEd 518. Teaching Practicum. Art. Cr. 3 to 6, maximum of 6. S. Prereq: Credit or enrollment in 516, all courses in the art education program; advanced registration required. Supervised experience and individually designed applied research in secondary school.

ArtEd 590. Special Topics. Cr. art. Prereq: Bachelor’s degree in art and/or design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.

ArtEd 593. Workshop. Cr. 1 to 3 each time taken. SS. Prereq: Graduate classification, evidence of satisfactory experience in area of specialization. Intensive exploration of art education related topic. Topics vary each time offered.

ArtEd 599. Creative Component. Cr. var. Prereq: Concurrent enrollment or credit in 517 and 518. Individually focused discipline-specific applied classroom room. Written summary of research; exhibition of research results.

Graphic Design (ArtGr)

Courses Primarily for Undergraduate Students

ArtGr 177. Introduction to Graphic Design. (2-0) Cr. 2. S. Prereq: Art 108, credit or enrollment in Art 109, 130, Dan S 121. Historical, cultural, and social issues related to the practice of visual communication.

ArtGr 270. Graphic Design Studio I. (0-6) Cr. 3. F. Prereq: Art 109, 130, ArtGr 177, Dan S 121, enrollment in 275; admission to the graphic design program through department review. Basic design concepts and color principles used for visual communication. Conceptual and analytical thinking skills through projects and discussions. Decision making for effective visual communication.

ArtGr 275. Graphic Technology I. (0-4) Cr. 2. F. Prereq: enrollment in 270. Basic computer skills for graphic design.

ArtGr 276. Graphic Technology II. (0-4) Cr. 2. S. Prereq: Credit or enrollment in 275, enrollment in 271. Basic computer skills for graphic design.

ArtGr 277. Graphic Design Internship Seminar. (1-0) Cr. 1. F. Prereq: Credit or enrollment in 270, 275. Procedural and ethical concerns related to the graphic design internship. Personal goals, preparation of résumé and plans for internship. Offered on a satisfactory-fail grading basis only.

ArtGr 370. Graphic Design Studio III. (0-6) Cr. 3. F. Prereq: Credit or enrollment in 270, enrollment in 276. Design and creation of images and symbols for communication. Application and integration of typography with images and symbols.

ArtGr 371. Graphic Design Studio IV. (0-6) Cr. 3. S. Prereq: Credit or enrollment in 370, 387. Enrollment in a 2-credit option. Design and creation of images and symbols for communication. Application and integration of typography with images and symbols.

ArtGr 372. Graphic Design Materials and Processes. (2-0) Cr. 2. S. Prereq: Credit or enrollment in 371. Lecture about the processes and materials involved in graphic design arts reproduction. Course covers pre-press, paper selection and specification, ink systems, type systems and fonts, output technology, printing presses and bindery operations.

ArtGr 378. Critical Issues in Graphic Design. (2-0) Cr. 2. F. Prereq: Credit or enrollment in 370. Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ArtGr 387. Graphic Design History/Theory: Criticism I. (Dual-listed with 588.) (3-0) Cr. 3. S. Prereq: Credit or enrollment in 370, S 121. Late nineteenth century to the 1960s, to provide understanding of the development and character of graphic design. Influential forces, artists, and designers. Nonmajor graduate credit.

ArtGr 388. Graphic Design History/Theory: Criticism II. (Dual-listed with 588.) (3-0) Cr. 3. S. Prereq: Credit or enrollment in 370, S 121. Late nineteenth century to the 1960s, to provide understanding of the development and character of graphic design. Influential forces, artists, and designers. Nonmajor graduate credit.

ArtGr 470. Graphic Design Studio V. (0-6) Cr. 3. F. Prereq: Credit or enrollment in a 2-credit option. Advanced design systems as applied to corporate identity and environmental graphic design. Symboleology as an integrated component of communication systems.

ArtGr 471. Graphic Design Studio VI. (0-6) Cr. 3. S. Prereq: Credit or enrollment in a 2-credit option. Exploration of theoretical and conceptual concerns of visual communication. Portfolio preparation.

ArtGr 472. Photographic Art Direction. (Dual-listed with 572.) (0-4) Cr. 2. Prereq: 271, 276, enrollment in 370 or 371, or 470 or 471. Photography as a graphic design component. Compositional and conceptual elements in photographic images. Must have a camera with adjustable shutter speeds and lens openings.

ArtGr 473. Time Based Multi-Media. (Dual-listed with 573.) (0-2) Cr. 2. Prereq: Credit or enrollment in 370 or 470. The design of visual, audio and written communication for electronic media.

ArtGr 474. Exhibition Design. (Dual-listed with 574.) (0-4) Cr. 2. Prereq: 271, 276, enrollment in 370 or 371, or 470 or 471. Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 475. Advanced Typography. (Dual-listed with 575.) (0-4) Cr. 2. Prereq: 271, 276, enrollment in 370 or 371 or 470 or 471. Typographic theory exploring traditional and nontraditional forms, both historical and contemporary typographic achievements.

ArtGr 476. Graphic Design Methodology. (0-4) Cr. 2. Prereq: 271, 276, enrollment in 370 or 371 or 470 or 471. Analysis and application of scientific, systemic, and nontraditional problem-solving and problem solving techniques.

ArtGr 477. Graphic Design Practicum. (0-6) Cr. 2 each time taken, maximum of 4. Prereq: Credit or enrollment in 370, portfolio review and permission of instructor. Graphic design outreach and problem solving. Individual and group projects for non-profit clients selected by the instructor.

ArtGr 478. Web Design for E-Commerce/Graphic Applications. (Dual-listed with 578.) (0-4) Cr. 2. S. Prereq: Credit or enrollment in 371. The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ArtGr 479. Environmental Graphics. (Dual-listed with 579.) (0-4) Cr. 2. Prereq: 271, 276, enrollment in 370 or 371 or 470 or 471. Functional and aesthetic implications of environmental communication. Way-finding systems such as transportation graphics, architectural signage. Environmental graphics for community or corporate identity systems.

ArtGr 480. Graphic Design Internship. Art. Cr. 3. S. Prereq: Credit or enrollment in 370, portfolio review and permission of instructor. Graphic design experience in an off-campus professional environment.
ArtGr 481. Graphic Design Professional Practices. (3-0) Cr. 3. F. Prereq: Credit or enrollment in 470. Professional design management; ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures.

ArtGr 482. Professional Presentation. (0-4) Cr. 2. S. Prereq: Credit or enrollment in 471. Required for all students enrolled in 471. Exploration and development of the graphic design portfolio and resume in electronic, print, and photographic form.

ArtGr 484. Selected Studies in Graphic Design. Cr. 1 to 3 each time taken, maximum of 9. Prereq: Permission of instructor. Special issues related to graphic design topics. Literature review each time offered.

ArtGr 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed related compositional and conceptual elements appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

A. Theory, Criticism, and Methodology
B. Two-Dimensional Design
C. Three-Dimensional Design
H. Honors
I. Internship/Cooperative (in-depth experience other than ArtGr 480, satisfactory-fail only)

ArtGr 491. Publication Design: Magazines. (0-4) Cr. 2. F. Prereq: Credit or enrollment in 470. The philosophy concepts and structures of magazine design.

ArtGr 492. Publication Design: Books. (0-4) Cr. 2. S. Prereq: Credit or enrollment in 471. The philosophy, concepts and structures of book design.

ArtGr 493. Workshop. Cr. 1 to 3 each time taken. Prereq: Evidence of satisfactory experience in area of specialization. Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses Primarily for Graduate Students, open to qualified undergraduate students

ArtGr 570. Advanced Studies in Visual Communication. (0-6) Cr. 3. F. Prereq: Graduate classification. Theory and investigation of systems, structures, principles of visual organization, and typography for communication. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ArtGr 571. Signs, Symbols, Images. (0-6) Cr. 3. S. Prereq: 570. Investigation and application of signs, symbols and semiotic theory for communication. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ArtGr 572. Photographic Art Direction. (Dual-listed with 472.) (0-4) Cr. 2. Prereq: Graduate enrollment. Photography as a graphic design component.

Compositional and conceptual elements appropriate to photographic images. Must have a camera with adjustable shutter speeds and lens openings.

ArtGr 573. Time Based Multi-Media. (Dual-listed with 473.) (0-4) Cr. 2. F. Prereq: Graduate enrollment. The design of visual, audio and written communication for electronic media.

ArtGr 574. Exhibition Design. (Dual-listed with 474.) (0-4) Cr. 2. Prereq: Graduate enrollment. Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 575. Advanced Typography. (Dual-listed with 475.) (0-4) Cr. 2. Prereq: Graduate enrollment. Typographic theory exploring traditional and nontraditional forms both historical and contemporary typographic achievements.

ArtGr 578. Design for E-Commerce/Graphic Applications. (Dual-listed with 478.) (0-4) Cr. 2. S. Prereq: Graduate enrollment. The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ArtGr 579. Environmental Graphics. (Dual-listed with 479.) (0-4) Cr. 2. Prereq: Graduate enrollment. Functional and aesthetic implications of environmental communications. Way-finding systems such as transportation graphics, architectural signage. Environmental graphics for community or corporate identity systems.

ArtGr 584. Selected Studies in Graphic Design. Cr. var. Prereq: Graduate classification, permission of instructor. Late twentieth century to the 1980s, to provide understanding of the development and character of graphic design. Influential forces, artists, and designers.

ArtGr 588. Graphic Design History/Theory/Criticism II. (Dual-listed with 388.) (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. Theory and history of contemporary graphic design including designers of the 1960s - present. Analysis of the way new materials and technology are leading to present design forms.

ArtGr 590. Special Topics. Cr. art. Prereq: Bachelor’s degree in graphic design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment. A. Theory, Criticism, and Methodology
B. Two-Dimensional Design
C. Three-Dimensional Design

ArtGr 591. Publication Design: Magazines. (Dual-listed with 491.) (3-0) Cr. 3. F. Prereq: Graduate enrollment. The philosophy, concepts and structures of magazine design.

ArtGr 592. Publication Design: Books. (Dual-listed with 492.) (0-4) Cr. 2. S. Prereq: Graduate enrollment. The philosophy, concepts and structures of book design.

ArtGr 593. Workshop. Cr. 1 to 3 each time taken. Prereq: Graduate classification; evidence of satisfactory experience in area of specialization. Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses for Graduate Students

ArtGr 672. Graphic Design and Human Interaction. (0-6) Cr. 3 each time taken, maximum of 10. Prereq: 570. Exploration and design of the interface/interaction with products, systems, and technologies of contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, packaging design, and publication design.

ArtGr 690. Advanced Topics. Cr. art. Prereq: MFA classification, permission of instructor.

ArtGr 699. Research. Cr. var. A. Thesis
B. Thesis-Exhibition

Art History (Art H)

Courses Primarily for Undergraduate Students

Art H 181. History of Design. (Same as Dsn S 181.) (3-0) Cr. 3. F.S. Study of issues and artifacts, their relation to the traditional and changing role of the creators, and to western European and American culture.

Art H 280. History of Art I. (Same as Dsn S 280.) (3-0) Cr. 3. F. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts. From prehistoric through Gothic.

Art H 281. History of Art II. (Same as Dsn S 281.) (3-0) Cr. 3. S. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts. From the Renaissance to the twentieth century.

Art H 376. Environmental Art. (Dual-listed with 576; same as L A 376.) See Landscape Architecture.

Art H 380. North American Indian Art. (Dual-listed with 580; same as Am In 380, Dsn S 380.) (3-0) Cr. 3. Visual art forms of North American Indian people, focusing historical through present day on a variety of major cultural areas and individual artists; emphasis on the cultural context of their artistic production.

Nonmajor graduate credit.

Art H 382. Art and Architecture of Asia. (Dual-listed with 582; same as Dsn S 382.) (3-0) Cr. 3. Alt. S., offered 2002. A selective survey of art and architecture of the earliest cultures and civilizations from a variety of major Asian traditions, chiefly India, China, Japan, Sri Lanka, Cambodia, and Indonesia. Nonmajor graduate credit.

Art H 383. Greek and Roman Art. (Dual-listed with 583; same as Dsn S 383.) (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries. Nonmajor graduate credit.

Art H 386. Baroque and Rococo Art. (Dual-listed with 586; same as Dsn S 486.) (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts; eighteenth and nineteenth centuries. Nonmajor graduate credit.

Art H 394. Women in Art. (Dual-listed with 594; same as Dsn S 494, W S 494, W 394.) (3-0) Cr. 3. Alt. S., offered 2003. Lives, careers, and achievements of women artists and the related cultural environment from the Middle Ages to contemporary times in Europe and America. Feminist movement in the 1970s and specifically feminist issues in art that are becoming widespread in the artistic culture. Nonmajor graduate credit.

Art H 481. Art and Architecture of India. (Dual-listed with 581; same as Dsn S 481.) (3-0) Cr. 3. Alt. F., offered 2001. South Asian art and architecture from earliest times to the present day. Development of style; social uses and symbolism that give imagery its meaning. Nonmajor graduate credit.

Art H 487. Nineteenth Century Art. (Dual-listed with 587; same as Dsn S 487.) (3-0) Cr. 3. Alt. S., offered 2002. European and American art and architecture from 1780 to 1900 focusing on the major monuments of western Europe: Neo-Classicism, Romanticism, Realism, American Art, and Post-Impressionism. Nonmajor graduate credit.

Art H 488. Modernism and Modern Art: 1880-1945. (Dual-listed with 588; same as Dsn S 488.) (3-0) Cr. 3. F. Painting, sculpture, crafts, architecture, photography, and cinema from Post-Impressionism to Surrealism. Nonmajor graduate credit.

Art H 489. European and American Art: 1945-1970. (Dual-listed with 589; same as Dsn S 489.) (3-0) Cr. 3. Painting, sculpture, crafts, architecture, photography, cinema and video in the post war period. Nonmajor graduate credit.

Art H 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed an artistic coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. H. Honors.

Art H 495. Contemporary Art and Theory Since 1970. (Dual-listed with 595; same as Dsn S 495.) (3-0) Cr. 3. Visual arts and art theory since 1970 to the present. Nonmajor graduate credit.

Art H 496. History of Photography. (Dual-listed with 596; same as Dsn S 496.) (3-0) Cr. 3. F. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.
Art H 498. Selected Topics in Art History. (Dual-listed with 598; same as Dsn S 498.) (3-0) Cr. 3 each time taken, maximum of 9. Specialized study in the history or criticism of art and/or design.

Courses Primarily for Graduate Students, open to qualified graduate students

Art H 576 Environmental Art. (Dual-listed with 376; same as L A 576.) See Landscape Architecture.

Art H 580. North American Indian Art. (Dual-listed with 380; same as Dsn S 580.) (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. South Asian art and architecture from earliest times to the present day. Development of style; social uses and symbolism that give imagery its meaning.

Art H 582. Art and Architecture of Asia. (Dual-listed with 382; same as Dsn S 582.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Graduate classification, permission of instructor. Selective history of visual imagery from a variety of major Asian traditions, chiefly India, China, Japan, Korea, Egypt, the Islamic and Indochinese worlds, and Indonesia.

Art H 583. Greek and Roman Art. (Dual-listed with 383; same as Dsn S 583.) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: Graduate classification, permission of instructor. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

Art H 585. Renaissance Art. (Dual-listed with 385; same as Dsn S 585.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

Art H 586. Baroque and Rococo Art. (Dual-listed with 386; same as Dsn S 586.) (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, architecture, and crafts; seventeenth and eighteenth centuries.

Art H 587. Nineteenth Century Art. (Dual-listed with 487; same as Dsn S 587.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Graduate classification, permission of instructor. European and American art and architecture from 1870 to 1900, focusing on the major monuments of western Europe: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

Art H 588. Modernism and Modern Art: 1880-1945. (Dual-listed with 488; same as Dsn S 588.) (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Painting, sculpture, crafts, architecture, photography, and cinema from Post-Impressionism to Surrealism.

Art H 589. European and American Art: 1945-1970. (Dual-listed with 489; same as Dsn S 589.) (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Painting, sculpture, crafts, architecture, photography, cinema and video in the postwar period.

Art H 590. Special Topics, Cr. arr. Prereq: Bachelor’s degree in art and/or design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.

Art H 595. Contemporary Art and Theory Since 1970. (Dual-listed with 495; same as Dsn S 595.) (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Visual arts and critical theory from 1970 to the present.

Art H 596. History of Photography. (Dual-listed with 496; same as Dsn S 596.) (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Survey of the development of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

Art H 598. Selected Topics in Art History. (Dual-listed with 498; same as Dsn S 598.) (3-0) Cr. 3 each time taken, maximum of 9. Prereq: Graduate classification, permission of instructor. Specialized study in the history or criticism of art and/or design.

Integrated Studio Arts (ArtIS) Courses Primarily for Undergraduate Students

ArtIS 202. Calligraphy. (0-6) Cr. 3. F. S. Prereq: Art 108 and 130 or equivalent design/drawing course work. Direct stroke letters for calligraphy. Applied design applications.

ArtIS 208. Color. (0-6) Cr. 3. F. S. Prereq: Art 108 and 130 or equivalent design/drawing coursework. The impact of changing visual relationships emphasizing color concepts. Pigment mixing and interaction exercises, using various pigment and colorants. Focus on the principles of color and color concepts. Pigment mixing and interaction exercises.

ArtIS 220. Wood Design I. (0-6) Cr. 3. F. S. Wood as a design medium. Design and creation of wooden forms, visual communication and hand processes.

ArtIS 224. Jewelry and Decorative Metallsmithing I. (0-6) Cr. 3. F. S. Design of jewelry and metal objects using basic construction techniques.

ArtIS 229. Design Through Photography I. (0-6) Cr. 3. F. S. Photography as a medium of design, expression and communication. Camera used and a combination of traditional, non-traditional and electronic photographic processes. Must have a camera with manual exposure controls.

ArtIS 238. Painting I. (0-6) Cr. 3. F. S. Prereq: Art 230. Painting using acrylic and/or oil media.

ArtIS 301. Foundations of Visual Literacy. (Same as BPM I 326.) (0-6) Cr. 3. F. S. Prereq: Application of basic visual literacy, including presentation and field trips. Furthermore, the study of visual literacy, including presentation and field trips. Furthermore, the study of visual literacy, including presentation and field trips.

ArtIS 324. Jewelry and Decorative Metallsmithing II. (0-6) Cr. 3. F. S. Prereq: Art 224. Design of jewelry and hollow forms combining traditional and contemporary methods.

ArtIS 325. Craft Design Seminar. (0-2) Cr. 3. Alt. F., offered 2003. Prereq: 3 credits in craft design. Contemporary issues in craft design through lectures, presentations, and field trips.

ArtIS 326. Introduction to Illustration. (Same as BPM I 326.) (0-6) Cr. 3. F. S. Prereq: Application of painting, drawing, and design techniques to communication. Development of technical facilities in a variety of illustration media. The past and current state of illustration and the role of typographic and its integration with illustration. Digital and print production techniques.

ArtIS 327. Illustration as Communication and Interpretive Expression. (Same as BPM I 327.) (0-6) Cr. 3. S. Prereq: Art 326. Studio problems in illustration covering editorial, advertising, and narrative expression. Problem solving methodologies.

ArtIS 329. Design Through Photography II. (0-6) Cr. 3 each time taken, maximum of 9. F. S. Prereq: JF 309 and 310 or equivalent photography course. Photography as a viable medium of art and design. Combination of concepts and processes taught in ArtIS 229. Must have camera with manual exposure controls.

ArtIS 335. Three-Dimensional Studio. (Same as Arch 335.) (0-6) Cr. 2 each time taken, maximum of 8. S. F. Prereq: 12 credits in art and design and 3 credits in the biological sciences. Studio fundamentals and fundamentals of traditional and contemporary biological rendering techniques. Emphasis on tools and materials.

ArtIS 337. Application of Biological Illustration Techniques. (Same as BPM I 337.) (0-3) Cr. 3 each time taken, maximum of 6. S. Prereq: 6 credits in art and design and 3 credits in the biological sciences. Studio and fundamentals of traditional and contemporary biological rendering techniques. Emphasis on tools and materials.
ArtIS 434. Fiber Forms. (0-6) Cr. 3. F.S. Three-dimensional contemporary fiber construction. Visual problem-solving and conceptual idea development using processes and techniques such as knotting, wrapping, plaiting, netting, felting, sculptural fabric manipulation, and basketry.

ArtIS 344. Weaving. (0-6) Cr. 3. Color and pattern development through interlocking yarns. Floor loom and frame loom fabric construction.

ArtIS 345. Fiber and Fabric Design. (0-6) Cr. 3. F. Shaped, patterned, manipulated, and embellished textiles using contemporary and traditional yarn, thread, and cloth techniques.

ArtIS 346. Resist and Dyed Fabric Design. (0-6) Cr. 3. F. Two- and three-dimensional problems in visual imagery using dye and resist processes.

ArtIS 347. Printed Fabric Design. (0-6) Cr. 3. F.S. Repeat pattern and overlapping transparent colors for fabric design using screenprinting and direct application of pigments.

ArtIS 356. Relief Printmaking. (Dual-listed with 556.) (0-6) Cr. 3 each time taken, maximum of 9. F. Prereq: Art 230. Woodcut and linoleum cut printmaking processes in black and white, multiblock color, and reduction color printing. Collographs and forms of relief printmaking used separately and in combination with woodcuts.

ArtIS 357. Monotype. (Dual-listed with 557.) (0-6) Cr. 3 each time taken, maximum of 9. F. Prereq: Art 230. Monoprint and monotype processes: black and white color techniques. Basic knowledge, production procedures, and drawing skills applied to metal plate lithography.

ArtIS 408. Computer-aided Art and Design. (Dual-listed with 508.) (0-6) Cr. 3 each time taken, maximum of 12. F.S. Prereq: Art 230. Intaglio printmaking processes. Basic knowledge and production procedures, drawing, and printing skills.

ArtIS 419. Wood Design III. (Dual-listed with 520.) (0-6) Cr. 3 each time taken, maximum of 12. F. S. Prereq: 320. Independent design and creation of furniture forms. Research and development of furniture forms utilizing innovative processes. Nonmajor graduate credit.

ArtIS 422. Ceramics III. (Dual-listed with 522.) (0-6) Cr. 3 each time taken, maximum of 12. F.S. Prereq: 322. Form and surfaces; historical research. Personal directions in advanced ceramic processes and concepts. Nonmajor graduate credit.

ArtIS 424. Jewelry and Decorative Metalsmithing III. (Dual-listed with 524.) (0-6) Cr. 3 each time taken, maximum of 12. F.S. Prereq: 324. Design of jewelry and hollow forms using construction techniques. Nonmajor graduate credit.

ArtIS 430. Drawing IV. (Dual-listed with 530.) (0-6) Cr. 3 each time taken, maximum of 9. F.S. Prereq: Art 330. Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

ArtIS 438. Painting III. (Dual-listed with 538.) (0-6) Cr. 3 each time taken, maximum of 9. F.S. Prereq: 338. Figurative and/or non-figurative painting with advanced work in media, composition, and theory. Nonmajor graduate credit.

ArtIS 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: Written approval of instructor and department chair on required form in advance of satisfactory-fail basis. Offered on a graded basis or a satisfactory-fail basis. Individual study. Nonmajor graduate credit.

ArtIS 493. Workshop. Cr. 1 to 3 each time taken. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites. Nonmajor graduate credit.

Courses Primarily for Graduate Students, open to qualified undergraduates

ArtIS 505. Mixed Media. (Dual-listed with 305.) (0-6) Cr. 3 each time taken, maximum of 6. F.S. Prereq: Graduate classification, permission of instructor. Basic knowledge and production skills applied to metal plate lithography.

ArtIS 508. Computer-aided Art and Design. (Dual-listed with 408.) (0-6) Cr. 3 each time taken, maximum of 9. F.S. Prereq: Graduate classification, permission of instructor. The computer, software and related techniques as pliant tool for concept development, communication, exploration of visual vocabulary, as they apply to still and animated imagery. Nonmajor graduate credit.

ArtIS 520. Wood Design Studio. (Dual-listed with 420.) (0-6) Cr. 3 each time taken, maximum of 12. F. S. Prereq: Graduate classification, permission of instructor. Independent design and creation of furniture forms. Research and development of furniture forms utilizing advanced and/or innovative processes. Nonmajor graduate credit.

ArtIS 522. Ceramics Studio. (Dual-listed with 422.) (0-6) Cr. 3 each time taken, maximum of 12. F.S. Prereq: Graduate classification, permission of instructor. Forms and surfaces; historical research. Personal directions in ceramic processes and concepts.

ArtIS 524. Jewelry and Decorative Metalsmithing Studio. (Dual-listed with 424.) (0-6) Cr. 3 each time taken, maximum of 12. F.S. Prereq: Graduate classification, permission of instructor. Design of jewelry and hollow forms using advanced construction techniques.

ArtIS 530. Drawing. (Dual-listed with 430.) (0-6) Cr. 3 each time taken, maximum of 9. F.S. Prereq: Graduate classification, permission of instructor. Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

ArtIS 538. Painting. (Dual-listed with 438.) (0-6) Cr. 3 each time taken, maximum of 9. F.S. Prereq: Graduate classification, permission of instructor. Figurative and/or non-figurative painting with advanced work in media, composition, and theory.

Interior Design (ArtID)

Courses Primarily for Undergraduate Students

ArtID 160. Interior Design Foundations. (3-0) Cr. 3. S. Prereq: Art 10B or equivalent. The profession, issues, and the role of interior design.

ArtID 259. Sophomore Field Study. Cr. 3. Prereq: Enrollment in second year studio course. Exploration of interior design profession such as manufacturers, designers, showrooms and museums. Offered on a satisfactory-fail grading basis only.

ArtIS 547. Fiber/Fabric Studio Problems. (Dual-listed with 447.) (0-6) Cr. 3 each time taken, maximum of 9. S. Prereq: Graduate classification, permission of instructor. Exploration of imagery using woven and surface design processes. Personal development and exploration of ideas.

ArtIS 556. Relief Printmaking. (Dual-listed with 356.) (0-6) Cr. 3 each time taken, maximum of 9. F. Prereq: Graduate classification, permission of instructor. Monoprint and monotype processes: black and white and color techniques. Basic knowledge, production procedures, and drawing skills, experimentation.

ArtIS 557. Monotype. (Dual-listed with 357.) (0-6) Cr. 3 each time taken, maximum of 9. F. Prereq: Graduate classification, permission of instructor. Intaglio printmaking processes. Basic knowledge and production procedures, drawing, and printing skills.
ArID 261. Graphic Communication for Interior Design I. (0-0) Cr. 2. F. Prereq: Admission to the interior design program through program review and enrollment in 265. Shaping of interior design ideas through selection of technical conventions, and design drawing with drafting instruments. Emphasis on drawing layout, line quality, and lettering. Site and structure measurements, dimensioning, multi-view drawings, sections and axonometrics. Use of various rendering media and techniques.

ArID 262. Graphic Communication for Interior Design II. (0-0) Cr. 2. F. Prereq: Admission to the interior design program through program review and enrollment in 265. Perspective drawing, design sketching, materials and light effects, and reflections. Use of various rendering media and techniques.

ArID 263. Graphic Communication for Interior Design III. (1-0) Cr. 3. S. Prereq: 261, enrollment in 267. Computer visualization techniques and applications; projects employing computer graphic methods.

ArID 265. Interior Design Studio I. (1-1) Cr. 4. F. Prereq: Art 109, Art H 181, ArtID 160, 1605, credit or enrollment in 261, 262, 350 or Art 240; admission to the interior design program through department review. Enhanced creative interior design problem solving, compositional theories and graphic communication as applied to the interior design of small-scale environments. Manual visualization techniques.

ArID 267. Interior Design Studio II. (1-0) Cr. 4. S. Prereq: 261, 262, 265, 350 or Art 240, Art H 181, enrollment in 351, 355, 263 and T C 204. Human factors issues including ergonomics, human behavior and the requirements of special groups. Residential interior design and medium scale projects. Detail drawings, and expansion of visualization techniques.

ArID 350. Interior Systems I. (4-0) Cr. 4. Prereq: Admission to the interior design program through department review. Structural principles, mechanical systems, and standard construction methods as related to interior design.

ArID 351. Interior Systems II. (2-2) Cr. 3. S. Prereq: 265, 350 or Art 240. Manufactured furniture, interior finishes and related selections. Selection criteria and written specifications.

ArID 352. Interior Systems III. (3-0) Cr. 3. F. Prereq: 351 and enrollment in 356. Light and color related to interior spaces. Lighting principles, and techniques to implement lighting design objectives.

ArID 355. Interior Design History/Theory/Criticism I. (3-0) Cr. 3. S. Prereq: Art H 181. Stylistic evaluation of interior finished spaces, finishes, and decorative arts, from a critical, historical and multicultural perspective. Nonmajor graduate credit.

ArID 356. Interior Design History/Theory/Criticism II. (3-0) Cr. 3. F. Prereq: Art H 181. Theoretical approaches to the design of interior space, from a critical, historical and multicultural perspective, including late twentieth century. Nonmajor graduate credit.

ArID 359. Junior Field Study. Cr. R. F. Prereq: Enrollment in third year studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, designers, showrooms, museums. Offered on a satisfactory-fail grading basis only.

ArID 365. Interior Design Studio III. (1-0) Cr. 4. F. Prereq: 263, 267, 351, T C 204, enrollment in 352 and 356. Formal methods of design programming and problem identification. Also includes conceptualization and problem solving related to work environments and special populations. Large scale projects. Alternative manual and computer-based visualization methods. Teamwork.

ArID 368. International Study Orientation Seminar. (1-0) Cr. 1. Prereq: 365, permission of instructor and planned enrollment in Rome study option. History and contemporary architecture and interior design, customs and traditions of Rome and related travel itinerary locations. Required of students participating in the interior design international study option. Offered on a satisfactory-fail grading basis only.

ArID 369. Interior Design Internship Seminar. (1-0) Cr. 0.5, to be repeated for 1 credit. F.S. Prereq: Enrollment in third year studio course. Procedural and ethical concerns relating to interior design internship. Preparation of placement credentials and formulation of personal goals. Internship plans and agreements offered on a satisfactory-fail basis only.

ArID 459. Senior Field Study. Cr. R. Prereq: Enrollment in fourth year studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, designers, showroom, study excursions. Offered on a satisfactory-fail grading basis only.

ArID 460. Interior Design Internship. Arr. Cr. 3. S. Prereq: Satisfactory completion of all 300-level interior design coursework, T C 204, and Art 240. Professional internship experience.

ArID 461. Interior Design Professional Practicum. (2-0) Cr. 2. S. Prereq: 460. Organization and general management of the interior design office: agreements, business procedures, professional ethics.

ArID 463. Housing for the Aging. (Same as HD FS 463.) See Human Development and Family Studies.

ArID 467. Interior Design Studio VI. (1-0) Cr. 4. S. Prereq: 465, credit or enrollment in 464 and all required interior systems and history/theory/criticism courses. Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of individual projects. Current issues in interior design. Nonmajor graduate credit.

ArID 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. H. Honors

ArID 493. Workshop. Cr. 1 to 3 each time taken. SS. Prereq: Evidence of satisfactory experience in area of specialization. Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses for Graduate Students

ArID 466. Research Methods. (3-0) Cr. 3. S. Prereq: Permission of instructor. Research strategies related to interior design. Application of selected methods to specific issues.

ArID 469. Advanced Interior Design. (0-0) Cr. 3 each time taken, maximum of 15. Prereq: Graduate classification. Interior design problem-solving with emphasis on special issues. Project types will include but not be restricted to hospitality, healthcare, institutional, industrial, residential, historic preservation and commercial environments.

ArID 690. Advanced Topics. Cr. arr. Prereq: M.F.A. classification, permission of instructor.

Astronomy and Astrophysics

See Physics.

Bacteriology

See Microbiology.

Biochemistry, Biophysics, and Molecular Biology

Alan M. Myers, Chair of Department

Distinguished Professors: Beitz, Fromm

University Professors: Hammond

Professors: Atherly, Chitnis, Honzatko, Howell, Kostic, Miller, Myers, Nikolau, Nilsen-Hamilton, Robson, Robyt, Strower, Thomas, Thornburg

Professors (Adjunct): Barua

Professors (Collaborators): Meyer, Tabatabai

Distinguished Professors (Emeritus): Brenner, Graves, Metzler

University Professors (Emeritus): Horowitz, White

Professors (Emeritus): Applequist, Tipton

Associate Professors: Buss, Huatt, Shin

Associate Professors (Adjunct): James

Assistant Professors: Andreotti, Culver, Hargrove, Norris

2001-2003 Courses and Programs Biochemistry, Biophysics, and Molecular Biology 155
Undergraduate Study

The department offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in agricultural biochemistry in the College of Agriculture.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technologies; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary medical, and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their studies in a graduate college, medical school, or veterinary medical school.

Graduates of biochemistry, agricultural biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life.

Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in mathematics and physics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

Agricultural Biochemistry Major in the College of Agriculture

For the undergraduate curriculum leading to the degree of bachelor of science, see College of Agriculture, Curricula. Agricultural biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in biochemistry, chemistry, physics, and mathematics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and animal and plant biotechnology.

Biochemistry or Biophysics Majors in the College of Liberal Arts and Sciences

For the undergraduate curriculum leading to the degree of bachelor of science, see Liberal Arts and Sciences, Curriculum. Biochemistry and biophysics are recommended to students whose career interests involve advanced study or employment in biochemistry or biophysics, or in related areas of the biological or medical sciences.

Undergraduate majors in the College of Liberal Arts and Sciences in biochemistry usually have the following basic courses or their equivalents in their programs: BBMB 101, 102, 404, 405 (or 501, 502), 411, 461 or 551; Chem 177M, 177N, 178, 210 (or 211), 211L, 321, 322, 322L, 331, 332, 333L, 334L; Math 165, 166, 265 (or 266); Phys 221, 222; Biol 201, 201L (or 202L or 301L or 302L), 202, 301, 302, and a minimum of 4 additional credits of biological science courses from biology, botany, genetics, microbiology, and zoology. Undergraduate research, BBMB 499, is strongly recommended.

Undergraduate majors in biochemistry usually include the following basic courses in their programs: BBMB 101, 461 or 551; Chem 177L, 177L, 178, 210 (or 211), 321, 321L (or 322L or Phys 311), 322, 331, 332, Math 165, 166, 265, 266; Phys 221, 222, 324 (or 321L), and 232 or Com S 205; Biol 201, 201L (or 202L); Biol 202; and 9 additional credits in 300 or higher level courses in biochemistry, biophysics, biological sciences, chemistry, or physics. BBMB 404, 405 and Biol 301 are recommended in meeting this requirement for students preparing for careers in molecular biochemistry. Students wishing a strong preparation for graduate studies are advised to take undergraduate research and further mathematics courses such as 385 and 465.

These lists of courses should not be regarded as statements of fixed requirements or as complete outlines of the work necessary for the major. They are given solely for the convenience of students or advisers who wish to estimate the amount of basic study that may be needed.

Biochemistry and biophysics majors are advised to meet the College of Liberal Arts and Sciences foreign language requirement with courses in French, German, or Russian. See also the B.S./M.S. program under Graduate Study.

The department offers minors in biochemistry in both the College of Agriculture and the College of Liberal Arts and Sciences, which may be earned by credit in BBMB 404, 405, 311 (or 411), and 451 (or Chem 321), plus additional supporting 300 courses in chemistry or biochemistry for a total of 15 credits.

English proficiency requirement: Majors in agricultural biochemistry must complete Engl 104 and 105 and one course in speech fundamentals with a grade of C or better in each of these courses, and complete a communication-intensive requirement equivalent to 3 credits from courses within the major. Majors in the College of Liberal Arts and Sciences must complete Engl 104 and 105 and one of the following with a grade of C or better: (a) Engl 305, 309, or 314; (b) a written report in BBMB 411, or 499.

Graduate Study

The department offers work for the degrees of master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and developmental biology), plant physiology, and toxicology. Minor work is offered to students taking major work in other departments.

Prerequisite to graduate work is a sound undergraduate background in biology, chemistry, mathematics, and physics. All graduate students are required by the department to teach as part of their training for an advanced degree.

The department offers a B.S./M.S. program in biochemistry that allows students to obtain both the B.S. and M.S. degrees in five years. The program is open to students in the College of Liberal Arts and Sciences and in the College of Agriculture. Students interested in this program should contact the department office for details. Application for admission to the Graduate College should be made near the end of the junior undergraduate (third) year. Students would begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships.

Courses open for nonmajor graduate credit: 404, 405, 411, 420, 451, 461.

Visit our departmental website at //moelbio.edbuhtnil/homepage.htm

Courses Primarily for Undergraduate Students

BBMB 101. Introduction to Biochemical Activities. (1-0) Cr. F. Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 102. Introduction to Biochemistry. (0-2) Cr. 1. S. Prereq: Credit or enrollment in Chem 177 and 177L. Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. May include laboratory experiments as well as literature readings and discussion. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 221. Structure and Reactions in Biochemical Processes. (3-0) Cr. 3. F. Prereq: Chem 163, 167, or 177L. Prerequisites necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry or biophysics. Credit for both 221 and Chem 231 may not be applied toward graduation.

BBMB 301. Survey of Biochemistry. (3-0) Cr. 3. F.S.S.S. Prereq: Chem 231 or 331. A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Not acceptable for credit toward a major in biochemistry or biophysics.

BBMB 311. Biochemistry Laboratory. (1-3) Cr. 2. F. Prereq: Credit or enrollment in 301 or Biol 302. Emphasis on isolation, characterization, and quantification of biological substances. Not acceptable for credit toward a major in biochemistry or biophysics.

BBMB 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

BBMB 404. Biochemistry. (3-0) Cr. 3. F. Prereq: Chem 332. A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins; protein structure; enzymology; carbohydrate metabolism. Credit for both 402 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.
BBMB 405. Biochemistry. (3-0) Cr. 3. S. Prereq: 404. A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Credit for both 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 411. General Biochemical Research Techniques. (1-0) Cr. 3. F. Prereq: Credit or enrollment in 404 or 501. Chem 210 or 211. Introduction to laboratory techniques for studying biochemistry, including: chromatographic methods; electrophoresis, spectrophotometry; enzyme purification; enzyme kinetics, and chromatography of carbohydrates, proteins, lipids, and nucleic acids. Nonmajor graduate credit.

BBMB 420. Physiological Chemistry. (3-0) Cr. 3. F. Prereq: Chem 332, BBMB 301 or Biol 302. Structure and function of enzymes; enzymology and co-enzymes; metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code, relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Not acceptable for credit toward a major in agricultural biochemistry, biochemistry or biophysics. Credit for both 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 451. Physical Biochemistry. (2-0) Cr. 2. F. Prereq: Chem 331, Phys 112 or 222; a previous course in calculus is helpful but not required. Selected topics in physical chemistry in the context of applications to problems in biology, biochemistry and food sciences. Not acceptable for credit toward a major in biochemistry or biophysics. Nonmajor graduate credit.

BBMB 461. Topics in Biochemistry. (2-0) Cr. 2. S. Prereq: 420 or Chem 321 or Phys 204. Biological phenomena viewed as problems in physics, with a focus on structure determination and macromolecular characterization. Nonmajor graduate credit.

BBMB 490. Independent Study. Cr. arr. F.S.S. Prereq: College of Agriculture: junior or senior classification and permission of instructor; a maximum of 9 credits of 490 may be applied toward graduation; College of Liberal Arts and Sciences: permission of instructor; no more than 9 credits of BBMB 490 may be counted toward graduation. H. Honors

BBMB 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

BBMB 499. Undergraduate Research. Cr. 1 to 5. F.S.S.S. Prereq: Permission of staff member with whom student proposes to work. Research under senior staff guidance.

Courses Primarily for Graduate Students, open to qualified undergraduate students.

BBMB 501. Comprehensive Biochemistry. (4-0) Cr. 4. F. Prereq: Chem 210 or 211, 322, and 332; a previous course in biochemistry is strongly recommended. Chemical composition of living matter and the chemistry of life processes. Chemical characterization of amino acids, proteins, carbohydrates and lipids; enzymology and co-enzymes; metabolism of carbohydrates; biological oxidations.

BBMB 502. Comprehensive Biochemistry. (4-0) Cr. 4. S. Prereq: 501. Chemical composition of living matter and the chemistry of life processes. Metabolism of lipids, aminoacids, and nucleotides; membrane biochemistry; biosynthesis of DNA, RNA, and proteins; gene regulation; selected topics.

BBMB 503. Bioorganic Chemistry. (Same as Chem 503) See Chemistry.

BBMB 511. Topics in Experimental Biochemistry. (1-6) Cr. 1 each time taken. F.S. Prereq: Credit or enrollment in 404 or 501, Chem 210L or 211L. Taught as individual one-credit modules. Modules include:
A. Protein Chemistry
B. Radiosotopes in biochemistry
C. Flow cytometry
D. Monoclonal antibodies
E. Special techniques

BBMB 520. Genetic Engineering. (Same as Gen 520) See Zoology and Genetics.

BBMB 531. Structure and Reactivity of Biomolecules. (3-0) Cr. 1. Five weeks. Prereq: Chem 332 Special properties of reactive groups prevalent in biomolecules and reactions commonly encountered in biochemical studies. A study of reaction types and mechanisms in biochemistry.

BBMB 541. Computational Biochemistry. (1-0) Cr. 1. F. Prereq: A previous course in biochemistry is recommended. Computer applications in biochemical research.

BBMB 551. Molecular Biophysics. (3-0) Cr. 3. F. Prereq: Chem 322. An examination of physical methods for the study of molecular structure and organization of biological materials, with emphasis on applications. Spectroscopy, hydrodynamic methods, nuclear magnetic resonance, and X-ray diffraction.

BBMB 581. Seminar. (1-0) Cr. 1. F. Prereq: Permission of instructor. Short presentations by students and discussion on assigned topics. For entering graduate students.

BBMB 590. Special Topics. F.S.S.S. Cr. arr.

BBMB 593. Workshop in Biochemistry and Biophysics. Cr. 1 each time taken. Prereq: Permission of instructor. Graduate workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry.

Courses for Graduate Students

BBMB 615. Molecular Immunology. (Same as Gen 615, Micro 615, V MPM 615.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 405 or 502 or both 404 and 502. Structural and functional properties of lower eukaryotic cells; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

BBMB 632. Kinetics of Enzyme Action. (2-0) Cr. 1 or 2 or 8 weeks. Alt. S., offered 2003. Fromm, Prereq: 501. The one-credit version stresses the fundamentals of enzyme kinetics. Topics include integrated rate equations, methods for deriving initial-rate equations, inhibition, product effects, and methods for verifying kinetic mechanisms. The two-credit version covers the same material plus additional topics such as allosteroy, hysteresis, isotope effects, and complex kinetic mechanisms.

BBMB 675. Nucleic Acid Structure and Function. (Same as Gen 675.) (2-0) Cr. 2. Alt. F., offered 2001. Prereq: 405 or 502. In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 676. Biochemistry of Gene Expression in Eucaryotes. (Same as MCDB 676) (2-0) Cr. 2. Alt. S., offered 2002. Prereq: 404 or 501, 405 or 502 or Gen 511. Staff. Analysis of the biochemical processes involved in expression of eucaryotic genes and the regulation thereof, including RNA polymerase, transcriptional regulatory proteins, enhancers and silencers, chromosome structure, termination, RNA processing, RNA transport, RNA turnover, translational regulation, protein turnover.

BBMB 681. Advanced Seminar. Cr. 1 each time taken. F. S. Prereq: Permission of instructor. Student presentations.

BBMB 696. Seminar in Plant Physiology and Molecular Biology. (Same as Bot 696) See Botany.

BBMB 698. Seminar in Molecular, Cellular, and Developmental Biology. (Same as MCB 698) See Molecular, Cellular, and Developmental Biology.

BBMB 699. Research. Prereq: Permission of instructor.

Undergraduate Study

Courses in bioinformatics and computational biology are offered for undergraduates, but a baccalaureate degree is not offered at this time.

Undergraduates wishing to prepare for graduate study in Bioinformatics and Computational Biology should obtain solid undergraduate training in at least one of the foundation disciplines: molecular biology, computer science, mathematics, statistics, and physics.

Undergraduates should elect courses in basic biology, basic transmission and molecular genetics, chemistry, physics, mathematics at least through calculus, statistics, and computer programming.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Botany; Chemical Engineering; Computer Science; Electrical and Computer Engineering; Mathematics; Physics and Astronomy; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Zoology and Genetics.

The BCB program emphasizes interdisciplinary training in six related areas of focus: Bioinformatics, Functional and Structural Genomics, Genome Evolution, Macromolecular Structure and Function, Mathematical Biology and Computational Modeling, and Metabolic and Developmental Networks. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu.

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 (Graduate Research Rotation), working with three or more different research groups to gain exposure in both “wet” (biological) and “dry” (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

During the first year, all BCB students complete background coursework in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. The total course requirements for Ph.D. students include one core course in Computational Molecular Biology (BCB 594), one core course in Molecular Genetics (e.g., Gen 511, BBMB 5011), and at least 12 credits of advanced coursework in the areas of Molecular Biology (6 credits) and either Computer Science or Mathematics/Statistics (6 credits in one area). Students make research presentations (BCB 691), attend faculty research seminars (BCB 691), and participate in workshops/symposia (BCB 591). M.S. students take the above background and core courses, take at least 12 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu.)

Courses open for nonmajor graduate credit: 494, 495.

Courses Primarily for Undergraduate Students

BCB 484. Computational Mathematics for Biologists. (Same as Math 484.) (3-0) Cr. 3. F. surveys of graph theory, linear algebra, discrete math, and algorithms used in computational biology with examples taken from genomics, phylogenetics, and structure problems. This course provides mathematical background for BCB/Gen/Com S/Math 594.

Nonmajor graduate credit.

BCB 495. Molecular Biology for Computational Scientists. (Same as Gen 495.) (3-0) Cr. 3. F. D. Dobbs. Survey of molecular cell biology and molecular genetics for nonbiologists, especially those interested in bioinformatics/computational biology. Basic cell structure and function; principles of molecular genetics; biosynthesis, structure, and function of DNA, RNA, and proteins; regulation of gene expression; selected topics. Provides biological background for BCB/Gen/Com S/Math 594.

Nonmajor graduate credit. Credit for graduation will not be allowed for more than one of the following: Gen 411 and 495.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students.

BCB 549. Advanced Algorithms in Computational Biology. (Same as Cpr E 549, Com S 549.) See Computer Engineering or Computer Science.

BCB 556. Computational Genomics and Evolution. (Same as Gen 556.) (3-0) Cr. 3. Prereq: Biol 301. Gu. Introduction to evolutionary sequence analysis at the genome level. Topics include sequence alignment, phylogenetic inference, molecular clock analysis, ancestral state inference, sequence/structure relation, functional divergence and prediction, evolutionary development, genome duplication, and comparative genomics. Focus will be on data analysis and biological interpretation.

BCB 590. Special Topics. Cr. var. Prereq: Permission of instructor.

BCB 593. Workshop in Bioinformatics and Computational Biology. (1-0) Cr. 1, each time taken. F.S. Current topics in bioinformatics and computational biology research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

BCB 594. Computational Molecular Biology. (Same as Gen 594, Math 594, Com S 594.) (3-0) Cr. 3. F.S. Prereq: Biol 301 and 302 or Math 304 and 307 (Math 317 may be used in place of 307) or Com S 311 and 330 or equivalent courses. Introduction to the biological background and the algorithms used in sequence comparison and data base search, fragment assembly and physical mapping of DNA, building of phylogenetic trees, analysis of genome rearrangement, and molecular structure prediction. Practice with some of the software commonly used for these problems.

BCB 596. Genomic Data Processing. (Same as Gen 596, Com S 596.) Cr. 3. Prereq: Com S 208 or 228, and Com S 311. Chou. Introduction to major computational methods relevant to modern molecular biology research. Topics include database construction, search and update; data collection and dissipation through Internet; sequence alignment and comparison methods; structure recognition and prediction algorithms; shotgun assembly procedures and algorithms; and scripting languages for linking together an automatic biological data processing pipeline. Focus will be on the analysis and actual implementation of those algorithms.

BCB 599. Creative Component. Cr. var.

Course for Graduate Students

BCB 680. Student Seminar in Bioinformatics and Computational Biology. Cr. 1, each time taken. S. Student research presentations.

BCB 691. Faculty Seminar in Bioinformatics and Computational Biology. (1-0) Cr. 1, each time taken. F. Faculty research series.

BCB 697. Graduate Research Rotation. Cr. var. each time taken. F.S.S. Graduate research projects performed under the supervision of selected faculty members in the Bioinformatics and Computational Biology major.

BCB 699. Research.
Undergraduate Study

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of "communicating science through art," the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, free-lance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 42 credits in design and 32 credits in the biological sciences. Design courses include: Art 130 and 230, ArtDP 233, 238, and 330, BPM I 326, 327, 336, 337, 494, and 497 plus 12 credits chosen from a list of approved upper level courses in art and design. Biological science courses include: Biol 102, 201, 201L, 202, 202L; Bot 306 or 404 or 505; Zool 155, 320, and at least 12 credits chosen from a list of approved biological science courses. Students must earn a grade of C- or better in all art and science courses included in the major and must earn an overall GPA of 2.00 in both categories. A brochure is available in 201 Bessey Hall that gives a detailed listing of the requirements.

English Proficiency Requirement. Students must earn a minimum of C in both English 104 and 105 or equivalent composition courses and in one advanced writing course numbered Engl 302 through 316, excluding 310.

Students in BPM I must complete a senior project or an internship experience in which they design and produce artwork that is suitable for publication or public display.

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses. The biological sciences must include Biol 201, 201L, 202, 202L. The art and design courses must include ArvtS 336 and 337, and an advanced drawing or painting course. For more information, contact the chair of the BPM I Advisory Committee in 201 Bessey Hall.

Courses Primarily for Undergraduate Students

BPM I 326. Introduction to Illustration. (Same as ArtIS 326E.) See Art and Design.

BPM I 327. Illustration as Communication and Interpretive Expression. (Same as ArtIS 327E.) See Art and Design.

BPM I 336. Biological Illustration Principles and Techniques. (Same as ArtIS 336E) (0-6) Cr. 3 each time taken, maximum of 6. F. Prereq: 6 credits in art and design and 3 credits in biological sciences. Studio basics and fundamentals of traditional biological rendering techniques. Emphasis on tools and materials.

BPM I 337. Application of Biological Illustration Techniques. (Same as ArtIS 337E) (0-6) Cr. 3 each time taken, maximum of 6. S. Prereq: 336. Rendering techniques applied to different types of biological subject matter including computer applications. Term project required.

BPM I 395. Field Illustration. Cr. 1 to 3 each time taken, maximum of 6. S.S.S. Prereq: Permission of instructor. A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience.

BPM I 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the program cooperative education coordinator, junior classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

BPM I 435I. Illustrating Nature I. Sketching. (Same as La LL 435I.) See Iowa Lakeside Laboratory.

BPM I 436I. Illustrating Nature II. Photography. (Same as La LL 436I.) See Iowa Lakeside Laboratory.

BPM I 490. Independent Study. Cr. 1 to 3 each time taken, maximum of 3. Prereq: Written approval of instructor and advisory committee chair on required form in advance of semester of enrollment.

BPM I 494. Special Topics in Illustration. Cr. 1 to 3 each time taken. Intensive exploration of illustration techniques in a studio or field setting.

BPM I 497. Illustration Internship. Cr. 1 to 6 each time taken, maximum of 6. Prereq: Junior or senior classification in BPMI, written approval of supervising instructor and advisory committee chair on required form in advance of semester of enrollment. Offered on a satisfactory-fail grading basis only.

Biology

www.biology.iastate.edu

Warren D. Dolphin, Program Coordinator

The biological sciences at Iowa State University are organized into 20 departments and programs. These can be grouped into the basic sciences, agricultural sciences, and veterinary sciences. Well over 200 faculty consider themselves life scientists and most teach courses at the undergraduate and graduate levels. Such a large faculty group provides many opportunities for students to learn from some of the national leaders in biological research and teaching and to participate in exciting, meaningful research projects that explore the frontiers in the life sciences. Few other universities have such a wealth of faculty expertise available to undergraduate students.

Biology is an interdepartmental undergraduate major. Students majoring in Biology are able to integrate knowledge from several life science disciplines into a coherent, broadly based undergraduate program of study. Students who wish to study specific areas of the basic biological sciences should declare majors in animal ecology, biochemistry, bioinformatics, genetics, microbiology, or zoology. Course requirements for these majors are listed elsewhere in this bulletin under the department’s name. Although requirements for biology and related majors differ significantly, the courses taken during the first two years are similar. In particular, all require freshman biology and chemistry, most require calculus and organic chemistry, and all require credits in general education courses. As a result and with proper planning, a student is able to transfer from one basic biological science major to another without serious consequences any time during the first two years. For detailed requirements, see the catalog entries under the particular majors.

The biology major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in the health or environmental professions, or who prefer educational breadth as an end in itself. A bachelor’s degree in biology provides excellent preparation for graduate study in many biological disciplines and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. Students with particular interests can combine biology with a minor or a second major in another area, such as chemistry, environmental studies, a foreign language, journalism, mathematics, or other majors offered by the university.

Undergraduate Study

Of the courses taught by the biology program, Biol 108 is a general presentation of selected biological topics designed primarily for students not majoring in the basic biological sciences. Biol 123, also designed for the non-major, is intended to be an introduction to topics in environmental biology.

A unified biology core serves the various majors in the life sciences. This core consists of six integrated courses with labs that explore the basic principles of the biological sciences. The first year (Biol 201, 202) provides a broad introduction to the nature of life. The second year (Biol 301, 302) provides an integrated foundation in the principles of genetics, cell biology, and elementary biochemistry. The third year (Biol 312, 303) provides an ecological and evolutionary perspective.

A detailed description of the courses required in the biology major is available in 201 Bessey Hall or is available online at the WWW at http://www.biology.iastate.edu. Biology majors take a minimum of 40 credits in the
Biol 201L. Principles of Biology Laboratory. (0-3) Cr. 1. F. S. Prereq: Credit or enrollment in 201. Laboratory to accompany 201.

Biol 202. Principles of Biology II. (3-0) Cr. 3. F. S. Prereq: 201. Introduction to the nature of life, including the cellular basis of life; energy relationships; the nature of heredity; evolution; form and function of microbial, plant, and animal life.

Biol 202L. Principles of Biology Laboratory. (0-3) Cr. 1. F. S. Prereq: credit or enrollment in 202. Laboratory to accompany 202.

Biol 298. Cooperative Education. Cr. R. F. S.S. Prereq: Sophomore classification and permission of the department cooperative education coordinator. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Biol 301. Principles of Genetics. (Same as Gen 301.) (3-0) Cr. 3. F. S. Prereq: 201L and 202L, credit or enrollment in organic chemistry. Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative and population genetics. Students may receive graduation credit for no more than one of the following: 301 and 301L, Gen 260, Gen 301, Gen 320, and Agron 320.

Biol 301L. Genetics Laboratory. (Same as Gen 301L.) (3-0) Cr. 1. F. S. Prereq: Credit or enrollment in 301. Laboratory to accompany 301. Students may receive graduation credit for no more than one of the following: 301 and 301L, Gen 260, Gen 301, Gen 320, and Agron 320.

Biol 302. Principles of Molecular Cell Biology and Biochemistry. (3-0) Cr. 3. F. S. Prereq: 301. Integration of elementary principles of metabolism, bioenergetics, cell structure and function to develop a molecular view of how the cell works.

Biol 302L. Molecular Cell Biology and Biochemistry Laboratory. (0-3) Cr. 1. F. S. Prereq: Credit or enrollment in 302. Laboratory to accompany 302.

Biol 303. Biological Evolution. (Same as Bot 303, Zool 303.) (3-0) Cr. 3. F. S. Prereq: Credit or enrollment in 301. The mechanisms of evolution. Topics in microevolution: population genetics, natural selection, genetic variation, and adaptation. Macroevolution: speciation, extinction, phylogeny, and major evolutionary patterns.

Biol 312. Ecology. (Same as A Ec 312, Bot 312, EnSci 312.) (2-3) Cr. 3. F. S. F. Prereq: 201L and 202L. Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

Biol 312L. Ecology. (Same as la 312L.) See Iowa Lakeside Laboratory.

Biol 374. Insects and Our Health. (Same as Ent 374.) See Entomology. Nonmajor graduate credit.

Biol 394. International Field Trips in Biology. Cr. 1 to 4 each time taken. Prereq: Two courses in the biological sciences and by approval of application. Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in Biology Hall for trip schedule.

A. Pre-trip Seminar. Cr. 1. Discussion of relevant biological and cultural topics during semester preceding trip.
B. Field trip. Cr. 1 to 3. Trip to international location under supervision of faculty member. Report required.

Biol 398. Cooperative Education. Cr. R. F. S.S. Prereq: Junior classification and permission of the department cooperative education coordinator. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Biol 403L. Evolution. (Same as la 403L.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Biol 433L. Developmental Biology Laboratory. (Same as Zool 433L.) See Zoology and Genetics.

Biol 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: 8 credits in biology and permission of instructor. See also 490 offerings in biological science departments. No more than 9 credits in Biol 490 may be counted toward graduation and of those only 6 credits may be applied to the major. I. Iowa Lakeside Laboratory. Cr. 1 to 4 each time taken.

B. Research biological. Cr. 1 to 6 each time taken. For students registering to work on an independent research project under the direction of a faculty member.

U. Laboratory teaching experience. Cr. 1 to 2. For students registering to be undergraduate laboratory assistants. Offered on a satisfactory-fail grading basis only.

Biol 495. Undergraduate Seminar. Cr. 1. F. Prereq: 15 credits in biological science. Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology.

Biol 498. Cooperative Education. Cr. R. F. S.S. Prereq: Senior classification and permission of the department cooperative education coordinator. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses Offered at the Gulf Coast Research Laboratory (GCRL), Ocean Springs, Mississippi

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for the following University of Southern Mississippi courses and transfer them to their ISU degree programs. Written permission of the ISU coordinator for the GCRL, 201 Bessey, is required for this arrangement. Inquire at 201 Bessey for further information.

MAR 301. Marine Biology. Cr. 3. SS. Prereq: 8 semester hours of biological sciences. A general introduction to marine biology with emphasis on local fauna and flora.

MAR 301L. Marine Biology Lab. Cr. 2. SS. Lab to accompany 301.

MAR 457. Marine Science for Teachers. Cr. 2 or 4. SS. Prereq: Permission of instructor. Designed to acquaint teachers with marine and coastal environments.

MAR 457L. Marine Science for Teachers Lab. Cr. 1 or 2. Lab to accompany 457.

Other courses offered at Gulf Coast are listed under Animal Ecology; Botany; Geological and Geophysical Sciences; Zoology and Genetics.

Biomedical Engineering

(Interdepartmental Graduate Program)

The biomedical engineering program (B M E) is interdisciplinary in scope. The participating faculty are from the Colleges of Engineering, Veterinary Medicine, Education and Agriculture. Biomedical engineers are concerned with the application of engineering concepts and analytical techniques to biological and medical problems. They are interested in developing new concepts, instrumentation, and materials for use with living systems. In addition, they seek to understand those phenomena of living systems which have functional capabilities desirable in the design of physical systems. Graduates of the program are able to understand scientific literature, formulate hypotheses, complete independent research or design projects, and report their results. They engage in research or design careers in the various fields of biomedical engineering.

Undergraduate Study

A curriculum leading to a bachelor’s degree in biomedical engineering is not offered. Undergraduate students planning graduate study are encouraged to develop knowledge in subjects prerequisite to biomedical engineering courses. For example, undergraduate students majoring in engineering, physics, or mathematics are encouraged to elect courses in organic chemistry, biochemistry, and biology. Undergraduate students majoring in life science areas should prepare for graduate study by electing courses in mathematics, engineering, and physics.

Graduate Study

Work is offered for the degrees master of science and doctor of philosophy with a major in biomedical engineering; students taking major work in other areas can minor or major in biomedical engineering. Prerequisite to major work in biomedical engineering is an undergraduate degree in one of the fields of engineering, life sciences, physical sciences, or a professional degree in one of the fields of medicine.

The program of formal courses taken by students is oriented toward developing proficiency in research or design in the interdisciplinary field or in utilizing biomedical principles in clinical situations. Selected background and advanced courses from related disciplines are taken in conjunction with appropriate biomedical engineering courses. The program of formal courses varies, depending upon the background and interests of the student, and is determined in consultation with the student’s advisory committee.

Course Primarily for Undergraduate Students

B M E 401. Scope of Biomedical Engineering. (1-0) Cr. D.S.B. 8 weeks. Topical career activities in biomedical engineering. For undergraduate students who wish to become familiar with the field of biomedical engineering. Offered on a satisfactory-fail grading basis only.

Courses Primarily for Graduates

Students, open to qualified undergraduate students

B M E 521. Biomechanics. (Same as E M 521, I E 521.) (3-0) Cr. 3. Alt. F. offered 2001. Prereq: Phys 111 or 221, Math 265. For students with interests in the life sciences, ergonomics, or rehabilitation engineering. Topics include equilibrium, motion, energy, stress and deformation, material properties, flow of fluids, dimensional analysis and modeling of biological systems. Illustrative examples taken from biology and medicine.
Courses and Programs  Biomedical Engineering

B M E 540. Biomedical Applications of Chemical Engineering. (Same as Chem E 540.) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: Chem E 210, Math 266, Phys 222. Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical and biochemical engineering, applied physiology and environmental studies.

B M E 580. Biomaterials. (Same as M S E 580.) (3-0) Cr. 3. S. Prereq: Mat E 211 or 272. Presentation of the basic chemical and physical properties of biomaterials as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

B M E 590. Special Topics. Cr. 1 to 5 as arranged. Investigation of problems of special interest in biomedical engineering.

Courses for Graduate Students

B M E 690. Advanced Topics. Cr. 1 to 5 as arranged.

A. Instrumentation
B. Bimplusation
C. Transport Phenomena
D. Biomaterials
E. Information Processing
F. Tissue Engineering
G. Biomechanics
H. Virtual Reality
I. Computational Intelligence

Professional Program of Study

For professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

A good foundation in anatomy and physiology of domestic animals is necessary to understand the mechanisms of animal disease processes and their treatment. Study of mammalian anatomy and physiology prepares students with a background in the structural and functional activities of cells, tissues, organs, and body systems of importance to veterinary medicine.

An understanding of drug action is essential for rational drug therapy. The general pharmacology courses provide students with a background in basic pharmacology to include pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to veterinary medicine.

Graduate Programs

The department offers work for the degrees master of science and doctor of philosophy with majors in veterinary anatomy, physiology or in physiology with pharmacology as a specialization. In veterinary anatomy, both thesis and nonthesis options are available for the master of science degree. Up to 10 credits of dual-listed veterinary anatomy courses may be applied for major graduate credit.

Departmental research facilities provide for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised by faculty members recognized in their areas of expertise. Current areas of research include: diabetes mellitus, glia-neuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology of nervous ion-channels, Parkinson’s disease, pharmacology of schistosomiasis, and physiology and pharmacology of thalamic neurons. The objective of the department is to prepare graduate students for successful careers in research and professional service. The department is part of interdepartmental programs in neuroscience, toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./JVM program is an option.

Foreign language requirements may be established by the student’s program of study committee.

Courses open for nonmajor graduate credit: 354, 421.

Courses Primarily for Undergraduate Students

B M S 329. Anatomy and Physiology of Domestic Animals. (3-0) Cr. 3. S. Prereq: Biol 202, 202L. Survey of body systems of the domestic animals. Provides a medical science orientation particularly useful to students in a pre-veterinary medicine curriculm.

Courses Primarily for Professional Curriculum Students

B M S 331. Principles of Morphology II. (Dual-listed with S M S 331) (2-6) Cr. 4. S. Prereq: First-year classification in veterinary medicine. Comparative and topographic anatomy of domestic animals.

B M S 345. Case Study I. (0-4) Cr. 2. F. Prereq: First-year classification in veterinary medicine. Clinical applications of basic sciences taught concurrently in the fall semester of the first year curriculum in veterinary medicine.

B M S 346. Case Study II. (0-2) Cr. 1. S. Prereq: First-year classification in veterinary medicine. Clinical applications of basic sciences taught concurrently in the spring semester of the first year curriculum in veterinary medicine.

B M S 349. Comparative Veterinary Physiology I. (3-3) Cr. 3. F. Prereq: First-year classification in veterinary medicine. Cell physiology, blood, body fluids, endocrinology, renal and gastrointestinal physiology of domestic animals.

B M S 350. Comparative Veterinary Physiology II. (4-3) Cr. 3. S. Prereq: First-year classification in veterinary medicine. Cardiovascular, respiratory, and reproductive physiology of domestic animals.

B M S 355. Integrative Pharmacology. (2-2) Cr. 1. F. Prereq: Second-year classification in veterinary medicine. To integrate all organ systems into a total physiological response to stress, etc. Small group discussions and computer simulations will be utilized.

B M S 443. Pharmacology and Therapeutics. (Dual-listed with S M S 443) (3-0) Cr. 3. F. Prereq: 354. Pharmacology and therapeutic uses of drugs, antimicrobial drugs and anti parasitic drugs and adverse drug reactions.

B M S 490. Independent Study. Cr. 1 to 5 each time taken. Prereq: Permission of instructor. H. Honors

Richard J. Martin, Chair of Department

University Professors: Draper

Professors: Ahrens, Bloedel, Dyer, Evans, Ghoshal, Hsu, R. Martin, Randic, Riedelsel, Uemura, Ware

Professors (Collaborators): Allison, Bennett, Horst, Whipp

Distinguished Professors (Emeritus): Christensen, Dellmann

University Professors (Emeritus): Adams, Reece

Professors (Emeritus): Bal, Canithers, Engen, Hembrough, Pineda, Svenson, VanMeter

Associate Professors: Greer, Jeffrinja, Kanthasamy, P. Martin, Sharp

Associate Professors (Collaborators): Goff, Olsen

Associate Professors (Emeritus): Crump

Assistant Professors: Apley, Day, Kim, Sonea

Assistant Professors (Adjunct): Greenlee, Robertson

Assistant Professors (Collaborators): Kesl, Rasmussen

Instructors (Adjunct): Bolser

Biomedical Sciences
Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

B M S 501. Selected Research Methods in Physiology. (0-8) Cr. 3. F.S.S. Prereq: Graduate classification; permission of pharmacology staff. Experience in pharmacological techniques in selected pharmacology laboratories: cytochemical methods, extracellular and intracellular unit recording, microiontophoresis, spectrophotofluorometric analysis of bio- genic amines, atomic absorption spectrometry, radiomunnoassay, gas chromatography, enzyme analysis, use of isotopes in drug studies, intestinal perfusion techniques, renal clearance methods, and isolated tissue bioassay.

A. Ruminant Anatomy.
B. Nonruminant Anatomy

B M S 530. Principles of Morphology I. (Dual-listed with 330.) (3-6) Cr. 2. S. F. Prereq: 10 credits in biological science and permission of the instructor. Comparative anatomy of domestic animals.

B M S 531. Principles of Morphology II. (Dual-listed with 331.) (2-6) Cr. 4. S. Prereq: B M S 530. Comparative and topographic anatomy of domestic animals.

B M S 532. Microscopic Anatomy. (Dual-listed with 332.) (3-3) Cr. 4. F. Prereq: 10 credits in biological science and permission of the instructor. Cytology, histology and organology of domestic animals.

B M S 537. Neurobiology. (Dual-listed with 337.) (2-3) Cr. 3. S. Prereq: 10 credits in biological science and permission of the instructor. Neurobiology of domestic animals.

B M S 543. Pharmacology and Therapeutics. (Dual-listed with 443.) (3-3) Cr. 3. F. Prereq: 544. Concurrence registration in B M S 544 is required for graduate students. Pharmacology and therapeutic uses of fluids, antimicrobial drugs, antimalarial drugs, and antiparasitic drugs, and adverse drug reactions.

B M S 544. Pharmacology and Therapeutics Literature Discussion. (1-1) Cr. 1. F. Prereq: Concurrence registration in B M S 543. Literature review and discussions and computer simulations related to B M S 543

B M S 549. Advanced Vertebrate Physiology I. (Same as An S 549.) (4-0) Cr. 4. F. Prereq: Zool 355; credit or enrollment in BBMB 420 or 404. Neuropsychology, sensory systems, muscle, neuromodulation, endocrinology.

B M S 552. Advanced Vertebrate Physiology II. (Same as An S 552.) (4-0) Cr. 4. S. Prereq: Zool 355; credit or enrollment in BBMB 420 or 404. Cardiovascular, renal, respiratory, and digestive physiology.

B M S 552L. Advanced Vertebrate Physiology Laboratory. (Same as An S 552L.) (0-3) Cr. 1. S. Prereq: Credit or enrollment in B M S 552.

Laboratory for cardiovascular, renal, respiratory, and digestive physiology.

B M S 554. General Pharmacology. (Dual-listed with 354. Same as Tox 554.) (3-0) Cr. 3. S. Prereq: 549 and 552; BBMB 404, 405. Concurrent registration in B M S 555 is required for graduate students. General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

B M S 555. General Pharmacology Literature Discussion. (1-0) Cr. 1. S. Prereq: 549 and 552; BBMB 404, 405 and concurrent registration in B M S 554. Literature discussion and computer simulations related to B M S 554.

B M S 590. Special Topics. Cr. 1 to 7. Prereq: Permission of instructor.
A. Anatomy
B. Physiology
C. Pharmacology

Courses for Graduate Students

B M S 631. Experimental Techniques in Physiology. (2-4) Cr. 4. Alt. S., offered 2003. Prereq: Graduate course in pharmacy or surgery or permission of instructor. Course content: Surgical preparations and basic physiological studies of the cardiovascular, digestive, urogenital and other systems. Limited enrollment.

B M S 688. Research Review. Cr. 1 each time taken. F.S. A forum for B M S students to gain experience in the critical exchange of ideas through oral presentation and discussion of scientific information.

B M S 690. Advanced Topics. Cr. 1 to 5. Prereq: Permission of instructor.
A. Anatomy
B. Physiology
C. Pharmacology

B M S 698. Seminar. Cr. 1 each time taken. F.S.S. SS. Staff. Attendance required.
B. 1 each time taken. F.S.S. SS. Staff. Offered on a satisfactory-fail grading basis only. Attendance and presentation required.

B M S 699. Research. Cr. 1 each time taken. F.S.S. SS. Staff. Offered on a satisfactory-fail grading basis only. Attendance and presentation required.

Undergraduate Study

For undergraduate curriculum in liberal arts and sciences, major in botany, see Liberal Arts and Sciences, Curriculum.

The Botany department offers broad opportunity for the study of many basic and applied aspects of plant biology. The botany and biology majors and other undergraduate programs in which the department participates prepare students for a wide range of science-related occupations, including biotechnology, biology teaching, medicine and pharmacology, conservation and outdoor recreation activities, and research and development. The botany and biology majors offer excellent preparation for graduate study in biological sciences, or in such applied disciplines as agronomy, forestry, horticulture, and plant pathology. Graduates of the botany major understand the basic principles of plant structure, function, ecology, and evolution, and are able to communicate effectively about plant biology.

Botany is one of the basic biological sciences. Undergraduates majoring in Botany must therefore obtain a general biological foundation by taking courses in the biology program (see Biology, Cross-Disciplinary Program). Botany faculty are involved in both the organization and teaching of Biology courses, thus Biology and Botany are integrated for the benefit of the student.

In addition to the basic Liberal Arts and Sciences requirements, Botany majors must also complete:

1. Biol 201, 201L, 202, 202L, 301, 301L, 302, 302L, 303, and 312 (22 credits);
2. 18 credits at the 300 level or above in botany from an approved list, including Plant Anatomy (Bot 404) and at least one course from each of the other three major disciplines within Botany;
3. Phys 111 and 112 (8 credits);
4. Two courses in Mathematics (calculus and/or statistics) from an approved list (7-8 credits);
5. Two semesters of general chemistry with labs and at least one semester of organic chemistry with lab (13 credits);
6. A grade of C or better in Engl 104 and 105, and a C or better in an approved writing
Bot 202. Field Botany. (2-4) Cr. 2. F.S. 8 weeks. Field and laboratory studies of plants in various local habitats. Includes trees, shrubs, flowering plants and other green plants, lichens and fungi. Not recommended for students with professional interest in plant science.

Bot 301. Iowa Natural History. (Same as Ia LL 301I.) See Iowa Lakeside Laboratory.

Bot 302I. Animal Interactions. (Same as Ia LL 302I.) See Iowa Lakeside Laboratory.

Bot 303. Biological Evolution. (Same as Biol 303.) See Biology.

Bot 304. Plants and People. (3-0) Cr. 3. S. Prereq: Credit or enrollment in Bot 201. Wallace. Uses of plants and fungi by humans and the importance of plants in the past, present and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.

Bot 312. Ecology. (Same as Biol 312.) See Biology.

Bot 312I. Ecology. (Same as Ia LL 312I.) See Iowa Lakeside Laboratory.

Bot 320. Plant Physiology. (3-0) Cr. 3. S. Prereq: Biol 301 or Gen 320; Biol 302 or BBMB 301; Chem 231 or 332; Phys 103 or 111. Spalding. Application of physical and biological principles to the understanding of plant processes involved in assimilation, metabolism, and regulation of growth and development.

Bot 321. Plant Physiology Laboratory. A: (0-3) Cr. 1. S. B: (0-6) Cr. 2. S. Prereq: Biol 201L; credit or enrollment in 320. Spalding. Laboratory to accompany 321B. 321B will include independent group research projects. Nonmajor graduate credit.

Bot 330. Environmental Systems. (Same as Env S 335, EnSci 330.) (2-4) Cr. 4. F. Prereq: Biol 202 or Micro 201; Chem 164 or 178, Math 165 or 181. Crompton. Dynamics of natural environmental systems. Systems approach to the analysis of material and energy flows, including physical and biological aspects of environmental systems and their functional connections. Laboratory emphasizes environmental modeling and simulation. Nonmajor graduate credit.

Bot 364. Biology of Aquatic Plants and Algae. (2-2) Cr. 3. S. Prereq: Biol 202 or Micro 201. Introduction to algae and aquatic plants with emphasis on ecological relationships in lakes and wetlands.

Bot 364I. Biology of Aquatic Plants. (Same as Ia LL 364I.) See Iowa Lakeside Laboratory.

Bot 367I. Plant Taxonomy. (Same as Ia LL 367I.) See Iowa Lakeside Laboratory.

Bot 399. Undergraduate Seminar. (1-0) Cr. 1 each time taken. S. Prereq: Junior classification and 8 credits in botany. Meetings of students and faculty to discuss topics of current interest in plant science. Opportunity to develop written and oral communication skills.

Bot 403. Environmental Biogeochemistry. (Same as EnSci 403, Geol 403I.) (3-2) Cr. 4. S. Prereq: EnSci 330. Raich. Biological, chemical, and physical phenomena controlling material, energy, and elemental fluxes in the environment. Nonmajor graduate credit.

Bot 406. Principles of Mycology. (Same as Micro 406.) (2-3) Cr. 3. F. Prereq: Credit in biological sciences. Tiffany. Morphology, taxonomy and ecology of fungi; their relation to agriculture and industry. Nonmajor graduate credit.

Bot 422I. Prairie Ecology. (Same as Ia LL 422I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Bot 461I. Introduction to GIS Landscape Modeling. (Same as Ia LL 461I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Bot 484I. Plant Ecology. (Same as Ia LL 484I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Bot 487. Aquatic and Wetland Microbial Ecology. (Dual-listed with 587; same as EnSci 487, Micro 487.) (3-0) Cr. 3. S. Prereq: 6 credits in biology and 6 credits in chemistry. Crompton. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in aquatic and wetland ecosystems. Emphasis on energy flow and nutrient dynamics. Nonmajor graduate credit.

Bot 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 7 credits in botany, permission of instructor. No more than 9 credits of 490 may be counted toward a degree in botany. A. Plant Physiology and Molecular Biology B. Morphology D. Mycology E. Systematics and Evolution F. Plant Ecology H. Honors I. Iowa Lakeside Laboratory (Same as Ia LL 490I) See Iowa Lakeside Laboratory. J. Cytology K. Aquatic and Wetland Ecology

Courses Primarily for Graduate Students, open to qualified undergraduate students

Bot 501I. Freshwater Algae. (Same as Ia LL 501I.) See Iowa Lakeside Laboratory.

Bot 512. Plant Growth and Development. (Same as Gen 512, MCDB 512, P Phy 512.) (2-0) Cr. 2. S. Prereq: 320 or a course in developmental biology; 545 or BBMB 404, 405 or Gen 520 Wurtele and Bazzaz. Plant growth and development and its molecular genetic regulation. Hormone biosynthesis, metabolism, and action. Signal transduction in plants.

Bot 513. Plant Metabolism. (Same as P Phy 513.) (2-0) Cr. 2. S. Prereq: 320, Phys 111, Chem 331; one semester of biochemistry recommended. Spalding. Photosynthesis, respiration, and other aspects of plant metabolism.

Bot 529. Plant Cell Biology. (Same as MCDB 529.) (2-0) Cr. 2. S. Prereq: 320, Biol 301, 302 or BBMB 405. Roderholm. Organization, function, and development of plant cells and subcellular structures.

Bot 531I. Conservation Biology. (Same as Ia LL 531I.) See Iowa Lakeside Laboratory.

Bot 535I. Restoration Ecology. (Same as Ia LL 535I.) See Iowa Lakeside Laboratory.

Bot 542. Introduction to Molecular Biology Techniques. (Same as Zool 542.) See Zoology.

Bot 562. Evolutionary Genetics. (Same as Gen 562.) See Genetics.

Bot 561. Wetland Ecology. (Same as la LL 561I.) See Iowa Lakeside Laboratory.

Bot 566. Molecular Evolution. (Same as Gen 566, Zool 566.) (3-0) Cr. 3. F. Prereq: Permission of instructor. Seminar/discussion course covering the fundamentals of molecular evolution. Emphasis is placed on original scientific literature and current topics, including rates and patterns of genetic divergence; nucleotide and allelic diversity; molecular clocks, gene duplication; genome structure; organelar genomes, polyploidy; transposable elements; and modes and mechanisms of gene and genome evolution.

Bot 568. Advanced Systematics. (Same as Ent 568, Zool 568.) (2-3) Cr. 3. Alt. S. Prereq: Permission of instructor. Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; selection of fundaments of phylogenetic systematics.

Bot 569. Biogeography. (Same as Zool 569.) (3-0) Cr. 3. Alt. F. Prereq: Biol 303 or equivalent; permission of instructor. Principles underlying the geographic distribution of organisms throughout the world; influences of geology and tectonic movements, climate, migration, dispersal, habitat, and phylogeny on present distribution patterns; biogeographic methods.

Bot 570. Landscape Ecology. (Same as A Ecl 570.) (2-3) Cr. 3. Alt. F., offered 2002. Prereq: Permission of instructor; Bot 588 or A Ecl 588; a course in calculus. The study of evolutionary processes within a spatial context with emphasis on behavior, population and community dynamics.

Bot 575. Field Mycology. (2-6) Cr. 4 each time taken. SS. Prereq: 5 credits in botany. Tiffany. Collection and identification of fungi and relation of their occurrence to environmental factors. Field trips.

Bot 575I. Field Mycology. (Same as la LL 575I.) See Iowa Lakeside Laboratory.

Bot 580I. Ecology and Systematics of Diatoms. (Same as la LL 580I.) See Iowa Lakeside Laboratory.

Bot 587. Aquatic and Wetland Micological Ecology. (Dual-listed with 487; same as Micro 587) (3-0) Cr. 3. S. Prereq: 6 credits in biology and 6 credits in chemistry. Crompton. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in aquatic and wetland ecosystems. Emphasis on energy flow and nutrient dynamics.

Bot 590. Special Topics. Cr. 1 to 3 each time taken. Prereq: 10 credits in botany, permission of instructor. A. Plant Physiology and Molecular Biology B. Morphology C. Mycology D. Plant Ecology E. Systematics and Evolution F. Plant Ecology 1. Iowa Lakeside Laboratory (Same as la LL 590I.) See Iowa Lakeside Laboratory. 2. J. Cytology 3. K. Aquatic and Wetland Ecology

Bot 599. Creative Component. Cr. arr. Research toward nonthesis master’s degree.

Courses for Graduate Students

Bot 612. Seminar in Plant Development. Cr. 1 each time taken. S. Prereq: BioGen 512 (can be taken concurrently). B. Clark, Wurtele. In-depth discussion and critique of journal articles on current topics of interest to participants.

Bot 641. General Mycology. (Same as Micro 641.) (2-6) Cr. 4. F. Prereq: PIP 407. Tiffany. First semester of a full-year course. Taxonomy, morphology, ecology, and phylogeny of slime molds and fungi (oomycetes, chytridiomycetes, zygomycetes, ascomycetes, basidiomycetes, and fungi imperfecti).

Bot 696. Seminar in Plant Physiology and Molecular Biology. (Same as Agron 696, BBMB 696, For 696, Gen 696, Hort 696, MCDB 696, P Phy 696.) Cr. 1 each time taken. F. S. Presentations and discussions of recent literature and problems under investigation.

Bot 698. Seminar. Cr. 1 each time taken. Meetings of botany faculty and students to discuss recent literature and problems under investigation. A. Vascular Plants B. Non-vascular Plants C. Systematics and Evolution E. Molecular, Cellular, and Developmental Biology (Same as MCDB 698.) See Molecular, Cellular, and Developmental Biology. F. Ecology G. Aquatic and Wetland Ecology

Courses Offered at the Gulf Coast Research Laboratory (GCRL), Ocean Springs, Mississippi

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for the following University of Southern Mississippi/GCRL courses and transfer them to their ISU degree programs. Written permission of the ISU coordinator for the GCRL, 201 Bessey, is required for this arrangement. Inquire at 201 Bessey for further information.

MAR 420. Marine Phycology. Cr. 2. SS. Prereq: 10 credits in biology, including botany. A survey, based upon local examples, of the principal groups of marine algae, treating structure, reproduction, distribution, identification, and ecology.

MAR 420L. Marine Phycology Lab. Cr. 2. SS. Lab to accompany 420.

MAR 421. Coastal Vegetation. Cr. 2. SS. Prereq: 10 credits in biology including botany. A study of general and specific aspects of coastal vegetation with emphasis on local examples.

MAR 421L. Coastal Vegetation Lab. Cr. 1. SS. Lab to accompany 421.

MAR 422. Salt Marsh Plant Ecology. Cr. 2. SS. The botanical aspects of local marshes; includes plant identification, composition, and structure.

MAR 422L. Salt Marsh Plant Ecology Lab. Cr. 2. SS. Lab to accompany 422.

MAR 490. Independent Study.

MAR 491. Special Topics.
Business Administration

Benjamin J. Allen, Dean
Labh S. Hira, Associate Dean

Undergraduate Study

James C. McElroy, Professor in charge, Undergraduate Programs in Business.

For undergraduate curriculum leading to the degree bachelor of science, majors in accounting, finance, management, management information systems, marketing, production/operations management, transportation and logistics and a secondary major in international business, see College of Business, Curricula.

The department of Business Administration supports the undergraduate programs in the departments of Accounting, Finance, Logistics, Operations, and Management Information Systems, Management, and Marketing by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study

James C. McElroy, Professor in Charge, Graduate Programs in Business.

The College of Business offers two graduate programs in business administration: the master of business administration (MBA) and the master of science in business (M.S.), which are described below. The college also has a specialized master degree program, the master of accounting, which is described under the Department of Accounting. Finally, the College of Business is a participating member in two interdisciplinary programs, the master of science in industrial relations and the master of science in information assurance.

Master of Business Administration (M.B.A.)

The College of Business offers a 48 credit program leading to a nonthesis master of business administration degree with a specialization in accounting, agribusiness, finance, human resource management, information systems, or marketing. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The M.B.A. is the professional management education program for those pursuing careers in business.

Students working toward the master of business administration are required to complete a series of core courses in the basic functional areas of business (accounting, economics, statistics, finance, marketing, operations management, organizational behavior, management information systems, international business, ethics and social responsibility, strategic management and business policy), and advanced elective coursework.

Courses for the M.B.A. are provided by the departments of Accounting, Economics, Finance, Logistics, Operations and Management Information Systems, Management, Marketing, and Statistics. Courses from other departments may also be chosen to meet specific student interests. Students interested in the agribusiness specialization may need to take courses in the College of Agriculture. Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), and statistics (M.B.A./M.S.-Statistics).

Students may enroll in either the full-time program, the part-time Saturday program, or part-time evening program in Des Moines. The part-time M.B.A. programs are intended for those individuals who desire an M.B.A. while continuing their full-time employment.

The M.B.A. program is open to all individuals with a baccalaureate degree. Undergraduates from liberal arts, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit Graduate Management Admission Test (GMAT) scores, official transcripts of previous academic work, personal essays, resume, and three letters of reference.

International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) scores.

Courses Primarily for Undergraduate Students

BusAd 101. Orientation. (1-0) Cr. 0.5. S.S.S. First 8 weeks. A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic policies, deadlines, and registration procedures. Includes group advising for course selection and registration. Offered on a satisfactory-fail grading basis only.

BusAd 101H. Orientation. (1-0) Cr. 0.5. F. Last 8 weeks. Prereq: Membership in the Freshman Honors Program. Designed to supplement the Freshman Honors orientation (Hon 121) with college specific information, to facilitate the development of Honors programs of study in business, and to acquaint students with university policies and procedures. Offered on a satisfactory-fail grading basis only.

BusAd 201. Introduction to Careers in Business. (1-0) Cr. 0.5. S.S. First 8 weeks. Prereq: Sophomore classification. Introduction to career fields open to business majors. Presentations by business professionals in various areas of business. Offered on a satisfactory-fail grading basis only.

BusAd 291. Experiential Learning. Cr. 1 to 3 each time taken. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BusAd 398. Cooperative Education. Cr. R. Prereq: Staff selection. Co-op education with the skills to supplement and implement full-time or internship job search. Topics include resume writing, interviewing skills, application letters, job search skills, business etiquette, dress for success, adapting to the workplace and organizing your job search. Highlights include a dress for success “fashion show”, a sit-down business etiquette dinner with professional leader and employer panel. Offered on a satisfactory-fail basis only.

BusAd 491. Professional Experiential Learning. Cr. 1 to 3 each time taken. Prereq: Staff selection. Designed to provide students with the skills to supplement and implement full-time or internship job search. Topics include resume writing, interviewing skills, application letters, job search skills, business etiquette, dress for success, adapting to the workplace and organizing your job search. Co-op education with the skills to supplement and implement full-time or internship job search. Offered on a satisfactory-fail basis only.

BusAd 496 or Fin 452; senior classification, permission of department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.
Courses Primarily for Graduate Students, open to qualified undergraduate students

BusAd 533. Economic and Business Decision Tools. (Same as Econ 533.) (3-0) Cr. 3. Prereq: Econ 501 or Econ 532; not for Ph.D. students in the economics program. Team taught by faculty in the Department of Economics and the College of Business, this course focuses on applied economic and business tools decision making. The topics covered include: Monte Carlo analysis with applications to option pricing and insurance mechanism design, portfolio analysis using existing standard spreadsheet software and add-ons, dynamic programming tools for inventory management and sequential decisions, discrete choice modeling and statistical bootstrapping, and financial performance evaluating using commercially available software.

BusAd 591. Professional Experiential Learning. Cr. 1 to 3 each time taken. Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience. Academically supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BusAd 599. Creative Component. Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair. Preparation and writing of creative component.

A. Accounting

B. Finance

C. Management

D. Marketing

E. Transportation and Logistics

F. Agribusiness

G. General Business

K. Management Information Systems

L. Production/Operations Management

BusAd 699. Research. Cr. 3 to 6, arranged. F.S.SS. Prereq: Graduate classification, permission of major professor. Research.

Undergraduate Study

For undergraduate curriculum in chemical engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Chemical engineering is a profession which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products, chemical engineers create versatile intermediates and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer’s influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally challenging challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel.

Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed for the broad graduate that have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments, and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineer-

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments.

Prerequisite to major graduate work is a bachelor’s degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details.

The master of engineering degree requires a creative component. A thesis is required for the master of science degree.

Courses open for nonmajor graduate credit: All 300 and 400 level courses except 302, 391, 392, 397, 398, 490, 492, 495, and 498.

Courses Primarily for Undergraduate Students

Ch E 202. Seminar. (1-0) Cr. 3. Prereq: Sophomore classification in chemical engineering. Offered on a satisfactory-fail grading basis only.

Ch E 298. Cooperative Education. Cr. F.S.SS. Prereq: Permission of department chair. First professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 302. Seminar. (1-0) Cr. 3. Prereq: Junior classification in chemical engineering. Offered on a satisfactory-fail grading basis only.

Chemical Engineering

Charles E. Glatz, Chair of Department

Distinguished Professors: Reilly, Seagrave

University Professors: Hill

Professors: Brown, Glatz, Jolls, Schrader, Shanks, Ulrichson, Youngquist

Professors (Collaborators): Nikolov

Distinguished Professors (Emeritus): Bumet, Doraiswamy

University Professors (Emeritus): Wheelock

Professors (Emeritus): Abraham, Boylan

Associate Professors: Fox, Hebert, Otaigbe, Rollins, Shanks

Associate Professors (Adjunct): Hanneman

Associate Professors (Emeritus): Collins

Assistant Professors: Mallapragada, Narasimhan, Vigil
Ch E 325. Chemical Engineering Laboratory I. (3-0) Cr. 2. F. S. Prereq: 357, credit or enrollment in 381. Experiments covering fundamental material and energy balances of bioreactor and energy transport operations, thermodynamics. Computer applications. Nonmajor graduate credit.

Ch E 356. Transport Phenomena I. (3-0) Cr. 3. F. S. Prereq: 210, Phys 221, credit or enrollment in Math 267. Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling. Nonmajor graduate credit.

Ch E 421. Process Control. (3-0) Cr. 3. F. S. Prereq: Credit or enrollment in 358; Math 267. Control of industrial chemical processes. Process control systems and limitations. Dynamics of chemical process components and process control systems. Nonmajor graduate credit.

Ch E 426. Chemical Engineering Laboratory II. (4-0) Cr. 2. F. S. Prereq: 329, 358, 382. Introduction to diffusion. Nonmajor graduate credit.

Ch E 441. Modeling and Simulation for Chemical Processes. (3-0) Cr. 3. S. Prereq: 358, 382. Simulation of behavior of chemical processes, trial and error calculations, numerical integration and other numerical methods. Problems involving fluid flow, distillation, heat transfer process control, and reactor design. Nonmajor graduate credit.

Ch E 443. Polymers and Polymer Engineering. (3-0) Cr. 3. F. S. Prereq: 357, Chem 321. Chemistry of polymers, addition and condensation polymerization. Physical and mechanical properties, polymer rheology, production methods of polymers in the chemical industry. Nonmajor graduate credit.

Ch E 490. Independent Study. (0-3 to 0-18) Cr. 1 to 6. Investigation of an approved topic. H. Honors

Ch E 492. International Technology and Globalization. (0-3 to 6-18) F. S. S. Cr. 2-12. Technology and applied science within an international perspective. Investigation of global-oriented companies, research organizations, and international university environments. Independent study for duration or during internship program. Taken with attendance at cooperating international university.

Ch E 498. Cooperative Education. Cr. R. F. S.S.S. Prereq: 298, permission of department chair. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 406. Environmental Chemodynamics. (3-0) Cr. 3. F. Prereq: 381, credit or enrollment in 358. Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment. Nonmajor graduate credit.

Ch E 410. Industrial and Engineering Chemistry. (2-3) Cr. 3. F. S. Prereq: 382 and Chem 331 or senior or graduate classification in chemistry or material science and engineering. Integration and synthesis of chemical engineering and chemistry as practiced in modern industry. Engineering of chemical reactions and processes. Design of chemical reactors and product engineering for commodity chemicals, petroleum-based fuels, petrochemicals, intermediates, specialty chemicals, pharmaceuticals, and engineered materials. Environmental strategies for waste/recovery, product minimization, and pollution prevention. Nonmajor graduate credit.

Ch E 415. Biochemical Engineering. (3-0) Cr. 3. S. Prereq: 357, 382 recommended, Chem 331. Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation. Nonmajor graduate credit.

Ch E 552. Transport Phenomena I. (3-0) Cr. 3. F. S. Prereq: 357, 381, Math 267, credit or enrollment in 545. Transport phenomena of chemicals, energy, and momentum. Introduction to transport in multicomponent systems. Exact and approximate solutions to the equations of motion.

Ch E 553. Transport Phenomena II. (3-0) Cr. 3. S. Prereq: 382. Convective and radiative transfer, boiling, condensation, multicomponent diffusion, mass transfer models. High transfer rate effects. Simultaneous heat, mass, and momentum transfer.

Ch E 558. Advanced Mass Transfer Operations. (3-0) Cr. 3. F. Prereq: 358. Analysis of chemical processes based on unit operations. Focus on mass transfer process interaction with momentum and heat transfer.

Ch E 562. Bioseparations. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 357 or advanced standing in a science major. Principles and techniques for separation and recovery of biologically-produced molecules, especially proteins. Relationship between the chemistry of biological molecules and efficient separation and preservation of biological activity. Includes centrifugation and filtration, membrane processing, extraction, precipitation and crystallization, chromatography, and electrophoresis.

Ch E 572. Turbulence. (Same as Aer E 572.) See Aerospace Engineering.

Ch E 583. Advanced Thermodynamics. (3-0) Cr. 3. S. Prereq: 381. Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of non-ideal fluids and solutions; phase and chemical-reaction equilibrium/instability.

Ch E 590. Special Topics. Cr. 2 to 6 each time taken. Investigation of an approved topic on an individual basis.

Ch E 599. Creative Component. Cr. var.

Courses for Graduate Students

Ch E 601. Seminar. (1-0) Cr. F. S. Offered on a satisfactory-fail grading basis only.

Ch E 632. Multiphase Flow. (Same as M E 632.) See Mechanical Engineering.

Chem 690. Advanced Topics. Cr. var.

Patricia A. Thiel, Chair of Department

Distinguished Professors: Angelici, Barton, Corbett, Espenson, Gordon, Johnson, Ng, Small, Yeung

University Professors: Larock, Verkade

Professors: Armstrong, Greenbove, Hoffman, Houk, Kostic, Kozak, Kraus, Porter, Rabideau, Struve, Thiel, W. Trahanovsky

Distinguished Professors (Emeritus): Fritz, Ruedenberg, Svec

Professors (Emeritus): Franzen, Gerstein, Hutton, Jacobson, Martin, McCallery, Powell, Voigt

Associate Professors: Jenks, Miller, Petrich, Schmidt-Rohr, Woo

Associate Professors (Adjunct): Russell, K. Trahanovsky

Assistant Professors: Hong, Lin, Pohl, Sheares, Song

Undergraduate Study

For undergraduate curricula in liberal arts and sciences leading to the degrees bachelor of science and bachelor of arts, see Liberal Arts and Sciences, Curriculum. Graduates holding the B.S. degree in chemistry qualify in many fields: as teachers of chemistry, as supervisors in industry, as technical sales personnel, and as research chemists in federal, state, municipal, academic, or industrial laboratories. Students with high scholastic standing often continue with graduate work, where they can explore more thoroughly the specialized areas of chemistry in which they are interested.

The B.A. degree is useful for students who intend to pursue studies in parallel areas, such as secondary school teaching, or to obtain joint majors or strong minors. The B.A. degree does not prepare students as well for graduate study or professional employment in chemistry. Graduates have firm foundations in the fundamentals and application of current chemical theories. They are able to design, carry-out, record, and analyze the results of a chemical experiment. They are able to use modern instrumentation and classical techniques to identify and solve chemical problems as well as explore new areas of research. Graduates are able to communicate the results of their work to chemists, as well as non-chemists. They understand the ethical and environmental dimensions of problems and issues facing chemists. They follow the proper procedures and regulations for safe storage, labeling, use of chemicals, and disposal of chemicals. Graduates are skilled in problem solving, critical thinking, and analytical reasoning. These skills can be applied to careers in education and industry or professions such as law, medicine, environmental sciences, and forensic sciences. The curricula in chemistry are approved by the American Chemical Society (ACS). Students who complete the program obtain an ACS certified baccalaureate degree.

Liberal arts majors who wish to transfer into chemistry at the end of their second year may still complete all degree requirements and graduate within five years. Undergraduate students seeking the B.S. degree in chemistry usually take courses essential to the degree program according to the following schedule:

First year: Chem 177M, 177N, 178M, 210, 211L; Math 165, 166, Engl 104, 105, Lib 160.

Second year: Chem 331, 332, 333L, 334L; Math 265; Phys 221, 222.

Third year: Chem 321, 322, 322L, 316, 316L, 301; Engl 314; Foreign language requirement.

Fourth year: Chem 402, 401L, 2 advanced chemistry courses (minimum 4 credits). Chem 399 or 499 is strongly recommended, however, credits earned in 399/499 can only be used to meet one of the advanced course requirements.

Chemistry majors seeking certification to teach chemistry in secondary schools must meet requirements of the College of Education as well as those of the chemistry program. In addition, they must apply formally for admission to the teacher education program.

Undergraduate students seeking the B.A. degree in chemistry have the following courses in their degree programs as minimum requirements: 177 (or 167), 177L (or 167L), 178, 211, 211L, 301, 316, 316L, 321, 321L or 322L, 322, 331, 331L, 332, 332L. Math 165, 166 and Phys 221, 222 are required as supporting work.

The Department offers a minor in chemistry which may be earned by credit in Chem 177, 177L (or 167 and 167L), 178, 211, 211L, 321, 331, 331L and one of the following: Chem 301, 316 and 316L or 322 and 321L or 332 and 332L. The total minimum credits in chemistry thus will be 20 to 23 depending on which advanced courses are selected.

English proficiency requirement: The Department requires a grade of C- or better in each of English 104, 105, and 314.

Courses and Programs Chemistry 169

Graduate Study

The Department offers work for the degrees master of science and doctor of philosophy with majors in analytical, inorganic, organic, and physical chemistry, as well as the degrees master of science and doctor of philosophy in chemistry. Co-majors may be taken between areas within chemistry or between one of the areas in chemistry and another department. Courses in other areas of chemistry as well as courses in other departments may be used to satisfy the requirement for coursework outside the major field. A Ph.D. student in chemistry may choose an additional specialty in one of the four areas: Materials Chemistry, Industrial Chemistry, Biomolecular Sciences, and Chemical Instrumentation. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count towards the outside course requirement. A minor in chemistry is available to students in other departments. The Department participates in the interdepartmental major in toxicology.

The Department of Chemistry requires all graduate students majoring in chemistry to teach as part of their training for an advanced degree. Prerequisite to major graduate work is the completion of undergraduate work in chemistry, mathematics, and physics, substantially equivalent to that required of undergraduate chemistry majors at this institution.

Courses open for nonmajor graduate credit: 301, 316, 316L, 321, 321L, 322, 331, 332, 401L, 402.

The course numbers for general chemistry courses include 105 and 160-178.

Index to field of work for 200 level courses and above is given by the second and third digits of course numbers:

(a) Inorganic Chemistry 00-09
(b) Analytical Chemistry 10-19
(c) Physical Chemistry 20-29 and 60-69
(d) Organic Chemistry 30-40
(e) Chemical Education 50-59
(f) Interdisciplinary Chemistry 70-89
(g) Research 99

Courses Primarily for Undergraduate Students

Chem 105. Fundamental of College Chemistry. (2-2) Cr. 3. F. Prereq: 1 year high school algebra. An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course. Credit for Chem 105 does not count toward graduation, but it does count toward the GPA.
Chem 155. Foundations of Chemistry for Engineers. (3-0) Cr. 3. F. Prereq: Math 140 or the high school equivalent. The first semester of a two semester sequence. Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Chem 155 may not be counted for credit toward graduation in any engineering curriculum. Credit may not be applied toward graduation for both 160 and another chemistry course.

Chem 160. Chemistry in Modern Society. (3-0) Cr. 3. S. Aspects of chemistry visible to a nonscientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity. Credit may not be applied toward graduation for both 160 and another chemistry course.

Chem 163. General Chemistry. (4-0) Cr. 4. F.S.S. Prereq: 1 year of high school algebra and geometry and either Chem 105 or 108 or 1 year of high school chemistry; and credit or enrollment in 163L. The first semester of a two semester sequence. A general survey of chemistry and properties with an emphasis on conceptual problems. Kinetics, gas phase and acid base equilibria, electrochemistry, selected topics in the chemistry of metallic and nonmetallic elements, and organic molecules. The 163, 164 sequence does not meet the prerequisite for 331. Credit for examination (test-out exams) for 163 is available only to students who are not currently enrolled in the course.

Chem 163L. Laboratory in General Chemistry. (1-0) Cr. 1. F.S. Prereq: Credit or enrollment for credit in 163. Laboratory to accompany 163. Must be taken with 163. Only one of 163L, 167L, and 177L may count toward graduation.

Chem 164. General Chemistry. (3-0) Cr. 3. F.S. Prereq: 163 and 163L. Continuation of 163. A general survey of chemistry and properties with emphasis on conceptual problems. Kinetics, gas phase and acid base equilibria, electrochemistry, selected topics in the chemistry of metallic and nonmetallic elements, and organic molecules. The 163, 164 sequence does not meet the prerequisite for 331. Credit by examination (test-out exams) for 164 is available only to students who are not currently enrolled in the course. Credit may not be applied toward graduation for both Chem 164 and another chemistry course. Only one of 163, 165, 167 and 177 may count toward graduation. Only one of 155, 163, 167, and 177 may count toward graduation.

Chem 177. General Chemistry. (4-0) Cr. 4. F.S.S. Prereq: Math 140 or high school equivalent and 159, 159L and credit or enrollment in 177L. For chemistry and biochemistry majors. The first semester of a two semester sequence which explores chemistry at a greater depth and emphasis on concepts, problems, and calculations than 163-164. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take upper level courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochromy, reactions, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Credit may not be applied toward graduation for both 160 and another chemistry course.

Chem 177L. Laboratory in General Chemistry. (0-3) Cr. 1. F.S.S. Prereq: Credit or enrollment for credit in 177. Laboratory to accompany 177. 177L must be taken with 177. 177L: For chemistry and biochemistry majors. Only one of 163L, 167L, and 177L may count toward graduation.

Chem 178. General Chemistry. (3-0) Cr. 3. F.S. Prereq: 177, 177L. Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300 level chemistry courses. 178M: For chemistry and biochemistry majors. Electrochemistry, acid-base equilibria, thermodynamics, nuclear chemistry, and descriptive topics (non-metallic, metallic, coordination compounds, organic compounds, polymers, biological molecules). Only one of 164 and 178 may count toward graduation. Credit by examination (test-out exams) for 178 is available only to students who are not currently enrolled in the course.

Chem 178L. Laboratory in General Chemistry. (1-0) Cr. 1. F.S. Prereq: 177L and credit or enrollment for credit in 178. Laboratory to accompany 178. 178L is not a necessary prerequisite with 178. Only one of 164L and 178L may count toward graduation.

Chem 165. Foundations of Chemistry for Engineers. (4-0) Cr. 4. S. Prereq: 155. Continuation of 155. Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Chem 165 or 167 satisfies the chemistry requirement in engineering curricula. Credit may not be applied toward graduation for both Chem 165 and another chemistry course. Only one of 165, 167, and 177 may count toward graduation. Only one of 155, 163, 167, and 177 may count toward graduation.

Chem 167L. Laboratory in General Chemistry for Engineering. (0-3) Cr. 1. F.S. Prereq: Credit or enrollment for credit in 167, and concurrent enrollment in 178L. Only one of 163L, 167L, and 177L may count toward graduation.

Chem 177. General Chemistry. (4-0) Cr. 4. F.S.S. Prereq: Math 140 or high school equivalent and 159, 159L and credit or enrollment in 177L. For chemistry and biochemistry majors. The first semester of a two semester sequence which explores chemistry at a greater depth and emphasis on concepts, problems, and calculations than 163-164. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take upper level courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochromy, reactions, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Credit may not be applied toward graduation for both 160 and another chemistry course.

Chem 177L. Laboratory in General Chemistry. (0-3) Cr. 1. F.S.S. Prereq: Credit or enrollment for credit in 177. Laboratory to accompany 177. 177L must be taken with 177. 177L: For chemistry and biochemistry majors. Only one of 163L, 167L, and 177L may count toward graduation.

Chem 178. General Chemistry. (3-0) Cr. 3. F.S. Prereq: 177, 177L. Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300 level chemistry courses. 178M: For chemistry and biochemistry majors. Electrochemistry, acid-base equilibria, thermodynamics, nuclear chemistry, and descriptive topics (non-metallic, metallic, coordination compounds, organic compounds, polymers, biological molecules). Only one of 164 and 178 may count toward graduation. Credit by examination (test-out exams) for 178 is available only to students who are not currently enrolled in the course.

Chem 178L. Laboratory in General Chemistry. (1-0) Cr. 1. F.S. Prereq: 177L and credit or enrollment for credit in 178. Laboratory to accompany 178. 178L is not a necessary prerequisite with 178. Only one of 164L and 178L may count toward graduation.

Chem 210. Quantitative Analysis. (2-0) Cr. 2. S. Prereq: 177, 177L or 167L and credit or enrollment in 211L. Theory and practice of elementary volumetric, chromatographic, electrochemical and spectrometric methods of analysis. Chemical equilibrium, sampling, and data evaluation. For chemistry and biochemistry majors and other students seeking a strong emphasis in chemistry. Only one of 210 or 211L may count toward graduation.

Chem 211. Quantitative and Environmental Analysis. (2-0) Cr. 2. F.S. Prereq: 164 and 164L or credit or enrollment in 178, and concurrent enrollment in 211L. Theoretical background for spectrophotometry, electroanalysis, mass spectrometry, and gas chromatography. Qualitative and quantitative instrumental analysis. An introduction to the theory of atomic electronic spectroscopy, modern techniques and methods of analysis, and other instrumental methods. Nonmajor graduate credit.

Chem 232. Physical Chemistry II. (3-0) Cr. 3. F.S. Prereq: Chem 231. Kinetic theory of gases; transport properties, chemical kinetics; quantum mechanics, atom- and molecular spectroscopy; multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical cells. Nonmajor graduate credit.

Chem 232L. Laboratory in Physical Chemistry for Engineers. (1-3) Cr. 2. S. Prereq: Credit or enrollment for credit in 231. Error analysis; use of computer, thermodynamics of gases; transport properties, chemical kinetics; quantum mechanics, atom- and molecular spectroscopy; multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical cells. Nonmajor graduate credit.

Chem 232L. Laboratory in Physical Chemistry. (1-6) Cr. 3. S. Prereq: Credit or enrollment for credit in 232L. Error analysis; use of computer, thermodynamics of gases; transport properties, chemical kinetics; quantum mechanics, atom- and molecular spectroscopy; multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical cells. Nonmajor graduate credit.
Courses Primarily for Graduate Students, Open to qualified undergradu-
ate students

Chem 500. Advanced Inorganic Chemistry. (2-0) Cr. 2. F. Prereq. 301. Concepts of structure, bonding, and chemical reactivity applied to inorganic com-
ounds of the metallic and nonmetallic elements. For students not majoring in inorganic chemistry.

Chem 501. Inorganic Preparations. (0-3) Cr. 1. F. Prereq. 402. Preparation and characterization of inor-
ganic and organometallic compounds by modern research techniques.

Chem 503. Bioinorganic Chemistry. (Same as BBMB 503.) (2-0) Cr. 2. Alt. S., offered 2002. Prereq. 402 or BBMB 405. Essentials: transport and storage of ions and of oxygen; metalloenzymes and metallocoenzymes; electron-transfer processes in respira-
tion and photosynthesis; metabolism of non-
metals and redox processes involved in it; medicinal aspects of inorganic chemistry.

Chem 505. Physical Inorganic Chemistry. (3-0) Cr. 3. F. Prereq. 402 and 322. Elementary group the-
ory and molecular orbital theory applied to inorganic chemistry. Spectroscopic methods of characterization of inorganic compounds and organometallic compounds.

Chem 506. Systematic Inorganic Chemistry. (3-0) Cr. 3. S. Prereq. 402 or 500 and 322. Principles of structure and reaction in chemistry. Descriptive chemistry of the chemical elements and their compounds.

Chem 510. Advanced Survey of Analytical Chemistry. (2-0) Cr. 2. F. Prereq. 316 and 316L. Selected topics in modern quantitative analysis including analytical separations, titrations, spec-
trography, and other instrumental methods.

Chem 511. Advanced Quantitative Analysis. (3-0) Cr. 3. S. Prereq. 316 and 316L. General methods of quantitative inorganic and organic analysis. Aqueous and nonaqueous reagents, sampling and sample dissolution; modern instrumenta-
tion; sensors; atomic and molecular microscopy; bio-
analytical methods; data evaluation, chemometrics; and analytical literature.

Chem 512. Electrochemical Methods of Analysis. (3-0) Cr. 3. F. Prereq. 316 and 316L, 322, and 322L. Principles of convective-diffusion mass transport in electroanalysis. Applications of potentiometry, voltammetry, and coulometry. Introduction to hetero-
geneous and homogeneous kinetics in electroanaly-

Chem 513. Analytical Molecular and Atomic Spectroscopy. (3-0) Cr. 3. S. Prereq. 316 and 316L,322, 322L. Introduction to physical optics and design of photometric instruments, principles of absorption, emission, fluorescence, and Raman spectroscopy. Error and precision of optical methods. Ultraviolet, visible, and infrared methods of qualitative and quan-
titative organic and inorganic analysis.

Chem 516. Analytical Separations. (3-0) Cr. 3. F. Prereq. 316 and 316L, 322, 322L. Principles and examples of inorganic and organic separation meth-
ods applied to analytical chemistry. Solvent extrac-
tion, volatilization, ion exchange, liquid and gas chro-
matography, and electrophoresis.

Chem 530. Advanced Organic Chemistry. (2-0) Cr. 2. S. Prereq. 332. Selected topics in modern organic chemistry, including structure, reaction mech-
anisms, organic synthesis and spectroscopy. For students not majoring in organic chemistry.

Chem 531. Organic Synthesis I. (2-0) Cr. 2. S. Prereq. 332. Survey of organic functional group trans-
formations.

Chem 532. Organic Synthesis II. (2-0) Cr. 2. F. Prereq. 531. Synthesis of complex organic com-
pounds including natural products.

Chem 537. Physical Organic Chemistry I. (3-0) Cr. 3. F. Prereq. 332. Structure, stereo-
chemistry, introduction to reaction mechanisms, thermodynamic and kinetic data, linear free energy relationships, isotope effects, orbital symmetry.

Courses and Programs Chemistry

Chem 538. Physical Organic Chemistry II. (3-0) Cr. 3. S. Prereq. 537. Survey of reactive intermedi-
ates including cations, anions, carbenes, and radicals.

Chem 550. Safety in the Chemical Laboratory. (1-0) Cr. 1. F. Prereq. 332L or equivalent. Introduction to laboratory safety and chemical hygiene. Use of engineering controls and personal protective equip-
ment. Chemical storage and waste disposal prac-
tices. Handling hazardous chemicals. Radiation safety and laser safety. Offered on a satisfacto-
ry-fail grading basis.

Chem 555. Chemical Pedagogy. (1-0) Cr. 1. F. Prereq. 332. Policies, methods of instruction, and practice teaching in undergraduate chemistry recita-
tion, discussion, and laboratory courses for chemistry graduate teaching assistants. Offered on a satisfacto-
ry-fail grading basis.

Chem 560. Advanced Physical Chemistry. (2-0) Cr. 2. S. Prereq. 322. Principles of physical chemistry as they apply to analytical, inorganic, and organic chemistry, including thermodynamics, kinetics, quan-
tum mechanics and spectroscopy. For students not majoring in physical chemistry.

Chem 561. Fundamentals of Quantum Mechanics. (4-0) Cr. 4. F. Prereq. 322. Schrödinger equation and exact solutions; square well, infinite well, harmonic oscillator, the hydrogen atom; atomic orbitals; opera-
tors including angular momenta; time-independent and time-dependent perturbation theory; Schrödinger and Heisenberg representations of unitary operators; interaction picture, density matrix.

Chem 562. Fundamentals of Atomic and Molecular Quantum Mechanics. (3-0) Cr. 3. S. Prereq. 561. credit or enrollment in 583. Variational method, many electron atoms; addition of angular momentum, self-consistent field method for open and closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation, approximation methods.

Chem 563. Statistical Mechanics. (2-0) Cr. 2. S. Prereq. 322. Microscopic and macroscopic proper-
ties, laws of thermodynamics, ensembles and distri-
bution functions, applications to gases, solids, and chemical equilibrium.

Chem 564. Molecular Spectroscopy and Structure. (3-0) Cr. 3. Alt. S., offered 2002. Prereq. 505 or 562. Maxwell’s field equations, interaction of light with matter including time-dependent perturba-
tion theory, magnetic, electric and optical properties, including cations, anions, carbenes, and radicals.

Chem 573. Classical Thermodynamics. (2-0) Cr. 2. Alt. F., offered 2002. Prereq. 322. The laws of ther-
mosystems and their applications to single and multi-component systems including heterogeneous and homogeneous equilibria, properties of gases, con-
densed phases, solutions, and surfaces.

ands such as cyclopentadienyl, oleyl, acetylens, benzenes, and carbon monoxide. Homogeneous catalysis.

Chem 578. Chemical Kinetics and Mechanisms. (2-0) Cr. 2. Alt. F., offered 2002. Prereq: 322. Rates and mechanisms; reversible, consecutive, and competing reactions; chain mechanisms; kinetic isotope effects; very rapid reactions; acid-base catalysis, the ories of unimolecular reactions; transition state and Marcus theories.

Chem 579. Introduction to Research in Chemistry. (1-0) Cr. R. F.S. Introduction to the various areas of research in chemistry at Iowa State University.

Chem 581. Principles of Lasers and Optics. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 322, Phys 222. Students with weak background should take Chem 580. For students working with lasers and optics; stimulated adsorption and emission based on the classical electron oscillator model; population inversion, laser amplification; laser pumping; oscillation and cavity modes; laser characterization; linear propagation; design of laser resonators, ray and wave optics; nonlinear optics.

Chem 582. Computer Solutions to Chemical Problems. (1-3) Cr. 2. S. Prereq: 316 and 316L, Phys 222 and basic knowledge of computers. Computer interfacing of chemical monitoring facilities, signal transducers, analog and digital circuits, data domains and data conversion, evaluation of data. Independent project involving computer control of a chemical experiment.

Chem 583. Chemical Group Theory. (1-0) Cr. 1. F. Prereq: 322. Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular momentum; space groups and crystals; permutation group, antisymmetry, and spin states.

Chem 589. Current Topics in Chemistry. (1-0) Cr. R. F.S. Presentation of recent literature and chemical problems under current investigation.

Courses for Graduate Students

Chem 600. Seminar in Inorganic Chemistry. (1-0) Cr. 1 each time taken. F.S. Prereq: Permission of instructor.

Chem 601. Selected Topics in Inorganic Chemistry. (1-0 or 2-0) Cr. 1 or 2. F.S. Prereq: Permission of instructor. Topics such as molecular structure and bonding; organometallic compounds; physical techniques of structure determination; non-aqueous solutions; ion phases; transition-metal oxides; free-radical reactions; electron transfer reactions; metal-metal bonding; and bioinorganic chemistry of nucleic acids.

Chem 611. Seminar in Analytical Chemistry. (1-0) Cr. 1 each time taken. F.S. Prereq: Permission of instructor.

Chem 619. Special Topics in Analytical Chemistry. (2-0) Cr. 2 each time taken. F.S. Prereq: Permission of instructor. Raman spectroscopy, sensors, spectro electrochemistry, capillary electrophoresis, analytical plasmas, chemometrics and bioanalytical chemistry.

Chem 631. Seminar in Organic Chemistry. (1-0) Cr. 1 each time taken. F.S. Prereq: Permission of instructor.

Chem 632. Selected Topics in Organic Chemistry. (1-0) Cr. 1 each time taken. F.S. Prereq: 537. Topics of current interest in organic chemistry such as spectroscopy, physical organic chemistry, photochemistry, organometallic chemistry, mechanisms of oxidations and reductions, modern organic synthesis, reactive intermediates, bioorganic chemistry, and polymers.

Chem 660. Seminar in Physical Chemistry. (1-0) Cr. 1 each time taken. S. Prereq: Permission of instructor.

Chem 667. Special Topics in Physical Chemistry. (1-0) or (2-0) Cr. 1 or 2. F.S. Prereq: Permission of instructor. Advanced and recent developments in physical chemistry are selected for each offering.

Civil Engineering

(Administered by the Department of Civil and Construction Engineering)

Lowell F. Greimann, Chair of Department

Distinguished Professors: Klaiber

University Professors: Austin, Lohnes

Professors: Fanous, Greimann, Jayapalan, Kannel, Northup, Porter, Rowings, van Leeuwen, Wipf

Professors (Collaborators): Maze, McCoy

Distinguished Professors (Emeritus): Baumann, Cleasby, Handy

Professors (Emeritus): Bergeson, Brewer, Carstens, Ekberg, Hardy, Jellinger, Kao, Lee, Mashaw, Mickie, Morgan, Oulman, Sanders

Associate Professors: Abendroth, Baenzerger, Cable, Federle, Gu, Jahren, Jaselskis, Kjartanson, Ong, Pitt, Souleyrette

Associate Professors (Emeritus): Chase, Fung, Mercier, Sheeler, Ward

Assistant Professors: Bolluyt, Coree, Ellis, Hallmark, Minchin, Sando, Sitharan, Sung, Thomas, Walters, Wang

Assistant Professors (Adjunct): Andrie, Plazak, Schlorholtz, Walton

Assistant Professors (Collaborators): Golchin, Lundquist, Stanley

Instructors (Adjunct): Amenson, Gaunt

Undergraduate Study

For undergraduate curriculum in civil engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Civil engineering consists of the application of the laws, forces, and materials of nature to the planning, design, construction, maintenance, and operation of public and private facilities, subject to economic, social, and environmental constraints. Commonly includ-
Courses and Programs - Civil Engineering

Courses Primarily for Undergraduates

C E 101. Technical Lecture. (1-0) Cr. R. F.S.
Discussion of various phases of civil engineering. For transfer students only. Evaluation of transfer credits and discussion of graduation requirements.

C E 104. Civil Engineering Projects. (1-0) Cr. F.S.
Introduction to civil engineering projects and practices.

C E 111. Fundamentals of Surveying I. (2-3) Cr. 3.

C E 160. Engineering Problems with Computer Applications. (2-2) Cr. 3.
Prereq: Math 141, 142 or satisfactory scores on mathematic placement examinations; credit or enrollment in Math 169. Solving engineering problems and programming, and engineering economics, graphing and curve-fitting. Use of SI units. Significant figures. Flowcharting. Introduction to engineering economics and statistics. Solution of engineering problems using spreadsheets.

C E 170. Graphics for Civil Engineering. (0-4) Cr. 2.
Prereq: Math 165, credit or enrollment in 104. Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.

C E 203. Civil Engineering Synthesis I. (2-8) Cr. 2.
Prereq: 104, 160, Chem 167 or 177. Application of mathematics and chemistry concepts for the solution of civil engineering problems. Introduction to critical thinking as related to Bloom’s Taxonomy of educational objectives. CE writing style guide and introduction to technical report writing for Civil Engineers. Introduction to self-directed learning. Concepts and applications from engineering economics. Participation in ASCE student chapter or other professional engineering organizations.

C E 204. Civil Engineering Synthesis II. (2-0) Cr. 2.

C E 298. Cooperative Education. Cr. R. F.S.S.
Prereq: Permission of department chair. First professional work period in the cooperative education program. Students must register for this course before commencing work.

C E 303. Professional Issues in Civil Engineering. (2-0) Cr. 2.

C E 314. Fundamentals of Surveying II. (3-0) Cr. 3.

Courses and Programs - Civil Engineering

C E 326. Principles of Environmental Engineering. (2-0) Cr. F.S. Prereq: Chem 167 or 178, Math 166, credit or enrollment in E M 378. Introduction to environmental problems, water quality parameters and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control. Nonmajor graduate credit.

C E 332. Structural Analysis I. (2-0) Cr. 3.

C E 333. Structural Steel Design I. (2-0) Cr. 3.

C E 334. Reinforced Concrete Design I. (2-0) Cr. 3.
Prereq: E M 327. Analysis and design of beams, one-way slabs, and columns. Preliminary design of building frames using pattern loading and moment coefficients. Nonmajor graduate credit.

C E 350. Introduction to Transportation Planning. (3-0) Cr. 3.
Prereq: 3 credits in statistics, junior classification. Planning of urban and regional transportation systems. Applications of population, land use, economic, social, and travel studies to problems of transportation system configuration and route location. Organization and coordination of the transportation planning function. Not available for graduation credit for students in civil engineering. Nonmajor graduate credit.

C E 353. Introduction to Railroad Planning and Design. (1-2) Cr. 2.
Prereq: 111, 203, Phys 221, a course in statistics from the approved departmental list. Team design project. Team design in railroad planning and design. Behavior of railroad maintenance. Team design project. Oral and written report. Nonmajor graduate credit.

C E 354. Introduction to Airport Planning and Design. (1-2) Cr. 2.
Prereq: 111, 203, Phys 221, a course in statistics from the approved departmental list. Team design project. Team design in airport planning and design. Behavior of airport maintenance. Team design project. Oral and written report. Nonmajor graduate credit.

C E 355. Introduction to Transportation Engineering. (1-2) Cr. 2.
Prereq: 111, 203, Phys 221, a course in statistics from the approved departmental list. Team design project. Team design in transportation engineering. Behavior of transportation maintenance. Team design project. Oral and written report. Nonmajor graduate credit.

C E 360. Soil Engineering. (2-3) Cr. 3.
Prereq: Geol 201, E M 324. Introduction to soil engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity. Nonmajor graduate credit.

C E 382. Design of Concretes. (1-6) Cr. 3. F. S. Prereq: 360. Physical and chemical properties of bituminous, Portland, and other cements; aggregate properties; mix design and testing of concretes, admixtures, mixing, handling, placing and curing; principles of pavement thickness design. Nonmajor graduate credit.

C E 386. Summer Internship. Cr. R. S. Prereq: Permission of placement chair. Completion of two terms in residence in civil engineering, employment in civil engineering or related field. Summer professional work period.

C E 388. Cooperative Education. Cr. R. F. S. S. Prereq: 298, permission of department. Second professional work period in the cooperative education program. Students must register for this course before beginning work.

C E 404. Professional Development and Outcomes Assessment. (2-0) Cr. 2. S. F. Prereq: Verification of undergraduate application for graduation by the end of the first week of class. Permission of instructor for students who are scheduled for summer graduation. Review of various civil engineering curriculum topics related to the Fundamentals of Engineering Examination (FEE Exam). Knowledge assessment through completion of FEE Exam practice test questions. Encouragement to complete FEE Exam. Interaction with practicing professionals about civil engineering projects and project outcomes. Assessment of CE Curriculum and educational objectives.

C E 417. Land Surveying. (2-3) Cr. 3. S. Prereq: 111. Legal principles affecting the determination of land boundaries, public domain survey systems. Locating sequential and simultaneous conveyances. Record research, plot preparation, and land description. Study of selected court cases. Nonmajor graduate credit.

C E 427. Environmental Engineering Science. (2-2) Cr. 3. F. S. Prereq: Chem 167 or 178. Physical, chemical, and biological principles related to environmental engineering management including water chemistry, environmental reactions and kinetics, mass transfer principles, and description of microbial degradation and processes in the environment.

C E 428. Water and Wastewater Treatment Processes. (2-3) Cr. 3. S. Prereq: 326, 427. Physical, chemical and biological processes for the treatment of water and wastewater including air stripping, coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management.

C E 429. Environmental Systems Engineering. (2-3) Cr. 3. F. Prereq: 326, 427. Fate, distribution, interactions, and transport of pollutants on land, air and water resources. Infiltration of air, water, and solid/hazardous waste management; reaction processes in natural systems; and modeling.

C E 451. Urban Transportation Planning and Modeling. (Dual-listed with 551.) (2-3) Cr. 2. F. S. Prereq: 360 or 353 or 354 or 453. Transportation data sources and cost analysis; transportation system management; travel demand and network modeling; transport legislation and financing; intelligent transportation systems planning; sustainable transportation concepts. Group projects lab.

C E 486. Engineering Design. (2-2) Cr. 3. F. S. Prereq: 304, 326, 333 or 354, 382, credit or enrollment in 428 or 453. Sp Cm 212. The engineering design process, case histories of design inadequacies, environmental impacts and health in the workplace, cost estimating, planning and scheduling, and synthesis of previous coursework using a group project. Nonmajor graduate credit.

C E 498. Cooperative Education. Cr. R. F. S. S. Prereq: 398, permission of department. Third and subsequent professional periods in the cooperative education program. Students must register for this course before commencing work.

Courses Primarily for Graduate Students, open to qualified undergraduate students

C E 501. Preconstruction Project Engineering and Management. (3-0) Cr. 3. Alt. F., offered 2001, and Alt. S., offered 2003. Prereq: Con E 221 and 421. Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Determinants of construction project success, conceptualization to notice to proceed. Determinants of construction project success, conceptual estimation, Quality Management, and productivity improvement programs.

C E 515. Adjustment of Observations. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 304, 326, 333 or 354, 382, credit or enrollment in 428 or 453. Sp Cm 212. The engineering design process, case histories of design inadequacies, environmental impacts and health in the workplace, cost estimating, planning and scheduling, and synthesis of previous coursework using a group project. Nonmajor graduate credit.

C E 520. Environmental Engineering Chemistry. (2-3) Cr. 3. F. S. Prereq: 326. Principles of chemistry and physical phenomena applicable to the treatment of water and wastewater and to reactions receiving waters, including reaction kinetics, acid-base equilibrium, chemical precipitation, reox reactions and mass transfer principles. Individual and group projects required.

C E 571. Surface Water Hydrology. (3-0) Cr. 3. S. Prereq: 372. Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. Design project.

C E 575. Soil and Groundwater Remediation. (3-0) Cr. 3. S. Prereq: 573 or Geol 511. Introduction to technologies used for remediation of contaminated soil and groundwater, including pump and treat, carbon absorption, soil venting, air sparging, air stripping, and in-situ bioremediation.

C E 578. Sustainable Water, Energy Resources, and Environment. (3-0) Cr. 3. F. Prereq: 4 courses in natural, biological or engineering sciences and senior or above classification. Review of federal and state requirements for environmental impact assessment, requirements of the National Environmental Policy Act and Council on Environmental Quality, methods of evaluating the environmental impacts on the physical, biological, socioeconomic, cultural/historical, human health and psychological environments, public participation in EIS, review and evaluate project environmental impact statements. An environmental impact assessment of a proposed project will be completed in small teams.

C E 590. Special Topics. Cr. 1 to 5 each time elected. F.S. Pre-enrollment contract required.

C E 594. Special Topics in Construction Engineering and Management. Cr. 1 to 3. F. S. Prereq: Con E 322, Con E 340, and permission of instructor. Emphasis for a particular offering will be selected from the following topics: A. Planning and Scheduling B. Computer Applications for Planning and Scheduling C. Cost Estimating D. Computer Applications for Cost Estimating E. Project Controls F. Computer Applications for Project Controls G. Integration of Planning, Scheduling and Project Controls

C E 595. Research Methods in Construction Engineering and Management. (0-1) Cr. 1. F. Prereq: or enrollment in 501, 502, 503, or 506. Assigned readings and reports on research methods to solve construction engineering and management problems such as robotics, project controls, automation, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

C E 599. Creative Component. Cr. 1 to 3. Pre-enrollment contract required. Advanced topic for creative component report in lieu of thesis. An undergraduate student must have an academic standing in upper one-half of his/her class in order to enroll in any 500-level civil engineering course.

Courses for Graduate Students

C E 622. Advanced Topics in Environmental Engineering. (2-0) Cr. 2. F.S. Prereq: Permission of environmental engineering graduate faculty. Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics: A. Water Pollution Control B. Water Treatment C. Solid and Hazardous Waste D. Water Resources E. Bioremediation Engineering. (2-0) Cr. 2. F. Prereq: 520 and 521. Biodegradation and bioremediation of major contaminants, pathways of metabolism for major electron acceptor conditions, cometabolism, factors influencing biodegradation (e.g., sorption, bioavailability), methods to overcome limitations using various bioremediation technologies, and molecular tools.

C E 628. Bioremediation Engineering. (2-0) Cr. 2. Alt. F. Prereq: 520 and 521. Biodegradation and bioremediation of major contaminants, pathways of metabolism for major electron acceptor conditions, cometabolism, factors influencing biodegradation (e.g., sorption, bioavailability), methods to overcome limitations using various bioremediation technologies, and molecular tools.

C E 649. Advanced Topics in Structural Engineering. (1-0) Cr. 1. S. Prereq: Permission of structural engineer graduate faculty. Advanced concepts in structural engineering topics. Emphasis for a particular offering will be selected from the following topics: A. Behavior of Metal Structures B. Design of Concrete Shells C. Cable-Supported Structures D. Advanced Matrix Analysis of Structures E. Dynamic Design of Structures F. Reliability Assessment of Structures.

C E 690. Advanced Topics. Cr. 1 to 3. Pre-enrollment contract required.

C E 699. Research.

Classical Studies

www.iastate.edu/~flng_info/Classics/home-page.html

(Interdepartmental Undergraduate Program)

The Classical Studies program is a cross-disciplinary program in the College of Liberal Arts and Sciences which offers an integrated curriculm of courses in the languages, literatures, history, and thought of ancient Greece and Rome from the time of the Homeric poems to the reign of the Emperor Constantine. Complete and current information about the Program may be found on-line at: www.public.iastate.edu/~flng_info/Classics/

Courses in Classical Studies provide background for students whose major fields of study or career interests include Anthropology, English, Foreign Languages and Literatures, History, Music, Philosophy, Women’s Studies, and related fields. Students who wish to emphasize a Classical Studies should consult the Program Chair for assistance regarding an Interdisciplinary Studies Major in the College of Liberal Arts and Sciences.

A student who wishes to declare a minor must successfully complete the following requirements: (a) Greek 201 or Latin 201; (b) 273; (c) 402 or 403 or 404; (d) six additional credits from the courses listed below (primary or departmental), or as approved by the program committee. (History majors may substitute 310 for 402 or 403 or 404.)

Courses open for nonmajor graduate credit: 310, 402, 403, 404.

Primary Courses

CI St 273. Greek and Roman Mythology. (3-0) Cr. 3. F. Survey of the legends, myths, and sagas of the classical world with emphasis on the principal gods, demigods, and heroes, and their implications for ancient social, psychological, and religious attitudes; some attention given to important modern theories.

H. Honors (4-0) Cr. 4.

CI St 275. The Ancient City. (3-0) Cr. 3. F. Examination of urban life, including physical space and material culture, religion, literature, and art; examination of civic identity (the “polis”). Contrast between the concepts of urban and rural. Examples drawn from specific ancient cities; some attention to modern methods of recovering the conditions of ancient urban life and the fundamental concept of the city in European history.

CI St 310. Ancient Philosophy. (Same as Phil 310.) See Philosophy. Nonmajor graduate credit.

CI St 353. World Literature: Western Traditions through the Renaissance. (Same as Engl 353.) See English.

CI St 367. Christianity in the Roman Empire. (Same as Relig 367.) See Religious Studies.
Cl St 372. Greek and Roman Drama. (3-0) Cr. 3. S. Origin and development of Athenian drama and its imitation at Rome; selected readings in English from Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, or Seneca; ancient theater and dramatic conventions; theories of comedy or tragedy.

Cl St 373. The World of Heroes in Greece and Rome. (3-0) Cr. 3. F. Investigation of the concept of the heroic in Greek and Roman epic and other relevant texts. Development of the heroic ideal; problems entailed by specific texts or kinds of texts. The heroic code and its implications for Greco-Roman concepts of the nature of humanity; problems posed by the heroic code; transformations of the code. H. Honors (4-0) Cr. 4.

Cl St 374. Women in Classical Antiquity. (Same as Hist 374, W S 374.) (3-0) Cr. 3. S. Prereq: Any one course in Cl St, W S, Latin, or Greek. Greek. Chronological survey of the status of women in classical antiquity; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on either Greece and Hellenistic Egypt or on Hellenistic Egypt and Rome; may be repeated once.

Cl St 376. The Archaeology of Greek and Roman Religion. [Same as Rel S 376.] (3-0) Cr. 3. S. Examination of sacred space, shrine and sanctuary architecture, cult equipment, ritual and sacrifice; social implications of cult and religion. Studied chronologically through archaeological remains of material culture and texts from Bronze Age Greece through Early Imperial Rome.

Cl St 394. The Archaeology of Greece: An Introduction. (2-0) Cr. 2. Introduction to the topography, history, archaeology, monuments and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece, preparatory to study abroad in Greece (CI St 395).

Cl St 395. Study Abroad: The Archaeology of Greece. Cr. 2. SS. Prereq: 394. Supervised on-site instruction in the archaeology of monuments and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece; readings from ancient and modern sources. Travel to Greece will occur after the spring semester and prior to summer sessions.

Cl St 402. Ancient Greece. (Same as Hist 402.) See History. Nonmajor graduate credit.

Cl St 403. Ancient Rome. (Same as Hist 403.) See History. Nonmajor graduate credit.

Cl St 404. Ancient Rome. (Same as Hist 404.) See History. Nonmajor graduate credit.

Cl St 430. Western Political Thought: Plato to Machiavelli. (Same as Pol S 430.) See Political Science.

Cl St 480. Seminar in Classical Studies. (3-0) Cr. 3. Prereq: 30 credits in Classical Studies or related courses, permission of Program Chair. Advanced study of a selected topic in Classical Studies. Research paper or project selected by the student.

Cl St 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: 7 credits in classical studies at the 200 level or higher; permission of the chair of the program committee. Designed to meet the needs of students who wish to study specific topics in classical civilization in areas where courses are not offered, or to pursue such study beyond the limits of existing courses.

Courses for Graduate Students, major or minor, open to qualified undergraduates

Cl St 512A. Proseminar in Ancient European History. (Same as Hist 512A.) See History.

Cl St 594A. Seminar in Ancient European History. (Same as Hist 594A.) See History.

Primary Courses (Offered by Other Departments)

Art H 383. Greek and Roman Art. See Art and Design.

Greek 101. Elementary Classical Greek. See Foreign Languages and Literatures.

Greek 102. Elementary Classical Greek. See Foreign Languages and Literatures.

Greek 201. Intermediate Classical Greek. See Foreign Languages and Literatures.

Greek 306. Classical Greek Prose Composition. See Foreign Languages and Literatures.

Greek 332. Introduction to Classical Greek Literature. See Foreign Languages and Literatures.

Hist 280. Introduction to History of Science. See History.

Latin 101. Elementary Latin. See Foreign Languages and Literatures.

Latin 102. Elementary Latin. See Foreign Languages and Literatures.

Latin 201. Intermediate Latin. See Foreign Languages and Literatures.

Latin 306. Composition and Oral Interpretation. See Foreign Languages and Literatures.

Latin 332. Introduction to Latin Literature. See Foreign Languages and Literatures.

Latin 441. Advanced Readings in Latin. See Foreign Languages and Literatures.

Latin 442. Advanced Readings in Latin. See Foreign Languages and Literatures.

Community and Regional Planning

Riad G. Mahayni, Chair of Department

Professors: Mahayni, Shinn

Associate Professors: Borich, Huntington, Mattson

Associate Professors (Emeritus): Knox, Malone

Assistant Professors: Hamin, Suen

Assistant Professors (Adjunct): Andrie, Plazak

Undergraduate Study

For undergraduate curriculum in community and regional planning leading to the degree bachelor of science, see College of Design, Curricula.

Community and regional planning is a professional field of study aimed at assessing the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to understand and solve problems. Most planners work at the local level, but they are concerned with issues that affect the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Planning has its roots in landscape architecture, architecture, engineering, law, economics, and public administration. Most contemporary planners are trained in the physical and social sciences so they can understand the society and economy in which plans must be implemented. Planning demands technical competence as well as creativity, plus pragmatism and an ability to envision alternatives to the physical and social environments in which we live.

Graduates of the Community and Regional Planning Department will be capable of performing in entry level positions in public planning agencies or with planning consulting firms. Graduates are able to integrate planning knowledge and skills in practical applications to current planning issues, and to communicate in written and oral form.

Graduates of the Community and Regional Planning Department are expected to have knowledge of the structure and functions of urban settlements, the history of planning, aspects of plan and policy making, and familiarity with one area of specialized knowledge. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, collaborative approaches to these, and in synthesizing and applying knowledge to practice. Graduates are expected to assess the impact of values in terms of equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning, thus providing the student with an education which, when combined with experience, supports the individual’s eligibility for membership in the American Institute of Certified Planners.

The department cooperates in the undergraduate minors in design studies and environmental studies.

Graduate Study

The department offers work for the master of community and regional planning degree with areas of concentration in housing and social planning, community economic development, land use and transportation, and environmental planning and design. In addition, students can design their area of concentration if it does not fit in any of the four areas, with the assistance of their major professor.

Degree requirements include completion of a 2-year, 48-credit program, including a thesis of 9 credits or a professional planning report of 4 credits. Students with a bachelor degree in community and regional planning can waive up to 9 credits.

The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.
The planning core consists of CRP 501, 511, 523, 532, 561, 570, and 592.

Satisfactory completion of the core requirements and the acceptance of a thesis (9 credits) or a professional planning report (4 credits) are required for the M.C.R.P. degree. In addition, the student is encouraged to complete three months of acceptable work experience in a planning office between the first and second year of study.

Double degree programs are offered with architecture (M.C.R.P./M.Arch.), business (M.C.R.P./M.B.A.), public administration (M.C.R.P./M.P.A.), and landscape architecture (M.C.R.P./M.L.A.). The department participates in the interdepartmental minor in housing, and in the interdepartmental major in transportation.

Courses open for nonmajor graduate credit: 380.

Courses Primarily for Undergraduate Students

CRP 253. Survey of Community and Regional Planning. (3-0) Cr. 3. F. A historical survey of planning, the nature and problems of urban areas, and the goals, procedures, and results of urban planning.

CRP 270. Forces Shaping Our Metropolitan Environment. (Same as DNS 270.) (3-0) Cr. 3. S. Must be taken prior to completion of the required 9 credits in CRP. Introduction to the social, physical, political, and economic forces as they shape metropolitan areas and their interrelationships. A comprehensive picture of metropolitan development and its roles other urban disciplines play in the planning process and the interrelationships of the disciplines.

CRP 272. Planning Analysis and Techniques I. (3-0) Cr. 3. S. Prereq: Com S 103. Existing and emerging techniques for preparation of community planning studies. Sources of planning information and data. Survey techniques including survey instruments, sampling methods, sample size for demographic studies. Land use surveys for comprehensive and transportation planning. Student’s oral and graphic presentation of analytical results.

CRP 274. Planning Analysis and Techniques II. (3-0) Cr. 3. F. Prereq: 272. Use of quantitative methods for analysis of population, land use, economic, and transportation planning of a community; historical, social, economic, and physical characteristics and theories of urban change and development. Preparation for working in a planning office; discussion of expectations and ability. Offered on a satisfactory-fail grading basis only.

CRP 280. Application of Geographic Information Systems. (Dual-listed with 509.) (3-0) Cr. 3. F. S.S.S. Prereq: Permission of department chair. Preparation for further revitalization and preservation efforts.

CRP 365. Technology and the City. (Same as DNS 365.) (3-0) Cr. 3. F. Prereq: Completion of one semester in a design, engineering, social science, or history major. Major historical developments of urban areas and their change over time. Impact of technological change on development; the role that technical and design professionals (including civil engineers, architects, landscape architects, and city planners, among others) have played.

CRP 360. Regional and State Planning. (3-0) Cr. 3. Alt. S., offered 2002. Prerequisite 253 or 270. Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development. Nonmajor graduate credit.

CRP 361. Environmental Management and Decision. (3-0) Cr. 3. S. Prerequisite 253 or 270. Junior status. The nature of planning and its relationship to the social and economic planning: levels of planning, place of planning in decision-making; steps in the planning process, use and limitation of knowledge in planning, relation of facts and values.

CRP 370. Professional Work Experience. Cr. 0 F.S.S.S. Prereq: Permission of department chair. Approved professional work experience.

CRP 415. Housing. (Dual-listed with 515; same as DNS 415.) (3-0) Cr. 3. F. Prereq: 253 or 270. An in-depth review of the problems and issues related to housing planning and policy dealing primarily with interrelated topics: the interaction between socio-cultural, economic, and physical aspects of housing. Analysis of urban development and the needs of the homeless.

CRP 416. Urban Design and Planning Practice. (Dual-listed with 516. (3-1) Cr. 4. F. Prereq: 253 or 270. Principles of urban design and their application to residential and commercial development. Review of policies and criteria for subdivision design and site planning.

CRP 417. Urban Revitalization. (Dual-listed with 517; same as DNS 417.) (3-0) Cr. 3. Alt. S., offered 2002. Prerequisite 253 or 270. The nature, extent, causes, and theories of urban decline. Relationship between neighborhood change and the urban development process; public policy implications. Planning methods available for further revitalization and preservation efforts.

CRP 425. Growth Management. (Dual-listed with 525; same as DNS 425.) (3-0) Cr. 3. F. Prereq: Junior classification. Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban/suburban/rural relationships; and land preservation.

CRP 427. Social Policy Planning. (Dual-listed with 527.) (3-0) Cr. 3. Alt. S., offered 2003. Prerequisite 253, 270, or junior classification. An overview of the theory and methods of social policy planning with particular attention given to the spatial relationships of policy formulation, allocation of scarce resources, and the delivery of public services as an integrated part of comprehensive community planning.

CRP 429. Planning in Developing Countries. (Dual-listed with 529; same as DNS 429.) (3-0) Cr. 3. S. Prereq: 270. The nature of planning-related issues including rural-urban migration, development of national policies and programs, urban decay, rural development strategies, housing problems in a developing country.

CRP 432. Community Development Planning and Programming. (Dual-listed with 532.) (3-1) Cr. 4. F.S.S.S. Prerequisite: 272, 274, senior classification. Integration of planning and decision making in dealing with a community planning problem. Analysis of problems and formulation of strategies for implementation. Preparation of a community planning report.

CRP 435. Planning in Small Towns. (Dual-listed with 535.) (3-0) Cr. 3. F. Prerequisite: 253, 270, or junior classification. Contemp...
Courses Primarily for Graduate Students, open to qualified undergraduate students

C R P 501. Quantitative Methods for Planning

Analysis. (2-2) Cr. 3. F. Prereq: Graduate classification. Applications of quantitative methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Primary data collection using survey techniques. Secondary data types and sources of planning information for population projection and demographic analysis. Laboratory emphasized practical uses and applications of spreadsheet and statistical programs for data analysis.

C R P 511. Introduction to Community and Regional Planning. (3-0) Cr. 3. F. Prereq: Graduate classification. Development of planning in the United States; history and evolution of the planning profession and constructs of current practice. Theoretical basis of planning.

C R P 515. Housing. (Dual-listed with 415, same as Dsn S 515.) (3-0) Cr. 3. F. Prereq: Permission of instructor and graduate classification. An in-depth review of the problems and issues related to housing planning and policy dealing primarily with interrelationships and interdependencies among the socio-cultural, economic, and physical aspects of housing. Analysis of housing policy-making processes in the U.S., a comparative review of the housing policy and planning systems in selected developed and developing nations.

C R P 516. Urban Design and Planning Practice. (Dual-listed with 416) (3-1) Cr. 4. F. Prereq: Graduate classification. Transportation urban design and their application to residential and commercial development. Review processes and criteria for subdivision design and site planning.

C R P 517. Urban Revitalization. (Dual-listed with 417, same as Dsn S 517.) (3-0) Cr. 3. Alt. S. offered 2002. Prereq: Graduate classification. The nature, extent, causes, and theories of urban decline. The relationship between neighborhood change and the urban development process and its public policy implications; the planning methods used to further revitalization and preservation efforts.

C R P 525. Growth Management. (Dual-listed with 425, same as Dsn S 525.) (3-0) Cr. 3. F. Prereq: Graduate classification. Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems, urban/suburban/rural relationships; and land preservation.

C R P 527. Social Policy Planning. (Dual-listed with 427) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Graduate classification. The theory and methods of social policy planning with particular attention to the relationships of planning and social policy, including rural development, migration, development of national policies and programs, urban decay, rural development strategies, housing problems in a developing country.

C R P 528. Planning in Developing Countries. (Dual-listed with 428; same as Dsn S 529) (3-0) Cr. 3. F. Prereq: Graduate classification. A variety of planning and related issues including rural-urban migration, development of national policies and programs, urban decay, rural development strategies, housing problems in a developing country.

C R P 530. Practicum. Cr. 3. F.S.SS. Prereq: Graduate classification in community and regional planning. Practical planning experience. Structured work in range of tasks under close supervision of a professional planner. Relationships between theory and practice, exposure to variety of roles in practicing specialties. Offered on a satisfactory-failing grading basis only.

C R P 531. Professional Practice Seminar. (Dual-listed with 331) Cr. 1. S. Prereq: Major in community and regional planning. Preparation for working in a planning office; discussion of expectations of employer; presentations from planning professionals, and discussion of differences/similarities between public and private planning offices. Offered on a satisfactory-failing grading basis only.

C R P 535. Planning in Small Towns. (Dual-listed with 435) (3-0) Cr. 3. F. Prereq: Graduate classification. Contemporaneous problems in small towns and the design of viable strategies to enhance their social and economic position in today's society.

C R P 542. Site Analysis and Development Design. (Dual-listed with 442; same as Dsn S 542) (3-0) Cr. 3. Prereq: Graduate classification. Must be taken prior to completing 12 credits in LA. Introduction to site analysis using landscape architecture and environmental principles, but drawing also on basic engineering concepts from analysis to land development design based on that analysis.

C R P 545. Transportation Policy Planning. (Dual-listed with 445) (3-0) Cr. 3. F. Prereq: Graduate classification. Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad, policy issues explored include safety, environmental impact, sustainable communities, and economic development. Tools like policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 551. Introduction to Geographic Information Systems. (Dual-listed with 451) (2-2) Cr. 3. S. Introduction to a geographic information system, including discussions of GIS hardware, software, data structures, data acquisition, analytical techniques, and implementation procedures. Laboratory emphasized practical applications and uses of GIS.

C R P 552. Geographic Data Management and Planning Analysis. (Dual-listed with 452) (2-2) Cr. 3. F. Prereq. 551 or instructor permission. Extensive coverage of geospatial database concept and design, GIS data structures, maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasis practical applications and uses of GIS.

C R P 556. Economic Development in Small Communities. Cr. 1. F. Offered off campus through Continuing Education on two consecutive Fridays and Saturdays. Prereq: Permission of instructor. Community development perspectives, entrepreneurial approaches, leadership theories, total quality management, concepts and strategic planning skills.

C R P 561. Seminar in Planning Theory. (3-0) Cr. 3. S. Prereq: Permission of instructor and graduate classification. Current planning theories: comprehensive land use, advocacy, participatory, rational, and transactive planning models. Decision making and organization models as they affect planning practice. Value conflicts and conflict resolution.

C R P 575. Urban Planning/Urban Management. (Dual-listed with 475) (3-0) Cr. 1 per module, 5 weeks each. F. Prereq: Graduate classification. The role planning plays as a part of the management and decision-making process; policy initiation, development, and implementation, management approaches and tools.

A. Urban Planning, Urban Management
B. Citizen Participation/Conflict Management
C. Grant Writing

C R P 584. Sustainable Communities. (Dual-listed with 484; same as Dsn S 584.) Cr. 3. S. Prereq: Graduate classification. The theory and application of sustainability to the physical and social planning of communities. We will examine environmental ethics as a basis for sustainability, the history of the idea itself, and the movement toward indicators as outcome measurements both in the US and internationally. We then explore how these ideas have or might be applied in communities here and abroad.

C R P 590. Special Topics. Cr. 1 to 3. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form.

A. Planning Administration
B. Local Economic Development
C. Urban Design
D. Housing
E. Neighborhood Renewal
F. Social Planning
G. Regional Economic Development
H. Environmental Planning
I. Transportation Planning
J. Policy Analysis
K. State Planning
L. Planning in Developing Countries

C R P 591. Environmental Law. (Dual-listed with 491; same as Dsn S 591.) Cr. 3. Prereq: Graduate classification. Legal precedents and alternative policies for environmental protection; rights to and regulations for uses of water, air, and land. Federal environmental control acts and leading federal court cases.

C R P 592. Planning Law, Administration and Implementation. (Dual-listed with 492.) (3-0) Cr. 3. F. Prereq: Graduate classification. The basis in constitutional, common, and statutory law for the powers of planning and development. Planning of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.

Courses for Graduate Students

C R P 598. Professional Planning Report. (Arr.) Cr. Var. F.S.SS. Independent student research on planning topics. The course will have as a capstone experience for the student, demonstrating ability to integrate planning knowledge and skills in the practical application of the student’s abilities on a current planning issue. The completion and approval by the POS committee as evidence of the mastery of the principles of community and regional planning.

Complex Adaptive Systems

(Interdepartmental Graduate Minor)
Advisory Committee: G. Sheble, Chair; D. Ashlock, J. Decker, L. Tesfatsion, V. Honavar

The Complex Adaptive Systems (CAS) minor provides graduate students with an understanding of the interrelationships among the various methodologies associated with Artificial Life methodologies. Of special importance in the program is the interplay of techniques between biological systems and computer simulations of such systems for applications in various fields as Economics, Engineering, and Mathematics.

Graduates understand the ways in which artificial life techniques may be applied to their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of artificial life techniques. Students who complete a minor in this graduate program are able to describe and report on various artificial life techniques as applied to many fields, even outside their own field of application.

Work in the CAS minor is offered for students pursuing any graduate degree. The primary cooperating departments are Economics, Computer Science, Electrical and Computer Engineering, Mechanical Engineering, Mathematics, Psychology, and Biology.

Each student’s Masters Program of Study (POS) must include at least 9 CAS relevant course credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 (see below). Each student’s Ph.D. Program of Study must include at least 12 CAS relevant course credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503. Ph.D. students who also minor in CAS at the master’s level must take one additional CAS relevant course (3 cr.) and two additional credits of CAS seminar. Courses that satisfy CAS requirements may also be used to satisfy major requirements if such “double counting” is acceptable to the major program.

Interested students may contact the chairperson of the advisory committee for complete lists of courses and of CAS faculty members.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

CAS 502. Complex Adaptive Systems Seminar. (Same as E E 503, Com S 502.) (1-0) Cr. 1. F.S. Prereq: Admission to CAS minor. Understanding core techniques in artificial life are based on basic readings in complex adaptive systems. Understand techniques of complex system analysis methods including: Evolutionary computation, Neural nets, Agent based simulations (Agent based Computational Economics). Large-scale simulations are to be emphasized, e.g. power grids, whole ecosystems.

Computer Engineering

(Administered by the Department of Electrical and Computer Engineering)
Subrahmanyan Venkata, Chair of Department

Distinguished Professors: Lord
University Professors: Jones

Professors (Adjunct): Hillesland, Sastry

Professors (Collaborators): Ouyang

Distinguished Professors (Emeritus): Brown, Fouad, Nilsson, Pohm

Professors (Emeritus): Anderson, Basart, Brearley, Brockman, Comstock, Fanslow, Hale, Hsieh, Koerber, Kopplin, Potter, Read, Smay, Swift, Townsend, Triska

Associate Professors: Ajarapu, Bartlett, Berleant, Chen, Davidson, Davis, Jacobson, Khammash, Kleitsch, Kruep, Lee, McCallery, Russell, Stephenson, Tuttle, Tyagi

Associate Professors (Collaborators): Christie, Hussoun

Associate Professors (Emeritus): Bond, Carlson, Coady, McKechnie, Mericle, Pavlat, Scott

Assistant Professors: Aluru, Balasubramaniam, Chu, Cruz-Neira, Dickerson, Elia, Govindarasu, Lavalle, Patterson, Salapaka

Assistant Professors (Adjunct): Lee, McCalmon, Mina

Assistant Professors (Collaborators): Barton, Chandramouli, Nath

Instructors (Adjunct): Freeman

Undergraduate Study

For undergraduate curriculum in computer engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

The Electrical and Computer Engineering (ECPE) Department at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, to study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers specializations in computer architecture and digital design, software systems, information security and networking, and VLSI. Students may also take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing.

The mission of the ECPE Programs at Iowa State University is to enable the graduated student to make significant and substantive contributions to solving engineering problems throughout the student’s professional career. The following objectives are identified as critical to the accomplishment of this mission.

A. Objective I. Impart and enhance knowledge in the domain of electrical and computer engineering: The graduated student should understand

1. engineering and basic science fundamental including mathematics, probability, statistics, physical sciences, and information technology,
2. the design and manufacturing processes,
3. the fundamentals of business, including entrepreneurship, engineering economy, and cost/revenue streams.

B. Objective II. Expand and hone engineering abilities: The graduated student should be able to

1. identify and solve engineering problems,
2. analyze and design electrical, computer, and multidisciplinary systems,
3. design and conduct experiments and analyzing resulting data,
4. use modern engineering hardware and software tools such as computers and instrumentation.

C. Objective III. Instill and nurture social awareness, abilities, and understanding: The graduated student should

1. desire to engage in lifelong learning, and should expect and embrace change,
2. be able to function effectively as a member of a multidisciplinary team, to communicate effectively, and to think critically and creatively, both independently and with others,
3. apply standards of professional conduct in view of the value of science and technology in a global/societal context.

As a complement to the instructional activity, the ECPE Department provides opportunities for each student to have experience with broadening activities. Through the Cooperative Education and Internship Program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs. Through the Undergraduate Research Program, students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other...
parts of the world. Well qualified juniors and seniors in Computer Engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both B.S. and M.S. degrees. See Graduate Study for more information.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses. Prerequisite material exams are given at key points in the curriculum. These exams are to assist student evaluation of progress made during the academic experience as the material covered in several courses are the foundation of more advanced courses. These outcome assessments are also used to assess and to improve the quality of the curriculum.

**Graduate Study**

The department offers work for the degrees master of science and doctor of philosophy with major in computer engineering and minor work to students with other majors. Minor work for computer engineering majors is usually selected from a wide range of courses outside computer engineering.

The degree master of science with thesis is recommended for students who intend to continue toward the doctor of philosophy degree or to undertake a career in research and development. The nonthesis master of science degree requires a creative component.

The normal prerequisite to major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE aptitude test scores by applicants from other countries. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores.

Ph.D. students must pass a department qualifying examination.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science in Information Assurance program. Students interested in studying Information Assurance topics may earn a degree in Computer Engineering or in Information Assurance. (See bulletin section on Information Assurance)

Well qualified juniors and seniors in Computer Engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both B.S. and M.S. degrees. Undergraduate enrollments are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.

Courses open for nonmajor graduate credit: all 300 and 400 level courses except 310, 370, 396, 397, 398, 466, 490, 491, 492, and 498.

**Courses Primarily for Undergraduate Students**

- **Cpr E 211.** Introduction to Microcontrollers. (3-2) Cr. 4. F.S. Prereq: 210, Com S 207 or 227. Introduction to microprocessor instruction sets. Assembly language programming and interfaces to higher-level languages. Input/output programming. Interrupt handling. Hardware/software design trade-offs and issues. Design projects.

- **Cpr E 298.** Cooperative Education. Cr. F. F.S.S. Prereq: Permission. First professional work period in the cooperative education program. Students must register for this course before commencing work.

- **Cpr E 305.** Computer Organization and Design. (3-2) Cr. 4. F.S. Prereq: 211 or Com S 321. Introduction to computer organization. Evaluating performance of computer systems, instruction set design, computer arithmetic, and processor design. Datapath and control, pipelining and pipelined control design. Memory organization. Interfacing processor and peripherals. Laboratory component using HDLs. Nonmajor graduate credit.

- **Cpr E 308.** Software Systems Integration. (3-3) Cr. 4. F.S. Prereq: 305, 310, Eng 314. Introduction to software systems and solutions. Integration of software and hardware for a computer system. Interrupts, reentrant code, critical regions, real-time problems, I/O, device drivers, tasking, memory management, debugging techniques, software testing, documentation. Laboratory oriented design projects focusing on the design and implementation of a large software system. Nonmajor graduate credit.

- **Cpr E 310.** Theoretical Foundations of Computer Engineering. (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in Cpr E 211. Com S 228. Propositional logic and methods of proof; set theory and its applications; mathematical induction and recurrence relations; functions and relations; counting and discrete probability; trees and graphs; applications in computer engineering.

- **Cpr E 370.** Toying with Technology. (Same as Mat E 370.) See Materials Engineering.

- **Cpr E 396.** Summer Internship. Cr. R. SS. Prereq: Permission of department. Summer professional work period.

- **Cpr E 397.** Engineering Internship. Cr. R. F.S.S. Prereq: Permission of department. One semester maximum per academic year professional work period.

- **Cpr E 398.** Cooperative Education. Cr. R. F.S.S.S. Prereq: permission of department. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

- **Cpr E 425.** High Performance Computing for Scientific and Engineering Applications. (Same as Com S 425.) See Computer Science.

- **Cpr E 426.** Introduction to Parallel Algorithms and Programming. (Dual-listed with 526; same as Com S 426.) (3-2) Cr. 4. F.S. Prereq: 308 or Com S 321, Com S 311. Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selection problems, including sorting, matrix, tree and graph problems, fast Fourier transforms. Nonmajor graduate credit.

- **Cpr E 434.** Introduction to Integrated Circuit Design. (Same as E E 434.) (3-3) Cr. 4. Prereq: E E 333. Semiconductor processes and fabrication, device models, physical layout, simulation and verification. Design and use of analog and digital building blocks. Nonmajor graduate credit.

- **Cpr E 454.** Distributed and Network Operating Systems. (Dual-listed with 554; same as Com S 454.) See Computer Science.

- **Cpr E 458.** Real Time Systems. (Dual-listed with 558.) (3-2) Cr. 3. Fundamental concepts in real-time systems. Real time task scheduling paradigms. Resource management in uniprocessor real-time systems (including RMS and EDF scheduling, priority inheritance and ceiling protocols, and overload handling techniques), multiprocessor real-time systems (including scheduling, fault-tolerance, run-time anaomaly), and resource reclaimed real-time systems, and real-time networks (including QoS routing, service disciplines, dependable communication, and real-time MAC protocols). Feedback control real-time scheduling, case study of real-time systems, architectures, operating systems, and programming languages. Nonmajor graduate credit.

- **Cpr E 465.** Digital Integrated Circuit Design. (Same as E E 465.) (3-3) Cr. 4. S. Prereq: 434. Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. High level hardware design languages, logic synthesis and silicon compilers, datapath, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

- **Cpr E 466.** Multidisciplinary Engineering Design. (Same as E E 466, E Sci 466, I E 466, Mat E 466.) (1-4) Cr. 3. F. S. Prereq: Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as
CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation. Design of computer-aided design, written reports, oral presentations and computer models and engineering drawings.

Cpr E 484. Advanced Digital Systems Design. (Same as Com S 433, M E 433.) Cr. 3. F. Preq: 305. Architectures of advanced digital systems emphasizing structural principles. Multilevel implementation strategies. New design primitives. Instruction set design issues including architectural support for contemporary software structures. Laboratory based on the emphasis on the use of hardware description languages and programmable logic devices. Nonmajor graduate credit.

Cpr E 489. Computer Networking and Data Communications. (3-0) Cr. 3. F.S. Preq: 305 or E E 324. Survey of modern computer networking and data communications. Contemporary concepts, facilities, practices, implementations, and issues. TCP/IP, OSI protocols, client server programming. Nonmajor graduate credit.

Cpr E 491. Senior Design Project I. (Same as E E 491.) (1-3) Cr. 2. F. Preq: E E 322 or Cpr E 308, completion of 29 credits in the E E or Cpr E core professional program, Engl 314. First semester of a team design project in computer engineering. Emphasis on defining and planning to achieve project objectives that meet a client’s need. Technical writing of project plan and design review; project poster.

Cpr E 492. Senior Design Project II. (Same as E E 492.) (1-3) Cr. 2. F. Preq: Cpr E 491 or E E 491. Second semester of team design project in computer engineering. Emphasis on achieving project objectives as defined in Cpr E 491 or E E 491. Implementation of project design. Technical writing of final project report; oral presentation of design achievements.

Cpr E 498. Cooperative Education. Cr. F, R, S, S.S. Preq: 398, permission of department. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses Primarily for Graduate Students, open to qualified undergraduates

Cpr E 505. CMOS and BiCMOS Data Conversion Circuits. (Same as E E 505.) (3-0) Cr. 3. Alt. S., offered 2002. Preq: 434 or 501. Theory, design and application of CMOS and BiCMOS data conversion circuits (A/D and D/A converters) including: quantization effects, conversion algorithms, sample and hold, element matching, comparators, voltage references and detailed implementation issues.

Cpr E 507. VLSI Communication Circuits. (Same as E E 507.) (3-0) Cr. Alt. S., offered 2003. Preq: 454 or 502. Phasemodulation, frequencymodulation, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

Cpr E 525. Numerical Analysis of High-Performance Computing. (Same as Com S 525, Math 526.) (3-0) Cr. 3. S. Preq: 233, or one of Math 273, 471, 481; experience in scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient numerical methods for use on state-of-the-art high performance computers. Applications of the methods to the student’s area of research.

Cpr E 526. Introduction to Parallel Algorithms and Programming. (Dual Listed with 426; same as Com S 526) (3-0) Cr. 4. F. Preq: 308 or Com S 311. Models of parallel computers and performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, graph, trees and graph problems, Fast Fourier transforms.

Cpr E 531. Information System Security. (3-0) Cr. 3. Preq: 489 or 530 or Com S 586 or MIS 335. Computer and network security: basic cryptography, security policies, multi-level security models, attack and protection mechanisms, legal and ethical issues.

Cpr E 533. Cryptography. (Same as Math 533.) See Mathematics.

Cpr E 534. Legal and Ethical Issues in Information Assurance. (3-0) Cr. 3. S. Preq: 531. Legal and ethical issues in computer programming, networks, and information systems. Privacy issues.

Cpr E 537. Wireless Network Security. (3-0) Cr. 3. S. Preq: Credit or enrollment in 489 or 530. Introduction to the physical layer and special issues associated with security of the wireless interface. Wireless networking, base stations, mobile stations, airlink access, jamming, spoofing, signal intercept, wireless LANs, wireless modems, cellular radiotelephones, optical links, signal monitoring, parallel programming.

Cpr E 541. High-Performance Communication Networks. (3-0) Cr. 3. Preq: 530 or Com S 586. Selected topics from recent advances in local area networks, metropolitan area networks, asynchronous transmission, high-speed optical networks, high-speed switch architectures, multicasting for teleconferencing applications, wireless and mobile computing.

Cpr E 549. Advanced Algorithms in Computational Biology. (Same as Com S 549, BCB 549.) (3-0) Cr. 3. S. Preq: Com S 311. Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees, and protein folding.

Cpr E 554. Distributed and Network Operating Systems. (Dual-listed with 544; same as Com S 554.) See Computer Science.

Cpr E 556. Software Systems Engineering, (3-0) Cr. 3. Preq: 526 or 454/584. Design and development of software systems for parallel and distributed environments, cluster-based computing, component-based system development, user interfaces, and software testing. Projects for parallel and distributed computing, software agents, and web-based systems.

Cpr E 558. Real-Time Systems. (Dual-listed with 458.) (3-0) Cr. 3. Preq: 308 or Com S 352. Fundamental concepts of real-time systems. Real-time task scheduling paradigms. Resource management issues in uniprocessor real-time systems (including RMS and EDF scheduling, priority inheritance, and levels of priority). Preemptible and nonpreemptible tasks. Multiprocessor real-time systems (including scheduling, fault-tolerance, run-time anomaly and resource reclamation, distributed real-time systems, and real-time scheduling). Enabling techniques (including QOS routing, service disciplines, dependable communication, and real-time MAC protocols). Feedback control real-time scheduling, study of real-time system architectures, operating systems, and programming languages.

Cpr E 564. Synthesis and Optimization of Digital Circuits. (3-0) Cr. 3. S. Preq: 305. Algorithms and techniques to generate application-specific VLSI circuits from high-level behavioral modeling in hardware description languages. Hardware models, architectural-level synthesis and optimization, scheduling algorithms, resource sharing and binding, logic-level synthesis and optimization, sequential logic optimization, synthesis of reconfigurable hardware/software co-design.

Courses and Programs  Computer Science  183

Students majoring in computer science must successfully complete this premajor program prior to taking any other courses in the Department. Thus, for computer science majors, this premajor serves as a necessary prerequisite to all the other courses offered by the Department.

A minimum of 44 credits is required for the B.S. degree in computer science. The required courses are: Com S 101, 104, 203, Cpr E 210, Com S 227, 228, 309, 311, 321, 330, 331, 342, 352, 362 or 363. In addition, two advanced-level courses must be selected from the following groups:

Group W: 411, 440, 454, 476, Math 421
Group B: 401, 410, 425, 430, 461, 472, 474
Group N: 418, Math 471, Math 481, Cpr E 484, Cpr E 489, M E 519

Courses in Group W require written reports and those in Group B require both oral and written reports. Students must take one course from Group B and one course from any Group.

Students must earn a C- or better in each course in the department which is a prerequisite to a course listed in the student’s degree program.

Graduate Study

The department offers work for the degrees of master of science and doctor of philosophy with a major in Computer Science. The doctor of philosophy may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers minor work to students majoring in other departments.

Facilities exist for research in such areas as algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computer networks, database systems, computer graphics, computer vision, computer-aided design, hardware and software, compiler design, programming languages, robotics and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in Computer Science have completed a bachelor’s degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as mathematical, physical, or biological science or engineering, become successful graduate students in Computer Science.

For the degree of master of science, a minimum of 31 semester credits are required. A thesis demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The Ph.D. requirements, governed by the student’s program of study committee within established guidelines of the department and
Courses and Programs

Computer Science

the graduate college, include coursework, demonstrated proficiency in three areas of Computer Science, a research skills require-
ment, a preliminary examination, and a doctoral dissertation and final oral examination.

The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Courses Primarily for Undergraduate Students

Com S 101. Orientation. (1-0) Cr. R. F.S. Introduction to the procedures and policies of Iowa State University and the Department of Computer Science, test-outs, honorary societies, etc. Issues relevant to student adjustment to college life will also be discussed. Offered on a satisfactory-fail grading basis only.

Com S 103. Computer Applications. (3-2) Cr. 4. F.S. Introduction to computer literacy and applications. Applications include the Web, email, word processing, spreadsheets, database management and presentation software. Literacy: history of computing, structure of comput-
ers, telecommunications, computer ethics, computer crime, and history of programming languages. No prior computer experience necessary.

Com S 104. Introduction to Computers. (3-2) Cr. 4. F.S. Use of personal computer and workstation operating systems and software. Overview of machine architecture and telecommunications. Project-orient-
ed approach to word processing, spreadsheet, pre-
sentation, database management, e-mail, Internet usage, HTML and other software. Beginning pro-
gramming in Visual Basic, and animation scripting. Topics from computer history, programming lan-
guages, algorithm development, and societal impact. No prior computer experience necessary. This course is for computer science majors.

Com S 107. Applied Computer Programming. (3-0) Cr. 3. F.S. Prereq: 103, Math 104 or 140 or 150. Introduction to computer programming for non-
majors using a language such as the Visual Basic lan-

Com S 201. Computer Programming in COBOL. (3-0) Cr. 3. F.S. Prereq: 107 or 207 or 227. Computer programming in COBOL. Emphasis on the design, writing, debugging, and testing of business applications programs in a transaction-oriented environment.

Com S 203. Careers in Computer Science. (1-0) Cr. R. F.S. Computer science as a profession. Introduction to career fields open to com-
puter science majors. Relationship of coursework to careers. Presentations by computer science profes-
sionals. Offered on a satisfactory-fail grading basis only.

Com S 207. Programming I. (3-1) Cr. 3. F.S. Prereq: Math 150 or placement into Math 140/141/142 or higher. An introduction to computer programming using an object-oriented programming language. Emphasis on basics of good programming tech-
niques and style through extensive practice in top-
down design, writing, running, and debugging small programs. Procedural abstraction. Use of abstract data types. This course is designed for nonmajors. Credit may not be applied toward graduation for both 207 and 227.

Com S 208. Programming II. (3-1) Cr. 3. F.S. Prereq: 207, credit or enrollment in Math 151, 160, or 165. An introduction to data structures and algo-
rithm analysis. Review of list and file processing. Dynamic data structures. Data abstraction and imple-
mentation. Emphasis on design, writing, document-
ing and testing medium-sized programs. This course is designed for nonmajors. Credit may not be applied toward the major.

Com S 227. Introduction to Object-oriented Programming. (3-1) Cr. 3. F.S. Prereq: 104 or 107 or prior programming experience, credit or enrollment in Math 165. An introduction to object-oriented design and programming techniques. Symbolic and numerical computation. Recursion and iteration. Modularity procedural and data abstraction, specif-
cations and subtyping. Object-oriented imperative programming in C++. Emphasis on principles of programming and object-oriented design through extensive practice in design, writing, running, debug-
ging, and reasoning about programs. This course is designed for majors. Credit may not be applied toward graduation for both 207 and 227.

Com S 228. Introduction to Data Structures. (3-1) Cr. 3. F.S. Prereq: 227, Math 165, credit or enrollment in Math 104 and Math 166. An object-oriented approach to data structures and algorithms. Object-
oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and sub-
type polymorphism. Abstract data type specification and correctness. Inherently associated algo-
rithms, including stacks, queues, trees, searching, sorting, graphs and file processing. Analysis of algo-
ritms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

Com S 290. Independent Study. Cr. arr. F.S. Prereq: Permission of instructor. Offered on a satisfac-
tory-fail grading basis only. H. Honors.

Com S 309. Software Development Practices. (3-1) Cr. 3. F.S. Prereq: 228, Engl 104. A practical introduc-
tion to methods for managing software develop-
ment. Process models, requirements analysis, struc-
tured and object-oriented design, coding, testing, maintenance, cost and schedule estimation, metrics. Programming projects. Nonmajor graduate credit.

Com S 311. Design and Analysis of Algorithms. (3-1) Cr. 3. F.S. Prereq: 228, Math 166, Engl 104, and either 330 or Cpr E 310. Basic techniques for design and analysis of data structures and algorithms. Sorting, search-
ing, graph algorithms, computational geometry, string processing and NP-completeness. Design tech-
niques such as dynamic programming and the greedy method. Data structures. Average-case, worst-
case and amortized analyses. Data structures includ-
ing heaps, hash tables, binary search trees and red-
black trees. Programming projects. Nonmajor gradu-
ate credit.

Com S 321. Introduction to Computer Architecture and Machine-Level Programming. (3-1) Cr. 3. F.S. Prereq: 228, Cpr E 210 and Engl 104. Introduction to computer architecture and organiza-
tion with emphasis on instruction set architecture, memory-hier-
archy design, and performance. Machine level pro-
gramming including assembly language. Input/output and interrupts. Nonmajor graduate credit.

Com S 330. Discrete Computational Structures. (3-1) Cr. 3. F.S. Prereq: 228, Math 166 and Engl 104. Concepts in discrete mathematics as applied to com-
puter science. Logic, proof techniques, set theory, relations, graphs, combinatorics, discrete probability and number theory. Nonmajor graduate credit.

Com S 331. Theory of Computing. (Same as Ling 331.) (3-1) Cr. 3. F.S. Prereq: Math 166, Engl 104, and either 330 or Cpr E 310. Models of computation: finite state automata, pushdown automata and Turing machines. Study of grammars and their rela-
tion to automata. Limits of digital computation, unsolvability and Church-Turing thesis. Chomsky hierarchy and relations between classes of lan-
guages. Nonmajor graduate credit.

Com S 352. Introduction to Operating Systems. (3-1) Cr. 3. F.S. Prereq: 321, Engl 104, and either 362 or 363. Survey of operating system issues. Introduction to hardware and software components including: processors, peripherals, interrupts, man-
gement of processes, threads and memory, dead-
locks, file systems, protection, virtual machines and system organization, and introduction to distributed operating systems. Programming projects. Nonmajor graduate credit.

Com S 362. Object-Oriented Analysis and Design. (3-0) Cr. 3. F.S. Prereq: 228. Object-oriented require-
ments analysis and systems design. Design nota-
tions such as the Unified Modeling Language. Design Patterns. Group design and programming with large programming projects. Nonmajor graduate credit.

Com S 363. Introduction to Database Management Systems. (3-0) Cr. 3. Prereq: 228 and Engl 104. Relational, object-oriented, and semistruc-
tured data models and query languages. SQL, ODMG, and XML standards. Database design using entity-relationship model, data dependencies and object definition language. Application development in SQL for the languages as a support host lan-
guages with application program interfaces. Information integration using data warehouses, mediators and wrappers. Programming Projects. Nonmajor graduate credit.

Com S 398. Cooperative Education. Cr. R. Required of all cooperative students. Prereq: Permission of department chair. Students must reg-
ister for this course prior to commencing each work period.

Com S 401. Computer-Based Information Systems. (2-2) Cr. 3. F.S. Prereq: Engl 105, Sp Cm 212, an additional 9 credits in Com S at the 200 level or above and either 362 or 363. Systems concepts and implementation of request-oriented information systems; data and terminal access methods; operating systems implementations; data base management systems implementations; data dictionary considerations; data communication con-
siderations; lab experiments and implementations. Oral and written reports. Nonmajor graduate credit.

Com S 410. Research Projects. (3-0) Cr. 3. Prereq: Engl 105, Sp Cm 212, 21 credits in Com S, and per-
mission of instructor. Students enrolling in this course will work individually or in a small group with a faculty member on mutually agreed-upon projects and research. Oral and written reports. Intended pri-
marily for students interested in graduate school or with a strong interest in computer research.

Com S 411. Specification and Design in Software Engineering. (3-1) Cr. 3. Alt. F., offered 2001. Prereq: 311 or CPR E 305, Engl 105, Sp Cm 212. Principles and techniques for methodical construc-
tion of quality software. Software requirements specification; programming paradigms; module spec-
ification techniques; testing and validation proce-
dures; proof of program correctness. Emphasis on team projects. Written reports. Nonmajor graduate credit.

Com S 418. Introduction to Computational Geometry. (Dual-listed with 516.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 311. Introduction to data struc-
tures, algorithms and analysis techniques for compu-
tational problems that involve geometry. Line seg-
ment intersection. Polygon triangulation and visibility problems. Range queries. Point location.

Com S 421. Logic for Mathematics and Computer Science. (Same as Math 421.) See Mathematics.
Courses and Programs

Computer Science

186

distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-processes communications, layered communication protocols, interconnection, and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.

Com S 586. Computer Network Architectures. (3-0) Cr. 3. F. Prereq: 511, 552 or Cpr E 489. Design and development of advanced computer communication networks: distributed and fault-tolerant routing in large and dynamic networks, gateways and interconnection of heterogeneous networks, flow control and congestion avoidance techniques, network architectures, communication protocol standards, formal specification and verification techniques, protocol implementation and conformance testing of protocol standards, network security and web computing.

Com S 590. Special Topics. Cr. arr. Prereq: Permission of instructor. Offered on a satisfactory-fail grading basis only.

Com S 591. Graduate Orientation Seminar. (1-0) Cr. 1. F. Prereq: Graduate classification. Topics include an introduction to ISU computing facilities, M.S. and Ph.D. degree requirements, career choices, ethics, literature searching, technical presentations, technical writing, ethics in writing, and discussion of research interests and projects by members of the graduate faculty. Required by the M.S. degree and is taken during the first semester of a normal M.S. program. Offered on a satisfactory-fail grading basis only.

Com S 594. Computational Molecular Biology. (Same as Gen 594.) See Genetics.

Com S 596. Genomic Data Processing. (Same as Gen 596.) See Zoology and Genetics.

Courses for Graduate Students

Com S 610. Seminar. Cr. arr. Offered on a satisfactory-fail grading basis only.

Com S 673. Advanced Topics in Artificial Intelligence and Cognitive Modeling. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 572 or 472 or 474. Advanced study of selected topics from among the following: distributed intelligent information networks, intelligent systems in computational biology and bioinformatics, intelligent agents in multi-agent systems, neural and evolutionary computation.

Com S 699. Research. Offered on a satisfactory-fail grading basis only.

2001-2003
distributed and network operating systems and distributed computing environments (DICE). The client server paradigm, inter-processes communications, layered communication, synchronization, and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.

Com S 572. Principles of Artificial Intelligence. (Dual-listed with 574) (3-0) Cr. 3. F. Prereq: 311, 330 or Cpr E 310. Com S 342 or 362 or comparable program experience. Specification, design, implementation, and selected applications of intelligent software and reasoning systems. Algorithmic models of problem solving, knowledge representation, reasoning, planning, decision making, learning, perception, action, communication and interaction. Reactive, deliberative, rational, adaptive, learning and communicative agents. Artificial intelligence programming. Graduate credit requires a research project and a written report. Oral and written report.

Com S 586. Computer Network Architectures. (3-0) Cr. 3. F. Prereq: 511, 552 or Cpr E 489. Design and development of advanced computer communication networks: distributed and fault-tolerant routing in large and dynamic networks, gateways and interconnection of heterogeneous networks, flow control and congestion avoidance techniques, network architectures, communication protocol standards, formal specification and verification, protocols, implementation and conformance testing of protocol standards, network security and web computing.

Com S 590. Special Topics. Cr. arr. Prereq: Permission of instructor. Offered on a satisfactory-fail grading basis only.

Com S 591. Graduate Orientation Seminar. (1-0) Cr. 1. F. Prereq: Graduate classification. Topics include an introduction to ISU computing facilities, M.T. and Ph.D. program requirements, career chances, ethics, literature searching, technical presentations, technical writing, ethics in writing, and discussion of research interests and projects by members of the graduate faculty. Required by the M.S. degree and is taken during the first semester of a normal M.S. program. Offered on a satisfactory-fail grading basis only.

Com S 594. Computational Molecular Biology. (Same as Gen 594.) See Genetics.

Com S 596. Genomic Data Processing. (Same as Gen 596.) See Zoology and Genetics.

Com S 699. Research. Offered on a satisfactory-fail grading basis only.

Construction Engineering

(Administered by the Department of Civil and Construction Engineering)

Jim Rowings, Professor in Charge

Undergraduate Study

For undergraduate curriculum in construction engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Construction engineering is a curriculum administered by the Department of Civil and Construction Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science, see the College of Engineering, Curricula. General objectives, which are common to all departments in engineering, are stated in the College of Engineering, Objectives of Curricula in Engineering. The curriculum in construction
engineering is designed with the objective to prepare students for life-long careers in the constantly changing technical and managerial environment of the construction industry. Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of the business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical or electrical construction.

The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction where-by designer’s plans and specifications are converted into physical structures and facilities. To achieve this, a construction engineering graduate should have:

- confidence.
- initiative.
- demonstrated leadership ability.
- proficiency in engineering design which includes an ability to:
  - apply knowledge of mathematics, science, and engineering.
  - design and conduct experiments, as well as to analyze and interpret data.
  - to identify, formulate, and solve engineering problems.
  - design a system, component, or process to meet desired needs.
- an understanding of:
  - the overall construction process.
  - the estimating process.
  - the planning and scheduling process.
  - contracts and laws.
  - business and management.
  - of ethical reasoning.
  - contemporary issues in the industry.
  - construction engineering and the industry’s impact on society.
  - business and construction engineering terminology.
- an ability to:
  - function in multi-disciplinary teams.

- communicate orally, graphically and in writing.
- desire for life-long learning and intellectual and professional growth.
- an awareness of modern techniques, skills and technologies for construction.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

- interact with practicing professionals.
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
- develop leadership skills by participating in student organizations.
- develop, analyze, and interpret alternative solutions to open-ended problems.
- study abroad.

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student’s perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study-abroad programs. Interested and qualified students have the opportunity to participate in the cooperative education program or internship program to supplement academic work with work experience. See Cooperative Education Programs, College of Engineering.

Construction engineering students are encouraged to participate in life-long learning, continuous professional development, and to achieve either professional engineer registration certified professional constructor.

Qualified construction engineering students with 30 credits of completing their undergraduate degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering Graduate Study for more information.

Graduate Study

An area of specialization in construction engineering is offered within the graduate program of the Department of Civil and Construction Engineering. See Civil Engineering, Courses and Programs.

Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs.

Courses open for nonmajor graduate credit: 322, 340, 351, 380, 421, 441.

Courses Primarily for Undergraduate Students

Con E 110. Introduction to Construction Engineering. (3-4) Cr. R. S. 2 weeks. The nature and scope of the construction industry. Overview of the profession and education for the constructor. Saturday field trip.

Con E 220. Construction Management. (3-0) Cr. 3. Prereq: Engr 180 or 161. To develop working knowledge of the construction industry for the design professional. The topics covered represent the major topics that define the roles and responsibilities of the design professional working in the industry. The topics covered include: the construction industry, project delivery system, cost control, construction insurance and bonds, safety, labor relations, project administration.

Con E 221. Contractor Organization and Management of Construction. (4-0) Cr. 4. F. S. Prereq: Completion of basic program and Engr 170. Entry level course for construction engineering. Integration of significant statistical, engineering, economics, and management issues related to efficient construction company operations. Probability and statistics; time value of money; methods of evaluating alternative projects; organization; operations; construction company administration; marketing; insurance and bonding; project safety; labor law; productivity; total quality management, and motivation and leadership.

Con E 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

Con E 322. Construction Equipment and Heavy Construction Methods. (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 322, E M 324. Planning and field engineering for concrete and steel construction. Design and applications of concrete formwork to construction. Erection of structural steel. Nonmajor graduate credit.

Con E 351. Mechanical and Electrical Systems for Buildings. (3-2) Cr. 4. F.S. Prereq: 241, Phys 222. Comprehensive coverage of the major building systems including mechanical systems, electrical systems, plumbing, fire protection, security, vertical transportation, lighting, acoustics and communications. The course will include analysis techniques and design principles for each system. A comprehensive design project is required for a major building project. Nonmajor graduate credit.

Con E 380. Engineering Law. (3-0) Cr. 3. F. S. Prereq: Junior classification. Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability. Emphasis on development of critical thinking process, abstract problem analysis and evaluation. Nonmajor graduate credit.

Con E 396. Summer Internship. Cr. R. S. Prereq: Permission of department. Summer professional work period.

Con E 397. Engineering Internship. Cr. R. F.S. Prereq: Permission of department. Professional work period, one semester maximum per academic year.

Con E 398. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Con E 441. Construction Planning, Scheduling, and Control. (1-2) Cr. 2. F.S. Prereq: Credit or enrollment in Con E 421. Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer applications. Nonmajor graduate credit.

Con E 490. Independent Study. Cr. 1 to 5 each time taken. F.S.SS. Prereq: Permission of instructor. Individual study in any phase of construction engineering. Pre-enrollment contract required.

Con E 495. Research Methods in Construction Engineering and Management. (1-0) Cr. 1. Prereq: Credit or enrollment in Con E 421. Assigned readings and reports on research methods to solve construction engineering and management problems such as robotics, project controls, automation, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

Primary Courses
CJ St 320. American Judicial Process. (Same as Pol S 320.) See Political Science.
CJ St 332. Philosophy of Law. (Same as Phil 332.) See Philosophy. Nonmajor graduate credit.
CJ St 341. Criminology. (Same as Soc 341.) See Sociology.
CJ St 460. Criminal and Juvenile Justice Practicum. (Same as Soc 460.) See Sociology.

Curriculum and Instruction

Elizabeth A. Thompson, Chair of Department

Professors: Abelison, Andre, Carter, Dake, Davis, Duffelmeyer, Greenbouve, Keller, Martin, McCormick, Messenger, W. Miller, Owen, Phye, Tanner, Thompson, Williams, Willis

Distinguished Professors (Emeritus): Moyer, Rasmussen

University Professors (Emeritus): Brown

Professors (Emeritus): Barnhart, Bath, Baum, Breiter, Burkhalter, Charles, Coulson, Daly, Dilts, Downs, Heyde, Hoerner, Hunter, Rudolph, Schloerke, Schneider, Smith, Thomas, Volker, Zbaracki

Associate Professors: Allen, Bloom, Blount, Carlson, Fuhrer, Hand, Hausafus, Kelly, Merkley, G. Miller, Payne, Schilling, Sharp, Stuart, Torrie

Associate Professors (Adjunct): Rosenbusch

Associate Professors (Collaborators): Appelgate, Garloff

Associate Professors (Emeritus): Amos, Eber

Assistant Professors: Allen, Andreotti, Clough, Foegen, Hargrave, Koeppen, Leigh, C. Lubienski, S. Lubienski, Munsen, Ohlund, Olson, Tartakov

Assistant Professors (Adjunct): Rieck, Schmidt, Sommerville, Whigham

Assistant Professors (Emeritus): Chatfield

Instructors (Adjunct): Connor, Killmer

Undergraduate Study

The Department of Curriculum and Instruction provides the professional education coursework that leads to licensure of pre-service teachers. Students major in elementary education for K-6 teaching licensure or early childhood education for a birth through third grade license. Secondary licensure students major in their respective content areas. Early childhood education and elementary majors must complete a professional course sequence: C1 201, 204, 333, and 406.

The department offers a minor in educational computing that may be earned by completing the following courses: C1 201; CoM S 107 or CoM S 207 or Cpr EMat E 370; C1 280A; 280B; 302; 403; and 405 or 407.

Graduates of the elementary education program will be able to demonstrate through professional practice their understanding of academic disciplines, teaching and learning, the nature of the student, and how to adapt instruction for diversity. More specifically, graduates will be able to demonstrate their understanding of concepts and structures of disciplines, tools of inquiry, how students learn and develop, and the effects of individual differences on learning. Graduates will be able to demonstrate a broad range of instructional strategies, including knowledge of technology applicable to instruction. In their teaching, graduates will demonstrate the ability to stimulate active inquiry with collaboration and supportive interaction among their students. In appropriate settings graduates will demonstrate their ability to develop professional relationships with colleagues, parents, and agencies that support students and their learning.

Early Childhood Education

The curriculum in early childhood education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies including schools. The program is administered jointly by the Department of Curriculum and Instruction in the College of Education and the Department of Human Development and Family Studies in the College of Family and Consumer Sciences.

Elementary Education

For the undergraduate curriculum in elementary education, leading to the degree bachelor of science, see College of Education Curriculum.

The curriculum in elementary education is planned for persons who want to teach at the elementary school level. Endorsements in English/language arts, basic science, social studies, mathematics and multicultural resource teaching are available for elementary education students. An endorsement for teaching foreign language in elementary schools is available through the Department of Foreign Languages and Literatures. Students

Criminal Justice Studies

(Interdepartmental Undergraduate Program)

Matthew J. DeLisi, Program Coordinator

The criminal justice studies minor, a cross-disciplinary course of study in the College of Liberal Arts and Sciences, offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real world problems, and to plan a career in criminal or juvenile justice.

Students who declare a minor in criminal justice studies are required to complete an orientation course, a professional seminar, a core curriculum, and a practicum. Students should contact the program coordinator for information and program planning.

Courses open for nonmajor graduate credit: 332.
who enroll in elementary education must make application to and be accepted by the departmental teacher education committee and the University Teacher Education Committee, prior to enrolling in advanced elementary education courses. For admission and licensure requirements, see College of Education.

Secondary Education

Students seeking recommendations for a license to teach in the secondary schools must be admitted to the teacher education program and pursue a program that includes the following: C I 201, 204, 333, 406, 415, 426; special methods; and student teaching in the area of specialization.

All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the teacher education program and be recommended by the College of Education. Each student will be enrolled in the department in which he or she plans to major, and must meet the graduation requirements of that department and the college in which it is located. For specific requirements for each area of specialization, see Teacher Education and curricula for the college in which the chosen degree major is sought.

Graduate Study

The Departments of Curriculum and Instruction and Educational Leadership and Policy Studies offer work for the degrees master of science, master of education, and doctor of philosophy with a major in education and minor work to students taking major work in other departments. Within the education major in the Department of Curriculum and Instruction a student may earn an education degree with no area of specialization (master’s and doctorate) or specialize in elementary education (master’s only), historical, philosophical, and comparative studies in education (master’s only), special education (master’s only), or curriculum and instructional technology (master’s and doctorate). A professional certificate program in special education is available to graduate students who seek a teaching endorsement in special education, but do not wish to pursue a master’s degree. See Educational Leadership and Policy Studies for further discussion of the education major with specialization in adult and extension education; counselor education; educational administration; higher education; and research and evaluation.

Students may choose an area of specialization for study. Available areas include curriculum and instructional technology, elementary education, and special education. The specialization in curriculum and instructional technology is designed to prepare candidates as researchers and practitioners in the fields of curriculum and instructional technology. The specialization in elementary education is designed to prepare candidates for teaching and curricular leadership positions in elementary settings. The special education specialization is designed to prepare candidates as practitioners and researchers in the field of mild disabilities. Graduate endorsement programs in learning disabilities, behavioral disorders, multilingual education, special education consultant, K-12 school media specialist, reading, and talented and gifted are administered through the Department of Curriculum and Instruction. Students may also opt not to select an area of specialization.

Prerequisite to major graduate work in education is preparation substantially equivalent to the completion of one of the undergraduate curricula in education offered at Iowa State University, or graduate preparation in a discipline to be used as a teaching field in community college or university, and adequate proof that the student ranks above average in scholastic ability and promise of professional competence.

The foreign language requirement, if any, for the Ph.D. degree will be determined by the student’s program of study committee. If no foreign language is required, the total program must consist of a minimum of 78 semester credits, at least 12 of which must be earned outside the education major, and at least 16 of which must be earned outside the area of specialization. Statistics and research methods may not be included in the 16 credits. Should foreign language be included, the program of study committee may adjust the minimum program requirement downward, but in no instance may the program of study be less than 72 semester credits. Students whose native language is not English may substitute competence in English. All applicants for the Ph.D. must submit Graduate Record Examination (GRE) scores.

Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. Students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Health and Human Performance, Industrial Technology, Educational Leadership and Policy Studies, and General Graduate Studies or to graduate level course offerings within other departments.

Courses open for nonmajor graduate credit: C I 457, 486; Sp Ed 457.

Courses and Programs

Curriculum and Instruction

Courses Primarily for Undergraduate Students

C I 115. First Year Orientation. Cr. R. F. Overview of elementary and early childhood education, curricular opportunities, transitions to college and community life, and university procedures. Required of all first-semester freshmen majoring in elementary or early childhood education and advised in the College of Education. Offered on a satisfactory-fail grading basis only.

C I 201. Introduction to Instructional Technology. (2-2) Cr. 3. Overview of instructional technology, with an emphasis on uses in education. Instructional applications of computers and computer-based learning, including tool software, interactive multimedia, Web page development, and use of digital video and sound. Pedagogical considerations in the use of technology. Laboratory software and software that facilitate teaching and learning.

C I 204. Social Foundations of American Education. (3-0) Cr. 3. F.S.SS. Goals of schooling, including the roles of teachers today; historical development of schools; educational reforms and alternate forms; and current philosophical issues. Human relations aspects of teaching and discussions about teaching as a career.

C I 206. Learning of Science. (1-0) Cr. 1. S. Prereq: Concurrent enrollment in Mteor 206. Critical analysis of personal and K-12 student learning of science concepts. Use of computer simulations to ground student learning experiences; constructivist approach to learning science with emphasis on metacognition; design of science lessons.

C I 245. Strategies in Teaching. (2-0) Cr. 2. F.S.SS. Prereq: 204; HD FS 220 or 221 or 226 (or concurrent enrollment in one of these courses); concurrent enrollment in C I 288; eligibility for admission to teacher education program. Introduction to elementary education teaching strategies, classroom management, and curriculum organization. Open to students in the elementary education curriculum or the early childhood education curriculum.

C I 250. Education of the Exceptional Learner in a Diverse Society. (Same as Sp Ed 250.) See Special Education.

C I 268. Strategies Practicum. (0-2) Cr. 1. F.S.SS. Prereq: 204. Clinical experience, to be taken concurrently with C I 284. Offered on a satisfactory-fail grading basis only.

C I 280. Pre-Student Teaching Experience. Cr. 0.5 to 2 each time taken, maximum of 8 credits. F.S.SS. 280A may be taken for enrollment in 280B-L, 280A must be either a prerequisite or taken concurrently. Field experience in area educational settings. 1-2 hour blocks of time needed for field experience. Offered on a satisfactory-fail grading basis only.

A. Teacher Aide. Cr. 1 or 2
B. Educational Computing. Cr. 1 or 2 (2 credits by permission only).
C. Native American Tutoring. Cr. 1
D. Museum Education. Cr. 1
E. Multicultural Youth Experience. Cr. 1 or 2
F. International Student. Cr. 1 or 2 (Permission of instructor required.)
G. Gifted and Talented Students. Cr. 1
H. Multicultural. F. Cr. 1 (concurrent with Sp Ed 330).
J. Mathematics. Cr. 1
K. Science. Cr. 1
L. Early Field Experience. Cr. .5
M. Secondary Science. Cr. 2

C I 281. The Special Needs Student Experience. (0-4) Cr. 2 each time taken, maximum of 6 credits. F.S.SS. Seminars and visits to public schools serving special students. One week practicum at the Iowa School for the Deaf, and the Iowa Braille and Sight Saving School. Offered on a satisfactory-fail grading basis only.

C I 282. The Urban Student Experience. (0-2) Cr. 1 or 2 each time taken, maximum of 4 credits. F.S.SS. Seminars and visits to urban schools and to organizations serving urban students. Offered on a satisfactory-fail grading basis only.

C I 290. Independent Study. Cr. 1 to 3. Prereq: 6 credits in education, permission of department head.

C I 302. Using Computers in the Classroom. (2-2) Cr. 3. F.S. Prereq: 201 or Com 5 107. Integrating computer applications into the curriculum; designing classroom applications for tool software; selecting and evaluating software for the classroom; issues and trends in computer based instruction.

C 133. Educational Psychology. (Same as Psych 333). (3-0) Cr. 3. F.S.SS. Prereq: 201, Psych 230 or HD FS 102, application to the teacher education program, major in education, or students working in middle school classrooms. Classroom learning and development, with emphasis on cognitive development, cognitive learning theory, and instructional techniques. Major emphasis on measurement theory and the classroom assessment of student learning.

C 347. Nature of Science. (Dual listed with 547.) (3-0) Cr. 3. Prereq: 280M. The intersection of issues in the history, philosophy and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C 377. The Teaching of Reading and Language Arts in the Primary Grades (K-3). (4-0) Cr. 4. Prereq: 245, 250, HD FS 226, 240, admission to teacher education program; concurrent enrollment in 448, 468A, 468C. Theories, teaching strategies, and instructional materials pertinent to teaching reading, writing, listening, and speaking to children in kindergarten through third grade.

C 378. The Teaching of Reading and Language Arts in the Intermediate Grades (4-6). (4-0) Cr. 4. Prereq: 377; concurrent enrollment in 449, 468B, 468D. Theories and processes of literacy. Application through reading and writing across the curriculum, integration of language arts, literature-based instruction, and metacognitive strategies.

C 1392. Secondary Science Methods I. (2-0) Cr. 2. Prereq: 367, concurrent enrollment in 347, concurrent enrollment in 468J. Development of a research-based framework for teaching science that includes student goals, concepts, processes, the changing role of science inquiry, teaching behaviors and strategies, contemporary learning theories, and self-evaluation.

C 395. Teaching Reading in Middle and Secondary Schools. (3-0) Cr. 3. F.S. Prereq: 204. Analysis and application of strategies to enhance students’ literacy development in middle and secondary school settings.

C 1398. Middle School Curriculum Design and Instruction. (3-0) Cr. 3. Prereq: Admission to teacher education program. Emphasis on components of interdisciplinary teaching, curriculum frameworks, instructional strategies, teacher-based guidance, and assessment.

C 399. Middle School Student Growth and Development. (3-0) Cr. 3. Prereq: Psych 230. Study of the physical, emotional, intellectual, and social development of 10 to 15 year old middle school students, with emphasis on implications for schools and teachers. Includes strategies for classroom management, analysis of students’ interactions, issues of risk, resiliency, substance abuse, suicide, and sexuality will also be examined.

C 405. Applications of the Internet in Education. (3-0) Cr. 3. Prereq: 201. Integrating communication and information technologies into educational settings. Designing and constructing Web-based instructional materials that support various educational theories and approaches. Effective Web-based design, advanced HTML, and search strategies with critical examination of interactive Web-based instructional projects in classrooms.

C 406. Multicultural Gender Fair Education. (3-0) Cr. 3. F.S.SS. Prereq: 201, 333, junior classification, admission to teacher education program. Awareness and application of current trends and issues in multicultural education, gender education, multicultural concepts and theories, cultural group’s perceptions, needs, and contributions, problems and issues regarding ethnic diversity, pre-service teachers’ perspectives on race, class, gender, and language in the school environment; curriculum infusion and transformation, multicultural gender fair interaction, design and execution of teaching strategies.

C 407. Principles and Practices of Flexible and Distance Education. (Dual listed with 567 I 20). Cr. 2. F.S. Prereq: 201; convenient access to the Web. This course will be offered in flexible and distance learning (FDL) modes, mainly utilizing telecommunication technologies including CD, FDL cases in a variety of contexts and pedagogical styles, research into relevant topics. Identification of underlying principles and frameworks for best practice in this field.

C 415. Senior Seminar. Cr. 1 F.S. (Same as HD FS 434). Prereq: Senior classification, admission to teacher education program, concurrent enrollment in 426. Overview of requirements for teacher certification in Iowa and other states; functions of Education Student Services examined; interviewing procedures.

C 416. Supervised Student Teaching. Cr. var. F.S. Prereq: GPA 2.5; full admission to teacher education; senior classification, 201, 378, 442, 448, 448, reservation required. Supervised teaching experience in the elementary grades.

A. Primary grades.
B. Intermediate grades.
C. Foreign Languages.
D. International Student Teaching - Primary grades.
E. International Student Teaching - Intermediate grades.

C 417. Student Teaching. (Same as LAS 417.) See Liberal Arts and Sciences Cross-Disciplinary Studies.

C 426. Principles of Secondary Education. (Dual-listed with 524.) (3-0) Cr. 3. F.S.SS. Prereq: 201, senior classification, admitted to teacher education program, concurrent enrollment in 415. The curriculum, how to make accommodations for students with special needs, human relations, student evaluation, support services, classroom management, organization of schools, legal aspects of schools, professionalism, and career planning. A planned field experience is a professional growth activity included in the course. Students often enroll in 480 concurrently with this course.

C 427. Project Opportunity Capstone. (2-0) Cr. 2. S. Issues in education as related to beginning teachers: assessment, classroom management, law, special education, extracurricular teaching, reflectivity, technology. Offered on a satisfactory-fail grading basis only.

C 443. The Teaching of Social Studies. (3-0) Cr. 3. F.S.SS. Prereq: 377. Study, development, and application of current methods, curriculum materials, and assessment strategies for providing appropriate social studies learning experiences for primary and intermediate grade children.

C 450. Ethnicity and Learning. (3-0) Cr. 3 F.S. Prereq: 245. Examination of cultural relevance in education. Development and application of strategies and techniques for implementing multicultural goals and multiethnic perspectives in the elementary school classroom setting.

C 451. Ethnicity and Learning Practicum. (1-4) Cr. 3. Prereq: 450. Field experience in a multiethnic or ESL班级 as a Secondary Language classroom setting. Students must have one full day or two half days open each week in order to participate.

C 456. Integrating Technology into the Reading and Language Arts Curriculum. (Dual-listed with 556.) (3-0) Cr. 3. S.SS. Prereq: 201, 377, Methods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classrooms.

C 457. Teaching Exceptional Learners in the Regular Classroom. (3-0) Cr. 3. Sp Ed 457. See Special Education. Nonmajor graduate credit.

C 458. Supervised Practicum in Teaching. Cr. 1 or 2. F.S.SS. Prereq: 245, 250, 268, admission to teacher education program. Observation, application of current methods, and instructional experiences with children in a supervised elementary classroom while engaged in other elementary methods courses. Offered on a satisfactory-fail grading basis only.

A. Primary Grades, Reading & Language Arts. Cr. 1
B. Primary Grades, Reading & Language Arts. Cr. 1
C. Mathematics. Cr. 1
D. Science. Cr. 1
E. Foreign Language. Cr. 1
F. Primary Grades, Literacy, Inclusive. Cr. 1
G. Primary Grades, Mathematics, Inclusive. Cr. 1
H. Primary Grades, Science, Inclusive. Cr. 1
I. Secondary Science I. Cr. 2
J. Secondary Science II. Cr. 2

C 478. Diagnosis and Correction of Reading Problems. (3-0) Cr. 3. F. Prereq: 478. Diagnosis of students with reading difficulties using formal, informal, and on-going assessment. Instructional strategies for mildly, moderately, and severely disabled readers.

C 480. Field Experience for Secondary Teaching Preparation. (Same as LAS 480.) See Liberal Arts and Sciences Cross-Disciplinary Studies.

C 486. Methods in Elementary School Foreign Language Instruction. (Same as F Lng 486.) See Foreign Languages and Literatures. Nonmajor graduate credit.

C 487. Methods in Secondary School Foreign Language Instruction. (Same as F Lng 487.) See Foreign Languages and Literatures.

C 488. Supervised Tutoring in Reading. (Dual-listed with 588.) (2-2) Cr. 3. Prereq: 416 or LAS 417. Using formal and informal diagnostic procedures to plan and implement individualized reading instruction. Field experience.
C I 490. Independent Study. Cr. 1 to 3. Prereq: GPA of 2.5 or more for preceding semester. A. Music Education. [Same as Music 490A.] See Music.
B. Vocational and Educational Guidance
C. Curriculum Construction
D. Principles of Education
E. Methods of Teaching
F. Educational Psychology
G. Instructional Technology
H. Honors
I. Foundations of Educational Statistics
J. Multicultural Education
K. Social Studies
L. Literacy Education
M. Mathematics Education
N. Foreign Language
O. Foundations of Education

C I 491. Educational Inquiry. (2-0) Cr. 2. F. Prereq: Participation in Project Opportunity. Introduction to research terminology, qualitative and quantitative methodology, data collection techniques, and research resources to more closely link research and practice for prospective teachers. Includes a field-based research component to synthesize coursework, field experiences, and related research.

C I 492. Methods for Teaching Science. [Same as LAS 492.] (2-0) Cr. 2. Prereq: 280M, 247, 397, 348; concurrent enrollment in 486K. Advancing a research-based framework for teaching science in a variety of school settings; emphasizing the teacher’s role, the development and revision of science curriculum, management strategies, technology and student assessment.

C I 493. Methods of Teaching History/Social Sciences. [Same as LAS 483.] See Liberal Arts and Sciences Cross-Disciplinary Studies.

C I 495B. Teaching Speech. [Same as Sp Cm 495B.] See Speech Communication.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

C I 503. Theories of Designing Effective Learning and Teaching Environments. (3-0) Cr. 3. F. Prereq: 501. Introduction to models and theories of instructional design. Examination of models based on behavioral, information processing, and cognitive science theories. Emphasis on the teacher’s role, constructivist theories and interpretivist epistemologies.

C I 504. Managing and Evaluating Instructional Technology Programs. (3-0) Cr. 3. F. Prereq: Graduate classification, 501. Principles and procedures for program review, assessment, and analysis of media/technology programs in education and corporate settings. Management theories and methods for planning, organizing, influencing, and operating the services in technology organizations. Includes facility planning, promotion, and public relations. Principles of staff training, proposal development, and legal issues related to media/technology support services.

C I 506. Multicultural Gender Fair Education in Curriculum Development and Instruction. (3-0) Cr. 3. F.S.SS. Prereq: 501; graduate classification. Theories, legal bases, and principles of multicultural gender fair education. Pluralism and contributing cultures in the United States; presence and contributions of cultural group diversity with implications for educational programs, curriculum development, classroom instruction, materials utilization and development; problems and issues, strategies and techniques, inquiry and research on multicultural gender fair education issues.

C I 507. Principles and Practices of Flexible and Distance Learning. (Dual-listed with 407 [1-2] Cr. 2. F. S.SS. Prereq: 505, convenient access to the Web. This course will be offered in flexible and distance learning (FDL) modes, mainly utilizing telecommunications including the Internet. Review of FDL cases in a variety of contexts and pedagogic styles, plus research into identification of underlying principles and frameworks for best practice in this field.

C I 508. Applications of Algebra in the K-8 Classroom. (3-0) Cr. 3. Prereq: Teaching license. Algebraic concepts with a focus on applying foundation ideas of generalizations of patterns, coordinate graphing, and relationships among variables into elementary and middle school classroom settings. Additional topics chosen from number theory and mathematics history will also be used to facilitate critical examination of elementary, teaching, pedagogy, and assessment.

C I 509. Applications of Geometry in the K-8 Classroom. (3-0) Cr. 3. Prereq: Teaching license. Euclidean and non-Euclidean explorations with a focus on applying the foundation ideas of axiomatic structure and relationships with simple geometric ideas into elementary and middle school classroom settings. Additional topics chosen from discrete mathematics, mathematics history, and fractal geometry will be used to facilitate critical examination of elementary, curriculum, pedagogy, and assessment.

C I 510. Advanced Integration of Technology in Education. (3-0) Cr. 3. S. Prereq: 505; Graduate classification. Exploration of applications of technology in educational settings. Development of advanced computer applications in relationship to the teaching and instruction.

C I 516. Antiracist Curriculum Development and Implementation, (2-2) Cr. 3. Prereq: 9 credits in education. Introduction to historical, sociological, philosophical and pedagogical foundations of antiracist/Multicultural education. Examination of causes of racism, other forms of discrimination, and intergroup conflict from different theoretical perspectives and experiential exercises.

C I 521. Surveying Gifted Education. (3-0) Cr. 3. Prereq: 9 credits in education. Survey of major areas of concern in the field of education for the gifted. Includes definitions, program objectives, program types, teaching strategies, and tools.

C I 523. Corrective Mathematics. (3-0) Cr. 3. S.SS. Prereq: 448. Identification, analysis, and correction of mathematics problems within the elementary program with an emphasis on alternative teaching strategies and curriculum development.

C I 526. Principles of Secondary Education. (Dual-listed with 426.) (3-0) Cr. 3. Prereq: 6 credits in education. The curriculum, how to make accommodations for students with special needs, human relations, student evaluation, support services, classroom management, organization of schools, legal aspects of schools, professionalism and career planning. A planned field experience is a professional growth activity included in the course.

C I 532. Methods, Models, and Materials for Teaching Gifted Children. (3-0) Cr. 3. Prereq: 9 credits in education including one course in gifted education. Teaching models and the methods and materials used with TAG students.

C I 533. Educational Psychology of Learning, Cognition, and Motivation. (Same as Psych 533.) (3-0) Cr. 3. F.S.SS. Prereq: Freshman or sophomore year. Learning, cognition, and motivation in educational/training settings, instructional theory and models, individual differences and instructional processes.

C I 535. Educational Psychology of Computer Applications. (3-0) Cr. 3. S. Prereq: 501, 533. Implications of cognitive and motivational processes for the design and development of computer applications in educational and training settings. Current research and theory across various topics, including adaptive instruction, problem solving, simulations, virtual environments, exploratory software, artificially intelligent instructional computing, computers as cognitive tools, and other contemporary topics.

C I 541. Conceptual Change, Constructivism and Science Teaching. (3-0) Cr. 3. Prereq: Bachelor’s degree. Current learning theories within science education and their application to science classrooms. Examination of models which assist the implementation of these theories of learning. National science standards.

C I 542. The Secondary School Curriculum. (2-0) Cr. 2. F.S.SS. Prereq: Teacher license. Curricular and co-curricular programs of secondary schools; current trends in goals, content organization, and organization for instruction; local community resources as curriculum content.

C I 543. Teaching Science to Elementary School Students. (3-0) Cr. 3. Prereq: Teaching license. Critical examination of the discipline of science within the elementary school curriculum. Emphasis on content, assessment, and revision of science programs using current curriculum procedures.

C I 544. Science Literacy. (3-0) Cr. 3. Prereq: Bachelor’s degree. In-depth study of science literacy. Opportunities to experience and develop broadened understandings of science literacy. Focal areas include the nature of science, epistemology and reasoning as part of science literacy within science classrooms. Pedagogical strategies to improve science literacy within classroom settings.

C I 545. The Elementary School Curriculum. (2-0) Cr. 2. F.S.SS. Prereq: Teacher license. Curricular and co-curricular programs of elementary schools; current trends in goals, content organization, and organization for instruction; local community resources as curriculum content.

C I 547. Nature of Science. (Dual listed with 347.) (3-0) Cr. 3. Prereq: Bachelor’s degree. The intersection of issues in the history, philosophy, sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C I 551. Foundations of Reading and Language Arts. (3-0) Cr. 3. S.SS. Prereq: Teaching license. Analyzing, discussing, and researching the theory and practice of current literacy issues.

C I 552. Corrective Reading. (3-0) Cr. 3. F.S.SS. Prereq: One course in reading; identification, analysis, and correction of reading problems within the elementary program in five areas: print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension.

C I 553. Reading for Adolescents with Mild Disabilities. [Same as Sp Ed 553.] See Special Education.
C I 554. Reading and Responding to Children’s Literature. (3-0) Cr. 3. Prereq: Teaching license. Research and discussion of issues surrounding the use of current children’s literature in the classroom, including censorship, diversity, and literature selection.

C I 556. Integrating Technology into the Reading and Language Arts Curriculum. (Dual-listed with 456.) (3-0) Cr. 3. S.S.S. Prereq: Teaching license. Methods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classrooms.

C I 588. Supervised Tutoring in Reading. (Dual-listed with 488.) (2-2) Cr. 3. Prereq: S.S.S. Using formal and informal diagnostic procedures to plan and implement individualized reading instruction. Field experience.

C I 594. Contemporary Curriculum Theory and Principles. (3-0) Cr. 3. Prereq: Graduate standing. Theoretical and historical perspectives of contemporary curriculum; social, cultural, and epistemological aspects of curriculum theory; political, racial, feminist, reconceptualist and postmodernist critiques of curriculum and schooling in the U.S.

C I 596. Curriculum Problems and Inquiry. (3-0) Cr. 3. Prereq. 594. Analysis of contemporary problems of schooling and curriculum; use of qualitative inquiry to study diverse school sites and social problems influencing public education.

Courses for Graduate Students

C I 603. Advanced Instructional Systems Design. (3-0) Cr. 3. S.S.S. Prereq: 503. Exploration of aspects of the instructional design process, including reflective practice, recursion and iteration, participatory design, and both qualitative and quantitative formative evaluation.

C I 610. Technology in Teacher Education. (2-0) Cr. 2 or 3. F. Prereq: 505. Research on using technology in teacher education programs. Application examples studied. Field component involving relating material from class to a teacher education situation.

C I 611. Philosophical Foundations of Instructional Technology. (3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction. Exploration of philosophies of science that serve as foundations for research and practice in instructional technology, including positivism, post-positivism, interpretivism/constructivism, and critical theory. The roles of language, nature of truth and reality, and acceptable ways of knowing are explored in terms of their implications for instructional technology design, delivery, research, and scholarship.

C I 612. Socio-psychological Foundations of Educational Technology. (3-0) Cr. 3. Prereq. 12 graduate credits in curriculum and instruction. Exploration of theories of learning and associated instructional models that are the foundation for research and practice in education and educational technology, including behavioralism, information processing theory, and cognitive science. Emphasis on cognitive and social constructivist paradigms and the creation and use of constructivist learning environments supported by technology.

C I 615. Seminar. (0-2) Cr. 1. F.S.S.S. Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. A. Curriculum B. Instructional Technology C. Science Education D. Secondary Education E. Environmental Education F. Multicultural Education G. Mathematics Education H. Gifted and Talented I. Elementary Education J. Foreign Language K. Educational Psychology L. Social Studies M. Literacy Education

Historical, Philosophical, and Comparative Studies in Education (HPC)

David Owen, Program Coordinator

This program provides graduate experiences in historical, philosophical, and comparative studies in education. Students develop facility in analyzing educational problems and issues, critiquing policies that affect education in society, and making connections between educational practice and learning.

Work is offered toward the master of science with thesis or nonthesis option, and the master of education. These degree programs and classes are of benefit to classroom teachers, educational theorists, administrators, university personnel, youth workers, religious educators, and others who seek to understand and better the numerous bases of contemporary systems of education. Study in this field also complements work in other areas of specialization in education.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

H P C 581. Philosophy of Education. (3-0) Cr. 3. Prereq: Graduate classification. The bases of American educational theory and practice. Philosophical analysis of the viewpoints on education of selected individuals and groups.

H P C 584. Classics of Educational Philosophy. (3-0) Cr. 3. Prereq: Graduate classification. Intensive study of influential statements of educational purpose, organization, curriculum, practice, and problems in the development of Western education.

H P C 585. Comparative Education: Traditions. (3-0) Cr. 3. Prereq: Graduate classification. Analysis of the cultural traditions of education outside the United States. Emphasis is given to an examination of the principles upon which selected national educational systems have been built. Special attention often given to non-European traditions.

H P C 586. Comparative Education: Global and National Systems. (3-0) Cr. 3. Prereq: Graduate classification. Examination of global patterns, ideologies, and reform movements in education; contrasting policies and practices in different cultural and geographic contexts; the role of multilateral aid and credit agencies in influencing the development and provision of schooling; consideration of principles and methods of comparative analysis of education.

H P C 588. History of American Education. (3-0) Cr. 3. Prereq: Graduate classification. Historical analysis of selected educational policies, such as equal educational opportunity, governance, discipline, and teacher education. Biographies, school records, and government reports are examined. Antecedents to current issues are stressed.

Courses Primarily for Graduate Students

Sp Ed 503. Introduction to Behavior Disorders. (1-0) Cr. 1. Prereq: Teaching license; taken concurrently with 504 and 505. Characteristics, identification, procedures and service delivery, and exemplary education programs, and concerns about management of students with behavior disorders.

Sp Ed 504. Introduction to Learning Disabilities. (1-0) Cr. 1. Prereq: Teaching license; taken concurrently with 503 and 505. Conceptualizations of characteristics of learning disabilities, as well as etiologies of learning problems.

Sp Ed 505. Introduction to Multicategorical Instruction. (1-0) Cr. 1. Prereq: Teaching license; taken concurrently with 503 and 504. Characteristics, identification, procedures and service delivery, and exemplary education programs, and concerns about management of students with behavior disorders.

Sp Ed 512. Educational Interventions for Children and Youth with Behavior Disorders. (2-0) Cr. 2. Prereq: Teaching license; concurrent enrollment in 512, 513, or 514. Interventions to meet the academic, social, emotional needs of children and youth with behavior disorders in the school setting. Adaptation of educational materials and plans; coordination of school and community.

Sp Ed 513. Educational Interventions for Children with Behavior Disorders in the Elementary Schools. (1-0) Cr. 1. Prereq: Teaching license; concurrent enrollment in 512, 513, or 514. Interventions to meet the academic, social, emotional needs of children and youth with behavior disorders in the school setting. Adaptation of educational materials and plans; coordination of school and community.

Sp Ed 514. Educational Interventions for Youth with Behavior Disorders in the Secondary School. (1-0) Cr. 1. Prereq: Teaching license; concurrent enrollment in 512. Application of the basic principles of educational intervention approaches to elementary school children who are identified as behaviorally disordered.

Sp Ed 515. Curriculum Based Assessment of Children and Youth with Learning and Behavioral Disorders. (3-0) Cr. 3. Prereq: Teaching license. Individual educational diagnostic procedures and techniques.

Sp Ed 517. Seminar: Research in Educational Interventions and Management of Children and Youth with Disabilities. (2-0) Cr. 2. Prereq: 512 or 531 or 541. Critical review of recent literature in education and psychobehavioral sciences as applied to education of students with mild to severe disabilities.

Sp Ed 531. Methods for Teaching Multicategorical Classrooms. (2-0) Cr. 2. Prereq: 505; concurrent enrollment in 532 or 533. Remedial instructional models and materials for individualized instruction and behavior management for students with mild disabilities.

Sp Ed 541. Teaching Strategies for Learning Disabilities. (2-0) Cr. 2. Prereq: 15 credits in education, permission of department head.

Sp Ed 553. Reading for Adolescents with Mild Disabilities. (3-0) Cr. 3. Prereq: Teaching license. Instructional strategies for enhancing comprehension and retention of students with mild disabilities, in conjunction with content-area reading material.

Sp Ed 555. Career Education and Transition for Youth with Learning and Behavior Disabilities. (2-0) Cr. 2. Prereq: Teaching license. Examination of the academic, personal, social, employability, and daily living skills needed for a satisfactory adult life. Exploration of curricula, programs, and services to meet these needs.

Sp Ed 564. Consultation/Collaboration Methods in Special Education. (2-0) Cr. 2. Prereq: Teaching license. Techniques for collaboratively solving classroom problems by professionals with diverse expertise and responsibilities.

Sp Ed 565. Role of the Consultant. (1-0) Cr. 1. Prereq: 564. Explore role of the educational consultant in different settings (state department, area education agency, school district, private). Examine roles in relationship to models (mental health, collaborative, organizational).

Sp Ed 590. Special Topics. Cr. 1 to 5. Prereq: 15 credits in education, permission of department head.

Sp Ed 591. Supervised Field Experience. (0-2 to 12) Cr. 1 to 6. F.S.S.S. Prereq: 15 graduate credits in special area, admission to the graduate program in special education. Supervised on-the-job field experience in special areas.

A. Learning Disabilities, Elementary.
B. Learning Disabilities, Secondary.
C. Behavioral Disorders—Mild, Elementary.
D. Behavioral Disorders—Mild, Secondary.
E. Behavioral Disorders—Moderate to Severe, Elementary.
F. Behavioral Disorders—Moderate to Severe, Secondary.
G. Multicategorical, Elementary.
H. Multicategorical, Secondary.
I. Multicategorical SCI-Elementary.
J. Multicategorical SCI-Secondary.

Courses for Graduate Students

Design Studies

(Interdepartmental Undergraduate Program)

Mark Chidister, Program Coordinator

The Design Studies program brings together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design fields. Students in any college may elect to take a minor in Design Studies.

Minor

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. Students seeking a Design Studies minor complete fifteen credits including three credits of history selected from College of Design course offerings and twelve additional credits selected from College of Design course offerings. Courses from Architecture, Art and Design, Community and Regional Planning, Landscape Architecture, and Design Studies may be taken to meet the requirements of the minor.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirement except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses in their major to satisfy this minor.

Additional information is available in the Student Programs and Services Office, 297 College of Design.

Graduate Study

Courses open for nonmajor graduate credit: 300, 382, 383, 385, 386, 394, 467, 471, 481, 487, 488, 489, 495, 496, 498.

Courses Primarily for Undergraduate Students

Dan S 129. Introduction to Creativity, (Same as L A 129.) (3-0) Cr. 3. F. Creativity and humor in the problem solving process. The use of lateral thinking for developing new ideas.

Dan S 181. History of Design, (Same as Art H 181.) (3-0) Cr. 3. F.S. Study of issues and artifacts, their relation to the traditional and changing role of the creators, and to western culture.

Dan S 221. History of Western Architecture I, (Same as Arch 221.) See Architecture.

Dan S 222. History of Western Architecture II, (Same as Arch 222.) See Architecture.

Dan S 270. Forces Shaping Our Metropolitan Environment, (Same as C R P 270.) See Community and Regional Planning.

Dan S 273. Landscape Architectural History: prehistory to 1900, (Same as L A 273.) See Landscape Architecture.

Dan S 274. The Social and Behavioral Landscape, (Same as L A 274.) See Landscape Architecture.

Dan S 280. History of Art I, (Same as Art H 280.) See Art History.

Dan S 281. History of Art II, (Same as Art H 281.) See Art History.

Dan S 290. World Cities and Globalization, (Same as C R P 290.) See Community and Regional Planning.

Dan S 292. Dimensions of Art and Design, (Same as Art 292.) See Art and Design.

Dan S 293. Environmental Planning, (Same as C R P 293.) See Community and Regional Planning.

Dan S 320. Urban Form, (Same as C R P 320.) See Community and Regional Planning.

Dan S 351. Solar Home Design, (Same as Arch 351.) See Architecture.

Dan S 365. Technology and the City, (Same as C R P 365.) See Community and Regional Planning.

Dan S 371. Landscape Architectural History: 1900 to Present, (Same as L A 371.) See Landscape Architecture.

Dan S 376. Environmental Art, (Dual-listed with 576; same as L A 376.) See Landscape Architecture.

Dan S 380. North American Indian Art, (Dual-listed with 580; same as Art H 380.) See Art History. Nonmajor graduate credit.

Dan S 382. Art and Architecture of Asia, (Dual-listed with 582; same as Art H 382.) See Art History. Nonmajor graduate credit.

Dan S 383. Greek and Roman Art, (Dual-listed with 583; same as Art H 383.) See Art History. Nonmajor graduate credit.

Dan S 385. Renaissance Art, (Dual-listed with 585; same as Art H 385.) See Art History. Nonmajor graduate credit.

Dan S 386. Baroque and Rococo Art, (Dual-listed with 586; same as Art H 386.) See Art History. Nonmajor graduate credit.

Dan S 394. Women in Art, (Dual-listed with 594; same as Art H 394.) See Art History. Nonmajor graduate credit.

Dan S 415. Housing, (Dual-listed with 515; same as C R P 415.) See Community and Regional Planning.

Dan S 417. Urban Revitalization, (Dual-listed with 517; same as C R P 417.) See Community and Regional Planning.

Dan S 425. Growth Management, (Dual-listed with 515; same as C R P 425.) See Community and Regional Planning.

Dan S 429. Planning in Developing Countries, (Dual-listed with 519; same as C R P 429.) See Community and Regional Planning.

Dan S 442. Site Analysis and Development Design, (Dual-listed with 542; same as C R P 442.) See Community and Regional Planning.

Dan S 446. Interdisciplinary Design Studio, (Dual-listed with 546.) (0-12 to 0-18) Cr. 4 to 6. F.S. Prereq: Junior classification in a curriculum in the College of Design and permission of instructor. Advanced interdisciplinary design projects.

Dan S 463. Housing Environments for Elderly and Disabled Persons, (Same as HD FS 463.) See Human Development and Family Studies.

Dan S 467. Preservation, Restoration, and Rehabilitation, (Same as Arch 467.) See Architecture. Nonmajor graduate credit.

Dan S 471. Design for All People, (Same as Arch 471.) See Architecture. Nonmajor graduate credit.

Dan S 478. Topical Studies in Landscape Architecture, (Dual-listed with 578; same as L A 478.) See Landscape Architecture.

Dan S 481. Art and Architecture of India, (Dual-listed with 581; same as Art H 481.) See Art History. Nonmajor graduate credit.

Dan S 484. Sustainable Communities, (Dual-listed with 584; same as C R P 484.) See Community and Regional Planning.

Dan S 487. Nineteenth Century Art, (Dual-listed with 587; same as Art H 487.) See Art History. Nonmajor graduate credit.

Dan S 488. Modernism and Modern Art: 1880-1945, (Dual-listed with 588; same as Art H 488.) See Art History. Nonmajor graduate credit.

Dan S 491. Environmental Law, (Dual-listed with 591; same as C R P 491.) See Community and Regional Planning.

Dan S 495. Contemporary Art and Theory Since 1970, (Dual-listed with 595; same as Art H 495.) See Art History. Nonmajor graduate credit.

Dan S 496. History of Photography, (Dual-listed with 596; same as Art H 496.) See Art History. Nonmajor graduate credit.

Dan S 498. Selected Topics in Art History, (Dual-listed with 598; same as Art H 498.) See Art History. Nonmajor graduate credit.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Dan S 515. Housing, (Dual-listed with 415; same as C R P 515.) See Community and Regional Planning.

Dan S 517. Urban Revitalization, (Dual-listed with 417; same as C R P 517.) See Community and Regional Planning.

Dan S 525. Growth Management, (Dual-listed with 425; same as C R P 525.) See Community and Regional Planning.

Dan S 528. Topical Studies in History, Theory, and Criticism of Architecture, (Same as Arch 528.) See Architecture.

Dan S 529. Planning in Developing Countries, (Dual-listed with 429; same as C R P 529.) See Community and Regional Planning.

Dan S 542. Site Analysis and Development Design, (Dual-listed with 442; same as C R P 542.) See Community and Regional Planning.

Dan S 546. Interdisciplinary Design Studio, (Dual-listed with 446.) (0-15) Cr. 4 to 6 each time taken, maximum of 12. F.S.S. Prereq: Admission to a graduate program in the College of Design and permission of instructor. Advanced interdisciplinary design projects.

Dan S 558. Appropriate Technologies for Architecture, (Same as Arch 558.) See Architecture.

Dan S 562. Housing Design Issues, (Same as Arch 562.) See Architecture.

Dan S 566. Housing for Specific Groups, (Same as Arch 566.) See Architecture.

Dan S 573. Post-Occupancy Evaluation, (Same as Arch 573.) See Architecture.

Dan S 575. Contemporary Urban Design Theory, (Same as Arch 575.) See Architecture.

Dan S 576. Environmental Art, (Dual-listed with 576; same as L A 576.) See Landscape Architecture.
Ecology and Evolutionary Biology

www.public.iastate.edu/~eeb/
(Interdepartmental Graduate Major)

The ecology and evolutionary biology interdepartmental major is offered through a faculty housed in eight departments of the university. Faculty from the departments of Agronomy, Animal Ecology, Botany, Entomology, Forestry, Pathology, Statistics, and Zoology and Genetics cooperate to offer courses and research opportunities leading to both the M.S. and Ph.D. degrees in ecology and evolutionary biology. Visit our website at www.public.iastate.edu/~eeb/

Applicants should have completed an undergraduate or master of science or arts degree in one of the biological, physical, or mathematical sciences or should have equivalent preparation. Students with degrees in the physical or mathematical sciences should have taken undergraduate courses in both basic ecology and evolution.

Students majoring in ecology and evolutionary biology may prepare themselves for careers focused on basic or applied ecology and evolutionary biology in a variety of settings, including academia, government, industry, and private organizations. For example, graduates often work in wetland restoration and management, conservation of biodiversity and ecological systems, natural resource and wildlife management, environmental analysis and management, forestry, and agriculture. Graduates have a broad understanding of ecology and evolutionary biology, have had experiences designing and conducting research, writing grant proposals, and communicating effectively with scientific colleagues at meetings and by writing publications.

The ecology and evolutionary biology major is designed for students interested in the study of mechanisms controlling the composition, structure, and functional processes of ecological systems and the mechanisms that regulate the pattern and rate of evolutionary change within and among species. Cooperating departments offer courses in physiological, population, community, ecosystem, restoration, and landscape ecology; aquatic and wetland ecology; forest ecology; agroecology; wildlife and resource management; systematics; phylogenetics and genetics; and population evolution. In addition, interdisciplinary courses in ecology and evolution are offered, including a special topics course, a seminar, and an extended field trip.

Information on application procedures, research interests of the faculty, and specific requirements of the major can be obtained from the chair of the supervisory committee.

Courses for Graduate Students

EEB 585. Extended Field Trip (0-6) Cr. 2 each time taken. Prereq: Graduate classification. Annual field trip to a region of North America to study the major terrestrial and aquatic ecosystem types of the region. Report required.

EEB 590. Special Topics. Cr. 1 to 3 each time taken. Prereq: Graduate classification and permission of instructor.

EEB 698. Seminar. (1-0) Cr. 1 each time taken. F.S. Reports and discussion of recent research and literature.

EEB 699. Research.

Economics

www.econ.iastate.edu

J. Arne Hallam, Chair of Department

Distinguished Professors: Allen, Baurnel, W. Fuller, Harl, Johnson

University Professors: Lapan, Wisner

Courses and Programs Economics 195

Distinguished Professors (Emeritus): Fox, Ladd, Luckett

Professors (Collaborators): Hansen

Associate Professors: Falk, Gallagher, Hennessy, Lawrence, Lence, Quimbach, Schroeter

Associate Professors (Adjunct): Alexander

Associate Professors (Emeritus): Doak, Pounds

Assistant Professors: Bhattacharya, Bose, Bunzel, Hatcher, Hueth, Kikenney, Vesterlund, Weninger, Zhao

Assistant Professors (Adjunct): F. Fuller, Luvaga, Wohlgemuth

Undergraduate Study

The department offers work for the degree of bachelor of science with a major in agricultural business, and for the degree of bachelor of science with a major in economics. For further discussion of programs in agricultural business, see the statement below under College of Agriculture. For programs in economics, see the statement below under College of Liberal Arts and Sciences. Visit our web site at www.econ.iastate.edu

Graduates of the Department of Economics have unique skills that distinguish them from other graduates. They have the ability to think and reason clearly, and can address complex issues using tools and decision making models of economics, mathematics, statistics, as well as concepts from the biological, physical, and social sciences. Graduates develop human relations skills that are essential in the work place and the community. They are able to communicate economic and business concepts to other professionals, collective organizations, governments, and the general public using a variety of means. Graduates understand the interaction of technology, human activity, and the environment. They are able to apply concepts associated with making “optimal” choices among economic alternatives. Graduates are prepared for graduate work in law, economics, and business, as well as the world of work, having learned tools of critical analysis and skills essential to getting and keeping meaningful employment.

College of Agriculture

For the undergraduate curriculum in agricultural business, see College of Agriculture, Curricula.

The agricultural business curriculum prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, cultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not per-
The department participates in the interdepartmental programs in international studies and women's studies.

**Graduate Study**

The department offers the degrees master of science and doctor of philosophy in economics and agricultural economics. The department also offers minors to students with majors in other departments.

Students do not need to have an undergraduate major in economics or agricultural economics in order to qualify for graduate work in the department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, and calculus. Background in matrix algebra is preferred, particularly for the Ph.D.

Candidates for the degree master of science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree master of science (non-thesis option) may fulfill requirements by satisfactorily completing 32 credits of coursework, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with the major professor and the individual's committee. Students may select fields of concentration from the following: agricultural economics, econometrics, economic growth and development, financial economics, industrial organization, international economics, labor economics, macroeconomics, natural resource and environmental economics, and public economics.

Each student must complete advanced courses in microeconomics and macroeconomics theory, quantitative methods and econometrics, and two fields from the list above. Students must demonstrate competence in theory by passing qualifying examinations. Examinations may be required in the two field areas.

Students must also participate in workshops.

With the cooperation of the College of Law at Drake University, a joint degree consisting of doctor of jurisprudence and master of science in agricultural economics or economics may be pursued concurrently. Other cooperative programs of study may be arranged with the University of Iowa College of Law or other recognized institutions.

The department cooperates in the interdepartmental programs in business administrative sciences and industrial relations, the interdepartmental major in transportation, and interdepartmental minors in gerontology and housing.

Courses open for nonmajor graduate credit:

English Proficiency Requirement: The major in economics requires a grade of C or better in each of the following English courses: 104, 105 (or 105H), and 314.
Econ 302. Intermediate Macroeconomics. (3-0) Cr. 3. F.S. Prereq: 101, 102; Math 151 or 165. Theory of income, employment, interest rates, and the price level; fiscal, monetary, and trade policies; money and capital inflows, interest rates, and inflation. Nonmajor graduate credit.

Econ 312. History of Economic Thought. (3-0) Cr. 3. S. Prereq: 101. The logic and explanatory value of received economic doctrines since the middle of the eighteenth century. Selection of past economic doctrines in contemporary theory and policy. Discussion of major works by Smith, Ricardo, Mill, Marx, Marshall, Wairas, Wicksell, and Keynes.

Econ 320. Labor Economics. (3-0) Cr. 3. F. Prereq: 101. Survey of contemporary labor market problems and public policy toward labor. Economic analysis of topics such as labor supply transfer programs, education and training, mobility, labor demand, minimum wages, benefits, unemployment, income distribution and relative wages, discrimination, unemployment and international competitiveness. Nonmajor graduate credit.

Econ 321. Economics of Discrimination. (Same as W S 321.) (3-0) Cr. 3. F. Prereq: 101. Economic theories of discrimination and the related problems of women and minorities in such areas as earnings, occupations, and unemployment. Public policy concerning discrimination. Nonmajor graduate credit.

Econ 322. Collective Bargaining. (3-0) Cr. 3. S. Prereq: 320. Economics analysis and institutional aspects of union and collective bargaining. Organizing, bargaining strategy, and contract terms; impact of unions on employment and wages. Public policy toward unionization, strikes, and negotiated benefits in both the public and private sectors. Nonmajor graduate credit.

Econ 332. Cooperatives. (2-0) Cr. 2. S. Prereq: 101. Survey of cooperative activities with emphasis on agricultural cooperatives, types of cooperatives, methods of organization, management, legal and tax aspects, cooperative finance, economic possibilities, and limitations of cooperation. Nonmajor graduate credit.

Econ 338. Introduction to Agricultural Marketing. Cr. 1 to 3 each. F.S. Prereq: 101, 135 recommended for sections B, C, and D. A given topic section can be taken only once. A hands-on application of economic concepts and principles to agricultural commodity markets, marketing institutions, risk management, and related agribusiness decision. Nonmajor graduate credit.

A. Dairy marketing
B. Livestock marketing
C. Grain marketing
D. Agricultural marketing alliances (e.g., cooperatives, partnerships, joint ventures)

Econ 342. Agribusiness Management. (3-0) Cr. 3. F. Prereq: 101. An advanced topics course in agribusiness management. Students explore the application of management theory and strategies to agribusiness and agri-enterprises. Prerequisite: 101. Credit for either 431 or 432, but not both, may be applied to graduation. Nonmajor graduate credit.

Econ 343. Agricultural Law. (3-0) Cr. 3. Prereq: 101. The legal framework impinging on agribusiness firms. Topics include tenancy, contracts, secured transactions, negotiable instruments, options theory and strategy evaluation. Nonmajor graduate credit.

Econ 353. Money, Banking, and Financial Institutions. (3-0) Cr. 3. F. S.S. Prereq: 101, 102. Theoretical and empirical aspects of money, banking, and financial markets; interest rates and portfolio choice; the banking industry in transition; the money supply process; the Federal Reserve System and the conduct of monetary policy; macro implications of monetary policy; international finance.

Econ 355. International Economics. (4-0) Cr. 4. F. Prereq: 101, 102. Explanations of causes of international trade and the impact of trade on welfare and employment patterns. Analysis of government policies towards trade, such as tariffs, quotas, and free trade areas. Theory of balance of payments and determination, and the role of government policies. Examination of alternative international monetary arrangements. Credit for either 355 or 455, but not both, may be applied to graduation. Nonmajor graduate credit.

Econ 370. Comparative Capitalism and Economic Transitions. (3-0) Cr. 3. S. Prereq: 102. Comparative analysis and performance of variants of market capitalism, including alternative government interventions and patterns of economic growth and income distribution. The role of labor market institutions and performance policies; enterprise behavior in variants of socialism; study of comparative economic transformations of socialist economies; assessment of future capitalism and social market economies; includes examination of the United States, Europe, Japan, Russia, and China.

Econ 380. Environmental and Resource Economics. (Same as ENV S 380.) (3-0) Cr. 3. F.S. Prereq: 101. Natural resource availability, use, conservation, and government policy, including energy issues. Environmental quality and pollution control policies.

Econ 381. International Economic History. (Same as Hist 381.) See History.

Econ 382. United States Economic History. (Same as Hist 382.) See History.

Econ 385. Economic Development. (3-0) Cr. 3. S. Prereq: 101, 102. Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required to achieve economic development, aid and bilateral assistance, and the strategies used to sustain countries and the developing countries, including foreign aid. Nonmajor graduate credit.

Econ 387. Internship. Cr. 2 each time; maximum of 4. F. S. Prereq: Permission of instructor and classification in business or economics. Students complete a research report, based on their internship or approved work experience, that examines chosen topics in management, marketing or finance. Offered on a satisfactory-fail grading basis only.

Econ 398. Cooperative Education. Cr. 3. F.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Econ 401. Topics in Microeconomics. (3-0) Cr. 3. F. Prereq: 301, Stat 227. Advanced treatment of selected topics from one or more of the following areas: household decision-making theories, public policy and imperfect competition, general equilibrium, intertemporal choice, asset markets, income distribution, externalities and public goods, etc. Nonmajor graduate credit.

Econ 402. Topics in Macroeconomics. (3-0) Cr. 3. S. Prereq: 301, 302, Stat 227. Advanced treatment of selected topics from one or more of the following areas: business cycle theory, growth theory, fiscal and monetary policy, coordination issues, open economy macroeconomics, and financial economics. Nonmajor graduate credit.

Econ 415. Economics of Imperfect Competition, Antitrust and Regulated Industries. (3-0) Cr. 3. S. Prereq: 301; Math 151 or 160 or 165. The economic and strategic analysis of monopoly and oligopoly, predatory pricing, cartels and price-fixing, entry barriers and entry deterrence, vertical integration, technological change, and bid-rigging and other anticompetitive actions. Nonmajor graduate credit.

Econ 430. Advanced Farm Business Management. (3-2) Cr. 4. F. Prereq: 320. Effective use of strategic planning, decision methods, and computer assistance for solving outstanding problems in the applications of economic and management theory to analyze farm business decisions using efficiency measures to assess current resource use and direct the farm of imperfect competition and industry regulation. Nonmajor graduate credit.

Econ 431. Managerial Economics. (3-0) Cr. 3. S. Prereq: 301. Topics including application of microeconomic theory of the firm and markets; organization and strategic analysis and planning, and tax process. Computers as aids in the decision process. Nonmajor graduate credit.

Econ 432. Agribusiness Management. (3-0) Cr. 3. S. Prereq: 335. An advanced topics course in agribusiness management. Students explore the variety of topics such as determinants of the optimal organization of the firm, managing in different market structures, game theory approaches to strategizing, tax management strategies, incentive structures in a firm, instruments in firm pricing strategies, the economics of information, network economics, managerial decisions for internet oriented firms, the economics of regulation, and decision making under uncertainty; business investment. Credit for either 431 or 432, but not both, may be applied to graduation. Nonmajor graduate credit.

Econ 437. Applied Commodity Marketing and Price Analysis. (3-0) Cr. 3. S. Prereq: 335. Applied commodity price analysis and forecasting; futures market theory and hedging strategy evaluation; options theory and strategy evaluation. Nonmajor graduate credit.

Econ 451. Agricultural Law. (3-2) Cr. 4. F. Prereq: Senior classification. The legal framework imposing upon decision-making by farm firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, organization of farm firms, intergenerational property transfers, trusts, insurance, liabilities, environmental law, federal and state regulatory powers. Nonmajor graduate credit.

Econ 452. Legal Issues in Agriculture. (2-0) Cr. 2. Prereq: 101. Designed for off-campus programs in agriculture. Offered as demand warrants. Legal framework imposing upon decision-making by individuals, families, and firms in agriculture; ownership and transfer of real property; commercial law including secured transactions, sales, and negotiable instruments; bankruptcy; income and estate planning and management; estate and business planning for the farm family; civil liabilities; water law; environmental law; government regulation of agriculture. Nonmajor graduate credit.
Econ 455. International Trade and Finance. (4-0) Cr. 4. S. Prereq: 301. Rigorous treatment of theories of international trade and its impact on domestic and world welfare and the distribution of income. Theoretical analysis of government policies towards trade, such as quotas, tariffs and free trade areas. Theory of exchange rate and balance of payments determination; government policies for stabilization and growth; study of efficiency of the foreign exchange market. Examination of alternative international monetary arrangements. Credit for either 355 or 455, but not both, may be applied toward graduation. Nonmajor graduate credit.

Econ 460. Agricultural, Food, and Trade Policy. (3-0) Cr. 3. F.S. Prereq: 307. Description and analysis of economic problems of U.S. agriculture. Explanation and analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The interaction of policy, world economy, and international trade on U.S. agriculture. Nonmajor graduate credit.

Econ 466. Agricultural Finance. (3-0) Cr. 3. S. Prereq: 301, Stat 227; Fin 301 and Econ 353 recommended. Financial analysis of agricultural businesses; liquidity, capital structure, and growth of agricultural firms; risk and return; capital budgeting methods; analysis of land investments, leasing, and costs of credit; financial intermediation and major financial institutions. Credit or enrollment in 500 or equivalent recommended.

Econ 468. Senior Seminar, Open to Graduating Students, Undergraduate Students. Offered on a master's level course. Focus on contemporary issues in foreign trade, commodity markets, and international finance. This is a Master's level course.

Econ 496. Economics Travel Course. Cr. 1 to 3 each time taken, maximum of 6. Prereq: Sophomore status; permission of instructor. Tour and study of international, and emerging, economies, markets, and institutions. Locations and duration of tours will vary. Limited enrollment.

Econ 498. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperatives. Students must register for this course prior to commencing each work period.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Econ 500. Quantitative Methods in Economic Analysis I. (3-0) Cr. 4. F. Prereq: 301, 1 year of calculus, Stat 401 or equivalent, and permission of Director of Graduate Studies. Economic applications of selected mathematical and statistical concepts: linear models and matrix algebra; differential calculus and optimization; integral calculus and economic dynamics; probability distributions, estimation, and hypothesis testing in the analysis of economic data.

Econ 501. Microeconomics. (4-0) Cr. 4. F. Prereq: 301, credit or enrollment in 500 or equivalent background in calculus and statistics. The theory of the consumer, theory of the firm, perfect and imperfect competition, welfare economics, and selected topics in general equilibrium and uncertainty. This is a Master's level course.

Econ 502. Macroeconomics. (4-0) Cr. 4. F. Prereq: 302 or enrollment in 500 or equivalent background in calculus and statistics. Models of aggregate supply and demand, theories of consumption and investment, money supply and demand, inflation, rational expectations, government policy, financial markets, and international finance. This is a Master's level course.

Econ 509. Mathematical Programming in Agricultural and Applied Economics. (3-0) Cr. 3. Prereq: 301, credit or enrollment in 400 level or above. Linear programming and the Simplex method; sensitivity analysis and parametric programming; goal programming, stochastic programming, and other extensions of linear programming; input-output and interregional models; nonlinear and quadratic programming to reflect production, marketing, and financial risk; comparison with other criteria for making risky decisions; integer programming and investment analysis; use of recursive and dynamic programming in long-term planning and farm firm growth models.

Econ 520. Labor Supply and Human Capital Formation. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 501 or 601. Labor supply decisions and empirical analysis for agriculture and other self-employed and wage-earning households; multiple job holding; resource allocation in productive households; human capital formation by households, firms, and public institutions, which includes schooling, on-the-job training, migration, health, research, raising of children, and implications for household income and welfare; problems in the labor market and labor unions. Topics such as labor demand; market determination of wages and employment; compensation, contracts and incentives in the workplace, and public policies. Decision making and labor market intervention and regulation methods. Vertical coordination systems and pricing systems in agriculture. Market information and price forecasting. Alternative marketing methods and strategies for major Iowa agricultural commodities including the use of futures market. Designed for master of agricultural program only.

Econ 530. Advanced Farm Management. (2-0) Cr. 2. Prereq: 6 credits in economics. Offered off campus as demand warrants. Management techniques of planning, input control as applied to farm businesses. Quantitative tools as applied to agricultural decision-making. Accounting control concepts and decision theory as used to manage agricultural enterprises. Designed for master of agriculture program only.

Econ 532. Business Economics. (3-0) Cr. 3. Prereq: 101 and enrollment in MBA or BBA program; not for economics majors. Applications of microeconomic theory and decision analysis. Demand analysis, production and cost analysis, pricing, microeconomic and market structures and strategy, capital investment analysis, decision-making under uncertainty, government and business.

Econ 533. Economic and Business Decision Tools. (Same as Bud 533.) (3-0) Cr. 3. Prereq: 501 or 532; not for Ph.D. students in the economics program. Team taught by faculty in the Department of Economics and the College of Business, this course focuses on applied economic and business tools decision making. The topics include: Monte Carlo analysis with applications to option pricing and insurance mechanism design, portfolio analysis using existing standard spreadsheet software and add-ons, dynamic programming tools for inventory management and sequential decisions, discrete choice modeling and statistical bootstrapping, and financial performance evaluation using commercially available software.

Econ 535. Agricultural Marketing. (3-0) Cr. 3. F. Prereq: 501 or 532 or 601. Analysis of agricultural marketing systems focusing on their structure, pricing and coordination mechanisms (including futures markets), and performance. Government market intervention and regulation methods.

Econ 539. Game Theory. (Same as Stat 539.) See Statistics.

Econ 545. Public Economics II. (3-0) Cr. 3. S. Prereq: 501 or 601. Public goods and impure public goods; externalities; open access and common property resources; market and club provision of excludable public goods; Lindahl and Nash equilibria, collective action.

Econ 555. Issues in International Economics. (3-0) Cr. 3. S. Prereq: 502. Theories of foreign trade and finance. Emphasis on current policy issues in international economics. This is a Master’s level course.

Econ 563. Issues in Government Policy Affecting Agriculture. (2-0) Cr. 2. Prereq: 101. Off campus. Offered as demand warrants. Government policy and the policy tools that affect agriculture, trade, and travel. Description and analysis of government policies and programs designed to address production agriculture problems and consumer food concerns. Evaluation of the interaction of agriculture and world trade as affected by U.S. and foreign government policies. Designed for master of agriculture program only.

Econ 566. Advanced Agricultural Finance. (3-0) Cr. 3. Prereq: 501 or 601; Fin 605 recommended. Modern financial theories of the firm applied to agriculture; models of capital structure of farm firms; investment under uncertainty; capital asset pricing in agriculture; financial management. Business and financial management, contract and financial contracting; and formal and informal financing of agricultural production, including equity, debt, leasing, and other contractual arrangements; relationship between real and financial decisions; market imperfections in rural financial markets, and government intervention.

Econ 571. Intermediate Econometrics. (3-0) Cr. 3. S. Prereq: 500. Single and multiple equation regression models; dummy variable models; correlation, heteroskedasticity; distributed lags; qualitative dependent variables; simultaneity. Use of econometric models for tests of economic theories and forecasting.

Econ 573. Econometrics I. (4-0) Cr. 4. F. Prereq: 501 and Stat 605 recommended. Introduction to econometrics, estimation, and testing of single and multiple equation models of economic processes; qualitative choice and limited dependent variable models; examination and evaluation of empirical results in the econometric literature.

Econ 574. Econometrics II. (3-0) Cr. 3. S. Prereq: 573. Large sample properties of estimators and large sample inference; dynamic models and instrumental variables; identification, estimation, and evaluation of systems of simultaneous equations; introductory time series methods and applications, including alternative variance specifications.

Econ 576. Spatial Economics. (3-0) Cr. 3. S. Prereq: 500. Analysis of location choice by firms, employees, and households emphasizing the role of spatial variations in agglomeration economies, economies of scale, distance, transport, amenities, and local government. Models of land use, urban form, spatial competition, central place theory, and migration. Techniques of discrete choice analysis, statistical analysis of categorical data, urban system modeling, and interregional compatible general equilibrium.

Econ 583. Water Resources. (Same as WR 583.) (3-0) Cr. Alt. F., offered 2001. Prereq: Graduate classification; not for economics majors. Analysis of water resource management issues from economic, legal, political, and sociological perspectives. Topics include rational water allocation systems, market failure, investment, pollution control strategies, and resource management. Administered by Economics in cooperation with the College of Agriculture and Natural Resources.

Econ 585. Economic Growth and Development. (3-0) Cr. Alt. S., offered 2002. Prereq: 601 and 502 or 602 and 602. Performance and problems of developing countries in relation to growth, employment, structural change, and development. Theories and paradigms of development; theories and sources of long-run economic growth; fertility and population growth; income distribution and poverty; land reforms and agricultural development; rural-urban migration; labor markets; corruption and development; information problems; banking and financial intermediation; role of monetary and fiscal policies in development.

Econ 590. Special Topics. Cr. 1 to 5 each time taken. Offered on a satisfactory-failing grade basis only.

Econ 599. Creative Component. Cr. 1 to 5. Offered on a satisfactory-failing grade basis only.

Courses for Graduate Students, major or minor.

Econ 600. Quantitative Methods in Economic Analysis II. (3-0) Cr. 3. F. Prereq: 500 or equivalent background in calculus. Introduction to elements of nonlinear programming, comparative static analysis, difference and differential equations, dynamics optimization, and game theory; useful for micro- and macroeconomic modeling.

Econ 601. Microeconomic Analysis I. (4-1) Cr. 4. F. Prereq: 501, previous or concurrent enrollment in 600 and permission of Director of Graduate Studies. Economic theory and methodology; theory of consumer behavior, theory of the competitive firm, supply and factor demand; duality relations in consumer and producer theory, partial equilibrium analysis, stability and comparative statics; introduction to game theory; theory of imperfect competition.

Econ 602. Macroeconomic Analysis. (4-1) Cr. 4. S. Prereq: 301, 302, previous or concurrent enrollment in 600 and permission of Director of Graduate Studies. Analysis of static and dynamic models of aggregate economic activity with an emphasis on the role of fiscal and monetary policies on the determination of GNP and its distribution, the price level, and labor employment.

Econ 603. Microeconomic Analysis II. (4-1) Cr. 4. S. Prereq: 601, 602 and permission of Director of Graduate Studies. Microeconomic analysis: microeconomic theory; microeconomic models: capital asset pricing model (CAPM), arbitrage pricing theory (APT), representative agent models, pricing of derivative securities. Complete and incomplete asset pricing models, equilibrium, finan- cial intermediaries, the role of government in the financial sector. Market frictions, crashes, bubbles. Applications of asset valuation models, with emphasis on efficient markets.

Econ 654. Advanced Topics in Financial Economics. (3-0) Cr. 3 each time taken. Prereq: 603. Selected topics in financial economics of current significance to the profession.

Econ 655. International Trade. (3-0) Cr. 3. F. Prereq: 603. Modern theory of international trade; welfare theorems, trade and distributional aspects of trade and tariffs. The interdependence of international trade and economic growth. Optimal trade policies in the presence of such distortions as unemployment, monopolies and cartels, balance of payments problems, infant indus- tries, and common market areas.

Econ 657. International Finance. (3-0) Cr. 3. S. Prereq: 604. The theory of exchange rate and balance of payments determination; open-economy macroeconomic issues; and current account adjust- ment. Emphasis on the current empirical literature concerning the efficient market theory of the foreign exchange market.

Econ 660. Welfare Theory. (3-0) Cr. 3. Prereq: Credit or enrollment in 603. Notions of economic efficiency, equivalency, and inequity, compensating variation measures, consumer and producer surplus, market failure, social choice, path independence, compensat- ed demand curves, cost-benefit evaluation, and pub- lic choice.
Econ 674. Macroeconometrics. (3-0) Cr. 3. F. Prereq: 601, 602, 571. Balanced treatment of time-series econometric techniques and their application to macroeconomics and financial markets. Techniques include GARCH and ARCH-M models, unit-root tests, nonlinear adjustment models, structural VARs, and cointegration tests.

Econ 675. Advanced Topics in Econometrics. (3-0) Cr. 3 each time taken. Prereq: 538 or 574, Stat 543 recommended. Advanced treatment of issues important in econometrics. Topics chosen from asymptotic theory, nonlinear estimation, Bayesian and robust econometrics, econometric time series, limited dependent variables and censored regression models, nonparametric and semiparametric methods, bootstrapping and Monte Carlo techniques, etc.

Econ 690, Advanced Topics. Cr. 1 to 5 each time taken. Offered on a satisfactory-fail grading basis only.

Econ 693. Workshops. Cr. 1 to 3 each time taken. Prereq: 6 graduate credits in chosen field. Offered on a satisfactory-fail grading basis only.

Econ 699. Research for Thesis or Dissertation. Offered on a satisfactory-fail grading basis only.

Educational Leadership and Policy Studies

John H. Schuh, Chair of Department

University Professors: Manatt, Robinson

Professors: Blake, Ebbes, English, Gmelch, Huba, Littrell, Moore, Schuh, Shelley, Steffy, Van Ast

Professors (Collaborators): Barak, Gardner

Distinguished Professors (Emeritus): Ahmann, Fanslow, Warren

Professors (Emeritus): Beavers, Boyles, Bryan, Engel, Hopper, Jones, Kizer, Lagomarino, Lawrence, McCandless, Netusil, Pellegrino

Associate Professors: Evans, Gilley, Licklider, Poston

Associate Professors (Adjunct): Stow, Tesfagiorgis

Associate Professors (Emeritus): Thielen

Assistant Professors: Hackmann, Hanrick, Kilgore, Mullen

Assistant Professors (Adjunct): Andersen, Arthur, Hill, Jackson, Norton, Payne, Udin

Graduate Study

The Departments of Educational Leadership and Policy Studies and Curriculum and Instruction offer work for the degrees master of science, master of education, and doctor of philosophy with a major in education. They also offer minor work to students majoring in other fields of study. In the Department of Educational Leadership and Policy Studies, students may complete the Ph.D. with a major in education and a specialization in educational leadership. At the master’s level, students may specialize in counselor education; educational administration; higher education; organizational learning and human resource development; and research and evaluation. See the Department of Curriculum and Instruction for further discussion of the education major without specialization and with specialization in elementary education, special education, curriculum instructional technology, and historical, philosophical, and comparative studies in education.

Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization and adequate preparation for the graduate work. Students complete a satisfactory-fail grading basis only.

Doctoral students in Educational Leadership and Policy Studies will complete seminars, laboratory experiences, field experiences, and independent research that will enable them to serve as leaders in various educational settings including school administration, community colleges, public and private colleges and universities, business and industry, and public and private agencies. In addition to the common courses noted above, students will each select an intellectual content area that will prepare them to work in the setting of their choice. Specific information about the requirements of the Ph.D. degree is available from the departmental office.

Graduates of this program possess skills and knowledge related to six core domains: stewardship, educational research, communication, educational evaluation, educational foundations, and educational technology. They are able to work effectively with individuals and groups, engage in ethical decision-making and management of resources to accomplish goals. They comprehend the basic elements of research and inquiry and engage in scholarly inquiry. Graduates express ideas clearly both orally and in writing, understand themselves well and relate sensitively to individuals from diverse backgrounds. They understand and can use intelligently the principles of program evaluation and assessment. Graduates have a clear understanding of the foundations of education; their work is well grounded in theory and philosophy. They also understand and use intelligently the principles of program evaluation and assessment. Graduates have a clear understanding of the foundations of education; their work is well grounded in theory and philosophy. They also understand and use intelligently the principles of program evaluation and assessment. Graduates have a clear understanding of the foundations of education; their work is well grounded in theory and philosophy. They also understand and use intelligently the principles of program evaluation and assessment. Graduates have a clear understanding of the foundations of education; their work is well grounded in theory and philosophy. They also understand and use intelligently the principles of program evaluation and assessment. Graduates have a clear understanding of the foundations of education; their work is well grounded in theory and philosophy. They also understand and use intelligently the principles of program evaluation and assessment. Graduates have a clear understanding of the foundations of education; their work is well grounded in theory and philosophy. They also understand and use intelligently the principles of program evaluation and assessment.

Students desiring graduate work in counselor education leading to the master of science degree or master of education degree may elect one of two programs: elementary school counseling or secondary school counseling.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Co Ed 529. Foundations of Counseling. (3-0) Cr. 3. F. Prereq: 8 credits in undergraduate education, sociology, or psychology. Research theory and conditions that facilitate behavioral change in individuals. Professional roles and functions, professional organizations and associations, professional history and trends, ethical standards and legal issues, professional preparation standards, and professional credentials.

Co Ed 531. Microcounseling. (1-2) Cr. 3. F. Prereq: Credit or enrollment in 529. Building skills in listening, responding, and developing counseling relationships.

Co Ed 540. Developmental Counseling. (3-0) Cr. 3. S. Prereq: Credit or concurrent enrollment in 529. Understanding and counseling clients on the basis of developmental theory and critical incidents. An opportunity to integrate related concepts, e.g., transitions, crises, career development, and choice theories as part of a client’s life cycle.

Co Ed 551. Occupational Choice and Development. (3-0) Cr. 3. S. Prereq: 529. Developmental and social factors influencing career choice. Theories, assessment instruments, classification systems, and informational sources used in career counseling.

Co Ed 560. Counseling Theories and Models. (3-0) Cr. 3. S. Prereq: 529. Understanding of counseling process with focus on counseling theories including both individual and systems perspectives as well as coverage of relevant research and factors considered in application. How counseling theory aids counselors in conceptualizing client concerns and facilitating client choice and/o behavioral change.
Courses for Graduate Students

Co Ed 561. Counseling Techniques. (2-2) Cr. 3. S. Prereq: 529, 531, and 560, or concurrent enrollment in 560. Utilizing counseling theory to provide focus, organize client’s related experiences into sequence, steps and patterns; utilizing the interpersonal process variables in counseling; choosing and implementing interventions that are client and problem specific. The laboratory provides an opportunity to apply that which is learned through reading, lecture, and class discussions.

Co Ed 569. Group Process. (2-2) Cr. 3. F. Prereq: 531, 561. Ethic for groups leading; planning, implementing, and facilitating groups. Dynamics and leader interventions in various group stages. Participation in group laboratory activities.

Co Ed 572. Management of School Counseling Programs. (3-0) Cr. 3. F. Prereq: 531. Design, implementation, and evaluation of a comprehensive developmental school program including coordination with resource persons, specialists, business, and agencies outside the school to promote program objectives; promotion of the program within the total school community; integration of guidance curriculum in the total school curriculum; data gathering methods for program planning and evaluation; time management; and referral procedures.

Co Ed 573. Implementing Community Counseling Programs. (3-0) Cr. 3. F. Prereq: 531. Historical, philosophical, societal, cultural, economic, and political dimensions of the mental health movement; roles of mental health counselors in a variety of practice settings; relationships between mental health counselors and other professionals in these settings; organization, fiscal, and legal dimensions of the institutions and settings in which mental health counselors practice; general principles of community intervention, consultation and outreach; evaluation of programs and systems.

Co Ed 576. Social and Cultural Issues in Counseling. (3-0) Cr. 3. S. Alt. S., offered 2003. Prereq: 580, and 561. Issues and trends in a multicultural and pluralistic society; social, political, economic, and cultural trends including characteristics and concerns of diverse groups, attitudes and behavior based on such factors as ethnicity and culture, individual, family, and group strategies with diverse populations; and ethical considerations.

Co Ed 580. Practicum in Community Counseling. Cr. 3. F.S. Prereq: 581 or 565. Designed for students who desire counseling experience in a community agency setting. Prerequisites for the practicum can be arranged at urban centers, detention facilities, MDTA centers, vocational rehabilitation centers, etc.

Co Ed 582. Practicum in Elementary School Counseling. Cr. 3. F.S. Prereq: 560, 581. Placement in an elementary school. Counseling students, consulting with teachers and parents and coordinating activities that enhance student development and growth both in the cognitive and affective domains.

Co Ed 590. Special Topics. Cr. 1 to 2. Prereq: 9 graduate hours in counselor education.

Co Ed 593. Workshop in Counseling and Guidance. Cr. 1 to 3. S. Prereq: 9 hours in counselor education. Workshops are designed to give practicing counselors an in-depth exposure to counseling or a counseling model with concurrent opportunity for supervision of the model. Offered when demand warrants.

B. Counseling with Exceptional Children
D. Substance Abuse Counseling
F. Working with Parents and Families
G. Advanced Brief Counseling
H. Crisis Intervention
M. Play Therapy
N. Counseling Children and Adolescents at Risk

Courses for Advanced Studies

Co Ed 610. Group Counseling Practicum. Cr. 1. F.S.S. Prereq: 580, or 581, or 582 and permission of instructor. Supervised experience facilitating and processing groups.

A. Skill Training Lab
B. Counseling Group

Co Ed 611. Internship. Cr. 3 to 6. F. Prereq: 580, or 581, or 582. A student intern performs all activities that regularly employed staff members in a counseling setting perform.

Co Ed 615. Seminar. Cr. 1 to 2. Prereq: 9 hours in counselor education. Seminars are designed to meet various needs of advanced master’s students and practicing counselors. Offered when demand warrants.

C. Current Issues and Trends in Counseling
D. Consultation
F. Group Intervention Strategies

Co Ed 620. Supervision of Counseling. Cr. 2. F. Prereq: Minimum of 3 practicum credits and permission of instructor. Advanced counseling students provide clinical supervision for students enrolled in 580, 581, and/or 582.

Educational Administration (EdAdm)

Fenwick English, Program Coordinator

The educational administration program places dual emphasis on preparation of professional educational administrators and on the academic and scholarly aspects of educational leadership and management. Courses taken do not apply toward a degree without official admission to the educational administration program.

Graduates of Master’s degree programs in educational administration are prepared for leadership roles in K-12 school districts and education agencies, typically as building-level principals and assistant principals.

Specifically, graduates are knowledgeable about promoting the success of all students by a stewardship of a vision of learning; nurturing and sustaining a positive school culture; ensuring effective management of the organization, operations and resources for a safe, efficient and effective learning environment; collaborating with families and community members, responding to diverse community interests and needs; and mobilizing community resources; understand acting with integrity, fairness and in an ethical manner; influence the larger political, social, economic, legal and cultural context.

Graduates of the Certificate of Advanced Studies program possess administrative and leadership skills necessary for the superintendent. These include knowledge of child and adolescent development, the educational environment, curriculum and instructional practice, law and ethics; management of systems, personnel, and finances; interpersonal communication and community relationships.

Several programs are offered: (1) the Master of Science degree, both thesis and nonthesis, in elementary or secondary school administration; (2) Master of Education practitioner; (3) advanced study leading to principal’s license; (4) Certificate of Advanced Studies providing post master’s training for superintendent licensure. Courses are scheduled with consideration for cohort-collegial teams or groups.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

EdAdm 541. Principles of Educational Administration. (3-0) Cr. 3. F.S. Prereq: Teacher licensure and permission of instructor. Purposes of education in a democratic society; basic principles of school administration and educational organization planning. Analysis of the nature and function of units of education at local, intermediate, and state levels; exploration of substantive elements such as leadership, change process, strategic and operational planning, and current issues in education.

EdAdm 551. Supervision of Instruction. (3-0) Cr. 3. F.S. Prereq: 541. Evaluating and improving the performance of teachers and administrators of K-12 public schools through instruction and supervision; exploration of substantive elements such as leadership, change process, strategic and operational planning, and current issues in education.

EdAdm 552. The Principalship. (3-0) Cr. 3. S.S. Prereq: 541. Essential personal, academic and building-level leadership in contemporary school setting are explored including strategic goal setting, mission and vision development, curriculum and organizational structures, theory and practice of scheduling, effective staff development programs, school climate and culture, effective student support programs such as counseling, attendance and discipline, and home/parental involvement and relationships.

EdAdm 553. Administrative Theories in Education. (3-0) Cr. 3. S.S. Prereq: 541. Current thinking in administration and organization, theoretical approaches to administration; analysis of functions and processes of administration as they apply to education.

EdAdm 554. Community and Interagency Partnerships. (3-0) Cr. 3. F.S. Prereq: 541. Concept and development of community/school partnerships with family and juvenile service agencies to enhance pupil learning and readiness via increasing family stability and mental physical health. Practices which promote interagency collaboration with the school, legal and administrative issues, will be explored.

EdAdm 556. Cultural Analysis of Administrative Problems. (3-0) Cr. 3. F.S. Prereq: 541. Practical and theoretical perspectives on school administrative problems from critical pedagogical studies and research. Deals with school related issues such as cultural literacy, forms of authority and control, and other historical problems in dealing with minorities and culturally different groups and persons.

EdAdm 558. Developmental Needs of Diverse Learners. (3-0) Cr. 3. F.S. Prereq: 541. Learner needs are examined from dominant psycho/social perspectives with stress upon developmental phases of normal growth along with common problems encountered in schools. Other issues examined are racism, gender bias, and socio-economic problems which impact learner responsiveness to school curriculum, routines, regulations and legal requirements.

EdAdm 559. Design and Delivery of School Curricula. (3-0) Cr. 3. F.S. Prereq: 541. Generic administrative approaches to the design and delivery of school curricula, elementary and secondary, including quality control, validation, concepts of balance, planning, and alignment, development of curriculum guides, mapping and student assessment strategies, employing national standards and benchmarks.
EdAdm 563. Leadership for Staff Development. (3-0) Cr. 3. S.SS. Prereq: 541. For educators who will serve as consultants and directors of staff development programs. Course content will include needs assessment, delivery of staff development programs and evaluation. Adult learning theory will be the focus of facilitation skills, problem solving skills, and conflict resolution strategies. The relationship between supervision and staff development will also be explored.

EdAdm 575. Fundamentals of School Law. (3-0) Cr. 3. S.SS. Prereq: 541. Constitutional, statutory, and judicial provisions as a basis for the legal operation of public schools. The law is examined as it affects the local school district, boards of education, administrators, teachers, and students at the elementary and secondary school levels.

EdAdm 590. Special Topics. Cr. 1 to 4. Prereq: 9 credits in education.

EdAdm 591, Supervised Field Experience. Cr. R or Cr. 1 to 8. Prereq: 541 and admission to program and instructor’s approval. Supervised on-the-job field experience in special areas.

A. Elementary Principal. (Cr. 1-8)
B. Secondary Principal. (Cr. 1-8)
C. Superintendency/Central Office (Cr. 1-8)
D. Elementary Principal (Cr. R. Des Moines Initiative Program only.)
E. Secondary Principal (Cr. R. Des Moines Initiative Program only.)

EdAdm 593. Workshops. Cr. 1 to 4. Prereq: 9 credits in education.

EdAdm 599. Thesis Research or Creative Component Development. Cr. 1 to 3. Prereq: 9 credits in educational administration.

Courses for Graduate Students

EdAdm 601. Planning Systems, Operations and School Environments. (3-0) Cr. 3. F.SS. Prereq: 541. Planning and management theories, assumptions, strategies and techniques within belief systems; development of vision and mission positions; strategic goals; objectives, and operational tactics to attain them with emphasis on facility renovation and school construction projects.

EdAdm 602. Human Resource Development and Negotiations. (3-0) Cr. 3. S.SS. Prereq: 541. Development and practice of collective negotiations within human resource development concepts and strategies with emphasis on creating and implementing “win-win” approaches that enhance system productivity and performance. Specific contract language and concepts which enhance system effectiveness will be the focus of this course.

EdAdm 603, Personnel Evaluation and System Assessment Practices. (3-0) Cr. 3. Prereq: 541. Theory, strategies, and systems for supervising programs and personnel in school districts and independent schools. Focuses on the principal, cabinet level administrator, e.g., director, headmaster, or assistant superintendent for instruction. This course meets the requirement for advanced evaluator training for licensure in Iowa.

EdAdm 604. Theories of Leadership. (3-0) Cr. 3. F.SS. Prereq: 541. Specific leadership theories and models will be studied with an emphasis on organization building, constructivist strategies for teachers; developing and assessing and developing internal and external support groups for schools; and organizational capacity building.

EdAdm 605. Current Practices of the Superintendency. (3-0) Cr. 3. S.SS. Prereq: 541. Reviews the historical development of the American superintendency in education, problems and pitfalls, politics and tensions separating executive actions from board policy formulation; executive challenges among contemporary educational problems of resource acquisition and allocation; collaborative relationships; union/system issues; system changes and capacity building models.

EdAdm 606. The Administration of Technology Systems. (3-0) Cr. 3. F.SS. Prereq: 541. The design, acquisition and operations of technology in educational administration, accounting, personnel record keeping and health system interfaces; compensation practices, staff development, and instruction record keeping, maintenance and groups.

EdAdm 607. Advanced School Law. (3-0) Cr. 3. S.SS. Prereq: 541. Emerging issues of school case law and litigation; it pertains to school/student safety; student/teacher relationships; administrative authority/oversight; taxation and abatement; home schooling issues; censorship of books and curricula; student clubs and religious practices.

EdAdm 608. Administrative Problems. (3-0) Cr. 3. F.SS. Prereq: 541. A case study approach to the resolution of problems in educational administration. Emphasis on decision-making, conflict resolution, and communication strategies.

EdAdm 609. Instructional Management. (3-0) Cr. 3. F.SS. Prereq: 541. Theories and practices of instructional management including curriculum audits, classroom observations and analytical models assessing teaching interactions with students. Strategies of improving assessing teacher interactions with students. Strategies of improving pupil resiliency and achievement will be highlighted. Mapping of curriculum configurations in classrooms will be applied to the use of national/international standards.

EdAdm 611. Superintendent/Board Relations. (3-0) Cr. 3. S.SS. Prereq: 541. An historical analysis of the development of governance systems in American public education, and contemporary issues and problems confronting effective school district governance.

EdAdm 612. School Finance and Business Management. (3-0) Cr. 3. S.SS. Prereq: 541. Contemporary business and risk management practices including financial management and banking; investment of funds; cash flow projections; accounting practices and school budget development concepts and uses. The functions and duties of school business personnel will be related to specific business and fiduciary tasks.

EdAdm 615. Seminar. Cr. 1 to 3. In-depth study of administrative topics of contemporary interest and importance.

A. Client Focus
B. Research
C. Quality Improvement
D. Special Services
E. Assessment
F. Leadership

EdAdm 690. Advanced Special Topics. Cr. 1 to 3. Prereq: 9 credits in educational administration.

EdAdm 691. Internship. (3-0) Cr. 3. Prereq: 541 and admission to program and instructor’s approval. Supervised on-the-job field experience in special areas.

Educational Leadership and Policy Studies (EL PE)

Betty Steffy, Program Coordinator

Courses for Graduate Students

EL PS 615. Thematic Seminars. Cr. 1. F.S.SS. Prereq: Admission to educational leadership doctoral program.

A. Communication and Team Building
B. Governance, Politics and Policies
C. Law, Equity, Equality
D. Ethics, Justice, and Caring
E. Problem Solving and Planning
F. Critical and Creative Thinking

EL PS 616. Capstone Experience. Cr. 3. F.S.S. Prereq: 6 credits of 615. This experience is designed to explore a topic addressed in one of the thematic seminars. The product of the capstone experience is a written paper of sufficient quality to be submitted to a scholarly journal for review.

Higher Education (Hg Ed)

Nancy J. Evans, Program Coordinator

The higher education program provides graduate instruction and leadership development in community college education, student affairs practice, institutional research, post-secondary curriculum, and higher education administration. The master of science with thesis or non-thesis option and master of education degrees are offered as well as postgraduate professional development and community college licensure courses. Students desiring community college arts and science licensure must have a master’s degree in a subject matter area, complete a human relations requirement (HgEd 570H fulfills this requirement), and complete the following courses: HgEd 561, 562, and 582. Contact the program coordinator for additional information. Students desiring community college applied science and technology, health professions, or business and information technologies licensure, must complete the human relations requirement, HgEd 570H; and HgEd 420, 421/521, 422/522, and 423/523. An M.Ed. in higher education for community college instructors is provided with an emphasis on learning and teaching leadership. A community college leadership certificate program is also offered.

Graduates of master’s degree programs in higher education are prepared for entry level positions in student affairs administration, general institutional administration, teaching positions in community colleges and support positions in post secondary settings.

Specifically, graduates are knowledgeable about the development of college students, organization and administration of post secondary institutions, how college students learn, program development, advising college students, ethical issues in colleges and universities, and basic research and evaluation techniques.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Hg Ed 420. Introduction to Vocation Technical Teaching at Community Colleges. (3-0) Cr. 3. F.

Examines the competencies for successful teaching in vocational technical programs; a focus on lesson planning, motivating students, teaching methods, time management, and evaluation.

Hg Ed 421. Vocational Technical Teaching Methods at Community Colleges. (Dual-listed with 521) (3-0) Cr. 3. S. Prereq: 420. Develops competencies necessary to identify, develop, implement, and evaluate collaborative learning, learning to learn, and other classroom and laboratory teaching techniques.

Hg Ed 422. Vocational Technical Curriculum at Community Colleges. (Dual-listed with 522) (3-0) Cr. 3. F. Prereq: 421. Develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges with a focus on alignment and accountability.

Hg Ed 423. Vocational Technical Assessment at Community Colleges. (Dual-listed with 523) (3-0) Cr. 3. S. Prereq: 422. Develops competencies necessary to identify, develop, employ, and evaluate teaching and learning success with a focus on classroom assessment.
Hg Ed 504. Higher Education in the United States. (3-0) Cr. 3. S. Prereq: Graduate classification. Historical development of higher education; diversity, functions, and roles of colleges and universities; federal and state roles; review of general, liberal, technical, graduate, and professional education.

Hg Ed 521. Vocational Technical Teaching Methods at Community Colleges. (Dual-listed with 421.) (3-0) Cr. 3. S. Prereq: 420. Develops competencies necessary to identify, develop, implement, and evaluate collaborative learning, learning to learn, and other classroom and lab/clinic teaching techniques.

Hg Ed 522. Vocational Technical Curriculum at Community Colleges. (Dual-listed with 422.) (3-0) Cr. 3. S. Prereq: 521. Develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges with a focus on alignment and accountability.

Hg Ed 523. Vocational Technical Assessment at Community College. (Dual-listed with 423.) (3-0) Cr. 3. S. Prereq: 522. Develops competencies necessary to identify, develop, implement, and evaluate teaching and learning success with a focus on classroom assessment.

Hg Ed 550. Teaching, Learning and Leadership. (3-0) Cr. 3. S. Prereq: Teacher licensure. Current issues and practices in community college teaching, and learning and the role and responsibilities of teachers as leaders.

Hg Ed 561. College Teaching. (3-0) Cr. 3. S. Prereq: 6 graduate credits. This course will review educational theories, methods and strategies for the improvement of college instruction. It seeks to assist potential college instructors in developing knowledge of protocol, assessment, and the scholarship and art of teaching. This course will emphasize the unique challenge of college teaching in an environment of a changing student population.

Hg Ed 562. Curriculum Development in Colleges. (3-0) Cr. 3. S. Prereq: 561. Develops competencies necessary to identify, develop, implement, and evaluate curriculum content and strategies for the improvement of college instruction. It seeks to assist potential college instructors in developing knowledge of protocol, assessment, and the scholarship and art of teaching. This course will emphasize the unique challenge of college teaching in an environment of a changing student population.

Hg Ed 570. Current Topics in Student Affairs. Cr. 1 to 3. S. Prereq: Graduate classification. Current issues and new directions in student affairs practice. Topics developed to the specific needs of student affairs professionals. Primarily for off-campus.

Hg Ed 574. Student Affairs Practice in Higher Education. (3-0) Cr. 3. S. Prereq: Admission to Higher Education program. Theories of student development and their applications in student affairs programs, services, and activities are reviewed. Emphasis is placed on psychosocial, cognitive developmental, and learning theories.

Hg Ed 577. Campus Environments and Cultures. (3-0) Cr. 3. S. Prereq. Admission to Higher Education program. Understanding of the impact of the college environment on students. Ability to use environmental theory to create positive learning situations for students.

Hg Ed 578. Students in American Higher Education. (3-0) Cr. 3. S. Prereq. Admission to Higher Education program. The course will study the relationship between college students and characteristics from 1950 to the current day. Traditional assumptions about the impact of higher education on students will be reviewed and challenged. Campus issues and concerns relative to college students and residential life will be discussed. Participants will analyze institutional responses to students through college missions, organizational development, structure, core curriculum and retention.

Hg Ed 579. Counseling and Group Dynamics in Post-secondary Settings. (3-0) Cr. 3. S. Prereq: 574, 576. Development of effective basic counseling skills. Understanding of group dynamics. Ability to work effectively in groups.

Hg Ed 580. Current Topics in Community Colleges. (1-3) Cr. 1 to 3. S. Prereq: Graduate classification. Current issues and new directions in community college education. Topics developed to the specific needs of colleges. For off-campus.

Hg Ed 582. The Comprehensive Community College. (3-0) Cr. 3. S. Prereq: Graduate classification. The community college as a unique social and educational institution. Its philosophy, function, programs, faculty and student characteristics, organization and finance, trends, and issues. Reviews current research and exemplary community college practices internationally, nationally, and in Iowa.

Hg Ed 590. Special Topics. Cr. 1 to 4. S. Prereq: 9 credits in education. Independent study on specific topics arranged with an instructor.

Courses for Graduate Students

E. Federal and State Affairs
F. Law in Higher Education
G. Institutional Research
H. Research Designs in Higher Education

Hg Ed 664. College Organization and Administration. (3-0) Cr. 3. S. Prereq: 504. Administrative organization and behavior: communications, leadership, finance, strategic planning, and institutional governance.

Hg Ed 665. Financing Higher Education. (3-0) Cr. 3. S. Prereq: 504. Lectures, discussions, and individual investigation relating to financial administration in colleges and universities. Budgeting, auxiliary enterprises, administration of financial planning, fund raising, examination of theories on expenditures. Designed for persons aspiring to serving as college administrators.

Hg Ed 666. Academic Issues and Cultures. (3-0) Cr. 3. S. Prereq: 504. This course will examine institutional culture and issues in higher education focusing on the roles and responsibilities of faculty and academic managers.

Hg Ed 676. Student Development Theory II. (3-0) Cr. 3. S. S. Prereq: 576. This course will examine life span approaches to student development; racial, ethnic, and sexual identity development; spiritual development and career development. The emphasis is on application of these theories in student affairs practices.

Hg Ed 690. Advanced Special Topics. Cr. 1 to 4. S. Prereq: 9 credits in education.

Hg Ed 699. Research. Cr. arr. S. Prereq: 9 credits in education.

Organizational Learning and Human Resource Development (OLHRD)

Jerry W. Gilley, Program Coordinator

The Organizational Learning and Human Resource Development (OLHRD) program prepares graduates for leadership roles in public and private organizations. The OLHRD program focuses primarily on the role and function of learning, change, and performance management in effective organizations. Graduates are expected to develop an understanding of the relationship among organizational learning, performance, and effectiveness and to develop skills and knowledge used to design, manage, and evaluate Organizational Learning and Human Resource Development efforts. The master of education (M.Ed.) is offered.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

OLHRD 540. Foundations of Organizational Learning and Human Resource Development. (3-0) Cr. 3. S. F.S. A study of the modern practice of organizational learning and human resource development from a perspective of its history, philosophy, application, and literature.

OLHRD 541. Adult and Organizational Learning. (3-0) Cr. 3. S. Prereq: 540. Examining how adults acquire and use knowledge, skills, attitudes within organizational settings; understanding individual differences in learning as well as the principles and elements of the learning organization.

OLHRD 542. Program Development in Human Resource Development. (3-0) Cr. 3. S. Prereq: 540. Applying program development principles, models, and strategies to human resource development and performance improvement interventions.

OLHRD 544. Performance Improvement and Change Through Learning Interventions. (3-0) Cr. 3. S. Prereq: 541, 542. Examining the characteristics and elements of the performance improvement and change process, with special attention to the roles and responsibilities of employees, managers, and organizations in when improving individual and organizational learning.

OLHRD 545. Learning Acquisition, Transfer, and Evaluation. (3-0) Cr. 3. F. Prereq: 541, 542, 544. Critical examination of learning acquisition, transfer, and evaluation, barions, partnerships, strategies, and activities; and the roles and responsibilities of human resource development professionals, managers, employees, and organizations in the application and evaluation of learning on-the-job.

OLHRD 546. Human Resource Development Consulting. (3-0) Cr. 3. F. Prereq: 543, 544. Understanding the roles, responsibilities, characteris- tics, objectives, competencies, and skills of human resource development consultants, and applying the consulting process to solve performance and organizational problems in real and hypothetical settings.

OLHRD 547. Practicum/Internship. Cr. 3. F.S.S. Practicum or internship designed to provide work exposure in organizational learning and human resource development.

OLHRD 598. Capstone Seminar. Cr. 4. F.S.S.S. Prereq: 21 credits in organizational learning and human resource development. Integrating the learning experiences of students completing the master’s degree program in Organizational Learning and HRD.

Courses for Graduate Students

OLHRD 661. Principles of Consultation. Cr. 3. S. Prereq: Admission to doctoral program in Educational Leadership. Examination of the roles of change agents in organizational learning, performance, and change and their ability to build change capacity within organizations as well as a critical examination of the roles of performance and organizational consultants with special attention to critical problems and issues in managing organizational change and improvement initiatives.

OLHRD 664. Organizational Change and Improvement. Cr. 3. S. Prereq: Admission to doctoral program in Educational Leadership. Critical examination of the characteristics and elements of effective organizations, with special attention to critical problems and issues in managing organizational change and improvement initiatives.

Research and Evaluation (ResEv)

John Schuh, Program Coordinator

The research and evaluation program prepares professionals to work in the areas of assessment and program evaluation, and educational research with emphasis on statistics and computer applications. Work is offered toward the master of science degree with thesis. Graduates of the program can articulate current issues and principles in research, program evaluation and assessment. They can implement various research and assessment approaches and evaluation models. They understand and effectively use principles and skills of research data analysis, and they prepare and interpret accurate and useful reports.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

ResEv 550. Educational Research. (3-0) Cr. 3. F.S.S. Prereq: Graduate classification. Understanding the nature of quantitative and qualitative research; reviewing the literature; developing research problems and questions; research designs; data collection and analysis issues; evaluating research studies.

ResEv 552. Basic Educational Statistics. (3-0) Cr. 3. F. Prereq: 550. Statistical concepts and procedures for analyzing educational data. Descriptive statistics, correlation, 1 tests, and chi square with computer applications.

ResEv 553. Intermediate Educational Statistics. (2-1) Cr. 2. F.S.S.S. Prereq: 552. A continuation of statistical concepts and procedures for analyzing educational data. Inferential techniques including simple and multiple regression, multiple ANOVA, etc., with educational computer applications.

ResEv 554. Intermediate Research Methods. (3-0) Cr. 3. S. Prereq: 550, 580, Stat 401 or ResEv 552. Intermediate quantitative and qualitative research methodology in preparation for carrying out thesis and dissertation research. Problem formulation; design; data collection and analysis; interpreting and summarizing research findings.

ResEv 557. Computer Data Analysis Procedures. (2-0) Cr. 2. F.S. Prereq: 552 or equivalent. Processing educational research data including coding, conversion and analysis strategies. Using interactive statistical software such as SPSS to examine, chart, and report findings.

ResEv 560. Assessing Student Learning. (3-0) Cr. 3. Prereq: 550 or basic statistical skills. The purposes and techniques of formal and informal classroom assessment. Rubrics, performance assessment, portfolios, paper and pencil tests, communicating assessment findings. Emphasis on both theory and practical applications.

ResEv 580. Qualitative Research Methodology. (3-0) Cr. 3. Prereq: 550. Qualitative research procedures in education, particularly historical, philosophical, and case study. Use of sources, principles of qualitative research, methods of data collection and analysis, field techniques, and writing of research reports.

ResEv 590. Special Topics. Cr. 1 to 3 each time taken. F.S.S. Prereq: Graduate standing. Guided reading and in research and evaluation study on special topic.

ResEv 593. Workshop. Cr. 1 to 3 each time taken. F.S.S. Prereq: Graduate standing. Intensive, concentrated exposure to a special educational research or evaluation problem.

ResEv 597. Program Evaluation. (Same as Hg Ed 597.) (3-0) Cr. 3. S. Prereq: 550 Evaluation models and professional standards. Techniques of evaluating educational programs. Emphasis on both theory and practical applications.

Courses for Graduate Students

ResEv 615. Current Topics in Research and Evaluation. (1-0) Cr. 1; may be taken 3 times. F.S.

ResEv 680. Critical Issues in Interpretive Methodology. (3-0) Cr. 3. S. Prereq: 580. An intensive reading and discussion course focusing on contemporary methodological theory for interpretive inquiry. Examines how interpretive field work is conducted, how narrative and ethnographic data are theorized and analyzed, and how interpretive texts are written.

ResEv 680. Advanced Special Topics. Cr. 1 to 3 each time taken. F.S.S. Prereq: Graduate standing. Guided reading and/or study on special topics of an advanced nature.

Electrical Engineering

(Administered by the Department of Electrical and Computer Engineering)

Subrahmanyan Venkata, Chair of Department

Distinguished Professors: Lord

University Professors: Jones

Professors (Adjunct): Hillesland, Sastry

Professors (Collaborators): Ouyang

Distinguished Professors (Emeritus): Brown, Fouad, Nilsson, Pohm

Professors (Emeritus): Anderson, Basart, Brearley, Brockman, Comstock, Fanslow, Hale, Hsieh, Koerber, Koplin, Potter, Read, Smay, Swift, Townsend, Triska

Associate Professors: Ajjarapu, Bartlett, Berleant, Chen, Davidson, Davis, Jacobson, Khannmash, Kieftsch, Kruempel, Lee, McCalley, Russell, Stephenson, Tyagi, Tutka, Tuvalu

Associate Professors (Collaborators): Christie, Hassoun

Associate Professors (Emeritus): Bond, Carlson, Coady, McMechan, Mericle, Pavlat, Scott

Assistant Professors: Aluru, Balasubramanian, Chu, Cruz-Neira, Dickerson, Elia, Govindarasu, Lavalde, Patterson, Salapaka

Assistant Professors (Adjunct): Lee, Mccalmon, Mina

Assistant Professors (Collaborators): Barton, Chandramouli, Nith

Instructors (Adjunct): Freeman

Undergraduate Study

For undergraduate curriculum in electrical engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.
The Electrical and Computer Engineering (ECPE) Department at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, to study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of specialization areas at the undergraduate level, including computer networking and security, computer architecture and digital systems, control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing. An attractive feature of the curriculum is that seniors may choose among course sequences each of which focuses on one of these areas; therefore graduated students have substantial depth in specific areas to complement the breadth obtained in the required curriculum.

The mission of the ECPE Programs at Iowa State University is to enable the graduated student to make significant and substantive contributions to solving engineering problems throughout the student’s professional career. The following objectives are identified as critical to the accomplishment of this mission.

A. Objective I. Impart and enhance knowledge in the domain of electrical and computer engineering: The graduated student should understand
1. engineering and basic science fundamentals including mathematics, probability, statistics, physical sciences, and information technology,
2. the design and manufacturing processes,
3. the fundamentals of business, including entrepreneurship, engineering economy, and cost/revenue streams.

B. Objective II. Expand and hone engineering abilities: The graduated student should be able to
1. identify and solve engineering problems,
2. analyze and design electrical, computer, and multidisciplinary systems,
3. design and conduct experiments and analyze resulting data,
4. use modern engineering hardware and software tools such as computer and instrumenta
tion.

C. Objective III. Instill and nurture social awareness, abilities, and understanding: The graduated student should
1. desire to engage in lifelong learning, and should expect and embrace change,
2. be able to function effectively as a member of a multidisciplinary team, to communicate effectively, and to think critically and creatively, both independently and with others,
3. apply standards of professional conduct in view of the value of science and technology in a global/societal context.

As a complement to the instruction activity, the ECPE Department provides opportunities for each student to have experience with broadening activities. Through the Cooperative Education and Internship Program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs. Through the Undergraduate Research Program, students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in Electrical Engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both B.S. and M.S. degrees. See Graduate Study for more information.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses. Prerequisite material exams are given at key points in the curriculum. These exams are to assist student evaluation of progress made during the academic experience as the materials covered in several courses are the foundation of more advanced courses. These outcome assessments are also used to assess and to improve the quality of the curriculum.

Courses for students who are not in the electrical engineering program: 441, 442, 448. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

Credit for only one of the following courses may be counted towards graduation: E E 201, 441, and 442.

Graduate Study
The department offers work for the degrees master of science and doctor of philosophy with major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

The degree master of science with thesis is recommended for students who intend to continue toward the doctor of philosophy degree or to undertake a career in research and development. The nonthesis master of science degree requires a creative component. Students pursuing a doctor of philosophy degree must select one of the following areas of specialization: communications and signal processing, control systems, electric power, electromagnetics, microelectronics.

The normal prerequisite to major graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student's undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student’s background and area of research interest.

Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE aptitude test scores by applicants from other countries. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores.

Ph.D. students must pass a department qualifying examination.

In cooperation with the College of Liberal Arts and Science, the College of Engineering offers a graduate minor in Complex Adaptive Systems. It is open only to students who have met the basic program requirements and are not on temporary enrollment. The CAS minor consists of one common core course, at least two CAS specific techniques courses and at least two supporting courses. Both technique and supporting courses must be selected from lists approved by the advisory committee. A student’s minor program in CAS must include at least nine credits that are beyond the total used to meet curriculum requirements. An interdisciplinary faculty committee supervises the minor. Interested students may contact the Electrical and Computer Engineering Department to obtain more specific guidelines and requirements.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science in Information Assurance program. Students interested in studying Information Assurance topics may earn a degree in Computer Engineering or in Information Assurance. (See bulletin section on Information Assurance.)

Well qualified juniors or seniors in Electrical Engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both B.S. and M.S. degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.

Courses open for nonmajor graduate credit: all 300- and 400-level courses except 322, 391, 396, 397, 398, 463, 466, 490, 491, 492, 494, and 498.
Courses Primarily for Undergraduate Students

E E 166. Professional Programs Orientation. (1-0) Cr. R. F.S. Orientation course for students selected to the professional programs in electrical engineering and computer engineering. A view of the nature and scope of electrical engineering and computer engineering professions. Portfolio construction. Departmental rules, advising center operations, degree requirements, program of study, planning, career options, and student organizations.

E E 201. Electric Circuits. (3-2) Cr. 4. F. Prereq: Enrollment or credit in Math 267 and Phys 222. Basic circuit elements including power and energy relationships. Network theorems. Loop and nodal methods. DC, sinusoidal steady-state, and transient analysis. Operational amplifier. Introduction to state space. PSPICE. Laboratory experiment and instrumentation.

E E 264. Introduction to Space Systems and Science. (Same as Aer E 264.) (3-0) Cr. F. Prereq: Phys 221 and Math 263. Launch vehicles. Orbital mechanics. Spacecraft systems including communications, power, guidance, commands and data processing. Science from space including astronomy, geology, earth observing, and planetary exploration.

E E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

E E 321. Continuous Signals and Systems. (3-0) Cr. 3. F. S. Prereq: 201, credit or registration in Math 307. Classification of signals and systems; basic signal manipulation and system properties; time domain analysis of continuous time LTI systems; Laplace Transform and its use in LTI system analysis; transfer functions and feedback; frequency response and analog filters; Fourier Series representation and properties; continuous time Fourier Transform; spectral analysis and AM modulation; state space analysis. Nonmajor graduate credit.

E E 322. Probabilistic Methods for Electrical Engineers. (Same as Stat 322.) (3-0) Cr. 3. F. S. Prereq: 201. Introduction to probability with applications to electrical engineering. Probability concepts of discrete and continuous random variables, associated probability modes, extensions to multivariate random vectors. Expectation, moments, correlation, functions of random variables. Random processes, including Poisson, Gaussian, and Markov.

E E 324. Discrete Signals and Systems. (3-0) Cr. 3. F. S. Prereq: 321. Examples of discrete time signals and systems; time domain analysis of discrete time LTI systems; Z-Transform analysis of LTI systems; transfer functions and stability; discrete time system frequency response and digital filters; discrete time Fourier Series, discrete time Fourier Transform and DFT; sampling and sampling theorem; communication systems; amplitude and frequency modulation and demodulation; time and frequency division multiplexing. Nonmajor graduate credit.

E E 332. Semiconductor Materials and Devices. (Same as Mat E 332) (3-0) Cr. 3. S. Prereq: Mat E 231 or E E 333 and credit or enrollment in E E 312 or Phys 222. Introduction to semiconductor material and device physical characteristics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices MOSFETs, bipolar transistors, laser diodes and LED’s. Nonmajor graduate credit.

E E 333. Electronic Devices and Circuits. (3-3) Cr. 4. F. S. Prereq: 201, Cpr E 210. Operational amplifier models and applications. DC, large-signal, and small-signal frequency-independent and frequency-dependent models and characteristics for diodes, bipolar junction transistors, and field-effect transistors. SPICE simulation and circuit design. Logic design for MOS and bipolar circuit design. Characteristics of IC logic families. Laboratory design projects. Nonmajor graduate credit.

E E 381. The Engineering Professional. (1-0) Cr. 1. F. S. Prereq: Juniors and seniors. Preparing for entry to the workplace, communicating effectively, professional organizations. Selected topics of interest to the engineering professional such as: Entrepreneurship, Intellectual Property and Licensing, Product and Professional Liability, Technology and Risk, Total Quality Management, Ethical Principles and Practices, Globalization, the Environment and Sustainable Development. Portfolio.

E E 396. Summer Internship. Cr. R. S. S. Prereq: Permission of department. Summer professional work period.

methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and microelectronic systems (MEMS). Nonmajor graduate credit.

E E 455. Introduction to Energy Distribution Systems. (3-0) Cr. 3. Preq: 303. Overhead and underground distribution system descriptions and characteristics, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection and power factor correction, system planning and automation, and economics in a deregulated environment. Nonmajor graduate credit.

E E 465. Digital Integrated Circuit Design. (Same as Cpr E 465) (3-3) Cr. 4. S. Preq: 434. Digital design of integrated circuits employing very large scale integration, microelectronic circuit architectures, and high-level hardware design languages logic synthesis and silicon compilers, datapath architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

E E 466. Multidisciplinary Engineering Design. (Same as Cpr E 466, E Sc 466) E E 466, M E 466, Mat E 466 (I-1) (4-3) F. S. Preq: Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary team. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and EDA. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

E E 491. Senior Design Project I. (Same as Cpr E 491) (1-3) Cr. 2. F. S. Preq: 322 or 430. Completion of 29 credits in the E E or Cpr E core professional program, Engl 314. First semester of a team design project experience. Emphasis on defining and planning to achieve project objectives that meet a client’s need. Technical writing of project plan and design review, project poster.

E E 492. Senior Design Project II. (Same as Cpr E 492) (1-3) Cr. 2. F. S. Preq: 491 or Cpr E 491. Second semester of a team design project experience. Emphasis on achieving project objectives as defined in Cpr E 491 or E E 491. Implementation of Project Design. Technical writing of final project report; oral presentation, achievements.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

E E 502. Complex Adaptive Systems Seminar. (Same as Cpr E 502, Com S 502) (1-0) Cr. 1. Complex adaptive systems in artificial life. Complex analysis methods such as evolutionary computation, neural nets, agent-based simulations, and large-scale simulations.

E E 505. CMOS and BiCMOS Data Conversion Circuits. (Same as Cpr E 505) (3-3) Cr. 3. Alt. S., offered 2002. Preq: 434. Design and applications of CMOS and BiCMOS data conversion circuits (AD and DA converters) including: quantization effects, conversion algorithms, sample and hold, element matching, comparators, voltage reference, and detailed implementation issues.

E E 507. VLSI Communication Circuits. (Same as Cpr E 507) (3-3) Cr. 3. Alt. S., offered 2003. Preq: 434 or 501. Phase-locked loops, frequency synthesizers, crystal oscillators, passive and active filters, mixers, power amplifiers, transmitter and receiver architectures.

E E 509. Interdisciplinary Systems Thinking. (Same as I Tec 509) (3-3) Cr. 3. Preq: Junior or senior standing. Student does extensive individual project using the systematic thought processes of Theory of Constraints to solve and implement the solution to a problem in their current reality. Groups synthesize and improve each other’s work.

E E 510. Topics in Electromagnetics. Cr. 1 to 3 each elected.

E E 514. Microwave Engineering. (Dual-listed with 414.) (3-3) Cr. 4. F. Preq: 333, 312. Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.

E E 520. Selected Topics in Communications and Signal Processing. (3-0) Cr. 3 each time elected. Advanced neural networks, multiuser communications, digital imaging and video communications, wavelet signal processing, speech processing, multi-rate communications and signal processing.

**Courses and Programs**

**Engineering Applications**

**Engineering**

Loren W. Zachary, Assistant Dean for Undergraduate Programs

Professors (Emeritus): Sanders

Associate Professors: Dowling

Most of the courses with the designer of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. Course-related questions should be directed to the department or unit with responsibility for that course. The following is a list of those responsibilities:

- Engr 101 Engineering Undergraduate Programs
- Engr 110 Engineering Computing Support Services
- Engr 160 Materials Science and Engineering
- Engr 161 Industrial and Manufacturing Systems Engineering
- Engr 170 Agricultural and Biosystems Engineering

**Courses Primarily for Undergraduate Students**

- Engr 101, Engineering Orientation, (1-0) Cr. R. F. S. Introduction to the College of Engineering and the engineering profession. Considerations in choosing an engineering curriculum. Information concerning university and college policies, procedures, and resources. Opportunities to interact with departments.
- Engr 104, LEAD Program Orientation, (1-0) Cr. 1. F. Orientation for LEAD Program participants. Applications of problem solving, engineering design, teamwork, study, and time management techniques and skills. Engineering professional development. Offered on a satisfactory-fail grading basis only.
- Engr 105, LEAD Program Seminar, (1-0) Cr. 1. S. Seminar for LEAD Program participants. Industrial tours and orientation to engineering profession. Offered on a satisfactory-fail grading basis only.
- Engr 110, Engineering Orientation to Computing Facilities, (1-0) Cr. R. F. An introduction to computing facilities available to engineering students at Iowa State University. Procedures for accessing and utilizing useful software in the personal reports. Graphing and workstation labs. Instruction in navigating the local and extended internet to find useful information. Ethical expectation.
- Engr 180, Engineering Problems with Computational Laboratory in FORTRAN, (2-2) Cr. 3. F-S. S. Prereq: Satisfactory scores on mathematics placement examinations; credit or enrollment in Math 142. Solving engineering problems and presenting solutions through technical reports. Graphing and curve-fitting. Use of SI units. Significant figures. Flowcharting. Introduction to engineering economics and statistics. Solution of engineering problems using the FORTRAN language. The honors section includes applications of programming to mobile robotics.

Undergraduate Study

For undergraduate curriculum in engineering applications leading to the degree bachelor of science, see College of Engineering, Curricula. In this era of rapid technological change, there is an expanding need for persons with an engineering background. Engineering applications is specifically designed to develop this background covering several engineering disciplines or by combining engineering with other disciplines. Students are able to design their program of study to specialize in non-traditional engineering fields or to combine non-technical specializations with a solid foundation in core engineering subjects. Students will be prepared for entry into their chosen field of interest or for further study at the graduate level in any of the fields in engineering or related areas of study, such as law or business.

To achieve engineering application’s program goals, the student must have:

- A strong foundation in engineering courses.
- A broad foundation in mathematics and physical sciences.
- Oral and written communication abilities to effectively communicate with technical and non-technical professionals.
- Basic skills in the use of computers for communication, engineering design and problem solving.

The program develops the ability of students to be effective communicators and develops the unique and creative talents of the students. This is achieved by:

- Allowing students to design their own program of study to align closely with their own talents and interests.
Courses and Programs  Engineering Applications

- Requiring students to design and communicate their program of study to faculty and professionals.
- Requiring course work that includes utilizing and developing communication skills.
- Providing opportunities for internships, cooperative education, study-abroad, and other meaningful employment.

Courses in the social sciences and humanities, U.S. diversity, and international perspectives are included in the curriculum to broaden the student’s perspective of the global work environment. Engineering applications students are encouraged to participate in life-long learning and continuous professional development.

New students are not admitted directly into this program. Students wanting Engineering Applications may be admitted into Engineering (not a degree granting program but used for new students undecided on an engineering curriculum) or any of the degree granting programs.

Prior to entering the engineering applications program the student must have completed the basic program and have presented a description of the professional objective to be achieved through the program to the chair of the supervisory committee for approval. In addition the student must submit a schedule of courses to support this objective.

Emphasis Areas
Selected emphasis areas available in engineering applications are listed below. Students are encouraged to propose other programs to meet individual professional objectives.

A. Engineering Entrepreneurship
A Degree in engineering combined with a minor in entrepreneurial studies. (See Entrepreneurial Studies for minor requirements.)

B. Engineering Journalism
Degree in engineering combined with selected courses from journalism.

C. Engineering Management
A degree in engineering combined with a minor in business. (See College of Business for minor requirements.)

D. Environmental Engineering
A program to emphasize environmental applications of engineering.

E. Health Technology
Applications of engineering to health fields.

F. Officer Education
A program in cooperation with Air Force Aerospace Studies, Naval Science, and Military Science. A minor is possible in Naval Science. See Officer Education Programs.

G. Technical Sales
A program providing preparation for selling products of a technical nature and consulting with the manufacturer and the industrial consumer to solve engineering problems.

H. Technical Systems Administration
A program designed for those planning to enter technical administration in public agencies (e.g., city managers or county administrators).

I. Other
A program may be planned by the individual student subject to approval by the supervisory committee. Distance learning program proposals will be considered.

Courses Primarily for Undergraduate Students

E App 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of Engineering Applications Supervisory Committee chair. First professional work period in the cooperative education program. Students must register for this course before commencing work.

E App 396. Summer Internship. Cr. R. S. Prereq: Permission of Engineering Applications Supervisory Committee chair. Summer professional work period.

E App 398. Cooperative Education. Cr. R. F.S.S. Prereq: 298, permission of Engineering Applications Supervisory Committee chair. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

E App 498. Cooperative Education. Cr. R. F.S.S. Prereq: 398, permission of Engineering Applications Supervisory Committee chair. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Engineering Mechanics
(Administered by the Department of Aerospace Engineering and Engineering Mechanics)

Thomas J. Rudolph, Chair of Department

Distinguished Professors: R. B. Thompson
Professors: Chimenti, Greer, Holger, Inger, McDaniel, Munson, Pierson, Rogge, Rohach, Rothmayer, Rudolph, Schmerr, Tannehill, Tsai, Zachary

Professors (Adjunct): Hsu

Distinguished Professors (Emeritus): T. Thompson, Young

Professors (Emeritus): Akers, Iversen, Jenison, McConnell, Rizzo, Weiss, Wilson

Associate Professors: Dayal, Flatau, Hilliard, Hindman, Lu, Mann, Mitra, Rajagopalan, Sarkar, Sherman, Sturges, Trulin, Vogel

Associate Professors (Adjunct): Roberts

Associate Professors (Emeritus): Hermann, Severske

Assistant Professors: Bastawros, Chavez, Jacobson

Assistant Professors (Adjunct): Gray, Legg

Undergraduate Study

The courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In the work of this department the student is expected to acquire an understanding of the principles underlying the technique of analysis and a knowledge of those properties of materials which influence the manner and extent of their use for engineering purposes. Physical properties of engineering materials are studied in the classroom and are evaluated in the laboratory. General laws, such as those of Newton, are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study
The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and a minimum of 8 research credits. It has strong research emphasis and is recommended for students who anticipate entering a doctoral program later. At least 30 credits of acceptable graduate work are required for the degree.

The master of engineering degree does not require either research credits or a thesis. However, at least two credits of acceptable creative component and at least 26 credits of acceptable graduate coursework are required. A minimum of 30 credits of acceptable graduate work is required for the degree. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

Credits for creative component will be obtained by registering for E M 599. A written report and an oral presentation will be given to the student’s graduate committee.

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Cooperative programs between Engineering Mechanics and Biomedical Engineering are provided jointly under the sponsorship of the Colleges of Engineering and Veterinary Medicine. Laboratory facilities are available both in the veterinary medicine complex and on the main campus. See Biomedical Engineering for requirements.

Courses open for nonmajor graduate credit: All 300- and 400-level courses except 301, 307 and 490.
Courses Primarily for Undergraduate Students

E M 274. Statics of Engineering. (3-0) Cr. 3. F.S.S.S. Prereq: Credit or enrollment in Math 166; credit or enrollment in Phys 111 or 221. Vector and scalar treatment of coplanar and noncoplanar force systems. Resultants, equilibrium, friction, centroids, second moments of areas, principal second moments of area, radius of gyration, internal forces, shear and bending moment. Credit for only one of 274, 301, 306, 307 may be allowed for graduation.

E M 301. Fundamentals of Mechanics. (4-0) Cr. 4. S. Prereq: Phys 221, Math 166. Newton’s laws, equilibrium of rigid and deformable bodies, stress. Kinematics and dynamics of particles and rigid bodies. Deformation, stress, strain, stress-strain relationships and deformation, Castigliano’s Theorems. Analysis of axial, torsion, beam bending, buckling, and combined loading. Theories of failure and stress concentration. Credit for only one of 274, 301, 306, 307 may be allowed for graduation. No more than six credits from 301, 306, 307 may be used for graduation. No major graduate credit.

E M 306. Statics and Mechanics of Materials. (5-0) Cr. 5. F.S.S.S. Prereq: Credit or enrollment in Math 166; credit or enrollment in Phys 111 or 221. Equilibrium of rigid and deformable bodies, centroids, second moments of areas, and friction. Dynamics of particles and rigid bodies in planar motion. Kinematics of a particle in rectilinear and curvilinear motion. Equations of motion, energy, and momentum methods for a particle. Kinematics of rigid bodies. Moments of inertia. Equations of motion, energy, and momentum methods for rigid bodies. Vibration vibrations. Credit for only one of 274, 301, 306, 307 may be allowed for graduation. No more than six credits from 307, 345, may be used for graduation.

E M 324. Mechanics of Materials. (3-0) Cr. 3. F.S.S.S. Prereq: Credit or enrollment in Math 166; credit or enrollment in Phys 111 or 221. Stress-strain relationships, and elements of material behavior. Application of stress and deformation analysis to members subject to centric, torsional, and curvilinear loadings. Elementary considerations of theories of failure, buckling. No more than six credits from 306, 324 may be used for graduation. Nonmajor graduate credit.

E M 327. Mechanics of Materials Laboratory. (3-0) Cr. 1. F.S. Prereq: Credit or enrollment in 324. Experimental determination of mechanical properties of selected engineering materials. Preparation of reports. Students who are not present for the first laboratory meeting of their own sections may qualify for continuation in the course only by attending the first laboratory meeting of some other section of the course. Nonmajor graduate credit.

E M 336. Engineering Materials. (2-0) Cr. 2. F.S. Prereq: 301 or 306 or credit or enrollment in 324. Structure, properties, and uses of engineering materials, with emphasis on construction materials. Nonmajor graduate credit.

E M 345. Dynamics. (3-0) Cr. 3. F.S.S.S. Prereq: 274 or 301 or 306, credit or enrollment in Math 266 or 267. Particle and rigid body kinematics. Newton’s laws of motion, plane motion, rigid body problems using work-energy, linear, and angular impulse-momentum principles, vibrations. Nonmajor graduate credit. No more than six credits from 307, 345, may be used for graduation.

E M 350. Introduction to Nondestructive Evaluation Engineering. (3-0) Cr. 3. S. Prereq: 301 or 306 or 324, Math 266, Phys 222. Introduction to the fundamentals of ultrasonic, eddy current, and x-ray testing. The generation, transmission, scattering, and reception of ultrasonic waves and x-rays in an NDE inspection. Safety issues. The connection between NDE, fracture mechanics, and reliability. Probability of detection on failure. The use of NDE in design. Nonmajor graduate credit.

E M 362L. Nondestructive Testing Laboratory. (Same as Mat E 362L.) See Materials Engineering. Nonmajor graduate credit.

E M 425. Introduction to the Finite Element Method. (3-0) Cr. 3. F.S. Prereq: 306 or 324, Math 268 or Math 267. Introduction of finite element analysis through applications to one-dimensional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and fluid transport. Transient heat conduction and wave propagation. Two-dimensional triangular and quadrilateral elements. Plane problems of torsion, thermal and potential flow, stress analysis. Simple computer programs for one- and two-dimensional problems. Nonmajor graduate credit.

The curriculum in Engineering Science is administered by the Department of Aerospace Engineering and Engineering Mechanics. The department offers courses for undergraduate and graduate students. The undergraduate curriculum is designed to provide a strong foundation in engineering and technology, with opportunities for specialization and interdisciplinary studies. Graduates are prepared for careers in engineering, technology, and related fields, or for further study leading to advanced degrees.

Courses and Programs

**Engineering Mechanics**

- E M 525. Finite Element Analysis. (Same as A E 525.) (3-3) Cr. 3. S. Prereq.: 425, Math 385. Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and error estimation. Use of two- and three-dimensional computer programs.

- Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

- E M 545. Vibration Testing. (2-2) Cr. 3. S. Prereq.: 444 or 449. The signal analysis, review of vibration concepts central to vibration testing, instrumentation considerations in force and acceleration measurements, digital frequency analyzer characteristics, and vibration testing statistics; application to overall test system-testing structure interaction; requirements of transferring field data to laboratory simulation; standard test specifications. Term laboratory project.

- E M 550. Fundamentals of Nondestructive Evaluation. (Same as M E 550.) (3-2) Cr. 4. S. Prereq.: 401 or 306 or 324, Math 285. Basic physics of ultrasonic, radiographic, and electromagnetic NDE measurements. Principles and uses of other quantitative techniques in nondestructive evaluation. Signal processing and evaluation methods. Laboratory experiments in ultrasonics, eddy current, and x-ray radiography methods of NDE.

- E M 551. Signal Processing in Mechanics. (Same as M E 551.) (2-2) Cr. 3. S. Prereq.: 444 or 451, Math 385. Classification and measurement of time dependent phenomena analysis and characterization. Spectral and probabilistic techniques for the analysis of acoustical, vibrational, and unsteady fluid dynamic phenomena. Selected laboratory experiments emphasizing dual channel FFT analyzer applications in mechanics.

- E M 564. Fracture and Fatigue. (Same as M E 564 and E M 564.) (3-0) Cr. 3. F. Prereq.: 380 or 324 and any one of 336, E Sci 352, Mat E 211 or 272. Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue in particulate and composite materials. Fracture and fatigue tests, thermal stress, mechanics and materials designed to avoid fracture or fatigue.

- E M 571. Advanced Fluid Mechanics. (3-0) Cr. 3. F. Prereq.: 378 or M E 335. Mass, momentum, and energy conservation equations; control volume and differential forms of governing equations; real and ideal fluids; concepts of stress, strain-rate, and vorticity; exact solutions of Navier-Stokes equations for steady and unsteady flows; low Reynolds number flows; boundary layer approximation; laminar and turbulent boundary layers; two-dimensional and axisymmetric potential flow problems; elements of compressible flow; engineering applications.

- E M 574. Ultrasonic Nondestructive Measurement Principles. (Same as M E 574.) (3-0) Cr. 3. F. Prereq.: 370, 516, Math 385. Ultrasonic inspection techniques, undrilled elastic wave propagation and scattering. Transducer modeling and the development of a complete ultrasonic measurement model. Fundamental aspects of linear system theory. Application to flaw detection and sizing.

- E M 580. Biomaterials. (Same as B M E 580 and M E 580.) (3-0) Cr. 3. S. Prereq.: Mat E 211 or 272. Presentation of the basic chemical and physical properties of biomaterials as they are related to their manipulation by the engineer for incorporation into living systems. Role of structure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

- E M 590. Special Topics. Cr. 1 to 4 each time taken. Prereq.: Permission of instructor.

  - A. Advanced Engineering Acoustics
  - C. Thermal Stresses in Design
  - D. Linear Viscoelasticity
  - E. Biomaterials
  - F. Other Topics

- E M 599. Creative Component. Cr. arr.

**Courses for Graduate Students**

- E M 648. Advanced Topics in Dynamics. (3-0) Cr. 3. S. Alt. S., offered 2002. Prereq.: 548, Math 385. Topics of current interest in dynamics such as vehicle stability, modeling multicomponent dynamical systems, and nonrigid body dynamics.

- E M 651. Advanced Topics in Fluid Mechanics. (Same as M E 651.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq.: 571. Topics of current interest in fluid mechanics such as separation phenomena, three-dimensional boundary layers, unsteady flow phenomena, asymptotic methods in viscous flows, stability, theory of homogeneous isotropic turbulence, and turbulence models.

- E M 690. Special Topics. Credit 1 to 6 each time taken. Prereq.: Permission of instructor.

  - A. Advanced Experimental Mechanics
  - B. Nonlinear Wave Propagation
  - C. Nonlinear Material Behavior
  - D. Composite Materials
  - E. Holography in Mechanics
  - F. Finite Elements of Nonlinear Continua
  - G. Fracture Mechanics
  - H. Atmospheric Fluid Mechanics
  - I. Viscous Flow Theory
  - J. Advanced Singularity Analysis
  - K. Advanced Analytic Methods in Mechanics
  - L. Rheology
  - M. Other Topics

**Engineering Science**

(Administered by the Department of Aerospace Engineering and Engineering Mechanics)

- Thomas J. Rudolphi, Chair of Department

- Distinguished Professors: R. B. Thompson

- Professors: Chimenti, Greer, Holger, Inger, McDaniel, Munson, Pierson, Rogge, Rohach, Rothmayer, Rudolphi, Schmerr, Tannehill, Tsai, Zachary

- Professors (Adjunct): Hsu

- Distinguished Professors (Emeritus): D. Thompson, Young

- Professors (Emeritus): Akers, Iversen, Jenison, McConnell, Rizzo, Weiss, Wilson

- Associate Professors: Dayal, Flatau, Hilliard, Hindman, Lu, Mann, Mitra, Rajagopalan, Sarkar, Sherman, Sturgis, Trulin, Vogel

- Associate Professors (Adjunct): Roberts

- Associate Professors (Emeritus): Herrmann, Verseske

- Assistant Professors: Bastavros, Chavez, Jacobson

- Assistant Professors (Adjunct): Gray, Legg

**Undergraduate Study**

For the undergraduate curriculum in engineering science leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

The curriculum in Engineering Science is designed for those students who wish to receive training in a particular field that is multidisciplinary. Examples are acoustics, astrophysics, biomechanical engineering, control systems, computational and experimental mechanics, dynamics and vibrations, and nondestructive evaluation. Eighteen credits of technical electives provides the student the opportunity to develop expertise in their chosen field of interest.

The curriculum is well adapted as a base for those students who wish to enter the research, development, production, or design areas of engineering or who intend to pursue

2001-2003
a graduate program or professional degree such as medical school. By a judicious choice of electives in the junior and senior years, it is possible to go on to attain a master of science or master of engineering degree in either two or three additional semesters beyond the bachelor’s degree.

Undergraduate Mission, Educational Objectives, and Learning Outcomes

Mission Statement: The mission of the Engineering Science Program is to prepare the engineering science student for a career in areas of specialization that are not directly accessible through one of the traditional engineering majors. The primary focus is on engineering fundamentals, laboratory experience, and multidisciplinary aspects of engineering.

Program Educational Objectives:
1. Coordinate the Engineering Science Program’s mission, educational objectives, and learning outcomes with the Iowa State University, College of Engineering, and AEEM department mission, objectives, and student outcomes.
2. Educate students to be proficient in the application of the engineering sciences of solid mechanics, fluid mechanics, dynamics, material sciences, thermal sciences, and electrical sciences.
3. Prepare students to be successful in the workplace utilizing the non-technical skills including: communication skills, teamwork, leadership, ethical and societal responsibility considerations.
4. Provide students with practical engineering experiences through hands-on laboratory courses, internships and cooperative education experiences.
5. Maintain an ongoing consultation with students, faculty, industry, and engineering professionals for the continuous process of academic improvement.

Program Learning Outcomes:
Students pursuing a degree in engineering science will:
1. Apply a basic knowledge of mathematics, science and engineering in the identification, formulations, and solution of engineering problems.
2. Become proficient in the use of laboratory equipment necessary for engineering practice in solid mechanics, fluid mechanics, dynamics, material sciences, and electrical sciences.
3. Function on a multidisciplinary team in their area of specialization, which may include the areas of acoustics, astronomy, avionics, biomedical engineering, control systems, computational and experimental mechanics, dynamics and vibrations, and nondestructive evaluation.
4. Design and conduct experiments.
5. Design and conduct computer simulations.
6. Analyze and interpret data.
7. Become proficient in the use of computer equipment and software necessary for engineering practice.
8. Develop and demonstrate communication skills.
9. Discuss and explore professional and ethical responsibility.
10. Discuss and explore the impact of engineering solutions in global, societal, environmental, economic, safety, and political contexts.
11. Develop and demonstrate teamwork skills.
12. Have opportunities to develop leadership skills.
13. Develop the ability to engage in life-long learning through independent study, research, and engineering development.

Graduate Study

Minor work is available to students taking major work in other departments. Courses open for nonmajor graduate credit: all 300- and 400-level courses except 396, 397, 398, 466, 490 and 498.

Courses Primarily for Undergraduate Students

E Sci 298. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

E Sci 466. Multidisciplinary Engineering Design. (Same as Cpr E 466, E E 466, I E 466, M E 466, Mat E 466) Cr. 1-4) Cr. 3. F.S. Prereq: Student must be within two semesters of graduation and receive permission of the instructor. Application of team design concepts to projects of a multi-disciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

Courses and Programs

English

www.engr.iastate.edu/

Charles J. Kostelnick, Chair of Department

Distinguished Professors: Bowers

Professors: Burnett, Carlson, Chapelle, Daly, Dearin, Douglas, Dow, Duijn, Freed, Geha, Graham, Kostelnick, Mendelson, Nakadate, Owen, Paague, Russell, Silet, Swander, Vano, Zimmerman

Distinguished Professors (Emeritus): Feinberg

Assistant Professors (Adjunct): Albrighton, Berry, Betcher, Li, Vallier

Assistant Professors (Emeritus): Kaufmann, McCully

Instructors (Adjunct): Anderson, Barratt, Bertelsen, Bjorstrom, Douglas, Duffelmeyer, Furbeck, Hagge, Langenberg, Mahoney, Morgan, Myers, Nolant, Schmidt, Shivvers

Undergraduate Study

The department offers a wide variety of courses for students seeking a degree in English, as well as for students wishing to broaden their general education. Offerings include classes in introductory college writing, literature, film, creative writing, rhetoric and professional communication, English education, linguistics, and teaching English as a second language.

The discipline of English helps to develop students’ understanding of how language functions in literature, mass media, and both personal and professional writing. Students not pursuing an English major may select English courses to fill electives, to pursue a minor, or to complement their training in other majors.
Graduates will possess a broad-based knowledge and understanding of the discipline. They will also understand their particular disciplinary specialization, whether it be literary studies, rhetoric and professional communication, teacher education, creative writing, or teaching English as a second language/applied linguistics. Graduates will be able to write well-organized, well-reasoned essays that demonstrate their ability to read and think critically.

Introductory writing courses in the department are designed to improve the skills in communication and reading comprehension necessary for successful university work. The English Department maintains a Writing Center to assist students registered for writing courses. (See Colleges and Curricula, Bachelor’s Degree Requirements, and English Proficiency Policy for information about communication proficiency requirements for each Iowa State major. Note that the major requirements in many departments call for coursework beyond first-year composition.)

Through the Intensive English and Orientation Program, the department offers special courses in English for both undergraduate and graduate students who are native speakers of other languages. (See bulletin entries under English Courses for Native Speakers of Other Languages and English Requirement for International Students.)

Careers for English Majors

Students graduating with a major in English find that their career opportunities are improved in fields that require special communication skills, such as publishing, public service, research, business and technical writing, personnel management, international relations, advertising and marketing, finance, and public relations. An undergraduate major in English is an excellent basis for the professional study of law, medicine, theology, or business management. Students in English Education can qualify to teach English in middle or high school. (See Index, Teacher Licensure.) English majors may also pursue graduate studies in a number of communication-related fields.

English Major Requirements

The English major will choose from among several programs of study: Literature, Rhetoric and Professional Communication, and English Education. Students wishing to focus on creative writing should choose Literature as a program of study. English majors are required to have, in addition to first-year composition, at least 39 credits in English; those in English Education must have 48 credits in English in addition to required teaching-related courses taken in other departments. English majors transferring from other institutions must take at least 18 of their credits in English while in residence at Iowa State.

To graduate in English, a student must earn at least a C (not a C-) in English 104 and 105 as well as in each of the courses taken to fulfill the program of study. Earning at least a C in first-year composition and in one advanced writing class also meets the departmental English proficiency requirement.

Finally, all English majors must take some classes in early literature. Those in the Literature option must take at least two pre-1800 literature classes. Those in other options must take at least one pre-1800 literature class and one pre-1900 literature class.

Distributed Requirements

All English majors, no matter what their program of study, must take nine courses for a total of 27 credits from a list of distributed requirements:

<table>
<thead>
<tr>
<th>Course Code</th>

Graduate Study

The master of arts degree program in English offers varied possibilities for the advanced study of writing, language, and literature. Students are admitted to one of four areas of specialization: creative writing; teaching English as a second language/applied linguistics; literature; and rhetoric, composition, and professional communication. These areas of specialization are designed to prepare students for teaching at the secondary, two-year college, or beginning college and university levels; for further graduate study in language and literature; for teaching English as a second language; for creative writing; or for technical writing, business communication, editing, and associated professional writing.

The master’s degree requires 30 semester credits, including a thesis or project (2-3 credits). All areas of specialization except creative writing have a language requirement that may be met through a number of options, including previous foreign language study, graduate linguistics courses, satisfactory performance on
 Courses Primarily for Undergraduate Students

Engl 101. English for Native Speakers of Other Languages. F. S. Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.) For undergraduates: Completion of English 101 requirement before or concurrent enrollment in English 104. For graduate students: Completion of English 101 satisfies the English requirement of the Graduate College. Engl 101 courses are limited to students who are nonnative speakers of English. Credit from 101 does not count toward graduation.

A. Academic English I—Cr. 3. Available P/NP to graduate students at their department’s option.
B. Academic English II—Cr. 3. Available P/NP to graduate students at their department’s option.
C. Academic English III—Graduates. Cr. 3. Available P/NP to graduate students at their department’s option.

Engl 104. First-Year Composition I. (3-0) Cr. 3. F.S.SS. Introduction to college-level writing strategies with emphasis on critical reading and thinking skills. Six to eight major writing assignments with readings from a variety of texts.

Engl 105. First-Year Composition II. (3-0) Cr. 3. F.S.SS. Prereq: 104 or exemption from 104; credit or concurrent enrollment in Lib 160. Development of college-level writing strategies with emphasis on arguing a position, analyzing texts, and using primary and secondary sources. Five to seven major writing assignments.

Engl 105H. First-Year Composition, Honors. (3-0) Cr. 3. F. Prereq: Exemption from 104 and admission to Freshman Honors Program; credit for or concurrent enrollment in Lib 160. Development of college-level writing strategies with emphasis on arguing a position, analyzing texts, and using primary and secondary sources. Five to seven major writing assignments.

Engl 180. Communication Skills for International Students. (2-0) Cr. 2. Cr. 3. F.S. Prereq: Placement in English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

Engl 220. Descriptive English Grammar. (Same as Ling 219.) (3-0) Cr. 3. F. S. Prereq. Sophomore classification. Introduction to linguistic concepts and principles of linguistic analysis; English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

Engl 230. Literature in British Culture. (3-0) Cr. 3. F. S. Prereq: Credit in or exemption from 104. Selected literary texts chosen for their attention to important trends, values, attitudes, ideals, and beliefs of our own past and times.

Engl 231. Literature in American Culture. (3-0) Cr. 3. F. S. Prereq: Credit in or exemption from 104. Selected literary, critical, and visual texts chosen for their attention to important trends, values, attitudes, ideals, and beliefs of contemporary and past times.

Engl 237. Survey of Film History. (3-0) Cr. 3. F. Prereq: 105. A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present.

Engl 260. Introduction to Literary Study. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 104. Basic principles of literary study. Emphasis on writing of interpretive and critical essays. Particular attention to poetry. Designed for English majors.

Engl 301. Cultural Studies. (3-0) Cr. 3 each time taken, maximum of 6. F. S. Prereq: 105. Literature and related arts and cultural phenomena, with focus on a specific group, subgroup, identity, or phenomenon. Selected texts, artifacts, and cultural experiences.

Engl 303. Free Lance Writing for Popular Magazines. (3-0) Cr. 3. S. S. Prereq: 105. Practical workshop in writing nonfiction articles for popular magazines. Emphasis on writing, market research, preparation of manuscripts, methods of submission. Major goal of the course is production of marketable material.

Engl 304. Creative Writing—Fiction. (3-0) Cr. 3. F. S. Prereq: 105, not open to freshmen. Progresses from practice in basic techniques of fiction writing to fully developed short stories. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

Engl 305. Creative Writing—Nonfiction. (3-0) Cr. 3. F. S. Prereq: 105, not open to freshmen. Workshop in writing imaginative essays, both critical and personal. Analytical reading, development of literary techniques. Individual and small group conferences.
Engl 306. Creative Writing—Poetry. (3-0) Cr. 3. F.S. Prereq: 105, not open to freshmen. Progresses from traditional to contemporary forms. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

Engl 307. Writing Young Adult Fiction. (3-0) Cr. 3. S. Prereq: 105, not open to freshmen. Workshop in writing and reading short stories that explore coming-of-age themes. Emphasis on coming-of-age literature as well as the technique of short fiction. Individual and group story conferences.

Engl 310. Rhetorical Analysis. (3-0) Cr. 3. F.S. Prereq: 105. Fundamental principles of rhetorical study. Emphasis on basic rhetorical theory. Particular attention to analysis of non-literary texts.

Engl 314. Technical Communication. (3-0) Cr. 3. F.S.SS. Prereq: 105, junior classification. Theories, principles, and processes of effective written communication in the technical disciplines. Attention to the major strategies of technical discourse; techniques of analyzing audiences and writing situations, and for organizing data and information. H. Honors. Nonmajor graduate credit.

Engl 315. Creative Writing—Screenplays. (3-0) Cr. 3. F. Prereq: 105, not open to freshmen. Stresses master scene technique of writing fully developed screenplays. Emphasis on TV and movie techniques, writing, workshop criticism, analytical reading and viewing, and individual conferences. Nonmajor graduate credit.

Engl 316. Creative Writing—Playwriting. (Same as Theatre 316.) (3-0) Cr. 3. S. Prereq: 105, not open to freshmen. Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, group and individual projects using workshop criticism, and individual conferences. Nonmajor graduate credit.

Engl 339. Literary Theory and Criticism. (3-0) Cr. 3. F.S. Prereq: 260 and 3 additional credits in literature. Study of selected texts of literary criticism, with attention to the purposes and practices of criticism.

Engl 340. Survey of Women’s Literature. (Same as W S 340.) (3-0) Cr. 3. F. Prereq: 105. Historical and thematic survey of literature by and about women, e.g., women’s literature; analysis of recurrent images of women in literature. Nonmajor graduate credit.

Engl 346. American Indian Literature. (Same as Am In 346.) (3-0) Cr. 3. S. Prereq: 105. Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Nonmajor graduate credit.

Engl 347. Survey of African American Literature. (Same as Af Am 347.) (3-0) Cr. 3. F. Prereq: 105. Survey of African American literature from the beginnings to the 1960s. Nonmajor graduate credit.

Engl 348. Contemporary African American Literature. (Same as Am In 348.) (3-0) Cr. 3. S. Prereq: 105. Intensive reading in literature by African Americans from 1960 to the present. Nonmajor graduate credit.

Engl 349. Selected Topics in Multicultural Literatures of the United States. (3-0) Cr. 3 each time taken, maximum of 6. F.S. Prereq: 105. Literature by writers from U.S. multicultural groups. May include literature of several groups or focus upon one of the following: Asian Americans, African Americans, Latin@ Americans, African Indians. Nonmajor graduate credit.

Engl 353. World Literature: Western Foundations through Renaissance. (Same as Cl 353.) (3-0) Cr. 3. F. Prereq: 105. Representative works from: the drama, epics, poetry, and prose of the Ancient World through the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

Engl 354. World Literature: Seventeenth through Twentieth-Century. (3-0) Cr. 3. S. Prereq: 105. Representative works primarily from European traditions of drama, fiction, poetry, and nonfiction.

Engl 356. Literary Study of the Bible. (3-0) Cr. 3. S. Prereq: 105. Selected readings from Judaeo-Christian sacred literature, including narrative, poetry, wisdom literature, and apocalyptic literature.

Engl 357. Folklore. (3-0) Cr. 3. F. Prereq: 105. Types, functions, contexts, and purposes of folklore. Emphasis on traditional narratives and verbal folklore. Nonmajor graduate credit.

Engl 358. Myth, Fairytales and Legend. (3-0) Cr. 3. S. Prereq: 105. Study of traditional fairytales, myths, and legends from diverse cultures. Nonmajor graduate credit.

Engl 360. American Literature: Beginnings to 1830. (3-0) Cr. 3. F.S. Prereq: 105. Selected readings from Judaeo-Christian sacred literature, including narrative, poetry, wisdom literature, and apocalyptic literature.

Engl 362. American Literature: 1830 to 1914. (3-0) Cr. 3. S. Prereq: 105. American literature; literary works in their social and cultural contexts.

Engl 364. American Literature: 1914- present. (3-0) Cr. 3. S. Prereq: 105; sophomore classification. American literature from its beginnings through the colonial period to early romanticism; literary works in their social and cultural contexts.

Engl 370. Shakespeare. (3-0) Cr. 3. F.S.SS. Prereq: 105. Reading and analysis of plays. Development of Shakespeare’s dramatic art in its social and intellectual context.

Engl 373. British Literature: The Middle Ages. (3-0) Cr. 3. F.S. Prereq: 105; sophomore classification. Medieval literature (Beowulf through the fifteenth century), considered in social and intellectual contexts.

Engl 374. British Literature: The Renaissance. (3-0) Cr. 3. F.S. Prereq: 105; sophomore classification. Literature from 1500 to 1660 considered in social and intellectual contexts.

Engl 375. British Literature: The Restoration and 18th Century. (3-0) Cr. 3. F.S. Prereq: 105; sophomore classification. Literature from the late eighteenth century to about 1900, considered in social and intellectual contexts.

Engl 376. British Literature: Romantic and Victorian. (3-0) Cr. 3. F.S. Prereq: 105; sophomore classification. British literature since about 1890 considered in social and intellectual contexts.

Engl 384. Twentieth-Century Fiction. (3-0) Cr. 3. F.S. Prereq: 105. Works by writers from various countries, including the United States or Great Britain.

Engl 389. Postcolonial Literatures. (3-0) Cr. 3. S. Prereq: 105. History, theory, and practice of post-colonial literature written in English. Selected reading from one or more postcolonial literatures.

Engl 392. Practice and Theory of Teaching Writing in the Secondary Schools. (3-0) Cr. 3. F.S. Prereq: 219 or 220. Introduction to teaching secondary language arts. Current theories and practices in the teaching of writing to secondary school students. Theories of rhetoric, approaches to teaching, lesson design and planning. Evaluating writing. Professional portfolio development. (Taken concurrently with CI 280. Cr. 2.)

Engl 394. Young Adult Literature. (3-0) Cr. 3. F. Prereq: 105. Critical study and evaluation of the genre; examination of modes and themes found in the literature; study of the relationship of the genre to children’s literature and adult literature. Evaluation of literature for use in school programs. Restricted to students seeking teacher certification. Nonmajor graduate credit.

Engl 395. Study Abroad. Cr. var. SS. Prereq: Permission of instructor. Supervised study of an appropriate area of the discipline in a foreign country. Special fees apply.

A. Literature
B. Creative Writing
C. Linguistics
D. Rhetoric and Professional Communication
E. Teacher Education

Engl 398. Cooperative Education. Cr. F. S.SS. Prereq: Permission of the department cooperative education coordinator, junior or senior classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

Engl 404. Creative Writing Workshop—Fiction. (3-0) Cr. 3 each time taken, maximum of 6. F.S. Prereq: 304. Individual projects in short fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, setting, character, characterization, theme, setting.

Engl 405. Creative Writing Workshop—Nonfiction. (3-0) Cr. 3 each time taken, maximum of 6. F.S. Prereq: 305. Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

Engl 406. Creative Writing Workshop—Poetry. (3-0) Cr. 3 each time taken, maximum of 6. F.S. Prereq: 306. Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as sound, image, internal structure, rhythm, tone, figurative language.
Engl 517. Secondary Language Acquisition. (Same as Ling 517.) (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Theory, methods, and results of second language acquisition research with emphasis on approaches relevant to second language teaching.

Engl 518. Teaching English as a Second Language Methods and Materials. (Same as Ling 518.) (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Issues, techniques, materials, curriculum design, and evaluation for all levels of ESL instruction. Practical application including group and individual projects.

Engl 519. Second Language Assessment. (3-0) Cr. 3. S. Prereq: 517 Principles of second language assessment including reliability, validity, authenticity, and practicality. Constructing, scoring, interpreting, and evaluating second language tests for a variety of situations.

Engl 521. Teaching of Literature and the Literature Curriculum. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 6 credits in literature. Examination of the roles of the literary work, reader, and teacher in literary study. Responses to literature. Place of literature in language arts. Study and development of curriculum materials for middle school, high school, and college levels of instruction.

Engl 523. Introduction to Old English Language and Literature. (Dual-listed with 423.) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: Graduate classification, course in medieval literature or history or history of the English language recommended. Introductory study of Old English language and literature in prose and poetry, including extracts from Beowulf. Some attention to Anglo-Saxon culture.

Engl 524. Literacy, Issues and Methods for Nonnative Speakers of English. (Same as Ling 524.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 511 or an introductory course in linguistics. Issues related to education in a variety of situations, including children and adults at basic skills levels as well as teens and adults in academic, professional, and vocational programs.

Engl 525. Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English. (Same as Ling 525.) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 511 or an introductory course in linguistics. Theoretical and practical issues and techniques in the teaching of second language pronunciation, listening, and speaking to student populations. Topics will be relevant to those intending to teach in various situations, including K-12 and adult learners in academic, professional, and vocational programs.

Engl 526. Computer-Assisted Language Learning. (Same as Ling 526.) (3-0) Cr. 3. S. Prereq: 517 and 513 or equivalent. Theory, research, and practice in computer use for teaching non-native speakers of English. Methods for planning and evaluating computer-based learning activities.

Engl 527. Discourse Analysis. (Same as Ling 527.) (3-0) Cr. 3. S. Prereq: 511 or an introductory course in linguistics. Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts.

Engl 528. English for Specific Purposes. (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Issues and techniques in analyzing, teaching, and assessing English for specific purposes. Topics include theories of specific purpose language use, analysis of learner needs in target language contexts, and syllabus and materials development for teaching and assessment.

Engl 530. Research Tools and Tactics. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: Graduate classification. Contemporary research methods, in the library and online, adjusted to the student’s choice of subjects. Reference sources and research methods for primary and secondary sources; hands-on experience with soft-
Intercourse and Rhetorical Communication (Sp Cm)
(Administered by the Department of English)
The following courses are part of the Speech Communication program. For more information, refer to that section. Sp Cm 110, 117, 212, 223, 290, 298, 305, 312, 313, 321, 322, 323, 324, 325, 327, 398, 404, 410, 412, 416, 417, 490, 493, 493A, 496B, 497, 499, 504, 513, 590.

Entomology

Joel Coats, Chair of Department
University Professors: Pedigo
Professors: Baker, Coats, DelWitt, Hart, Krafsur, D. Lewis, Obrycki, Rice, Rowley, Tollefson, Wintersteen
Professors (Collaborators): L. Lewis, Wilson
Professors (Emeritus): Guthrie, R. Lewis, Mutchmor, Stockdale
Associate Professors: Bonning, Holscher, Jurenka
Associate Professors (Collaborators): Perich
Assistant Professors: Beetham, Courtney
Assistant Professors (Collaborators): Binder, Cosse, Hellmich

Undergraduate Study
For undergraduate curriculum in entomology, see College of Agriculture, Curricula.

The undergraduate curriculum in entomology is designed for persons interested in studying insects, their adaptations, and the practicalities of dealing with them. Students electing entomology as a major will prepare themselves for positions in industry, business, government, education, and public health. Graduates may acquire positions in research, development, and technical sales for agricultural chemicals and seed companies. State and federal agencies employ entomologists as consultants, extension directors, mosquito abatement agents, inspectors, and research aides. Entomologists may also find employment with urban or agricultural pest-management or consulting firms, large private farms and ranches, and horticultural nurseries.

All graduates understand the principles of insect structure and function. They understand the evolutionary and ecological relationships of insects with other life forms, and the impact of insects relative to human and animal health, as well as the relationships between insects and humanity’s food, fiber, structural, and aesthetic needs and expectations. Graduates understand the principles and methods available to manage beneficial and pest insect populations. They are skilled in identifying insects and related groups and understand the biology, ecology, behavior, diversity, and evolutionary relationships of the major groups of insects. They understand the application of the scientific method in problem solving and the principles of experimental design and analysis. Graduates are able to communicate research and educational materials properly and competently - orally, visually, and in writing - and are able to work effectively with others.

Graduates of the agricultural and horticultural insect management option are skilled in determining pest levels and impact on plant and animal hosts, and the management of these pests. They understand the environmental, legal, and ethical issues involved in insect population management.

Graduates of the community and structural insect management option are able to combine biological, social, legal, and economic expertise to manage insects in close association with humans. They are skilled in the applications of pesticides and other management tactics for protecting human possessions from insect pest destruction. Moreover, they have an understanding of and have entrepreneurial abilities in urban and structural pest control enterprises.

Graduates of the insect biology option have achieved an understanding of the biochemical and physiological processes governing insect metabolism, growth, and form. They understand the evolutionary and ecological significance of insects. They also have a broad background in the biological sciences. Assuming good academic performance, graduates of this option are prepared to enter graduate or professional schools.

Entomology participates in the interdepartmental undergraduate majors in plant health and protection and in integrated pest management.

The department offers a minor in entomology that may be earned by completing 370, 374, 376, and 6 credits in courses selected from an approved list supplied by the department. A preprofessional program is available in entomology.

Graduate Study
The department offers work for the degrees of master of science and doctor of philosophy with a major in entomology or toxicology. Within the entomology major, the student may concentrate in aquatic entomology, biological control, chemical ecology, genetics, forest entomology, host plant resistance, medical veterinary entomology, morphology, pathology, pest management, physiology, population ecology/genetics, systematics, or insecticide toxicology.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding...
of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of Ent 590 (selected from topics A through D, F through I, M and N, inclusive), and at least 1 credit of Ent 600. Any student receiving the Ph.D. in entomology shall have at least one course in insect physiology, one course in insect systematics, four courses of Ent 590 (selected from topics A through D and F through I, M and N inclusive), and at least 1 credit of Ent 600. In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as Ent 590K both semesters or Ent 590K one semester and Ent 590L the other semester.

Entomology participates in the interdepartmental majors in ecology and evolutionary biology, and genetics, and in the interdepartmental major and minor in toxicology (see Index).

The Federal Corn Insects and Crop Genetics Research Unit and the North Central Plant Introduction Station are available for advanced study in certain phases of entomological research.

More information about the department, such as current research, faculty resumes, physical facilities, and graduate student can be reviewed on the department’s world-wide web page.

Courses open for nonmajor graduate credit: 370, 372, 373, 374, 376, 386, 416, 483, 493.

Courses Primarily for Undergraduate Students

Ent 213. Management of Structural Insect Pests. (3-0) Cr. 1. F. 5 weeks. Prereq: 201. Lewis. Recognition, biology, economic importance and management of insects and other arthropods that infest homes and commercial structures with an emphasis on structural, household, and stored product pests.

Ent 283. Pesticide Applicator Certification. (Same as Agron 283, For 283, Hort 283, PH HP 283, P M 283.) (2-0) Cr. 2. S. Pedigo. Core background and specialty topics in agricultural, forestry, and horticultural pesticide applicator certification. Students select certification categories and are eligible for pesticide applicator certification upon completion of course. Commercial certification emphasized.

Ent 360. Insect Behavior. (Dual-listed with 560.) (3-0) Cr. S. S. Prereq: Biol 202. Baker. The mechanisms underlying the behavior of insects; emphasis on neuroethological and evolutionary bases of insect orientation, reproduction, foraging, oviposition, defense, learning, and sociability.

Ent 371. Introduction to Insect Ecology. (Same as la LL 371I.) See Iowa Lakeside Laboratory.

Ent 373. Household and Structural Pest Management. (3-0) Cr. 3. S. Prereq: Biol 109 or 201; Ent 201. Lewis. Principles of pest management for household, structural, and stored product pests. Recognition, biology, and significance of insects, other arthropods, and major pest vertebrates that infest homes and commercial structures. Tactics of pest prevention, suppression, and elimination. Nonmajor graduate credit.

Ent 374. Insects and Our Health. (Same as Biol 374, Micro 374.) (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences. Rowley. Identification, biology, and significance of insects and arthropods that attack people and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

Ent 376. Fundamentals of Entomology and Pest Management. (Same as P M 376 and PI HP 376.) (2-3) Cr. 3. F. S. Prereq: Biol 109 or 201. Pedigo. Introduction to entomology and insect-pest management, including life histories, ecology, economics, tactics of population suppression, and ecological backlash. Nonmajor graduate credit.

Ent 386. Management of Insect Pests. (2-0) Cr. 2. Alt. S., offered 2002. Prereq: Biol 109 or 201; Tollefson. Introduction to insects and their lifestyles. Theory and application of pest-management practices. Examples drawn primarily from field crops. Nonmajor graduate credit. Credit for only 376 or 386 may be applied for graduation, not both.

Ent 416. Forest Pest Management. (Same as P M 416, For 416, PI HP 416, P M 416.) (3-1) Cr. 4. S. Prereq: 8 credits in biological sciences, including Biol 201. Harrington, Hart. Nature of forest, shade tree, and wood pests; physical agents of tree damage; concepts of forest pest management; integrated pest management programs in various turfgrass environments.

Ent 493. Workshop on Insect Management. (Dual-listed with 493; same as A Ecl 525.) (2-3) Cr. 3. Alt. S., offered 2000. Prereq: Biol 312 or equivalent. Courtney. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on the collection, identification and certification of taxa in local streams and lakes.

Ent 530. Ecologically Based Pest Management Strategies. (Same as SusAg 530.) See Sustainable Agriculture.

Ent 550. Pesticides in the Environment. (Same as Tox 550.) (2-0) Cr. 2. S. Prereq: Graduate classification or permission of instructor. Coats. Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere.

Ent 555. Insect Physiology. (3-3) Cr. 4. S. Prereq: 370. Jurekun. Life processes of the insects, including reviews of current problems in insect physiology.

Ent 650. Insect Behavior. (Dual-listed with 650.) (3-3) Cr. 3. S. Prereq: Biol 452 or equivalent. Baker. The mechanisms underlying the behavior of insects; emphasis on neuroethological and evolutionary bases of insect orientation, reproduction, feeding, oviposition, defense, learning, and social behavior.

Ent 658. Advanced Systematics. (Same as Bot 568.) See Botany.

Ent 574. Medical Entomology. (3-3) Cr. 4. Alt. S., offered 2002. Prereq: 9 credits in biological sciences. Rowley. Identification, biology, and signifi-
cance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease.

Ent 575. Plant Protection Using Natural Enemies. (Dual-listed with 375.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq. 370 or 376 or permission of instructors. Bonning, Obrycki. Overview of the biology, ecology, and classification of insect pathogens, predators, and parasites. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies.

Ent 578. Global Protozoology - Molecular Biology of Protozoa. (Dual-listed with 478, same as V Pth 578.) See Veterinary Pathology.

Ent 580. Sustainable Agriculture Seminar. (Same as An S 580.) See Animal Science.

Ent 590. Special Topics. Cr. 1 to 3 each time taken. Prereq. 15 credits in zoological sciences, permission of instructor.

Bi. Biological Control and Pathology.

Chemical Ecology and Behavior.

C. Ecology and Pest Management.

D. Evolution and Systematics.

E. Special Research Topics.

F. Medical and Veterinary Entomology.

G. Molecular Entomology.

H. Morphology and Physiology.

I. Toxicology and Biochemistry.

J. Teaching Experience.

K. Extension Internship.

L. Immature Insects.

N. Insect Genetics.

Courses for Graduate Students

Ent 675. Insecticide Toxicology. (Same as Tox 675.) (2-3) Cr. 3. Alt. F., offered 2002. Prereq. Tox 555 or Tox 501 or permission of instructor. Coats. Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides.

Ent 699. Research. Cr. var.

Entrepreneurial Studies

(Interdepartmental Undergraduate Minor)

Supervisory Committee: Howard E. Van Auker (Business), Chair; D. Draper (Vet Med); Eric O. Hoiberg (Ag); Loren W. Zachary (Engineering); Mary A. Littrell (Family & Cons. Science); Nancy Polster (Design); Peter Orzech (LAS); Roger A. Smith (Education).

Entrepreneurial Studies is an interdisciplinary program that provides opportunities to students to learn about entrepreneurship—the starting of new business ventures. It serves to complement the student’s major area of study, whether it be electrical engineering, horticulture, textiles and clothing, or veterinary medicine, by offering a means of putting theory and science into practice. The goal of the Entrepreneurial Studies program is to provide the knowledge and skills needed to start and manage new ventures. In addition to feasibility analysis and business planning, the program deals with the topics of innovation, technology transfer, industry analysis, and competitive strategy. Although the program introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

A minor in entrepreneurial studies is currently available to undergraduate students who are not enrolled in the College of Business.

Environmental Science

(Interdepartmental Undergraduate Program)

William G. Crompton: Coordinator

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science curriculum is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

The Environmental Science major is offered through both the College of Agriculture and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. General requirements for the major are outlined below, and additional information is available in the Environmental Programs Office, 131 Bessey Hall.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved support courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.
2. Twenty-nine credits of course work in the major, including the Environmental Science core (EnSci 295, 330, 402, 403, 404 and 495) and 12 additional credits of approved course work in Environmental Science. A combined average grade of C or higher is required in courses applied in the major.
3. Practical experience consisting of EnSci 290, 390, or equivalent experience.

English proficiency requirement: Beyond first-year composition (Eng 104 and 106) Environmental Science majors must demonstrate proficiency in written communication by completing an approved advanced course and maintaining a portfolio of term papers and other major writing assignments for departmental evaluation.

A minor in Environmental Science may be earned by completing 15 credits in Environmental Science including EnSci 330 and at least 7 credits from EnSci 402, 403, and 404.

Courses are open for nonmajor graduate credit: 301, 330, 402, 403, 404, 405, 410, 410L, 411, 422, 422I, 434, 461, 473, 473I, 475, 485, 487.

Courses Primarily for Undergraduate Students

EnSci 290. Apprenticeship. Cr. Var. Staff. Prereq. Approval of the Environmental Science Coordinator. Practical experience in an approved setting such as a research laboratory, government office, or private office. This should be completed prior to being classified as a senior or completing EnSci 390. Offered on a satisfactory-fail grading basis only.

EnSci 301. Forest Ecology and Soils . (Same as For 301.) See Forestry Nonmajor graduate credit.
EnSci 304I. Physical Geology. (Same as La LL 304I.) See Iowa Lakeside Laboratory.

EnSci 312. Ecology. (Same as Biol 312.) See Biology.

EnSci 312I. Ecology. (Same as La LL 312I.) See Iowa Lakeside Laboratory.

EnSci 360. Environmental Soil Science. (Same as Agron 360, Geol 360 [3-3] Cr. 3. S. Prereq: Agron 260 or Geol 100 or 201. Bursas, Killorn. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

EnSci 390. Internship in Environmental Science. Cr. var. Prereq: Approval of the Environmental Science coordinator. Supervised off-campus work experience in the field environmental science. Offered on a satisfactory-fail grading basis only.

EnSci 402. Watershed Hydrology and Surficial Processes. (Same as Agron 402, For 402, Geol 402.) (3-3) Cr. 4. F. Prereq: Credit or enrollment in EnSci 330 or Geol 100 or 201. 3 credits in biology and 6 credits in chemistry. Bursas, Simpkins. Examination of watersheds as systems wherein biologic and physical factors control hydrology, soil formation, and nutrient transport. Laboratory emphasizes field investigation of watershed-scale processes. Nonmajor graduate credit.

EnSci 402I. Watershed Hydrology and Surficial Processes. (Same as La LL 402I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

EnSci 403. Environmental Biogeochemistry. (Same as Bot 403, Geol 403.) (3-2) Cr. 4. S. Prereq: EnSci 330 or permission of the instructor. Raich. Biogeochemical cycles, ozone chemistry, global change. Emphasis on the role of soils in maintaining the balance between the atmosphere and the oceans, recognizing the importance of both biota and inorganic processes in the cycling of elements. Laboratory emphasizes computer modeling and simulation. Nonmajor graduate credit.

EnSci 404. Global Change. (Same as Agron 404, Env S 404, Mtor 404.) [3-1] Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering. Takle. Biogeochemical cycles, ozone chemistry, global change. Emphasis on the role of soils in maintaining the balance between the atmosphere and the oceans, recognizing the importance of both biota and inorganic processes in the cycling of elements. Laboratory emphasizes computer modeling and simulation. Nonmajor graduate credit.

EnSci 404I. Global Change. (Same as Agron 404I, Geol 404I.) (3-3) Cr. 4. S. Prereq: EnSci 330 or permission of the instructor. Raich. Biogeochemical cycles, ozone chemistry, global change. Emphasis on the role of soils in maintaining the balance between the atmosphere and the oceans, recognizing the importance of both biota and inorganic processes in the cycling of elements. Laboratory emphasizes computer modeling and simulation. Nonmajor graduate credit.

EnSci 405. GIS and Natural Resources Management. (Same as A E 405.) [2-2] Cr. 3. F. Prereq: Wrsing knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. Nonmajor graduate credit.

EnSci 410L. Aquatic Ecology Laboratory. (Same as A Ecl 410L.) See Animal Ecology. Nonmajor graduate credit.

EnSci 411. Hydrogeology. (Same as Geol 411.) (3-2) Cr. 4. F. Prereq: Geol 100 or 201, Math 165 or 181, Phys 111 or 221. Simpkins. Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, and groundwater geochemistry. Introduction to groundwater flow modeling. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. Nonmajor graduate credit.

EnSci 422. Environmental Geochemistry. (Same as Geol 422.) (2-2) Cr. 3. F. Prereq: 402 or 411 or equivalent. Chem 163 or equivalent background in chemistry. Staff. Geochemistry of natural waters, including inorganic and organic constituents and water-rock interactions. Interpretation of water quality data. Geochemical equilibrium modeling and introduction to groundwater modeling. Laboratory emphasizes chemical analysis of waters and computer modeling. Nonmajor graduate credit.

EnSci 422I. Prairie Ecology. (Same as La LL 422I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

EnSci 459. Environmental Soil and Water Chemistry. (Same as Agron 489.) (3-3) Cr. 3. Alt. offered 2001. Prereq: 401 or Agron 384, Chem 210 or 211. Evangelou. An introduction to the chemical properties of soils, chemical reactions and transformations occurring in soils and their impact on the environment. Topics include composition of soils, acid-base equilibria, buffer systems, mineral dissolution and precipitation, speciation, ion exchange, redox reactions, adsorption phenomena, soil pollution and chemical-equilibrium computer programs.

EnSci 461I. Introduction to GIS Landscape Modeling. (Same as La LL 461I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

EnSci 473. Soil Genesis and Landscape Relationships. (Same as Agron 473.) (2-3) Cr. 4. S. Prereq: 402 or Agron 402. Crompton. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for 473 or 473I may be applied for graduation, not both. Nonmajor graduate credit.

EnSci 473I. Soil Genesis and Landscape Relationships. (Same as La LL 473I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

EnSci 475. Surficial Processes. (Same as Geol 475.) (2-2) Cr. 3. S. Prereq: Geol 100 or 201 or equivalent experience. Iverson. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landscape genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation. Nonmajor graduate credit.

EnSci 487. Aquatic and Wetland Microbial Ecology. (Same as Bot 487, Micro 487.) (3-3) Cr. 3. S. Prereq: 6 credits in biology and 6 credits in chemistry. Crompton. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in aquatic and wetland ecosystems. Emphasis on energy flow and nutrient dynamics. Nonmajor graduate credit.

EnSci 495. Integrated Case Studies. (1-3) Cr. 2. S. Prereq: Senior classification in Environmental Science. Schultz. Integrated approach to the analysis and management of environmental systems. The course will focus on cooperative group activities to identify and assess environmental problems in heavily impacted landscapes and to develop and evaluate alternative management plans. Field trips.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

EnSci 505I. Watershed Modeling and GIS. (Same as La LL 505I.) See Iowa Lakeside Laboratory.

EnSci 508I. Aquatic Ecology. (Same as La LL 508I.) See Iowa Lakeside Laboratory.

EnSci 513. Ecological Toxicology. (Same as A Ecl 513.) See Animal Ecology.

EnSci 535I. Restoration Ecology. (Same as La LL 535I.) See Iowa Lakeside Laboratory.

EnSci 544. Aquatic Toxicology. (Same as A Ecl 544.) See Animal Ecology.

EnSci 564. Wetland Ecology. (Same as Bot 564.) See Botany.

EnSci 564I. Wetland Ecology. (Same as La LL 564I.) See Iowa Lakeside Laboratory.

EnSci 584. Ecosystem Ecology. (Same as Bot 584.) See Botany.

Environmental Studies

(Interdepartmental Undergraduate Program)

William G. Crompton: Coordinator

The Environmental Studies Program deals with the relationship between humans and nature, or between humans and natural systems. The curriculum is designed to give students an understanding of regional and global environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues. In addition, students in any college may elect to take a secondary major or minor in Environmental Studies. Additional information is available in the Environmental Programs Office, 131 Bessey Hall.

Secondary Major

The Environmental Studies secondary major is taken in addition to one’s first major and provides the breadth of preparation and integrated perspective necessary to understand environmental issues. Regardless of their home college, students seeking a secondary major in Environmental Studies complete 24 credits of approved course work including (1) Env S 120 or 201, and 303, (2) at least two integrative courses chosen from Env S 324, 340, 345, 404, 424, and 450, and (3) at least three human/societal perspectives courses chosen from Env S 334, 380, 382, 425, 472, 482, and 491. Beyond these three requirements, any Environmental Studies course or approved departmental course may be applied toward the 24 credit total for the major. A list of approved departmental courses is available in the Environmental Programs Office. Environmental Studies majors must take 12-
18 credits of approved course work in natural science which may include some courses used in the 24 credits for the major. Some courses used in the major may also be used to satisfy general education and other requirements of departments and colleges, but at least 15 credits of course work must be unique to the major (i.e. not used to meet any other departmental, college, or university requirement). A combined average grade of C or higher is required in courses applied to the major.

Minor
Students seeking a minor in Environmental Studies complete 15 credits in Environmental Studies courses including (1) Env S 120 or 201, and 303, (2) at least one integrative/ issues course chosen from Env S 324, 340, 345, 404, 424, and 450, and (3) at least one human/societal perspectives course chosen from Env S 334, 380, 382, 425, 472, 482, and 491. Beyond these three requirements, any Environmental Studies course may be applied toward the 15 credit total for the minor. A combined average grade of C or higher is required in courses applied to the minor, and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Courses open for nonmajor graduate credit: 303, 330, 334, 404, 407, 415, 421, 425, 4611, 472, 4801, 482.

Courses Primarily for Undergraduate Students
Env S 101. Environmental Geology; Earth in Crisis. (Same as Geol 101.) (3-0) Cr. 3 or (3-1) Cr. 4. F.S. Cody, Seifert. An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism. Students who enroll for the 4 credit option must register for a one hour discussion section.

Env S 120. Introduction to Renewable Resources. (Same as A Ecol 120, Agron 120, AST 120, For 120.) (3-0) Cr. F.S. Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

Env S 123. Environmental Biology. (Same as Biol 123.) (3-0) Cr. 3. F.S. An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussion of ecosystem processes, biodiversity, sustainability, resource use, and pollution.

Env S 201. Introduction to Environmental Issues. (4-0) Cr. 2. F.S. First 8 weeks. Prereq: Sophomore classification. Ecological and human/societal dimensions of environmental issues; how humans and their institutions interact with and affect the environment; how societies are affected by environmental change. Selected issues such as human population growth, resource depletion, biodiversity, and effects of agriculture on the environment.

Env S 293. Environmental Planning. (Same as C R P 293.) (3-0) Cr. 3. F.S. Prereq: Sophomore classification. Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

Env S 303. Great Environmental Writings. (4-0) Cr. 2. F.S. Second 8 weeks. Tanner. Students will read works by such authors as Thoreau, Muir, Leopold, and Abbey. Nonmajor graduate credit.

Env S 330. Environmental Systems. (Same as Bot 330, EnSci 330.) (2-4) Cr. F. Prereq: Biol 202 or Micro 201, Chem 164 or 178, Math 165 or 181. Crumpton. Dynamics of natural environmental systems. Systems analysis of material and energy flows, including physical and biological aspects of environmental systems and their function- al connections. Laboratory emphasizes environmental modeling and simulation. Nonmajor graduate credit.

Env S 334. Environmental Ethics. (Same as Phil 334.) (3-0) Cr. 3. F.S. Prereq. Three credits in philosophy or junior classification. Thorough study of some of the central moral issues arising in connection with human impact on nature, e.g., human overpopulation, species extinction, forest and wilderness management, pollution. Several world views of the proper relationship between human beings and nature will be explored. Nonmajor graduate credit.

Env S 345. Population Problems and Society. (Same as Soc 345.) (3-0) Cr. 3. F.S. Prereq: Soc 130 or 134. Human overpopulation, impact on food, resources, and services; population growth and development; trends of births, deaths, and geograph- ic movement; population projections; family planning and family planning, population policies and laws; comparison of the United States with other societies throughout the world.

Env S 380. Environmental and Resource Economics. (Same as Econ 380.) (3-0) Cr. 3. F.S. Prereq. Econ 101. Resource availability, e.g., conservation, and government policy, including energy issues. Environmental quality and pollution control policies.

Env S 382. Environmental Sociology. (Same as Soc 382.) (3-0) Cr. 3. F.S. Prereq. Soc 130 or 134, or Env S 201. Environmental-society relations; social con- struction of nature and the environment; social and environmental impacts of resource extraction, pro- duction, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples.

Env S 390. Internship in Environmental Studies. Cr. var. Prereq: Approval of the Environmental Studies Coordinator. Practical experience with nature centers, governmental agencies, private conservation groups, and other organizations. Offered on a satisfactory-fail grading basis only.

Env S 404. Global Change. (Same as Agron 404, EnSci 404, Mteor 404.) (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences, with permission of instructor. Biogeochemical cycles, ozone chem- istry, global energy balance, structure and circulation of the atmosphere and oceans, climate modeling, cli- mate variability, impact of agriculture, land use, water resources, energy use, sustainable develop- ment and public policy. Human dimensions and ethi- cal issues of global environmental change. Nonmajor graduate credit.

Env S 407. Watershed Management. (Same as For 407.) (3-3) Cr. 4. S. Prereq: A course in general biology. Managing human impacts on the hydrologic cycle. Field and watershed landscape best manage- ment practices for modifying the impacts on water quality, quantity and timing are discussed. Field pro- ject includes developing a management plan using landscape buffers. Nonmajor graduate credit.

Env S 415. Environmental Studies Seminar. (1-0) Cr. 1 each time offered. Offered on an irregular basis. Prereq: Junior classification. Current or historic topics in Environmental Studies. Nonmajor graduate credit.

Env S 421. Field Seminar. (0-4) Cr. 1 to 2. Offered on an irregular basis. Field trips during semester or break to varied sites of environmental interest in or outside of Iowa, preceded by readings, lectures, and examinations about the areas to be visited. Focus on development vs. preservation. Nonmajor graduate credit.

Env S 424. Sustainable and Environmental Horticulture Systems. (Same as Hort 424.) (2-0) Cr. 2. S. Inquiry into ethical issues and environmental consequences of horticultural cropping systems and production practices. Emphasis on production sys- tems that are resource efficient, environmentally sound, socially acceptable, and profitable.

Env S 425. Sociopolitical Analysis of Environmental Issues. (3-0) Cr. 3. F. Prereq. 201 and one other Environmental Studies course. Institutional behaviors which underlie environmental problems and controversies and potential solutions. The roles of government, business, citizen activists, the press, international development banks, and others. Nonmajor graduate credit.

Env S 450. Issues in Sustainable Agriculture. (Same as Agron 450.) (3-0) Cr. 3. S. Prereq. Agricultural science as a human activity; contempo- rary agricultural issues from agroecological perspec- tive. Comparative analysis of intended and actual consequences of development of industrial agricul- tural practices.

Env S 461. Introduction to GIS Landscape Modeling. (Same as La LL 461.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Env S 472. American Environmental History. (Same as Hist 472.) (3-0) Cr. 3. F. Prereq: Sophomore classification. Taylor. Conceptual approach to human history in North America by examining the impact of nature from precontact through the 20th century. Explores material interactions; intellectual modes; aesthetic relationships; and management strategies from aboriginal society through the environmental age. Nonmajor graduate credit.

Env S 480I. Introduction to Environmental Planning. (Same as La LL 480I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Env S 484. Sustainable Communities. (Same as C R P 484.) (3-0) Cr. 3. S. Prereq. Senior status or permission of instructor. The theory and application of sustainability to the physical and social planning of communities. We will examine environmental ethics as a basis for sustainability, with emphasis on the idea itself, and the movement toward indicators as out- come measurements both in the U.S. and interna- tionally. We then explore how these ideas have been applied in communities here and abroad.

Env S 490. Independent Study. Cr. var. Prereq: Permission of instructor and approval of Environmental Studies coordinator.

Env S 491. Environmental Law. (Same as C R P 491.) (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences. Legal precedents and alternative policies for environmental protection; rights to and regula- tions for uses of water, air, and land. Federal environ- mental control acts and leading federal court cases.
Family and Consumer Sciences

Master of Family and Consumer Sciences (M.F.C.S.).

The College of Family and Consumer Sciences offers a nonthesis degree program designed to enhance the skills of post-baccalaureate individuals whose work or family obligations preclude study on the Ames campus. Completion of the MFCS degree has permitted many individuals to obtain the credential needed for advancement while continuing their current employment. The program is considered to be a professional master’s degree and not preparation for further graduate study.

Students select either a comprehensive option or a specialization option. The comprehensive option can be followed on or off-campus and requires 36 credits covering a variety of family and consumer sciences subject matter. Off-campus courses are offered at several locations via the Iowa Communications Network (ICN) or the World Wide Web (WWW). Specializations are available in Nutrition; Dietetics; Human Development and Family Studies; Hotel, Restaurant, and Institution Management; and Textiles and Clothing.

In addition, students may select a 42-credit specialization in Family Financial Planning (FFP). The FFP specialization, offered in collaboration with five other universities in the Great Plains, is offered exclusively through courses on the Web. This program has been approved by the Board of Examiners of the Certified Financial Planner Board of Standards as a program with the competencies required to permit those completing the degree to sit for the CFP® Certification Examination. CFP® is a certification mark owned by the Certified Financial Planner Board of Standards.

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component. A thesis or creative component could be included on mutual agreement of the student and major professor, with approval of the Graduate College.

Admission requirements for the MFCS include a bachelor’s degree in a family and consumer sciences/home economics subject area or related disciplines, Graduate Record Examination (GRE) scores, official transcripts, three letters of recommendation, a goal statement, and graduation in the upper one-half of class with a bachelor’s degree from a regionally accredited U.S. institution or graduation in the upper one-half of class from a recognized foreign institution. Non-English speaking international students are required to have a TOEFL score of at least 550 at time of admission.

Graduate Certificates

To meet the requirements of the American Dietetics Association for the professional development of registered dietitians, graduate certificates are available in Dietetics Communication and Counseling, Dietetics Management, and Advanced Medical Nutrition Therapy. For detailed information about the certificates, contact the Department of Food Science and Human Nutrition or the Hotel, Restaurant, and Institution Management program.

For additional information, students should contact the CFCS Research and Graduate Education Office, 126 MacKay Hall, Ames, Iowa 50011, mfcsinfo@iastate.edu

Family and Consumer Sciences Education and Studies

Mary B. Gregoire, Chair of Department
Professors: Cowan, Gregoire
Professors (Adjunct): Kurth
Distinguished Professors (Emeritus): Fanslow, Moyer
Professors (Emeritus): Anderson, Beavers, Crabtree, Elliott, Smith
Associate Professors: Gentzler, Hausafus
Associate Professors (Emeritus): Amos, Ebert
Assistant Professors: Murphy
Assistant Professors (Adjunct): Knuepme11l
Instructors (Adjunct): Butterbaugh, Davis

Undergraduate Study

For undergraduate curricula in family and consumer sciences education and studies leading to the degree bachelor of science, see Family and Consumer Sciences Education and Studies.

The department offers one curriculum for the bachelor of science degree in Family and Consumer Sciences Education and Studies. Students in the curriculum choose one of three options, Teacher Licensure, Educational Services, or General Studies. Graduates of the teacher licensure option teach in general, vocational, and occupational programs of family and consumer sciences in middle, junior, and senior high schools. Graduates of the Educational Services option develop, implement, and evaluate family and consumer sciences programs for intended audiences in a variety of educational settings such as Cooperative Extension, business, community agencies, community colleges, and public school adult education. Graduates of the General Studies option may pursue individualized career goals in family and consumer sciences that apply integrative knowledge of family and consumer sciences in diverse careers for domestic and international settings.

Admission to all three options is initiated in the course FCEUS 206. In addition, students in Teacher Licensure follow department and university procedures for admission to the university teacher education program. This program option is approved by the Iowa Department of Education for the preparation of vocational family and consumer sciences teachers. For additional teacher education requirements, see College of Education.

Graduates in Family and Consumer Sciences Education and Studies have a broad understanding of individual and family well-being. Graduates apply knowledge of family and consumer sciences content in domestic and/or international professional settings. They use research findings to improve the well-being of individuals, families, and communities. Due to the integrative and synergistic nature of family and consumer sciences, graduates address and act on complex problems confronting individuals, families, and communities.

Opportunities are available for obtaining a minor from other departments through careful selection of elective credits and consultation with an adviser. For example, students pursuing the Educational Services and General options are encouraged to consider obtaining a minor in journalism and mass communications or in one of the subject matter areas of family and consumer sciences such as resource management and consumer sciences or housing and the near environment. They also are encouraged to enhance their program by electing additional courses in an area of business. Students in the Teacher Licensure option may choose to add a second teaching area specialization such as middle school, health education, or coaching.

The department offers a minor in educational services in family and consumer sciences. The minor is earned by successfully completing 15 credits in FCEUS 206, 206L, 306, 415, and 418. The department cooperates in the journalism and mass communications concentration in family and consumer studies. See department for details.

English Proficiency Requirement: C or better in Engl 104 and 105.

Graduate Study

The department offers work for the degrees master of science, master of education, and doctor of philosophy, each with the major, family and consumer sciences education. The M.S. degree requires a thesis; the M.Ed. degree requires a creative component; the Ph.D. requires a dissertation. Minors are available.

Programs for advanced degrees with a major in family and consumer sciences education are tailored to fit the educational background, experience, and professional goals of the student. Areas of study provided by the department include program planning, curriculum, evaluation, research methods, supervision and administration, international education and development, and teacher education.
Opportunities are available for strengthening one's background in subject matter in other departments in the College of Family and Consumer Sciences.

Students who complete a graduate program are professional family and consumer sciences educators and teacher educators who foster program planning, implementation, and evaluation at state, national, and international levels. They are producers and disseminators of research and scholarship in family and consumer sciences education and are leaders in programs and services for clientele in diverse settings.

The department cooperates in the gerontology interdepartmental minor.

Courses open for nonmajor graduate credit: 413, 415.

**Courses Primarily for Undergraduate Students**

FCEdS 110. College of Family and Consumer Sciences Orientation. (1-0) Cr. R. F. S. Half-term. Orientation to the university, the college, and the college curriculum; adjustment to the university; discussion of student responsibilities, study skills, and management of time and energy. Development of a long-term curriculum plan. Offered on a satisfactory-fail grading basis only.

FCEdS 160. Foundations of Family and Consumer Sciences. (1-0) Cr. 1. F. S. Historical development and philosophical base of family and consumer sciences. Integrative focus for disciplines and areas of specializations.

FCEdS 206. Professional Roles in Family and Consumer Sciences. (2-0) Cr. 2. F. Prereq: 160. enrollment in 206L. Introduction to various roles in professional settings, e.g., community agencies, secondary schools, business and industry, Cooperative Extension.

FCEdS 206L. Laboratory for Educational Roles in Family and Consumer Sciences. (0-0) Cr. 1. F. Prereq: Enrollment in 206. Observation, participation, and teaching experiences in educational settings.

FCEdS 310. Career Opportunities. (1-0) Cr. R. F. S. Half-term. Prereq: Credit or enrollment in 160 or FS HN 203. Survey of current professional opportunities and preparation for the job search process. Transition from student to professional role. Offered on a satisfactory-fail grading basis only.

FCEdS 314. Computer Applications for Training and Development. (Dual-listed with S14.) (2-0) Cr. 2. S. Application of computer resources for development and presentation of instructional sequences in family and consumer sciences.

FCEdS 318. Occupational Programs. (Dual-listed with S18.) (2-0) Cr. 2. S. Prereq: 206 and 400 hours work experience in a family and consumer sciences related job. Planning and implementing programs in occupational family and consumer sciences including FCCLA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. May be used toward Multi-Occupation Cooperative endorsement.

FCEdS 379. Educational Aspects of Family Social Issues. (3-0) Cr. 3. S. Examination of family and social issues from diverse perspectives. Application of critical thinking and reflection to family and social issues within formal and nonformal educational settings.

FCEdS 403. Student Assessment for Vocational Family and Consumer Sciences. (2-0) Cr. 2. S. Prereq: Enrollment in 413 and 50 hours of early experience in public schools of student assessment. Development and critique of tests and authentic assessment tools to measure cognitive, affective, psychomotor, and perceptual learning. Procedures for grading, interpreting, and reporting assessment data.

FCEdS 415. Program Planning and Evaluation in Family and Consumer Sciences. (6-0) Cr. 3. S. First half-term. Prereq: 15 hours in Family and Consumer Sciences subject matter. Program development principles including needs analysis, planning, instruction, promotion, evaluation, grant writing and reporting. Approaches appropriate for diverse groups.

FCEdS 417. Supervised Teaching in Family and Consumer Sciences. F. Prereq: 413, 24 credits in family and consumer sciences subject matter, cumulative grade point average of 2.0 in preceding two years. Supervised teaching experience in secondary schools. Examination of ways to implement actions that reflect a professional philosophy of family and consumer sciences for teaching middle and high school level students. May be taken more than once for credit. Reservation required.

FCEdS 418. Supervised Experiences in a Professional Setting. Cr. 3 to 8. F. S. S. Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human service, or government agency. May be taken more than once for credit. Reservation required.

FCEdS 421. International Perspectives of Family and Consumer Sciences. (Dual-listed with S21.) (3-0) Cr. 3. S. Prereq: 6 credits in family and consumer sciences. Examination of family and consumer sciences from an international perspective; focus on the roles and responsibilities of women in development. Application and adaptation of content to working with families in other countries and cultures. Student participation in cultural activities.

FCEdS 424. International Study Abroad Seminar. (Dual-listed with S24.) Cr. 1 to 3. F. S. S. Orientation to study abroad program concerning topics related to country and location; travel arrangements and preparation for study abroad; on-site fieldwork and academic experiences in an international setting.

FCEdS 490. Independent Study. Cr. 1 to 3. F. S. S. S. Supervised study, designed to meet the particular needs of the student, allowing for in-depth experiences in an area of study.

FCEdS 500. Short Course: Current Family and Consumer Sciences Offerings. Cr. 1 to 3. F. S. S. S. Prereq: 6 credits in family and consumer sciences or education. May be taken more than once for credit.

A. Adult Education
B. Supervision and Administration
C. Curriculum
D. Evaluation
E. Teacher Education
F. Occupational/Vocational Education
G. General
H. Research Methodology
I. International Education
J. Middle Level Education

FCEdS 507. Program Development in Family and Consumer Sciences. (3-0) Cr. 3. F. Prereq: Professional experience in family and consumer sciences or related area. Application of principles of program development to formal and nonformal educational settings, e.g., secondary school family and consumer sciences programs, training positions in business, Cooperative Extension, human services agencies.

FCEdS 511. Research Methods. (3-0) Cr. 3. F. Prereq: Graduate classification. An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. Critique of research reports and development of research proposals.

FCEdS 514. Computer Applications for Training and Development. (Dual-listed with 314.) (2-0) Cr. 2. S. Prereq: Graduate classification. Application of computer resources for development and presentation of instructional sequences in family and consumer sciences. Critique of professional information sources available through network systems.

FCEdS 515. Assessment in Family and Consumer Sciences. (3-0) Cr. 3. S. Prereq: Introductory statistical and program development skills. Role of assessment in family and consumer sciences education programs. Planning and constructing test items and other assessments in the field of family and consumer sciences.

FCEdS 518. Occupational Programs. (Dual-listed with 318.) (2-0) Cr. 2. S. Prereq: 400 hours work experience in a family and consumer sciences related job. Planning and implementing programs in occupational family and consumer sciences including FCCLA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. Critique of national occupational competency standards. May be used toward Multi-Occupation Cooperative endorsement.

FCEdS 520. Supervision in Family and Consumer Sciences Programs. (3-0) Cr. 3. S. Prereq: Introduction to research and scholarship in family and consumer sciences or related area. Application of principles of program development to formal and nonformal educational settings, e.g., secondary school family and consumer sciences programs, training positions in business, Cooperative Extension, human services agencies.

FCEdS 521. International Perspectives of Family and Consumer Sciences. (3-0) Cr. 3. S. Prereq: 6 credits in family and consumer sciences. Examination of ways professionals work across disciplines. Examination of social and personal issues that affect individuals and families. Examination of research and scholarship in family and consumer sciences.

FCEdS 570. Program Development in Family and Consumer Sciences. (3-0) Cr. 3. F. Prereq: Professional experience in family and consumer sciences or related area. Application of principles of program development to formal and nonformal educational settings, e.g., secondary school family and consumer sciences programs, training positions in business, Cooperative Extension, human services agencies.
Courses and Programs  Family and Consumer Sciences Education and Studies  2001-2003

FCEdS 524. International Study Abroad Seminar. (Dual-listed with 424.) Cr. 1 to 3. F.S.SS. Orientation to study abroad program considering topics related to country and location; travel arrangements and preparation for study abroad; on-site fieldwork and academic experiences in an international setting. Individually-developed research project on a topic related to study abroad.

FCEdS 593. Workshop. Cr. 1 to 3. F.S.SS. Prereq: 6 credits in family and consumer sciences or education. Concentrated group study of new developments in family and consumer sciences education. Sections offered will vary from year to year. May be taken more than once for credit.

FCEdS 599. Creative Component.

Courses for Graduate Students

FCEdS 610. Seminar. Cr. 1. F.S. Prereq: Graduate classification. Exploration of trends and issues in the profession. May be taken more than once for credit. Offered on a satisfactory-fail grading basis only.

FCEdS 699. Research.

Finance

David B. Smith, Chair of Department

Professors: Carter, Hayes, Ralston, Stover

Associate Professors: Campbell, Cowan, Dark, Koppenhaver, Power

Assistant Professors: Howell, Piwowar, Wei

Undergraduate Study

For undergraduate curriculum in business, major in finance, see College of Business, Curricula.

In addition to the basic business requirements, finance majors must also complete: (1) Fin 310, 320, 371; (2) select four from Fin 330, 361, 380, 415, 424, 425, 445, 462, 472, 499 of which two must be at the 400 level; and (3) select one from Acct 383, 384, 386, 387, any 400-level accounting course and Finance courses listed in (2) above.

The courses in finance constitute a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate. Areas of study in the field of finance include financial management, investments, insurance, real estate, and financial services. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with: (1) a mastery of basic financial concepts and methods of analysis; (2) an understanding of financial operations in a global setting and of the role of financial institutions in the economics system; (3) an ability to effectively communicate and work with others as the finance member of a team; (4) an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to be stand alone.

Graduate Study

The department participates in two graduate degree programs: the M.S. in business and the M.B.A., full-time and part-time programs. The M.S. degree in business is a 30-credit curriculum culminating in a thesis. The M.B.A. program is a 48-credit, nonthesis, noncreative component curriculum. Twenty-four of the 48 credit hours are core courses and the remaining 24 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in finance. This specialization requires that 12 of the 24 credit hours of the graduate electives be from an approved list of graduate finance courses.

Courses open for nonmajor graduate credit: 415, 424, 445, 462, 472.

Courses Primarily for Undergraduate Students

Fin 301. Principles of Finance. (3-0) Cr. 3. F.S. SS. Prereq: Acct 284; Econ 101, Stat 227. Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets.

Fin 310. Corporate Finance. (3-0) Cr. 3. F.S. SS. Prereq: 301. Theory used in a firm’s investment and financing decisions. Analysis of environment in which financial decisions are made, applications of analytical techniques to financial management problems.

Fin 320. Investments. (3-0) Cr. 3. F.S. SS. Prereq: 301. Introduction to various investment media and markets from the viewpoint of the individual investor. Emphasis on financial planning, behavior of security markets, corporate stocks and bonds, individual asset and portfolio selection techniques.

Fin 330. Financial Markets and Institutions. (3-0) Cr. 3. F.S. Prereq: 301. Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing and integrated understanding of markets and financial service providers including global linkages.

Fin 371. Real Estate Principles. (3-0) Cr. 3. SS. Prereq: Econ 101. Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, broker- age, valuation, risk and return analysis, financing techniques, and investments.

Fin 380. International Finance. (3-0) Cr. 3. F.S. Prereq: 301. Advanced study of contemporary topics and issues in international finance.

Fin 415. Business Financing Decisions. (3-0) Cr. 3. Prereq: 301. In depth study of the firm’s external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project. Nonmajor graduate credit.

Fin 424. Financial Futures and Options. (3-0) Cr. 3. Prereq: 320. Advanced study of the pricing and use of derivative market instruments, current topics and issues. Nonmajor graduate credit.

Fin 425. Security Analysis and Portfolio Management. (3-0) Cr. 3. F.S. Prereq: 320 and permission of instructor. Advanced study of security analysis, security selection techniques and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio’s performance relative to standard benchmarks is also required.

Fin 462. Corporate Risk Management and Insurance. (3-0) Cr. 3. F. Prereq: 381. Analysis of an organization’s approaches to the management of...
price, credit, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework governing the choice of policies. Covers commercial insurance, self-insurance, and alternative financing arrangements. Nonmajor graduate credit.

Fin 472. Real Estate Finance. (3-0) Cr. 3. Prereq: 301. Introduction to the techniques of assessing the value of real estate and real estate financing instruments. Nonmajor graduate credit.

Fin 499. Finance Internship. (3-0) Cr. 1 to 3 each time taken. Prereq: 301, permission of instructor.

Fin 505. Financial Valuation and Corporate Financial Decisions. (2-0) Cr. 2. Prereq: Graduate classification. Shareholder wealth maximization as the goal of the firm, financial math, valuation of securities, the financial market place as the test of value, estimation of cost of capital, capital investment decisions, capital structure policy, working capital management.

Fin 515. Case Studies in Financial Decision Making. (3-0) Cr. 3. Prereq: 505. This course focuses on case studies to develop an integrated set of financial decisions. Topic areas include fixed asset, working capital, capital structure, dividend and merger/acquisition decisions. The objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.

Fin 520. Investments. (3-0) Cr. 3. Prereq: 505. A comprehensive survey of the classical and contemporary theories of optimum portfolio construction; determinants of risk-return trade-off in selection of securities; emphasis on the theory and evidence of efficient capital markets and implications for security selection and portfolio management.

Fin 534. Agricultural Markets. (3-0) Cr. 3. F. Prereq: Graduate classification. A method based course in agricultural markets. Topics covered include: futures and options markets, option pricing, use and rating of insurance products in agriculture, alternative forms of reinsurance, emerging forms of vertical coordination, world grain and livestock markets and the institutions that control these markets. Topical issues such as the impact of new trade arrangements on world agricultural markets will be examined.

Fin 567. Employee Benefits Seminar. (3-0) Cr. 3. Prereq: Graduate classification. Theory of employee benefits including benefit types, purpose, utilization, costs/methods of benefit financing and regulation.

Fin 590. Special Topics. Cr. 1 to 3 each time taken. F.S.S. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of finance.

**Courses and Programs: Food Science and Human Nutrition**

Food Science and Human Nutrition

www.fcs.iastate.edu/fschn

Diane F. Birt, Chair of Department

University Professors: Glatz, Hammond, Parrish, Sebranek.

Professors: Birt, Hendrich, Hurburgh, Jane, Johnson, Kaplan, Murphy, Nikolau, Porney, Prusa, Robson, Schafer, Sharpe, Stormer, Swam, Topel, P. White, Wilson, Wurtele

Professors (Collaborators): Nikolov

Distinguished Professors (Emeritus): Jacobson, Roderuck

Professors (Emeritus): Dupont, Garcia, Kraft, Lagrange, McMillan, Runyan, Rust, Walker

Associate Professors: Ford, Lewis, J. Love, M. Love, Madden, Myers, Oakland, Reitmeier, W. White

Associate Professors (Emeritus): Bohnenkamp, McComber

Assistant Professors: Alekel, Boylist, Briggs, Marquis, Mendoza, Reddy, Schalinske, Wang

Assistant Professors (Collaborators): Robinson

Instructors (Adjunct): Anderson, Bassler, Betterley, Hanson, Litchfield, Strohl, Svendsen

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and the College of Family and Consumer Sciences. All curricula offered by the department are available to students in either college. These curricula include dietetics, food science, and nutritional science. Visit our web site at: www.fcs.iastate.edu/fschn.

---

**Undergraduate Study**

The general dietetics curriculum is approved by the American Dietetic Association (ADA) and meets the academic requirements for admission to accredited dietetics internships. The dietetics major includes study in basic sciences, nutrition, and food science applications to medical dietetics and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in hospitals, clinics, long-term care facilities, food and pharmaceutical industries, and government nutrition programs; some are private and home health care nutrition consultants. There is a $30 fee for a statement of verification of completion of the approved program.

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervisión, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also serve in government regulatory agencies and academic institutions.

Three options are available in food science: food science and technology, food science and industry, and consumer food science. The food science and technology option is approved by the Institute of Food Technologists, the national professional organization of food science. Students interested in quality control/assurance; production supervision/management and sales; or research careers in the food industry, government, or academia should elect either the food science and technology or the food science and industry option. Students who wish to go to graduate or professional school or who are biotechnology scholars in the College of Agriculture should elect food science and technology. Students who wish to emphasize business, journalism, or special aspects of food science should elect food science and industry.

Students interested in test kitchen positions, food product formulation and recipe development, food promotion, and consumer services in government and industry should elect the consumer food science option. Preveterinary and prehealth professional preparation is available through the food science and technology option.

Students who wish to combine education in engineering with food science may select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year.

Nutritional science offers students a strong basic science and general education that enables them to gain the knowledge and skills necessary to work in research laboratories of colleges and universities, government agencies, industries, and foundations. The curriculum can serve as a preprofessional program for medicine, dentistry, veterinary medicine, or for graduate study in nutrition or other biological sciences.

Students graduating with degrees in dietetics, food science, or nutritional science should: 1) be able to prepare and deliver technical information to food science and nutrition professionals as well as to the general public; 2) be able to find, evaluate and interpret research literature in food science and/or nutrition; 3) demonstrate the ability to define a problem, distinguish verifiable facts from value claims, identify assumptions and detect bias, distinguish relevant information, identify sources of conflicts, and prioritize needs; 4) be well prepared to gain entry into graduate or supervised practice programs and/or successfully perform in entry level positions in dietetics, nutrition, or the food industry.

See also the B.S./M.S. program under Graduate Study.

The department offers minors in food science and in nutrition. See department office or web site for requirements.

English proficiency is certified by a grade of C or better in 6 credits of coursework in composition (Engl 104 and 105 or other communica-
tion-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Postbaccalaureate Program
A dietetic internship program has received developmental accreditation from the American Dietetic Association. For more information, refer to the Postbaccalaureate Program section in the College of Family and Consumer Sciences. Students interested in this program should contact the department for details. Application for admission to the Graduate College should be made near the end of the junior year. Students begin research for the M.S. thesis during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in food science and technology or nutrition should: 1) be able to conduct and interpret research in food science and/or nutrition; 2) be able to present clear, organized, informational seminars; 3) be able to communicate effectively with students, the classroom or teaching laboratory, with peers and with the general public; 4) write an abstract or paper to be submitted for publication; 5) perform successfully in professional-level positions in food science or nutrition; 6) have a comprehensive background in food science and/or human nutrition.

CoursesPrimarilyforUndergraduateStudents

FS HN 101. Food and the Consumer. (3-0) Cr. 3. S. F. Prereq: High school biology and chemistry or 3 credits each of biology and chemistry. The food system, nutrition and health; the construction of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Use of food and nutrition information in the marketplace. Processes for making various foods. Food organisms. Use of food additives. Current and controversial topics. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 372. Processing of Fruits and Vegetables. (3-6) Cr. 5. F. Required of all cooperative education students. Nonmajor graduate credit.

Graduate Study
The department offers work for the degrees of master of science and doctor of philosophy with majors in food science and technology and in nutrition, and minors in food science and technology. Graduate work in meat science is offered as a co-major in animal science and food science and technology.

Prerequisite to major work is a baccalaureate degree in food science, nutrition, or other physical or biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree of doctor of philosophy either in food science and technology or in nutrition may choose minors from other fields including anthropology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, sociology, statistics, toxicology, or other related fields.

Faculty in the department participate in the major in microbiology; the interdepartmental majors in genetics, MCDB (molecular, cellular, and developmental biology), toxicology, and water resources; and the interdepartmental minor in gerontology.

The department, in conjunction with the Hotel, Restaurant, and Institution Management department, offers three dietetics certificates of 11 credits each and participates in the Master of Family and Consumer Sciences with a Dietetics specialization. The certificate program meets continuing education requirements of The American Dietetic Association for advanced preparation in nutrition and counseling, dietetics management, and medical nutrition therapy. The graduate certificate courses may be applied to the Master of Family and Consumer Sciences - Dietetics specialization. These programs are open only to registered dietitians. A second Master of Family and Consumer Sciences specialization, offered in the area of Nutrition, does not require certification as a registered dietitian for admittance. Those interested in these programs should contact the department for details.

The department offers a B.S./M.S. program that allows students to obtain both the B.S. and M.S. degrees in 5 years. The program is available to students in the food science and technology option or the nutritional science curriculum. Students interested in this program should contact the department for details. Application for admission to the Graduate College should be made near the end of the junior year. Students begin research for the M.S. thesis during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in food science and technology or nutrition should: 1) be able to conduct and interpret research in food science and/or nutrition; 2) be able to present clear, organized, informational seminars; 3) be able to communicate effectively with students, the classroom or teaching laboratory, with peers and with the general public; 4) write an abstract or paper to be submitted for publication; 5) perform successfully in professional-level positions in food science or nutrition; 6) have a comprehensive background in food science and/or human nutrition.

Courses for Undergraduate Students

**Courses Primarily for Undergraduate Students**

**FS HN 101. Food and the Consumer.** (3-0) Cr. 3. S. F. Prereq: High school biology and chemistry or 3 credits each of biology and chemistry. The food system, nutrition and health; the construction of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Use of food and nutrition information in the marketplace. Processes for making various foods. Food organisms. Use of food additives. Current and controversial topics. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 372. Processing of Fruits and Vegetables. (3-6) Cr. 5. F. Required of all cooperative education students. Nonmajor graduate credit.
FS HN 403. Food Laws, Regulations, and the Regulatory Process. (2-0) Cr. 2. S.SS. Prereq: 3 credits in food science coursework at 200 level or above. History of the development of the current federal and state food regulations. Guidelines that govern the practice of regulating the wholesomeness of red meats, poultry, and eggs. Presentations by state and federal food regulators. Nonmajor graduate credit.

FS HN 405. Food Quality Assurance. (2-2) Cr. 3. S. Prereq: 214 or 272 or 471; Stat 101 or 104. Basis of food quality control/assurance programs and establishment of decision-making processes using official (government) and industry instrumental, chemical, and sensory procedures. Statistical process and quality control procedures and their applications to various food systems. Development of hazard analysis procedures, specifications, grades, and standards. Nonmajor graduate credit.

FS HN 407. Microbial Safety of Food. (Same as Micro 407) See Microbiology.

FS HN 410. Food Analysis. (2-3) Cr. 3. S. Prereq: 214 or 311 or BMBB 311 or Chem 211. An introduction to the theory and application of physical and chemical methods for determining the constituents of food. Modern separation and instrumental analysis. Use of food composition data bases. Nonmajor graduate credit.

FS HN 411. Experimental Study of Food. (2-3) Cr. 3. F. Prereq: 214 or 311; a course in biochemistry. Experimental approach to the study of factors influencing behavior of foods. Nonmajor graduate credit.

FS HN 412. Food Product Development. (Dual-listed with 512) (2-6) Cr. 4. S. Prereq: 311 or 411, 471. Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, microbiology, and processing. Some pilot sample experiments. Electronic communication from web emphasized for class reports, notes and assignments. Nonmajor graduate credit.

FS HN 419. Foodborne Hazards. (Same as Micro 419, Tox 419) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Micro 201 or 302, a course in biochemistry. Pathogenesis of human microbiological foodborne infections in humans and principles of toxigenic major classes of toxins in the food supply, governmental regulation of foodborne hazards. Nonmajor graduate credit.

FS HN 420. Food Microbiology. (Same as Micro 420, Tox 420) (3-0) Cr. 3. F. Prereq: Micro 201 or 302. Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. Nonmajor graduate credit.

FS HN 421. Food Microbiology Laboratory. (Same as Micro 421) (1) Cr. 3. Alt. S. Prereq: Micro 201 or 302; 201L. Credit or enrollment in 420 (Micro 420). Standard microbiological techniques employed in the food industry, including microscopic examination of foods, plate counting, color reactions, and other enumeration methods; indicator organisms of food quality and safety, foodborne pathogens, and molds. Nonmajor graduate credit.

FS HN 425. Food Biotechnology. (Dual-listed with 525; same as Micro 425) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Micro 201 or 302; a course in biochemistry. Introduction to genetic engineering and fermentation technology and their applications in the food industry, protein engineering and DNA detection methods; bioethics. Laboratories include all steps in production of a recombinant food enzyme from genetic engineering through fermentation, recovery and characterization.

FS HN 441. Hospital Food and Nutrition Services. (1-9) Cr. S. S.SS. For students enrolled in the dietetic internship program. Supervised participation in and analysis of food services planning, delivery, and other functions related to hospital food and nutrition services. Offered on a satisfactory-fail grading basis only.

FS HN 442. Medical Dietetics I. (3-15) Cr. 8. F. Prereq: For students enrolled in the dietetic internship program. Biological basis of medical, drug, and diet therapy for selected pathologies. Consideration of factors in planning and conducting nutritional care of patients. Integration of principles with clinical experience. Offered on a satisfactory-fail grading basis only.

FS HN 443. Medical Dietetics II. (Dual-listed with 543.) (1-1) Cr. 3. F. Prereq: Concurrent enrollment in 442. For students enrolled in the dietetic internship program. Supervised clinical experience in assessing implementing and evaluating nutritional care of patients in specialized clinical settings. Offered on a satisfactory-fail grading basis only.

FS HN 445. Experience in Community Dietsetics. (1-12) Cr. 5. S.SS. For students enrolled in the dietetic internship program. Supervised experience in planning and delivering diet service. Assure for individuals and groups in a variety of community settings. Offered on a satisfactory-fail grading basis only.

FS HN 446. Experience in Dietetic. (2-9) Cr. 2. F.S. Prereq: For students enrolled in dietetics internship. Supervised experience in providing nutrition education for individuals and groups in a variety of dietetic settings. Offered on a satisfactory-fail grading basis only.

FS HN 448. Professional Development Assessment. (Dual-listed with 548.) (0-3) Cr. 1. F.S. Prereq: Concurrent enrollment dietetic internship. For students enrolled in the dietetic internship program. Web-based course providing information and practice for students to assess and evaluate their own professional development and continuing professional education needs. Offered on a satisfactory-fail grading basis only.

FS HN 461. Disease and Medical Nutrition Therapy I. (Dual-listed with 561.) (2-3) Cr. 4. F. Prereq: 360, 3 credits in physiology. Pathophysiology of selected medical problems with specific attention to nutritional needs and treatment as part of medical nutrition therapy. Clinical nutrition applications in acute and chronic disease conditions. Consideration of nutritional problems, nutrition care, planning and documentation.

FS HN 463. Community Nutrition. (3-0) Cr. 3. S. Prereq: 362. Survey of current public health nutrition problems and issues. Analysis of nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs designed to help solve them. The role of community nutritionists. Nonmajor graduate credit.

FS HN 464. Disease and Medical Nutrition Therapy II. (Dual-listed with 564.) (2-3) Cr. 3. S. Prereq: 461. Pathophysiology of selected disease states and medical problems. Specific attention will be directed to nutrition needs and treatment of each disease state. Clinical nutrition applications in acute and chronic disease. Assessment of nutritional problems, nutrition care, planning and documentation.

FS HN 466. Nutrition Counseling and Education Methods. (Dual-listed with 566.) (2-3) Cr. 3. F. Prereq: 360, 3 credits in nutrition. Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, data assessment and interpretation, developing goals/outcomes, selecting learning activities, evaluation, and documentation.

FS HN 471. Food Processing. (3-0) Cr. 3. F. Prereq: Micro 201 or 302; Chem 163; Phys 106. Food preservation including packaging, fermentation, irradiation, canning, freezing, dehydration, additives. Sanitation and plant design. Applications to food products. Nonmajor graduate credit.

FS HN 472. Food Processing Laboratory. (Dual-listed with 572) (1-3) Cr. F. Prereq: 351; credit or enrollment in 471. Pilot plant experiences in thermal processing, food fermentations, oil seed processing, food extraction.

FS HN 480. Professional Seminar in Food Science and Human Nutrition. (1-0) Cr. 1. F. Prereq: Senior classification in the department. Exploration of current research and issues related to professionals in food science and human nutrition.

FS HN 490. Independent Study. Cr. arr. F.S.S.S. Prereq: Permission of instructor. A maximum of 6 credits of 490 may be used toward graduation. Independent work in food science, nutrition, or dietetics.

A. Dietetics
B. Food Science
C. Nutrition
D. International Experience
H. Honors

FS HN 491. Supervised Work Experience. Cr. arr. F.S.S.S. Prereq: Advance approval of instructor, advisor, and department chair. A maximum of 3 credits of 491 may be used toward graduation. Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail grading basis only.

A. Dietetics
B. Food Science
C. Nutrition

FS HN 496. Food Science and Human Nutrition Travel Course. (Dual-listed with 596) Cr. 2 to 3. May be repeated. (One credit per week traveled.) F.S.S.S. Prereq: Permission of instructor. Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-tour session arranged. Tour expenses paid by students.

A. International tour
B. Domestic tours

FS HN 498. Cooperative Education. Cr. R. F. S.S.S. Prereq: Permission of the department chair; senior classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

FS HN 499. Undergraduate Research. Cr. arr. F.S.S.S. Prereq: Permission of student member with whom student proposes to work. A maximum of 6 credits of 499 may be used toward graduation. Research under student guidance.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

FS HN 500. Short Course. Cr. arr. F.S.S.S. Prereq: Permission of instructor. A. Dietetics
B. Food Science

FS HN 502. Advanced Food Science-Chemistry. (1-0) Cr. 1. S. Prereq: 3 credits in organic chemistry. Key principles and applications in the chemistry of food.

FS HN 503. Advanced Food Science-Processing. (1-0) Cr. 1. S. Prereq: 3 credits each in physics and mathematics. Key principles and applications in the processing of food.

FS HN 504. Advanced Food Science-Microbiology. (1-0) Cr. 1. S. Prereq: 3 credits each in microbiology and organic chemistry. Key principles and applications in the manufacture and spoilage of foods.

FS HN 506. Sensory Evaluation of Food. (Dual-listed with 506) Cr. (2-3) Cr. 3. Alt. F., offered 2001. Prereq: 214 or 311 or An S 380; 3 credits in statistics. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements of color and texture. Acceptance and preference testing.

FS HN 507. Microbial Safety of Food. (Same as Micro 507) See Microbiology.
FS HN 512. Food Product Development. (Dual-listed with 412.) (2-6) Cr. 4. S. Prereq: 311 or 411, 471. Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, microbiology, and processing. Some pilot plant experiences. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 519. Food Toxicology. (Same as Tox 519.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: A course in biochemistry. Basic principles of toxicology. Toxicants in the food supply: modes of action, toxicant defense systems, toxicant/nutrient interactions, risk assessment.

FS HN 525. Food Biotechnology. (Dual-listed with 425; same as Micro 525.) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: Micro 201L, 302; a course in biochemistry. Introduction to genetic engineering and fermentation technology and their applications in the food industry; immunological and DNA detection methods; bioethics. Laboratories include all steps in production of a recombinant food enzyme from genetic engineering through fermentation, recovery and characterization.

FS HN 542. Introduction to Molecular Biology Techniques. (Same as Zool 542.) See Zoology and Genetics.

FS HN 543. Medical Diets Ethics I. (1-6) Cr. 3. F.S.S. For students enrolled in the dietetics internship. Discussion of the assessment, diagnosis, intervention, and outcomes of nutritional problems in complex medical conditions with supervised practice experience.

FS HN 548. Professional Development Assessment. (Dual-listed with 448.) (1-0) Cr. 1. F.S.S.S. Prereq: Concurrent enrollment dietetic internship or MFCS Dietetic Option. For students enrolled in the dietetic internship program or the Master of Family and Consumer Sciences Dietetic Option programs. Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan.

FS HN 561. Disease and Medical Nutritional Therapy I. (Dual-listed with 461.) (3-2) Cr. 4. F. Prereq: 362 or 560, 3 credits in physiology. Pathophysiology and medical problems with specific attention to nutrition needs and treatment as part of medical nutrition therapy. Clinical nutrition applications in acute and chronic disease. Assessment of dietary problems, nutrition care, planning and documentation.

FS HN 564. Disease and Medical Nutrition Therapy II. (Dual-listed with 464.) (2-3) Cr. 3. S. Prereq: 561. Pathophysiology of selected disease states and medical problems. Specific attention will be directed to nutrition needs and treatment of each disease state. Clinical nutrition applications in acute and chronic disease. Assessment of nutritional problems, nutrition care, planning, and documentation.

FS HN 565. Malnutrition in Developing Countries. (2-0) Cr. 2. Alt. S., offered 2002. Prereq: Graduate student status or permission of instructor. Identification and assessment of malnutrition in developing countries. Social, political, economic, and geographic determinants of malnutrition. Protein-energy, vitamin and mineral deficiencies. Intervention organizations, programs, and efforts.

FS HN 566. Nutrition Counseling and Education Methods. (Dual-listed with 466.) (2-2) Cr. 3. F. Prereq: Graduate student status or permission of instructor. Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, data assessment and interpretation, developing outcomes, selecting learning activities, evaluation, and documentation.

FS HN 572. Food Processing Laboratory. (Dual-listed with 472.) (1-3) Cr. 2. F. Prereq: 503 or equivalent. Pilot plant experiences in thermal processing, food fermentation, oil seed processing, food extrusion. Assist with the setup, operation, and data analysis of at least one laboratory exercise.

FS HN 575. Processed Foods. (3-0) Cr. 3. F. Prereq: 214 or 311; a course in nutrition. Survey of the effects of home and commercial food preparation and processing on the nutrients in foods.

FS HN 580. Orientation to Food Science and Nutrition Research. (1-0) Cr. 1. F. Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN and related disciplines. Offered on a satisfactory-fail grading basis.

FS HN 581. Seminar. (1-0) Cr. 1. S. Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Offered on a satisfactory-fail grading basis only.

FS HN 590. Special Topics. Cr. arr. F.S.S.S. Prereq: Permission of instructor.

A. Nutrition
B. Food Science
C. Teaching

593. Workshop. Cr. arr. F.S.S.S. Prereq: Permission of instructor.

FS HN 596. Food Science and Human Nutrition Travel Course. (Dual-listed with 496.) (2) Cr. 2 to 3. May be repeated. (One credit per week traveled.) F.S.S.S. Prereq: Permission of instructor: Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Presentation of selected topics. Pre-tour session arranged. Tour expenses paid by students.

A. International tours
B. Domestic tours

Courses for Graduate Students

FS HN 606. Instrumental Measurement of Food Quality. (2-3) Cr. 3. Alt. F., offered 2002. Prereq: 311 or 411 or 502 or BBMB 404. Principles of instrumental color measurement. Rheological techniques and instrumentation for measuring the mechanical properties of foods; relationship of these properties to food textural qualities. Isolation and identification of food flavors.

FS HN 612. Food Lipids. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 311 or 411 or 502 or BBMB 404. Structure and analysis of food lipids, glyceride structure, crystal form and texture, autoxidation, refining and processing of fats and oils, food applications of fats and oils.

FS HN 614. Carbohydrates in Foods. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 311 or 411 or 502 or BBMB 404. Study of production of carbohydrates used in foods, changes they undergo during processing and storage of food, and relation of their functions to their chemical and physical properties.

FS HN 626. Advanced Food Microbiology. (Same as Micro 626, Tox 626.) (2-2) Cr. 3. Alt. S., offered 2002. Prereq: 420 or 421 or 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

FS HN 660. Regulation of Human Energy Metabolism. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 560; BBMB 404-405 or 420 or equivalent, graduate level course in physiology. Advanced study of the utilization of various carbohydrates, lipids, and proteins of importance in human nutrition that influence energy status and metabolism. Emphasis will be on the regulatory mechanisms impacted by dietary change during different physiological states.

FS HN 665. Selected Topics in Nutrition. (2-0) Cr. 2 each time taken. Alt. F., offered 2001. Prereq: 560; graduate course in physiology. Series of courses on such topics as proteins, vitamins, minerals, lipids, energy metabolism, evaluation of nutritional status. Classical and current research literature in each area.

FS HN 681. Seminar. (1-0) Cr. 1. F.S.S.S. Presentation of thesis or dissertation research. May be taken once for M.S. program and twice for the Ph.D. program.

FS HN 690. Special Problems. Cr. var. F.S.S.S. Prereq: 502 or 503 or 504 or 560.

FS HN 695. Grant Proposal Writing. (1-0) Cr. 1. Alt. F., offered 2002. Prereq: 3 credits of graduate course work in food science and/or nutrition. Grant proposal preparation experiences including writing and critiquing of proposals and budgets planning. Formation of grant writing teams in food science and/or in nutrition area. Offered on a satisfactory-fail grading basis only.

FS HN 699. Research. Cr. var. F.S.S.S. A. Nutrition
B. Food Science

Foreign Languages and Literatures

Madeleine M. Henry, Chair of Department
University Professors: Courteau
Professors: Bernard, Dow, Judith Lacasa
Professors (Emeritus): Fink, Morris
Associate Professors: Bratsch-Prince, Henry, Jaime Lacasa, Lathers, Leonard, Mariner, Matbag, Mook, Nabrotzky, Rectanus, Thogmartin
Associate Professors (Adjunct): Rosenbusch
Associate Professors (Emeritus): Dial
Assistant Professors: Allen, Bowles, Jura, Mattson, McGlew, Spektor, Thomas
Assistant Professors (Adjunct): Aginsky, Bai, Clark, Klinkenborg, Lorenzo-Lorenzo
Assistant Professors (Emeritus): Chatfield, Johnson

Instructors (Adjunct): Hutter-Kottman
Undergraduate Study

Foreign language study should be a part of the program of most students. The theoretical understanding of and practical experience in language underlie many intellectual disciplines that try to meet the complex problems of contemporary society. Courses offered by the Department of Foreign Languages and Literatures are designed to offer students an understanding of a second culture through the language spoken by that culture, as well as a thorough knowledge of the fundamentals of the language itself.

Graduates will achieve both linguistic proficiency and cultural literacy through the study of the language and culture of their program. Linguistic proficiency entails the ability to function effectively in the target language and the ability to communicate competently with native speakers of the target language. This will vary somewhat for students of Latin and Ancient Greek. Cultural literacy includes a general knowledge of the culture's history, familiarity with its literature, and basic knowledge of its social and political institutions.

The department offers both majors and minors in French, German, Russian Studies, and Spanish, leading to the bachelor of arts degree, minors in Latin and Portuguese, and instruction in Chinese, Italian and Classical Greek. A minor in any foreign language requires at least 15 credits, nine of which must be at the 300 level or higher. Of these, 3 credits must be in literature or culture. Courses numbered in the 370s generally may not be used toward the minor or major. Please consult the specific requirements for each language program. A full statement of requirements for the major in each language may be obtained from the department. For a complete statement of all the college degree requirements, see Liberal Arts and Sciences, Curriculum. Current and detailed information about the department, including placement information, is available online at www.public.iastate.edu/~flng_info/hompage.html.

Students who have had formal training in foreign languages offered at Iowa State may obtain credit by passing appropriate examinations. Students with native fluency in languages taught at Iowa State may not enroll in or test out of elementary or intermediate courses (100 and 200 level) in their native language. (Students with questions about this should consult the department.

Students with native fluency may be eligible to enroll in literature and civilization courses in their native language. Students with questions about this issue should consult the department.

Students with native fluency may be required to enroll in literature and civilization courses in their native language, except those in the 370s, which are taught in English. Courses taught in English about Classical Greek or Latin, see Classical Studies. Students may not take intermediate (200 level) courses for credit after successfully completing any advanced (300/400 level) course, except those in the 370 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (200 level) sequence may not take a lower-numbered course in that sequence for a grade.

Courses numbered 110 and 160 are essential-ly equivalent to 101 and 102 combined; credit toward graduation may not be acquired in more than one of these options.

Students at all levels of foreign language study will have access to the Language Learning Resource Center, located in 312 Pearson. The resource center contains an extensive collection of foreign language materials, including films, music, books, computer software and hardware, and course-related materials.

Materials fees: A materials fee is assessed for all courses offered in this department except those with the Flng designation.

English proficiency requirement: The department requires a grade of C- or better in each of Engl 104 and 105 (105H), and a grade of C or better in any course numbered between 370 and 379 taught by the Department of Foreign Languages and Literatures or the interdepartmental program in Classical Studies.

Graduate Study

The Department of Foreign Languages offers a graduate minor in French, German, Latin, Russian and Spanish. The graduate minor in each of these languages is designed to provide an opportunity for graduate students to further their knowledge of that language to complement work in their major disciplines. The graduate minor provides formal recognition of student achievement and expertise in one of the languages above. Graduate minor credits are also offered in Greek and Portuguese.

Graduate Minor

Program Requirements:

a. Prerequisites: Graduate students who wish to minor in one of the languages above must have 400-level proficiency in that language. When this is not the case, the student may be required to take a language course below the 400-level, which would not count towards the graduate minor requirements.

b. Course Requirements: For the M.A. or M.S.: Three courses in the language of the minor. No more than three credits may be in courses numbered 401, 402, and 403. For the Ph.D.: Four courses in the language of the minor which must include at least one three credit course at the 500 level. No more than three credits may be in courses numbered 401, 402, or 403. At least two courses for the M.A. and the Ph.D. minors must be taken in residence at Iowa State University. Papers written for these courses are expected to have a content and depth commensurate with the graduate status of the student.

Courses open for nonmajor graduate credit: Chin 490, F Lng 486, 492, 498, Fnm 401, 440, 441, 442, 480, 491, 493, Ger 440, 471, 472; Greek 490; Ita 490; Latin 441, 442; Port 340, 341, 370, 440, 441; Rus 401, 402, 441, 442, 480, Span 304, 330, 331, 332, 351, 352, 370, 401, 403, 440, 441, 442, 443, 444, 445, 461, 462, 463, 480, 493.

Courses Primarily for Undergraduate Students

Chinese (Chin)

Chin 101. Elementary Mandarin Chinese I. (5-1) Cr. 5. Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. Credit by examination (test out exam) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.
Chin 102. Elementary Mandarin Chinese II. (3-0) Cr. 5. S. Prereq: 101. Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters. Examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Chin 201. Intermediate Mandarin Chinese I. (5-1) Cr. 5. F. Prereq: 102. Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, introduction to traditional characters and dictionaries; intensification of character acquisition. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Chin 202. Intermediate Mandarin Chinese II. (5-1) Cr. 5. S. Prereq: 201. Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, introduction to traditional characters and dictionaries; intensification of character acquisition. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Frnch 102. Elementary French II. (3-0) Cr. 3. S. Prereq: 201; concurrent enrollment in 206 recommended. Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Frnch 202. Intermediate French II. (3-0) Cr. 3. S. Prereq: 201; concurrent enrollment in 206 recommended. Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Frnch 205. Intermediate Conversation. (3-0) Cr. 3. Fr. Prereq: Credit or enrollment in 201 or 202. Practice in basic oral communication skills within the context of French culture. May be taken concurrently with 301.

Frnch 206. Intermediate Conversation and Pronunciation. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 201 or 202. Practice in basic oral communication and pronunciation skills within the context of French culture. May be taken concurrently with 302.

Frnch 302. Reading and Composition. (3-0) Cr. 3. S. Prereq: 301. Critical reading of literary and cultural texts. Analysis of texts in compositions.

Frnch 305. Advanced Conversation. (3-0) Cr. 3. Fr. Prereq: Credit or enrollment in 301 recommended. Intensive conversation and listening practice. Communicative study of French culture.

Frnch 322. French Civilization. (3-0) Cr. 3. S. Prereq: 302. French civilization from the Napoleonic era to the present.

Frnch 331. Survey of French Literature. (3-0) Cr. 3. F. Prereq: 302. French literature from the Middle Ages through the eighteenth century. Introduction to textual analysis.

Frnch 370. French Studies in English. (3-0) Cr. 3. Topics vary according to student and faculty interest. Author, genre or period study such as Francophone literature, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May be repeated up to a maximum of 6 credits.

Frnch 375. Contemporary France. (3-0) Cr. 3. Readings, discussions, and papers in English on contemporary thought, politics, history, anthropology, arts, etc.

Frnch 395. Study Abroad. Cr. 1 to 10. Prereq: 2 years university-level French. Supervised instruction in language and culture of France; formal class instruction at level appropriate to student’s training, augmented by practical living experience.

Frnch 401. Writing French. (3-0) Cr. 3. F. Prereq: 302. Development of advanced writing skills, using a wide range of exercises and writing assignments in a variety of contexts. Review of selected grammar and syntax. Nonmajor graduate credit.

Frnch 440. Topics in French Studies. (3-0) Cr. 3. Prereq: 327 or 332. Study of a selected topic in literature, literary criticism, or civilization. May be repeated. Nonmajor graduate credit.

Ger 101. Elementary German I. (4-1) Cr. 4. F. Introduction to German language within the context of German culture; practice in the basic skills. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Ger 102. Elementary German II. (4-1) Cr. 4. S. Prereq: 101. Continuation of German 101. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Ger 110. Intensive Elementary German. Cr. 8. SS. Equivalent to 101, 102 combined, offered summer only.

Ger 207. Intermediate German. Cr. 5. S. Prereq: 101, 102. Intermediate level development of reading, writing, listening, and speaking in German within the context of German culture. Credit by examination for other courses in the department is normally not available.

Hin 10. Introductory Hindi. Cr. 3. F. Prereq: 201, 110; concurrent enrollment in 205 recom-
Ger 201. Intermediate German I. (4-1) Cr. 4. F.
Prereq: 102 or 110. Review of grammar, selected readings, further practice in oral and written communication. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Ger 202. Intermediate German II. (4-1) Cr. 4. S.
Prereq: 201. Continuation of 201. One section will emphasize the use of German in professional contexts. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Ger 301. Reading. (3-0) Cr. 3. F. Prereq: 202. Emphasis on the development of reading skills through a variety of text types with a focus on German culture from circa 1900 to Post WWII.

Ger 302. Composition. (3-0) Cr. 3. S. Prereq: 301. Emphasis on writing skills, with further development of grammar and reading skills.

Ger 304. German for Business and Professional Purposes. (3-0) Cr. 3. F. Prereq: 202. Communication in business and professional contexts in German-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Preparation for the C1 test and the “Certificate in German for Professionals”.

Ger 305. Advanced Conversation and Listening Comprehension. (3-0) Cr. 3. F. Prereq: 202, concurrent enrollment in 301 recommended. Intensive conversational and listening practice in German with an emphasis on a major German-speaking country.

Ger 320. Germany Today. (3-0) Cr. 3. S. Prereq: 301. Selected topics dealing with contemporary German society and culture. Introduction to materials, resources, and forms of communication available on the Internet, and in other electronic and print media.

Ger 330. Introduction to German Literature. (3-0) Cr. 3. S. Prereq: 301. Selected readings in German literature from Classicism to present. Emphasis on techniques of reading and analysis of literary texts.

Ger 370. German Studies in English. (3-0) Cr. 3. Alt. F. Offered 201, 202, and 301. Credit may vary according to student and faculty interest. Author, genre or period study chosen in light of subject and faculty interest.

Ger 371. The Holocaust in Text, Image, and Memory. (3-0) Cr. 3 or (3-2) Cr. 4. Alt. F., offered 2001. Prereq: 202. For fourth credit, six credits in German at the 300 level. Examination of such topics as the origins and expressions of Anti-Semitism in central Europe, the political events and structures of the Holocaust, the reality of ghettos and concentration camps, the impact of technological modernization on the Final Solution, and resistance to the Nazis. Materials will include non-fictional texts, literature, art, and music. Taught in English. Fourth credit: supplementary readings and compositions in German.

Ger 375. Grimm’s Tales. (3-0) Cr. 3 or (3-2) Cr. 4. Alt. S., offered 2003. Prereq: For fourth credit, six credits in German at the 300 level. Introduction to Germanic antiquities, mythology, and heroic legends; Herder’s concept of Naturpoesie. Emphasis on the Grimm tales: theoretical approaches to the tales from the late 19th and early 20th centuries; perversions of these traditional tales by the National Socialists (Nazis); Reading in contemporary Grimm scholarship. Taught in English. Fourth credit: supplementary readings and compositions in German.

Ger 378. German Film and Media Studies. (3-0) Cr. 3 or (3-2) Cr. 4. F. Prereq: For fourth credit, six credits in German at the 300 level. Analysis and interpretation of film or media in German society. Study of media production and reception within multicultural and global contexts. Thematic emphasis based on faculty and student interest including: 1) film directors, genres, movements (e.g. New German Cinema), aesthetics, and cinematography or 2) media studies (e.g. television, mass press, popular culture). Taught in English or German: supplementary readings and compositions in German.

Ger 395. Study Abroad. Cr. 1 to 10. Prereq: 2 years university-level German. Supervised instruction in language and culture of Germany; formal class instruction at level appropriate to student’s training, augmented by practical living experience.

Ger 440. Topics in German Literature. (3-0) Cr. 3 or (4-0) Cr. 4. May be repeated up to a maximum of nine credits. F.S. Prereq: 302, and either 320 or 330. Fourth credit required for the major. Nonmajor graduate credit.

Ger 471. Foundations of German Civilization. (3-0) Cr. 3 or (3-2) Cr. 4. F. Prereq: For fourth credit, six credits in German at the 300 level. Study of various aspects of German history and culture from the Germanic tribes and Christianization to the Middle Ages. Taught in English. Fourth credit: supplementary readings and compositions in German. Nonmajor graduate credit.

Ger 472. Topics in German Cultural Studies. (3-0) Cr. 3 or (3-2) Cr. 4. S. Prereq: For fourth credit, six credits in German at the 300 level. Course is a continuation of 471 and will cover German history and culture up to the modern era. Taught in English. Fourth credit: supplementary readings and compositions in German. Nonmajor graduate credit.

Ger 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: 6 credits in German and permission of department chair. No more than 9 credits of Ger 490 may be counted toward graduation. Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Ger 590. Special Topics in German. Cr. 2 to 4 each time taken. Prereq: Permission of instructor; 6 credits of 400 level German.
A. Literature or Literary Criticism
B. Linguistics
C. Language Pedagogy
D. Civilization

Greek (Greek)

For courses in Greek literature taught in English, see Classical Studies.

Greek 101. Elementary Classical Greek I. (4-1) Cr. 4. F. Grammar and vocabulary of ancient Attic Greek, within the context of Greek culture; reading knowledge through texts adapted from classical authors. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Greek 102. Elementary Classical Greek II. (4-1) Cr. 4. S. Prereq: 101. Grammar and vocabulary of ancient Attic Greek, within the context of Greek culture; reading knowledge through texts adapted from classical authors. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Greek 201. Intermediate Classical Greek. (4-1) Cr. 4. F. Prereq: 102. Comprehensive review of grammatical principles; emphasis on reading unadapted classical or Hellenistic texts. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to stu-
Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Latin 590. Special Topics in Latin, Cr. 2 to 4 each time taken. Prereq: Permission of instructor; 6 credits of 400 level Latin
A. Literature or Literary Criticism
B. Linguistics
C. Language Pedagogy
D. Civilization

Portuguese (Port)

Port 101. Elementary Brazilian Portuguese I. (4-1) Cr. 4. Alt. F., offered 2002. Introduction through the conversational approach within the context of Luso-Brazilian culture. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Port 102. Elementary Brazilian Portuguese II. (4-1) Cr. 4. Alt. S., offered 2003. Prereq: Port 101. Introduction through the communicative approach within the context of Luso-Brazilian culture. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 211 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Port 340. Brazilian Civilization and Culture. (3-0) Cr. 3 each time taken. Alt. S., offered 2002. Prereq: Port 211 or equivalent. Introduction to Brazilian civilization and culture through the study of historical and literary texts. Readings, discussion, and papers in Portuguese. Nonmajor graduate credit.

Port 370. Portuguese Language Literature in English Translation. (3-0) Cr. 3. Study of a particular period, theme, genre, or author. Topics chosen according to student and faculty interests. Readings, discussion, and written work in English. May be repeated for a maximum of 6 credits. Nonmajor graduate credit.

Port 440. Advanced Readings in Brazilian Literature. (3-0) Cr. 3 each time taken. Alt. S., offered 2003. Prereq: Port 211 or equivalent. Study of individual authors, genres, and periods. Intensive readings of original Brazilian texts supplemented by theoretical readings in English. Authors, genres, and periods will vary. Readings, discussion, and papers in Portuguese. Nonmajor graduate credit.

Port 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: 6 credits in Latin and permission of department chair. No more than 9 credits in Latin 490 may be counted toward graduation. Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. Nonmajor graduate credit.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Latin 590. Special Topics in Latin, Cr. 2 to 4 each time taken. Prereq: Permission of instructor; 6 credits of 400 level Latin
A. Literature or Literary Criticism
B. Linguistics
C. Language Pedagogy
D. Civilization

Russian (Rus)

Majors in Russian Studies are required to complete 30 credits beyond the intermediate (201, 202) level. Required: Rus 301 and 302 or equivalent, and Rus 480 (9 credits total).

The remaining 21 hours are selected from the following: Hist 421, 422, and 426; Pol S 349, 355; Relig 363; Rus 304, 321, 322, 370, 375, 376, 401, 402, 441, 442, 490, and 590.

Russian 101. Elementary Russian I. (4-1) Cr. 4. F. Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Russian 102. Elementary Russian II. (4-1) Cr. 4. S. Prereq: 101. Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Russian 201. Intermediate Russian I. (4-1) Cr. 4. F. Prereq: 102. Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Russian 202. Intermediate Russian II. (4-1) Cr. 4. S. Prereq: 201. Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Russian 301. Composition and Conversation I. (3-0) Cr. 3. F. Prereq: 202. Thorough study of the Russian language, with emphasis on strengthening proficiency in writing, speaking, reading, and listening. Increased focus on syntax and word formation.

Russian 302. Composition and Conversation II. (3-0) Cr. 3. S. Prereq: 301. Thorough study of the Russian language, with emphasis on strengthening proficiency in writing, speaking, reading, and listening. Increased focus on syntax and word formation.

Russian 304. Russian for Science and Technology. (3-0) Cr. 3. Prereq: 202. Designed to meet the needs of students who desire to integrate a study of Russian language with special problems in science and business. Emphasis on scientific or business language. Increased focus on reading, grammar, and standards for writing scholarly papers or business documents.

Russian 321. Russian Culture. (3-0) Cr. 3. Alt. F., offered 2003. Prereq: 202. Study of a particular period or phenomenon (i.e., cultural pattern, myth, or archetype) in Russian cultural history from 988 to 1855.

Russian 322. Russian Civilization. (3-0) Cr. 3. Prereq: 202. Study of a particular period or phenomenon (i.e., cultural pattern, myth, or archetype) in Russian cultural history from 1855 to the present.
Rus 370. Russian Literature in English Translation. (3-0) Cr. 3. Study of a particular period, theme, genre, or author. Topics chosen in light of student and faculty interest. Readings, discussions, and written work in English. May be repeated for a maximum of 6 credits.

Rus 395. Study Abroad. Cr. ar. 1 to 6. Supervised instruction in language and culture of Russia; formal class instruction is inappropriate to student's training, augmented by practical living experience.

Rus 401. Advanced Composition and Conversation I. (3-0) Cr. 3. F. Prereq: 302. Intensive practice in composition and conversation with emphasis on mastery of speaking and writing skills; development of idiomatic usage and effective expression of ideas. Increased emphasis on vocabulary building, grammatical correctness, and compatibility of style and content. Nonmajor graduate credit.

Rus 402. Advanced Composition and Conversation II. (3-0) Cr. 3. S. Prereq: 401. Intensive practice in composition and conversation with emphasis on mastery of speaking and writing skills; development of idiomatic usage and effective expression of ideas. Increased emphasis on vocabulary building, grammatical correctness, and compatibility of style and content. Nonmajor graduate credit.

Rus 441. Literary Masterpieces of the Nineteenth and Twentieth Century. (3-0) Cr. 3. F. Prereq: 302. Study of representative works by leading authors of the nineteenth and twentieth centuries. Nonmajor graduate credit.

Rus 442. Literary Masterpieces of the Nineteenth and Twentieth Century. (3-0) Cr. 3. S. Prereq: 302. Study of representative works by leading authors of the nineteenth and twentieth centuries. Nonmajor graduate credit.

Rus 490. Independent Study. Cr. 1 to 6 each time taken. Prereq: 6 credits in Russian and permission of department chair. No more than 9 credits of Rus 490 may be counted toward graduation. Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Rus 590. Special Topics in Russian. Cr. 2 to 4 each time taken. Prereq: Permission of instructor; 6 credits of 400 level Russian. A. Literature or Literary Criticism B. Linguistics C. Language Pedagogy D. Civilization

Spanish (Span)

Span 101. Elementary Spanish I. (4-1) Cr. 4. F. S. Essentials of construction and vocabulary with an aural-oral approach within the context of Hispanic culture. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 201, 301, and 202. Intensive practice in composition and conversation with emphasis on mastery of speaking and writing skills; development of idiomatic usage and effective expression of ideas. Increased emphasis on vocabulary building, grammatical correctness, and compatibility of style and content. Nonmajor graduate credit.

Span 102. Elementary Spanish II. (4-1) Cr. 4. F. S. Prereq: 101. Continuation of Spanish 101. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Span 108. Accelerated Beginning Spanish. (3-0) Cr. 3. S. SSS. Prereq: 2 or more years of study in another foreign language. Equivalent to 101, 102 combined.

Span 201. Intermediate Spanish I. (4-1) Cr. 4. F. S. Prereq: 102, 110, or 160. Intensive review of basic grammar. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the department is normally not available.

Span 202. Intermediate Spanish II. (4-1) Cr. 4. F. S. Prereq: 201. Continuation of Spanish 201. Intensive review of basic grammar. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. Credit by examination (test out exams) in the Department of Foreign Languages and Literatures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course.

Span 301. Spanish Grammar and Composition. (3-0) Cr. 3. F. S. Prereq: 202 or 4 years of high school Spanish. Application of grammar concepts in the development of writing and reading skills within the context of Hispanic culture.

Span 302. Spanish Conversation. (3-0) Cr. 3. F. S. Prereq: 202 or 4 years of high school Spanish. Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational skills within the context of Hispanic culture.

Span 304. Spanish for Business and Professions. (3-0) Cr. 3. S. S. Prereq: 202 and permission of instructor. Introduction to basic business terminology within a cultural context, organization of composition and letter writing. Grammar review as needed. Individual projects will focus on special interests. Nonmajor graduate credit.

Span 314. Introduction to Reading Hispanic Texts. (3-0) Cr. 3. S. S. Prereq: 301, 320 or 326 or 4 years of high school Spanish. Critical reading of Hispanic literary and cultural texts. Presentation of techniques and terminology of literary criticism. Study of basic genres: narrative, poetry, drama, essay. Required as prerequisite for 330, 331 and 362.

Span 320. Second Language Readings. (3-0) Cr. 3. S. S. Prereq: 202 or 4 years of high school Spanish. Readings may include philosophical essays, mass media materials, and other texts which illustrate cultural differences. Readings, discussions, and compositions in Spanish.

Span 321. Spanish Civilization. (3-0) Cr. 3. F. S. Prereq: 301, 302, 320 or 326. A survey of the social and religious history, the social and political structure, and the cultural heritage of Spain.

Span 322. Spanish American Civilization. (3-0) Cr. 3. S. S. Prereq: 301, 302, 320 or 326. A survey of the art and architecture, the social and political structure, and the cultural heritage of the Hispanic world.

Span 326. Hispanic Art in a Cultural Context. (Dual-listed with 526) (3-0) Cr. 3. S. S. Prereq: 202 or 4 years high school Spanish. Survey of major currents and figures in Spanish and Spanish American art, alongside selected literary and documentary texts and films.

Span 330. Survey of Spanish Literature to 1700. (3-0) Cr. 3. S. F. Prereq: 314. Highlights of Spanish literature from the earliest times through Golden Age; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Nonmajor graduate credit.

Span 331. Survey of Spanish Literature from 1700 to the Present. (3-0) Cr. 3. S. S. Prereq: 314. Highlights of Spanish literature from the eighteenth century to the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Nonmajor graduate credit.

Span 335. Introduction to Spanish-English Translation. (3-0) Cr. 3. S. F. Prereq: 301, 303 or 304. Introduction to the theory, methods, techniques, and problems of translation. Consideration of material from business, literature, and the social sciences. Nonmajor graduate credit.

Span 370. Spanish Literature in English Translation. (3-0) Cr. 3. Study of a selected period, theme, genre, or author. Readings, discussions, and written work in English. May be repeated for a maximum of 6 credits. Nonmajor graduate credit.

Span 395. Study Abroad. Cr. 1 to 10. Prereq: Equivalent to 2 years university-level Spanish. Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student’s training, augmented by practical living experience.

Span 401. Advanced Composition and Grammar. (3-0) Cr. 3. S. Prereq: 301. Advanced study of Spanish grammar and syntax. Students’ writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Nonmajor graduate credit.

Span 440. Spanish Literature of the Middle Ages (Beginnings to 1500). (3-0) Cr. 3. Alt. S., offered 2002. Prereq: Any one of the following courses: Span 301, 303, 304, 307; recommended: Engl 219 or Span 461. An introductory study of the articulation, classification, distribution, and regional variations of the sounds of the Spanish language. Nonmajor graduate credit.
Courses and Programs

Spanish Literature of the 18th and/or 19th Century. (3-0) Cr. 3. Prereq: 330, 331 or 332. Alt. S., offered 2003. Discussion and analysis of representative works by authors, and literary trends from Romanticism through Generation ’98. May be repeated for a maximum of 6 credits. Nonmajor graduate credit.

Spanish Literature of the 20th Century. (3-0) Cr. Alt. F., offered 2002. Prereq: 330, 331 or 332. Topics may include such themes as social protest in the post-war novel, modernism and surrealism in poetry and drama, etc. May be repeated for a maximum of 6 credits. Nonmajor graduate credit.

Spanish American Literature from Earliest Times to Independence. (3-0) Cr. 3. Prereq: 330, 331 or 332. Alt. S., offered 2002. Study and analysis of representative works, literary schools, and movements of this period. May be repeated for a maximum of 6 credits. Nonmajor graduate credit.

Spanish American Literature from Independence to the Present. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 330, 331 or 332. Critical and analytical study of Spanish American prose, poetry, and drama. May be repeated for a maximum of 6 credits. Nonmajor graduate credit.

Spanish Linguistics. (Same as Ling 461.) (3-0) Cr. 3. F. Prereq: Credit or enrollment in 301; Ling 219 recommended. An introduction to Spanish linguistics and its applications in teaching Spanish. Phonology, morphology, syntax, and lexicon of Spanish. Theories of foreign language teaching and learning. Nonmajor graduate credit.

Contrastive Analysis of Spanish/English Syntax. (Same as Ling 496.) (3-0) Cr. 3. Alt. S.; offered 2003. Prereq: 301 or 304; Eng 219, Span 461 recommended. Linguistic study of the major differences between the Spanish and English grammatical systems, with emphasis on those areas of contrast useful to teachers of Spanish. Nonmajor graduate credit.

Hispanic Dialectology. (Same as Ling 463.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 301, 304 or 352 recommended; Eng 219 or Span 461. Intensive study of the phonology, morphosyntax, and lexicon of the Hispanic dialects and variants of Spain and Latin America in their historical context. Nonmajor graduate credit.

Seminar in Hispanic Literature or Culture. (3-0) Cr. 3 each time taken. Alt. F.S., offered F 2001 & S 2002. Prereq: 330, 331 or 332. Advanced study of a selected topic in Hispanic literature and literary criticism. Nonmajor graduate credit.

Independent Study. Cr. 1 to 6 each time taken. Prereq: 6 credits in Spanish and permission of department chair. No more than 8 credits in Span 490 may be counted toward graduation. Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields.

Workshop for Second-Language Teachers (Spanish). (1-3) Cr. 1 to 3. SS. Prereq: Experience in teaching Spanish. Review of special language problems within the context of Hispanic cultures. May be repeated for a maximum of 9 credits. Nonmajor graduate credit.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Spanish Art in a Cultural Context. (Dual-listed with Span 326.) (3-0) Cr. 3. S. Prereq: 6 credits in Spanish literature or culture at 400 level. Survey of major currents and figures in Spanish and Spanish-American art through selected literary and documentary texts and films.

Graduate Seminar in Hispanic Literature or Culture. Cr. 1 to 3. S.F.S.S. Prereq: 6 credits of 400 level Spanish. Topics may include a particular period, a particular type of literature, a theme, or a particular type of cultural production, according to the interests of students and faculty. May be taken for 1-3 credits each time for up to 9 credits.

Special Courses in Foreign Languages (F Ling)

F Ling 486. Methods in Elementary School Foreign Language Instruction. (Same as C 1486, Ling 486.) (3-0) Cr. 3. S. Prereq: 25 credits in a foreign language. Current educational methods and their application in the elementary school classroom. Special emphasis on planning, evaluation, and teaching strategies. Nonmajor graduate credit.

F Ling 487. Methods in Secondary School Foreign Language Instruction. (Same as Ling 487, C 1487.) (6-0) Cr. 3. S. Prereq: 25 credits in a foreign language. Current educational methods and their application to the classroom. Special emphasis on planning, objectives, and teaching techniques. Actual practice in some of the techniques.

History of the Romance Languages. (Same as Ling 492.) (3-0) Cr. 3. S. Prereq: Reading knowledge of Latin or a modern Romance language. From pre-classical Latin to the end of Romance languages, emphasizing both internal history (changes in sounds and forms) and external history (the social, political, and geographic context in which the language is spoken). Methods of historical linguistics. Readings in earliest texts. Nonmajor graduate credit.

History of the Germanic Language. (Same as Ling 498.) (3-0) Cr. 3 or (3-2) Cr. 4. S. Prereq: Reading knowledge of German. Early philological history of German as it separates from Indo-European, development through the High and Middle High German periods, including the earliest written evidence. Influence of Martin Luther on modern German; theory of the development of Yiddish; modern sociolinguistic treatment of German outside of Germany, particularly in the United States, e.g., in the Amana Colonies as well as among the Old Order Amish. Nonmajor graduate credit. Fourth credit: supplementary readings and compositions in German.

Forestry

www.forestry.iastate.edu

J. Michael Kelly, Chair of Department
Professors: Hall, Harrington, Hart, Jungst, Kelly, Schultz, Way
Professors (Collaborators): Isbrands, Riemenschneider
University Professors (Emeritus): McNabb
Professors (Emeritus): Bensend, Countryman, Manwiller, Prestemon
Associate Professors: Colletti, Kuo, Mize, Rule
Assistant Professors: Asbjornsen, Peszlen, Stokke, Thompson
Assistant Professors (Adjunct): Isenhart, Negros-Castillo

Undergraduate Study

The Department of Forestry offers courses that are concerned with the management of forest ecosystems for multiple benefits including wood and fiber products, biodiversity, recreation, water, wilderness, and wildlife. Conservation and preservation of natural resources are emphasized. The department offers work for the bachelor of science degree with a major in forestry and options in forest ecosystem management, urban and community forestry, natural resource conservation, or wood products. The education options in forest ecosystem management and wood products leading to a professional degree in forestry (Bachelor of Science) have been accredited by the Society of American Foresters (SAF) since 1935. The SAF is a specialized accrediting body recognized by the Council on Post Secondary Accreditation and the U.S. Department of Education as the accrediting body for forestry in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation’s forest lands. The purpose of the undergraduate curriculum in forestry is to prepare students for professional employment in management and utilization of natural resources and to equip them to function effectively in a complex society.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication of scientific and technical decisions to professional and lay audiences. They are proficient in technical skills such as measurements, computers, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of biophysical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

Graduates of the forest wood option understand the anatomical, physical, and chemical properties of wood and wood processing operations involved in drying, machining, guling, and chemical treatment of wood.
are skilled at applying their knowledge in the development of products and processes. They are able to provide scientific and technical problem-solving and marketing decisions for customers of wood products.

Elective courses related to the forest ecosystem management option can be selected to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy, and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Similarly, elective courses in wood products option can be selected to emphasize wood production, wood fiber, business and marketing, and quality assurance.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agro-forestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department’s integrated forestry modules consisting of 201, 202, 203, 204, 205, and 206. That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

The department participates in interdisciplinary programs in environmental studies, pest management, plant health and protection, and international studies (see Index). By proper selection of elective courses, forestry students can obtain a second major in these programs or in other disciplines.

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses: 120, 301, 302, 310, 345, 390, 407, 451. Students wishing to emphasize wood products and wood utilization must complete 280 and an additional 12 credits from the following courses: 481, 483, 485, 486, 487.

Visit our departmental website at www.forestry.iastate.edu.

Contact us at: e-mail; forestry@iastate.edu.

Graduate Study

The department offers programs leading to the degrees of master of science and doctor of philosophy with a major in forestry and minor work to students taking major work in other departments. Areas of specialization for the M.S. degree are forest administration and management, forest biology, forest biometry, forest economics and marketing, and wood science. Areas of specialization for the Ph.D. are forest biology-wood science, forest biometry, and forest economics.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to and suitable for students who have majored in forestry or related natural resource fields. A non-thesis master’s option is available. All students are required to teach and conduct research as part of their training for the Ph.D. degree.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry. The department also participates in interdisciplinary majors in ecology and evolutionary biology, plant physiology, genetics, and water resources (see Index).

Courses for Graduate Students
For 603. Tree Growth and Development. (4-0) Cr. 4. Alt. S., offered 2002. Prereq: 301 or a course in plant physiology. Structure and function of individual trees and shrubs. Emphasis on factors that make woody plants different from herbaceous plants. Response of individuals to such environmental factors as radiation, temperature, water stress, flooding, and compaction, air pollution, fire, and wind.

For 654. Advanced Topics in Forest Economics. (1-0) Cr. 1. May be taken twice for credit. Alt. S., offered 2003. Prereq: Permission of instructor. Discussion and presentation of advanced forest economic problems with particular attention to recent theories and applications. Emphasis on applications of micro and macroeconomic principles to forest resource allocation and long range planning.

For 696. Seminar in Plant Physiology and Molecular Biology. (Same as Bot 696.) See Botany.

For 699. Research. Cr. 1 to 8.
A. Forest Biology—Wood Science
B. Forest Biometry
C. Forest Economics
D. Forest Management and Administration
E. Wood Science

A bachelor of science degree in Genetics is offered by the Department of Zoology and Genetics.

Graduate Study
Work is offered for the master of science and doctor of philosophy degrees with a major in Genetics in fourteen cooperating departments: Agronomy, Animal Science; Biochemistry, Biophysics and Molecular Biology; Botany; Entomology; Food Science and Human Nutrition; Forestry; Horticulture; Plant Pathology; Statistics; Microbiology; Veterinary Microbiology and Preventive Medicine; Veterinary Pathology; and Zoology and Genetics.

A student majoring in the Interdepartmental Genetics major must meet the following requirements:
- A year of upper level statistics and a year of biology, and at least one thorough course in basic physics, mathematics at least through calculus study in Genetics should elect courses in
- Undergraduates wishing to prepare for graduate study in Genetics should elect courses in basic biology, chemistry at least through organic chemistry, one year of college-level physics, mathematics at least through calculus, and at least one thorough course in basic transmission and molecular genetics. One year of upper level statistics and a year of biochemistry are strongly encouraged.

Students minorin in Genetics at the Ph.D. level must meet the following requirements: Completion of three of the four categories of the common-core required lecture courses listed above. One semester of seminar in Genetics (Gen 690 or 691 or 692) is recommended. One member of the POS committee must be a Genetics faculty member.

Courses for Graduate Students
Genet 590. Special Topics. Cr. arr.
Genet 591. Workshop in Genetics. (1-0) Cr. 1 each time taken. S. Prereq: Permission of instructor. Current topics in genetics research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.
Genet 690. Seminar in Genetics. (1-0) Cr. 1 each time taken. F. Prereq: Permission of instructor. Student research presentations.
Genet 691. Seminar in Genetics. (1-0) Cr. 1 each time taken. F. Prereq: Permission of instructor. Faculty research series.
Genet 692. Seminar in the Conceptual Foundations of Genetics. (1-0) Cr. 1. F. Prereq: Permission of instructor. Student and faculty presentations of landmark papers in genetics. Brief history of ideas of the period included as background material.
Genet 697. Graduate Research Rotation. Cr. var. each time taken. F. S.S.S. Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Genetics major.

Paul G. Spry, Chair of Department

Professors: Chen, Gutowski, Jacobson, Seifert, Spry, Takle, Yarger

Professors (Collaborators): Branstator, Tribbia

Distinguished Professors (Emeritus): Vondra

Professors (Emeritus): Nordlie

Associate Professors: Cody, Kjartanson, Simpkins, Windom

Associate Professors (Collaborators): Burkat, Vallier

Assistant Professors: Beresnev, Gallus, Iverson, Rankey

Assistant Professors (Adjunct): Kracher, Kramer

Assistant Professors (Affiliate): M. Dawson

Undergraduate Study

The department offers courses in Geology and Meteorology. Majors can be earned in earth science (B.A., B.S.), geology (B.S.), and meteorology (B.S.). Candidates for all degrees must satisfy the requirements established by the College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum). In addition, the department has requirements for each major.

The bachelor of science in Geology prepares the student for a professional career and/or graduate study in the geological sciences. Students selecting geology as a major will elect an option in traditional geology or environmental geology/hydrogeology. The traditional option prepares a student for employment in state and U.S. geological surveys, mineral and petroleum exploration, and graduate study in most aspects of geology. Required courses in this option include Geol 100, 100L, 102, 102L, 110, 302, 305, 311 (A), 356, 368, 451 and at least 6 credits of geology electives. The environmental geology/hydrogeology option prepares a student for employment in environmental consulting, state and U.S. geological surveys, regulatory agencies, and graduate study in the environmental aspects of geology. Required courses in this option include Geol 100, 100L, 102, 102L, 110, 302, 305, 311 (B), 356, 368, 411, 422, 475, and at least 6 credits of geology electives. Required supporting courses include Chem 163, 163L, 164, 164L; Phys 111 and 112; Math 165, 166 or Math 181, 182; at least 6 additional credits of mathematics, statistics, agronomy, engineering, or computer science from an approved departmental list. No more than 9 credits in 490 may be counted toward a degree in Geology.

The department offers a minor in Geology which may be earned by credit in Geol 100 and 100L (or 201), 102, 102L, plus 7 credits at the 300 level or above. Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct the past and anticipate the future. Graduates provide essential information for solving problems in resource management, environmental protection, and public health, safety, and welfare. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbons, researchers, teachers, writers, editors, and museum curators. Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

The study of Meteorology involves the description of the earth’s atmosphere and the processes responsible for its behavior. Students majoring in Meteorology earn the bachelor of science. Successful preparation for professional or graduate work in Meteorology requires that the student develop a diverse range of skills and knowledge bases. These include weather observing, the physics and dynamics of the global atmosphere, application of new weather technologies, advanced mathematical tools, computer programming and modeling and effective oral and written communication. The faculty view the senior thesis (Meteorology 499), in particular, as a capstone experience in which students demonstrate they have achieved this integration. Also, contemporary meteorology is an earth-system science with ties to a variety of human experiences. The electives and general education requirements of the college are further experiences that the meteorology student must integrate with their core meteorology knowledge in order to function effectively in a global-oriented profession.

The program requires the following courses: Mteor 101, 111, 206, 301, 311, 341, 342, 411, 417, 432, 443, 454, and 499. An additional 4 credits must be chosen from Mteor 306, 404, 406, 407, 455, 490, and C E 372. Supporting work is required in areas at least equivalent to Chem 163, 163L, 164; Phys 221, 222; Math 165, 166, 265, 266; Com S 207; Stat 105. A grade of C or better (not C-) is required in each of the following courses to meet minimum graduation requirements for a bachelor of science degree in Meteorology: 206, 301, 311, 341, 342, 411, 417, 432, 443, and 454. Several co-op programs are available for upper division undergraduates. Although a range of opportunities exists for men and women who terminate their studies with a bachelor of science, students who meet the necessary academic standards are encouraged to continue their studies in a graduate program. For these students, minor work is recommended in a mathematical or physical science. Other students can choose a wide range of supporting courses that will contribute to their particular area of interest in meteorology.

The department offers a minor in Meteorology which may be earned by completing 15 credits including Mteor 111 (1 cr.), Mteor 206 and Mteor 301. Further information concerning programs of study, including sample degree programs, is available from the department.

The Earth Science major is a broad program that typically emphasizes an interdisciplinary field. Programs leading to the bachelor of science may be individually designed but will include required courses in Geology and Meteorology, and required supporting work in chemistry, physics, and mathematics. Specific programs have been designed for students interested in a geology, meteorology, or environmental earth science emphasis. Programs leading to the bachelor of arts for earth science teaching are available. The latter program must satisfy the requirements of the Teacher Education Program (see Index, Teacher Education).

English proficiency requirement: The department requires a grade of C or better in each of English 104 and 105 (or 105H), and a C or better in English 314 or 302 or Jl MC 347.

Graduate Study

The department offers programs leading to the master of science and doctor of philosophy with majors in Earth Science, Geology, and Meteorology. Program options are available for the M.S. and Ph.D. degrees in earth science leading to careers in teaching. The department also cooperates in the interdepartmental major in Water Resources (see Index). Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate background and performance and their expressed goals.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Minor work is normally taken in aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates. M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology. A nonthesis option is also offered for the M.S. degree in Meteorology.

Graduates in Geology specialize in a subdiscipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work
as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

All candidates for an advanced degree in Meteorology are expected to complete Mteor 542, 543, and 555. In addition, students without prior synoptic course-work must complete Mteor 511; other students must complete Mteor 507 or Agron 507. Students must also complete Mteor 504 (or Agron 504) or Mteor 605 or Agron 505.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.

Geology (Geol) Courses Primarily for Undergraduate Students

Geol 100. The Earth. (3-0) Cr. 3 or (3-1) Cr. 4. F.S.S.S. Iverson, Staff. What is the earth made of, and how does it work? Emphasis on observations and hypotheses used by geologists to determine the earth’s structure and to understand how geologic features change with time. Students who enroll for the 4 credit option must register for a one hour discussion section. Students enrolling for either option may also enroll for Geol 100L.

Geol 100L. The Earth: Laboratory. (2-1) Cr. 1. F.S.S. Prereq: Credit or enrollment in 100. Characterization of rocks and minerals; interpretation of structures and landforms.

Geol 101. Environmental Geology: Earth in Crisis. (Same as Env S 101) (3-0) Cr. 3 or (3-1) Cr. 4. F.S.S. Staff. An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming, ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism. Students who enroll for the 4 credit option must register for a one hour discussion section. Students enrolling for either option may also enroll for Geol 100L.

Geol 102. History of the Earth. (3-0) Cr. 3. S. Prereq: 100 or 201, 100L, 102, 102L, and permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Geol 302. Summer Field Studies. Cr. 6 to 8. S. Prereq: 102, 356, 368. Vondra, Rankey. Aerial mapping, structural, and geochronologic analysis. Written reports with appropriate illustrations required. A 6-week summer field course required of all geology majors. Students who enroll for the 8 credit option must complete a two week excursion to selected regions of the western U.S. Nonmajor graduate credit.

Geol 304. Regional Geology of Northwest Iowa. (Same as La LL 304I.) See Iowa Lakeside Laboratory.

Geol 305. Computer Methods in Geology. (2-4) Cr. 3. F. Prereq: 100 or 201, 100L. Use of the microcomputer to solve graphical and computational problems in geology. Includes AutoCAD, spreadsheet, and graphical applications. Nonmajor graduate credit.

Geol 306. Geology Field Trip. Cr. 2 each time taken. F.S.S.S. May be taken more than once. Prereq: 100 or 201, permission of instructor. Staff. Geology of selected regions studied by correlated readings followed by a field trip to points of geologic interest. Ten-day field trip required.

Geol 311. Mineralogy and Earth Materials. (A: 3-4 or B: 2-6) Cr. 4 or S. Prereq. 100 or 201, 305, Chem 163. Spry, Windom. Introduction to mineral classification, elementary crystal chemistry, crystal morphology, mineral associations. Laboratory problems in mineral identification methods, including hand-specimen identification and x-ray diffraction. 311A includes more in-depth treatment of crystallography and mineral properties of minerals. 311B emphasizes mineral associations, stability of minerals in the weathering environment, and environmental mineralogy. Students in the traditional geology option are also encouraged to enroll in 311A. Students in the environmental geology/hydrogeology option should enroll in 311B. Nonmajor graduate credit.

Geol 356. Structural Geology. (2-4) Cr. 4. S. Prereq: 100 or 201, 305, Phys 111 or 221 (preferred), Math 165 or 181. Jacobson. Principles of stress and strain. Brittle and ductile behavior of rocks. Description and classification of joints, faults, folds, fractures, foliation, and lineation. Plate tectonics and regional geology. Laboratory and computer techniques to solve structural problems; emphasizes map interpretation and use of stereonet and computer methods. Nonmajor graduate credit.

Geol 365. Petrology. (3-4) Cr. 5. F. Prereq: 311. Staff. Nature and metamorphism of sedimentary and igneous rocks. Emphasis on important rock-forming environments and processes and their influence on rock characteristics. Laboratory includes thin section study of rock textures and mineralogy and the interpretation of these features. Field trips. Nonmajor graduate credit.

Geol 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: Geol 100 or 201, 100L, 102, 102L, and permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Geol 402. Watershed Hydrology and Surficial Processes. (Same as Agro 402, EnSci 402, For 402) (3-3) Cr. 4. F. Prereq: Credit or enrollment in EnSci 330 or Geol 100 or 201, Phys 111, 3 credits in biology and 6 credits in chemistry. Buras, Simpkins.

Examination of watersheds as systems wherein biologic and physical factors control hydrology, soil formation, and nutrient transport. Laboratory emphasis on field investigation of watershed-scale processes. Nonmajor graduate credit.

Geol 403. Environmental Biogeochemistry. (Same as Bot 403, EnSci 403) (3-2) Cr. 4. S. Prereq: EnSci 330 or permission of instructor. Raich. Biological, chemical, and physical phenomena controlling material, energy, and elemental fluxes in the environment. Nonmajor graduate credit.

Geol 411. Hydrogeology. (Dual-listed with 511; same as EnSci 411.) (3-2) Cr. 4. F. Prereq: 100 or 201, Math 165 or 181, Phys 111 or 221, Simpkins. Physical properties of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, and groundwater geochemistry. Introduction to groundwater flow modeling. Lab emphasizes applied field and laboratory techniques for analysis of biogeochemical investigations. Nonmajor graduate credit.

Geol 422. Environmental Geochimistry. (Dual-listed with 522; same as EnSci 422.) (3-2) Cr. 3. F. Prereq: 402 or 411 or equivalent. Simpkins. An introduction to the chemical characteristics of natural waters, including inorganic and organic constituents and water-rock interactions.

Interpretation of water chemistry and radionuclide data. Geochemical equilibrium modeling and introduction to kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Nonmajor graduate credit.

Geol 451. Applied and Environmental Geophysics. (Dual-listed with 551.) (2-2) Cr. 3. S. Prereq. 100 or 201, Math 165 or equivalent experience. Beresnev. Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow to intermediate imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems.

Geol 474. Glacial and Quaternary Geology. (Dual-listed with 574.) (2-2) Cr. 3. Alt. S., offered 2003. Prereq: 100 or 201 or equivalent experience. Iverson, Simpkins. The study of the depositional and erosional processes of glaciers using modern glacier analogs and landforms. Discussion of glaciology, glacier hydrology, Quaternary history and stratigraphy, paleoclimatology, and causes of glaciation. Laboratory emphasizes aerial photo and topographic map interpretation and the Quaternary stratigraphy of Iowa. Two required field trips. Nonmajor graduate credit.

Geol 475. Surficial Processes. (Dual-listed with 575, same as EnSci 475.) (2-2) Cr. 3. F. Prereq: 100 or 201 or equivalent experience. Iverson, Simpkins. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslide, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation. Nonmajor graduate credit.
nomically important minerals, and on the earth's nature and origin of metallic and nonmetallic ore deposits, petroleum, and coal. Environmental effects of the production and use of mineral resources, including discussions of air pollution. Laboratory emphasizes the study of economic minerals from metallic deposits. Nonmajor graduate credit.

Geol 490. Independent Study. Cr. 2 to 4 each time taken. Prereq: 6 credits in geology and permission of instructor. No more than 9 credits of Geol 490 may be counted toward graduation.

Geol 498. Cooperative Education. Cr. R. F.S.S. Prereq: Geol 100 or 201, 100L, 102, 102L, and permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must reg-
ister for this course prior to commencing each work period.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Geol 506. Geology Field Trip. Cr. 2 each time taken. May be taken more than once. F.S. Prereq: Graduate classification. Staff. Geology of selected regions studied on field trips, followed by a field trip to points of geologic interest. Ten-day field trip. Required of all students in graduate degree pro-
grams.

Geol 507. Mineral Resources Field Trip. Cr. 1. F. Prereq: Geol 385. On-site inspection of various coal and ore deposits, mining operations, and mineral pro-
cessing plants. Offered on a satisfactory-fail grading basis only.

Geol 510. Field Methods in Hydrogeology. (0-4) Cr. 2. Alt. S., offered 2003. Simpkins. Prereq: 411 or 511 or C E 473 or 573. Introduction to field meth-
ods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitor-
ing well installation and drilling techniques, geo-
chemical and water quality sampling, seepage meters, minipiezometers, stream gaging, electronic instrumentation for data collection, and geophysics. Local field trips to investigate water resource, water quality, and remedial investigations. Kart the geology of the Big Spring Basin in Northeast Iowa.

Geol 511. Hydrogeology. (Dual-listed with 411.) (3-2) Cr. 4. F. Prereq: 100 or 201, Math 165 or 181; Phys 111 or 221. Simpkins. Physical principles of groundwater flow, nature and origin of aquifers and confining units, wells hydraulics, and groundwater geochemistry. Introduction to groundwater flow modeling. Lab emphasizes applied field and laborato-
ry methods for hydrogeological investigations.

Geol 522. Environmental Geochemistry. (Dual-
listed with 422.) (2-3) Cr. 3. F. Prereq: 511 or equiva-
 lent, Chem 163 or equivalent background in chem-
 istry. Staff. Geochemistry of natural waters, including inorganic and organic constituents and water-rock interactions. Interpretation of water quality data. Geochemical equilibrium modeling and introduction to kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

Geol 534. Contaminant Hydrogeology. (Dual-listed with 434.) (3-0) Cr. Alt. Fall, 2001. Simpkins. Staff. Brief review of organic and inor-
ganic contaminants in industrial and agricultural set-
tings. Geochemical interactions with porous media. Process-oriented approach to abiotic and biological fate and transport of contaminants. Investigation of coupled processes (diffusion, advection, dispersion, sorption, and biodegradation) using computer mod-
els. Groundwater fate and transport.

Geol 541. Geochemistry and Mineral Chemistry. (3-0) Cr. Alt. F., offered 2001. Prereq: 311, physical chemistry recommended. Windom. Thermodynam-
ics and kinetic methods for interpreting geochemical processes and environments, particularly those at elevated temperature and pressure. Emphasis on crustal chemistry, chemical bonding, phase relations in binary and ternary systems, and hydrothermal sys-
tems.

Geol 542. Optical Mineralogy. (1-2) Cr. 2. S. Prereq: 371. Spry. Introduction to using the microscope for mineral identification. Optical properties of minerals in immersion oils and in thin section. Research pro-
ject required.

Geol 543. Microanalysis of Geologic Materials. (3-3) Cr. 2. F. Prereq: 541 and permission of instruc-
tor. Staff. Theory and operation of the electron micro-
probe with emphasis on the analysis of geologic materials. Sample preparation, data acquisition and data correction schemes utilizing both energy disper-
vance and wavelength dispersive x-ray detection sys-
tems. Class size strictly limited to 12.

opment of stress and strain; formation and development of mineral deposits. Comprehensive study of geologic interpretation. Includes the techniques for plotting and analyzing spatial data associated with maps.

Geol 555. Soil Clay Mineralogy. (Same as Agron 555.) See Agronomy.

ware. Includes the techniques for plotting and analyz-
ing spatial data associated with maps.

Geol 566. Advanced Igeoune and Metamorphic Petrology. (3-3) Cr. Alt. F., offered 2002. Prereq: 201 or 201, Math 169 or equivalent experience. Beresnev. Seismic, gravity, magnetic, resistiv-
ity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and interpretation of geologic structures. Lab empha-
sizes computer interpretation packages. Field work with seismic and resistivity imaging systems.

ware. Includes the techniques for plotting and analyz-
ing spatial data associated with maps.

Geol 590. Special Topics. Cr. 1 to 3 each time taken. Prereq: Permission of instructor

A. Surficial Processes
B. Stratigraphy
C. Sedimentation
D. Paleontology
E. Hydrogeology
F. Earth Science
G. Geology Field Trip.

Geol 595. Graduate Seminar. Cr. F.S. Prereq: Senior or graduate classification. Weekly seminar on topics of current research interest. All students seek-

Geol 599. Creative Component. Cr. var.

Courses for Graduate Students

Geol 610. Advanced Seminar. Cr. 1 to 3 each time taken. F.S. Prereq: Graduate standing and permission of instructor.

A. Earth Materials
B. Economic Geology
C. Environmental Geochemistry
D. Geophysics
E. Geotectonics
F. Hydrogeology
G. Surficial Processes
H. Sedimentation and Stratigraphy

Geol 699. Research. Cr. var.

A. Surficial Processes
B. Stratigraphy
C. Sedimentation
D. Paleontology
E. Hydrogeology
F. Structural Geology
G. Geochemistry
H. Hydrogeology
I. Earth Science
J. Mineral Resources
K. Geophysics
L. Mineralogy
M. Tectonics

Meteorology (Mteor) Courses Primarily for Undergraduate Students

Mteor 101. Introductory Seminar. (1-0) Cr. R. F. An overview of the atmospheric sciences, the meteorology program, weather forecasting, and general uni-
versity procedures.

Mteor 111. Synoptic Applications. (1-0) Cr. 1 each time taken, maximum of 3. F.S. Current weather dis-
cussions and introduction to synoptic-scale interpre-
tation of meteorology. Graduation extends to majors. Others with permission of instructor.

Mteor 206. Introduction to Meteorology. (Same as Agron 206.) (3-0) Cr. 3. F.S. Basic concepts in mete-
orology, including atmospheric measurements, radia-
tion, stability, precipitation, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates, weath-
er safety, and atmospheric optics.
Mteor 265. Scientific Balloon Engineering and Operations. (Same as Aer E 265.) See Aerospace Operations.

Mteor 298. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Mteor 301. General Meteorology I. (4-0) Cr. 4. S. Prereq: Math 166; credit or enrollment in Phys 222. Global distribution of temperature, wind, and atmospheric constituents; atmospheric thermodynamics, radiative transfer, global energy balance, storms and clouds, introductory dynamics. Nonmajor graduate credit.

Mteor 306. Use of Weather Data in Agriculture. (Same as Agron 306.) See Agronomy. Nonmajor graduate credit.

Mteor 311. Introduction to Synoptic Meteorology. (1-2) Cr. 2. F. Prereq: 301. Concepts of weather map plotting and analysis. Introduction to forecasting and to the use of real-time UNIDATA computer products. Nonmajor graduate credit.

Mteor 321. Meteorology Internship. Cr. 1 or 2 each time taken, maximum of 3 cr. F.S.S.S. Prereq: 311; junior or senior standing; permission of co-op program coordinator; acceptance by sponsoring agency. Supervised practical experience in a professional meteorological agency. Experiences may include providing weather information for radio, television, utilities, government agencies, construction, or agribusiness.

Mteor 342. Atmospheric Physics II. (3-0) Cr. 3. S. Prereq: 341. Precipitation physics, radar, atmospheric radiation, atmospheric optics, atmospheric electricity. Nonmajor graduate credit.

Mteor 388. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Mteor 404. Global Change. (Dual-listed with 404; same as Agron 404, EnSci 404, Env S 404.) (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering. Biogeochemical cycles, ozone chemistry, global energy balance, structure and circulation of the atmosphere and oceans, climate modeling, climate variability; and implications for agriculture, water resources, energy use, sustainable development, and public policy. Human dimensions and ethical issues of global environmental change. Nonmajor graduate credit.

Mteor 406. Climates of the Continents. (Same as Agron 406.) See Agronomy. Nonmajor graduate credit.

Mteor 411. Synoptic Meteorology. (Dual-listed with 511.) (1-4) Cr. 3. F. Prereq: Credit or enrollment in 484. Current weather forecasting and discussion. Applications of atmospheric physics and dynamics in real-time weather situations. Use of UNIDATA computer products. Nonmajor graduate credit.

Mteor 417. Mesoscale Forecasting Laboratory. (Dual-listed with 517.) (0-6) Cr. 2. S. Prereq: Credit or enrollment in 411. Real-time computer analysis of current weather, including emphasis on small-scale features. Studies of severe weather, lake-effect snow, CSI, cold-air damming. Nonmajor graduate credit.

Mteor 423. Instrumentation and Measurements. (Dual-listed with 432.) (3-0) Cr. 3. S. Prereq: Credit or enrollment in Stat 105, Math 266, Phys 222. Measurement of meteorological variables and instruments used, including surface, upper air, and remote sensors; measurement errors, signal processing, recording and archiving; quality assurance. Nonmajor graduate credit.

Mteor 454. Dynamic Meteorology II. (3-0) Cr. 3. F. Prereq: 443. Planetary boundary layer, linear perturbation theory, atmospheric wave motions, baroclinic and convective instability, mesoscale circulations. Nonmajor graduate credit.

Mteor 455. General Circulation/Advanced Dynamics. (Dual-listed with 555.) (3-0) Cr. 3. S. Prereq: 454. General circulation of the atmosphere, including energy, momentum and hydrological balances. Weather forecast and analysis systems. Nonmajor graduate credit.

Mteor 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 6 credits in meteorology, permission of instructor. No more than 9 credits in Mteor 490 may be counted toward graduation.

Mteor 499. Senior Research. (2-0) Cr. 2. F. Required of all senior meteorology majors. Research projects in collaboration with faculty. Written and oral presentations of results at the end of the semester.

Courses for Graduate Students, Open to Qualified Undergraduate Students

Mteor 504. Global Change. (Dual-listed with 404; same as Agron 504.) (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering. Biogeochemical cycles, ozone chemistry, global energy balance, structure and circulation of the atmosphere and oceans, climate modeling, climate variability; and implications for agriculture, water resources, energy use, sustainable development, and public policy. Human dimensions and ethical issues of global environmental change. Nonmajor graduate credit.

Mteor 505. Biometeorology. (Same as Agron 505.) See Agronomy.

Mteor 517. Mesoscale Forecasting Laboratory. (Dual-listed with 417.) (0-6) Cr. 2. S. Prereq: Credit or enrollment in 411. Real-time computer analysis of current weather, with emphasis on small-scale features. Studies of severe weather, lake-effect snow, CSI, cold-air damming. Nonmajor graduate credit.

Mteor 528. Atmospheric Physics. (Same as Phys 528.) See Physics.

Mteor 532. Instrumentation and Measurements. (Dual-listed with 432.) (3-0) Cr. 3. S. Prereq: Credit or enrollment in Stat 105, Math 266, Phys 222. Measurement of meteorological variables and instruments used, including surface, upper air, and remote sensors; measurement errors, signal processing, recording and archiving; quality assurance.

Mteor 555. General Circulation/Advanced Dynamics. (Dual-listed with 555.) (3-0) Cr. 3. S. Prereq: 454. General circulation of the atmosphere, including energy, momentum and hydrological balances. Weather forecast and analysis systems. Nonmajor graduate credit.

Mteor 561. Geophysical Fluid Dynamics. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 455 or E M 378 or M E 335 or Phys 361. Basic concept of rotating fluid dynamics, governing equations and boundary conditions, dynamics of vorticity, potential vorticity and geostrophic motion, wave motion in a rotating system, dynamics of Ekman and Stewartson layers, ocean circulation.

Courses for Graduate Students

Mteor 699. Research. Cr. var.

Courses Offered at the Gulf Coast Research Laboratory (GCRL), Ocean Springs, Mississippi

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for the following University of Southern Mississippi/GCRL courses and transfer them to their ISU degree programs. Written permission of the ISU coordinator for the GCRL, 201 Bessey, is required for this arrangement. Inquire at 201 Bessey for further information.

MAR 300. Oceanography. (3-4) Cr. 5. S. Prereq: College algebra, Chem 164, Biol 202. An integration of physical, chemical, biological, and general oceanography, to provide a multidisciplinary approach to the discipline.

MAR 300L. Oceanography. (3-4) Cr. 5. S. Prereq: College algebra, Chem 164, Biol 202. An integration of physical, chemical, biological, and general oceanography, to provide a multidisciplinary approach to the discipline.

MAR 482. Coastal Marine Geology. (2-3) Cr. 3. S. Prereq: 8 credits in geology. In-shore and near-shore geological processes, sedimentation patterns, and landfill development.
Gerontology

(Interdepartmental Minor)

Advisory Committee: P. Martin, Coordinator; C. Cook, W. Franke, C. Jolly, M. Kohut, N. Meredith, N. Miller, E Schafer, M. Years

The gerontology program is designed for students desiring careers in aging-related fields and for students interested in improving their understanding of aging persons in American society. Students are expected to take courses to develop the necessary interdisciplinary breadth which, in combination with other disciplinary training, can prepare them to work with the aged.

Graduates understand the ways in which individual and societal aging influence, and are impacted by, developments in their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of human aging.

Gerontology courses are offered in the interdepartmental gerontology program in the following participating departments and programs: Anthropology, Architecture, Biochemistry, Biophysics, and Molecular Biology; Economics; Educational Leadership and Policy Studies; Family and Consumer Sciences; Education and Studies; Food Science and Human Nutrition; Health and Human Performance; Human Development and Family Studies; Political Science; Sociology; and Textiles and Clothing.

Undergraduate Study

Nancy Meredith, Coordinator

Undergraduate study in this program provides the student with an opportunity to develop a minor in gerontology. A balanced grouping of courses assists the student in developing both a sensitivity to the issues and the ability to synthesize ideas from the variety of disciplines important to the study of the aging process.

Undergraduate students may minor in gerontology by taking 16 semester hours of gerontology related courses. Nine of these credits must come from the following courses: Geron 377, 448, 461, 463, 471, 476. Students will participate in a preparacticum seminar, Geron 466, and will complete a supervised field practicum after all gerontology coursework is completed (Geront 467). A minimum of 3 semester credits must be selected from a list of supportive gerontology related courses. Supportive courses include units or topics related to aging and can be used to complement the student’s major interests. The student’s minor program must be approved by the undergraduate gerontology coordinator.

Graduate Study

Christine Cook, Coordinator

A declared graduate minor in gerontology consists of a minimum of 12 credits taken from a list of acceptable courses, and from at least two departments. Nine of the 12 credits must be in courses that are focused specifically on aging. One 590 course (3 credits maximum) can be taken as part of the 12 credits. At least one member of the gerontology faculty will be on a student’s advisory committee; this person must be a member of the Graduate Faculty. Contact the coordinator to determine whether courses other than those listed below are available.

Courses open for nonmajor graduate credit: 448, 471, 476.

Courses Primarily for Undergraduate Students

Geront 448. Economics of Aging. (Same as HD FS 448) See Human Development and Family Studies. Nonmajor graduate credit.

Geront 461. Life Course Sociology. (Same as Soc 461) See Sociology.

Geront 463. Housing for the Aging. (Dual-listed with 563; same as HD FS 463) See Human Development and Family Studies.

Geront 466. Gerontology Prepracticum Seminar. (10 credits. F.S. Prereq: 9 credits in core courses for the gerontology minor and approval of the gerontology undergraduate coordinator.) Prepracticum training for students planning a gerontology practicum. Exploration of possible agencies for the practicum, in-depth study of a selected agency, and development of goals and objectives for the practicum.

Geront 467. Gerontology Practicum. Cr. 3 to 6 each time taken. F.S. Prereq: 466, advance reservation. Supervised field experience related to aging. Offered on a satisfactory-fail grading basis only.

Geront 471. Design for All People. (Same as Arch 471) See Architecture. Nonmajor graduate credit.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Geront 534. Adult Development. (Same as HD FS 534) See Human Development and Family Studies.

Geront 563. Housing for the Aging. (Dual-listed with 563; same as HD FS 563) See Human Development and Family Studies.

Geront 566. Housing for Specific Groups. (Same as Arch 566) See Architecture.

Geront 577. Aging and Intergenerational Relations. (Same as HD FS 577) See Human Development and Family Studies.

Geront 600. Seminar. Cr. arr. F.S.S.S.

Health and Human Performance

Jerry R. Thomas, Chair of Department

Professors: Anderson, Bloedel, Sharp, J. Thomas

Distinguished Professors (Emeritus): Forker, Toman

Professors (Emeritus): Frye, Hutchison, Schneider

Professors (Emeritus Adjunct): Beran

Assistant Professors: Baker, Chang, Derrick, Ekkekakis, Kohut, McLean, Murdoch, Sanka, Schabel, Smiley-Owen, Symons, Trail, Welk

Assistant Professors (Collaborators): Buck

Assistant Professors (Emeritus): McDonald

Instructors (Adjunct): Coberley, Condon, Harklau, Van, Meier, Nespore, Pak, Peel, Power, Shaffer

Instructors (Collaborators): Deeter

Undergraduate Study

Health Studies. For the undergraduate curriculum in community health education leading to the degree of bachelor of science, see College of Education, Curricula. The community health education program is designed to prepare students for professional involvement in programs which incorporate health services and the educational process. Typical employment settings include city, county, regional, and state health departments; hospitals and clinics; voluntary organizations, and private businesses which focus on health promotion or offer health education as a benefit to employees. The following options are available:

Option 1 Community/Public Health

Option 2 Substance Abuse Prevention

Option 3 Wellness/Fitness

Graduate Studies

No major is granted in Graduate Studies. At the recommendation of the major professor and/or the department chair, graduate students may enroll in the following graduate courses to fulfill certain enrollment requirements.

Courses for Graduate Students

Gr St 600. Examination Only. Cr. R. Reserved for graduate students the term they take the final oral examination. Students must have completed all required coursework and not be registered for another course.

Gr St 601. Required Enrollment. Cr. R. Reserved for graduate students who must be registered for a particular term, but are not required to take additional coursework.

Gr St 680. Continuous Registration. Cr. R. Course may be repeated. Reserved for Ph.D. candidates only. See the Graduate College Handbook for specific requirements.
Course work is available which meets the current educational requirements for certification as a Prevention Specialist as established by the Iowa Board of Substance Abuse. See the departmental advising office for details.

Students interested in teaching may select health education as a major endorsement area (teaching licensure). In addition, students may select health education as a second teaching area provided that licensure requirements are met in another subject (see Teacher Education, Requirements for Areas of Specialization).

To be accepted into the teacher education program, students must be approved by the departmental committee and the College of Education Teacher Education Committee. See the University Teacher Education Handbook for GPA, course work, credits, field experience, and ACT or PPST score requirements for admission to the University Teacher Education Program. Further details are available from the department advising office.

Introductory courses in health studies offer opportunities for learning experiences in personal and community health, drug education, and emergency health care.

The department offers a minor in health studies which may be earned by completing the following: H S 105, 110, 215, 310, 350, 430 or 380; and three additional credits selected from: H S 390; HD FS 276, 373, 377; FS HN 167; Psych 360; Zool 258.

Dance. Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and Physical Education in the public schools may major in exercise and sport science (teacher licensure option) and minor in dance.

An interdisciplinary Performing Arts major with a dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index, Theatre and Performing Arts.

The department offers a minor in dance that may be earned by completing the following: Dance 220, 222, 270, 320, 360, 384, 385 or 386; and three additional credits selected from dance courses numbered 200 or above. Participation in Orchesis I or II is recommended.

Exercise and Sport Science. For the undergraduate curriculum in exercise and sport science leading to the degree of bachelor of science, see College of Education, Curriculum. The curriculum in exercise and sport science has three facets: the general education component, the human movement core, and a specialization option (See College of Education, Curriculum in Exercise and Sport Science for information on minimum grade requirements in core courses and minimum requirements for admission to professional options). The following options are available: 1. teacher licensure (K-12), 2. exercise science, 3. athletic training, 4. sport management, and 5. general exercise and sport studies.

Graduates of the teacher licensure programs will demonstrate an understanding of human movement in relation to anatomy, physiology, biomechanical, developmental, sociological, and psychological considerations. A graduate will understand how students learn motor skills and will be able to design, evaluate, and modify tasks and experiences for diverse audiences. Graduates also will be able to determine the appropriateness of various teaching styles, instructional strategies, and learning experiences with respect to curriculum goals and the needs of individual students.

To be accepted into the teacher education program, students must be approved by the departmental committee and the College of Education Teacher Education Committee. See the University Teacher Education Handbook for GPA, course work, credits, field experience, and ACT or PPST score requirements for admission to the departmental program. Details are available from the department advising office.

Several options are offered for students who are interested in the study of human movement as preparation for professional roles other than public school teaching. The exercise science option leads to professional roles as directors and leaders in the fitness field in corporate, recreational, clinical, or institutional settings. Graduates of this option understand the immediate and long-term effects of physical activity, especially as they relate to improving and maintaining human health. Graduates are able to evaluate a person’s physical fitness, prescribe safe and effective exercise programs tailored to an individual’s needs and goals, and to effectively supervise these programs.

The athletic training option prepares students for the NATABOC certification examination or for graduate work in athletic training. Graduates of this option will effectively use their understanding of anatomy, kinesiology, physiology, sport psychology, and nutrition to plan strategies aimed at the prevention of injuries. When injuries do occur, they will be able to provide emergency care and to employ appropriate assessment techniques, treatment modalities, and rehabilitation strategies. To be accepted into the athletic training education program a student must apply, must have completed Ex Sp 222 with at least a B, Ex Sp 221, and 125 clinical observation hours and must be approved by the department Athletic Training Education Program Committee. Admissions are limited to about fifteen new students each year for the program total not to exceed forty-five. Additional details are available from the athletic training program coordinator or the department advising office.

The sport management option serves students seeking entry-level positions in sport or fitness related businesses or organizations. Graduates of the sport management program will understand the structure, function, and impact of the sport industry on the community, as well as the social and ethical issues facing sport management professionals. Based on their understanding of principles of managing sport organizations, graduates will be able to critically analyze sport environments, conduct feasibility studies, develop marketing plans, and communicate effectively with others in sport organizations, health and fitness industries, and other sport and recreation agencies.

The general exercise and sport studies option is designed to allow students to take coursework outside the department to support and enhance an individualized program in such areas as sports information and promotion, pre-physical therapy, pre-medicine, and other allied health and sport-related fields.

The department offers a minor in athletic training and in athletic coaching. The athletic training minor may be earned by completing the following: Ex Sp 221, 222, 224, 225, 226, 227, 323, 326, 327, 355, 358, 425; H S 110, 216; FS HN 167.

The athletic coaching minor may be earned by completing the following: Ex Sp 220, 258, 315, 356, 366; Zool 156; and Psych 230.

Endorsement to Coach Interscholastic Athletics. The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see Teacher Education, Requirements for Areas of Specialization.

Basic Activity Instruction Program. The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, and sports. These courses are designed to serve general education purposes for all students.

Graduate Study

The department offers work for the master of science with a major in exercise and sport science, and work for a doctor of philosophy degree with a major in health and human performance. Specializations are available for both M.S. and Ph.D. candidates in behavioral basis of physical activity and biological basis of physical activity.

The department also participates in the Master of Education degree by offering specializations in behavioral basis of physical activity and biological basis of physical activity.

The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in exercise and sport science at this university. However, it is possible for students to qualify for graduate study even though undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. The M.Ed. degree is a non-thesis degree requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department advising office.
Courses and Programs

Health and Human Performance

_options is available from the department office or from the department web site (www.educ.iastate.edu/hhp/grad/).

The department participates in the inter-departmental minor in gerontology (see Index).

Courses open for nonmajor grade credit: Ex Sp 355, 358, 395, 465, 475.

Courses Primarily for Undergraduate Students

Athletics (Ath)

Ath 101. Intercollegiate Athletics. Cr. 1 in any one semester. Limited to one credit per year to a maximum of 4. F.S. Prereq: Permission of head coach. Offered on a satisfactory-fail grading basis only. Credit for a sport section of Ath 101 may not be applied toward graduation if credit is also received for Ex Sp 166 or any skill technique course in the same sport.

A. Baseball (men)
B. Basketball (men)
C. Basketball (women)
D. Cross Country (men)
E. Cross Country (women)
F. Football (men)
G. Golf (men)
H. Gymnastics (women)
I. Softball (women)
J. Swimming/Diving (men)
K. Swimming/Diving (women)
L. Tennis (women)
P. Track and Field (men)
Q. Track and Field (women)
R. Volleyball (women)
S. Wrestling (men)
T. Golf (men)
U. Soccer (women)

Health Studies (H S)

H S 105. First Aid and Emergency Care. (1-2) Cr. 2. F.S. Discussion and application of the basic techniques of administering first aid and cardiopulmonary resuscitation. ARC certification available.

H S 110. Personal and Consumer Health. (3-0) Cr. 3. F.S. Physical, mental, and social aspects of health as a basis for understanding and preventing health problems. False and misleading advertising and effects of cultists and fanatics on consumer health. Study of legislation and agencies concerned with consumer protection and health insurance.

H S 215. Drug Education. (3-0) Cr. 3. Prereq: Paych 101 or 233. Use and abuse of mood modifying substances in contemporary society. Includes study of tobacco, alcohol, and other drugs.

H S 250. Health and Human Performance Orientation. (Same as Ex Sp 250). See Exercise and Sport Science.

H S 251. Health and Human Performance Learning Community. (Same as Ex Sp 251). (0-1) Cr. 5. Prereq: Membership in the HHP Learning Community, concurrent enrollment in 250. To explore career opportunities in HHP professions through field trips and work with faculty and peer mentors. Offered on a satisfactory-fail grading basis only.

H S 255. Foundations in Health Education. (3-0) Cr. 3. A review of the development of health education as a profession, CHES, foundational theory and skills in health education.

H S 275. Health Education in the Elementary School. (3-0) Cr. 3. Prereq: HD FS 102 or 226. An overview of school health services, healthful school living, and health instruction for teachers at the elementary level. Credit for both 275 and 375 may not be applied toward graduation.

H S 292. Acquired Immune Deficiency Syndrome and Sexually Transmitted Diseases. (3-0) Cr. 3. An introductory, nontechnical examination of the biological, social, psychological, and ethical aspects of AIDS and sexually transmitted diseases.

H S 294. Health Issues for Women. (3-0) Cr. 3. Examines health and health care issues related to women.

H S 305. Instructor’s First Aid and Cardio-pulmonary Resuscitation. (1-2) Cr. 2. Prereq: 105, current Standard First Aid and Community CPR Certification. Discussion and practice of skills needed to teach first aid and cardiopulmonary resuscitation. ARC certification available.

H S 310. Community and Public Health. (3-0) Cr. 3. Prereq: 110. Introduction to community health problems, programs of prevention, environmental health agencies, and health instruction. Study of local, state, and national community health agencies, their purposes and functions.

H S 375. Teaching-Learning Process in Health Education. (3-0) Cr. 3. Prereq: 105, 215, 226. Principles, methods, materials, and resources involved in the teaching of health. Includes organization and development of the health education curriculum (K-12). Credit for both 275 and 375 may not be applied toward graduation.

H S 380. Health Promotion in the Community and Workplace. (3-0) Cr. 3. Prereq: 310. Provides a survey of health promotion programs. In addition, the organization, implementation, and administration of health promotion programs such as physical activity, back care, weight loss, smoking cessation, self-care, nutrition, and stress management will be studied.

H S 385. Search Strategies for Field Experience and Employment. (Same as Ex Sp 385.) (1-0) Cr. R. F.S. Prereq: Junior classification, to be taken a minimum of two semesters prior to H S 485. Search techniques and preparation of materials utilized for acquisition of internships and jobs in HHP fields. Internship procedures and policies will be covered. Offered on a satisfactory-fail grading basis only.

H S 390. Administration of the School Health Program. (3-0) Cr. 3. Prereq: 310. History and legal basis of school health programs. Procedures for developing, organizing, administering, and evaluating a modern program of health services, healthful school living, and health instruction. Includes school-community relationships.

H S 395. Substance Abuse Prevention: Theories and Professional Practice. (3-0) Cr. 3. Prereq: 215. Currev approaches to substance abuse prevention programs; examination of risk and resiliency factors in school, community, and institutional contexts; examination of legal and ethical concerns; and consideration of career and professional opportunities in the substance abuse prevention field.

H S 417. Supervised Teaching in Health Education. (0-3) Cr. 1. F.S. Supervised teaching experience in health education majors, open to others.

H S 430. Community Health Program Development. (3-0) Cr. 3. Prereq: 380. Techniques of needs assessment, program design, administration, and evaluation of community health education programs in various settings.

H S 485. Directed Field Experience in Health Education. Cr. 1-16. Prereq: All required health studies courses and permission of Coordinator. Advance registration required. Supervised experience in health education. Offered on a satisfactory-fail grading basis only.

H S 490. Independent Study. Cr. 1 to 3, maximum of 6 credits. Prereq: 6 credits in health studies and permission of coordinator.

Dance (Dance)

Dance 120. Modern Dance I. (0-3) Cr. 1. F.S. Introduction and practice of basic dance concepts, including preparatory techniques and guided creativities. No previous modern dance experience required. Offered on a satisfactory-fail grading basis only.

Dance 130. Ballet I. (0-3) Cr. 1. F.S. Introduction to the basic skills, vocabulary, and tradition of ballet with concentration on control and proper alignment.

No previous ballet experience required. Offered on a satisfactory-fail grading basis only.

Dance 140. Jazz I. (0-3) Cr. 1. F.S. Introduction to the modern jazz style with concentration on isolation and syncopation. No previous jazz experience required. Offered on a satisfactory-fail grading basis only.

Dance 150. Tap Dance I. (0-3) Cr. 1. F.S. Technique and practice in basic tap technique and terminology. No previous tap experience required. Offered on a satisfactory-fail grading basis only.

Dance 160. Ballroom Dance I. (0-2) Cr. 1. F.S. Instruction and practice in foxtrot, waltz, swing, cha cha, tango, and selected contemporary dances. Offered on a satisfactory-fail grading basis only.

Dance 199. Dance Continuum. Cr. 0.5 to 2 each time taken, maximum of 6 credits. F.S. Prereq: Permission of instructor. Advance registration required. Continued instruction and practice in either modern dance, recreational dance, ballet, jazz and/or compositional skills. Offered on a satisfactory-fail grading basis only.

Dance 211. Fundamentals and Methods of Social and World Dance. (1-3) Cr. 2. Skill enhancement, teaching, progressions with emphasis on world and social dance. Designed for exercise and sport science majors, open to others.

Dance 220. Modern Dance Composition. (1-3) Cr. 2. Prereq: 120 or previous modern dance experience. Theory and practice of the creative skills involved in solo and small group composition.

Dance 222. Modern Dance II. (0-3) Cr. 1. F.S. Prereq: 120 or previous modern dance experience. Dance techniques emphasizing strength, balance, endurance, rhythmic activity and extended combinations.

Dance 223. Modern Dance III. (0-3) Cr. 1. F.S. Prereq: 222. Continued experience in dance techniques and extended combinations. Emphasis on maturation of skill and artistry. Exposure to a variety of modern dance technical styles.

Dance 224. Concert and Theatre Dance. (Same as Theatre 224.) (0-3) Cr. 0.5 to 2, maximum of 6 credits. F.S. Prereq: By audition only. Choreography, rehearsal, and performance in campus dance concerts and/or musical theatre productions. Offered on a satisfactory-fail grading basis only.

Dance 232. Ballet II. (0-3) Cr. 1. Prereq: Previous ballet experience. Technical skills in the classical movement vocabulary. Emphasis on alignment, techniques, sequence development, and performing qualities.

Dance 242. Jazz II. (0-3) Cr. 1. Prereq: Previous jazz dance experience. Dance concepts within the jazz idiom. Instruction in extended movement sequences and artistic interpretation.

Dance 243. Jazz III. (0-3) Cr. 1. Prereq: 242. Integration of the concepts of jazz dynamics, phrasing, and skills into performance situations. Some repertory work of historical and contemporary pieces.

Dance 270. Dance Appreciation. (3-0) Cr. 3. F.S. Introduction to the many forms and functions of dance in world cultures. Develops abilities to distinguish and analyze various dance styles. No dance experience required.

Courses and Programs

Health and Human Performance

2001-2003
Courses and Programs

Health and Human Performance 247

Dance 320. Sound and Movement. (2-2) Cr. 3. S. offered odd numbered years. Prereq: 220. Intermediate composition based on the relationship of movement to improvised sounds, rhythmic scores, and the musical works of composers from various periods.

Dance 360. History and Philosophy of Dance. (3-0) Cr. 3. Alt. S. offered, even numbered years. Prereq: 270. Study of the history of dance from early to modern times with emphasis on the theories and philosophies of contemporary modern dance, dancers, and dance educators.

Dance 370. Advanced Studies in Dance. Cr. 1. to 3 in any one semester to a maximum of 8 credits. F.S. Prereq: 2 credits in dance. Advance registration required. Designed to meet special interests and talents of students to include both group and independent study in various aspects of dance as a performing art including production, choreography, and performance.

Dance 384. Teaching Children’s Dance. (1-3) Cr. 2. S. Content, experiences, and methods of a comprehensive dance program at the elementary school level. Theories and practice in guiding elementary school children in expressive movement experiences.

Dance 385. Methods of Teaching Dance. (1-3) Cr. 2. F. Methods and techniques of teaching social and world dance forms. Introduction to teaching educational modern dance.

Dance 386. Teaching Dance Technique and Composition. (1-3) Cr. 2. Prereq: 320. Teaching of dance as an expressive art form with emphasis on technique, rhythm, and the creative teaching process.

Dance 490. Independent Study. Cr. 1 to 3, maximum of 6. Cr. 6 credits in dance and permission of coordinator. Independent study of problems or areas of interest in dance.

Exercise and Sport Science (Ex Sp)

Ex Sp 101. Swimming I. (0-3) Cr. 1. F.S. Basic course for nonswimmers. Emphasis on two fundamental strokes and personal water safety skills. Offered on a satisfactory-fail grading basis only.

Ex Sp 102. Swimming II. (0-3) Cr. 1. F.S. Prereq: 101 or equivalent skill. Intermediate course. Emphasis on learning and improving five basic strokes and personal water safety skills. Offered on a satisfactory-fail grading basis only.

Ex Sp 108. Aquatic Fitness. (0-3) Cr. 1. Prereq: 102 or equivalent skill. Water related exercises, activities, and swimming workouts to improve physical fitness. Offered on a satisfactory-fail grading basis only.

Ex Sp 109. Basic Skin and Scuba Diving. (1-3) Cr. 2. F.S. Prereq: Swimming competence. Offered on a satisfactory-fail grading basis only.

Ex Sp 113. Scuba Assistant Instructor Practicum. (0-2) Cr. 1. Prereq: 109 and permission of instructor. Supervised experience in conduct of basic scuba diving program. Offered on a satisfactory-fail grading basis only.

Ex Sp 114. Lifeguard Training. (0-3) Cr. 1. F.S. Prereq: Ability to swim continuously of front crawl, sidestroke, and breaststroke, perform a standing and surface dive; swim under water; and tread water for one minute. Minimum age 16. Specific training in Red Cross Lifeguard certification. First aid and CPR included. Offered on a satisfactory-fail grading basis only.

Ex Sp 115. WSI and Lifeguard Training Instructor. (0-5) Cr. 2. F.S. Prereq: Minimum age 17; current life-guard, first aid, and CPR certifications. Stroke analysis and methods of class organization and instruction of swimming, water safety, and rescue skills. Red Cross Water Safety Instructor and Lifeguarding Instructor certifications. Offered on a satisfactory-fail grading basis only.

Ex Sp 116. Water Safety Instructor Practicum. (0-3) Cr. 1. Prereq: 115, H S 105, CPR certification, and permission of instructor. Supervised teaching experi

Ex Sp 238. Fundamentals of Outdoor and Adventure Activities. (0-3) Cr. 1. Prereq: 229. Techniques of individual and group facilitation for initiatives involving outdoor adventure activity. Topics include ropes/challenge course events, activity presentation, and sequencing, safety techniques, preparation principles and new games philosophy. Participation is required in one weekend of fieldwork.

Ex Sp 250. Health and Human Performance Orientation. (Same as H S 250.) (1-0) Cr. R. F. Orientation to various aspects of health and human performance and assistance in learning how to use facilities of the university and department. Offered on a satisfactorily-graded basis only.

Ex Sp 251. Health and Human Performance Learning Community. (Same as H S 251.) (0-1) Cr. F. Prereq: Membership in the HHP Learning Community, concurrent enrollment in 250. To explore career opportunities in HHP professions through field trips and work with faculty and peer mentors. Offered on a satisfactorily-graded basis only.

Ex Sp 258. Physical Fitness and Conditioning. (1-3) Cr. 2. F. S. Prereq: Exercise and sport science or CHE majors only. Development of personal fitness using a variety of conditioning and exercise techniques such as aerobic conditioning and aquatic fitness. Introduction to acute and chronic responses to exercise, and the role of exercise in health promotion and weight management. Credit for only one of the following courses may be applied toward graduation: 163, 258.

Ex Sp 259. Leadership Techniques for Fitness Programs. (1-3) Cr. 2. F. S. Prereq: 258. Development of exercise leadership skills for a variety of activities, leadership, training, and teaching techniques for developing fitness for diversity using a variety of exercise modalities including aerobics, weight training, and aquatic fitness.

Ex Sp 270. Principles of Sport Management. (3-0) Cr. 3. Prereq: Psych 101, Sp Cm 212, Soc 134. An overview of the role of factors relating to organizational principles and management in the sport industry and the development, implementation and evaluation of strategic plans for sport organizations. Topics include fundamentals of leadership theory, human resources, organizational communication, financial planning and law.

Ex Sp 275. Movement Education in Elementary School Physical Education. (2-3) Cr. 3. Prereq: HD FS 226. Ex Sp 280. A program for management and instruction of developmentally appropriate physical education for children pre-school through elementary grade 6. Laboratory experience required. Credit for only one in the following courses can be applied toward graduation: 275, 284.

Ex Sp 280. Directed Field Experience in Elementary Physical Education. (0-3) Cr. 1. S. Prereq: Observation, Ex Sp 275. Observing, planning, and facilitating movement experiences of children in an elementary school setting.

Ex Sp 284. Elementary and Pre-school Movement Education. (2-3) Cr. 3. F. S. Prereq: 3 credits in human development and family studies. Approaches to teaching movement skills in pre-school and elementary school age children. Emphasis on planning appropriate learning environments to help children develop perceptual-motor and fundamental movement skills as well as a positive self concept.

Ex Sp 295. Adapted Physical Education. (Dual-listed with 595.) (2-3) Cr. 3. F. Specific disabling conditions in terms of etiology, characteristics, needs, and potential for movement. Techniques of assessment, prescription, adaptation of activities, methods, and program planning. Laboratory experience required. Nonmajor graduate credit.

Ex Sp 385. Search Strategies for Field Experiences and Employment. (Same as H S 385.) (1-0) F. S. Prereq: 355. An introduction to the methodology, planning and execution of job search and interviewing procedures. Emphasis on the effective use of computer resources and other technology to be used to obtain the position. A project to be taken minimum of two semesters prior to 485. Design and execution of career search strategies. Students must have completed previous prerequisite courses. Involves computer resources and other technology to be used to obtain the position.

Ex Sp 417. Supervised Teaching in Physical Education in the Secondary School. Cr. 8 or 12. F. S. Prereq: 355, 358, 395, 470, 475. Students must be fully admitted to Teacher Education prior to applying for approval to enroll at beginning of the semester prior to registering. Supervised teaching in the secondary schools.

Ex Sp 418. Supervised Teaching in Physical Education in the Elementary School. Cr. 8. F. S. Prereq: 275, 280, 356, 368, 395, 470, 475. Supervised teaching in the elementary schools. Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering.

Ex Sp 440. Physical Activity Promotion in the Community and Workplace. (3-0) Cr. 3. Prereq: 275, 286, FS HN 167. Survey of physical activity and health promotion programs in community and workplace settings. Emphasis is on developing and implementing incentive programs and behavioral interventions. A variety of computerized assessments and web-based materials will be utilized to provide experience as well as material applicable to the health and activity promotion fields.

Ex Sp 445. Legal Aspects of Sport. (3-0) Cr. 3. Prereq: Ex Sp 352, 380, and Mgmt 371. A presentation of the basic legal system, its terminology, and principles as applied to professional and amateur sports. Emphasis is on identifying and analyzing legal issues in sport, the ramifications of those issues in contemporary society with special attention to contracts, tort and constitutional law. Designed for coaches, athletic directors and other sport management professionals.

Ex Sp 458. Principles of Fitness Assessment and Exercise Prescription. (2-2) Cr. 3. Prereq: 358. Physiological principles of physical fitness; design and administration of fitness programs, testing, evaluation, and prescription; cardiac risk factor modification.

Ex Sp 459. Internship in Exercise Leadership. (0-3) Cr. 1. Prereq: C or better in 259, CPR certification, concurrent enrollment in 485. Internship in an exercise leadership position. May be repeated; a maximum of 6 credits apply toward graduation.

Ex Sp 462. Medical Aspects of Exercise. (3-0) Cr. 3. Prereq: 258. The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous and competitive sports. Principles of exercise testing and prescription for individuals with these conditions. Environmental and nutritional aspects of exercise.

Ex Sp 465. Physical Activity and Aging. (2-0) Cr. 2. Prereq: Psych 230, Zool 155. The effect upon movement and physical changes of growing old as well as chronic conditions associated with aging. Methods of assessing fitness and teaching movement activities in relation to gerontological factors. Nonmajor graduate credit.
Ex Sp 470. Evaluation in Physical Education. (2-3) Cr. 3. Prereq: Senior classification. Principles underlying process of evaluation. Selected test and measurement procedures and tools within the field of physical education.

Ex Sp 475. Physical Education Curriculum Design and Program Organization. (3-0) Cr. 3. F. Prereq: 275, admission to College Teacher Education Program. Current theory, practices and principles applied to current development for programs in physical education, K-12. Organizing for teaching in a variety of school settings. Nonmajor graduate credit.

Ex Sp 485. Internship in Sport and Exercise Science. Cr. 1-16. Prereq: Senior classification and advanced registration and practice in selected sport and exercise science agencies. Offered on a satisfactory-fail grading basis only.

A. Exercise Science. Prereq: C- or better in 458 and 459; exercise and sport science majors only. Cumulative GPA 2.0.

B. Sport and Physical Activity. Prereq: Exercise and sport science majors only. Cumulative GPA 2.0.

Ex Sp 486. Supervised Coaching in Interscholastic Athletics. Cr. 1 to 3. Prereq: 220, 319, 355, 358, 365; Psych 230; senior classification; admission to teacher education program; and permission of instructor. Advance registration required. Open only to students in the coaching endorsement program. Offered on a satisfactory-fail grading basis only.

Ex Sp 488. Practicum in Athletic Training. Cr. 1 to 2, maximum of 4. Prereq: Permission of a program director. Experience in application of athletic training techniques under supervision of certified athletic trainers. Offered on a satisfactory-fail grading basis only.

Ex Sp 490. Independent Study. Cr. 1-3, maximum of 6. Prereq: 6 credits in exercise and sport science and permission of coordinator. Independent study of problems of areas of interest in exercise and sport science and related areas.

A. Exercise and Sport Science
B. Coaching
H. Honors

Ex Sp 495. Seminar in Exercise and Sport Science. Cr. 0.5 to 1. Prereq: Senior classification. Offered on a satisfactory-fail grading basis only.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Ex Sp 500. Research Methods in Physical Activity. (3-0) Cr. 3. Prereq: Graduate classification in exercise and sport science and techniques used in the design and interpretation of research involving physical activity. Emphasis on styles of writing, library use, and computer applications.

Ex Sp 505. Research Laboratory Techniques in Exercise Physiology. (3-0) Cr. 2. Prereq: 358 or equivalent course with basic laboratory experience. Application and use of laboratory research equipment in exercise physiology, including operation, calibration, and use in selected situations.

Ex Sp 510. Advanced Medical Aspects of Exercise. (2-2) Cr. 3. Prereq: 358. The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions.

Ex Sp 515. Qualitative Analysis of Human Movement. (2-3) Cr. 3. Prereq: 355. The kinematic analysis of developmental movement tasks and sport skills.

Ex Sp 520. The Social Analysis of Sport. (3-0) Cr. 3. Prereq: 360. Sociological analysis of sport with emphasis on sociological theory, sports structure, and function in modern industrialized society; the systems of sport in regard to their role structure; formal organization, and professionalism and its differentiation along social class, age, and sex.

Ex Sp 521. Sport Psychology. (3-0) Cr. 3. Prereq: 365. 3 courses in psychology. Aspects of psychology which form a basis for understanding and explaining behavior in a sport context. Variables underlying individuals as well as group performance will be analyzed. A critical analysis of current research literature.

Ex Sp 522. Social-Psychological Perspectives of Sport and Motor Performance. (3-0) Cr. 3. Prereq: 360. Analysis of social-psychological dimensions that modify to facilitate motor behavior; focuses on the individual and small group behavior in the sports context.

Ex Sp 523. Gender Roles and Sport. (Same as W S 523) (3-0) Cr. 3. Prereq: 360. 3 courses in sociology and/or psychology. Analysis of the influence of sport on male and female sex role development. Survey of literature related to sport and sex role socialization, stereotyping, and conflict. Discussion of future issues and alternative roles.

Ex Sp 540. Administration of Sport Programs. (3-0) Cr. 3. Prereq: 270. Theory and practice of administration in physical education and sport; development of concepts related to the process of administration, types of administrative behavior, tasks and responsibilities of the administrator; evaluation of effectiveness of administration.

Ex Sp 541. Sport Marketing and Promotion. (3-0) Cr. 3. Prereq: 350 or MKT 340. Marketing of sport as a product and marketing of non-sport-related products through sport. Includes market definition, consumer analysis, market research, market segmentation, product positioning, pricing, promotion, marketing communication, distribution, and sponsorship applied to sport products.

Ex Sp 542. Sport Business. (3-0) Cr. 3. Prereq: 435 and Acct 215 or 284. Analysis of theoretical and applied principles of economics, finance, accounting, and budgeting related to sport.

Ex Sp 558. Physical Fitness—Principles, Programs, and Evaluation. (2-3) Cr. 3. Prereq: 358. Physiological principles of physical fitness, design and administration of fitness programs; testing, evaluation, and prescription; electrocardiogram interpretation.

Ex Sp 470. Evaluation in Physical Education. (2-3) Cr. 3. Prereq: Senior classification. Principles underlying process of evaluation. Selected test and measurement processes and tools within the field of physical education.

Ex Sp 475. Physical Education Curriculum Design and Program Organization. (3-0) Cr. 3. F. Prereq: 275, admission to College Teacher Education Program. Current theory, practices and principles applied to current need for programs in physical education, K-12. Organizing for teaching in a variety of school settings. Nonmajor graduate credit.

Ex Sp 485. Internship in Sport and Exercise Science. Cr. 1-16. Prereq: Senior classification and advanced registration and practice in selected sport and exercise science agencies. Offered on a satisfactory-fail grading basis only. (Same as Ex 485.)

A. Exercise Science. Prereq: C- or better in 458 and 459. Exercise and sport science majors only. Cumulative GPA 2.0.

B. Sport and Physical Activity. Prereq: Exercise and sport science majors only. Cumulative GPA 2.0.

Ex Sp 486. Supervised Coaching in Interscholastic Athletics. Cr. 1 to 3. Prereq: 220, 319, 355, 358, 365; Psych 230; senior classification, admission to teacher education program, and permission of instructor. Advance registration required. Open only to students in the coaching endorsement program. Offered on a satisfactory-fail grading basis only.

Ex Sp 488. Practicum in Athletic Training. Cr. 1 to 2. maximum of 4. Credit. Permission of a professional director. Experience in application of athletic training techniques under supervision of certified athletic trainers. Offered on a satisfactory-fail grading basis only.

Ex Sp 490. Independent Study. Cr. 1-3. maximum of 6. Prereq: 8 credits in exercise and sport science and permission of coordinator. Independent study of problems of areas of interest in exercise and sport science and related areas. A. Exercise and Sport Science B. Coaching C. Honors

Ex Sp 495. Seminar in Exercise and Sport Science. Cr. 0.5 to 1. Prereq: Senior classification. Offered on a satisfactory-fail grading basis only.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Ex Sp 500. Research Methods in Physical Activity. (3-0) Cr. 3. Prereq: Graduate classification in exercise and sport science. Methods and techniques used in the design and interpretation of research involving physical activity. Emphasis on styles of writing, library use, and computer applications.

Ex Sp 505. Research Laboratory Techniques in Exercise Physiology. (4-0) Cr. 2. Prereq: 358 or equivalent course with basic laboratory experience. Application and use of laboratory research equipment in exercise physiology, including operation, calibration, and use in selected situations.

Ex Sp 510. Advanced Medical Aspects of Exercise. (2-0) Cr. 2. Prereq: 358. The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions.

Ex Sp 515. Qualitative Analysis of Human Movement. (2-3) Cr. 3. Prereq: 355. The kinematic analysis of developmental movement tasks and sport skills.

Ex Sp 520. The Social Analysis of Sport. (3-0) Cr. 3. Prereq: 360. Sociological analysis of sport with emphasis on sociological theory, sports structure, and function in modern industrialized society; the systems of sport in regard to their role structure, formal organization, and professionalization and its differentiation among social class, age, and sex.

Ex Sp 521. Sport Psychology. (3-0) Cr. 3. Prereq: 365. 3 courses in psychology. Aspects of psychology which form a basis for understanding and explaining behavior in a sport context. Variables underlying individual as well as group performance will be analyzed. A critical analysis of current research literature.

Ex Sp 522. Social-Psychological Perspectives of Sport and Motor Performance. (3-0) Cr. 3. Prereq: 360. Analysis of social-psychological dimensions that modify to facilitate motor behavior; focuses on the individual and small group behavior in the sports context.

Ex Sp 523. Gender Roles and Sport. (Same as W S 523) (3-0) Cr. 3. Prereq: 360. 3 courses in sociology and/or psychology. Analysis of the influence of sport on male and female sex role development. Survey of literature related to sport and sex role socialization, stereotyping, and conflict. Discussion of future issues and alternative roles.

Ex Sp 540. Administration of Sport Programs. (3-0) Cr. 3. Prereq: 270. Theory and practice of administration in physical education and sport; development of concepts related to the process of administration, types of administrative behavior, tasks and responsibilities of the administrator, evaluation of effectiveness of administration.

Ex Sp 541. Sport Marketing and Promotion. (3-0) Cr. 3. Prereq: 350 or Mkt 340. Marketing of sport as a product and marketing of non sport-related products through sport. Includes market definition, consumer analysis, market research, market segmentation, product positioning, pricing, promotion, marketing communication, distribution, and sponsorship applied to sport products and services.

Ex Sp 542. Sport Business. (3-0) Cr. 3. Prereq: 435 and Acct 215 or 218. Analysis of theoretical and applied principles of economics, finance, accounting, and budgeting related to sport.

Ex Sp 558. Physical Fitness—Principles, Programs, and Evaluation. (2-3) Cr. 3. Prereq: 358. Physiological principles of physical fitness, design and administration of fitness programs; testing, evaluation, and prescription; electrocardiogram interpretation.

Ex Sp 561. Motor Development. (2-0) Cr. 2 to 3. Prereq: 284 or 284A. The physical development and characteristic reactions of children in relation to motor performance. Identification of special psychomotor needs of various age groups of children.
Undergraduate Study

The History major. For a description of the undergraduate curriculum with a major in History see Liberal Arts and Sciences, Curriculum. The History major may earn either a bachelor of arts or bachelor of science degree. Candidates for the B.A. must complete two years of university-level study in one foreign language or the equivalent. The minimum required for a major in history is 30 credits, of which at least 24 must be in courses numbered 300 or above. A minimum of 12 credits numbered 300 or above must be taken in residence at Iowa State. All History majors must complete two enrollments in Hist 495 (for R credit) or, if qualified and willing, one graduate-level writing/research seminar. The history major prepares a student with the ability to write and think clearly and to understand the nature of social organization. It specifically prepares the student to think chronologically, to understand past events in their relation to the present, to carry out research with a variety of sources, and to analyze and interpret past and present events. History majors who choose minors in other departments usually select from such complementary disciplines as Political Science, English, Sociology, Psychology, Economics, Philosophy, or Foreign Languages and Literatures.

English proficiency requirement: History majors must receive a grade of C or better in each of Engli 104 and 105 (or 105H), and Hist 495 or any graduate seminar.

For a description of the major in History as preparation for professional programs, see Teacher Education and Preprofessional Study. Students majoring in History may also earn a second major in International Studies; see International Studies.

Although the department does not require specialization, majors and nonmajors may elect to group their courses in one of several areas of emphasis. The following short list shows the department’s undergraduate courses by such areas of emphasis. Qualified undergraduates may also take some 500-level graduate courses, with permission of the instructor (see listing of graduate courses below). Consult the main listing of courses for full description.

Technology and Science: 280, 281, 284, 285, 323, 380, 387, 388, 482, 483, 484, 489, 489.

Topical Courses: 374, 376, 381, 382, 386, 389, 390, 490, 495.

Courses dealing with the history of technology and science have been structured to offer a sequence leading from basic surveys through courses in the history of particular technologies and sciences. In this area of emphasis, it is recommended that students electing Hist 492 or 493 have taken a basic survey in the history of technology and science (either Hist 280-281 or 284-285) or have taken a college-level course in an appropriate technology or science, or seek permission of the instructor. An undergraduate emphasis in the history of technology and science could include either Hist 281-292 or 284-285 and some combination from Hist 323, 380, 387, 388, 482, 483, 484, 485, 488, and 489.

The department offers a minor in History, which may be earned with 15 credits in History courses, of which at least 9 must be in courses numbered 300 or above. A minimum of 9 credits numbered 300 or above must be taken at Iowa State. The History minor is most frequently chosen by students majoring in Political Science, English, Journalism, Computer Science, and Business.

Graduate Study

Graduate students may take any 400-level history course except 490 and 495 for graduate credit. No more than 12 credits of 400-level courses, however, may be used toward the minimum credits required for a graduate degree in history. Additional work is required for graduate credit in 400-level courses.

Most history graduate courses are either prossemis or seminars. Prosseminars acquaint students with the historical literature of a field and prepare them for careers in teaching and research. Seminars require students to conduct original historical research and to write extensive research papers reporting the results.

The M.A. in History. For the M.A. in history, students may elect a thesis or a nonthesis program. History 583C is required of all M.A. students during their first fall semester. See the departmental brochure on the M.A. in History for a full discussion of the options and requirements. A student shall demonstrate proficiency in the use of a research tool such as a foreign language, statistics, computer programming, or the like, as prescribed by his or her advisory committee. The M.A. in history program serves as the basis for continued study in history, law, or business; preparation for teaching in high school or junior college; preparation for government service; or as part of a general education. For international students, a TOEFL score of 600 is required at the time of admission.

The M.A. and Ph.D. in history of technology and science. The graduate program in the history of technology and science examines the role of technology and science in the formation of modern societies and their attitudes toward people and the world. The program is structured in a sequence of courses leading to the M.A. and Ph.D. degrees. Since these courses approach their subject in the context of social and cultural change, they are also open to and appropriate for students in engineering, the sciences, science education, and science journalism. For a thorough description of the program requirements, see the department’s brochure on the history of technology and science program.

The Ph.D. in agricultural history and rural studies. The program is designed as a Ph.D. program, but students without an M.A. in history will be expected to qualify for the departmental M.A. in history while progressing toward the doctorate. In some cases, the M.A. may be recommended as the terminal degree. Thirty semester hours of graduate credit are required for the M.A. and 72 for the Ph.D. Students who continue beyond the M.A. are expected to pass a qualifying examination in their general field of study and preliminary examinations in three areas of specialization, complete a dissertation, and defend it orally in the Ph.D. final examination. See the departmental brochure on the program for a full description of requirements.

The following short list of the department’s graduate courses is organized by areas of emphasis; see the main listing for complete descriptions. Courses at the 500 level are taken by graduate students (major or minor) and, occasionally, by qualified undergraduates; those at the 600 level are taken by graduate students (major or minor) only.

Europe: 512 series, 530 series, 594 series.

Asia, Latin America: 510, 513, 592, 595.

United States: 511 series, 572, 593 series.

Technology and Science: 570, 571, 574, 575, 576, 602, 603, 604, 605, 606, 607.

Agriculture and Rural Studies: 550, 552 series, 556, 608, 610.

Topical: 580, 583 series, 590, 597.

Courses open for nonmajor graduate credit: 472.

Courses Primarily for Undergraduate Students

Hist 201. Introduction to Western Civilization I. (3-0) Cr. 3. F. Western civilization from ancient Mediterranean world to 1500. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity.

Hist 202. Introduction to Western Civilization II. (3-0) Cr. 3. S. Western civilization from 1500 to present. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity.

Hist 207. Chinese Civilization. (3-0) Cr. 3. F. Origins, development, decline and transformation of China from earliest times to present.

Hist 208. Japanese Civilization. (3-0) Cr. 3. S. Origins, development, and transformation of Japan from earliest times to present.

Hist 221. Survey of United States History I. (3-0) Cr. 3. F. Colonial foundations: revolution, confederation, and constitution; nationalism and democracy; sectional disharmony, Civil War, and reunion.

Hist 222. Survey of United States History II. (3-0) Cr. 3. S. Industrialization; emergence as a great power; boom and depression; war, internationalism and Cold War; modern industrial society.

Hist 240. Latina/o History. (3-0) Cr. 3. S. Prereq: Sophomore classification. Historical and cultural heritage of Latinas/os in the United States. The histories of Mexican, Puerto Rican, Cuban, and other Latin American peoples in the U.S. emphasizing political and cultural convergence and congruences.

Hist 430. Modern England I. (3-0) Cr. 3. Prereq: Sophomore classification. England from 1688 to 1850. Political, social, cultural, economic development; England as a great power.

Hist 431. Modern England II. (3-0) Cr. 3. Prereq: Sophomore classification. England since 1850. Parliamentary and constitutional development; social reform and economic change; imperial Britain; welfare state.

Hist 441. History of Modern Mexico and Central America. (3-0) Cr. 3. S. Prereq: Sophomore classification. Political, economic, and social development of Mexico and Central America in nineteenth and twentieth centuries.

Hist 450. Colonial America. (3-0) Cr. 3. Prereq: Sophomore classification. Colonization, and development of political, economic, social, and cultural institutions of North American colonies before 1754.

Hist 454. Prologue to the U.S. Civil War. (3-0) Cr. 3. F. Prereq: Sophomore classification. McJimsey. Origins of second party system. Social and economic forces that sustained the system and ultimately caused its collapse and sectional division, 1815-1861.

Hist 455. The U.S. Civil War and Reconstruction. (3-0) Cr. 3. S. Prereq: Sophomore classification. Kottman. America in crisis: World War I, the twenties, depression, and World War II.

Hist 471. The United States and the Cold War II. (3-0) Cr. 3. S. Prereq: Sophomore classification. Kottman. Relationship between the U.S. and the Communist world from 1950 to the collapse of the Soviet system in 1991.

Hist 472. American Environmental History. (Same as Env S 472.) (3-0) Cr. 3. F. Prereq: Sophomore classification. Taylor. Conceptual approach to human history in North America by examining the impact of nature from precontact through the 20th century. Explores material interactions; intellectual modes; aesthetic relationships; and management strategies from aboriginal society through the environmental age. Nonmajor graduate credit.

Hist 475. International Financial History. (3-0) Cr. 3. S. McCarthy. Business and economic cycles through history and the strategies investors and other decision-makers have developed to deal with them.

Hist 481. The Rural South. (3-0) Cr. 3. Prereq: Sophomore classification. Slavery, Populism, New Deal, and civil rights movement.

Hist 483. History of American Thought II. (3-0) Cr. 3. Prereq: Sophomore classification. Cravens. Religious, social, and political thought; development of democracy and nationalism, the arts and sciences from late nineteenth century to modern and postmodern times.

Hist 484. Nineteenth Century American Social History. (3-0) Cr. 3. Prereq: Sophomore classification. Cravens. Rise of modern industrial society in nineteenth century America; family, churches, and other social institutions; reform, immigration, social and geographical mobility; impact of urbanization.

Hist 489. History of American Science. (Same as M E 489.) (3-0) Cr. 3. Prereq: Sophomore classification. Cravens. Science as a cultural and social activity in a region from the eighteenth century to present. Scientific discovery; interaction of scientific and social ideas; science and war; science and health, environment; role of science as expertise in a nationalistic democracy.

Hist 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 9 credits in history; permission of department chair. No more than 9 credits of Hist 490 may be counted toward graduation. Reading and reports on problems selected in conference with each student.

Hist 495. Historiography and Research Writing. (1-0) Cr. F. S. Prereq: Major in history. Taken in conjunction with 400-level courses. Required of majors.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Hist 510. Proseminar in East Asian History. (3-0) Cr. 3 each time taken. Prereq: Permission of instructor. Readings in East Asian history. Topics vary each time offered.

Hist 511. Proseminar in American History. (3-0) Cr. 3 each time taken. Prereq: Permission of instructor. Readings in American history. Topics vary each time offered.

A. Colonial Period
B. Nineteenth Century
C. Twentieth Century
D. Environment
E. 20th Century American West

Hist 512. Proseminar in European History. (3-0) Cr. 3 each time taken. Prereq: Permission of instructor. Readings in European history.

A. Ancient (Same as CI St 512A)
B. Medieval
C. Modern

Hist 513. Proseminar in Latin American History. (3-0) Cr. 3 each time taken. Prereq: Permission of instructor. Readings in Latin American history. Topics vary each time offered.

Hist 530. Proseminar in Modern Russian/Soviet History. (3-0) Cr. 3 each time taken. Prereq: History 422 or permission of instructor. Andrews. Readings in modern Russian history. Topics in 530A and B vary each time offered.

A. State, society, and culture in Soviet Russia, 1917-1991
B. Social history of modern Russian technology and science, 1861-present

Hist 550. Proseminar in European Agricultural History and Rural Studies. (3-0) Cr. 3 each time taken. Prereq: Permission of instructor. Readings in European rural history. Topics vary each time offered.

Hist 552. Proseminar in American Agricultural History and Rural Studies. (3-0) Cr. 3 each time taken. Prereq: Permission of instructor. Readings in modern American rural history. Topics vary each time offered.

Hist 570. Seminar in General History of Science I. (3-0) Cr. 3. Prereq: Permission of instructor. Wilson. The history of science from pre-classical civilizations to the Age of Galileo with emphasis on the historical literature, varying interpretations of the period, and problems for continuing research.
**Courses for Graduate Students**

Hist 571. Seminar in General History of Science II. (3-0) Cr. 3. Prereq: Permission of instructor. The history of science from Galileo to modern times, with emphasis on the historical literature, varying interpretations of the period, and problems for continuing research.

Hist 572. Seminar in American Environmental History. (3-0) Cr. 3. S. Prereq: 511D and permission of instructor. Taylor. History of human interaction with nature from aboriginal settlement through the 20th century. Emphasis on individual research.

Hist 574. Seminar in General History of Technology I. (3-0) Cr. 3. Prereq: Permission of instructor. Bix. The history of technology from pre-classical civilizations to the eve of the Industrial Revolution with emphasis on the historical literature, varying interpretations of the period, and problems for continuing research.

Hist 575. Seminar in General History of Technology II. (3-0) Cr. 3. Prereq: Permission of instructor. Marcus. The history of technology from the Industrial Revolution to modern times, with emphasis on the historical literature, varying interpretations of the period, and problems for continuing research.

Hist 576. Colloquium in Historiography of Technology and Science. (1-0) Cr. F. Topical lectures, reports, and discussion of methodology and research in history of technology and science. Required of all graduate students in history of technology and science program.

Hist 580. Museum Internship. Cr. varies each time taken. Prereq: 15 graduate credits in history and permission of instructor.

Hist 583. Historical Methods. (3-0) Cr. 3. Study of evidence, theory, and methods, 583C required of all M.A. students during their first fall semester.

Hist 585. Teaching Methods. Cr. 1 to 2 each time taken. Prereq: Permission of instructor. Topics vary each time of the teaching methods.

Hist 586. Proseminar in Women's History and Feminist Theory. (3-0) Cr. 3. Prereq: Permission of instructor. Pope. Feminist theory from the 1960s to the present as it relates to the writing of women's history. Analysis of interpretations of U.S. women's history from patriarchal to postmodernist perspectives.

Hist 590. Special Topics. Cr. 1 to 3 each time taken. Prereq: Permission of instructor.

Hist 592. Seminar in East Asian History. (3-0) Cr. 3. S. Prereq: Permission of instructor. Topics vary each time offered.

Hist 593. Seminar in American History. (3-0) Cr. 3. each time taken. Prereq: Permission of instructor. Topics vary each time offered.

Hist 594. Seminar in European History. (3-0) Cr. 3. each time taken. Prereq: Permission of instructor. Topics vary each time offered.

Hist 595. Seminar in Latin American History. (3-0) Cr. 3 each time taken. Prereq: Permission of instructor. Topics vary each time offered.

Hist 597. Seminar in Comparative Economic History. (3-0) Cr. 3 each time taken. Prereq: Permission of instructor. Topics vary each time offered.

Hist 603. Seminar in Nineteenth Century Technology. (3-0) Cr. 3. Alt. S. Prereq: Permission of instructor. Marcus, Bix. Emphasis varies each time offered.

Hist 604. Seminar in American Science. (3-0) Cr. 3. Alt. F. Prereq: Permission of instructor. Cravens, Marcus. Emphasis varies each time offered.

Hist 605. Seminar in American Technology. (3-0) Cr. 3. Alt. F. Prereq: Permission of instructor. Cravens, Bix. Emphasis varies each time offered.

Hist 606. Seminar in Early Twentieth Century Science. (3-0) Cr. 3. Alt. F. Prereq: Permission of instructor. Wilson, Cravens, Marcus. Emphasis varies each time offered.

**Honors Program**

**Don Beitz, Chair, University Honors Program Committee**

The Honors Program provides a vehicle for highly motivated and able students to pursue an innovative and challenging undergraduate education. Oversight of students’ progress toward this goal is primarily the responsibility of the undergraduate colleges, each of which operates its own Honors Program. The college Honors Program committees admit students into the Program, approve programs of study, and are responsible for the administration of their college Honors Programs. The University Honors Program Committee, which includes the chairs of the college Programs, is responsible for the general coordination of the college Honors Programs and the Freshman Honors Program.

Students in the Honors Program are offered a variety of academic opportunities designed to help them derive the fullest benefit from their undergraduate education. To enhance their individualized programs of study, students are offered numerous Honors courses, seminars, and independent research opportunities. (For other benefits, see Index, Honors Program.)

Honors courses and Honors sections of regular courses are offered by several departments and programs. These courses, open only to Honors Program members, have limited enrollment and are taught by specially selected instructors. Most of these courses are listed by department or program. (See Classical Studies, Economics, Engineering, English, Mathematics, Physics, Psychology, and Speech Communication.)

In addition to established Honors courses, Honors students may designate any course as an Honors course by making appropriate arrangements with the course instructor and obtaining approval of the Honors Program Director. Most departments offer opportunities for independent study and research under 290 and 490; when designated by an H, these courses also carry Honors credit.

**Courses and Programs**

**Horticulture** 253

Research grants are available to support Honors research.

Listed below are those courses that are offered directly by the University Honors Program. Specific information about the full range of Honors courses and seminars for the current academic year, including the Honors courses offered by individual departments and programs, may be obtained from the Honors Program Office in Osborn Cottage.

Hon 121. Freshman Honors Seminar. (0-2) Cr. 1. F. Prereq: Membership in the Freshman Honors Program. Orientation to Iowa State University and to the University Honors Program. Offered on a satisfactory-fail grading basis only.

Hon 290. Special Problems. Cr. var. Prereq: Permission of the vice provost for undergraduate programs. Independent study on topics of an interdisciplinary nature. Offered on a satisfactory-fail grading basis only. Intended primarily for freshmen and sophomores.

Hon 690. Independent Study. Cr. var. Prereq: Membership in the University Honors Program and permission of the vice provost for undergraduate programs. Independent study on topics of an interdisciplinary nature. Intended primarily for juniors and seniors.

**Undergraduate Study**

For undergraduate curriculum in horticulture leading to the bachelor of science degree, see Horticulture, Curriculum.

The horticulture curriculum is designed to permit commodity emphasis in general horticulture, landscape horticulture, greenhouse management, fruit production, vegetable production, nursery management, turfgrass science and management, or horticultural communications and public education. Students consider-
Courses and Programs Horticulture

The department offers master of science and doctor of philosophy degrees with a major in horticulture, and minor work for students in other departments. Under special circumstances a nonthesis master’s degree is available through the master of agriculture program.

Prerequisite to major graduate study is the completion of courses covering horticulture, botany, and the underlying sciences.

Students majoring in horticulture usually will take minor work in agronomy, botany (cytology, morphology, or physiology), biochemistry, chemistry, entomology, food science and human nutrition, genetics, pathology, or statistics.

There is no uniform foreign language requirement for either the master of science or the doctor of philosophy degree.

The department also cooperates in the interdepartmental majors of genetics; water resources; molecular, cellular, and developmental biology, and plant physiology (see Index).

Graduates possess a broad understanding of horticulture and the underlying plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and the general public. They are experienced in conducting and writing the results of research. They are capable of addressing and solving complex problems associated with the agricultural and plant science professions. They understand the ethical, legal, social, and environmental issues associated with modern agricultural practices.

Courses open for nonmajor graduate credit: 320, 351, 351L, 422, 434, 435, 442, 451, 463, 461, 471, 493.

Courses Primarily for Undergraduate Students

Hort 110. Orientation in Horticulture. [1-0] Cr. 1. F.

Hort 121. Home Horticulture. [2-0] Cr. 2. F.

Hort 211. Herbaceous Plants. [2-2] Cr. 3. F.

Hort 212. Woody Plants. [3-3] Cr. 4. F.

Hort 253. Tropical Plants and Interior Landscapes. [2-2] Cr. 3. F.

Hort 282. Educating Youth Through Horticulture. (Same as AgEds 282.) [2-3] Cr. 3. S. Planning, developing, and implementing science-based educational programs in a public garden setting. Through hands-on experiences at Reinman Gardens, students will learn about horticulture, learning theory, and the application of science principles as they pertain to educating youth.

Hort 283. Pesticide Application Certification. (Same as Ent 283.) See Entomology.

Hort 300. Plant Propagation. (Same as Ent 300.) [2-2] Cr. 3. S. Prereq: 221 or Agron 114 or Biol 201 and Agron 154 or 155. Factors influencing nutrient absorption and composition; criteria of essentiality and roles of the elements; nutrient status and plant analysis techniques; deficiency and toxicity symptoms, the laboratory emphasizes techniques for determining plant nutritional status, water quality, and crop monitoring. Nonmajor graduate credit.

Hort 332. Greenhouse and Controlled Environments. [3-3] Cr. 4. F. Prereq: 221. Principles of greenhouse and controlled environment operation and management. Methods of monitoring and manipulating environmental conditions (light, temperature, fertility, production media, etc.) to maximize production and quality and minimize production costs and time.

Hort 338. Seed Science and Technology. (Same as Agron 328.) See Agronomy.

Hort 342. Landscape Plant Establishment and Maintenance. [2-2] Cr. 3. F. Prereq: 241 or L A 321. Principles and practices involved with establishment and maintenance of woody ornamental plants in the landscape. Laboratory work involves site evaluation, installation techniques, post-plant care, and maintenance of established landscape plants.

Hort 344. Landscape Horticulture. (Same as L A 344.) [2-6] Cr. 4. S. Prereq: 241 or L A 321 recommended. Principles and practices of designing residential and small business landscapes. Site analysis, terrain alteration for drainage and aesthetics, functional areas and circulation, use of construction and plant materials for site development. Basic sketching and drafting, perspective drawing, and plan refinement.

Hort 351. Turfgrass Establishment and Management. (Same as Agron 351.) [3-3] Cr. 3. F. Prereq: 221 or Agron 114 or Biol 201. Principles and practices of turfgrass propagation and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.

Hort 351L. Turfgrass Establishment and Management Laboratory. (Same as Agron 351L.) [0-3] Cr. 1. F. Prereq: Credit or enrollment in 351. Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor. Nonmajor graduate credit.

Hort 391. Horticultural Management Experience. Cr. arr., maximum of 2. F.S.S. Prereq: 221, permission of instructor. A structured work experience for the student to gain insight into management operations associated with production of horticultural crops. A report of 10 or more pages describing the student’s experience is required. One credit is given for each term the student is enrolled in the course. A maximum of two credits may be used toward the horticultural sciences course requirements, and two additional credits may be used toward the 128 credits required for graduation.

Hort 424. Sustainable and Environmental Horticulture Systems. (Dual-listed with 524; same as Env S 424.) (2-0) Cr. 2. S. Inquiry into ethical issues and environmental consequences of horticultural cropping systems and production practices. Emphasis on production systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

Hort 444. Landscape Construction. (2-3) Cr. 3. F. Prereq: Junior or senior classification. Theory and practice of construction or installing landscape features including layout, contours, retaining walls, paving, and irrigation.

Hort 445. Public Horticulture Management and Administration. (2-0) Cr. 2. F. Prereq: 221, 345, and 391. In-depth presentation and discussion of techniques and requirements for the management and administration of a public horticultural facility. Topics include oral and written presentation skills, proposal development, public relations, budgeting, fundraising, dealing with governing boards, interpersonal relationships and managing horticultural operations.

Hort 451. Professional Turfgrass Management. (2-0) Cr. 2. Alt. S., offered 2003. Prereq: 351 Turfgrass science including the study of (1) specific information on soil chemistry and soil modification as they relate to the development and maintenance of turfgrass areas, (2) special management practices used in athletic field care, professional lawn care and golf course industries, and (3) construction methods for golf courses and athletic fields. Nonmajor graduate credit.

Hort 452. Integrated Management of Diseases and Insect Pests of Turfgrasses. (Dual-listed with 452; same as PI 452, Ent 452.) See Plant Pathology or Entomology.

Hort 453. Sports Turf Management. (2-0) Cr. 2. Prereq: 351 Management techniques for today’s specialized athletic fields. The horticultural and budgetary aspects of football, soccer, baseball, and softball fields will be presented. Field trips and laboratory exercises will develop technical understanding of actual principles in field development, construction, and management. Nonmajor graduate credit.

Hort 461. Fruit and Nut Crop Production. (2-1) Cr. 3. Alt. S., offered 2003. Prereq: 221. Principles and practices of small fruit, and nut culture and production. Morphology, physiology of growth and development, plant establishment, pest management, pruning, training, harvesting, storage, and marketing. Nonmajor graduate credit.

Hort 475. Community Tree Management. (Same as For 475.) See Forestry.

Hort 489. Independent Study. Cr. arr. Prereq: Senior classification in horticulture, permission of instructor. A maximum of 4 credits of 490 may be used toward the total of 128 credits required for graduation. Involve research, holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head.

A. Greenhouse Management
B. Nursery Crops
C. Turfgrass
D. Fruit Crops
E. Vegetable Crops
F. Cross-Commodity
H. Honors

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Hort 511. Integrated Management of Tropical Crops. (Same as PI 511.) See Plant Pathology.

Hort 521. Case Studies in Environmental Stress Physiology. (Dual-listed with 421) (2-2) Cr. 3. Alt. S., offered 2002. Prereq: 221 or Bot 320. Examine environmental factors affecting plant health. Drought, flooding, heat, cold temperature, and dormancy are examples of study modules. Interdisciplinary topics include plant productivity and entomology, Woody and herbaceous plants, food crops, and ornamental plants.

Hort 524. Sustainable and Environmental Horticulture Systems. (Dual-listed with 424.) (2-0) Cr. 2. S. Inquiry into ethical issues and environmental consequences of horticultural cropping systems and production practices. Emphasis on production systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

Hort 529. Publishing in Plant Science Journals. (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data. Process of preparing a manuscript for submission to a refereed journal will be discussed. Emphasis on publishing self-generated data from thesis or dissertation research.

Hort 530. Research Orientation. (2-0) Cr. 1. F. Instruction in scientific methods and communication skills.

Hort 546. Organizational Strategies for Diversified Farming Systems. (Same as Agron 546, Soc 546, SusAg 546.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: SusAg 509. The day-to-day operation and social relations of the complex, diversified farm. Alternative organizational strategies for the diversified and sustainable farm. Farm family dynamics and goal setting. Cooperation between farmers. The social relations of alternative marketing, including green labeling, community supported agriculture, farmer’s markets, and relationship marketing.

Hort 551. Growth and Development of Perennial Grasses. (Same as Agron 551) (2-0) Cr. 2. Alt. S., offered 2003. The grass plant. Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under managed conditions.

Hort 552. Integrated Management of Diseases and Insect Pests of Turfgrasses. (Dual-listed with 452; same as Ent 452, PI 552.) See Plant Pathology or Entomology.

Hort 590. Special Topics. Cr. arr. Prereq: A major or minor in horticulture.

Hort 593. Workshop in Horticulture. Cr. arr. Workshops in horticulture, with emphasis on off-campus instruction. A. Greenhouse Management
B. Nursery Crops
C. Turfgrass
D. Fruit Crops
E. Vegetable Crops
F. Cross-Commodity
Hort 599. Creative Component. Cr. arr.

Hotel, Restaurant, and Institution Management

Mary B. Greigore, Chair of Department
Professors: Gilmore, Greigore
Associate Professors: Baltzer, Huss, Sneed, Walsh
Associate Professors (Emeritus): Brown
Assistant Professors: Horton, Jeong, Oh
Assistant Professors (Adjunct): Burger, Dana, Stroehbohn
Instructors (Adjunct): Cavdron
Instructors (Collaborators): Thors

The mission of the Department of Hotel, Restaurant, and Institution Management (HRIM) is to prepare and support professionals to improve continuously the management of organizations that provide food and lodging services to individuals and families away from home. Educational experiences are planned to contribute to the graduate’s effectiveness as a career professional and as a person, family member, and citizen. Research and extension efforts are conducted with the purpose of improving management effectiveness and quality of services within lodging and foodservice organizations. Finally, the department is committed to serving the respective missions of Iowa State University and the College of Family and Consumer Sciences and to serving the needs of the state of Iowa.

Undergraduate Study
The department offers work for the degree bachelor of science in hotel, restaurant, and institution management. Coursework is planned to provide students with a general education plus professional preparation for supervisory and executive positions in hospitality organizations. Principles of business management are presented, as well as fundamentals of hospitality operations.

Graduates understand the principles necessary to successfully practice hospitality management in an ethical manner. They are able to determine, accept, and implement management responsibilities. They can identify and evaluate environmental trends and adapt operating practices to meet these changing forces. They are able to make a positive contribution to the growth and improvement of the hospitality industry.

Learning experiences are provided in the quantity food production and service facility of the HRIM Department and other approved establishments. Field trips and guest speakers are scheduled to introduce students to the diversity of career opportunities in the hospitality industry. These opportunities apply course content to specific work settings. Students are required to have 400 hours of relevant work experience prior to graduation.

The HRIM Department offers a minor that may be earned by successfully completing at least 15 credits of HRIM courses in consultation with the undergraduate coordinator.

A hotel, restaurant, and institution management area of concentration can be combined with a major in advertising or journalism and mass communication in the College of Liberal Arts and Sciences. See the department for details.

The department requires a grade of C or better in both Engl 104 and 105 or equivalent transfer courses. A student who does not get a C or better in these classes is required to get a C or better in Engl 302.

Graduate Study
The department offers work for the degree master of science with a major in hotel, restaurant, and institution management. This is a general hospitality management program.

Graduates of the program are able to interpret trends and adapt operating practices of hospitality organizations to changing economic, social, political, technological, and environmental conditions. They can manage a food or lodging enterprise successfully to achieve objectives of the operation or, at the doctoral level, successfully carry out responsibilities of a hospitality educator. Graduates will make positive contributions to the growth and improvement of the hospitality industry using current research in the decision-making process.

A degree in hotel, restaurant, and institution management is the usual background for graduate study; however, applicants with preparation in dietetics, business, or closely-related fields are encouraged to apply. Prior to admis-

sion, students must have completed most prerequisite courses. These include basic principles courses in financial accounting, managerial accounting, business law, computer science, economics, human resources, management, and marketing. In addition, basic principles courses in nutrition, food preparation, and quantity food preparation are required.

The master of science degree requires either a thesis or non-thesis (creative component) project. Students also are required to take one HRIM course in three of four core areas (human resources, financial management, marketing, and strategic management).

The department participates in the Master of Family and Consumer Sciences degree by offering a specialization in HRIM. The department also participates in the Master of Family and Consumer Sciences degree with specialization in Dietetics, offered in cooperation with the Food Science and Human Nutrition Department.

A graduate minor in HRIM at the MS level requires a minimum of 9 credits of HRIM coursework; 6 credits must be at the 500- or 600-level.

Work may be taken for the degree doctor of philosophy as a joint major. A second major must be chosen from a related area offered by a department authorized to grant a doctoral degree. The most common choice for a joint-major program has been with family and consumer sciences education. A dissertation is required.

Courses open for nonmajor graduate credit: 352, 437, 438, 452, 460.

Courses Primarily for Undergraduate Students

HRI 101. Introduction to the Hospitality Industry. (3-0 cr. 3 F. Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, resume writing, and future challenges in various segments of the industry.

HRI 233. Hospitality Sanitation and Safety. (3-0 cr. 3 F. Sanitation and safety principles and issues in food service and lodging operations. Application of HACCP. Preparation for national foodservice sanitation certification examination. Characteristics of food, supplies, and equipment as related to sanitation and safety.

HRI 287. Principles of Hospitality Management. (3-0 cr. 3 F. Introduction to management concepts and principles with application to the hospitality industry. Includes service quality management, professionalism, and social responsibility. Credit for either 391 or 287 and 438 may count toward graduation.

HRI 289. Private Club Operations. (2-0 cr. 2 F. Prereq: 101. The organization and management of various types of private clubs including city, country, and other recreational and social clubs. Field trip required.

HRI 333. Foodservice Operations Controls. (3-0 cr. 3 F. Prereq: HRI 233. Introduction to revenue and cost control in foodservice and hotel operations: systems for controlling sales and food, beverage, labor, and other costs. Application of principles related to procurement, production, and inventory controls. Specifications for food and equipment. Field trip required.

HRI 352. Lodging Operations Management I. (3-0 cr. 3 F. Prereq: 101. Introduction to functional department activities of lodging organizations, includ-

Assistant Professors: Bryant, Crull, Enders, Garcia, Godfrey, Graham, Hatcher, Oleson, Thieman, Werner-Wilson, Xiong

Assistant Professors (Adjunct): Colbert

Assistant Professors (Emeritus): Glass

Instructors (Adjunct): Enloe, Jolly, Long, Luze, Oesterreich, Walsh

Undergraduate Study

For undergraduate curricula in human development and family studies, leading to the degree bachelor of science, see Family and Consumer Sciences, Curricula. The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the bachelor of science degree in four curricula: child and family services; family resource management and consumer sciences; housing and the near environment; and early childhood education.

At the completion of undergraduate study in Human Development and Family Studies, undergraduates will demonstrate knowledge and understanding of: a) family systems, including special populations, and their relationships to environments and institutions; b) life span development, including special populations; c) professionalism, ethics, and public policy issues for working with individuals and families, including special populations; d) personal and professional communication with children and families, including special populations; e) management of human and material resources for children and families, including special populations.

The child and family services curriculum leads to work in the helping services with employment opportunities in public and private agencies, including Head Start and schools. Opportunities exist to observe and work with infants, preschoolers, school-age children, adolescents, the elderly, and families. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and the elderly as program development specialists, directors, teachers, and administrators. This flexible program provides a broad emphasis in theory, research, and application in child and family services including attention to community issues and public policy. A student may seek a double major or preprofessional preparation.

The family resource management and consumer sciences curriculum focuses on the behavior of families as they allocate and manage their resources and function as consumers. The curriculum leads to employment with agencies and organizations concerned with family financial management, financial counseling, consumer economics, and analysis and implementation of public policies that affect family resource management.

The curriculum in housing and the near environment focuses on housing needs, issues, and trends, such as housing alternatives for families and children; housing for the elderly and persons with disabilities; residential property management; and public policy. Graduates of this curriculum are prepared for employment in public and private (profit and not-for-profit) agencies and organizations; real estate and lending institutions; housing management and administration; the housing and furnishings industries; and housing advocacy.

The curriculum in early childhood education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home-based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is administered jointly by the Department of Curriculum and Instruction within the College of Education and the Department of Human Development and Family Studies within the College of Family and Consumer Sciences.

The department offers minors in family resource management and consumer sciences, child and family services, and housing and the near environment. The department also offers journalism areas of concentration in child and family services, housing and the near environment, and family resource management and consumer sciences; see department for details.

The family resource management and consumer sciences minor may be earned by completing 15 credits in the following courses: 102, 283, 378, 395, 448, 483, 488, 489.

The child and family services minor may be earned by completing 102; selecting credits from 378 or 449; selecting credits from 220, 221, 226, 227 or 377; selecting credits from 276, 349, 360, 370, 373, or 378; and selecting 3 credits from 340, 343, 345, 395, 460 and 479.

The housing and the near environment minor may be earned by completing credits from the following courses: 239, 317K, 341, 360, 416, 460, 483, 490B.

English proficiency requirement: A student must achieve a grade of C or higher in English 104 and 105. A student achieving a grade of C– or lower in 104 and/or 105 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with the major in human development and family studies, and minor work for students taking major work in other departments. Graduates of M.S. and Ph.D. programs in the department will understand and apply relevant theories to educational, research, and/or intervention programs. It is intended that they will produce and disseminate research results and provide leadership in human development and family studies professions.

Within the major of human development and family studies students may choose from different specializations. Specializations are available for both M.S. and Ph.D. candidates in child development, early childhood education, early childhood special education, family policy, family studies, life-span studies, and marriage and family therapy. The marriage and family therapy specialization is accredited by the Commission on Accreditation for Marriage and Family Therapy Education. The Department of Human Development and Family Studies offers coursework and experi-
Courses and Programs

Human Development and Family Studies 259

HD FS 345. Adapting Programming in Inclusive Settings. (3-0) Cr. 3. F.S. Prereq: Credit or concurrent enrollment in 343; Sp Ed 250. Adapting materials and equipment to meet social, cognitive, nutritional, physical motor, communication, and medical needs of children; new through 8, with diverse learning needs and multiple disabilities in inclusive settings for young children. A proposal and management of specialized health care needs. Designing and evaluating individual education plans; supervising para-professionals in educational settings.

HD FS 349. Parenting and Family Diversity Issues. (3-0) Cr. 3. F.S. Prereq: Sophomore classification. Diversity issues as they affect families: Parenting practices and family relationships across cultures. Topics include gender differences, disabilities, adoption, co-parenting, and race composition. Understanding of the family system and the relationship of that system to societal systems.

HD FS 360. Housing and Services for Families with Special Needs. (3-0) Cr. 3. S. Prereq: 6 credits in social sciences. Housing and service alternatives that assist families and individuals with special needs, including the disabled, the homeless, low income, and single parents. Residential property management considerations for families with special needs. Experimental and innovative approaches to housing and services.

HD FS 378. Family and Management Patterns. (3-0) Cr. 3. F. Prereq: 221. Use of systems theory and family development theory in understanding family behavior, including the management of family resources across the family life cycle to achieve family goals.

HD FS 417. Supervised Student Teaching. Cr. 8. May be repeated. Reservation required.
A. Kindergarten Programs. F.S. Prereq: GPA 2.5; full admission to program 455; Teaching experience with young children in kindergarten settings.
B. Preschool Programs. F.S. Prereq: GPA 2.5; full admission to teacher education program, 458, 456. Teaching experience with young children from birth to 5 in group settings.

HD FS 445. Administration of Programs for Children. (3-0) Cr. 3. S. Prereq: 340 or 343. Management principles and techniques, including an introduction to financial management, involved in programs for children with diverse needs and their families. Staff development, supervision, and evaluation in programs for children and families. Government regulations concerning child and family programs; community relations; and advocacy for children and families.

HD FS 448. Economics of Aging. (Same as Geron 448.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Economic status of the aging; retirement planning and the retirement decision; role of Social Security; public transfer programs for the elderly; family transfer from the elderly; private pensions; financing medical care and housing for the elderly; prospects and issues for the future. Nonmajor graduate credit.

HD FS 449. Linking Families and Communities. (3-0) Cr. 3. S. Prereq: 269 or Psych 333. Assessing family needs and community resources across the lifespan. Characteristics of successful community-based family intervention and support programs. Strategies and skills needed by community-based professionals, including educators. Linking families to community resources. Nonmajor graduate credit.

HD FS 455. Curricula for Ages 3 through 6 Years. (3-0) Cr. 4. F.S. Prereq: 343, 345. Program models and methods leading to development and organization of appropriate preschool and kindergarten programs for young children with diverse learning needs. Government regulations and professional standards for child programming. Teaming with parents, colleagues, and paraprofessionals to plan, implement, and evaluate developmentally and culturally appropriate individualized education plans in inclusive settings. Integrated practicum setting. Nonmajor graduate credit.

HD FS 456. Family-Focused Interventions for Young Children. (3-1) Cr. 3. F.S. Prereq: 340, 345. Application of family systems theory in family-focused service delivery models. Teaming with parents and colleagues to plan, implement, and evaluate individualized family service plans. Focus on home-based intervention using routines and activities to embed intervention goals, family support, and linking families to community resources. Field experience in home-based programs. Nonmajor graduate credit.

HD FS 460. Housing and Environments for Children. (Dual-listed with 560.) (3-0) Cr. 3. F. Prereq: 6 credits in architecture, art, and design, education, interior design, human development and family studies, psychology. Assessment of environments for children including home, child care, school, and community settings. Emphasis on design of developmentally appropriate settings that foster independence for children with and without disabilities.

HD FS 463. Housing for the Aging. (Dual-listed with 563; same as ArtDi 463, Geron 463.) (3-0) Cr. 3. S. Prereq: 380 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

HD FS 474. Entrepreneurship in Family and Consumer Sciences. (Same as HR 474, T C 474.) (3-0) Cr. S. Prereq: HD FS 280 or 300 or above. Explores entrepreneurship for family and consumer sciences-related businesses. Includes family, home-based, rural and women-owned businesses. Development of a feasibility analysis. Guest speakers.

HD FS 479. Family Interaction Dynamics. (3-0) Cr. 3. F. Prereq. 378. Analysis of family interaction processes and patterns with emphasis on relationship dynamics across the family life span. Nonmajor graduate credit.

HD FS 486. Administration of Programs for Families. (3-0) Cr. 3. S. Prereq: 370, 378. An examination of purposes, staffing, operation, and clientele of organizations and agencies serving families. Analysis of issues in coordination and delivery of services. Includes focus on interagency collaboration for the elderly; private pensions; financing medical care and housing for the elderly; prospects and issues for the future. Nonmajor graduate credit.

HD FS 489. Family Financial Counseling. (Dual-listed with 589.) (3-0) Cr. 3. S. F.S. Prereq: 283. Personal, social/psychological, and legal climates affecting family financial decisions. A life-cycle approach to financial decision-making. Development of financial counseling and planning skills to assist families and individuals to become self-sufficient in family financial management. Nonmajor graduate credit.

HD FS 489L. Laboratory in Family Financial Counseling. (2-0 or 2-4) Cr. 1-2. May be repeated. F.S. Prereq: 489. Experience in remedial, preventive, and productive financial counseling.

HD FS 491. Practicum. Cr. 4 or 8. May be repeated. F.S.S. Prereq: 449; permission of instructor. Reservation required one semester before placement; minimum 2.0 GPA. Supervised work experience off campus related to the student’s curriculum. Offered on a satisfactory-fail grading basis only.

HD FS 493. Workshop. (Dual-listed with 593.) Cr. arr. May be repeated. F.S.S. Prereq: Senior classification.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

HD FS 500. Short Course. Cr. arr. May be repeated. Prereq: Permission of instructor. Concentrated group study of various developmental and educational issues in the field of human development and family studies.

HD FS 501. Graduate Study Orientation. (1-0) Cr. R. F. Orientation to graduate study and current research in the department.

HD FS 503. Research Methods in Human Development and Family Studies. (3-3) Cr. 4. S. Prereq: Stat 401 or Research Methods. Concepts and strategies for research in human development and family studies. Topics include the nature of scientific research, measurement, types of research in human development and family studies, validity of research designs, methods of data gathering, and strategies for and issues in the study of change. Coding, entry, and manipulation of research data. Practical applications with interactive statistical software.

HD FS 511. Family Theory. (3-0) Cr. 3. F.S. Prereq: 9 credits in social sciences. Theoretical approaches and current research in family development. Review the nature and value of theory to the study of the family and the family in society and theory in empirical research. Policy implications.

HD FS 521. Housing and the Social Environment. (3-0) Cr. 3. S. Prereq: Graduate classification; 511 or 6 credits in social sciences. Housing adjustment behavior of individuals and families in the context of the social and cultural framework of society. Analysis of conceptual frameworks, methodological approaches, and current research in housing. Impact of housing on the family.

HD FS 523. Household Resource Development and Allocation. (3-0) Cr. 3. Alt. S.; offered 2002. Prereq: 378, 6 credits in sociology or economics. Theories and research in goal-oriented behavior. Emphasis on the fit between household behavior in resource allocation and policies designed to foster or inhibit such behavior.

HD FS 534. Adult Development. (Same as Geron 534.) (3-0) Cr. 3. S. Prereq: 510 or 511. Adult development of cognition, personal characteristics, and cultural aspects of human relationships. Emphasis on development and psycho-social health in young, middle, and later adulthood.

HD FS 538. Developmental Disabilities in Children. (Same as Psych 538.) (3-0) Cr. 3. S. Prereq: 6 credits in human development and family studies or psychology. Theories, research, and current issues regarding development in children with disabilities. Investigation of interventions with children and families.
HD FS 541. Housing and Real Estate in Family Financial Planning. (3-0) Cr. 3. SS. www only. The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate.

HD FS 548. Parent Education. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 510 or 511 or 6 credits in social sciences. Needs assessments, models, delivery systems, and evaluation procedures used in parent education programs for families with diverse needs, including single parents, adolescent parents, and parents of children with developmental disabilities. Developmental aspects of parenting. Effects of values, family, economic, and social issues faced by families. Communication and consultation skills to work collaboratively with interdisciplinary professionals and families to implement individualized family and educational programs.

HD FS 556. Families and Disability. (3-0) Cr. 3. S. Prereq: 9 credits in social sciences. Role of housing and real estate in the family financial decisions. A life cycle approach to financial decision making. Understanding how intimate relationship development and change over time, beginning with the development of early adolescent relationships and continuing through later life.

HD FS 557. Marriage Across the Life Course. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 511. A developmental approach to understanding the formation, maintenance, and dissolution of intimate relationships across the life course. Understanding how intimate relationships develop and change over time, beginning with the development of early adolescent relationships and continuing through later life.

HD FS 558. Marriage and Family Therapy. (3-0) Cr. 3. S. Prereq: 9 credits in social sciences. Review of family therapy theories and research related to personal and family adjustment in later life. Focus on emerging issues in the context of family therapy.

HD FS 563. Housing for the Aging. (Dual-listed with 460.) (3-0) Cr. 3. SS., offered 2002. Prereq: 510. Housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate.

HD FS 570. Families Across the Life Span. (3-0) Cr. 3. F. Prereq: 9 credits in social sciences. Theory and research in development and change in family systems and in their reciprocal relationships with the individual and the environment across the family life span.

HD FS 571. Marital Therapy. (3-0) Cr. 3. S. Prereq: 9 credits in social sciences. Theories and techniques of marital therapy across the life cycle.

HD FS 572. Family, Stress and Community. (3-0) Cr. 3. F., offered 2002. Prereq: 9 credits in social sciences. Examination of strengths and challenges of marginalized families. Identification of barriers to services and support and exploration of strategies to assist families in overcoming these barriers.

HD FS 573. Ethics and Professional Studies in Marriage and Family Therapy. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 571. Professional ethics and values relevant to family therapy; review of professional organizations, private practice, and grant writing.

HD FS 576. Family Interaction Dynamics. (3-0) Cr. 3. S. Prereq: 9 credits in social sciences. Current research and theory in family interaction, with emphasis on family dynamics and family change across the life cycle.

HD FS 580. The Family and the Law. (3-0) Cr. 3. Alt. SS., offered 2002. Prereq: 6 credits in social science. The effects of selected legislation and cases on individuals and families. The legal processes involved in the activities of individuals and families. Implications for effective functioning within the limits of the legal environment. Legal and quasi-legal services available in the community.

HD FS 583. Family Resource Management. (3-0) Cr. 3. F. Prereq: www only. Prereq: 483. Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family’s overall financial and economic goals to help inform decisions about where these investments are made.

HD FS 585. Family Policy Analysis. (3-0) Cr. 3. F. Prereq: 6 credits in graduate level social sciences. Theoretical and practical issues related to family policy program evaluation. Assessment of programs’ success in meeting goals. Examination of concepts related to family policy development in the United States. Examination of individuals and groups that influence family policy and evaluation.

HD FS 589. Family Financial Counseling. (Dual-listed with 489.) (3-0) Cr. 3. F. Prereq: Graduate classification. Personal, social/psychological and legal climates affecting family financial decisions. A life cycle approach to financial decision making. Development of financial counseling and planning skills to assist families and individuals to become self-sufficient in family financial management.

Department of Human Development and Family Studies

Courses and Programs

Human Development and Family Studies 261

Courses for Graduate Students

HD FS 603. Advanced Quantitative Methods. (3-0) Cr. 3. S. Prereq: 503. Students enrolled in this course are required to complete a project examining methodological and analytical issues in research in human development and family studies. Advanced research design and measurement, selection of statistical techniques, and issues in the interpretation of findings.

HD FS 604. Advanced Qualitative Research. (3-0) Cr. 3. F. Prereq: 503. An advanced qualitative research methods course that builds on 503. Qualitative methods and related theory commonly used by researchers in family therapy, human development, and family studies. Epistemology, grounded theory, ethnomet hodology, hermeneutics, oral life stories, and content analysis.

Immunobiology

(Interdepartmental Graduate Major)

Supervisory Committee: R. Rosenbusch, Chair; C. Andreasen, D. Jones, F. Minion, R. Sacco

The Graduate Faculty: Mark Ackerman, Claire Andreassen, Amy Andreae, Jan Buss, Susan Carpenter, Norman Cheville, Joan Cunnick, Ronald Griffith, James Jones, Hank Harris, Julie Jarvisen, Doug Jones, Merlin Kaeberle, Marcus Kehrli, Susan Lamont, F. Chris Minion, Harley Moon, Andy Norris, Brian Nonnece, Evelyn Nystrom, Prem Paul, Ken Platt, Don Reynolds, Ricardo Rosenbusch, Richard Ross, James Roth, Max Rothschild, Randy Sacco, Mary Schmer, Ioana Sonea, Judy Stabel, Louisa Tabatabai, Eileen Thacker, Charles Thoen, Mike Wannemuehler, En-Min Zhou

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Immunobiology. Faculty are drawn from seven departments: Animal Science, Biochemistry, Biophysics, and Molecular Biology; Biomedical Sciences; Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology. The diversity of faculty expertise ensures a broad education, while offering flexibility in choice of specialization. Ongoing research projects include areas such as: antibody and cell-mediated immunity, immunogenetics, immunology with related disciplines. They are able to effectively communicate with scientific colleagues and the general public in both formal and informal settings. Graduates are able to integrate theory and research to address complex problems facing scientific professionals studying animal and human health, taking into account related ethical, social, and environmental issues. They are skilled in carrying out research, communicating research results, and writing persuasive grant proposals.

Courses for Graduate Students

Imbio 604. Seminar in Immunobiology, (1-0) Cr. 1 each time taken. Student and faculty presentation.

Imbio 690. Special Topics. Cr. var. each time taken. Advanced study of specific topics in specialized field of immunobiology.

Imbio 697. Graduate Research Rotation, Cr. Var, each time taken. Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Immunobiology major.

Imbio 699. Research.

Industrial Engineering

(Administered by the Department of Industrial and Manufacturing Systems Engineering)

Patrick Patterson, Interim Chair of Department

Professors: Barta, Berger, Heising, Morris, Vardeman

Professors (Collaborators): Egbelu

Distinguished Professors (Emeritus): Cowles

University Professors (Emeritus): David

Professors (Emeritus): Even, Griffen, Hempstead, Kleinschmidt, McRoberts, Mohr, Montag, Moore, C. Smith, G. Smith, Squires, Tamashunas, Vaught, Walkup

Associate Professors: Adams, Gemmill, Jackman, Meeks, Min, Patterson, Ryan

Associate Professors (Emeritus): Love

Assistant Professors: Chen, Narayanaswami, Olafsson, Peters, Van Voorhis

Immunobiology students should include in their program of study a core of courses which will provide a broad coverage of the basic program in immunobiology. Formal courses should include immunology, biochemistry, and statistics. Additional coursework may be selected to satisfy individual interests or departmental requirements. The foreign language and teaching requirement are also determined by the student’s department. All students will take a minimum of one seminar course per year.

Graduates have a broad understanding of the interdisciplinary field of immunobiology, and can effectively integrate the principles of immunology with related disciplines. They are able to effectively communicate with scientific colleagues and the general public in both formal and informal settings. Graduates are able to integrate theory and research to address complex problems facing scientific professionals studying animal and human health, taking into account related ethical, social, and environmental issues. They are skilled in carrying out research, communicating research results, and writing persuasive grant proposals.
Undergraduate Study

For the undergraduate curriculum in industrial engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Industrial engineers are employed to design, analyze, and improve systems and processes found in manufacturing, consulting, and service industries. Professional responsibilities are typically in design, management, analysis, optimization, and modeling of industrial systems. An industrial engineer is focused on human factors, operations research, enterprise computing, engineering management, manufacturing engineering, and quality. Industrial engineers are typically found in organizations responsible for operations management, process engineering, automation, logistics, supply chain management, scheduling, plant engineering, quality control, and technical sales.

The goal of the industrial engineering undergraduate curriculum is to produce technically qualified industrial engineers who are capable of successful professional practice in the field. Graduates of the program will be able to work effectively with other members of the workforce to accomplish engineering advances in their assigned areas. The program also provides graduates with the necessary educational foundation to pursue advanced studies in industrial engineering or related fields.

Graduate Study

The department offers work leading to the degrees of master of science, and doctor of philosophy with a major in industrial engineering. A formal minor is available to doctor of philosophy students having a major in another department. Graduate study is designed to improve the student’s capability in the professional practice of industrial engineering and to develop research ability.

The prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this institution.

With the help of a program of study committee, a graduate student develops an educational program in areas within industrial engineering. Typical areas of concentration include engineering economy; human factors, systems analysis and control, manufacturing systems analysis, manufacturing processes, production systems analysis and design, life cycle analysis and depreciation, operations research and optimization, enterprise modeling and integration, information management, and the human machine interface. A major in operations research leading to a master of science degree is co-offered with the Department of Statistics.

Courses open for nonmajor graduate credit:
- 305, 312, 313, 341, 348, 375, 408, 409, 419, 436, 439, 441, 448, 465, 471.

Courses Primarily for Undergraduate Students

I E 101. Orientation. (1-0) Cr. R. S. Introduce students to the industrial engineering profession, its scope, industrial engineering tools, and future trends.

I E 248. Introduction to Manufacturing Processes and Specifications. (2-2) Cr. 3. F. Prereq: Credit or enrollment in Mat E 271. Theory, applications, and quality issues related to machining and other nontraditional material removal processes. Introduction to metrology, engineering drawings and specifications.

I E 271. Applied Ergonomics and Work Design. (4-0) Cr. 4. S. Prereq: Phys 227. Basic concepts of ergonomics and work design. Their impact on worker and work place productivity and cost. In-depth investigations of work physiology, biomechanics, anthropometry, work methods, and their measurement as they relate to person-machine systems.

I E 298. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

I E 305. Engineering Economic Analysis. (3-0) Cr. 3. F. Prereq: Math 166. Analysis of economic decisions related to planning, developing, and managing engineering projects. Time value of money, evaluating alternative projects; decisions involving capital expenditures in private and public sectors. Nonmajor graduate credit.

I E 312. Optimization. (3-0) Cr. 3. F. Prereq: Math 266. Concepts, optimization and analysis techniques, and applications of operations research. Formulation of mathematical models for systems, concepts, and methods of improving search, linear programming and sensitivity analysis, network models and integer programming. Nonmajor graduate credit.

I E 313. Stochastic Analysis. (3-0) Cr. 3. F. Prereq: Math 266, Stat 231. Development of basic queuing models and related applications. Use of simulation for some applications. Project involving data collection analysis of a queuing system is required. Nonmajor graduate credit.

I E 341. Production Systems. (3-0) Cr. 3. S. Prereq: Stat 231. Introduction to key concepts in the design and analysis of production systems. Topics include inventory control, forecasting, material requirement planning, project planning and scheduling, operations scheduling, and other production systems such as Just-In-Time (JIT) and warehousing. Nonmajor graduate credit.

I E 348. Solidification Processes. (2-2) Cr. 3. S. Prereq: I E 248. Theory, applications, and quality issues related to metal casting, welding, polymer processing, and other solidification processes. Use of CAD and process modeling software. Nonmajor graduate credit.

I E 361. Quality Control. (Same as Stat 361) (3-0) Cr. 3. S. Pr. F. Stat 231 or 401. Techniques for controlling the quality of products and services. Techniques for improving quality through process control. Project involving design of quality system. Nonmajor graduate credit.

I E 375. Introductory Production Systems. (3-0) Cr. 3. S. Prereq: Junior classification, Math 160 or 166. Principles and concepts in the design and control of production systems, including demand forecasting, fixed and variable capacity planning, master production scheduling, inventory control, types of production and work flow systems, quality control, and project management. Nonmajor graduate credit.

I E 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: 298, permission of department. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

I E 408. Interdisciplinary Problem Solving. (Same as E E 408, I Tec 408) (3-0) Cr. 3. F. S. Prereq: Junior or senior standing. Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, project management are compared to traditional solutions. Strategy for improvements discovered using simulations and group projects. Nonmajor graduate credit.

I E 419. Manufacturing Systems Modeling. (3-0) Cr. 3. F. Prereq: Stat 231. Modeling material handling systems, inventory systems, and production systems for performance analysis. Introduction to analysis, simulation, and physical models of manufacturing systems. Simulation languages such as ARENA, AweSim, and ProModel. Nonmajor graduate credit.

I E 436. Introduction to Reliability Engineering. (3-0) Cr. 3. F. Prereq: Senior classification, Stat 231 or 401. Mathematical basics for dealing with reliability data, theory and analysis of load and strength, and systems reliability prediction methods to assure reliably designed systems. Reliability demonstrations and reliability growth monitoring. Fault tree and event tree analysis. Nonmajor graduate credit.

Courses and Programs Industrial Engineering 263
Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

(An undergraduate student must have an academic standing in the upper one-half of his/her class to enroll in any 500-level industrial engineering course.)

I E 508. Design and Analysis of Allocation Mechanisms. (3-0) Cr. 3. S. Prereq: 312 or Math 307. Market-based allocation mechanisms from quantitative economics perspective. Pricing and costing models designed and analyzed with respect to decentralized decision processes, information requirements, and coordination. Case studies and examples from industries such as regulated utilities and semiconductor manufacturers.

I E 512. Introduction to Stochastic Production Systems. (3-0) Cr. 3. S. Prereq: 313. Modeling techniques to evaluate performance and address issues in design, control and operation of systems; Markov models of single-stage made-to-order and made-to-stock systems, approximations for non-Markovian systems; impact on inventory and process control systems. Offered 2001.

I E 514. Production Scheduling. (Same as Stat 514.) (3-0) Cr. 3. S. Prereq: 312, 314. Introduction to the theory of machine shop systems. Complexity results for various systems such as job-shop, flow and open shops. Applications of linear programming, integer programming, network analysis. Enumerative methods for machine sequencing. Introduction to stochastic scheduling.

I E 519. Simulation Modeling and Analysis. (3-0) Cr. 3. Prereq: E E 521 or I E 519. (Dual-listed with 519.) Stochastic modeling of production, scheduling, group technology, robotics, facilities design, and process control. Knowledge representa-tion, search, and predicate calculus.

I E 520. Knowledge Based Manufacturing Systems. (3-0) Cr. 3. S. Prereq: 419 or 465 or Com S 472. Knowledge-based systems as applied to automated manufacturing systems. Process planning, group technology, robotics, facilities design, and process control. Knowledge representa-tion, search, and predicate calculus.

I E 521. Biomechanics. (Same as BME 521, E M 521.) (3-0) Cr. 3. F., offered 2001. Prereq: Phys 111 and 211. Material with interest in the life sciences, ergonomics, or rehabilitation engineering. Topics include equilibrium, motion, energy, stress and deformation, material properties, flow of fluids, dimensional analysis and modeling of biologi-cal systems. Illustrative examples taken from biology and medicine.

I E 533. Reliability. (Same as Stat 533.) See Statistics.

I E 539. Game Theory. (Same as Stat 539.) See Statistics.

I E 541. Inventory Control and Production Planning. (3-0) Cr. 3. S. Prereq: 341. Economic Order Quantity, dynamic lot sizing, newsboy, base stock, and (Q,T) models. Material Requirements Planning, JIT, variability in demand and production, push and pull production systems, aggregate and workforce planning, and capacity management.

I E 565. Systems Engineering and Analysis. (Same as AER 655, E E 655.) (3-0) Cr. 3. F. Prereq: Graduate classification in engineering. Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and prac-tice of systems engineering as applied to large inte-grated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engi-neering planning and organization. Not available for degrees in industrial engineering.

I E 566. Applied Systems Engineering. (3-0) Cr. 3. S. Prereq: E E/Aer E/I E 565. Design for reliability, maintainability, usability, supportability, producibility, disposability, and life cycle costs in the context of the systems engineering process. Students will be required to apply the principles of systems engineer-ing to a project including proposal, program plan, sys-tems engineering management plan, and test and evaluation plan. Not available for degrees in industrial engineering.

I E 590. Special Topics. Cr. 1 to 5 each time elected. Prereq: Senior classification, permission of instructor. Independent study and work in the areas of industrial engineering design, practice, or research. A. Manufacturing B. Human Factors C. Operations Research D. Enterprise Computing and Information Management E. Engineering Management H. Honors

I E 498. Cooperative Education. Cr. 3. F.-S.-S. Prereq: 298, permission of department. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses and Programs Industrial Engineering 2001-2003
A student majoring in industrial relations will choose a major professor from the graduate faculty of the cooperating departments. The student's program of study will be developed with the guidance of an advisory committee selected by the student and the major professor, and approved by the chair of the Industrial Relations Supervisory Committee. Students may elect the thesis option (consisting of 30 semester-hour credits) or the nonthesis option (consisting of 36 semester-hour credits).

Regardless of which option is taken, all students must take the following core courses: Econ 320, Econ 322, Mgmt 570, Mgmt 571, and Stat 401. For students enrolled in the nonthesis option, the research component of their degree program will be satisfied via the completion of a 6-credit thesis. The balance of the program of study for students in either option will consist of electives from the recommended courses in the industrial relations curriculum, with a maximum of four courses in any one department. A minimum of 12 semester credits must be taken from 500-level (or above) courses. In general, the degree program in industrial relations is designed to be as flexible as possible to support the student's own professional interest. Satisfactory completion of a final comprehensive oral examination is required of all students. As part of their graduate education, students enrolled in the nonthesis program have the option of enrolling in an off-campus internship program.

Courses appropriate for the master of science degree are determined by the student's program of study committee. Sample recommended courses for graduate students majoring in industrial relations include: Econ 320, 322, 590; Fin 555; I Tec 504, 506; Mgmt 501, 507, 511, 512, 570, 571, 573, 575, 579; MIS 503; Pol S 547, 571, 572, 573, 574, 575, 576, 590; Psych 440, 450, 550, 590, 623, Soc 420, 511, 528, 529, 530, 532, 5805, 642, Stat 401, 402. See departmental listings for course descriptions and credits.

Courses for Graduate Students

I R 598. Internship. Cr. 1 to 6 each time taken, maximum of 6. Prereq: Graduate enrollment in industrial relations. Internship designed for work exposure in a human resource or labor relations department of a private or public employer. Not recommended for students already having had such work experience. Offered on a satisfactory-fail grading basis only.

I R 599. Creative Component. Cr. 3. Preparation and writing of creative component. Offered on a satisfactory-fail grading basis only.

I R 699. Research. Cr. 1 to 6 each time taken, maximum of 6. Offered on a satisfactory-fail grading basis only.

Industrial Technology

(Administered by the Department of Industrial Education and Technology)

Daniel L. Householder, Chair of Department

Professors: Dyrenfurth, Householder, Smith

Associate Professors: Chen

Assistant Professors: Bradshaw, Chang, Field, Freeman

Instructors (Adjunct): Drake, Inyang

Undergraduate Study

For the undergraduate curriculum in industrial technology leading to the degree bachelor of science, see College of Education, Curricula.

The industrial technology curriculum provides preparation for employment in industry or business, in manufacturing (quality, production supervision, process planning, tooling, etc.), and occupational safety (safety engineer, loss control specialist, safety director, etc.).

Graduates understand the properties of basic manufacturing materials, the commonly used manufacturing processes, and the legislative and regulatory issues affecting manufacturing. They are skilled in establishing and utilizing groups for problem solving activities. In addition, they are skilled in selecting value added activities from processes that include both value and non-value added steps.

Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in industrial education and technology, and minor work for students taking major work in other departments. Within the industrial education and technology major, a student may emphasize technology education, industrial technology, technical education, training and development or occupational safety.

Prerequisite to major graduate work is preparation equivalent to the completion of the undergraduate curriculum in industrial technology at Iowa State University and adequate evidence that the student ranks above average in scholastic ability.

Graduates have a broad understanding of industrial technologies and are able to communicate effectively with colleagues, industry leaders, career and technology educators, and the general public in both formal and informal settings. They are prepared to carry out research, communicate research results, prepare grant proposals and address complex problems facing manufacturing, safety and health, and training professionals in industry
and education. Graduates are committed to life-long learning and the pursuit of excellence in their chosen field.

The department stipulates no foreign language requirement for either the master of science or doctor of philosophy degree.

Students not electing the thesis option at the master’s degree level will be required to complete a minimum of 3 credits of a creative component project.

Courses open for nonmajor graduate credit: 392, 402, 408, 409.

**Industrial Technology (I TEC)**

**Courses Primarily for Undergraduate Students**

**I Tec 110. Introduction to Industrial Technology.** (1-0) Cr. 1. Qualifications, strategies, assessment, and expectations for students in the major. Academic and degree requirements leading to the degree of bachelor of science in industrial technology along with an orientation to industrial technology as a field of study. Strategies for working together, with faculty, and industrial personnel in a learning community. Development of awareness of individual potential. Career and employment opportunities for graduates.

**I Tec 120. Introduction to Design in Industrial Technology.** (1-0) Cr. 3. Basic systems for representing size and shape descriptions, national and international standards for documentation and contemporary design models and practices are covered. AutoCAD and Mechanical Desktop are the primary software tools.

**I Tec 130. Introduction to Non-metallic Manufacturing Materials and Processes.** (1-4) Cr. 3. An introduction to selected non-metallic materials used in manufacturing and the related processes. Laboratory and lecture activities focus on the understanding of thermal, chemical, electrical, and mechanical properties of non-metallic materials and related industrial processes.

**I Tec 140. Electrical Fundamentals.** (1-4) Cr. 3. Prereq: Math 160. Electrical phenomena will not include but be limited to Ohm’s, Kirchoff’s, and Power Laws. Thévenin and Superposition Theorems will be presented. Students will become familiar with concepts of frequency, various wave forms and various loads. Concepts of phase angle, transient timing, and step up/step down of voltages and current will be introduced. Safety issues concerning the use of electricity and electrical equipment will also be introduced.

**I Tec 202. Introduction to Training and Development in Industry and Business.** (3-0) Cr. 3. A systematic overview of the training and development function and its essential role in today’s organizations. Systems theory, needs assessment, learning objectives, learning theories, training program development, delivery, transfer and evaluation are introduced.

**I Tec 216. Computer Applications in Industrial Technology.** (2-2-0) Cr. 3. Provides a working knowledge of microcomputers and their application in industrial technology. Emphasis on computer language useful in manufacturing.

**I Tec 224. Advanced Technical Graphics, Interpretation, and CAD.** (2-4) Cr. 4. Prereq: 120. Advanced design systems incorporating 2D and 3D design and productivity tools for use in manufacturing settings. Topics include: Geometric Tolerancing, 3D models, planar and coordinate systems, solid modeling, feature based design, assemblies, ProEngineer software.

**I Tec 231. Introduction to Metallic Materials and Processes.** (1-4) Cr. 3. A study of selected metallic materials and related processes used in manufacturing. Lecture and laboratory activities focus on metallic materials, properties, and processes. Field trip.

**I Tec 240. Analog Manufacturing Applications.** (1-4) Cr. 3. Prereq: 140. Amplification fundamentals for voltage, current, and power. Amplification techniques and delivery methods for bipolar junction, Field effect transistors, Operational amplifiers, and Darlington configurations applied to impedance matching of sensors and relays and for motor control. Split Power supplies will be introduced for developing op-amp circuits.

**I Tec 244. Integrated/Mechanical Fluid Systems.** (1-4) Cr. 3. Prereq: 140. Modern mechanical/fluid power systems. Includes laws of mechanics, components, circuits, and instrumentation. Emphasis on control and utilization.

**I Tec 270. Principles of Injury Prevention.** (3-0) Cr. 3. Basic foundations of accident causation and prevention in home, motor vehicle, public, and work environments.

**I Tec 272. Introduction to Occupational Safety.** (2-0) Cr. 2. F.S. Introductory level to first aid and health and safety education and management. Includes accident investigation and response.

**I Tec 296. Fire Protection and Prevention.** (3-0) Cr. 3. Prereq: 272. An overview of the current problems and technology in the fields of fire protection and fire prevention. Strategies for safety and health needs, focusing on the individual with industrial safety responsibilities.

**I Tec 330. Polymer and Composite Processing.** (1-4) Cr. 3. F.S. Prereq: 130 or equivalent. Design and production of plastic parts including thermoplastics and thermoset/composites. A study of plastic properties and their relationships to processing parameters and control techniques. Application of advanced CAE technology to check process feasibility, determine optimal process conditions, evaluate part and mold designs, and estimate the cost of plastic injection processes.

**I Tec 336. Automated Manufacturing Processes.** (2-2) Cr. 3. Prereq: 224, 231. NC programming operations for CNC milling and lathes. The transfer of parts descriptions into detailed process plans, tool selection, and NC machine codes. Computer-assisted CAD/CAM NC programming for 2D machining is emphasized. Verification is accomplished through laboratory work.

**I Tec 340. Digital Manufacturing Applications.** (1-2) Cr. 2. Prereq: 240. Logic gates, truth tables and applications for hardwired industrial controls, digitally controlled stepper motors and sequential logic circuits, A/D, D/A conversion, decoding and multiplexing.

**I Tec 360. Total Quality Improvement.** (3-0) Cr. 3. Prereq: Stat 101, junior classification. Application of the Deming methodology to establish a defect prevention system for a type of work activity. Focus on customer, participative management through teamwork; emphasis on continuous improvement; application of SPC methods using problem-solving models.

**I Tec 390. Construction Safety.** (2-0) Cr. 2. Prereq: 272. Identifies the hazards to life and property, particularly to the workers in the construction industry. Includes the use of equipment, fall protection, and excavation, for both construction and operational hazards.

**I Tec 392. Safety in Manufacturing.** (3-0) Cr. 3. Prereq: 270. Identifies safety and health risks in industrial work environments, particularly to workers in manufacturing industries. Includes the prevention of workplace exposures, and the safe use of equipment for materials handling and production operations. Nonmajor graduate credit.

**I Tec 394. Legal Aspects of Occupational Safety and Health.** (3-0) Cr. 3. Prereq: 272. Legal implications of legislation as it applies to health and safety in the workplace.

**I Tec 402. Facilitation of Workplace Learning.** (3-0) Cr. 3. Application of theories of learning and motivation; effective participative learning facilitation and delivery techniques; application of learning styles; learner goal-setting and feedback; and the incorporation of learning to learn skills are explored and practiced for the purpose of preparing workplace learning facilitators. Nonmajor graduate credit.

**I Tec 408. Interdisciplinary Problem Solving.** (Same as I E 408, E E 408) (3-0) Cr. 3. Prereq: Junior or senior standing. Use the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning, and effective delegation in the context of engineering/business systems. Team projects are aimed at improving design outcomes. Nonmajor graduate credit.

**I Tec 409. Interdisciplinary Systems Effectiveness.** (Same as I E 409, E E 409) (3-0) Cr. 3. Prereq: Junior or senior standing. Focus on functions that determine the effectiveness of an entire organization. Generic solutions to production, distribution, project management are compared to traditional solutions. Strategy for improvements discovered using simulations and group projects. Nonmajor graduate credit.

**I Tec 410. Facility Planning.** (3-0) Cr. 3. Prereq: 120 or equivalent; Stat 101. Principles and practices in designing, evaluating, and organizing existing facilities or creating new facilities. Evaluation of design/analysis, layout, development, material handling, and office design. Field trip.

**I Tec 423. Statics and Strength of Materials for Industrial Technology.** (1-4) Cr. 3. Prereq: 224, Phys 111. Application of the analytical techniques of solving problems related to force and moments. The properties of materials and how to select appropriate materials for a particular design. Stress, strain, torsion, bending of beams.

**I Tec 435. Computer for Automated Manufacturing Systems.** (2-2) Cr. 3. Prereq: 236, 240. Reviews principles and concepts required for implementation of automated production techniques and for design of manufacturing systems. Includes sensors and sensing systems, numerical control, robotics, CAD/CAM, simulation, manufacturing economics. Emphasis on computer technology as “tools” to improve production and control needs.

**I Tec 440. Electrical Outputs for Manufacturing.** (1-2) Cr. 2. Prereq: 240. Control of machines by program, sensors, logic and switches, distribution of power, A.C. and D.C. motors, electrical/mechanical relays, and solid state relays.

**I Tec 446. Automation Systems.** (3-0) Cr. 3. Prereq: 240. Theory and applications of automation systems technology. Emphasizes features, capabilities, programming and evaluation of sensors, programmable logic controllers, and robots.

**I Tec 470. Industrial Hygiene: Chemical and Biological Hazards.** (3-0) Cr. 3. Prereq: 272; Chem 160, 163. A consideration of health related problems found in the industrial setting with emphasis on toxic chemicals, ventilation, and noise.

**I Tec 471. Industrial Hygiene: Physical Hazards.** (2-2) Cr. 3. Prereq: 272; Chem 163, 163L. The use and calibration of instruments designed to measure the quality and quantity of contaminants in the work environment.

**I Tec 475. Safety Analysis and Design.** (1-2) Cr. 2. Prereq: Instructor approval. Students review the use of systems safety as a management technique to control risk. Individual safety and health design/development projects are completed in conjunction with faculty or a business/industry partner.

**I Tec 480A. Supervised Industrial Cooperative Experience.** Cr. 2. May be repeated for credit. Prereq: 395 and permission of cooperative coordinator.
Courses and Programs

Information Assurance

(Interdepartmental Graduate Major)

Supervisory Committee: J. Davis (Chair), D. Jacobson, J. Wong, D. Norris.

Work is offered for the degree Master of Science with a major in Information Assurance under a cooperative arrangement with various departments including Electrical and Computer Engineering, Computer Science, Political Science, Logistics, Operations, and Management Information Systems, Mathematics, Industrial and Manufacturing Systems Engineering. Students graduating from the major will help to fill the need for well-educated system security specialists in the government, private sector, and academia. The program objectives identified as being critical to the accomplishment of this mission are: (1) impart and enhance knowledge about information infrastructure security; (2) Expand and develop ability to engineer complex systems; (3) Instill and nurture social awareness, and the ability to function in a team; (4) Instill and nurture a sense of ethics; and (5) Develop an understanding of strategic and policy issues.

Students interested in the interdepartmental major apply and are admitted to both a home department (the department that is most closely aligned with the student’s research interest and background) and to the program. The home department sets the admissions standards, course requirements, and thesis standards.

The program is broadly based and uses courses in the various departments. The program will consist of 24 course credits with 6 credits of research work for a Master of Science with thesis. A non-thesis Master of Science will consist of 27 credits of courses and 3 credits of research work for a Master of Science with non-thesis. A non-thesis Master of Science will consist of 24 course credits with 6 credits of research work for a Master of Science with thesis. A non-thesis Master of Science will consist of 27 credits of courses and 3 credits of creative component. The courses are divided into three categories: core, electives, and thesis.

A student’s Program of Study Committee, in consultation with the student, determines the elective courses to be taken and the acceptability of transfer credits. The major professor will be selected from the discipline where the student is admitted (home department).

The basic prerequisite for admission to this program is a baccalaureate degree in engineering, mathematics, computer science, management information systems, political science, or closely related field. The GRE examination may be required based on the

I Tec 490. Independent Study in Industrial Technology. Cr. 1 to 5. Prereq: Qualifying average of 2.5 or more for two preceding semesters and completion of an independent study contract. H. Honors M. Manufacturing O. Occupational Safety

I Tec 493. Workshop in Industrial Technology. Cr. 1 to 4 each enrollment. Prereq: 18 credits in industrial technology. Extension of technical competence in emerging technologies.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Prior to registration for graduate-level courses, the student shall be classified as a senior or have an earned bachelor’s degree, and be required to complete additional assigned readings, term papers, and graduate projects.

I Tec 502. Advanced Design and Manufacturing. (3-0) Cr. 3. Prereq: Permission of instructor. An integrated study of entrepreneurship, the development of new products, organization of production, production control, and business planning in contemporary manufacturing settings. Topics include market analysis, design, prototyping, quality functional deployment in process and product design, benchmarking, Kaizen, cost estimation, marketing strategies, documentation for productivity and quality strategies.

I Tec 504. Principles of Training and Development. (3-0) Cr. 3. Prereq: Graduate classification. An examination of the training and development function in the modern industry, and business and the advancement of competencies in analysis, design, development, implementation, and evaluation of training in conjunction with analysis and synthesis of theoretical perspectives.

I Tec 506. Facilitating Change Through Training and Development. (3-0) Cr. 3. Prereq: Graduate classification. Change and the change process, diagnosing and designing planned change, investigating various transformation theories and methodologies, and team development. Opportunities to apply knowledge in experiential learning environment.

I Tec 509. Interdisciplinary Systems Thinking. (Same as E E 509.) (3-0) Cr. 3. Prereq: Junior or senior standing. Student does an extensive individual project using the systematic thought processes of Theory of Constraints to solve and implement the solution to a problem in their current reality. Groups scrutinize and improve each other’s work.

I Tec 510. Technology Teaching. (2-0) Cr. 2. Prereq: Permission of instructor. Teaching and learning implications and strategies in technological settings. Focuses on trends, instructional planning, execution, collaborative-team based learning, learning to learn, and integrating workplace activities.

I Tec 514. Foundations of Industrial Technology. (2-0) Cr. 2. Prereq: Graduate classification. Historical development and philosophy.

I Tec 535. Comprehensive Modern Manufacturing Systems. (3-0) Cr. 3. Prereq: Permission of instructor. The study, design, and implementation of PULL manufacturing systems and their integration with functions of the production system for the manufacture of superior quality, low cost products. Topics include: cellular manufacturing systems, system integration, cost estimation/justification, dynamic cost control, JIT manufacturing, integrated quality, inventory control, automation, and CAD/CAM.

I Tec 549. Internship in Industrial Technology. (arr.) Cr. 1 to 4 each enrollment. Prereq: 10 hours in industrial technology. Emphasis on full experience in Industrial Technology, Training and Development, and Technical Education as it relates to administration-monitoring, special needs, curriculum-instruction, and evaluation-research.

I Tec 554. Philosophy, Evolution, and Future of Industrial Technology. (3-0) Cr. 3. An evaluation of educational and industrial thought. Historical and philosophical development of Industrial Technology, Training and Development, and Technical Education to the present and future; trends, implications, and issues analyses.

I Tec 580. Applied Techniques in AutoCAD. (2-2) Cr. 3. Prereq: Graduate classification. Exploration of computer graphics, design and drafting applications using AutoCAD. Complete two-dimensional concepts of data entry, editing, screen display, layering, libraries, dimensions, and plotting. Three-dimensional coordinate systems, 3D entity creation, editing, and solid modeling will be introduced.

I Tec 590. Special Topics in Industrial Education and Technology. Cr. 1 to 4. Prereq: Graduate classification in industrial technology.

M. Manufacturing O. Occupational Safety T. Training and Development

I Tec 593. Workshop in Industrial Technology. Cr. 1 to 3 each enrollment. Prereq: Graduate classification.

I Tec 599. Creative Component. Cr. 1 to 3. A discipline-related problem to be identified and completed under the direction of the program adviser. Three credits required for all nonthesis master’s degree students.

Courses for Graduate Students

I Tec 615. Seminar, Cr. 1 each enrollment. Process of selecting, developing and writing a research proposal. Forum for dealing with professional and academic needs and issues.

I Tec 652. Program and Learner Evaluation. (3-0) Cr. 3. Prereq: Stat 401 or equivalent. Techniques for evaluating learners, faculty, programs, and staff utilizing theories for developing measurement instruments. Outcomes assessment and return on investment (ROI) are emphasized.

I Tec 655. Academic Leadership in Technology. (3-0) Cr. 3. Prereq: Permission of instructor. A definition of the faculty role in engineering technology as a discipline, including strategies for dealing with programs, personnel, and constituencies are presented. Leadership skills involving team formation, team operation, and conflict resolution are addressed.

I Tec 657. Curriculum Development in Industrial Technology. (3-0) Cr. 3. Prereq: 15 credits in industrial technology. Basic concepts, trends, practices, and factors influencing curriculum development, techniques, organization and procedures. Emphasis will be given to program/course of study and training plan development.

I Tec 699. Research. Cr. arr.
The committee also aids the student in planning toward the total of 35 graduate credits. The maximum of five credits of IGS 599 may be counted in the total graduate subject matter areas, each subject contributing a minimum of nine credits toward the 35 graduate credits required for the bachelor of arts or the bachelor of science degree. Students who specialize in a single subject. Areas of specialization in arts and humanities, biological and physical sciences, international development studies, physical sciences, social sciences, and a general area are designed to broaden and supplement a student’s program. Students must take courses in three different graduate subject matter areas, each subject contributing a minimum of nine credits toward the 35 graduate credits required for the degree. Courses which may be used for credit toward this degree program are selected from those listed in the Graduate College Catalog for graduate credit.

Both thesis and nonthesis options are available except in arts and humanities in which a thesis is required. If the thesis option is chosen, a minimum of three credits of IGS 699 (Research) is required and a maximum of five credits of IGS 699 may be counted in the total of 35 required credits. If the nonthesis option is elected, evidence of original creative effort must be presented. This may be in the form of a demonstration of independent creativity such as a written report of laboratory, field, or library research; a project in fine arts; or some other original contribution acceptable to the student’s committee. In the nonthesis option a minimum of three credits of IGS 599 (Creative Component) is required and a maximum of five credits of IGS 599 may be counted toward the total of 35 graduate credits. The student, in consultation with the program of study committee, will decide on the option. The committee also aids the student in planning a program of study and in selecting appropriate courses.

Foreign language requirements, if any, will be decided by the student’s committee. Graduates will have experience in designing their own program centered around issues they have identified. Because of the interdisciplinary nature of IGS, students are expected to synthesize knowledge from three different areas of study. Students who wish to apply for admission to interdisciplinary graduate studies should communicate with the chair of the program, the chair of the supervisory committee or one of its members (see above).

Courses for Graduate Students
IGS 599. Creative Component. Cr. var.

Interdisciplinary Studies

A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The major is designed by a faculty review board, the academic adviser, and student. Leading to either the bachelor of arts or the bachelor of science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more departments. This specialized area is identified on the diploma.

A student seeking admission to the program in interdisciplinary studies writes a letter of application that explains how the proposed major meets specific educational goals. Applications are screened by a faculty review board. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the review board in the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student’s educational goals cannot be accommodated by a more traditional combination of existing majors, minors, and electives.

Students who wish to prepare for professional schools in health-related fields and students who wish to develop an area of interest based upon one of the College’s cross-disciplinary programs may wish to propose a degree in Interdisciplinary Studies. Areas of interest in Interdisciplinary Studies have included Classical Studies, International Relations, Ecology Studies, African American Cultural Studies, Asian Studies, and U.S. Latino/a Studies.

The interdisciplinary studies major must satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences. With the approval of the review board, the student will identify courses leading to either the B.A. or the B.S. degree. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S.) Different requirements for the B.A. and B.S. degrees are determined by the nature of the chosen field of study.

Courses listed in the major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major must come from degree-offering departments within the College of Liberal Arts and Sciences.
3. The courses must be chosen from at least two disciplines.
4. The courses chosen for the major must be at the 200 level or higher. Overall, the degree program must include 45 credits at the 300 level or higher, with at least 6 credits at the 400 level or higher.
5. An average grade of C or better must be earned in 15 credits at the 300 level or higher in the major.
6. The university diversity and international perspectives requirement may be met by choosing two 3-credit courses from the approved list.

The following English proficiency requirements apply:

1. An average grade of C or better is to be earned in Engi 104 and 105. If this grade is not achieved, the student will be required to take an additional writing course as appropriate and earn a grade of C or higher.
2. A grade of C or better must be earned in either an advanced English composition course or a course in the major with a significant writing component.

Further information may be obtained from the college office.

International Agriculture

(Interdepartmental Undergraduate Program)

Supervisory Committee: Robert A. Martin, Chair; Ricardo Salvador; Elwood Hart; Anthony Pompetto III; Robert Andrews

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program; governmental and non-governmental development agencies, agribusi-
inesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program focus on developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

Secondary Major
International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

See International Agriculture, Curriculum, for the specific program. Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Minor
A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and agricultural systems.

Courses for the minor should come from the following list: Internship; Study Abroad; Foreign Language; Agron 342; TSC 341; Pol S 241; Agron 406X; Econ 370; and Econ 385. Nine credits of the 15 credit total for the minor can not be used for meeting requirements for the major.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses required for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

International Business
Interdepartmental Undergraduate Secondary Major
Supervisory Committee: Mary Anderson (contact person) and others annually appointed by College.

The international business program is designed to provide students with information that will enable them to work for companies that are involved with international business. Students are expected to develop an understanding of international business issues applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The program is designed to prepare students for employment in multinational companies and for business assignments beyond the United States.

International business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing this program should strengthen their placement opportunities with multinational corporations.

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.

International Studies
(Interdepartmental Undergraduate Major and Minor)
University International Studies
Supervisory Committee: Steffen W. Schmidt (LAS), Chair; T. Barta (Engineering), B. Hand (Education), W. Grundmann (Design), S. Hendrich (FCS), D. Acker (Ag), K. Platt (Vet Med), H. Van Auken (Business), T. Weber (Faculty Senate), two student members

The international studies program provides opportunities for students to develop skills and understanding about international events, issues, and problems. Each college has specific requirements. Students will be advised by the representative from the college of their primary major on the Supervisory Committee (see above).

International studies students are strongly encouraged to participate in a study abroad program. Planning should occur early in a student’s academic career. Options include participating in one of ISU’s study abroad programs, enrolling in a foreign university with which ISU has an exchange agreement, or participation in programs offered through other institutions. The Study Abroad Resource Center in the International Educational Services (IES) has information on specific offerings as well as materials on financial assistance or see your college international adviser.

A secondary major and a minor in international studies are available for undergraduates. The program requirements are outlined below. The international studies program is designed for students who wish to prepare for work in international careers, such as in foreign service, journalism, advocacy organizations, scientific or research institutions, multinational and international business, development projects, humanitarian agencies, environmental organizations, human rights and women’s groups, think tanks, international agriculture, engineering, and other fields.

Secondary Major
The international studies major may be taken only as a secondary major program (i.e., together with another major) in most colleges except Family and Consumer Sciences where it may also be a primary major.

A student seeking a secondary major in international studies must successfully complete a minimum of 24 credits in courses approved for use in the international studies program, including University Studies 235 and 430. Normally, courses used in the major should be related and follow a theme. The member of the University International Studies Supervisory Committee in the college of the student’s primary major degree program (see above) can provide a list of approved courses.

In addition to the 24 credits in approved courses, a student seeking a secondary major must demonstrate the equivalent of two years of university-level study in one language in addition to English. A student whose language is other than English must pass Engl 105 with a grade of C or better.

majors participating in a study abroad program, may petition to use up to nine credits of work to meet the 24-credit requirement in international studies courses.

Minor
A student seeking a minor in international studies must successfully complete a minimum of 15 credits in courses approved for use in the international studies program, including University Studies 235 and 430. Normally, courses used for the minor should be related and follow a theme. Interested students should see a representative of the University International Studies Supervisory Committee in the college of their primary major or degree program (see above) for the list of approved courses.

In addition to the 15 credits in approved courses, a student seeking a minor must demonstrate the equivalent of one year of university-
level study in one language in addition to English. A student whose language is other than English must pass Engl 105 with a grade of C or better.

Minors who study abroad may petition to use up to four credits of work to meet the 15-credit requirement in international studies courses. Students interested in the minor should consult with the representative of the University International Studies Committee from the college of the student’s primary major or degree program.

**International Studies (IntSt)**

Procedures for obtaining credit for international study programs vary by program. In some, such as exchange programs, students enroll in the foreign institution and transfer credit back to Iowa State University. In international study programs designed for specific majors, students enroll in specified Iowa State University courses within the appropriate departments. In others, students may obtain Iowa State University credit through enrollment in the international study courses listed below.

Information about international study opportunities, requirements, and procedures for obtaining university credit may be obtained from academic advisers, college representatives to the University International Studies Supervisory Committee, or the Study Abroad Resource Center located in the International Educational Services (IES).

**Courses Primarily for Undergraduate Students**

*IntSt 120. Study Abroad Credit.* (Same as U St 120.) Cr. var. Prereq: Permission of the program coordinator. ISU offers numerous opportunities for study abroad. Please contact the Study Abroad Resource Center or your academic advisor for current programs.

*IntSt 220. Study Abroad Credit.* (Same as U St 220.) Cr. var. Prereq: Permission of the program coordinator. ISU offers numerous opportunities for study abroad. Please contact the study abroad center or your academic advisor for current programs.

*IntSt 235. Introduction to International Studies.* (Same as U St 235.) 3-0 Cr. 3. F SS. Overview of international studies, emphasizing cultural, geographical, economic, and political characteristics of major world areas, and nations.

*IntSt 320. Study Abroad Credit.* (Same as U St 320.) Cr. var. Prereq: Permission of the program coordinator. ISU offers numerous opportunities for study abroad. Please contact the Study Abroad Resource Center or your academic advisor for current programs.

*IntSt 420. Study Abroad Credit.* (Same as U St 420.) Cr. var. Prereq: Permission of the program coordinator. ISU offers numerous opportunities for study abroad. Please contact the Study Abroad Resource Center or your academic advisor for current programs.

*IntSt 430. Seminar in International Studies.* (Same as U St 430.) 3-0 Cr. 3. S. Capstone seminar in international studies focused on economic development, women’s issues, war and ethnic conflict, population, the environment, globalization, human rights, international trade and business and other issues. Students develop a project on a subject linked to their area of professional interest or academic specialization.

Lee Burras (Agronomy, Iowa State University), C. Arthur Croyle (Art and Design, Iowa State University), Paul J. Currier, (Director, Platte River Whooping Crane Maintenance Trust), James J. Dinsmore (Animal Ecology, Iowa State University), John F. Doershuk (Anthropology, University of Iowa, and State Archaeologist), Charles Drewes (Zoology and Genetics, Iowa State University), Steven M. Herrnstadt (Art and Design, Iowa State University), Laura L. Jackson (Biology, University of Northern Iowa), Kenneth L. Lang (Biological Sciences, Humboldt State University), Michael J. Lannoo (Muncie Center for Medical Education, Ball State University), David R. Mercer (Biology, University of Northern Iowa), Clay L. Pierce (Animal Ecology, Iowa State University), Thomas R. Rosburg (Biology, Drake University), Michael J. Shott (Sociology, Anthropology, and Criminology, University of Northern Iowa), Daryl D. Smith (Biology, University of Northern Iowa), Sarah A. Spaulding (Diatom Collection, California Academy of Sciences), Eugene F. Stoermer (Center for Great Lakes, University of Michigan), Lois H. Tiffany (Botany, Iowa State University), Joseph A. Tiffany (Anthropology, Iowa State University), U. Sunday Tim (Ag/Biosystems Engineering, Iowa State University), James L. Wee (Biological Sciences, Loyola University).

Iowa Lakeside Laboratory is a field station run cooperatively by Iowa State University, the University of Northern Iowa, and the University of Iowa through the State Board of Regents.

The Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially those of the Iowa Great Lakes region with its numerous lakes, wetlands, and prairies. Its campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside’s mission is to provide undergraduate and graduate students an opportunity to get hands-on experience working with a variety of natural and human environments through its field-oriented summer courses and to provide research facilities and support for graduate students and faculty working on research projects in northwestern Iowa.

Each summer, Iowa Lakeside Laboratory offers students a unique educational experience: small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, evolution, geology, taxonomy). All courses meet all day from Monday through Friday. The majority of courses run for either 3 or 4 weeks.

Enrollments in most courses are limited to 8 to 10 students. Courses are taught at the undergraduate (sophomore and junior) and the senior/graduate level. Students obtain one credit for each week (40 hours) in class. One and two week courses are also available, including courses designed especially for teachers. Weather permitting, students normally spend at least part of each day doing field work, either as part of their class work or working on individual or group projects.

Because there are courses offered only alternate summers, the current Iowa Lakeside Laboratory Bulletin or Iowa State University Summer Session Bulletin should be consulted for the list of courses being offered in a given summer session. The Iowa Lakeside Bulletin also contains additional information about the Laboratory and about each course being offered.

Research projects by undergraduates, graduate students, and faculty can be done either on the campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at Lakeside and graduate students are welcome to use it as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to take full advantage of its educational, professional, and social life.

**Financial Aid**

Iowa Lakeside Laboratory Scholarships are available to both undergraduates and graduate students. All scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory Scholarships is included in the Iowa Lakeside Bulletin. Students should also consult the Student Financial Aid Office for other scholarship, work study, and loan programs for which they are eligible.

**Registration**

Students can only enroll in Iowa Lakeside courses by submitting an Iowa Lakeside Registration and Scholarship Form and Housing Form to the Iowa Lakeside Laboratory Administrative Office. These forms are found in the Iowa Lakeside Bulletin, which also contains information on current course offerings, and in the Iowa State University Summer Session Bulletin. The Iowa Lakeside Laboratory Bulletin can be obtained from:

**Iowa Lakeside Laboratory**

131 Bessey Hall
Iowa State University
Ames, IA 50011-1020
Phone: (515) 294-2488

Iowa Lakeside Laboratory 271

Courses for Undergraduate Students

**la LL 2051. Flora of the Iowa Lakes Region.** Cr. 2. SS.

**la LL 301I. Iowa Natural History.** (Same as A Ecl 301I, Bot 301I, Zool 301I) Cr. 4. Alt. SS., offered 2003. Prereq: One course in the biological sciences. Biological diversity and its causes examined through lectures, readings, and field trips to native, wetland, forest, and prairie habitats; topics include measuring the environment, sampling and identifying organisms, experimenting with the ecosystem, understanding species interactions, and appreciating influences of past and present climates and geological events on natural ecosystems of the region.

**la LL 302I. Plant-Animal Interactions.** (Same as Bot 302I) Cr. 3. Alt. SS., offered 2002. Prereq: One course in the biological sciences. Introduction to ecology and co-evolution of plants and animals; emphasis on dispersal, pollination, and plant-herbivore interactions; field and laboratory work, reading, discussion.

**la LL 303I. Undergraduate Internships.** (Same as A Ecl 303I) Cr. 1 to 5. SS. Prereq: Permission of instructor and sophomore standing. Placement with county conservation boards, parks, schools, etc. for experience as interpreters, rangers, and technicians.

**la LL 304I. Physical Geology.** (Same as EnSci 304I, Geol 304I) Cr. 4. Alt. SS., offered 2002. Landscape development as a product of geologic materials and processes. Emphasis on field studies of composition of the earth, glaciation, weathering, erosion, and sedimentation.

**la LL 312I. Ecology.** (Same as A Ecl 312I, Biol 312I, Bot 312I, EnSci 312I, Zool 312I) Cr. 4. SS. An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

**la LL 326I. Ornithology.** (Same as A Ecl 326I) Cr. 4. SS. The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress theoretical aspects of population analysis and methodology for population studies.

**la LL 364I. Biology of Aquatic Plants.** (Same as Bot 364I) Cr. 3. Alt. SS., offered 2003. A field-oriented introduction to the taxonomy and ecology of aquatic plants in lakes, wetlands and rivers. Individual or group projects.

**la LL 367I. Plant Taxonomy.** (Same as Bot 367I) Cr. 4. SS. Principles of classification and evolution of vascular plants; taxonomic tools and collection techniques; use of keys. Field and laboratory studies emphasizing identification of local flowering plants and recognition of major plant families.

**la LL 371I. Introduction to Insect Ecology.** (Same as Ent 371I) Cr. 4. Alt. SS., offered 2003. Field and laboratory study of insects, their diversity, life history; emphasis on ecology and behavior.

**la LL 401I. Statistical Methods for Field Biologists.** (Same as Stat 401I) Cr. 4. Alt. SS., offered 2003. Introduction to the design and implementation of ecological and environmental field studies and statistical analyses, interpretation, and presentation of field data. Fundamentals of experimental design; hypotheses testing with continuous and discrete data; simple and multilinear regression and correlation; introduction of analysis of variance; and data presentation. Individuals or group projects will be used to collect field data.

**la LL 402I. Watershed Hydrology and Surficial Processes.** (Same as Agron 402I, EnSci 402I) Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering. Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

**la LL 403I. Evolution.** (Same as Biol 403I, Bot 403I, Zool 403I) Cr. 4. SS. Mechanisms and patterns in microevolution and macroevolution. Field exercises will emphasize studies of natural selection, adaptation, genetic variation, and population genetics of local plant and animal populations. Nonmajor graduate credit.

**la LL 404I. Behavioral Ecology.** (Same as A Ecl 404I, Zool 404I) Cr. 4. Alt. SS., offered 2002. Prereq: Two semesters of biology. Animal coloniality, courtship, territories, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

**la LL 415I. Freshwater Invertebrates.** (Same as Zool 415I) Cr. 3. SS. Prereq: One or more ecology courses. Field-oriented introduction to the identification, life-history, and ecology of common, free-living freshwater invertebrates of north-temperate lakes, rivers, and local lakes. Estuaries of plants and animals in aquatic food chains and litter processing. Nonmajor graduate credit.

**la LL 419I. Vertebrate Ecology and Evolution.** (Same as A Ecl 419I, Zool 419I) Cr. 4. SS. Field and laboratory study of representative vertebrates of northwestern Iowa. Observations and experimenta- tion emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology. Nonmajor graduate credit.

**la LL 420I. Amphibians and Reptiles.** (Same as A Ecl 420I, Zool 420I) Cr. 4. Alt. SS., offered 2002. Prereq: Two semesters of biology. Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction; population and community ecology; and conservation.

**la LL 422I. Prairie Ecology.** (Same as Bot 422I, EnSci 422I) Cr. 4. Alt. SS., offered 2002. Prerequisite: Familiarity with basic principles in biological sciences and ecology. Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects. Nonmajor graduate credit.

**la LL 427I. Archaeology.** (Same as Anthrop 427I) Cr. 4. SS. Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying and excavation techniques. Nonmajor graduate credit.

**la LL 435I. Illustrating Nature. I. Sketching.** (Same as BIPM 435I) Cr. 2. SS. Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

**la LL 436I. Illustrating Nature. II. Photography.** (Same as BIPM 436I) Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

**la LL 461I. Introduction to GIS Landscape Modeling.** (Same as Bot 461I, EnSci 461I, Env S 461I) Cr. 4. Alt. SS., offered 2002. Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management. Nonmajor graduate credit.

**la LL 480I. Introduction to Environmental Planning.** (Same as Env S 480I, LA A 480I) Cr. 4. Alt. SS., offered 2002. Introduction to environmental planning theories and methods, emphasis on environ- mental planning using GIS modeling approaches and public participation in the planning process. Students should have basic familiarity with ArcView and database programs. Individual or group environmental planning projects.

**la LL 484I. Plant Ecology.** (Same as Bot 484I) Cr. 4. SS. Principles of plant population, community, and ecosystem ecology illustrated through studies of native vegetation in local prairies, wetlands and forests. Group or individual projects. Nonmajor graduate credit.

**la LL 490I. Undergraduate Independent Study.** (Same as A Ecl 490I, Anthr 490I, Biol 490I, Zool 490I) Cr. 1 to 4. SS. Prereq: Junior or senior classification and permission of instructor.

**la LL 493I. Natural History Workshop.** Cr. 1 to 2. SS. Offered as demand warrants. Five day-long, non-technical introductions to a specific aspect of the natural history of the Upper Midwest or techniques for studying natural history.

A. Amphibians and Reptiles.
B. Birds and Birding.
C. Nature Photography.
D. Mushrooms and Other Fungi.
E. Iowa’s Trees and Fungi.
F. Fish Biology.
G. Prairies and Prairie Restoration.
H. Common Algae.
I. Common Insects.
J. Aquatic Plants.
K. Life in Rivers.
L. Life in Lakes.
M. Mosses and Liverworts.
N. Natural History of Iowa Great Lakes Region.
P. Field Archaeology.
Q. Snorkeling.
R. Scuba Diving.
S. Sketching Nature.

**la LL 499I. Undergraduate Research.** Cr. 1 to 4. Prereq: Junior or senior classification and permission of instructor.

Courses for Undergraduate Students, Open to Qualified Undergraduate Students

**la LL 501I. Freshwater Algae.** (Same as Bot 501I) Cr. 4. Alt. SS., offered 2003. Structure and taxonomy of freshwater algae based on field collected material; emphasis on genus- and species-level identifications, habitats var- ied include lakes, fens, streams, and rivers; algal ecology.

**la LL 503. Graduate Internships.** Cr. 1 to 5. SS. Prereq: Permission of instructor and graduate standing. Placement with county conservation boards, parks, schools, etc. for experience as inter- preters, rangers, technicians, and teachers.

**la LL 505I. Watershed Modeling and GIS.** (Same as A Ecl 505I, EnSci 505I) Cr. 4. Alt. SS., offered 2003. GIS techniques for watershed hydrologic and water quality modeling and water resource management, including various approaches to watershed analysis, modeling and management; analytical tools for mod- eling watershed hydrology and water quality, and case studies in modeling and managing rural and urban watersheds.

**la LL 508I. Aquatic Ecology.** (Same as A Ecl 508I, EnSci 508I) Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics. Analysis of aquatic ecosys- tems and basic ecological principles; eco- logical theories tested in the field; identification of common plants and animals.

**la LL 511I. Field Parasitology.** (Same as Zool 511I) Cr. 3. Alt. SS., offered 2003. Ecology and life history of parasites, protozoans, helminths, arthropods; field and laboratory investigations including identification, and morphology of representative types and stages; general and comparative concepts of parasitology.

Ia LL 699I. Research.

Courses for Graduate Students

Ia LL 593. Natural History Workshop.

Ia LL 575I. Field Mycology.

Ia LL 535I. Restoration Ecology.

Ia LL 531I. Conservation Biology.

Ia LL 526I. Advanced Field Ornithology. (Same as A Ecl 526I.) Cr. 2. SS. Prereq: Concurrent registration in 3260. Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

Ia LL 531I. Conservation Biology. (Same as Bot 531I.) Cr. 4. Alt. SS., offered 2002. Prereq: 312I. Population- and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

Ia LL 573I. Techniques for Biology Teaching. Cr. 1 or 2 each time taken. SS. Development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A. Animal Biology (Same as A Ecl 573A)
B. Plant Biology
C. Fungi and Lichens
D. Aquatic Ecology
E. Prairie Ecology
F. Wetland Ecology
G. Limnology (Same as A Ecl 573G)
H. Animal Behavior (Same as A Ecl 573H)
I. Insect Ecology
J. Leopold Education Project
K. Project WET (Same as A Ecl 573W)

Ia LL 575I. Field Mycology. (Same as Bot 575I.) Cr. 4. Alt. SS., offered 2002. Identification and classification of the common fungi; techniques for identification, preservation, and culture practiced with members of the various fungal groups.

Ia LL 590I. Ecology and Systematics of Diatoms. (Same as Bot 590I, A Ecl 590I, Anthr 590I, Zool 590I.) Cr. 1 to 4. SS. Prereq: Graduate classification and permission of instructor.

Ia LL 593I. Natural History Workshop. Cr. 1 to 3. Offered as demand warrants. Prereq: Permission of instructor. Graduate workshop on some aspect of the natural history of the Upper Midwest or on techniques for studying natural history.

Courses for Graduate Students

Journalism and Communication, The Greenlee School of

www.greenlee.iastate.edu

John B. Eighmey, Chair of the School

Professors: Abbott, Beell, Eighmey, Emmerson, Peterson, Smith

Professors (Emeritus): Blinn, Boyd, Disney, Friederich, Gillette, Hvistendahl, Kunerth, Schwartz, Shelley, Wechsler

Associate Professors: Coon, Fowler, Geske, Haws, Mack, Prior-Miller, Redmond, Rodriguez

Assistant Professors: Abraham, Appiah, Chadwick, Christen, Kiousis, Patton

Instructors (Adjunct): Vichota

Instructors (Adjunct): Haynes, Witherspoon

Undergraduate Study

The Greenlee School of Journalism and Communication offers work for the bachelor of arts in advertising, the bachelor of arts in communication studies and the bachelor of arts or science degree in journalism and mass communication.

The unit, founded in 1905, has been continuously accredited every six years since 1948 by the Accrediting Council on Education in Journalism and Mass Communications and was reaccredited in 1998. Accreditation, which applies only to the majors in advertising and journalism and mass communication, is based on the principle that students need a broad-based, liberal arts education, as well as a solid core of courses within the discipline. This is why there is both a minimum (33) and a maximum number (40) of credits allowed within the Jl MC and Advrt majors for students graduating with 124.5 credits.

The School encourages students to develop an emphasis or specialization to ensure the depth necessary to succeed in the professional world of communication. Supporting work is within the Jl MC and Advrt majors for students graduating with 124.5 credits.

The School also prepares students throughout the university to be informed media participants and consumers.

To become a journalism and mass communication or advertising major, all students including transfer students, must successfully complete Jl MC 101, 110 and 201. Until these courses are successfully completed, students are designated as pre-majors. There is no pre-major classification or comparable course requirements for communication studies.

English Proficiency Requirement

To graduate as a Jl MC or an Advrt major, the student must either have achieved a score of 26 or higher on the ACT-English examination or passed the School’s own English Usage Test. To meet the University’s English Proficiency requirement, all majors in the School must earn a grade of C or better in English 104 and 105 (or 105H). These additional requirements apply:

Jl MC majors must earn a C+ or better in Jl MC 201

ComSt majors must earn a C+ or better in one additional course from this list: Engl 302, 309, 314, 415.

Jl MC majors must earn a C+ or better in Jl MC 201 and 202 or 206.

The Advertising Major

The advertising major prepares students for graduate education and careers in business and industry. Students majoring in Advrt will find their career opportunities enhanced in professions requiring applied communication expertise. Graduates are qualified for positions in the creative and account sides of advertising within corporations, businesses, and advertising agencies.

To receive a bachelor of arts degree in advertising a student must earn at least 124.5 credits. Of these:

at least 45 credits must be at the 300 and 400 course level,

at least 65 credits must come from the liberal arts and sciences.

a minimum of 33 and a maximum of 40 credits may be taken in Advrt and Jl MC.

The Core for the Advertising Major

Cr. Degree Requirements

Pre-Major Requirements (9 credits)

3 Mass Media and Society, Jl MC 101

R Orientation to Journalism and Communication, Jl MC 110

3 Reporting and Writing for the Mass Media, Jl MC 201

3 Principles of Advertising, Advrt 300

Major Requirements (15 credits)

3 Audience Identification, Advrt 301

3 Law of Mass Communication, Jl MC 460

3 Select from Jl MC 401, 406, 453, 454, 461, 462, 464, 474, 476, 477

3 Professional Media Internship, Jl MC 499

Select 3 credits from:

3 Advertising Campaigns, Advrt 434

3 Advanced Advertising Campaigns, Advrt 435

3 Advanced Portfolio Practicum, Advrt 436

Major Electives/Options (9-12 credits)

Choose 9-12 credits from the following:

3 Electronic Media Production, Jl MC 310

3 Fundamentals of Photojournalism, Jl MC 310

3 Multimedia Production, Jl MC 315

3 Public Relations Techniques, Jl MC 321

3 Advertising Creativity, Advrt 334

3 Media Buying, Advrt 335

3 Media Sales, Advrt 336

2 + 2 Visual Principles & Lab, Jl MC 342 & 342L
The ComSt major needs to master a focused academic background that the School seeks to ensure by requiring a designated area of concentration (DAC) made up of 25 credits with at least 15 credits from the 300 level or above. Of the 25 credits, 10 credits are in prescribed courses and 15 credits are from a student-designed, adviser-approved grouping of courses excluding Advrt and Jl MC that will meet the student’s professional or academic interests. A second major or minor outside of Advrt or Jl MC may substitute for the student-designed, adviser-approved part of the DAC.

The Communications Studies Major

The communication studies major prepares students for careers in business and industry and graduate education. Students majoring in ComSt will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, personnel, training and development, sales, management, public relations, organizational development, public information, business communication, and international and intercultural relations.

The ComSt major needs to master a focused course of inquiry into the contemporary study of human communication. The ComSt major provides this focus through emphasis in applied communication theory and research in interpersonal, small group, organization, intercultural, and nonverbal communication.

The student who majors in Communication Studies must earn at least 124.5 credits, with 45 credits at the 300-400 level, and a minimum of 36 credits in ComSt.

The following courses are required for a major in communication studies: ComSt 101, 102, 203, 214 or 218, 301, 310, 311, 314, 317, 325, 404; Stat 101; Engl 302 or 309 or 314 or 415.

The Core for the Communication Studies Major

Foundation Requirements (12 credits)
3 Introduction to Communication Studies, ComSt 101
3 Introduction to Interpersonal Communication, ComSt 102
3 Introduction to Communication Research Methods, ComSt 203

Select one of these courses:
3 Professional Communication, ComSt 214
3 Conflict Management, ComSt 218

Upper Division Requirements (24 credits)
3 Human Communication Theory, ComSt 301
3 Intercultural Communication, ComSt 310
3 Organizational Communication: Theory and Research, ComSt 311
3 Organizational Communication, ComSt 314
3 Small Group Communication,

Courses and Programs

The Journalist and Mass Communication Major

The major in journalism and mass communication allows the student to select one of five emphases: electronic media studies, print media (magazine and newspaper), public relations/public information, science communication, or visual communication. A sixth option is also available that allows the student to pursue a general program of study.

To receive a bachelor of arts or a bachelor of science degree in journalism and mass communication a student must earn at least 124.5 credits. Of these:

- at least 45 credits must be at the 300 and 400 course level
- at least 65 credits must come from the liberal arts and sciences
- a minimum of 33 and a maximum of 40 credits may be taken in Jl MC and Advrt

For the Core for the Journalism and Mass Communication Major

Cr. Degree Requirements
Pre-Major Requirements (6 credits)
3 Mass Media and Society—Jl MC 101
3 R Orientation to Journalism and Mass Communication—Jl MC 110
3 Reporting and Writing for the Mass Media—Jl MC 201

Requirements of all Jl MC majors (9 credits)
3 Intermediate Reporting and Writing for the Mass Media—Jl MC 202 or 206
3 Law of Mass Communication—Jl MC 400
3 Professional Media Internship—Jl MC 499

Requirements determined by emphasis

The requirements

- of 6 credits must be selected at the 400-level, at least one of which must be Jl MC 401, 406, 453, 461, 462, 464, 474, 476, or 477
- Additional credits can be selected from any Jl MC courses above 220.
- 33 credit minimum - Total

Enhancement Requirement (4 credits)
4 Principles of Statistics, Stat 101

The Jl MC major needs a broad-based academic background that the School seeks to ensure by requiring a designated area of concentration (DAC) made up of 24 credits. All courses for the DAC must be taken outside of Advrt and Jl MC. At least 15 credits must be from the 300 level or above. This is a student-designed, adviser-approved grouping of related courses that will meet the student’s professional or academic interests. A second major or two minors may substitute for the DAC.

Minors

Advertising. To become an advertising minor, the student must have achieved a score of 26 or higher on the ACT-English examination or have passed the School’s own English Usage Test and have earned a grade of at least a C+ in Jl MC 201.

Advertising minors are required to complete at least 18 credits in Advrt and Jl MC courses. This includes 9 credits in the core (Jl MC 201 with a C+ or better, Advrt 230 and Advrt 301), and either Advrt 434 or 435 or 436 (3 credits), 3 credits at the 300-400 level in Advrt or related Jl MC courses and 3 credits of Advrt or Jl MC electives.

Communication Studies. The requirements for a minor in ComSt may be fulfilled by credit in ComSt 101 plus at least 15 additional hours of communications studies, of which 9 credits are in courses numbered 300 or above. All credits taken for the minor must have a grade of 2.0 or higher. No credits in 290, 490, 493, 499, or 590 may apply toward the minor.

Journalism and Mass Communication. Jl MC minors are designed within each of the School’s emphasis areas. See the School’s literature or an adviser in Jl MC for more information.

To become a Jl MC minor, the student must have achieved a score of 26 or higher on the ACT-English examination or have passed the School’s own English Usage Test and have earned a grade of at least a C+ in Jl MC 201.

Jl MC minors are required to complete at least 18 credits in Jl MC or Advrt courses. This includes 6 credits in the core (201 and either 202 or 206), 6 credits from courses numbered 220 to 355, and 3 credits from among 400-level courses and 3 credits of Jl MC (or Advrt) elective.
Graduate Study

The School offers work for the master of science degree with a major in journalism and mass communication. A minor is available to students taking major work in other departments.

The emphasis of the program is on the study of scientific and technological communication from both theoretical and professional skills perspectives.

Major programs of study in one of three concentrations:

I. Science Communication—developing effective reporting and writing skills to disseminate information about science, technology, and agriculture to a range of publics through a variety of media. Appropriate for media professionals and those with a science background.

II. Mass Communication in Science and Technology—the study of the theory, preparation, and use of media materials to transmit scientific, technological, and agricultural knowledge to the public. Appropriate for those interested in public information or international development communication.

III. Mass Communication as a Social Science—the study of the role and impact of mass communication on individuals and society, primarily from a social science perspective. Appropriate for those interested in studying the mass media from a variety of perspectives.

Students in all three concentrations have the option of writing a thesis or completing a creative component.

Core courses for students in the three concentrations are: Jl MC 501, 502, 510, 601, and 650. Elective coursework is selected with approval of the student’s program of study or study committee.

Students with bachelor’s degrees in a variety of academic disciplines and with diverse professional experiences may be accepted into the program. However, students without a degree or experience in journalism or mass communication may be required to take additional coursework.

Courses open for nonmajor graduate credit: Jl MC 460, 461, 462, 464, and 477.

Advertising (Advrt)

Courses Primarily for Undergraduate Students

Advrt 301. Audience Identification, Research, and Analysis. (Same as Jl MC 301) (3-0) Cr. 3. F.S. Prereq: Advrt 230 or Jl MC 220; majors and minors must also have credit or concurrent enrollment in Jl MC 201. Prospect analysis, market segmentation, positioning, public opinion formation, communication strategy formulation and development of critical thinking skills.

Advrt 336. Advertising Media Sales and Management, (3-0) Cr. 3. Prereq: Advrt 301 and Advrt 335. Fundamentals of advertising media sales with emphasis on sales techniques, presentation skills and strengths of competing media. Includes development of sales and training materials for a variety of media. Sales simulations.

Advrt 434. Advertising Campaigns, (3-0) Cr. 3. F.S. Prereq: Advrt 301. Development of advertising campaigns for business and social institutions. Projects involve budgeting, media selection, market analysis, campaign strategy, and creative execution.

Advrt 436. Advertising Portfolio Practicum, (0-0) Cr. 3. Prereq: Advrt 334, portfolio review and permission of instructor. Advanced advertising writing and design. Emphasis on creative strategy, problem solving and execution of creative materials in print, broadcast and on-line media for a variety of clients. Visit to advertising agencies.

Advrt 497. Seminar in Advertising, Cr. 1 to 3. Seminars or one-time classes on topics of relevance to students in advertising.

Communication Studies (ComSt)

Courses Primarily for Undergraduate Students

ComSt 101. Introduction to Communication Studies, (3-0) Cr. 3. F.S.SS. An introduction to communication theory, the development and functions of communication, and a survey of interpersonal, small group, organizational, and intercultural communication.

ComSt 102. Introduction to Interpersonal Communication, (3-0) Cr. 3. F.S.SS. Application of communication principles, theory, and research to an examination of the process of interpersonal communication and the improvement of communication skills that are most relevant to a broad range of interpersonal settings.

ComSt 203. Introduction to Communication Research Methods, (3-0) Cr. 3. F.S. An introduction to reading reports of and conducting communication research. Includes theory development, statistics, and methodologies used in variation of communication contexts.

ComSt 218. Conflict Management, (3-0) Cr. 3. S.SS. Exploration of the relationship between communication and conflict. Communication theories, principles and methods associated with effective conflict management in interpersonal and organizational contexts.

ComSt 301. Human Communication Theory, (3-0) Cr. 3. F.S. Prereq: 101 and 102. Theory and research on human communication with particular emphasis on those theories underlying interpersonal, small group, organizational, and intercultural communication.

ComSt 310. Intercultural Communication, (3-0) Cr. 3. Prereq: 101 or 102, 203, 301. Examines the theories, principles and research on intercultural communication with the intent of enhancing cultural sensitivity and ability to recognize, accept, and adapt to cultural diversity. Interactive assignments.

ComSt 311. Interpersonal Communication: Theory and Research, (3-0) Cr. 3. Prereq: 102, 203, 301. A study of contemporary interpersonal communication theories and research through the examination of published scholarship. Emphasis on relational development research including initiation, maintenance, conflict management, and dissolution.

ComSt 314. Organizational Communication, (3-0) Cr. 3. Prereq: 101 or 102, 203, 301. Theory and research in organizational communication; strategies for assessing and improving individual and organizational communication effectiveness; and an understanding of how organizational meaning is created and sustained through human communication.

ComSt 317. Small Group Communication, (3-0) Cr. 3. Prereq: 101 or 102, 203, 301. Theory and research in small group communication; application to group decision-making and leadership. Includes communication analyses of groups and teams.

ComSt 325. Nonverbal Communication, (Same as Ling 325, Sp Cm 325.) (3-0) Cr. 3. Prereq: 101 or 102, 203, 301. A survey of theory and research in nonverbal communication; exploration of nonverbal codes and covert subcodes, function of nonverbal communication in various contexts. Application of material through student-designed investigations.

ComSt 398. Cooperative Education, Cr. R. F.S.SS. Prereq: Permission of instructor, junior or senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

ComSt 404. Seminar in Communication Studies. (Dual-listed with 504.) Cr. 3. Prereq: a 3 credit 300-level ComSt course, plus the appropriate 300-level course (as indicated in parenthesis below).

A. Communication Theory or Research (any 300-level 3-credit course)
B. Interpersonal Communication (ComSt 311)
C. Small Group Communication (ComSt 317)
D. Organizational Communication (ComSt 314)
E. Intercultural Communication (ComSt 310)
F. Nonverbal Communication (ComSt 325)
G. Training and Development (ComSt 314)

ComSt 490. Independent Study, Cr. 1 to 3 each time taken, maximum of 3. F.S. Prereq: 4 credits in communications studies and junior classification. Application must be submitted for approval the semester prior to the independent study.

ComSt 499. Communication Internship, Cr var. 1 to 3 each time taken, maximum of 6. F.S.SS. Requires a professional situation that provides a variety of experiences. Four hundred hours of on-site work is required for 3 hours credit. Registration by application only. Application must be submitted to Communication Studies faculty adviser for approval the semester prior to the internship.

Courses Primarily for Graduate Students, Open to Qualified Undergraduates

ComSt 504. Seminar in Communication Studies. (Dual-listed with 504) Cr. 3. F.S. Prereq: Graduate standing.

A. Communication Theory and Research
B. Interpersonal Communication
C. Small Group Communication
D. Organizational Communication
E. Intercultural Communication
F. Nonverbal Communication
G. Training and Development

ComSt 590. Special Topics, Cr. 1 to 4 each time taken. Application must be submitted for approval the semester prior to the independent study.
Courses and Programs  Journalism and Communication, The Greenlee School of 275

Journalism and Mass Communication (JL MC)

Courses Primarily for Undergraduate Students

JL MC 101. Mass Media and Society. (3-0) Cr. 3. F.S.SS. Communication models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media-related professional operations.

JL MC 110. Orientation to Journalism and Communication. (1-0) Cr. R.F.S. Orientation to career opportunities, emphasis areas, and requirements in the field of journalism and mass communication curricula.

JL MC 201. Reporting and Writing for the Mass Media. (1-4) Cr. 3. F.S.SS. Prereq: English 105 (or testout) and either a score of 26 or higher on the ACT-English examination or satisfactory performance on the English Placement Test. Students should note that this course is a prerequisite to JL MC 202 and JL MC 206. Generating story ideas, exercising news judgment and gathering information via interviews, observation and documentary sources to produce news and informational material for a variety of media. Emphasis on analyzing and organizing facts, as well as accuracy and principles of good writing.

JL MC 202. Intermediate Reporting and Writing for the Mass Media. (1-4) Cr. 3. F.S. Prereq: Majors in JL MC who select 202 must complete the course with a C+ in order to fulfill the Continuing English Proficiency Requirement. Students should note that this course fulfills prerequisite for JL MC 308, 344, 346, 347, 349, 499. Covering standard news assignments and beats for student print publication. Enhancing and refining skills in developing sources and generating story ideas, information-gathering techniques, reporting and writing. Includes segments on local government and judiciary. Primarily designed for students interested in writing for newspapers, magazines, and online media administered by the School before registering for the course. Majors in advertising and journalism must complete JL MC 201 with a C+ in order to fulfill the Continuing English Proficiency Requirement. Students should note that this course is a prerequisite to JL MC 202 and JL MC 206.

JL MC 301. Fundamentals of Photojournalism. (1-3) Cr. 3. F.S. Prereq: 201 or permission of instructor. Basic photojournalism and photo techniques. Includes camera, lighting and composition, lens and depth of focus, and photo reproduction techniques for print, broadcast, or computer-mediated applications. Basic use of digital imaging and editing software.

JL MC 315. Multimedia Production. (3-0) Cr. 3. F.S. Prereq: 342L or 342L. Concepts and principles for evaluating, constructing and designing information for the World Wide Web and other computer-mediated communication systems. Explores the use of computer-generated animation and graphics, audio and video. Issues of ethics and ownership of work pertinent to the new media are discussed.

JL MC 321. Public Relations/Corporate Communications Techniques. (2-3) Cr. 3. F.S. Prereq: 201, 220, and Advrt 301, 342L or computer publishing proficiency recommended. Development and creation of public and corporate relations materials. Computer applications used in production of print and online media, annual reports and desktop publishing of creative materials.

JL MC 342L. Laboratory in Basic Visual Principles. (2-0) Cr. 2. F.S.SS. Prereq: Credit or enrollment in 342. Introduction to desktop publishing, beginning techniques of layout in a step-by-step process; application of visual principles to simple print projects.

JL MC 343L. Laboratory in Intermediate Visual Principles. (2-2) Cr. 2. S. Prereq: 342L or equivalent computer proficiency. Includes hands-on use of advanced and features of desktop publishing and other document-enhancing software. Production of newsletters, multi-page brochures and other documents.

JL MC 344. Depth Reporting and Writing. (2-2) Cr. 3. F. Prereq: 202 or 206. Developing and writing comprehensive stories for newspapers and magazines.

JL MC 346. Public Affairs Reporting. (2-2) Cr. 3. S. Pre req: 202 or 206. Reporting on government, business, and other institutions; identification of and access to public records; investigative reporting techniques; development of public agencies and issues for print and broadcast media.

JL MC 347. Science Communication. (Dual-listed with 547) (2-2) Cr. 3. S. Prereq: 202 or 206 for JL MC majors; Advrt 334 for Advrt majors. Nonmajors welcome, but by permission of instructor. Reporting and writing about scientific and technological subjects for the general audience. Outlets for stories include print, broadcast, and online media. Story topic choices for students include reporting about basic and applied sciences as well as ethical and policy issues related to science and technology. Topics from A to Z, anthropology to zoology.

JL MC 349. Print Media Editing. (1-5) (1-5) Cr. 3. F.S. Pre req: 202 or 206. Grammar, punctuation, usage, syntax and logic. Editing newspaper, magazine and online copy. Headline, title writing and visual presentation. Use of computer editing technology.

JL MC 354. Advanced Studio Production. (2-3) Cr. 3. F. Pre req: 206; 306. Detailed application of studio television techniques; producing, directing and asset management during production of live information programs.

JL MC 390. Workshop. Cr. 2. 1 time each taken, maximum of 3 SS. Offered as elective credit only. Check School for course availability. Offered on a satisfactory/fail grading basis only.

JL MC 391. Electronic Media. (1-3) Cr. 3. S. Prereq: Sophomore standing. Theory and research in mass communication processes and effects; the scientific process; methods of measuring evaluating and reporting mass communication research.

JL MC 406. Media Management. (Dual-listed with 506) (3-0) Cr. 3. S. Prereq: Junior classification. Decision-making functions of media. Basic media market analysis, media management, circulation and audience development, technological developments affecting management decisions, and relationships with labor and regulatory agencies that affect media operations.

JL MC 453. Electronic Media Technology, Public Policy, and Responsibility. (3-0) Cr. 3. S. Prereq: Junior classification. Issues and policies affecting the historical and contemporary development of electronic media and their technologies.

JL MC 460. Law of Mass Communication. (3-0) Cr. 3. S. F.S.S. Prereq: 201, and 6 credits in social science. First Amendment law, libel, privacy, obscenity, contempt, copyright, trademark, the Federal Communications Act; laws affecting advertising, legal publication, and other business activities of the media, including the Internet. Nonmajor graduate credit.

JL MC 461. History of American Journalism. (3-0) Cr. 3. S. F.S. Pre req: Sophomore classification. Role of the mass media, including advertising and public relations, in shaping the social, economic and political history of America; impact of change in these areas on the development, traditions, and philosophies of the media. Nonmajor graduate credit.
JI MC 477. Ethnicity, Gender, Class and the Media. (3-0) Cr. 3. S. Prereq: Junior classification.
Examination of historical and current communication technologies, including how they shape and are shaped by the cultural and social practices into which they are introduced.

JI MC 490. Independent Study in Communication. Cr. nr. Prereq: 12 credits in JI MC or Advrt (or a combination), and completion of a proposal form. No more than 6 credits of 490 may be used toward a student report. Available only to JI MC and Advrt majors.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

JI MC 501. Theories of Mass Communication. (3-0) Cr. 3. F. Prereq: 6 credits in social science. Examination of major areas of research activity and theoretical development related to organization, functions, and effects of mass communication.

JI MC 502. Communication Research Methods. (3-3) Cr. 4. S. Prereq: 501. An examination of quantitative and qualitative research methods, including legal, participant observation, historical, survey, content analysis and experiment.

JI MC 506. Media Management. (Dual-listed with 406.) (3-0) Cr. 3. S. Prereq: 6 credits in social science (economics highly recommended). Decision-making functions of media. Basic media market analysis, media organizational, and social controls on the media.

JI MC 510. Strategies of Communication. (3-0) Cr. 3. S.SS. Prereq: 501 or equivalent social science theory. The process of developing professional communication and persuasion strategies, with emphasis on problem definition, behavioral specification of objectives, situation analysis, strategy formulation, and justification through application of communication theories and research results.

JI MC 521. Theories of Visual Communication. (2-2) Cr. 3. F. Prereq: 6 credits in social science and permission of instructor. Introduction to the study of picture-based media (film, television, photography, advertising, etc.). Exploration of theoretical concepts of vision and perception, visual literacy, visual language, visual persuasion, and the cultural and social implications of visual images.

JI MC 524. Public Relations Campaigns. (Dual-listed with 424.) (3-0) Cr. 3. S. Prereq: 520. Development of public relations and corporate communications campaigns for business and social institutions. Projects involve budgeting, media selection, campaign strategy, and creative execution.

JI MC 547. Science Communication. (Dual-listed with 347.) (2-2) Cr. 3. S. Prereq: 202 or 204 for JI MC majors; Advrt 334 for Advrt majors. Nonmajors welcome, but by permission of instructor. Reporting and writing about science and technology subjects for general audiences. Outlets for stories include print, broadcast, and online media. Story topic choices for students include reporting about basic and applied sciences as well as ethical and policy issues related to science and technology. Topics from A to Z, anthropology to zoology.

JI MC 561. Media and Society: Interrelationships. (3-0) Cr. 3. F. Prereq: 6 credits in social science. Media functions in a democratic society: conflicts between the media and social institutions, ethical and social controls on the media.

JI MC 574. Communication Technologies and Social Change. (Same as TC 574.) (3-0) Cr. 3. F. Prereq: 6 credits in social science. Personal, organizational, and social implications of the use of communication technologies. Includes theories and empirical research across the continuum of perspectives, from techno-utopianism through an anti-technology stance.

JI MC 576. World Communication Systems Development. (3-0) Cr. 3. F. World communication systems and other social, political and economic factors determining flow, character and volume of news. Impact of media related to organized entertainment content on nations and societies. Comparative analysis of role and impact of traditional modes of communication, the mass media and computer-mediated systems.
the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments shall serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate clearly and work effectively with others on complex land design and planning problems. They understand the ethical, social, and environmental dimensions of issues involving changes in the landscape.

For students entering the professional program, the department highly recommends purchase of a laptop/notebook computer and appropriate software. See the Undergraduate Academic Advising Handbook in the departmental office or on the departmental Web pages for hardware and software specifications. To enhance the study of landscape architecture in off-campus settings, the department recommends that each student participate in an approved study abroad program. In addition, the department recommends that each student participate in professional internship opportunities available through the department, National Student Exchange programs through other campuses, or both. Additional information is available in the departmental office.

The curriculum is accredited by the American Society of Landscape Architects and provides the education which, combined with experience, is necessary for professional registration.

The curriculum is composed of a one-year pre-professional program and a four-year professional program. Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the preprofessional program. Scholastic performance, aptitude, and personal development are the qualifications considered. The department also cooperates in the undergraduate minor in design studies.

For undergraduate curriculum in landscape architecture leading to the degree bachelor of landscape architecture, see College of Design, Curricula.

Graduate Study

The department offers opportunities for post-professional study leading to the degree master of landscape architecture. Minor work is offered to students taking major work in other departments.

The M.L.A. degree is granted upon completion of 36 credits and the acceptance of a thesis or creative component. Typically, the program will require four semesters of study for students with a bachelor’s degree in landscape architecture. Students with a bachelor’s degree in landscape architecture may also enter a special program to earn both the M.L.A. and the M.C.R.P. degrees in three years. Graduate students who do not possess a bachelor’s degree in landscape architecture may complete additional coursework in the fundamental skill areas of the profession. This is accomplished by concurrent enrollment in the undergraduate program to earn the B.L.A. degree before fully engaging in graduate study. The time necessary to earn the B.L.A. in addition to the M.L.A. will vary according to the student’s background upon admission. Students interested in the concurrent B.L.A./M.L.A. and dual degree M.L.A./M.C.R.P. programs should write the department to receive a detailed description of requirements.

Graduates have a broad understanding of landscape architecture and related disciplines. They are able to communicate effectively with colleagues in the sciences and/or humanities as well as in the allied professions. Graduates are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the physical environment. They are skilled at undertaking research and/or creative activities and communicating the results of these efforts in a concise and persuasive manner.

Courses open for nonmajor graduate credit: 302, 461I, 480I.

Courses Primarily for Undergraduate Students

L A 101. Landscape Architectural Design and Visualization I. (1-9) Cr. 4. F. Prereq: Concurrent enrollment in L A 141 recommended. Introduction to landscape architectural visualization and interpretation. Landscape change and precedence explored through analytic and expressive drawings, photographs, models and computers.

L A 103. Introduction to Graphics Communication for Planners. (2-2) Cr. 3. F. S. Prereq: CRP major. Introduction to graphic communication techniques. Basic skills to review and evaluate site plans. Graphic formulation of land use plans and land development and zoning ordinances. Focus on both working and presentation graphics.

L A 129. Introduction to Creativity. (Same as Dsn S 129.) (3-0) Cr. 3. F. S. Prereq: Concurrent enrollment in L A 141 recommended. Introduction to landscape architectural design. Projects with an emphasis on cultural expression, environmental ethics, and technical constituents of the design process.

L A 141. Introduction to Landscape Architecture. (3-0) Cr. 3. F. S. Prereq: Concurrent enrollment in L A 141 recommended.

L A 201. Studio 1: Midwestern Landscape Studies. (1-15) Cr. 6. F. S. Prereq: Enrollment in the professional program. Investigation, analysis and documentation of the midwestern landscape. Development of aesthetic sensitivity to the geomorphology, vegetation and cultural influences on this landscape. Emphasis on “reading” and representing the region’s varied landscape.

L A 202. Studio 2: Site Planning and Design I. (1-15) Cr. 6. S. Prereq: 201. Fundamental issues of landscape planning and design at a site scale. Projects include design for housing and other land uses. Projects encompass site analysis, precedent study, site engineering and design proposals, expressed through a variety of graphic and written media. An integrated seminar component is devoted to issues relating to housing design factors, social and behavioral design factors, and open space planning.

L A 272. Introduction to Landscape Architectural Theory. (3-0) Cr. 3. F. S. Prereq: Enrollment in the professional program. Introduction to landscape architecture as a mode of cultural production that shapes and is shaped by various social, political, and economic processes. Exploration of landscape as one of the most permanent, yet dynamic, of our creative expressions for this relationship. Lectures, readings, and writing.

L A 273. Landscape Architectural History: Prehistory to 1900. (Same as Dsn S 273.) (3-0) Cr. 3. S. Prereq: Concurrent enrollment in the professional program. Introduction to landscape design as observed over time. Outstanding works and significant personalities from pre-history through the 19th century. Landscape design vocabulary and significant literature. Social, economic, political, and technical forces contributing to the evolution of design styles. Lectures, readings, abstracts, reports.

L A 274. The Social and Behavioral Landscape. (Same as Dsn S 274.) (3-0) Cr. 3. S. Prereq: Concurrent enrollment in the professional program. Introduction to landscape design as observed over time. Outstanding works and significant personalities from pre-history through the 19th century. Landscape design vocabulary and significant literature. Social, economic, political, and technical forces contributing to the evolution of design styles. Lectures, readings, abstracts, reports.

L A 301. Site Planning and Design II. (1-15) Cr. 6. F. S. Prereq: Concurrent enrollment in the professional program. Exploration of landscape planning and design at the site scale. Students explore more complex design and planning problems through analytic and expressive drawings, photographs, models and computers. Additional credit may be applied towards graduation.

L A 302. Regional Landscape Design. (1-15) Cr. 6. S. Prereq: 301 or permission of instructor. Land use and natural resource data used in the regional landscape planning and design process. Review of data characteristics, landscape analysis techniques, environmental impact assessment, geographic information systems, and their applications to regional level design. Identifying opportunities and limitations of landscape characteristics, site planning and design for human use. Nonmajor graduate credit.

L A 303. Landscape Design Studio. (0-12) Cr. 4 each time taken, maximum of 8. S. S. Prereq: Enrollment in the professional program and permission of advisor. Development of solutions for landscape architectural problems at intermediate and advanced levels of design. A maximum of 8 credits may be applied towards graduation.

L A 309. Field Travel. (1 to 2 each time taken. F. S. S. Prereq: Concurrent enrollment in the professional program. Permission of advisor and permission of instructor. Observation of professional practice and landscapes in urban, rural, and wilderness areas. Offered on a satisfactory-fail grading basis only.

L A 321. Introduced Plants of the Midwest. (2-3) Cr. 3. F. S. Prereq: Concurrent enrollment in the professional program. Observation and study of exotic plants and horticultural varieties introduced to and cultivated in the midwest region. Emphasis on functional and aesthetic uses and cultural requirements of plants used in landscape design.

L A 341. Contemporary Landscape Architecture. (1-0) Cr. 1. S. Prereq: Concurrent enrollment in the professional program. Observation and study of exotic plants and horticultural varieties introduced to and cultivated in the midwest region. Emphasis on functional and aesthetic uses and cultural requirements of plants used in landscape design.
L A 344. Landscape Horticulture. (Same as Hort 344.) (2-4) Cr. 4. S. Prereq: Hort 241 or L A 321 recommended. Principles and practices of designing residential and small business landscapes. Site analysis, terrain alteration for drainage and aesthetics, functional areas and circulation, use of construction and plant materials for site development. Basic drafting, perspective drawing and plan refinement techniques.

L A 371. Landscape Architectural History: 1900 to Present. (Same as Dsn S 371.) (3-0) Cr. 3. F. Landscape design concepts as observed over time. Outstanding works and significant personalities from 1900 to the present. Landscape design vocabulary and significant literature. Social, economic, political, and technical forces contributing to the development of landscape design styles. Lectures, readings, abstracts, reports.

L A 376. Environmental Art. (Dual-listed with 576; same as Art H 376, Dsn S 376) (3-0) Cr. 3. SS. Prereq: One art or design history course. Survey of environmental art, 1965-present, including earth art, public art, competitions, memorials.

L A 401. Community Landscape Design. (1-15) Cr. 6. F. Prereq: 402. Design of large urban and rural areas within urban contexts, often engaging outreach projects in Iowa communities. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal as well as graphic communications. Integrated seminar component will engage topical issues in community design, present studies, town planning, and urban design principles.

L A 405. Senior Thesis. (0-15) Cr. 6. S. Prereq: 401, 402, 403 and permission of advisor, chair and thesis advisor. Individual advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are expected.

L A 441. Professional Practice. (3-0) Cr. 3. F. Prereq: 482. Exploration of professional practice in the private, public, non-governmental organization and academic setting. Develop office management techniques; budgeting, scheduling; proposal preparation; construction supervision; and project management.

L A 451. Landscape Architecture Professional Internship, Study Abroad, or National Student Exchange. Cr. R. F. S. S. Prereq: 450, permission of advisor and chair. Exploration of regional landscape design, implementation and history, and theory through professional work experience, out-of-region national study experience or international study experience.

L A 461. Introduction to GIS Landscape Modeling. (Same as Ia LL 461.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

L A 478. Topical Studies in Landscape Architecture. (Dual-listed with 578; same as Dsn S 478.) (2-0 or 3-0) Cr. 2 or 3 each time taken. F.S. Prereq: 371 or senior classification or graduate standing.

L A 482. Advanced Landscape Construction. (3-0) Cr. 3. F. Prereq: 481. Advanced construction detailing water and irrigation systems, mechanical and electrical systems, site lighting, project scheduling, costing, final contract document preparation, with drawings and specifications.

L A 489. Independent Study. Cr. 1 to 4. F.S.S. Prereq: Written approval of instructor and department chair on required form. Investigation of a topic of special interest to the student.

L A 491. Seminar. Cr. 3-0) Cr. 3. F. Prereq: 401. Discussion of landscape design and maintenance. Lectures, readings, abstracts, reports.

L A 501. Seminar. Cr. 3. S. Prereq: Admission to graduate program or permission of instructor. Discussion of landscape design theories. Evaluation of how the landscape is perceived; how that perception is formed, filtered, and focused.

L A 509. Mining Reclamation and Mitigation. (3-0) Cr. 3. Alt. S. offered 2002. F.S. Prereq: Admission to graduate program or permission of instructor. Historical and cultural attitudes toward mining and reclamation, environmental impacts of mining, mining and reclamation planning, pre-and post-mining inventories, and legal requirements for mining and reclamation.

L A 541. Principles of Research for Landscape Architects. (3-0) Cr. 3. F. Prereq: Admission to graduate program or permission of instructor. Examination of research methods appropriate to landscape architectural projects, including bibliographical, historical, numerical, statistical, survey, and geographical methods. Readings, discussions, and application problems. Preparation of a research proposal.

L A 561. Resource Conservation and Management. (3-0) Cr. 3. F. Prereq: Admission to graduate program or permission of instructor. Exploration of landscape patterns and landscape ecology as a framework for land planning and use at local, regional, national, and global scales. Concepts and strategies that strive toward a sustainable earth society. Lectures, readings, guest speakers.

L A 562. Studio in Resource Conservation and Management. (1-3 to 1-15) Cr. 2-6 each time taken, maximum of 6 credits applied to degree program. S. Prereq: Admission to graduate program or permission of instructor. Developing plans and policies that feature ecological landscape description, planning, and resource conservation. Hands-on field experience with professional resource planners and managers.

L A 564. Landscape Planning for Wildlife. (2-3) Cr. 3. Alt. F., offered 2002. F.S. Prereq: Admission to graduate program or permission of instructor. Principles of planning wildlife habitat, greenways, corridors and reserves, wildlife habitat requirements and habitat evaluation methods for landscape architects. Planning projects, lectures, oral presentations, written reports, and field trips.

L A 572. Landscape Architectural History and Preservation. (3-0) Cr. 3. F. Prereq: Admission to graduate program or permission of instructor. Research methods applied to the preservation and restoration of the historic landscape. Outstanding landscape architectural works of the 18th, 19th, and 20th centuries will be used to familiarize students with methods of archaeological and documentary research, technical problems of restoration and conservation, and curatorial problems of interpretation and maintenance. Lectures, readings, abstracts, reports.

L A 573. Reading the Common Landscape. (3-0) Cr. 3. S. Prereq: Admission to graduate program or permission of instructor. The evolution and interpretation of the design of ordinary midwestern cultural landscapes. Emphasis on how to read the landscape as a record of social-cultural processes. Selected prototypical landscapes of rural and urban Iowa and the Midwest are explored.

L A 576. Environmental Art. (Dual-listed with 376; same as Art H 576, Dsn S 576) (3-0) Cr. 3. SS. Prereq: Admission to graduate program or permission of instructor. Survey of environmental art, 1965-present, including earth art, public art, competitions, memorials.

L A 578. Topical Studies in Landscape Architecture. (Dual-listed with 478; same as Dsn S 578.) (2-0 or 3-0) Cr. 2 or 3 each time taken. F.S. Prereq: Senior classification or graduate standing.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

L A 501. Seminar. Cr. 3. S. Prereq: Admission to graduate program or permission of instructor. Discussion of landscape design theories. Evaluation of how the landscape is perceived; how that perception is formed, filtered, and focused.

L A 509. Mining Reclamation and Mitigation. (3-0) Cr. 3. Alt. S. offered 2002. F.S. Prereq: Admission to graduate program or permission of instructor. Historical and cultural attitudes toward mining and reclamation, environmental impacts of mining, mining and reclamation planning, pre-and post-mining inventories, and legal requirements for mining and reclamation.

L A 541. Principles of Research for Landscape Architects. (3-0) Cr. 3. F. Prereq: Admission to graduate program or permission of instructor. Examination of research methods appropriate to landscape architectural projects, including bibliographical, historical, numerical, statistical, survey, and geographical methods. Readings, discussions, and application problems. Preparation of a research proposal.

U.S. Latina/o Studies Program
Program Director: J. Garcia

U.S. Latina/o Studies is devoted to the study of Mexican Americans, Puerto Ricans, Cuban Americans and other groups of people living in the United States who trace their ancestry to the Spanish-speaking countries of Latin America, and who comprise the fastest growing ethnic groups in America. U.S. Latina/o Studies is to be distinguished from Latin American studies, which focuses on people living in Latin America. The methodology of U.S. Latina/o Studies is cross-disciplinary, drawing from the methods established in anthropology, sociology, political science, economics, history, literary studies, and other fields.

In addition to the general requirements of a major in Interdisciplinary Studies, (see Index, Interdisciplinary Studies) a major in Interdisciplinary Studies focusing on U.S. Latina/o Studies would require the completion of 24 credit hours. At least 15 of the 24 credits must be in courses numbered 300 and above. These 24 credits in the major focusing on U.S. Latina/o Studies must include the following courses, each of which is worth three credits: LAS 211 (Introduction to U.S. Latina/o Studies), Anth 223 (Peoples and Cultures of Latin America), Engl 344 (U.S. Latina/o Literature); Hist 441 (History of Mexico and Central America), or a course in U.S. Latina/o history, expected to be offered beginning in 1999-2000; Relig 338 (The Latina/o Religious Experience); and Soc 332 (The Latina/o Experience in U.S. Society).

The student must have an average grade of C in the required courses of the major. Fulfillment of the foreign language requirement with Spanish is strongly recommended, but not required. For a list of other eligible courses and more information on the U.S. Latina/o Studies Program, contact the program committee chair.

Linguistics Program (Major or minor; graduate minor) see Index, Linguistics.

Premedical and Preprofessional Health Programs see Index, Preprofessional Study.

Speech Communication Program (Major or minor) see Index, Speech Communication.

Teacher Education Program see Index, Teacher Education, Courses and Programs.

Technology and Social Change (Minor, graduate minor)

Women’s Studies Program (Major or minor) see Index, Women’s Studies.

Courses Primarily for Undergraduate Students

LAS 101. Orientation for Open Option and Preprofessional Students, (1-0) Cr. 0.5. F.S. First 8 weeks. Liberal Arts and Sciences staff. Self-responsibility and university procedures. LAS general education requirements. ISU departments and programs, time management, academic study skills, adjustment to the university environment. Required of all first year students in the Open Option and Preprofessional Health Programs. Offered on a satisfactory-fail grading basis only.

LAS 104. Personal Career Development, (2-0) Cr. 2. F.S. Prereq: 15 credits of ISU coursework: Comprehensive approach to personal career development; intensive self-analysis; utilization of a computerized career exploration system; contact with area professionals; examination of work in modern society and the impact of technology on the future of work; exposure to the research skills necessary for career choice implementation.

LAS 111. Elementary Physical Science, (2-4) Cr. 4. S. For students in elementary education and child development. Topics are selected from astronomy, geology, meteorology, physics, and chemistry.

LAS 130. Cross-Cultural Learning Community Seminar, (1-0) Cr. 1. Required for all participants in the Cross-Cultural Learning Community. The focus is on developing students’ cross-cultural communication skills, increasing their awareness of international concerns, and introducing them to international sources and opportunities available at Iowa State University. Offered on a satisfactory-fail grading basis only.

LAS 150. Society, Culture and Change in a Diverse Nation, (3-0) Cr. 3. Prereq: Approval of instructor. An analysis of contemporary patterns of diversity in the United States. The focus will be on patterns of gender, class, ethnicity, and race in the development of a multi-cultural society. There will also be an analysis of multiculturalism and national character.

LAS 211. Introduction to U.S. Latina/o Studies, (3-0) Cr. 3. S. A survey of the people in the United States who trace their origin to the Spanish-speaking countries of Latin America, focusing principally on Mexican Americans, Puerto Ricans, and Cuban Americans. History, religion, social structure, political participation, literature, and other aspects of each group within the framework of various sociological theories of ethnic identity and relationship.

LAS 250. Cultures in Transition: Central Europe, Cr. 3. An interdisciplinary introduction to a world region in a state of rapid social and cultural transition, focused on the Czech and Slovak Republics. Discussion of the historical and inter-related political institutions, arts, economy, agriculture, and environment of the new nations of Central Europe.

LAS 290. Special Problems, Cr. 1 to 3 each time taken. F.S.SS. Prereq: Freshman or sophomore classification. This course may be taken only with permission of the dean of the College of Liberal Arts and Sciences.

G. Catt Center Project. Cr. 1 to 3.

LAS 298. Internship/Co-op, Cr. R. F.S.SS. Prereq: Permission of Business/Liberal Arts and Sciences Career Services and the College of Liberal Arts and Sciences; sophomore classification. Students participating in an internship or co-op on a full-time basis must register for this course prior to beginning their work experience to remain in full-time student status.

LAS 395. Interdisciplinary Study Abroad. Interdisciplinary examination of a selected world region via study abroad. Multi-faceted exploration of a selected world region directed at developing a comprehensive understanding of a selected culture’s role in contemporary society.

A. Pre-Departure Seminar, Cr. 1.
B. Humanities, Cr. 1-3.
C. Communications, Cr. 1-3.
D. Mathematics & Natural Science, Cr. 1-3.
E. Social Sciences, Cr. 1-3.
LAS 398. Internship/Co-op. Cr. R. F.S.SS. Prereq: Permission of Business/Liberal Arts and Sciences Career Services and the College of Liberal Arts and Sciences; junior classification. Students participating in an internship or co-op on a full-time basis must register for this course prior to beginning their work experience to remain in full-time student status.

LAS 417. Student Teaching. (Same as C I 417.) Cr. var., each time taken. F.S. Prereq: Engl 494, or F Lng 496, or Math 497, or Music 466, or LAS 492 or 493A and 493B, or Sp Cm 498B; admission to teacher education; approval of coordinator during semester before student teaching. Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences.

A. History/Social Sciences
B. Physical Sciences
C. Mathematics
D. Biological Sciences
E. English and Literature
F. Speech Communication
G. Foreign Languages and Literatures
J. Earth Sciences
K. Music—Secondary
L. Music—Elementary
M. Science—Basic
N. International Student Teaching
P. Project Opportunity Cr. 8.

LAS 480. Field Experience for Secondary Teaching Preparation. (Same as C I 480.) Cr. 1 to 2 each time taken; maximum of 2. Observation and participation in a variety of school settings after admission to the teacher preparation program. Permission of area coordinator required prior to enrollment. (S/F grading may be used in some offerings of some sections)

A. History/Social Sciences
B. Physical Sciences
C. Mathematics
D. Biological Sciences
E. English and Literature
F. Speech Communication
G. Foreign Languages and Literatures
J. Earth Sciences
K. Music

LAS 490. Independent Study. Cr. var. F.S.SS. Prereq: Permission of the dean of the College of Liberal Arts and Sciences. No more than 9 credits of LAS 490 may be applied toward graduation. This course may be taken only with the permission of the dean of the College of Liberal Arts and Sciences.

G. Catt Center Project

LAS 492. Methods for Teaching Science. (Same as C I 492.) See Curriculum and Instruction.

LAS 493. Methods of Teaching History/Social Sciences. (Same as C I 493 (3-0) Cr. 3. F. S. Prereq: Admission to teacher education and 30 credits in subject-matter field. Course is taught at Ames High School. Students observe classes, plan and implement lessons. Course content also includes determining appropriate learning objectives, questioning strategies, cooperative learning activities, use of technology, curriculum development, differentiating instruction, evaluation, and classroom management.

LAS 498. Internship/Co-op. Cr. R. F.S.SS. Prereq: Permission of Business/Liberal Arts and Sciences Career Services and the College of Liberal Arts and Sciences; senior classification. Students participating in an internship or co-op on a full-time basis must register for this course prior to beginning their work experience to remain in full-time student status.

LAS 499. Student Teaching. Cr. 1 to 4. F.S.SS. Prereq: Permission of the dean of the College of Liberal Arts and Sciences. Work experience in professional setting appropriate to the student’s degree program. Academic work under faculty supervision may include written projects, reports, and guided reading.

Library

Olivia M. A. Madison, Dean of Library Services

Professors: Cole, Madison

Professors (Emeritus): Cook, Dobson, Galejs, Kuhn, Mcnee, Morris, Sage, Yates

Associate Professors: Boydston, Gerhard, Goedeken, Gregory, Hanthorn, Jackson, Knox, Kushkowskii, Lawson, Lee, Lysen, Marinko, McKiennan, Osmann, Parsons, Pedersen, Pelzer, Shonrock, Wiese, Wool

Associate Professors (Emeritus): Mathews, Wendell

Undergraduate Study

The library offers non-credit presentations for undergraduate students in the effective use of the library’s resources. The presentations cover electronic and print sources of information in varied fields. Arrangements are made by individual course instructors.

Graduate Study

The library provides non-credit presentations to assist faculty and graduate students in the effective use of the library’s research resources. The presentations cover electronic and print sources of information in varied fields. Offered F.S.SS. For more information, call the library at 294-3642.

Courses Primarily for Undergraduate Students

Lib 160. Library Instruction. 1-0 Cr. 0. S. F. S. 8 weeks. Prereq.: for students whose native language is not English: Completion of English 101 requirements. Use of libraries and information sources, both print and electronic, including locations and services of the University Library with an emphasis on the research process. To be taken as early as possible in the student’s undergraduate career. See course descriptions of Engl 105 and 105H for prerequisite related to Lib 160. Offered on a satisfactory-fail grading basis only.

Linguistics

www.engliastate.edu/tesling/ba.html

(Interdepartmental Program)

Program Committee: D. Braitsh-Prince, J. Dow, D. Douglas, B. Schwarte, C. Thogmartin, H. Venkatagini, J. Wagner

Undergraduate Study

The linguistics program is a cross-disciplinary program in the College of Liberal Arts and Sciences designed to meet the needs of students interested in various aspects of language—its structure, history, varieties, meanings, and uses. The program includes courses in anthropology, English, computer science, foreign languages and literatures, psychology, and speech communication, thus providing a multi-disciplinary approach to the study of human language.

Courses in linguistics serve as background for students interested in any career that involves working with language, such as anthropology, computer word processing, foreign language teaching, teaching English both as a first and as a second language, psychology, sociology, speech-language pathology and audiology.

In the College of Liberal Arts and Sciences, courses in linguistics can be applied as electives or as part of the group requirements. They may also be used in a minor or in a major.

Majors in linguistics complete a minimum of 33 hours in courses from the list below. Courses specifically required are Ling 219, 309, 371, 419, and one of the following: 420, 492, or 498. Credit for only one course from the following set may be applied toward the major: 486, 487, 524, 525. To graduate with a major in linguistics, a student must earn a C (not a C–) or better in each of the courses taken to fulfill the minimum requirements of the program of study in linguistics. Students who believe they have extenuating circumstances may appeal to the chair of the supervisory committee. In addition, majors in linguistics must show proficiency in a foreign language equivalent to that achieved after two years of university-level study.

Minors in linguistics are usually individually tailored to the interests of the student, who consults with the chair of the supervisory committee for linguistics. All minors must have a minimum of 15 credits in linguistics, of which 6 must be in courses numbered over 300. All programs must include Ling 219 or 309.

English proficiency requirement: The linguistics program requires grades of C or better in each of the following: English 104, 105 (or 105H); and one of English 305, 314, or a Foreign Language 370 course.

For information about using linguistics courses in an interdisciplinary studies major, see Liberal Arts and Sciences, Cross-Disciplinary Studies.

Graduate Study

A graduate minor in linguistics is offered through a cooperative agreement with the departments and programs of Anthropology, Computer Science, English, Foreign Languages and Literatures, Psychology, and Speech Communication. The minor permits students to investigate a variety of aspects of linguistics, emphasizing the ability to think about language in a systematic and disciplined way and to apply the methods of the field to research problems in their own disciplines.

For the master’s degree, a declared minor consists of 9 credits in linguistics including two foundation courses (511 and either 514 or 516) and one elective from the list of courses approved for graduate credit. For the Ph.D. degree, the minor consists of 12 credits in linguistics including three foundation courses (511, 514, and 516) and one elective. It is recommended that the elective course be taken in a department other than English. Additional
courses beyond those listed below may be used as electives. The chair of the supervisory committee can provide information about these.

At least one member of the linguistics faculty will serve on a student’s program of study committee. A list of faculty members may be obtained from the chair of the supervisory committee. Ph.D. candidates will write one section of the preliminary examination on an area of linguistics. All students in the minor are expected to attend linguistics lectures and colloquia. Students in English with a specialization in Teaching English as a Second Language/Linguistics are not eligible for a graduate minor in linguistics. Courses open for nonmajor graduate credit: 331, 413, 420, 422, 425, 461, 462, 463, 471, 491, 492, 498.

Courses Primarily for Undergraduate Students

Ling 207. Introduction to Symbolic Logic. (Same as Phil 207.) See Philosophy.
Ling 219. Introduction to Linguistics. (Same as Eng 219.) See English.
Ling 220. Descriptive English Grammar. (Same as Engl 220.) See English.

Associate Professors: Blackburn, Johnson
Associate Professors (Emeritus): Atchison
Assistant Professors: DeMarie, Herrmann, Reed

Courses and Programs Management 281

Undergraduate Study

For undergraduate curriculum in business, major in management, see College of Business, Curricula.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science degree (B.S.).

Management is a broadly defined discipline and activity, which is neither industry nor function specific. Management concepts, theories, techniques, and skills are applicable to all business functional areas and are essential components for successful organizations.

Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources. The management major at Iowa State University encompasses the diversity of these skills by providing students with alternative programs of study from which they can select a curriculum that most closely matches their academic interests and career opportunities. Within the management major, students can select from three options: entrepreneurship and strategy, human resources management or general business.

The entrepreneurship and strategy option is designed for students interested in acquiring skills associated with creating and managing new and small businesses. Students are required to take Mgmt 310 and 377, as well as either Mgmt 413 or 415. Also, students select three additional courses from an approved list to complete the 18-credit major. These three choice classes are designed to enable the student to tailor the major to their specific areas of interest.

The human resources management option allows students to focus on behavioral and labor issues surrounding the management of people in organizations. Students choosing the option are required to take Mgmt 371 and 471, plus four additional courses selected from an approved list.

The general business option enables students to gain a broad understanding of the functional areas of business. Students selecting this option are required to take the following five courses: Accct 383, Fin 310, Mgmt 371, Mkt 447, and Mgmt 471. These required courses are designed to expose a student to the technical, behavioral, and functional nature of businesses and the integrative nature of management. In addition, students choose one course from an approved list to round out the 18-credit major. Students may also choose to utilize elective credits to take other courses that are of interest beyond the 18 required credits.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to be stand alone.
Courses and Programs Management

Graduate Study

The Department of Management participates in three graduate programs: the M.S. in Business, the M.B.A. full-time and part-time programs, and the interdisciplinary M.S. degree in Industrial Relations. The M.S. in Business is a 30-credit curriculum culminating in a thesis. The M.B.A. program is a 48-credit hour curriculum. Twenty four of the 48 credit hours are core courses and the remaining 24 are graduate electives. A student can obtain a specialization in Human Resource Management by taking 12 credit hours of courses from a selected list of courses. Finally, the department is one of several participating departments offering coursework leading to an interdisciplinary M.S. in industrial relations.

Courses open for nonmajor graduate credit:
Mgmt 413, 414, 415, 472, 479.

Courses Primarily for Undergraduate Students

Mgmt 310. Entrepreneurship and Innovation. (3-0) Cr. 3. F.S. Prereq: Econ 107. Review of the entrepreneurial process with emphasis on starting a new business. How to analyze opportunities, develop an innovative product, organize, finance, market, launch, and manage a new venture. Deals with the role of the entrepreneur and the importance of a business plan. Speakers and field project.

Mgmt 313. Feasibility Analysis and Business Planning. (3-0) Cr. 3. S. Prereq: 310. Not available for credit to business students. Developing an idea for a new business venture, conducting a feasibility study, researching the potential market, analyzing the competition, and writing a formal business plan. Basic business functions are discussed in terms of their application to conducting feasibility analysis and writing a business plan for an entrepreneurial venture.

Mgmt 370. Management of Organizations. (3-0) Cr. 3. F.S.SS. Prereq: Econ 101. A management functions approach is used to explain what managers do in organizations; how they deal with external constituents, how they structure their companies, and how they deal with employees. A contingency approach is used as a framework for understanding how to increase the effectiveness and efficiency of organizations in today’s dynamic, highly competitive business environment.

Mgmt 371. Organizational Behavior. (3-0) Cr. 3. F.S. Prereq: 370. The study of individual attributes, interpersonal relations, and employee attitudes in organizations. Instructional emphasis is placed on how management concepts such as reward systems, job design, leadership, teams, etc. can be used to manage employee attitudes and behavior.

Mgmt 377. Competitive Strategy. (3-0) Cr. 3. F. Prereq: Econ 107. Developing competitive strategy and achieving competitive advantage in firms, including industry analysis, generic strategies, hypercompetition, competing against time, and building distinctive capabilities.

Mgmt 413. Launching New Ventures. (3-0) Cr. 3. F.S. Prereq: 310, 377; Mkt 340, Fin 301. Initiating, acquiring, and building an entrepreneurial activity either within or outside existing businesses. Emphasis is on feasibility study and on proposing a realistic business plan for a new venture. Managing an entrepreneurial activity for sustained success. Nonmajor graduate credit.

Mgmt 414. International Management. (3-0) Cr. 3. F. The nature and economic role of the multinational firm and international business strategies, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries. Nonmajor graduate credit.

Mgmt 415. Managing New Ventures. (3-0) Cr. 3. F.S. Prereq: 370, Mkt 340, Fin 301, Tr逻 360, POM 320. Examination of business problems and issues in new and growing firms. Emphasis is on analyzing existing businesses. Includes a field project. Nonmajor graduate credit.

Mgmt 419. Social Responsibility of Business. (3-0) Cr. 3. S. A consideration of the role of business in society. Critical analysis of ethical, managerial, and public aspects of business as they affect the corporation.

Mgmt 471. Personnel and Human Resource Management. (3-0) Cr. 3. F.S. Prereq: Junior standing. Recruitment and selection, utilization, and development of people in organizations. Examination of each personnel function; interrelationships among the functions.

Mgmt 472. Management of Diversity. (3-0) Cr. 3. F.S. Prereq. Junior classification. One of the most crucial problems in organizations today is the management of diversity. Attempts to define the differences between equal employment opportunity/affirmative action, which has a legal basis, and diversity which has an educational basis. Organized around the concepts of: (1) cultural diversity and cultural unity; (2) development of skills and tools to manage diversity; and (3) structure of diversity development programs in organizations. Nonmajor graduate credit.

Mgmt 478. Strategic Management. (3-0) Cr. 3. F.S. SSS. Prereq: 370, POM 320, Fin 301, Mkt 340, Tr逻 360, graduate formulary. Examination of strategy formulation, implementation, and evaluation and control in today’s organizations. Emphasis is on strategic planning and decision making using the case method and/or projects.

Mgmt 479. Management Seminar. (3-0) Cr. 3. S. Prereq: Senior classification in management and permission of the instructor. Discussion of new or controversial issues in management. Course utilizes advanced material and research drawn from topic areas within management. Nonmajor graduate credit.

Mgmt 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 370, senior classification, permission of instructor. Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Mgmt 507. Organizational Behavior. (2-0) Cr. 2. F. Prereq: Graduate classification. Understanding human behavior in organizations and the nature of organizations from a managerial perspective. Special emphasis is placed on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

Mgmt 511. Ethics and Social Responsibility. (1-0) Cr. 1. Prereq: Graduate classification. The ethical issues, moral dilemmas, and stakeholder responsibilities embraced by today’s corporate decision makers. The morality of current management models and practices. Corporate governance and corporate social responsibility.

Mgmt 512. Strategic Management. (2-0) Cr. 2. S. Prereq: 501, 507, POM 502, MIS 503, Mkt 504, Fin 506, Acct 520. Critical analysis of case studies in strategic management with an emphasis on integrative decision making. Strategy implementation in light of the legal, regulatory, economic, social, and political contexts.

Mgmt 566. Entrepreneurship and New Business Creation. (3-0) Cr. 3. Prereq: 512. The essentials of starting and operating a new business. Topics include current research on entrepreneurial perspectives, starting and developing a new business, financing the venture, managing the growing firm, and special issues.

Mgmt 570. Managing Employee Attitudes and Behaviors. (3-0) Cr. 3. F.S. Prereq: 571 or 507 or Psych 450. Advanced topics germane to the management of individuals and groups over their work lives; sustained work commitment, motivation and job/career satisfaction, absenteeism, turnover, stress, leadership and career development (e.g., career ladders, mentoring).

Mgmt 571. Seminar in Personnel and Human Resources Management. (3-0) Cr. 3. S. Prereq: 571 or 507 or Soc 420. Topics and issues in personnel management with a focus on the management of human resources in organizations. Current personnel practices, philosophies, and behavioral science research.

Mgmt 573. Employment Law for Managers. (3-0) Cr. 3. Prereq: Graduate classification. Survey of employment law for managers. Topics include: hiring employees, employment practices (e.g., handbooks, harassment, drug testing, discipline), union relations, and termination of employment (e.g., COBRA).

Mgmt 575. Compensation Management. (3-0) Cr. 3. F. Prereq: 571. Concepts, techniques, and issues dealing with remuneration of the workforce. The impact of government legislation as well as organizational and societal issues.

Mgmt 581. Strategic Planning and Environmental Analysis. (3-0) Cr. 3. F. Prereq: 501 or permission of instructor. Discussion of concepts and techniques used in long range strategic planning. Examination of planning practices in business and not-for-profit organizations. Topics include environmental scanning, industry analysis, forecasting, corporate and competitive strategies, and tactics.

Mgmt 590. Special Topics. Cr. 1 to 3 each time taken. F.S.SS. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of management.

Management Information Systems

(Administered by the Department of Logistics, Operations and Management Information Systems)

Michael R. Crum, Chair of Department

Distinguished Professors: Allen, Baunel
Professors: Crum, Poist, Wacker

Professors (Emeritus): Thompson, Voorhees

Assistant Professors: Hackbarth, Johnson, Montabon, Ruben, Strader, Suzuki, Zhu

Instructors (Adjunct): Blanshan, Chooibineh, Clayton

Undergraduate Study

For undergraduate curriculum in business, major in management information systems, (MIS) see College of Business, Curricula.

The MIS Program is designed to provide students with a strong educational foundation that prepares them as information system (IS) professionals. The academic program consists of a specially designed curriculum that emphasizes conceptual, analytical, technical and interpersonal skills. The major offers students comprehensive training in the application, use
and management of information systems to prepare them to provide effective information services and support to organizations. The coursework is designed to provide the technical and conceptual skills associated with the use of information technology in business organizations. The program will impart knowledge on existing and emerging information technologies and their impact on the IS function; train to critically analyze business processes, identify inefficiencies and problems, assess information requirements, create business solutions and technical specifications for the supporting system; provide expertise to design and develop database applications using the latest database technologies; provide expertise in the latest telecommunication technologies; train in interpersonal and communication skills to effectively interact with various information systems’ clients; and provide managerial skills to manage IS projects.

To enter the MIS major, students must accumulate a cumulative ISU grade-point average of 2.75 or a grade point average of 2.75 in the foundation (see College of Business Curriculum). The MIS major requires students to take six courses. The required courses are: Com S 201, MIS 331, MIS 432, MIS 433, and MIS 435. In addition they will take one additional elective course from an approved list. These courses are designed to provide the conceptual, technical, and managerial skills necessary to design and develop systems in organizations. The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, 9 credits of which may not be used to satisfy any other requirement.

**Graduate Study**

The MIS area participates in two graduate programs in the College of Business—M.S. in Business, and full-time and part-time M.B.A. programs. The M.S. program is a 30 credit hour curriculum with a thesis. The M.B.A. program is a 48 credit hour curriculum. Twenty-four of the 48 credit hours are core business courses and the remaining 24 credit hours are graduate electives. Students can obtain a MIS specialization in the M.B.A. program by taking 12 credit hours of graduate MIS courses from a selected list of courses. The MIS area also participates in an interdisciplinary MS program in Information Assurance.

Courses open for nonmajor graduate credit: 432, 433, 435 and 438.

**Courses Primarily for Undergraduate Students**

MIS 330. Management Information Systems. (3-0) Cr. 3. Prereq: Com S 103 or equivalent. The role of information technology in organization. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations.

MIS 331. File Structures and Programming. (3-0) Cr. 3. Prereq: 330, Com S 207. Introduction to the concepts and use of data structures, file accesses and object-oriented programming methodologies in contemporary business environments. Object-oriented programming languages such as C++ used. Application development environments will be covered.

MIS 432. Information Systems Analysis. (3-0) Cr. 3. Prereq: 330, Com S 201. Critical analysis of business processes, data and process modeling, feasibility studies, CASE tools, and developing system design specifications. Nonmajor graduate credit.

MIS 433. Database Management Systems. (3-0) Cr. 3. Prereq: 331, development and implementation. Focus on data models, both classical and object oriented. Uses relational and/or object oriented database management systems. Nonmajor graduate credit.

MIS 435. Business Telecommunications. (3-0) Cr. 3. Prereq: 331. Overview of communications technology used in various business applications - local area network, wide area network, broadband network, wireless and voice network. Understand the nature of protocols, particularly internet protocols, in communications. Train to analyze network requirements, design and implement local area networks. Nonmajor graduate credit.

MIS 436. Information Systems for Entrepreneurs. (3-0) Cr. 3. Prereq: 332, 333. Only for non-MIS major. Provides the basic skills to manage a small IS operation in a small business/new venture. Topics will focus on small IS operations. Training will be provided on basics of hardware/software, databases, networking, and common small business IS applications.

MIS 438. Information Systems Development. (3-0) Cr. 3. Prereq: 432, 433. Design of business systems using contemporary tools and methods such as SQL, CASE tools, OOD tools, etc. Focuses on synthesizing concepts from earlier MIS courses. Nonmajor graduate credit.

MIS 439. Topics in Management of Information Systems. (3-0) Cr. 3. Prereq: 331, permission of instructor. A variety of topics will be covered and topics may vary between semesters. Some of the topics are information resources management, electronic commerce, decision support systems, and expert systems.

MIS 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 330, senior classification, permission of instructor.

**Courses for Graduate Students**

MIS 503. Management Information Systems. (2-0) Cr. 2. Prereq: Graduate classification. Current theories and practices of information processing and decision making. Focus on information technology and its uses in improving work practices, products, and tools for decision support. Use of artificial intelligence and other developments in technology. Competitive pressures and risks of information technology (IT). Setting IT strategy, information system planning and development of enterprise architecture. Focus on systems development and implementation.

MIS 531. Business Software Development. (3-0) Cr. 3. Prereq: 503 or equivalent. A survey of business-oriented programming languages with emphasis on design, writing, debugging and testing of computer programs for business transaction processing, and managerial decision support. Topics include structured programming and file processing.

MIS 533. Data Management for Decision Makers. (3-0) Cr. 3. Prereq: 503 or equivalent. A course designed to teach students the data needs of various functions such as marketing, finance, production, etc. The course will focus on teaching advanced data base management skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Importance of contemporary technologies will be stressed.

MIS 534. Electronic Commerce. (3-0) Cr. 3. Prereq: 503 or equivalent. Overview of how modern communication technologies including the internet and world wide web have revolutionized the way we do business. It will provide an understanding of various internet technologies and how companies are using the internet for commercial purposes. The course will also explore future scenarios on the use of these technologies and their impact on various industries and the society.

MIS 535. Telecommunications Management. (3-0) Cr. 3. Prereq: 503 or equivalent. Issues involved in the management of telecommunications function. Overview of communications technology used in various business applications, local area network, wide area network, broadband network, wireless and voice networks. Internet technologies and protocols. Analyzing the strategic impact of these technologies on organizations. Strategic planning for telecommunications, including network planning and analysis.

MIS 537. Information Resource Management. (3-0) Cr. 3. Prereq: 503 or consent of the instructor. Information Resource Management (IRM) is a popular concept of viewing information systems resources from a strategic resource perspective. This course will present and discuss the IRM concept as well as provide pragmatic tools for implementing this approach within the organization. Topics will include: IS outsourcing, total cost of ownership, IS planning and strategic analysis, justification for IT investment, management of IT human resources, traditional project management theory, and project management techniques derived from the Theory of Constraints (TOC).

MIS 538. Business Processes and Systems Development. (3-0) Cr. 3. Prereq: 503 or equivalent. Discusses the theory and techniques used to analyze information systems to support various business processes. The course also discusses the theory and concepts related to business systems design such as data and process modeling, relational data base theory, database management, systems design, and developing technical specifications for a business system. A working prototype for a business application will be developed using popular software development packages.

MIS 539. Topics in Management of Information Systems. (3-0) Cr. 3. Prereq: 503 or equivalent. A variety of topics may be offered in different semesters. Topics may include electronic commerce, information resources management, decision support systems, and expert systems.

MIS 590. Special Topics. Cr. 1 to 3 each time taken. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of MIS.

MIS 599. Creative Component. Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair. Preparation and writing of creative component.

**Courses for Graduate Students**

MIS 699. Research. Cr. 3 to 6, arranged. F.S.S.S. Prereq: Graduate classification, permission of major professor. Research.
Courses open for nonmajor graduate credit: 410, 442, 444, 447, 448, 449 and 492.

**Courses Primarily for Undergraduate Students**

Mkt 340. Principles of Marketing. (3-0) Cr. 3. F.S.SS. Prereq: Econ 101. The role of marketing in society. Markets, marketing institutions, and marketing functions with emphases on product, price, marketing communication, and marketing channel decisions.

Mkt 343. Personal Sales. (3-0) Cr. 3. Prereq: 340. Analysis of the theory and practice of personal selling with the context of relationship marketing and sales force automation. Topics include: goal setting, prospecting, time/territory management, questioning, presentations, objections, commitment and customer service; simulations of selling situations.

Mkt 410. Promotional Strategy. (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 447. Principles, concepts, and methods of planning and implementation of promotional strategies. Coordination of a variety of promotional elements: advertising, sales promotion, direct marketing, public relations and publicity of web communications, and personal selling. Nonmajor graduate credit.

Mkt 442. Sales Management. (3-0) Cr. 3. F.S. Prereq: 340. Functional aspects of sales force management; personal selling methods; procedures for recruiting, selecting, and training new salespeople; compensation and expense control systems; problems of sales force motivation and supervision; methods of territorial and quota assignment; sales department budgeting; distributor-dealer relations; other selected topics. Nonmajor graduate credit.

Mkt 443. Strategic Marketing Management. (3-0) Cr. 3. F.S. Prereq: 444, 447. Analysis of major elements of strategic marketing management. May include case studies or business simulations involving decision making using marketing tools from previous courses. (For marketing majors only.)

Mkt 444. Fundamentals of Marketing Research. (3-0) Cr. 3. F.S. Prereq: 340. Stat 227. Marketing research techniques: problem formulation, research design, questionnaire construction, sampling, data collection procedures, and analysis and interpretation of data related to marketing decisions. Nonmajor graduate credit.

Mkt 446. Retailing. (3-0) Cr. 3. F.S. Prereq: 340. Basic areas of retail management: buying, merchandising, store location, store layout, store design, credit management, and inventory control. Emphasis on practical application of retail management principles.

Mkt 447. Fundamentals of Consumer Behavior. (3-0) Cr. 3. F.S. Prereq: 340. Study of how consumers select, purchase, use, and dispose of goods and services. Includes analyses of how markets and others influence these processes. Application of concepts and methods of the behavioral sciences to marketing management decision making. Nonmajor graduate credit.

Mkt 448. Fundamentals of International Marketing. (3-0) Cr. 3. F.S. Prereq: 340. Introduction to terms used in international marketing and sources of information on international markets. Development of sensitivity toward foreign business environment and familiarity with operations of multinational corporations. Nonmajor graduate credit.

Mkt 449. Marketing Seminar. (3-0) Cr. 3. Prereq. 340. Analysis of current issues and problems in marketing with emphasis on new theoretical and methodological developments. Additional seminars may be offered. Nonmajor graduate credit.

C. Marketing for the Internet

Mkt 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 340, senior classification; permission of the instructor.

Mkt 492. Comparative Marketing. (3-0) Cr. 3. SS. Prereq: 340. The course is designed to provide experience to students in culture, social, economic, and political environment of marketing in a foreign country. Students complete a term project (e.g., a market plan) based on information collected in the foreign country. Students attend briefings by experts/officials of private and public organizations. Nonmajor graduate credit.

**Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students**

Mkt 504. Marketing. (2-0) Cr. 2. Prereq: Graduate classification. The scope of marketing and the identification and assessment of marketing opportunities. Consumer behavior and decision making process, organizational buyer behavior, and the role of research in the marketing planning process. Market definition and analysis, segmentation, competitor analysis, targeting and strategic decisions involved in developing the marketing program. Developing marketing strategies and relating them to the overall strategic marketing plan. Organizational design for marketing strategy implementation and control, and effectiveness.

Mkt 540. Marketing Management. (3-0) Cr. 3. F.S. Prereq: 504. Strategic marketing and decision making, with emphasis on cases utilizing qualitative and quantitative techniques and marketing models.

Mkt 541. International Marketing. (3-0) Cr. 3. F. Prereq: 504, 509. Scope and nature of global marketing operation; the context of international environment in which firms operate. Recent developments of international business, with case material, and framework for better understanding of the basic factors driving international business and marketing operations. Development of market entity strategies and global marketing mix policies, as well as export operations. Organizational issues related to the globalization of the firm.

Mkt 542. New Product Development and Marketing. (3-0) Cr. 3. S. Prereq: 504. Principles and concepts of new product development and introduction; decision areas include market definition and structure, idea generation, concept evaluation, test marketing, launch tracking, and global product planning; models and techniques of new product evaluation used by consumer product companies.

Mkt 544. Marketing Research. (3-0) Cr. 3. S. Prereq: 504, Stat 328 or 401. Marketing research methods are examined with emphasis on the use of advanced research methods in business research. Application of advanced sampling, measurement, and data analysis methods in research on market segmentation, market structure, consumers’ perceptions and decision processes, marketing communication, new product development, and pricing.

Mkt 547. Consumer Behavior. (3-0) Cr. 3. S. Prereq: 504. The behavior of consumers. Intensive review of literature from relevant disciplines. Applications of concepts and methods of the behavioral sciences to marketing management decision making.

Mkt 590. Special Topics. Cr. 1 to 3 each time taken. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of marketing.
Materials Engineering

Mufti Akinc, Chair of Department

Distinguished Professors: Gschneidner, Thompson, Trivedi

Professors: Akinc, Genalo, Jiles, S. Martin, McGee, Pecharsky, Tsukruk

Professors (Adjunct): Anderson, McCallum

Distinguished Professors (Emeritus): D. Martin, Verhoeven

Associate Professors: Chumbley, K. Constant, Otaigbe, Russell, Schilling

Associate Professors (Adjunct): Biner, Lograsso

Assistant Professors: Cann, A. Constant, Gleeson, Mallapragada, Napolitano

Assistant Professors (Adjunct): Selby, Snyder, Sordelet

Undergraduate Study

For the undergraduate curriculum in materials engineering leading to the degree bachelor of science, see College of Engineering, Curricula. The previously offered undergraduate degrees in Metallurgical Engineering and in Ceramic Engineering are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). Accreditation for the new undergraduate degree in Materials Engineering is being sought and a decision by ABET will be made in July 2001. Further specific information regarding the accreditation status of the undergraduate program in Materials Engineering will be available from the department, the College of Engineering, and ABET in early Fall 2001.

Materials Engineering is a broadly-based discipline relating the composition, microstructure, and processing of materials to their properties, uses and performance. Materials Engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials. Because of its interdisciplinary nature, career opportunities for Materials Engineers bridge all industrial and government sectors including: materials based technologies (materials production), communication/information technologies (semiconducting materials, fiber optics), medical/environmental technologies (biomedical, energy production, waste containment), consumer products (building and construction, durable goods), and transportation industries (automotive, aerospace).

The objectives of the Materials Engineering Program are to produce graduates who:

- are capable of responding to environmental, social, political, and economic constraints to improve the quality of life in Iowa and the world
- are capable of working independently and in teams and are proficient in written, oral, and graphical communication
- engage in lifelong learning in response to the rapidly changing knowledge base and changing environment of our world
- engage in advanced study in materials and related or complementary fields.

Materials Engineering graduates are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates will have gained experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research work. They will have hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in Materials Engineering relies on a strong foundation of mathematics, chemistry and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, and design experience throughout the program (beginning in the sophomore year). Students tailor their programs to their goals and interests through the selection of two areas of specialization from the four available: ceramic materials, electronic materials, metallic materials and polymeric materials. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

The department also offers a cooperative education program that combines classroom learning with work experience. (See College of Engineering Cooperative Programs). Well qualified juniors in Materials Engineering who are interested in graduate study may apply for concurrent enrollment during their senior year in the Graduate College to simultaneously pursue both B.S. and M.S. degrees. See Materials Science and Engineering for more information.

Courses open for nonmajor graduate credit: All 300 or 400 level courses except 313, 370, 396, 397, 398, 413, 414, 466, 490, 498.

Courses Primarily for Undergraduate Students

Mat E 212. Thermodynamics in Materials Engineering. (3-0) Cr. 3. S. Prereq: Chem 178 and credit or enrollment in Math 266. Basic laws of thermodynamics applied to materials systems.

Courses and Programs: Materials Engineering 285

Thermodynamics of chemical reactions. Homogeneous and heterogeneous equilibrium. Phase diagrams for materials systems.

Mat E 213. Integrated Materials Design. (1-3) Cr. 2. F. Prereq: Credit or enrollment in 211. Design of devices, parts, processes or systems (including experiments) taking into account physical, chemical, mechanical, economic and ethical principles. Project planning, including scheduling and cost estimation. Application of design tools such as CAD, CAM and FEM. Analysis of problems, design and development of solutions. Safety, concept of shared responsibility, teamwork, communication. Testing and data collection. Interpretation of results and reporting. Oral presentation skills.

Mat E 214. Structural Characterization of Materials. (1-6) Cr. 3. S. Prereq: Credit or enrollment in Phys 221. Structural characterization of ceramic, electronic, polymeric and metallic materials. Techniques include optical and electron microscopy, x-ray diffraction, and thermal analysis. Identification of materials type, microstructure, and crystal structure.

Mat E 271. Introduction to Materials Science and Engineering. (3-0) Cr. 3. F. S. Prereq: Chem 167 or 177. Bonding, structure and properties of solids. Relationship between the structure and defects in solids and their mechanical, thermal, electrical and optical properties. General overview of properties and processing of metals, ceramics, polymers and composite material systems with an emphasis on control of mechanical properties of steels and lightweight load-bearing metals. Case study of lightweight structures.

Mat E 298. Cooperative Education. Cr. R. F. S.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

Mat E 313. Integrated Materials Design. (1-3) Cr. 2. F. Prereq: 213. Design of devices, parts, processes or systems (including experiments) taking into account physical, chemical, mechanical, economic and ethical principles. Project planning, including scheduling and cost estimation. Application of design tools such as CAD, CAM and FEM. Analysis of problems, design and development of solutions. Safety, concept of shared responsibility, teamwork, communication. Testing and data collection. Interpretation of results and reporting. Oral presentation skills.

Mat E 332. Semiconductor Materials and Devices. (Same as E E 332.) (3-0) Cr. 3. S. Prereq: 331 or E E 333 and credit or enrollment in E E 312 or Phys 222. Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED’s. Nonmajor graduate credit.

Mat E 334. Introduction to Magnetic Materials. (3-0) Cr. 3. S. Prereq: 211. Basic concepts of the magnetic hierarchy of solids, including the magnetic interactions in magnetic materials. Nonmajor graduate credit.

Mat E 351. Introduction to Polymeric Materials. (3-0) Cr. 3. F. Prereq: 211. Introduction to polymeric materials, synthesis, structure and properties. Relationship between polymer composition, processing and properties. Oral presentation. Nonmajor graduate credit.

Mat E 362. Principles of Nondestructive Testing. (Same as E M 362L.) (3-0) Cr. 3. S. Prereq: Phys 112 or 222. Radiographic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests; materials to which applicable; types of defects detectable, limitations, and reliability safety precautions. Nonmajor graduate credit.

Mat E 362L. Nondestructive Testing Laboratory. (Same as E M 362L.) (1-0) Cr. 1. S. Prereq: Credit or enrollment in 362L. Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material’s microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories. Nonmajor graduate credit.

Mat E 370. Tying with Technology. (Same as Cpr E 370.) (2-3) Cr. 3. F.S. Prereq: C 1201, junior standing in non-engineering major. A project-based, hands-on learning environment. Literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed of Legos and other normal microcomputer. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.

Mat E 396. Summer Internship. Cr. R. SS. Prereq: Permission of department. Summer professional work period.

Mat E 397. Engineering Internship. Cr. R. F.S. Prereq: Permission of department; junior classification. Professional work period, one semester maximum per academic year.

Mat E 398. Cooperative Education. Cr. R. F.S.S. Prereq: 298 permission of department. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Mat E 413. Integrated Materials Design. (0-4) Cr. 2. F.S. Prereq: 331, 332, or equivalent exposure to systems or (systems including experiments) taking into account physical, chemical, mechanical, economic and ethical principles. Project planning, including scheduling and cost estimation. Application of design tools such as CAD, CAM and FEM. Analysis of problem, design and development of solutions. Safety, concept of shared responsibility, teamwork, communication. Testing and data collection. Interpretation of results and reporting. Oral presentation skills.

Mat E 414. Materials Engineering Design. (0-4) Cr. 2. S. Prereq: Senior classification. Practical applications of physical, chemical, mechanical and/or electrical principles to solving materials science and engineering design problems. Consideration of economic and time constraints in design of materials and processes. Involvement in “real world” design problems specified by external sponsors such as industry or government. Oral and written final project report.

Mat E 423. Glass Science and Engineering. (2-3) Cr. 3. F. Prereq: 212. Composition, structure, properties, manufacturing, and uses of inorganic glasses, especially silicate glasses. Nonmajor graduate credit.

Mat E 433. Advanced Electronic Materials. (2-1) Cr. 3. F. Prereq: 331. Advanced concepts in band theory such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

Mat E 498. Cooperative Education. Cr. R. F.S.S. Prereq: 398 permission of department. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.
Materials Science and Engineering

Mufti Akin, Chair of Department
Distinguished Professors: Gschneidner, Thompson, Trivedi
Professors: Akin, Genalo, Jiles, S. Martin, McGee, Pecharsky, Tsukruk
Professors (Adjunct): Anderson, McCallum
Distinguished Professors (Emeritus): D. Martin, Verhoeven
Professors (Emeritus): Kayser, Larsen, Patterson, Smith, Wechsler, Wilder
Associate Professors: Chumbley, K. Constant, Otaigbe, Russell, Schilling

Graduate Study

The department offers work toward the degrees master of science (with thesis) and doctor of philosophy, with a major in Materials Science and Engineering. Research in the department is administered through the Engineering College and Institute for Physical Research and Technology (IRPRT) Centers such as the Applied Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center and the Center for Advanced Technology Development which provide excellent facilities and graduate student research assistantships.

Graduates have a broad understanding of materials science and engineering and related disciplines. They are able to communicate effectively with scientific colleagues in formal and informal settings. Graduates are able to address complex problems in materials science and process design while considering the various constraints inherent to both industrial and research environments. They are skilled in carrying out independent and collaborative research, communicating research results and writing concise and persuasive grant proposals.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science or related engineering. However, well qualified juniors in materials engineering interested in graduate study can apply for concurrent enrollment in the Graduate College to simultaneously pursue M.S. and B.S. degrees. Graduate assistantships can be awarded to students concurrently enrolled. Both M.S. and B.S. degrees can be obtained in five years of study under the concurrent enrollment plan.

The requirements for the MS and Ph.D. degrees are established by the student’s program of study committee within the established guidelines of the Graduate College. These requirements include coursework, research, dissertation, and a final oral examination. The PhD degree also includes a qualifying examination.

There are no foreign language requirements for either of the graduate degrees administered by the Department of Materials Science and Engineering.

Graduate students wishing to declare a formal minor in Materials Science and Engineering will have at least one M S E faculty member serving on their advisory committee. For the M.S. and Ph.D. degrees, they will take a minimum of 8 and 12 M S E course credits, respectively.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

M S E 501. Thermodynamics of Materials. (3-0) Cr. 3. F. Prereq: Mat E 315 or Mat E 212 or Chem 321, Math 266. Review of basic principles, thermodynamics laws and functions, statistical thermodynamics, probabilities and distributions, phase transformations, solution thermodynamics, phase diagrams, reactions with gases.

M S E 518. Metallurgy of Rare Earths. (2-0) Cr. 2. Prereq: Mat E 443 or Phys 322 or Chem 321. Electronic configuration, valence states, minerals, ores, beneficiation, extraction, separation, metal preparation and purification, crystal structure, transformation, melting and boiling points, chemical behavior, inorganic compounds, alloy chemistry, nature of the chemical bond, mechanical and elastic properties, magnetic properties, resistivity, and superconductivity.

M S E 519. Magnetism and Magnetic Materials. (Same as E E 519.) (3-0) Cr. 3. Prereq: Mat E 211 or 271 or 272 or Mat E 211 or E E 313 or Phys 364. Magnetic fields, flux density and magnetization. Magnetic materials, magnetic measurements. Magnetic properties of materials. Domains, domain walls, domain processes, magnetization curves and hysteresis. Types of magnetic order, magnetic phases and critical phenomena. Magnetic moments of electrons, theory of electron magnetism. Technological application, soft magnetic materials for electromagnets, hard magnetic materials, permanent magnets, magnetic recording technology, magnetic measurements of properties for materials evaluation.

M S E 521. Mechanical Behavior and Manufacturing of Polymers and Composites. (Same as M E 521.) See Mechanical Engineering.

M S E 533. Characterization Methods in Materials Science. (3-0) Cr. 3. Prereq: Mat E 214 or equivalent. Characterization of ceramic, metal, polymer and glassy materials using modern analytical techniques. Spectroscopic (IR, Raman, UVVIS/NIR, and NMR), thermal (DSC, DTA/TGA, and DMA) methods, mechanical and rheological testing, magnetic and electrical characterization, and powder characterization.

M S E 535. X-Ray, Electron and Neutron Diffraction. (3-0) Cr. 3. Prereq: Mat E 214. Introduction to theory of x-ray, electron and neutron diffraction, symmetry operations, space groups, and reciprocal lattice. Laue and powder diffraction methods and their application to precise lattice parameters, determination of simple crystal structures, phase identification, orientation, texture, grain size, strain, residual stress, and order-disorder.

M S E 539. Electronic Properties of Materials. (Same as E E 539.) (3-0) Cr. 3. Prereq: Mat E 331 or E E 332 or Phys 322. Review of quantum mechanics, band theory of solids, LACO model, metallic conduction, lattice vibrations, semiconductors, semiconducting devices, dielectric polarization mechanisms, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, conducting oxides, magnetism.

M S E 590. Special Topics. Cr. var. Prereq: Permission of instructor.

Assistant Professors (Adjunct): Mather

Assistant Professors (Emeritus): Peake

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in mathematics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

The program in mathematics offers training suitable for students planning to enter secondary school teaching, to work in mathematics and computation for industry or government, or to continue their studies in graduate school. The requirements for an undergraduate major in mathematics are designed so that the student may have opportunity for appropriate specialization to meet one or more of the foregoing objectives and, at the same time, obtain a thorough introduction to the mathematics underlying all of them.

Graduates understand a broad range of mathematical topics and are familiar with a broad range of mathematical models. They have skills for solving problems in diverse situations. They can construct rigorous arguments to demonstrate mathematical facts. They can communicate their mathematical methods to others and can justify their assumptions.

The requirements for an undergraduate major include:

(a) The sequence 175, 176 or the sequence 165, 166, 201. Also 265, 301, 317, 414, and either 266 or 267.

(b) 15 additional credits chosen from math courses at the 300 level or above, 6 of which must be included in (341, 365, 471, 481).

(c) The courses used to satisfy a) and b) above must include one of the sequences 301, 302: 414, 415, 435, 436.

(d) At least one of 490, 491, 492, or 542.

(e) English proficiency requirement: The department requires a grade of C– or better in each of English 104 and 105 (or 105H) and an upper-level writing requirement that may be met by writing an acceptable undergraduate thesis (Math 491) or by taking at least one of Engl 302, 305, 314 or JI MC 201. A grade of C– or better is required.

The department strongly recommends that each student majoring in mathematics include in the program substantial supporting work beyond the minimum general education requirement of the college in one or more areas of application of mathematics, such as other mathematical sciences, engineering, natural science, or social science. In particular, it recommends that each student take Cor S 207, 208, Stat S 222; and Stat 341, 342 (or Math 304). It also strongly recommends two years of French, German, or Russian for students contemplating graduate study in mathematics. Credits earned in Math 104, 105, 140, 141, 142, 150, 151, 160, 181, 182, 195, 196, 297, cannot be counted toward graduation by mathematics majors.

The department offers a minor in mathematics which may be earned by credit in Math 165, 166, 265, 301, 307 or 317, and 266 or 267. Courses below 165 cannot be used.

Graduate Study

The department offers programs leading to a master of science or doctor of philosophy degree in mathematics or applied mathematic, as well as minor work for students whose major is in another department. The department also offers a program leading to the degree of master of school mathematics (M.S.M.).

Students desiring to undertake graduate work leading to the M.S. or Ph.D. degree should have at least 12 semester credits of work in mathematics beyond calculus. It is desirable that these credits include advanced calculus and abstract algebra.

The M.S. degree requires at least 30 credit hours and students must write a creative component or thesis and pass a comprehensive oral examination over their coursework and their creative component or thesis. See the department handbook for specific requirements.

The Ph.D. degree requires a student to take 54 hours of coursework in addition to research hours, pass written qualifying examinations, pass an oral preliminary exam, and perform an original research project culminating in a dissertation which is defended by an oral exam. Ph.D. candidates must have at least one year of supervised teaching experience. See the department handbook for specific requirements. (Also see the website: www.math.iastate.edu/gradcomm/gradreq.html for details.)

The M.S.M. degree is primarily for in-service secondary mathematics teachers. Students desiring to pursue the M.S.M degree should present some undergraduate work in mathematics beyond calculus. Candidates for the M.S.M. degree must write an approved creative component and pass a comprehensive oral examination over their course work and their creative component.

Courses Primarily for Undergraduate Students

Math 10. High School Algebra. Cr. 0. F.S.S. Prereq: For students who do not have adequate facility with topics from high school algebra or do not meet the algebra admission requirement. All students should initially enroll in Math 10. The course is divided into tracks of one- and two-semester lengths. For most students a diagnostic exam will determine which track must be taken. Students will receive a grade in Math 25 or 30 respectively depending on the level of material covered. Satisfactory completion of Math 30 is recommended for students planning to take Math 140 or 151, while Math 25 is sufficient for Math 104, 105, 150, 195, Stat 101 or 105. Students must complete Math 30 to remove a deficiency in the algebra admission requirement. Topics include signed numbers, polynomials, rational and radical expressions, exponential and logarithmic expressions, and equations. Offered on a satisfactory-fail grading basis only.

Math 20. High School Geometry. Cr. 0. F.S.S. Prereq: For students who do not meet the geometry admission requirement. Elements of Euclidean geometry including congruence, parallel lines, circles, similar polygons, perimeters, areas, surface areas, and volumes. Offered on a satisfactory-fail grading basis only.

Math 25. High School Algebra. Cr. 0. F.S.S. Prereq: For students who do not have adequate facility with topics from high school algebra or do not meet the algebra admission requirement. All students should initially enroll in Math 10. The course is divided into tracks of one- and two-semester lengths. For most students a diagnostic exam will determine which track must be taken. Students will receive a grade in Math 25 or 30 respectively depending on the level of material covered. Satisfactory completion of Math 30 is recommended for students planning to take Math 140 or 151, while Math 25 is sufficient for Math 104, 105, 150, 195, Stat 101 or 105. Students must complete Math 30 to remove a deficiency in the algebra admission requirement. Topics include signed numbers, polynomials, rational and radical expressions,
Math 101. Orientation in Mathematics. (1-0) Cr. R. F. For new majors. Issues to consider in planning a program of study. Sources of general information and perspectives concerning mathematics. Discussion of possible career opportunities. Offered on a satisfactory-fail grading basis only.

Math 104. Introduction to Probability and Matrices. (3-0) Cr. 3. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Permutations, combinations, probability, binomial and multinomial theorems, matrices, expected value. Either 104 or 150 may be counted toward graduation, but not both.

Math 105. Introduction to Mathematical Ideas. (3-0) Cr. 3. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Topics from mathematics and mathematical applications with emphasis on their nontraditional applications. Offered on a satisfactory-fail grading basis only.

Math 140. College Algebra. (3-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Topics from mathematics and mathematical applications with emphasis on their nontraditional applications. Offered on a satisfactory-fail grading basis only.

Math 141. Trigonometry. (2-0) Cr. 2. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Topics from trigonometry, complex numbers, quadratic and polynomial equations, functions, graphing, polynomial and rational functions, exponential and logarithmic functions, systems of equations. Students in the College of Liberal Arts and Sciences may not count Math 140, 141, 142, 149, or 195 toward Group III of the General Education Requirements.

Math 145. Calculus I. (4-0) Cr. 4. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry, 1 semester of trigonometry or enrollment in 141 or 142. Analytic geometry, differentiation and integration of single-variable functions, applications of derivatives. Additional material of a theoretical, conceptual, computational, or model-regenerating nature. Some of the work may require more ingenuity than is required in Math 145. Preference will be given to students in the University Honors Program. Only one of 151 or 160 or the sequence 165-166, or the sequence 181-182 may be counted toward graduation.

Math 146. Calculus II. (4-0) Cr. 4. F.S.SS. Prereq: Grade of C– or better in 165, 165H, or 175 or high math placement scores. Integration, applications of the integral, matrices, differentiation of functions of several variables. Only one of 151, 160, or the sequence 165-166, the sequence 175-176, or the sequence 181-182 may be counted toward graduation.

Math 151. Calculus for Business and Social Sciences. (2-1) Cr. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Differential calculus, integral calculus, introduction to max-min theory for functions of two variables. Will not serve as prerequisite for 265 or 266. Only one of 151, 160, the sequence 165-166, the sequence 175-176, or the sequence 181-182 may be counted toward graduation.

Math 160. Survey of Calculus. (4-0) Cr. 4. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry or enrollment in 141 or 142. Analytic geometry, differentiation and integration of single-variable functions, applications of derivatives. Additional material of a theoretical, conceptual, computational, or model-regenerating nature. Some of the work may require more ingenuity than is required in Math 160. Preference will be given to students in the University Honors Program. Only one of 151, 160, or the sequence 165-166, or the sequence 181-182 may be counted toward graduation.

Math 165. Calculus I. (4-0) Cr. 4. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry or enrollment in 141 or 142. Functions, limits, continuity, differentiation, derivatives of vector-valued functions, applications of derivatives. Additional material of a theoretical, conceptual, computational, or model-regenerating nature. Some of the work may require more ingenuity than is required in Math 165. Preference will be given to students in the University Honors Program. Only one of 151 or 160 or the sequence 165-166, the sequence 175-176, or the sequence 181-182 may be counted toward graduation.

Math 166. Calculus II. (4-0) Cr. 4. F.S.SS. Prereq: Grade of C– or better in 165, 165H, or 175 or high math placement scores. Integration, applications of the integral, matrices, differentiation of functions of several variables. Only one of 151, 160, or the sequence 165-166, the sequence 175-176, or the sequence 181-182 may be counted toward graduation.

Math 166H. Honors Calculus II. (4-0) Cr. 4. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry or enrollment in 141 or 142. Additional material of a theoretical, conceptual, computational, or model-regenerating nature. Some of the work may require more ingenuity than is required in Math 165. Preference will be given to students in the University Honors Program. Only one of 151 or 160 or the sequence 165-166, the sequence 175-176, or the sequence 181-182 may be counted toward graduation.

Math 195. Mathematics for Elementary Education I. (2-2) Cr. 3. F.S. Prereq: Satisfactory performance on placement exam, 2 years high school algebra, 1 year of high school geometry, 1 semester of trigonometry or enrollment in 141 or 142. Language of sets, systems of whole numbers, numeration and algorithms for computation, topics from number theory, geometric shapes and measurement, congruence, similarity and transformations, probability and statistics.

Math 196. Mathematics for Elementary Education II. (2-2) Cr. 3. F.S. Prereq: Grade of C– or better in 166. Language of sets, systems of whole numbers, numeration and algorithms for computation, topics from number theory, geometric shapes and measurement, congruence, similarity and transformations, probability and statistics.

Math 201. Introduction to Proofs. (2-0) Cr. 2. F.S. Prereq: 181 or 182. Reading and writing simple proofs. Proofs involving set definitions, limits, derivative, and the definite integral. Additional material of a theoretical, conceptual, computational, or model-regenerating nature. Some of the work may require more ingenuity than is required in Math 265. Preference will be given to students in the University Honors Program. Only one of the sequence 175-176 or 201 may be counted toward graduation.

Math 205. Computer Programming in FORTRAN. (Same as Comp S 205.) See Computer Science.

Math 265. Calculus III. (4-0) Cr. 4. F.S.SS. Prereq: Grade of C– or better in 166, 166H, or 176. Multiple integrals, vector fields and vector integrals, sequences and series.

Math 265H. Honors Calculus III. (4-0) Cr. 4. F.S. Prereq: Satisfactory performance on placement exam, 2 years high school algebra, 1 year of high school geometry, enrollment in the university Honors Program. Multiple integrals, vector fields and vector integrals, sequences and series.

Math 271. Elementary Differential Equations and Laplace Transforms. (4-0) Cr. 4. F.S.SS. Prereq: Grade of C– or better in 166, 166H, or 176. Same as 266 but also including Laplace transforms and series solutions to ordinary differential equations.
Math 268, Laplace Transforms. (1-0) Cr. 1. F.
Prereq: 266. Laplace transforms and series solutions to ordinary differential equations. Together, 266 and 268 are the same as 267.

Math 272. Introduction to Scientific Computing. (3-0) Cr. 3. S.S.S. Prereq: Math 265 or enrollment in Math 266, Math 268 or Math 267; knowledge of Fortran or C. Vector, matrix and graphics programming for scientific applications. Algorithms for inter-polation, integration, numerical solutions to differential equations, nonlinear equations and optimization in one and several variables, and ordinary differential equations. Emphasis on high quality mathematical software, its strengths and limitations.

Math 290. Special Problems. Cr. 1 to 3 each time taken. H. Honors

Math 297. Intermediate Topics in Elementary Mathematics. (2-2) Cr. 3. F.S. Prereq: Grade of C- or better in Math 197. Additional topics in geometry including coordinates, congruence similarity, and transformations. Pre-algebra reasoning. Topics in mathematics of current importance to prospective elementary teachers.

Math 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Math 301. Introduction to Abstract Algebra. (3-0) Cr. 3. F.S. Prereq: 166 or 166H or 176 and 307 or 317. Introduction to the theory of groups and rings. Emphasis on writing proofs. Nonmajor graduate credit.

Math 304. Introductory Combinatorics. (3-0) Cr. 3. F. Prereq: 166, 166H or 176. Permutations, combinations, binomial coefficients, inclusion-exclusion principle, discrete probability, classical probability. Additional topics selected from recurrence relations, generating functions, random walks, and Markov chains. Nonmajor graduate credit.

Math 307. Theory of Matrices. (3-0) Cr. 3. F.S.S. Prereq: 2 semesters of calculus. The algebra of matrices including vector spaces, simultaneous linear equations, determinants, quadratic forms, eigenvalues, and diagonalization over the real and complex numbers. Only one of 307, 385, 395 may be counted toward graduation. Nonmajor graduate credit.

Math 308. Application of Linear Algebra to Discrete Optimization. (3-0) Cr. 3. S. Prereq: 307 or 317. Linear programming and topics chosen from game theory, transversal and assignment problems, discrete dynamic processes, and multiple objective linear programming. Nonmajor graduate credit.

Math 331. Topology. (3-0) Cr. 3. S. Prereq: 207 or 317. Topological properties of metric spaces, including R^n, sequences, continuous functions, completeness, compactness. Nonmajor graduate credit.

Math 365. Complex Variables with Applications. (3-0) Cr. 3. F. S.S. Prereq: 265. Functions of a complex variable, including differentiation, integration and series expansions, residues, evaluation of integrals, conformal mapping. Only two of 365, 385, 395 may be counted toward graduation. Nonmajor graduate credit.

Math 378. Optimization and Modeling with Artificial Life. (3-0) Cr. 3. S. Prereq: One of 301, 304, Com S 330 or other discrete math. Fundamentals of evolutionary algorithms for optimization. Introduction to the modeling and optimization techniques that together are called artificial life or alife. Biological paradigms from evolution and ecology are used to solve problems in biology, ecology and engineering and areas such as combinatorial or functional optimization. Evolutionary programming, genetic algorithms, genetic programming, evolutionary neural nets, and their uses in optimization and modeling. Nonmajor graduate credit.

Math 395. Intermediate Engineering Mathematics. (4-0) Cr. 4. F.S. Prereq: 267. Linear systems; algorithms for generation of fractals; fractal geometry, chaos and dynamical systems; applications to chaotic systems. Nonmajor graduate credit.

Math 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Math 421. Logic for Mathematics and Computer Science. (Same as Com S 421) (3-0) S. Prereq: 301 or 307 or 317 or Com S 330. Propositional and predicate logic, Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs, program specification and verification. Nonmajor graduate credit.

Math 436. Geometry. (3-0) Cr. 3. F. Prereq: 307 or 317. Euclidean geometry through properties invariant under similarity transformations. Use of both synthetic and analytic methods. Nonmajor graduate credit.

Math 437. Geometry. (3-0) Cr. 3. S. Prereq: 435. Non-Euclidean geometry through properties invariant under isometric transformations. Analytic methods applied to at least two of elliptic, projective, and hyperbolic geometries. Nonmajor graduate credit.

Math 439. Mathematics of Fractals. (3-0) Cr. 3. S. Prereq: 265; some knowledge of programming. Topology of metric spaces, iterated function systems; algorithms for fractals; fractal dimension; Julia sets and the Mandelbrot set; applications to chaotic systems. Nonmajor graduate credit.

Math 485. Advanced Calculus for Applied Mathematicians. (4-0) Cr. 4. F. F.S. Prereq: 265. Frequently applied concepts from multivariable calculus, presented with enough theory to promote understanding of applications. Topics may include derivatives of vector-valued functions, Jacobian coordinates, Green’s theorem, divergence theorem, Stokes’s theorem, uniform convergence, operations on series and integrals, improper integrals. Nonmajor graduate credit.

Math 471. Computational Linear Algebra and Fixed Point Iteration. (Same as Com S 471) (3-0) Cr. 3. S. Prereq: 265 and either 266, or 267; knowledge of FORTRAN or C. Computational error, solutions of linear systems, least square methods, similarity methods for eigenvalues, non-linear equations, fixed point iteration in one and several variables, Newton’s method in several variables. Nonmajor graduate credit.

Math 481. Numerical Solution of Differential Equations and Interpolation. (Same as Com S 481) (3-0) Cr. 3. S.S. Prereq: 265 and either 266 or 267; knowledge of FORTRAN or C. Orthogonal polynomials, least square and spline methods, numerical differentiation and integration. Euler, Taylor, Runge-Kutta, and predictor-corrector methods for solution of systems of ordinary differential equations. Nonmajor graduate credit.

Math 484. Computational Mathematics for Biologists. (Same as Com S 484) (3-0) Cr. 3. F. A survey of graph theory, linear algebra, discrete math, and algorithms used in computational biology with examples taken from genomics, phylogenetics, and structural genomics. This course provides mathematical background for BCB/GenCom S Math 594.

Math 489. History of Mathematics. (3-0) Cr. 3. S. Prereq: 6 credits in mathematics at the 300 level or above. History of mathematical ideas found in the undergraduate curriculum. It includes a discussion of the historical development of the number system, the ideas that arose, and the influence of the culture on the type of mathematical ideas that developed. Some of the particular cultures and their mathematics that are studied include: Babylonians and Ancient Sumer, Ancient Greek, Arabic, Indian, Western European and Chinese. Nonmajor graduate credit.

Math 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 301 or 317; 6 credits in mathematics. No more than 9 credits of Math 490 may be counted toward graduation. H. Honors

Math 491. Undergraduate Thesis. Cr. 2 or 3. Writing a formal mathematics paper. Upon approval by the departmental advisor, this course may be repeated for credit.

Math 492. Undergraduate Seminar. Cr. 2. S. Prereq: Consent of instructor. Introduction to mathematics research. Mathematical presentation, mathematical literature search, participating in seminar on advanced topics in mathematics. Seminar content varies.

Math 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.
Courses for Graduate Students

Math 610. Seminar. Cr. var.

Math 690. Advanced Topics. Cr. var. Prereq: Permission of instructor.

A. Algebra
B. Functional Analysis
C. Measure Theory
D. Approximation Theory
E. Linear Algebra
F. Calculus of Variations
H. Harmonic Analysis
I. Combinatorics
K. Mathematics Education
L. Logic and Foundations
M. Complex Analysis
N. Numerical Analysis
O. Ordinary Differential Equations
P. Partial Differential Equations
Q. Group Theory
R. Mathematical Physics
S. Set Theory
T. Topology
U. Automata Theory
V. Optimization Theory
W. Probability and Stochastic Processes
Y. Special Functions
Z. Ring Theory

Mechanical Engineering

Warren R. DeVries, Chair of Department

Distinguished Professors: Bernard
Professors: Bahadur, Brown, Chandra, Colver, Cook, DeVries, Molian, Nelson, Okishi, Pate, Pletcher, Shapiro, VanGerpen, Wilson

Professors (Collaborators): Vanderpl overnight

Distinguished Professors (Emeritus): Serowy
Professors (Emeritus): Bathie, Baumgarten, Danofsky, De Jong, Eide, Hall, Hendrickson, Henkin, Junghun, Kavanagh, Mischke, Peters, Roberts, Spinnrad, Wechsler

Associate Professors: Bullen, Flugrad, Garinella, Heindel, Kelkar, Luecke, Maxwell, Vance, VanMeter

Associate Professors (Adjunct): Edelson, Gray, McClelland

Associate Professors (Collaborator): Prusa

Associate Professors (Emeritus): Joensen

Assistant Professors: Battaglia, Byden, Cao, Maldonado, Olsen, Pham, Qamhiyah

Assistant Professors (Adjunct): Gassman, Starrs

Assistant Professors (Collaborators): Moussy

Instructors (Adjunct): Openshaw, Wendt

Undergraduate Study

For the undergraduate curriculum in mechanical engineering leading to the degree of bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Mechanical engineers are typically involved with such activities as:

• generation, distribution, and use of energy
• development and application of manufacturing systems and processes
• automation and control of mechanical and thermal systems
• design of various products for consumer and commercial markets

About one-fourth of all engineers practicing today have been educated as mechanical engineers. Their activities include research, development, design, testing, production, technical sales, and technical management.

Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Through creative use of analysis, modeling, design, synthesis, and interpersonal skills they solve important problems to improve our world.

The overall objective of the curriculum in mechanical engineering is to prepare students for lifelong learning and growth in careers as mechanical engineers in the rapidly-changing industrial world.

Upon successfully completing the mechanical engineering curriculum, students will be prepared for immediate entry into the field or for further study at the graduate level.

The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics and the sciences of physics and chemistry.

Through courses in these subjects, students will attain the basic knowledge required to understand and analyze mechanical engineering systems.

This background is extended and organized through studies in solid mechanics, fluid mechanics, thermodynamics, heat transfer, materials, and electrical applications.

Upon completion of courses in these areas of the curriculum, students will be able to apply engineering principles to create, analyze or design, improve processes, devices or systems to accomplish desired objectives.

A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design.

• Students will develop critical judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints.

In addition, a sequence of courses emphasizing engineering design begins in the first year and culminates with a capstone design experience.

• Students will not only be able to apply their engineering knowledge to real-life design problems but also to critically evaluate the solutions.

Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is emphasized throughout the curriculum.

• Students will learn to effectively work in teams to solve engineering problems involving a disciplined process of critical thinking that crosses content boundaries. They will be aware of social and environmental aspects of
engineering, as well as the ethical standards of the engineering profession.

The curriculum provides flexibility to allow students to broaden their perspectives or to focus in more depth in areas of particular interest. Organized sequences of technical electives can be chosen from areas which represent major concentrations in the field of mechanical engineering. Optional areas of specialization include energy conversion and utilization, thermal system design, mechanical system design, materials and manufacturing, nuclear engineering, thermal and environmental engineering, and biological engineering.

Elective courses provide additional emphasis in terms of the student’s unique educational goals, whether they include immediate entry into industry or further study at the graduate level.

In addition, students elect courses in the humanities, social sciences, U.S. diversity and international perspectives.

Through these courses, students develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects.

Students in mechanical engineering are encouraged to participate in the cooperative education program or to obtain engineering internships, both in the United States and abroad. Study abroad is also encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Graduate Study

The department offers work for the degrees master of science, and doctor of philosophy with major in mechanical engineering. The master of science degree may be earned with or without thesis. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments.

The graduate program offers advanced study in fluid mechanics, fluid power, controls, heat transfer, computer-aided design, machines and systems, materials and manufacturing processes, thermodynamics, energy utilization, virtual reality applications, micro-electro-mechanical systems, computational fluid dynamics, combustion, HVAC, IC engines, and radioactive waste management.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student’s program of study committee within established guidelines of the Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional support coursework will be required. A foreign language requirement exists for the degree doctor of philosophy only if the student’s program of study committee deems it appropriate to a specific program of study.

Courses open for nonmajor graduate credit: All 300 and 400 level courses except 330, 396, 397, 398, 440, 490, and 498.

Courses Primarily for Undergraduate Students

M E 231. Engineering Thermodynamics I. (3-0) Cr. 3. F.S. Prereq: Math 265; Chem 167, Phys 222. Fundamental concepts based on zeroth, first and second laws of thermodynamics. Properties and processes for ideal gases and solid-liquid-vapor phases of pure substances and power cycles. Credit for only one course in each of the following groups of courses may be applied toward graduation: 330, 231; 440, 442. The following courses are for students who are majoring in the mechanical engineering program: 330, 440. Credit in these courses will not be counted toward a degree in mechanical engineering.

M E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

M E 324. Manufacturing Engineering. (3-2) Cr. 4. F.S. Prereq: Mat E 272, E M 306. Plastic deformation and work hardening. Manufacturing processes including forming, machining, casting and welding with emphasis on manufacturing considerations in design. Quality control and computer integration issues. Laboratory exercises will be an integral component of the course. Nonmajor graduate credit.

M E 330. Thermodynamics. (3-0) Cr. 3. F.S. Prereq: Phys 222. For students electing one course in engineering thermodynamics. First and second laws of thermodynamics. Properties and processes for pure substances. Selected applications including cycles for power and refrigeration. Psychrometrics. Credit for only one course in each of the following groups of courses may be applied toward graduation: 330, 231; 440, 442. The following courses are for students who are not in the mechanical engineering program: 330, 440. Credit in these courses will not be counted toward a degree in mechanical engineering.

M E 335. Fluid Flow. (3-2) Cr. 4. F.S. Prereq: Credit or enrollment in 332, E M 345, Math 266 or 267, credit or enrollment in 370. Incompressible and compressible fluid flow fundamentals. Basic analytical analysis and simulation. Internal and external flow applications. Lab demonstrations and experiments emphasizing concepts in thermodynamics and fluid flow. Written reports are required. Nonmajor graduate credit.

M E 396. Summer Internship. Cr. R. S.S. Prereq: Permission of Department Chair. Summer professional work period.

M E 397. Engineering Internship. Cr. R. F.S. Prereq: Permission of department chair. Professional work period, one semester maximum per academic year.

M E 398. Cooperative Education. Cr. R. F.S.S. Prereq: 298, permission of department. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

M E 410. Mechanical Engineering Applications of Mechatronics. (2-2) Cr. 3. S. Prereq: E E 442, 448, credit or enrollment in 421. Fundamentals of sensor characteristics, signal processing, motor control, coupled with concepts of embedded computer control. Digital and analog components used for interfacing with computer controlled systems. Mechanical system analysis combined with various control approaches. Focus on automation of hydraulic actuation processes. Laboratory experiences provide hands-on development of mechanical systems. Nonmajor graduate credit.

M E 412. Legal and Environmental Considerations in Design. (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 325, senior classification in engineering. Failure modes associated with product environment. Interaction between the legal profession, legislative bodies, standards and the design engineer, using a case study approach in design applications. Litigation involving designs, standards, and laws applicable to specific designs surveyed. The influence of laws and standards upon design. Nonmajor graduate credit.

M E 413. Practical Fluid Power Circuits. (Same as A E 413) (0-3-0) Cr. 1. F. S. Prereq: Credit or enrollment in 414 or A E 447. Properties of fluids. Pump and motor efficiencies. Analysis and assembly of fluid power systems and experimental investigation of appropriate control systems. Application to hydrosat- transmissions. Nonmajor graduate credit.

M E 415. Mechanical Systems Design. (0-4) Cr. 3. F.S. Prereq: 324, 326. Solution of a total design problem involving a mechanical system, documenting decisions concerning form and function, material specification, manufacturing methods, safety, cost, and conformance with codes and standards. Solution description includes oral and written reports. Nonmajor graduate credit.

M E 418. Mechanical Considerations in Robotics. (2-2) Cr. 3. S. Prereq: 421. Three dimensional kinematics, dynamics, and control of robot manipulators, hardware, sensors, and sensors. Laboratory experiments using industrial robots. Nonmajor graduate credit.

M E 442. Heating and Air Conditioning Design. (1-4) Cr. 3. S. Prereq: 441. Design criteria and assessment of building environment and energy requirements. Design of heating, ventilating, and air conditioning systems. System control and economic analysis. Air and water supplies. Credit for only one course in each of the following groups of courses may be applied toward graduation: 330, 231, 440, 442. The following courses are for students who are not in the mechanical engineering program: 330, 440. Credit in these courses will not be counted toward a degree in mechanical engineering. Nonmajor graduate credit.

M E 444. Elements and Performance of Power Plants. (3-0) Cr. 3. F. Prereq: 332, credit or enrollment in 436. Analysis of power supply systems and their components: turbines, steam generators, fans, pumps, heat exchangers and air pollution control equipment. Nonmajor graduate credit.

M E 446. Power Plant Design. (2-3) Cr. 3. S. Prereq: 444. Design of a power plant to meet a specified power (energy) demand. Selection and/or synthesis of principal components and pollution control equipment. Oral and written reports required. Nonmajor graduate credit.

M E 449. Internal Combustion Engine Design. (3-0) Cr. 3. S. Prereq: 324, 325, 445. Thermodynamic and mechanical design of a spark ignition or compression ignition internal combustion engine to meet specified performance, fuel economy, and air pollution requirements. Oral and written reports required. Nonmajor graduate credit.

M E 466. Multidisciplinary Engineering Design. (Same as Cpr E 466, E E 466, E Sci 466, I E 466, Mat E 466 I, I-I) Cr. 3. F. S. Prereq: Student must be within two semesters of graduation and permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM and FEM. Design methodologies, project scheduling, costing and control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings. Nonmajor graduate credit.

M E 475. Modeling and Simulation. (3-0) Cr. 3. F. Prereq: 421, credit or enrollment in 436. Introduction to computer solution techniques required to simulate flow, thermal, and mechanical systems. Methods of solving ordinary and partial differential equations and systems of algebraic equations, interpolation, numerical integration; finite difference and finite-element methods. Nonmajor graduate credit.

M E 490. Independent Study. Cr. 1 to 6. Prereq: Senior classification. Investigation of topics holding special interest of students and faculty. Election of course and topic must be approved in advance by supervising faculty.

M E 498. Cooperative Education. Cr. R. F.S. Prereq: Permission of department. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

M E 511. Advanced Control Design. (3-0) Cr. 3. S. Prereq: 411. Application of control design methods using continuous, discrete, and frequency-based models. Approaches include classical, pole assignment, modern reference, internal model and adaptive control methods. Mechanical design projects.

M E 521. Mechanical Behavior and Manufacturing of Polymers and Composites. (3-0) Cr. 3. S. Prereq: 322, 324, 325. Application of thermodynamics and general thermodynamic properties and system analysis. Selected topics. Nonmajor graduate credit.

M E 538. Advanced Fluid Flow. (3-0) Cr. 3. F. Prereq: Credit or equivalent in fluid mechanics. Detailed analysis of incompressible/compressible, viscous/inviscid, laminar/turbulent, and developing fluid flows on a particle/point control volume basis.

M E 546. Computational Fluid Mechanics and Heat Transfer I. (Same as Aer E 546) (3-0) Cr. 3. F. Prereq: Credit in E E 539 or E E 541 or E M 571. Introduction to finite difference and finite element techniques for the numerical solution of partial differential equations.

M E 547. Computational Fluid Mechanics and Heat Transfer II. (Same as Aer E 547) (3-0) Cr. 3. S. Prereq: 546. Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and Poisson equations. Applications to particular types of flows.

M E 564. Fracture and Fatigue. (Same as E M 564, M E 564.) (3-0) Cr. 3. F. Preq: E M 324 and one of E E 336, E E 325, Math 211 or 211. Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics. Fracture and fatigue tests, thermal fracture, mechanics and materials designed to avoid fracture and fatigue.

M E 599. Research. Offered on a satisfactory-fail grading basis only.

Courses in History of Technology and Science

M E 280. Introduction to History of Science. (Same as Hist 280.) (3-0) Cr. 3. F. Ideas of nature from Babylonia to the Renaissance.

Courses and Programs  Mechanical Engineering 295
Courses and Programs  Mechanical Engineering

M E 281. Introduction to History of Science. (Same as Hist 281.) (3-0) Cr. 3. S. Science from the seventeenth-century scientific revolution to Darwin and Einstein.

M E 284. Introduction to History of Technology and Engineering. (Same as Hist 284.) (3-0) Cr. 3. F. Technology in various civilizations including from Sumer and Egypt to early 18th century Europe.

M E 285. Introduction to History of Technology and Engineering. (Same as Hist 285.) (3-0) Cr. 3. S. Technology in the Western world in the nineteenth and twentieth centuries.

M E 387. Technology, Science, and Society in Modern Europe. (Same as Hist 387.) (3-0) Cr. 3. Wilson. From the late eighteenth-century beginnings of the industrial revolution in Britain to World War I. Examination of scientists’ and engineers’ influence on society and of society on them.

M E 488. History of American Technology. (Same as Hist 488.) (3-0) Cr. 3. Cravens, Bx. Technology in America from Industrial Revolution to present. Themes include social contexts of technological change, development of professional engineering, ideas about technology and American life. Nonmajor graduate credit.

M E 489. History of American Science. (Same as Hist 489.) (3-0) Cr. 3. Cravens. Science and its social relationships since the mid-nineteenth century; interaction of scientific discoveries and the development of society. Continuing impact of Darwinism and other scientific theories; science and social thought; modern medicine and public health; science and industry; science and agriculture; the social sciences; government and science; science and the consumer; the atomic age; big science and the environmental dilemma; the energy crisis; the role of science in democracy. Nonmajor graduate credit.

Graduate Study
The department offers the degrees master of science and doctor of philosophy, and a doctoral minor to students majoring in other departments. A non-thesis master’s option is available for the major in microbiology.

Graduates in the Microbiology program have a strong broad-based general knowledge of microbiology as well as advanced knowledge in a specific aspect of microbiology. Those students completing a thesis have the technical research, critical thinking, problem solving, and computer skills to design, implement, and conduct research experimentation using a variety of modern molecular tools and equipment. They are able to communicate research results effectively with scientific peer groups in both oral and written formats.

Prerequisite to graduate study is completion of coursework in general microbiology, biogeochemistry, mathematical sciences, and physics.

The department also participates in the interdepartmental majors and programs in genetics, immunobiology, MCDB (molecular, cellular, and developmental biology), neuroscience, technology and social change, toxicology, and water resources (see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

Courses open for nonmajor graduate credit: 310, 374, 406, 419, 420, 421, and 485.

Courses Primarily for Undergraduate Students

Micro 110. Orientation in Microbiology. (1) Cr. F. Orientation to the discipline of microbiology, the curriculum in microbiology, and educational research opportunities within the department. Offered on a satisfactory-fail basis only.

Micro 201. General Microbiology. (2-0) Cr. 2. F.S. Prereq: One semester of college-level biology. Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition, students who obtain a grade of B or better may substitute 201 for 302 in advanced courses.

Micro 201L. Introductory Microbiology Laboratory. (0-2) Cr. 1. F.S. Prereq: Credit or enrollment in 201 or 302.

Micro 302. Biology of Microorganisms. (3-0) Cr. 3. F.S. Prereq: Biol 201, credit or enrollment in Biol 202; 1 semester of chemistry. Basic cell biology, physiologystatistics, metabolism, genetics and ecology of microorganisms, with an emphasis on prokaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

Micro 310. Fundamentals of Microbial Infection and Immunity. (4-0) Cr. 4. F. Prereq: 302. Study of pathogenic microbes, mechanisms of disease, and host resistance. Nonmajor graduate credit.

Micro 311. Introduction to Parasitology. (Same as Zool 311.) See Zoology.

Micro 320. Fundamentals of Microbial Physiology and Genetics. (4-0) Cr. 4. S. Prereq: 302, Biol 301, credit or enrollment in Chem 332. Introductory course in microbial physiology and genetics with emphasis on the structure, function, and assembly of bacterial cell components, metabolism, regulation of gene expression, genetic adaptation, and growth.

James S. Dickson, Chair of Department

University Professors: Glatz

Professors: Atherly, Harris, Hill, Lovenchak, Pometto

Professors (Emeritus): Durand, Kraft, Pattee, Quinn, Williams

Associate Professors: Andrews, Bazylinski, Bonning, Cunnick, Dickson, Dispirito, Phillips

Associate Professors (Collaborators): Moorman

Assistant Professors: Beattie, Halverson

Assistant Professors (Adjunct): Bouy

Assistant Professors (Collaborators): Parkin, Quinlisk, Stanton, Wesley

Undergraduate Study

The department offers undergraduate study for the bachelor of science degree with a major in microbiology. For the curriculum in microbiology, see Agriculture, Curricula. In this department, principal emphasis is placed on understanding microorganisms and their interrelationships with other organisms in nature, the application of microbiology in medicine, agriculture and industry, and the study of fundamental life processes as exemplified by microorganisms. The department of microbiology also participates in an interdepartmental undergraduate minor in emerging infectious diseases (see the department of entomology for details). Some fields of microbiology, especially advanced research, may require further training. Undergraduate work in the department is designed to provide sound preparation for graduate study, training for bachelors-level employment, and admission to professional programs such as medicine, veterinary medicine and dentistry.

Graduates of the Department of Microbiology are able to recognize and appreciate the diversity and complexity of microbial life represented by procaryotes, eucaryotes, and viruses. In addition to understanding fundamental principles of microbial growth, physiology, genetics, biochemistry, and ecology, the program emphasizes the impact that the microbial world has on human, animal and plant health, as well as on industry and biotechnology. Graduates are able to design and implement experimental approaches to address specific questions. In addition, graduates are able to communicate scientifically, using a variety of media.

Graduate microbiologists find career opportunities in a wide variety of areas: in hospital and clinical laboratories; in federal, state, and local government agencies; in research and development; in dairy and food processing; in the pharmaceutical and fermentation industries.

Undergraduate programs for the major in microbiology usually include the following basic courses: 302, 310, 320, 341, 342, 343, 344, 345, 441, 442, 443, 444, 445, and 446. Aspects of these courses emphasize communication skills, environmental issues, problem solving, and laboratory techniques. Courses in the following areas are required as supporting work: biology, chemistry, biochemistry, genetics, mathematics and physics.

Pre-veterinary preparation may be accomplished through the curriculum major in this department (see College of Veterinary Medicine, Admission Requirements).

Students majoring in microbiology are eligible to apply for the Cooperative Education Program with the Agricultural Research Service. If selected, the student will obtain full-time, paid, work experience at either the National Animal Disease Center, the National Veterinary Services Laboratory, or the Soil Till Laboratory in Ames. Other internship opportunities also are available.

The department offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits from the departmental offerings.

Majors in microbiology must take courses in written communication (Engl 104, 105), one course in oral communication (Sp Cm 212), and must meet the College of Agriculture English proficiency requirement of C or better in these courses. Students must also meet the College of Agriculture requirements for credit in courses in ethics, and the university diversity and multicultural requirements.
Micro 341. Bacterial Cultivation Techniques. (0-6) Cr. 1. F. Prereq: Credit or enrollment in 302. Techniques for the cultivation of bacteria in solid and liquid media and under diverse environmental conditions, including aerobic and anaerobic conditions; culture preservation techniques; and technique for determining culture purity.

Micro 342. Techniques for the Visualization and Fractionation of Bacterial Cells. (0-6) Cr. 1. F. Prereq: Credit or enrollment in 302. Light microscopy techniques, including phase, dark-field, and fluorescence microscopy; determinative and cytological light microscopy; spectroscopy; and cell collection, purification and fractionation.

Micro 345. Techniques in Microbial Systematics. (0-6) Cr. 1. S. Prereq: Credit or enrollment in 302. Techniques for the identification and classification of microorganisms based on phenotypic, genotypic, and phylogenetic relatedness.

Micro 374. Insects and Our Health. (Same as Ent 374.) See Entomology. Nonmajor graduate credit.

Micro 402. Microbial Genetics. (Dual-listed with 502.) (3-0) Cr. 3. F. Prereq: 320. Focus on the review and discussion of original research literature to examine in-depth the design, methodology, and interpretation of experiments of both historical and contemporary relevance to microbial genetics.

Micro 404. Microbial Physiology. (Dual-listed with 504.) (3-0) Cr. 3. S. Prereq: 320. Topics in microbial physiology, including structure and function of cell components, bioenergetics, diversity, life in extreme environments growth, adaptation and regulation.

Micro 407. Microbiological Safety of Foods of Animal Origins. (Dual-listed with 507, same as FS HN 407.) (3-0) Cr. 3. S. Prereq: 320. Focus on the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

Micro 408. Virology. (Dual-listed with 508.) (3-0) Cr. 3. F. Prereq: 310. The biology of animal, plant, and insect viruses.

Micro 419. Foodborne Hazards. (Same as FS HN 419.) See Food Science and Human Nutrition. Nonmajor graduate credit.

Micro 420. Food Microbiology. (Same as FS HN 420, Tox 420) (3-0) Cr. 3. F. Prereq: 320. Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Food safety and under diverse environmental conditions. Nonmajor graduate credit.

Micro 421. Food Microbiology Laboratory. (Same as FS HN 421.) (1-6) Cr. 3. F. Prereq: 201 or 302; 201L. Credit or enrollment in 420 (FS HN 420). Standard microbiological techniques employed in the food industry, including: microscopic examination of foods, plate counts, other enumeration methods, indicator organisms of food quality and safety, foodborne pathogens, and molds. Nonmajor graduate credit.

Micro 425. Food Biotechnology. (Dual-listed with 525; same as FS HN 425.) See Food Science and Human Nutrition.

Micro 430. Procracyotic Diversity. (Dual-listed with 530.) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 302, 341-343. Survey of the diverse groups of procracyotes emphasizing important and distinguishing phylogenetic, morphological, ecological and metabolic features of microorganisms based on phenotypic, genotypic, and phylogenetic relatedness.

Micro 441. Techniques in Bacterial Genetics. (0-6) Cr. 1. F. Prereq: Credit or enrollment in 320. Techniques involved in the mutation and transfer of genes in bacteria.

Micro 442. Techniques for Studying Bacterial Metabolism. (0-6) Cr. 1. F. Prereq: Credit or enrollment in 320. Techniques for the analysis of bacterial cell metabolism based on chemical and physical analytical methods and measurements of enzyme activity, permeability, and transport.

Micro 443. Techniques for the Purification and Enumeration of Proteins. (0-6) Cr. 1. F. Prereq: Credit or enrollment in 320. Techniques for the isolation and purification of soluble and membrane proteins.

Micro 444. Techniques in Molecular Biology. (0-6) Cr. 1. S. Prereq: Credit or enrollment in 320. Techniques for the isolation of DNA from bacteria; the purification, quantification, amplification and enzymatic manipulation of DNA; site-directed mutagenesis; and gene cloning, with an emphasis on cloning strategies.

Micro 445. Eukaryotic Cell Culture and Function. (0-6) Cr. 1. S. Prereq: Credit or enrollment in 310. Techniques in primary culture and tumor cell growth, measures of lymphocyte function, and flow cytometry.

Micro 446. Antibody Techniques for Studying Eukaryotic and Prokaryotic Cells. (0-6) Cr. 1. S. Prereq: Credit or enrollment in 310. Animal immunochemical methods and serological techniques, including precipitation and agglutination reactions, enzyme-linked immunoassays, and immunodetection.

Micro 450. Undergraduate Seminar. Cr. 1 each time taken. F. Prereq: Sp Crm 212. Required of all undergraduate majors in microbiology. Offered on a satisfactory-fail grading basis only.

Micro 475. Immunology. (Dual-listed with 575.) (3-0) Cr. 3. S. Prereq: 310. An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Credit for either 475 or 520, but not both, may be applied toward graduation.

Micro 477. Bacterial-Plant Interactions. (Dual-listed with 577; same as PI P 477) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 3 credits in microbiology or plant pathology. Focuses on the interactions of plant-associated bacteria in terms of their ecology, diversity, and the physiologic and molecular mechanisms involved in their interactions with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

Micro 485. Soil Microbial Ecology. (Same as Agron 485.) See Agronomy. Nonmajor graduate credit.

Micro 487. Aquatic and Wetland Microbial Ecology. (Dual-listed with 587; same as Bot 487.) See Botany.

Micro 490. Independent Study. Cr. 1 to 5. S.F.S.S. Prereq: A minimum of 6 credit hours of 300-level or above coursework in microbiology, permission of instructor. A maximum of 6 credits of 490 may be elected. F.S. SS.

Micro 525. Food Biotechnology. (Dual-listed with 425; same as FS HN 525.) See Food Science and Human Nutrition.

Micro 530. Procracyotic Diversity. (Dual-listed with 430.) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 302, 341-343. Survey of the diverse groups of procracyotes emphasizing important and distinguishing phylogenetic, morphological, ecological and metabolic features of members of those groups.

Micro 540. Livestock Immunogenetics. (Same as An S 540.) See Animal Science.

Micro 575. Immunology. (Dual-listed with 475; same as V MPM 575.) (3-0) Cr. 3. S. Prereq: 310. Humoral and cellular immune functions. Interactions between cells and factors of the immune system that result in health and disease. Credit for either 575 or 520, but not both, may be applied toward graduation.

Micro 577. Bacterial-Plant Interactions. (Dual-listed with 477; same as PI P 477) (3-1) Cr. 3. Alt. S., offered 2002. Prereq: 3 credits in microbiology or plant pathology. Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiologic and molecular mechanisms involved in their interactions with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth and biological control.

Micro 585. Soil Microbiology and Biochemistry. (Same as Agron 585.) See Agronomy.

Micro 586. Medical Bacteriology. (Same as V MPM 586) (4-0) Cr. 4. F. Prereq: 310. Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses.

Micro 587. Aquatic and Wetland Microbial Ecology. (Dual-listed with 487; same as Bot 487.) See Botany.

Micro 590. Special Topics. Cr. 1 to 5 each time elected. F.S.S.S. Prereq: Permission of instructor.
Micro 599. Creative Component. Cr. art. Prereq: Nonthesis M.S. Option only. A written report based on laboratory research, library reading, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Courses for Graduate Students

Micro 604. Seminar. (1-0) Cr. 1 each time taken. F.S. Offered on a satisfactory-fail grading basis only.

Micro 615. Molecular Immunology. (Same as BBMB 615.) See Biochemistry, Biophysics, and Molecular Biology.

Micro 625. Mechanisms of Bacterial Pathogenesis. (Same as V MFM 625.) See Veterinary Microbiology and Preventive Medicine.

Micro 626. Advanced Food Microbiology. (Same as FS HN 626.) See Food Science and Human Nutrition.

Micro 641. General Mycology. (Same as Bot 641.) See Botany.

Micro 642. General Mycology. (Same as Bot 642.) See Botany.

Micro 679. Light Microscopy. (Same as Bot 679.) See Botany.

Micro 685. Advanced Soil Biochemistry. (Same as Agron 685.) See Agronomy.

Micro 690. Current Topics. Cr. 1 to 3 each time elected. F.S. SS. Prereq: Permission of instructor. Colloquia or advanced study of specific topics in a specialized field.

A. Microbiology
B. Immunology
C. Infectious Diseases

Micro 698. Seminar in Molecular, Cellular, and Developmental Biology. (Same as MCDB 698.) See Molecular, Cellular, and Developmental Biology.

Micro 699. Research.

Courses offered at the Gulf Coast Research Laboratory (GCRL), Ocean Springs, Mississippi

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for the following University of Southern Mississippi/GCRL courses and transfer them to their ISU degree programs. Written permission of the ISU coordinator for the GCRL, 201 Bessey, is required for this arrangement. Inquire at 201 Bessey for further information.

MAR 409. Marine Microbiology. Cr. 3. SS. Offered for undergraduate credit through a cooperative arrangement with Iowa State University. Prereq: B semester credits in microbiology. A general course designed to introduce the microbiology and advanced biology student to the role of microorganisms in the overall ecology of the oceans and estuaries.

MAR 409L. Marine Microbiology Laboratory, Cr. 2. SS. Accompanies 409.

Military Science

www.public.iastate.edu/~armyrotc/

Marvin Meeks, Chair of Department

Professors: Johnson, Meeks

Assistant Professors (Adjunct): Lang

Instructors (Adjunct): Mayner, Meyer, Rhoades, Runyon, Sartin, Showers, Taylor

The mission of the Reserve Officer Training Corps (ROTC) is to commission the future leaders of the United States Army. Since ROTC produces 65 percent of the Army’s Officer Corps, our task is one of the most important undertakings in the Army and our country today. We seek top quality college students. We train these potential leaders, assess their abilities, and challenge them with the highest standards of professionalism. Those who successfully complete the program, receive a commission as a second lieutenant in the U.S. Army. A commission as an Army officer affords the opportunity to pursue a profession in one or several of the 300 different jobs held by Army officers. Students may request to serve as an officer in either the active army, or part time in the Army Reserve or National Guard. Regardless of the method of service, officers in today’s Army can be proud to know that they are doing their share in the defense of the United States of America.

The ISU military science program is divided into two segments, the basic program and the advanced program. The basic program (courses numbered 101-210) is designed primarily for freshmen and sophomores. No military obligation is incurred by a person participating in the basic program. The basic program is designed to be informative and to acquaint students with the military as a profession. The basic program or an allowed substitute is a prerequisite for the advanced program.

Financial assistance is available on a competitive basis.

Persons interested in military science should visit the department located upstairs in the Armory.

Basic Program

These courses are primarily for freshman and sophomore students and, except for veterans and basic training graduates, are required for entry into the advanced program. No more than 10 credits in 100- and 200-level courses may be applied toward graduation. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the Professor of Military Science identify individual leader developmental needs.

Advanced Program

These courses are for students who have completed the basic program (or received equivalent credit) and are mandatory for potential commissioning upon contracting at the beginning of their junior year. Each cadet receives a monthly $200.00 allowance for up to 10 months. This stipend is given during the junior and senior years. These courses are primarily taught to juniors and seniors.

Successful completion normally obligates the student to military service on active or reserve duty. In addition to the advanced program of study, a student (cadet) will be expected to pass the Army Physical Fitness Test (precondition for commissioning) each semester and continually maintain military appearance standards in both personal grooming and uniform. Physical fitness training is regularly conducted outside of class or laboratory hours. Students are expected to attend and participate in these exercise activities.

Professional Military Education (PME) coursework outside of the military science curriculum is also a precondition to commissioning. The PME component consists of two parts; completion of a bachelor's degree and demonstrated proficiency in three areas: American Military History, Computer Literacy, and Communication. These standards are explained to prospective students as they consider enrollment in the advanced program. Uniforms will be worn at least twice weekly. The 300-level courses will prepare cadets for advanced camp, which is a five-week summer internship/training program where cadets are trained to Army standards, develop leadership skills, and have their officer potential evaluated. The 400-level courses are the final preparation for commissioning as a second lieutenant in the U.S. Army. Students must meet academic alignment criteria and receive basic program credit before entering the advanced program.

The College of Liberal Arts and Science offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credit hours of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credit hours must be in courses numbered 300 or above.

Courses Primarily for Undergraduate Students

Basic Program

M S 101. Introduction to Military Science. (1-0) Cr. 1. F.SS. This course offers an overview of the role of the United States Army officer, the U.S. Army organization, and the Army ROTC program of instruction. Students will learn about the various jobs that an officer may assume, officer traditions, differences in officer and enlisted rank, and etiquette. Also, students will be provided instruction on college scholarships (Army ROTC and others), in confidence building (hands-on rappelling and marksmanship classes), leadership abilities, and professional knowledge about general military topics.

M S 101L. Basic Leadership Laboratory. (0-2) Cr. 0.5. F. SS. This Lab is designed to use basic military training skills and tasks to develop confidence, character, and leadership in students. The team approach, combined with hands-on instruction, is the teaching methodology for the Lab. Students will learn various military tasks such as marching, rifle/pistol firing, and tactical patrolling; gain confidence by rappelling and serving in leadership positions over other students; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge, Pamplam Woods (ISU campus), and ISU fitness centers (Beyer Gym and Rec Center). Full participation in all events will be determined based on students’ physical and medical eligibility.
M S 102. The United States Defense Establishment. (1-0) Cr. 1. S.S.S. This course instructs students on the U.S. Army’s Principles of Warfighting. Students gain an understanding of the applied skills, proven successful, required to defeat an opponent: militarily, athletically, or in the business world. Historical battles and significant military leaders will be analyzed to highlight dimensions of leadership that can be quantifiably assessed. Instruction will include programs to teach students the methodology used in ROTC to assess the leader-ship skills of both others and of self. Additional instruction will include time-management, decision-making, counseling, rappelling, marksmanship, and confidence-building tasks.

M S 102L. Basic Leadership Laboratory. (0-2) Cr. 1. S.S.S. This lab is designed to use basic military training skills and tasks to develop confidence, character, and leadership in students. The team approach, combined with hands-on instruction, is the teaching methodology for the Lab. Students will learn various military tasks such as marching, rifle/pistol firing, and tactical patrolling; gain confidence by rappelling and serving in leadership positions over other students; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Army, Camp Dodge, Pammel Woods (ISU campus), and ISU fitness centers (Beyer Gym and Rec Center). Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 201. Principles of Leadership. (2-0) Cr. 2. F.S.S. Development of leadership skills by study of princi- ples and traits of leadership; time management, values, decision making, communicating, delegating, and counseling. Leadership assessment programs, role playing, skits, and films are used to enhance and reinforce the instruction.

M S 201L. Basic Leadership Laboratory. (0-2) Cr. 1. F.S.S. This Lab is designed to use basic military training skills and tasks to develop confidence, character, and leadership in students. The team approach, combined with hands-on instruction, is the teaching methodology for the Lab. Students will learn various military tasks such as marching, rifle/pistol firing, and tactical patrolling; gain confidence by rappelling and serving in leadership positions over other students; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Army, Camp Dodge, Pammel Woods (ISU campus), and ISU fitness centers (Beyer Gym and Rec Center). Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 202. Map Reading and Land Navigation. (2-0) Cr. 2. S.S.S. Characteristics and features of the earth’s land mass and application of methods of con-ducting navigation on land by use of topographical maps, compasses, and aerial photographs, military map symbols and their practical application.

M S 202L. Basic Leadership Laboratory. (0-2) Cr. 1. S.S.S. Basic military training related to developing confidence, character, and leadership. The team approach in task and mission accomplishment is taught with special emphasis on land navigation and orienteering. Locations include Camp Dodge, Holst State Forest, Pammel Woods, and the ISU Army. Certification of medical eligibility required for full par-ticipation.

M S 210. Practicum in Basic Military Skills. Cr. 6. S.S. Prereq: Permission of the professor of military science. Basic military skills for students with no prior military or ROTC training. Involves attendance at the six-week Army ROTC Basic Camp, Fort Knox, Kentucky. Completion enables students to enroll in the Advanced Course and is taken in lieu of 101, 102, 201, and 202. Offered on a satisfactory-fail grading basis only.

Advanced Program

M S 301. Methods of Instructing Military Skills. (3-0) Cr. 3. F.S. Prereq: Completion of the basic program. Development of military writing techniques, basic educational psychology, oral presentation; skills, use of training aids, and lesson planning. Students prepare presentations incorporating all phases of instruction. Students engage in a series of practical opportunities to lead drill groups. Focus is on leadership dimensions; and the seven basic Army Values. Additionally the student is introduced to the Leadership Development Program and the Army Physical Fitness Program. The traditions and customs of the Army, as well as land navigation skills are reviewed.

M S 301L. Advanced Leadership Laboratory. (0-4) Cr. 1. F.S. Prereq: Completion of the basic program. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structur-ing laboratories, presenting classes, planning various events, and accepting responsibility for the leader-ship labs. The swim test, Army Physical Fitness Test and the diagnostic map test required of candidates for a commission.

M S 302. Small Unit Tactics. (3-0) Cr. 3. F.S. Prereq: Completion of the basic program. Organization, com-position, and missions of operational elements. Principles of offensive and defensive combat opera-tions with emphasis on the attack, retrograde, patrolling, combat intelligence, tactical orders, troop leading procedures, and combat leadership.

M S 302L. Advanced Leadership Laboratory. (0-4) Cr. 1. F.S. Prereq: Completion of the basic program. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structur-ing laboratories, presenting classes, planning various events, and accepting responsibility for the leader-ship labs. The swim test, Army Physical Fitness Test and the diagnostic map test required of candidates for a commission.

M S 310. Field Training Exercise. (0-3) Cr. 1. S. Prereq: Completion of the basic program. An annual military exercise that requires approximately 30 hours of planning, participation, and follow-up plus ROTC cadre evaluation. Designed primarily for the advanced ROTC cadets in preparation for being com-missioned as officers in the Army. Actual military condi-tions are simulated; detailed instruction in weapons training and execution of a simulated Operation Order in accomplishing a specific military mission. Conducted as a weekend exercise at Camp Dodge. Offered on a satisfactory-fail grading basis only.

M S 401. The Military Team. (3-0) Cr. 3. F.S. Prereq: Completion of the basic program. Organization and operational concepts of the military staff; military units, administration, logistics and organizational structures within the Army division. Combat opera-tions and their various elements, with emphasis on planning and coordination; and an introduction to mili-tary justice.

M S 401L. Advanced Leadership Laboratory. (0-4) Cr. 1. F.S. Prereq: Completion of the basic program. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structur-ing laboratories, presenting classes, planning various events, and accepting responsibility for the leader-ship labs.

M S 402. Seminar: The Professional Officer. (3-0) Cr. 3. F.S. Prereq: Completion of the basic program. Management, leadership, and professionalism; man-a-gement tools, practices, theories, and principles; leadership principles, traits, and application.

M S 402L. Advanced Leadership Laboratory. (0-4) Cr. 1. F.S. Prereq: Completion of the basic program. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structur-ing laboratories, presenting classes, planning various events, and accepting responsibility for the leader-ship labs.

M S 410. Field Training Exercise. (0-3) Cr. 1. S. Prereq: Completion of the basic program. An annual military exercise that requires approximately 30 hours of planning, participation, and follow-up plus ROTC cadre evaluation. Designed primarily for the advanced ROTC cadets in preparation for being com-missioned as officers in the U.S. Army. Actual mili-tary conditions are simulated; detailed instruction in weapons training and execution of a simulated Operation Order in accomplishing a specific military mission. Conducted as a weekend exercise at Camp Dodge. Offered on a satisfactory-fail grading basis only.

Military Studies

(Interdepartmental Minor)

Advisory Committee: K. Schindele, Coordinator; G. Washburn, T. Johnson.

The Military Studies program is designed for students interested in learning about military skills and careers. The mission of the Reserve Officers Training Corps (ROTC) programs is threefold. First, students are developed mentally, morally, and physically in order to make them strong leaders. Second, a desire for development in mind and character is instilled in students so they may assume the highest responsibilities of command, citizenship, and government. Finally, students are imbued with the highest ideals of duty, honor, and loyalty in order to graduate with a basic professional background and motivation toward their careers.

The Air Force Aerospace Studies, Military Science, and Naval Science departments accomplish this mission through detailed courses of instruction occurring throughout a typical student’s college career. All academic courses offered by these departments focus on the development of professional military skills and their application. Each department offers courses unique to its branch of the mili-tary. The Air Force Aerospace Studies curricu-lum familiarizes students with Air Force structure and doctrine. Students in Army ROTC classes gain an appreciation for ground warfare and doctrine, while the Naval Science pro-gram develops basic seamanship skills such as navigation and marine propulsion. On a broader scale, all three departments offer courses promoting leadership and sound man-agement practices that investigate the mili-tary’s role in American domestic and foreign policy, and can be employed in any career path.

Air Force Aerospace Studies, Military Science, and Naval Science courses are offered in the interdepartmental Military Studies program in the following participating departments: Air Force Aerospace Studies, Military Science, and Naval Science.
Molecular, Cellular, and Developmental Biology

(Interdepartmental Graduate Major)
Program Executive Committee: Janice Buss, Chair; L. Ambrosio, R. Robson

Undergraduate Study
A special program in molecular, cellular, and developmental biology is offered for the baccalaureate. Undergraduates wishing to prepare for graduate study in molecular, cellular, and developmental biology should elect courses in biochemistry, botany, genetics, microbiology, and zoology; mathematics through calculus; chemistry through organic; and one year of physics. Biol 301, 301L, 302, and 302L are recommended to undergraduates desiring an introduction to this area.

Graduate Study
Work is offered for the master of science and doctor of philosophy degrees with a major in molecular, cellular, and developmental biology in several cooperating departments: Agronomy; Animal Science; Biochemistry, Biophysics & Molecular Biology; Biomedical Sciences; Botany; Entomology; Food Science and Human Nutrition; Horticulture; Microbiology; Plant Pathology; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology. Zoology and Genetics.

Facilities and qualified faculty are available in these departments for conducting fundamental research in the various aspects of molecular, cellular, and developmental biology. Ongoing research projects include molecular and cellular studies of viral, prokaryotic, plant, and animal systems.

Students must enter the MCDB major in one of two ways: they may apply to and be accepted into the major directly or they may formally apply to the major after being accepted by a participating department. Students admitted into MCDB will take MCDB 697 in their first two semesters and choose a major professor from the participating faculty and a department by the end of their second semester.

Students admitted by a department will choose a major professor from the participating faculty in that department. All Ph.D. students take a core curriculum consisting of the following courses: one year of biochemistry (BBMB 404, 405 or BBMB 501, 502), molecular genetics (MCDB 502, 511, 545, or 676), cell biology (MCDB 528 or 529 or 540), developmental biology (MCDB 512, 533), and seminars in MCDB (MCDB 698). In seminar, students will make journal and research presentations and attend MCDB faculty seminars. M.S. students take the above core but may delete either the molecular genetics, cell biology, or developmental biology component. Additional coursework is selected to meet departmental requirements and to satisfy individual student research interests; courses may be chosen from those listed below. The foreign language requirement is determined by the student’s major department. All graduate students are required to teach as part of their training for an advanced degree.

Students minoring in molecular, cellular, and developmental biology at the Ph.D. level must meet the following requirements: one year of biochemistry (BBMB 404, 405, or BBMB 501, 502; one course in each of the following three areas: molecular genetics (MCDB 502, 511, 545, or 676), cell biology (MCDB 528 or 529 or 540), developmental biology (MCDB 512, 533); and enrollment in MCDB 698 (seminar in MCDB) each year.

Courses for Graduate Students
MCDB 502. Microbial Genetics. (Same as Micro 502) See Microbiology.
MCDB 511. Molecular Genetics. (Same as Gen 511) See Zoology and Genetics.
MCDB 512. Plant Growth and Development. (Same as Bot 512) See Botany.
MCDB 520. Genetic Engineering. (Same as Gen 520) See Zoology and Genetics.
MCDB 528. Cellular Growth and Regulation. (Same as Zool 528) See Zoology and Genetics.
MCDB 529. Plant Cell Biology. (Same as Bot 529) See Botany.
MCDB 540. Signal Transduction. (Same as Zool 540) See Zoology and Genetics.
MCDB 545. Plant Molecular Biology. (Same as Bot 545) See Botany.
MCDB 590. Special Topics. Cr. arr.
MCDB 676. Biochemistry of Gene Expression in Eucaryotes. (Same as BBMB 676) See Biochemistry, Biophysics and Molecular Biology.
MCDB 697. Graduate Research Rotation. (0-3 to 0-18) Cr. 1 to 6 each time taken. F.S. Graduate research projects performed under the supervision of selected faculty members in the molecular, cellular, and developmental biology program.
MCDB 698. Seminar in Molecular, Cellular, and Developmental Biology. (Same as An S 698, BBMB 698, Bot 698E, Gen 698, Micro 698, V MPM 698, Zool 698) (2-0 Cr. 1 to 2 each time taken. F.S. Student and faculty presentations.
MCDB 699. Research.
Music

Sue E. Haug, Head of Department

Professors: Bieyle, Darlington, David, Messenger, Prater, Rodde, Work, Zeigler

Distinguished Professors (Emeritus): White

Professors (Adjunct): Estes

Professors (Emeritus): Brandt, Burkhalter, Molison, Swift, Vongroabov

Associate Professors: Cox, Dunlap, Gouran, Haug, Kohlehepp, Larkin, Schilling, Simonson, Stuart

Associate Professors (Adjunct): Sturm

Associate Professors (Emeritus): Alcorn, Bjurstrom

Assistant Professors: Baker, Bovinette, Golemo, Himmelheber, Laycock, Munsen, Pisano, Province, Sadilek, Sanda, Tam, Trenberth

Assistant Professors (Adjunct): Seebeck

Assistant Professors (Emeritus): Waggoner

Instructors (Adjunct): Thomas

Instructors (Collaborators): Foss, Kaizer, Tener

Undergraduate Study

The Department of Music offers a strong undergraduate music program, where students study with full-time faculty professionals in a supportive environment that encourages students to become their best.

The curriculum of the department provides:
1. A comprehensive program of professional studies for students who wish to prepare for careers in music, including teaching, performance, and composition, and for students who plan to pursue graduate studies in music.
2. Courses in music literature, theory and areas of performance for all students, regardless of major.

The department embodies the land-grant philosophy of service to the people of the state with a faculty of active scholars, teachers, and artists committed to excellence in teaching, creative/scholarly work, and arts outreach. The department is an accredited institutional member of the National Association of Schools of Music (NASM).

The Theatre Program is administered by the Department of Music (see Index, Theatre Courses.)

Bachelor of Music

For the undergraduate curriculum in music, leading to the degree bachelor of music, see Liberal Arts and Sciences, Curriculum. In order to receive teacher certification in music, students must earn the Bachelor of Music degree.

Candidates for the bachelor of music will complete the following requirements.

- Cr.
- 46 General education
- 0.5 Library
- 47 Music core
- 33-38 Area of Specialization: (Students must select one of the following options: music education, organ, piano, string instruments, composition, voice, and wind or percussion instruments.)

Bachelor of Arts—Music Major

For the undergraduate curriculum in Liberal Arts and Sciences, major in music, leading to the degree bachelor of arts, see Liberal Arts and Sciences, Curriculum.

Candidates for the degree bachelor of arts with a music major will normally complete 48 credits of music including the following required courses: 119, 120, 219, 230, 231, 232, 319, 331, 332, 337, 338, 383, 384.

Bachelor of arts students whose chief professional interest lies in research are encouraged to minor in foreign languages and literatures, history, literature, or philosophy.

Minor in Music. Candidates for the minor in music will complete 19 credits in music, including 6 credits in courses numbered 300 and above taken at ISU with a grade of C or better, and a. one of the following: 101 or 230; b. one of the following: 102, 103, 104; c. either
- Two consecutive semesters of one of the following: 111, 112, 113, 115, 131, 141, 151, 161, 171, 181, 301
- or
- Two consecutive semesters of one applied music area (choose from 118, 318, 127, 128, 227, 228, 327 or 133).

General Requirements

Prior to being accepted as a music major, students are required to audition for applied faculty in their performance area (piano, organ, woodwinds, strings, percussion, brass, or voice), and must successfully demonstrate performance skills appropriate for college level instruction. Once accepted, a student must take a diagnostic examination in music theory and satisfactorily complete a placement examination in keyboard skills. These examinations will be given by members of the departmental faculty during summer orientation, the week preceding the opening of classes for fall semester, or by appointment. Students should request these examinations from the Department of Music office before deciding on a major in music.

Seminars and Recitals. All music majors enrolled for applied music courses will attend a weekly 1-hour seminar in their areas and departmental recitals each semester.

Ensemble Requirement. All bachelor of music students must register for one ensemble course every semester of residence (except during student teaching). Two semesters must be in a large ensemble; six semesters in a large ensemble for music education majors. See the Music Department Student Handbook for further information.

Continuation Examination. To be approved for continuation as a music major on the junior level, a student must pass a continuation examination taken normally at the end of the fourth semester. Before taking this examination, the student must fill out the requisite forms as well as prepare a statement of (1) his/her personal goals, (2) a self-assessment of his/her progress thus far, and (3) an assessment of what he/she expects to accomplish before graduation.

The student taking the Continuation Examination performs for a Continuous Examination Committee. Requirements include the performance of three works representing different periods or styles selected by and studied with the applied teacher, a self-prepared piece, and sight reading. The student must display acceptable solo ability and performance techniques in at least one of the applied areas. A written evaluation will be given each student following his/her performance. This evaluation will include a candid assessment of the student’s potential to achieve his/her goals. In addition, the student may arrange to meet with members of the Continuation Examination Committee at a later date to discuss the results of his/her Continuation Examination.

All music majors must demonstrate proficiency in piano as a part of the continuation examination. Proficiency will normally be demonstrated by completing Music 228 or, for keyboard majors, by completing Music 327. The student must pass all parts of the continuation examination in order to enroll in Music 319 or 419, Applied Music. See the Music Department Student Handbook for further information.

Graduation Proficiency. To be recommended for graduation, a music student should demonstrate to the music faculty mature acquaintance with performance styles, technique, and repertoire. All music majors will participate in departmental recitals to the satisfaction of the department. Candidates for the bachelor of music degree will present a graduation recital.

English proficiency requirement: The department requires a grade of C- or better in each of Engl 104 and 105 (or 105H), and completion of Music 383 or 384 to the department’s satisfaction; or Engl 302, or 305, or 314 with a grade of C- or better.

Graduate Study

Courses open for nonmajor graduate credit: 430, 440, 472, 473, 474, 475, 476.

Courses Primarily for Undergraduate Students

Music 101. Fundamentals of Music. (1-2) Cr. 2. F.S. Preq.: Ability to read elementary musical notation. Notation, recognition, execution and analysis of scales, intervals, triads, and rhythm; key signatures; time signatures; transposition. Intended for non-majors.

Courses and Programs

Music 301
Music 102. Introduction to Music Literature I. (3-0) Cr. 3. F.S.SS. Expansion of the music listening experiences of the general student through greater awareness of differences in techniques of listening, performance media, and materials of the art. The course focuses on the elements of music: rhythm, melody, harmony, form, and style, and how these elements are used in musics of different cultures and time periods. Student need not be able to perform or read music. Open to non-majors only.

Music 103. Introduction to Music Literature II. (3-0) Cr. 3. S. S. Prereq: Music 102. Retraces the evolution of classical musical style over the course of Western History, relating developments to historic events and trends. Active listening developed to encourage aural participation in the compositional process and development of musical style. Student need not be able to perform or read music. Open to non-majors only.

Music 104. History of Rock 'n' Roll. (3-0) Cr. 3. S. S. Prereq: 101 or 102 or 230. Rock 'n' Roll from the mid 1950s through the 1990s, focusing on the development of rock styles from its roots in blues, folk, country, and pop. Expansion of listening experience through study of song forms, instrumentation, and the socio-political significance of song lyrics. Student need not be able to perform or read music.

Music 111. Wind Ensemble. (0-3) Cr. 1 each time taken. F.S. Prereq: Open to all students by audition. Emphasis on significant extended compositions for wind and percussion instruments. Performances include formal concerts on campus and the annual tour. Offered on a satisfactory-fail grading basis only.

Music 112. Concert Band. (0-2) Cr. 1 each time taken. F.S. Prereq: Open to all students who have performed on a wind or percussion instrument in high school band or orchestra. Repertoire includes the broad spectrum of band music. Two concerts are presented each semester. Offered on a satisfactory-fail grading basis only.

Music 113. Jazz Ensemble. (0-2) Cr. 1 each time taken. F.S. Prereq: Open to all students by audition. Designed to explore various styles and trends in contemporary jazz. Offered on a satisfactory-fail grading basis only.

Music 114. Marching and Pep Bands. (0-5) Cr. 1 each time taken.

- A. Marching Band. F. Prereq: Open to all students who have performed on a wind or percussion instrument in high school band or orchestra. Membership determined by date of band application; audition required for percussion, flugelhorns, and baritones. Presentation of pre-game and half time shows at each home and significant out-of-town games. Offered on a satisfactory-fail grading basis only.
- B. Pep Band. S. Prereq: Students selected by audition from current members of 114A. Performances include formal concerts on campus. Offered on a satisfactory-fail grading basis only.

Music 115. Symphonic Band. (0-3) Cr. 1 each time taken. F.S. Prereq: Open to all students by audition. Stresses high quality wind literature. Performances include formal concerts on campus. Offered on a satisfactory-fail grading basis only.

Music 118. Applied Music: Non-majors. (1-0 or 1-0) Cr. 1 or 2 each time taken. F.S.S. S. Prereq: Audition, permission of instructor. Applied music for the general student. Will not satisfy applied music requirements for music majors.

- A. Voice
- B. Piano
- C. Organ
- D. Strings
- E. Carillon
- F. Woodwinds
- G. Brass
- H. Percussion
- K. Harpsichord

Music 119. Applied Music: Majors. (1-52 or 1-2) Cr. 1 to 3 each time taken. F.S.S. S. Prereq: Audition, permission of instructor, restricted to music majors. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

- A. Voice
- B. Piano
- C. Organ
- D. Strings
- E. Carillon
- F. Woodwinds
- G. Brass
- I. Percussion
- K. Harpsichord

Music 219. Applied Music: Majors. (1-52 or 1-2) Cr. 1 to 3 each time taken. F.S.S. S. Prereq: Audition, permission of instructor, restricted to music majors. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

- A. Voice
- B. Piano
- C. Organ
- D. Strings
Music 318. Applied Music: Non-majors. (5-0 or 1-0) Cr. 1 or 2 each time taken. F.S.S.S. Prereq: Audition, permission of instructor. Applied music for the general student. Will not satisfy applied music requirements for music majors.

A. Voice
B. Piano
C. Organ
D. Strings
E. Carillon
F. Woodwinds
G. Brass
I. Percussion
K. Harpsichord

Music 319. Applied Music: Majors. (1-2) or (1-2) Cr. 1 to 3 each time taken. F.S.S.S. Prereq: Audition, permission of instructor, restricted to music majors. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

A. Voice
B. Piano
C. Organ
D. Strings
E. Carillon
F. Woodwinds
G. Brass
I. Percussion
K. Harpsichord

Music 321. Advanced Ensemble. (0-3) Cr. 1 each time taken. F.S. Prereq: Advanced proficiency and performance ability, permission of director and department head. Performance in ensembles that demand high proficiency. Open to a limited number of undergraduate and graduate students.

A. Voice
B. Piano
C. Organ
D. Strings
E. Musica Antiqua
F. Woodwinds
G. Brass
I. Percussion
J. Mixed

Music 324. English and Italian Diction for Singing. (2-0) Cr. 2. Alt. F., offered 2002. Prereq: Credit or enrollment in 118A or 119A. The international phonetic alphabet and its application to correct pronunciation of English and Italian in singing.

Music 325. French and German Diction for Singing. (2-0) Cr. 2. Alt. S., offered 2003. Prereq: Credit or enrollment in 118A or 119A. The international phonetic alphabet and its application to correct pronunciation of French and German in singing.

Music 327. Functional Piano. (0-3) Cr. 2 or 3. S. Prereq: 228 or audition and permission of instructor. Emphasis on sight reading, three- and four-part score reading, improvisation, accompanying, and advanced harmonization.

A. Keyboard majors
B. Vocal/choral majors

Music 331. Materials of Music II. (3-0) Cr. 3. F. Prereq: 231. Harmonic, melodic, and rhythmic materials of the common practice period. Application of these materials in analysis and writing. Techniques of melodic construction, formal design, and harmonization.

Music 332. Aural Theory II. (0-2) Cr. 1. F. Prereq: 232. Development of sight singing, ear training, and related musical skills with emphasis on melodic, harmonic and rhythmic materials from the eighteenth and nineteenth centuries.

Music 337. Materials of Music III. (3-0) Cr. 3. S. Prereq: 331. Writing and analysis based on musical styles since 1900.

Music 338. Aural Theory III. (2-0) Cr. 1. S. Prereq: 332. Development of sight singing, ear training, and related musical skills with emphasis on melodic, harmonic and rhythmic materials from the nineteenth and twentieth centuries.

Music 350. Instrumental Techniques: Strings. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in 358B. Techniques and skills required for teaching of instrumenst for school use. For the instrumental music specialist.

Music 351. Instrumental Techniques: Clarinet, Flute, Saxophone. (1-2) Cr. 2. S. Prereq: Concurrent enrollment in 358B. Techniques and skills required for teaching of instruments. Examination of materials for school use. For the instrumental music specialist.

Music 352. Instrumental Techniques: Oboe, Bassoon. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in 358B. Techniques and skills required for teaching of instruments. Examination of materials for school use. For the instrumental music specialist.

Music 353. Instrumental Techniques: Trumpet, Horn. (0-2) Cr. 1. S. Prereq: Concurrent enrollment in 358B. Techniques and skills required for teaching of instruments. Examination of materials for school use. For the instrumental music specialist.

Music 354. Instrumental Techniques: Trombone, Baritone, Tuba. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in 358B. Techniques and skills required for teaching of instruments. Examination of materials for school use. For the instrumental music specialist.

Music 355. Instrumental Techniques: Percussion. (0-2) Cr. 1. S. Prereq: Concurrent enrollment in 358B. Techniques and skills required for teaching of instruments. Examination of materials for school use. For the instrumental music specialist.

Music 356. Instrument Maintenance and Repair. (0-2) Cr. 1. F. Prereq: Permission of instructor. Techniques and skills required for basic maintenance and repair of wind and percussion instruments. Examination of commercial repair methods and facilities. For the instrumental music specialist.

Music 358. Lab Ensemble. (0-1) Cr. F. Review and selection of appropriate literature for ensembles of differing levels and abilities; conducting and rehearsal experience.

A. Choral. Sight singing, conducting, and accompanying experience in conjunction with 362A. Required of all vocal music education majors in every semester offered.

Music 360. Vocal Pedagogy. (0-2) Cr. 2 S. Prereq: 319A or vocal proficiency examination. Physical, acoustical, and musical properties of the vocal instrument, including a survey of important texts and articles on singing and voice production.

B. Instrumental techniques. Advanced baton technique. Score preparation. Specific problems of large instrumental ensembles. Concurrent enrollment in 358B.

Music 366. Methods of Music Education. (2-0) Cr. 2. F. Prereq: Concurrent enrollment (1 cr.) in LAS 480K. 266 and admission into teacher education. Music education strategies and materials including development of appropriate objectives and plans for general music classes utilizing traditional and multicultural musics, evaluating musical learning; overview of Orff Schulwerk, Kodaly, and Dalcroze approaches; music in special education; required teaching in lab settings and observations in area schools.

Music 367. Vocal Jazz and Show Choir Techniques. (2-0) Cr. 2. S. Prereq: 361. Emphasis on developing and teaching vocal jazz and show choir programs in secondary schools, including aspects of style, review of literature, choreography, costuming, and use and technology.

Music 368. Marching Band and Jazz Ensemble Techniques. (2-0) Cr. 2. S. Prereq: Credit or enrollment in 362B. Techniques and materials for teaching marching band in the high school, philosophy, computer assisted drill design, music analysis, band set up, and other related skills. Jazz style, articulation, phrasing, materials and teaching techniques for secondary school jazz ensembles.

Music 383. History of Music. (3-0) Cr. 3. F. Prereq: 102 or 120. History of the stylistic and cultural development of music: Middle Ages through Baroque.

Music 417. Literature and Pedagogy in Applied Music. Cr. 1 to 3 each time taken. F.S.S.S. Prereq: Permission of instructor.

Music 419. Applied Music: Majors. (1.5-2 or 1-2) Cr. 1 to 3 each time taken. F.S.S.S. Prereq: Audition, permission of instructor; restricted to music majors. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

A. Voice
B. Piano
C. Organ
D. Strings
E. Carillon
F. Woodwinds
G. Brass
I. Percussion
J. Harpsichord
Music 430. Seminar in Analysis for Performance. (3-0) Cr. 3 each time taken. S. Prereq: 337, 338. Analysis and performance of selected works appropriate to student's performance medium. Examination of structural, rhythmic, harmonic, and textural aspects of the music selected. Literature will vary according to the needs of the class. Nonmajor graduate credit.

Music 440. Seminar in Music Theory. (3-0) Cr. 3 each time taken. F. Prereq: 337, 338. Various topics in music theory including counterpoint, arranging, pedagogy, and psychology of music. Content will vary. Contact the Department of Music for the current offering. Nonmajor graduate credit.

Music 464. Instrumental Administration, Materials, and Methods. (2-0) Cr. 2. S. Prereq: Credit or enrollment in 466. Instructional materials and methods appropriate for teaching instrumental music in elementary, middle school, and high school music programs. Required observations in area schools.

Music 465. Choral Materials and Methods. (2-0) Cr. 2. F. Prereq: Credit or enrollment in 466. Instructional materials and methods appropriate for teaching choral music in the secondary school. Emphasis on pedagogy and rehearsal techniques. Required observations in area schools.

Music 466. Program Development and Evaluation in Music Education. (2-1) Cr. 2. F. Prereq: 362, 366. Successful completion of continuation exam. Developing a rationale for music education; music program development; evaluation of music curricula, programs and facilities; professional growth of the teacher; preparation for student teaching and the job market. Required observations in area schools.

Music 471. The Tones of Florence - A Study of Humanism. (Same as U St 471.) Cr. 3. SS. Prereq: Application through the Study Abroad Program; interview with instructor; sophomore classification. A survey of the masterpieces of music, literature, painting, sculpture, architecture, mathematics and theology that made Florence the major European center of humanism in the Renaissance.

Music 472. History of American Music. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 9 credits from music history, American literature, art history, musicology; serious and popular currents that have influenced development in American music and its relation to transcendentalism, mass culture, and other intellectual, social, and cultural trends in the history of America. Nonmajor graduate credit.

Music 490. Independent Study. Cr. var. F.S.SS. Prereq: Permission of instructor; A through F. 12 credits in music, approval of department head. No more than 9 credits of Music 490 may be counted toward graduation. A. Education

B. Theory
C. Composition
D. History
E. Literature
F. Applied Music
H. Honors

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Music 590. Special Topics. Cr. var. F.S.SS. Prereq: Permission of instructor, approval of department head.
A. Education
B. Theory
C. Composition
D. History
E. Literature
F. Applied Music

Music 593. Workshops. Cr. var. each time taken. A. Foundations of Music Learning
B. Music in Early Childhood
C. Junior High School Music Programs
D. Instrumental Teaching Techniques
E. Research in Music Education
F. Vocal/Choral Teaching Techniques
G. General & Contemporary Music Methodologies
H. Music and Technology

Naval Science

www.iastate.edu/~navy
Gary E. Washburn, Chair of Department

Professors: Washburn
Instructors (Adjunct): Diemer, Freeborn, Leach, Sagle

The function of the Navy and Marine Corps officer education program is to provide, by a permanent system of education in essential naval science and other academic subjects at civil education institutions, a source from which qualified officers may be available for the Navy and the Marine Corps and their reserve components.

Students who enter the Navy and Marine Corps officer education program may apply for either of two programs: the NROTC scholarship program (full scholarship which includes books, tuition, laboratory fees, uniforms, and $200 per month), or the college program (non-scholarship, limited financial assistance). Applicants for the scholarship program are selected through comprehensive nationwide competitive procedures. Applicants for the college program are selected by the Professor of Naval Science from among students already in attendance at or selected for admission by the university. This program involves financial assistance of $1,500 for each of the last two academic years. NROTC students pursue their studies like other students except that they must meet certain requirements that will prepare them to serve as naval officers after graduation. A scholarship program student incurs a minimum 4-year active duty military obligation as a commissioned officer after graduation; a college program student incurs a 3-year active duty obligation. If a scholarship student fails to earn a degree, or if a commission is not tendered (for other than physical reasons), the student may incur a 2-year obligation in an enlisted grade or may be required to reimburse the government for scholarship costs. This obligation is not incurred during the freshman year. Information is available from the Professor of Naval Science, Iowa State University. While in the program, students will participate in summer at-sea training cruises with pay. Students are also exposed to regular and extracurricular activities that teach leadership principles and help them decide which field of the Navy or Marine Corps they wish to enter. These activities include a weekly leadership laboratory, three cruises for scholarship and one for nonscholarship students and several student societies.

Undergraduate Study

Naval science courses are primarily for those students in the NROTC program. However, other university students may also enroll in naval science courses.

All students enrolled in the NROTC program must fulfill the following requirements:
1. N.S. 111, 210, 211, 212, 311, 312, 411, 412. Marine option students will substitute N S 321 and 421 for the 300 and 400 series listed above. Hist 389 may be substituted for N S 212. Mgmt 370 may be substituted for N S 411.
2. All NROTC students must complete one course in American military history or national security policy. A computer science course is required of all Navy-option students.
3. All Navy option scholarship students must successfully complete Math 165 and 166, Math 175 and 176, or Math 181 and 182 by the end of the sophomore year; Phys 221 and 222, or Phys 111 and 112 by the end of the junior year.
4. In addition to the normal naval science courses, all NROTC students are required to participate in laboratory periods that supplement the various academic courses; emphasize human relations principles; teach basic military formations, movements, commands, courtesies, and honors; and provide practice in unit leadership.
5. Navy option scholarship students are encouraged to major in engineering and physical sciences to meet the technological requirements of the modern Navy; however Navy-option students and Marine Corps option students may pursue any major leading to a bachelor’s degree.

6. The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credit hours of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credit hours must be in courses numbered 300 or above.

For basic undergraduate curriculum requirements, see Liberal Arts and Sciences, Curriculum, or Engineering, Curricula.
Courses Primarily for Undergraduate Students

N S 111. Introduction to Naval Science. (3-0) Cr. 3. F. Introduction to the organization, regulations, and capabilities of the Navy, with emphasis on mission and principal warfare components.

N S 210. Naval Ship Systems I (Engineering). (3-0) Cr. 3. S. An introduction to naval engineering with emphasis on the equipment and machinery involved in the conversion of energy for propulsion and other purposes aboard the major ship types of the U.S. fleet. Basic concepts of the theory and design of steam, gas turbine, diesel, and nuclear propulsion. Introduction to ship design, stability, hydrodynamic forces, compartmentation, electrical and auxiliary systems, damage control.

N S 211. Naval Ship Systems II (Weapons). (3-0) Cr. 3. F. Introduction to the theory and principles of operation of naval weapon systems. Includes coverage of types of weapon systems, capabilities and limitations; theory of target acquisition, identification and tracking; basics of Naval Ordnance.

N S 212. Seapower and Maritime Affairs. (3-0) Cr. 3. S. Development of concept of seapower including the Merchant Marine, role of various warfare components of the Navy in supporting the Navy’s mission; implementation of seapower as an instrument of national policy; comparative study of U.S. and Soviet naval strategies.

N S 311. Navigation and Naval Operations I. (3-0) Cr. 3. F. Study of the fundamentals of marine navigation used by ships at sea; includes practical exercises in piloting using visual and electronic means. In-depth discussion of laws that govern conduct of vessels in national/international waters. Course is supplemented with review/analysis of case studies involving actual navigation incidents.

N S 312. Navigation and Naval Operations II. (3-0) Cr. 3. S. Study of tactical naval operations; employs practical use of maneuvering boards together with shiphandling principles to arrive at tactical shipboard maneuvering solutions for single ship and formation operations. Study also of command and control, leadership, and ethics issues associated with surface naval operations.

N S 321. Evolution of Warfare. (3-0) Cr. 3. Alt. F., offered 2001. Evolution of warfare from 3500 B.C. to contemporary times; analysis of the impact of historical precedents on modern military thought and action; emphasis on the historical development of military tactics, strategy, and technology.

N S 411. Leadership and Management I. (3-0) Cr. 3. F. Experiential approach to learning the principles of leadership and management by examining business management theories and their applications. Skills are developed in the areas of communication, counseling, control, direction, management, and leadership through active guided participation.

N S 412. Leadership and Management II. (3-0) Cr. 3. S. Prereq: Junior classification. Basic background concerning the duties and responsibilities of the junior naval officer and division officer in the areas of integrity and ethics, human resources management, personnel management, material management, and the administration of discipline. Preparation for responsibilities encountered immediately upon commissioning.

N S 421. Evolution of Amphibious Warfare. (3-0) Cr. 3. Alt. F., offered 2002. Defines the concept of amphibious operations, origins, development from 600 B.C.

N S 440. Senior Naval Science Seminar. (1-0) Cr. 1. F.S. Current leadership issues in the Navy which will challenge the newly commissioned officer. Opportunities to analyze, provide solutions, and discuss actions related to a variety of real world situations.

N S 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: Senior classification, 6 credits in naval science. No more than 9 credits of N S 490 may be counted toward graduation.

Neuroscience

(Interdepartmental Graduate Program)

Supervisory Committee: D. S. Sakaguchi, Chair; L. Anderson, V. Honavar, R. Hughes, S. Jefftinija

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in neuroscience. Cooperating departments include Animal Science, Biochemistry, Biophysics and Molecular Biology, Biomedical Sciences, Chemical Engineering, Computer Science, Entomology, Microbiology, Psychology, Veterinary Pathology, and Zoology and Genetics.

Facilities and faculty are committed to research in the following areas: neuronal membrane functions, signal transduction, neuroanatomy, neurodegenerative diseases, neuroendocrinology, neurotoxicology, neuropathology, developmental neurobiology, neurogenetics, computational neuroscience, neural networks, and behavioral neuroscience.

An undergraduate or advanced degree in the sciences is ordinarily a prerequisite for admission to the program. A student majoring in neuroscience will select a major professor from the faculty participating in the program.

All students take a core curriculum consisting of Neuro 556, 557, 660, 690, 696, BMIB 404, and Stat 401. All students are also expected to take elective neuroscience courses from the following: Com S 474, E E 546, M 511, 517, 519, RSM 507, 511, 551, 551L, 559, 565; V Pth 555; V Pth 555; Zool 540.

Courses for Graduate Students

Neuro 556. Neurobiology. (Same as Zool 556.) (3-0) Cr. 3 to 4. F. Prereq: Zool 355 or Psych 310; physics recommended. Integration, coding, plasticity, and development in nervous systems.

Neuro 557. Advanced Neuroscience Techniques. (Same as Zool 557.) (1-0) Cr. 2. S. Prereq: 556. Research methods and techniques; exercises and/or demonstrations representing individual faculty specialties.

Neuro 660. Current Topics in Neurobiology and Behavior. (Same as Zool 660.) Cr. 2 to 3 each time taken. Prereq: Permission of instructor. Topics may include communication, computational neuroscience, hormones and behavior, neural integration, development and specialization.
edge of agricultural, horticultural, forest pests, as well as those of man and animals. Graduates can diagnose pest problems and recommend ecologically and economically sound systems to alleviate these problems. They are well versed on the pest concept, are able to identify pests and symptoms of pest injury, and understand the economics of decision making. Moreover, graduates are aware of technologically advanced pest management tactics and are skilled in applying these. Students educated in pest management may find employment opportunities with governmental agencies (state and federal), agricultural chemical companies, food-processing firms, consulting agencies, urban pest control companies, timber companies, and other concerns that produce, process, and market the nation’s food and fiber.

Students wishing to enroll in the pest management curriculum must register with the chair of the advisory committee. After consultation with the chair, a pest management adviser will be assigned, depending on the interests of the student. The student should indicate interest in pest management as early as possible in order that requirements of the program be effectively integrated with those of the primary major.

A pest management minor may be earned by completion of at least 15 credits of pest management or related courses taken at ISU. The courses that must be taken for a minor are: Agron 317; Ent 376; PL P 407. The remainder of the 15 credits are to be selected from the following: Ent 374; PL P 416; P M 491, 499. Courses required in a student’s major may not be applied toward the pest management minor. Contact the pest management chair for more details.

Courses open for nonmajor graduate credit:
376, 407, 416.

Courses Primarily for Undergraduate Students
P M 283. Pesticide Applicator Certification. (Same as Ent 283) See Entomology.
P M 376. Fundamentals of Entomology and Pest Management. (Same as Ent 376) See Entomology. Nonmajor graduate credit.
P M 416. Forest Pest Management. (Same as PL P 416) See Plant Pathology. Nonmajor graduate credit.
P M 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: Junior or senior classification, 3 credits in pest management, permission of instructor, and written plan of study approved by pest management curriculum chair. A maximum of 6 credits of 490 may be used toward the total of 128 credits required for graduation.
P M 491. Pest Management Experience. Cr. 2. Prereq: 6 credits in pest management; permission of instructor. Practical experience (internship) in management of plant diseases, insect populations, weeds, and other pests. Diagnosis, problem assessment, and control procedures are emphasized. For majors and advanced students.

Philosophy and Religious Studies
Michael Bishop, Chair of Department
Professors: Comstock, Hollinger, Hunter, Kirschermann, Kupfer, Robinson, Smith, Wilson
Professors (Emeritus): Hollenbach, Van Iten
Associate Professors: Avalos, Baum, Bishop, Holmgren, Sawyer
Assistant Professors: Bado-Fralick, Butler, Davidson, De Laplante, Fehr, Gevisson, Gross, Sanford, Svatos
Assistant Professors (Adjunct): McDuff, Torrago

Philosophy

Undergraduate Study
The major in philosophy offers study in the important ideas, values, and ways of thinking that underlie cultural, social, and political processes, and that direct the specialized search for knowledge. Philosophical study broadens the student’s educational experience and facilitates more effective participation in the human community.

An undergraduate major in philosophy should have a broad background in the liberal arts and sciences. The major program includes both a core and electives to provide a thorough acquaintance with the history of philosophy and further concentration in historical and systematic issues. An undergraduate major in philosophy can prepare the student for graduate work in philosophy, and also for further study in law, history, theology, religion, political science, social and political theory, or literature.

The degree program in philosophy requires a minimum of 27 credits in the core program and 6 credits of electives chosen from the remaining courses listed in the 300 or 400 levels.

The following courses compose the basic core program of the department from which 27 credits shall be chosen.

a. Introduction: 201 (required).
b. Logic: 207 (required).
c. Ethical theory: one course required. Choose from 330, 335.
e. History: Three courses required, at least one each from group A and group B: A: 310, 314, 315; B: 316, 317, 318.
f. Two 400-level courses required.

The department offers a minor in philosophy which may be earned by completing a total of 15 credits in philosophy including 201 and at least 6 credits in courses numbered 300 or above. Students may want to emphasize specific areas by taking 15 hours of courses chosen from the following:

Philosophy of Science: 201, 206 or 207, 314, 315, 380, 381, 480
History of Philosophy: 201, 310, 314, 315, 316, 317, 318; 460 or 470

English proficiency requirement: The department requires a grade of C+ or better in each of Engl 104 and 105 (or 105H), and approval of writing by instructor of one history of philosophy course (310-318), to be designated by the student.

Graduate Study
The department offers a graduate minor in philosophy. For those taking the M.A. or M.S., the minor requirement is two courses above 300 (but not 490) taken in conjunction with 590. For those taking the Ph.D., the requirement is four courses above 300, at least one of which is above 400 (but not 490) all taken in conjunction with 590. Interested students should ask the chair to assign a minor adviser.

The department participates in the interdepartmental program in general graduate studies. (See Index.)

Courses open for nonmajor graduate credit: All courses numbered above 300 except 490.

Courses Primarily for Undergraduate Students
Phil 201. Introduction to Philosophy. (3-0) Cr. 3. F.S.S. It has been rumored that the unexamined life is not worth living. Philosophy is an attempt to begin examining life by considering such questions as: What makes us human? What is the world ultimately like? How should we relate to other people? Is there a god? How can we know anything about these questions? Understanding questions of this kind and proposed answers to them is what this course is all about.

Phil 206. Introduction to Logic and Scientific Reasoning. (3-0) Cr. 3. F.S.S. Basic principles of critical reasoning and argument evaluation. A consideration of basic forms of argumentation in science and everyday life. Application to contemporary issues and controversies. This course is not recommended for students majoring in math, science, or engineering.

Phil 207. Introduction to Symbolic Logic. (Same as Ling 207) (3-0) Cr. 3. S. Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary English and to philosophical issues. Majors should take 207 as early as possible.

Phil 230. Moral Theory and Practice. (3-0) Cr. 3. F.S.S. Investigation of moral issues in the context of major ethical theories of value and obligation; e.g., punishment, abortion, economic justice, job discrimination, world hunger, and sexual morality. Emphasis on critical reasoning and argument analysis.

Phil 235. Ethical Issues in A Diverse Society. (3-0) Cr. 3. S. This course will examine a range of arguments on diversity issues. Topics will include: the social status of women, the moral status of sexuality and homosexuality, the nature and role of racism in contemporary society, the relationship between biology, gender roles and social status, and various proposals for change from a variety of political perspectives.
Phil 298. Cooperative Education. Cr. R. F. S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to committing each work period.

Phil 310. Ancient Philosophy. (Same as Cl St 310.) (3-0) Cr. 3 F. Prereq: 201. Survey of the principal philosophers of the ancient world: the pre-Socratics, Plato, Aristotle, the Epicureans, the Stoics. Questions concerning being, knowledge, language, and the good life are treated in depth. Nonmajor graduate credit.

Phil 314. 17th Century Philosophy. (3-0) Cr. 3. Alt. S., offered 2002. Readings from philosophers such as Hobbes, Descartes, Spinoza, Leibniz, and Locke. Changing conceptions of knowledge, self, and desire in response to Galileo's new science and post-reformation change to ecclesiastical authority. Nonmajor graduate credit.

Phil 315. 18th Century Philosophy. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 201. Readings from philosophers such as Berkeley, Hume, and Kant. Development of Enlightenment thought. Issues include idealism, causation, freedom, and knowledge regarding science, ethics, and desire. Nonmajor graduate credit.

Phil 316. 19th Century Continental Philosophy. (3-0) Cr. 3 Alt. F., offered 2001. Prereq: 201. The thought of Hegel, Marx, Nietzsche, and their contemporaries. Various perspectives on the philosophy of history, the nature of reason and subjectivity, the contrast between dialectical and nondialectical philosophy, and the relationship between philosophy and society. Nonmajor graduate credit.

Phil 317. 20th Century Continental Philosophy. (3-0) Cr. 3 Alt. F., offered 2002. Prereq: 201. An examination of 20th century continental philosophy against the backdrop of the 19th century continental tradition. Movements covered include: Phenomenology, Marxism, Postmodernism, Poststructuralism, Feminism. Focus on attempts to develop a new history, race, and gender. Debates about the crisis of reason and culture; political issues surrounding such debates. Nonmajor graduate credit.

Phil 318. 20th Century Anglo-American Philosophy. (3-0) Cr. 3 S. Prereq: 201. Major movements in recent philosophy such as realism, logical positivism, ordinary language philosophy, and naturalism. Russell, Wittgenstein, Quine and other leading figures. Topics include knowledge of the material world, mind, language, values, and philosophical method. Nonmajor graduate credit.

Phil 330. Ethical Theory. (3-0) Cr. 3 F. Prereq: 201 or 230. Major theories in normative ethics and metaethics such as utilitarianism, emotivism, and relativism. Comparison of ethics with science and how moral judgments are justified. Nonmajor graduate credit.

Phil 331. Moral Problems in Medicine. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 230 or junior classification. In-depth study of some of the central moral issues arising in connection with human impact on the environment, e.g., human overpopulation, species extinction, forest and wilderness management, pollution, and the natural world views of the proper relationship between human beings and nature will be explored. Nonmajor graduate credit.

Phil 335. Social and Political Philosophy. (3-0) Cr. 3 Alt. S., offered 2002. Prereq: 201 or 230. Foundations of social and political life. Metaphysical and epistemological grounds in classical and recent thinkers. The basis of political organization, the nature of social and political institutions, rights and authority, justice and the character of distinctly political action. Original texts. Nonmajor graduate credit.

Phil 336. Bioethics and Biotechnology. (3-0) Cr. 3 Alt. S., offered 2003. Prereq: Phil 201 or 230 or 235, or permission of instructor. In-depth study of some central moral issues in the life sciences, e.g., genetic screening and testing, genetically engineered plants and animals, risk analysis, biotechnology patents, research ethics, biodiversity, the impact of biotechnology upon society and the environment. Major moral theories will be discussed and applied. (Phil 336 contains almost no similarities to Phil 331.) Nonmajor graduate credit.

Phil 338. Feminism Philosophy. (3-0) Cr. 3 S. Prereq: 3 credits in philosophy recommended. This course critically examines the work of women philosophers such as sex/gender, self/others, subjectivity/objectivity, and nature/nurture, does in philosophy and in our culture more generally. In particular we will consider historical and contemporary feminism engages issues of sexual orientation, political equality, race, biology, violence and pornography, as it works toward the personal and political emancipation of women. Nonmajor graduate credit.

Phil 340. Aesthetics. (3-0) Cr. 3 F. Prereq: 201 or 230. Is liking all there is to appreciating works of art or natural beauty? We will examine our appreciative experiences, talk about such experiences (e.g., art criticism), and what makes them valuable. Do the different arts have common values? How are their differences important? Nonmajor graduate credit.

Phil 343. Philosophy of Technology. (Same as T SC 343.) (3-0) Cr. 3 F. S. Prereq: 6 credits of social science or T SC 341 and 3 credits of social science. Conditions under which technological innovations contribute to human emancipation, relationship of technology and democracy, utility and limits of technical rationality, and problems of ensuring that benefits of technological advance are communally shared. Issues discussed with reference to contemporary developments in microelectronics, technology transfer to the Third World, etc. Nonmajor graduate credit.

Phil 350. Philosophy of Religion. (Same as Relig 350) Cr. 3 F. Prereq: 201. The value and truth of religious life and belief. Mystical experience, religious faith and language, arguments for God’s existence, the problem of evil; miracles; and religion and morality. Historical and contemporary readings from both the western and eastern traditions. Nonmajor graduate credit.

Phil 380. Philosophy of Science. (3-0) Cr. 3 F. Prereq: 201 or 6 credits in a science. Introduction to the philosophy of basic problems common to the natural and social sciences: the nature of explanation, the structure of theories, the unity of science, and the distinction between science and nonscience. Nonmajor graduate credit.

Phil 381. Philosophy of the Social and Behavioral Sciences. (3-0) Cr. 3 F. Prereq: 6 credits in the social sciences. Methodological, ideological, and doctrinal issues about the social and behavioral sciences. Focus is on the historical and cultural background of 19th and 20th century western thought. Nonmajor graduate credit.

Phil 388. Cooperative Education. Cr. R. F. S.S. Prereq: Permission of the department cooperative education coordinator, junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period. Nonmajor graduate credit.

Phil 430. Value Theory. (3-0) Cr. 3 each time taken, maximum of 6 credits. S. Prereq: 230. Theoretical and normative issues in ethics, aesthetics, religious thought, or political philosophy. Topics vary each time offered. Nonmajor graduate credit.

Phil 450. Free Will, Fate, and Moral Responsibility. (3-0) Cr. 3 F. Prereq: 3 credits in philosophy; 201 strongly encouraged. Are we free if all our actions are inevitable consequences of our past and the laws of nature, or if God exists and is omniscient? Examines what sorts of facts constitute threats to human free-dom. Issues of time, truth, causation, and agency are treated in depth. Nonmajor graduate credit.

Phil 460. Epistemology and Metaphysics. (3-0) Cr. 3 each time taken, maximum of 6 credits. Alt. S., offered 2002. Prereq: 201 and at least one course in the history of philosophy. Issues in epistemology and metaphysics. Topics vary each time offered. Nonmajor graduate credit.

Phil 465. Brains, Minds, and Computers. (3-0) Cr. 3 F. Prereq: 201. Examination of concepts such as possibility, intelligence, programming, and free will; and of arguments about whether any human capacity is forever beyond realization in a machine. Nonmajor graduate credit.

Phil 480. Controversies in Science. (3-0) Cr. 3 each time taken. S. Prereq: 3 credits in philosophy or 6 credits in a natural or social science. Philosophical treatment of a branch of science that has (or has had) significant social, political, religious and/or moral implications. Possible topics include: the IQ debate, implications of Darwinism, The Galileo affair, the role of values in science, critical analysis of current science policy (e.g., the Human Genome Project). Topics will be arranged to meet the needs of interested students. Often taught by a philosopher and a scientist from the relevant discipline. Nonmajor graduate credit.

Phil 490. Independent Study. Cr. 1 to 4 each time taken. Prereq: 6 credits in philosophy; permission of instructor; approval of chairman. No more than 6 credits of Phil 490 may be counted toward graduation. Guided reading and research on special topics selected to meet needs of advanced students. H. Honors

Phil 498. Cooperative Education. Cr. R. F. S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period. Nonmajor graduate credit.

Courses Primarily for Graduate Students or for minor credit, open to qualified undergraduates

Phil 535. Contemporary Political Philosophy. (Same as Pol S 535.) (3-0) Cr. 3 Alt. S., offered 2003. Prereq: 6 credits of philosophy or political science. Examination of theories of justice proposed by contemporary political philosophers. Focus of the philosophical foundations of perspectives such as liberalism, libertarianism, communitarianism, socialism, feminism. Normative assessments of socio-political institutions. Nonmajor graduate credit.

Phil 590. Special Topics in Philosophy. Cr. 2 to 4 each time taken. Prereq. Permission of instructor; 9 credits in philosophy.

Religious Studies (Relig) Undergraduate Study

Religious studies gives students the opportunity to investigate and reflect on the world’s religions in an objective, critical, and appreciative manner. Though there is emphasis in religious studies on the wide variety of religious phenomena as well as on the various methods in the study of religion, the aim is to help students develop their own integrated understanding of the nature of religion and its role in individual and social life.

Graduates of the religious studies program have knowledge of the religious diversity in the United States and the world. They have the ability to interpret religion empathetically and critically and to compare and contrast historical and contemporary differences and similarities of religious systems. They understand ways in which religion influences and is influenced by the historical, social, and cultural contexts in which religious systems function. Graduates often pursue careers in non-profit, community-oriented organizations; apply to professional schools or graduate programs; or enter seminaries to prepare for ministry.

The program provides students with the following opportunities: to major or minor in religious studies, to fulfill group requirements, to take religious studies courses that are integratable into another major, to take religious studies courses as electives, and to develop an interdisciplinary studies major. (See the professor in charge of the religious studies program for advice.)

The major in religious studies seeks to provide both breadth and depth. Breadth is provided through the exploration of the world’s various religious traditions and through exposure to a variety of theoretical approaches and methodologies in the academic study of religion.

Depth is achieved through specialized courses in particular religious traditions and particular issues in the study of religions, culminating in research seminars. The objective is to expose the student to various components of the discipline of Religious Studies and by doing so develop skills that are valuable in a number of careers and that provide the necessary foundation for pursuing graduate studies.

Studens are required to take courses in three clusters of religious traditions: 1. Western religions (religions originating in Southwest Asia, the Mediterranean Basin, or in Europe); 2. Asian religions (religions originating in South Asia, Southeast Asia, or East Asia) and 3. Indigenous religions (religions among the indigenous peoples of Africa, the Americas, Australasia, and Siberia). One additional course should focus on religion within North America.

Students pursuing a major in religious studies must complete a minimum of 33 credits, including the following requirements:

1. Three credit hours in each of the three clusters of religious traditions, for a total of nine hours.
2. Three credit hours in a course that primarily focuses on religion in North America. (The course used to meet the North American religious requirement may not be used simultaneously to meet the cluster requirement, described in number 1 above.)
4. Six hours of Seminar (475).

The following courses may be used to fulfill the requirements in the areas of Western, Asian, Indigenous, and North American Religions. Note that some courses cannot be used to meet these requirements, but are general electives for the Religious Studies Major.

I. Western Religious Traditions
   Relig 210, Religion in America
   Relig 220, Introduction to the Bible
   Relig 233, Introduction to Judaism
   Relig 242, History of Christianity
   Relig 280, Introduction to Catholicism
   Relig 321, Old Testament
   Relig 322, New Testament
   Relig 323, Science and Religion
   Relig 334, African American Religious Experience
   Relig 338, Latin/o/a Religious Experience
   Relig 354, Islamic Civilization
   Relig 367, Christianity in the Roman Empire
   Relig 376, The Archaeology of Greek and Roman Religions

II. Asian Religions
   Relig 352, Religious Traditions of India
   Relig 353, African Religions

III. Indigenous Religions
   Relig 328, American Indian Religions
   Relig 356, African Religions

IV. Religion in North America (while courses may be listed in more than one category, the same course may not be used to meet both requirements)
   Relig 210, Religion in America
   Relig 328, American Indian Religions
   Relig 334, African American Religious Experience
   Relig 338, Latin/o/a Religious Experience

The program offers a minor which may be earned by completing a total of 15 credits in religious studies including course work in three of the four areas that have been previously described. Nine hours must be in courses at the 300 level or above (no more than 3 hours of seminar and no more than 3 hours of independent study).

English proficiency requirement: The department requires a grade of C or better in each of English 104 and 105 (or 105H), and requires one 300 level course in religious studies in which writing is evaluated as acceptable.

Students may choose to do a senior thesis under the supervision of a religious studies faculty adviser. This option may earn 3-6 credits toward the completion of the major.

Graduate Study

The program offers courses for graduate minor work in religious studies as supporting work for other fields. Religious studies may also be one of the three areas required for the general graduate studies master’s degree.

Courses open for nonmajor graduate credit include:

Courses Primarily for Undergraduate Students

Relig 105. Introduction to World Religions. (3-0) Cr. 3. F.S.S.S. An introduction to the academic study of religions, including myths, beliefs, rituals, values, social forms. Examples chosen from oral cultures and major religions of the world.

Relig 210. Religion in America. (3-0) Cr. 3. F.S.S.S. Introductory study of the major beliefs, practices, and institutions of American Judaism, Catholicism, Protestantism, and Islam with emphasis on the diversity of religion in America, and attention to issues of gender, race, and class.

Relig 220. Introduction to the Bible. (3-0) Cr. 3. F.S. Basic overview of the contents of the Old and New Testament in light of their ancient socio-historical background, and with attention to a variety of interpretations and relevance to modern American society.

Relig 233. Introduction to Judaism. (3-0) Cr. 3. An introduction to basic Judaism. Special attention is given to Jewish sacred texts, rituals, social practices, and modern forms.

Relig 242. History of Christianity. (3-0) Cr. 3. F.S.S.S. An introduction to Christian thought and practice from an historical point of view, stressing the development of belief, spirituality, and organization, and the continuities and changes involved in these developments.

Relig 260. Religious Ethics. (3-0) Cr. 3. Investigates different religious ethical theories and traditions of reasoning about practical moral issues (e.g., abortion, the just distribution of wealth, environmental ethics). Explores in detail the relationship between religious beliefs and moral practice.

Relig 280. Introduction to Catholicism. (3-0) Cr. 3. F. An introduction to Catholic belief and practice. The Catholic ethos will be located in the context of other world religions, and special stress will be placed on the central beliefs of the Creed as understood by Catholics, and on sacramentality as the distinguishing mark of the Catholic worldview.

Relig 321. Old Testament. (3-0) Cr. 3. F. An in-depth study of the literature and religion of ancient Israel in the light of recent archaeological discoveries, research about the ancient Near East, and a variety of interpretations. Nonmajor graduate credit.

Relig 322. New Testament. (3-0) Cr. 3. A detailed survey of the sacred scriptures of Christianity in light of recent archaeological discoveries and historical research about the Greco-Roman and Jewish background. Nonmajor graduate credit.

Relig 323. Science and Religion. (Same as Hist 323.) See History.

Relig 328. American Indian Religions. (Same as Am Hist 328.) (3-0) Cr. 3. An introduction to the beliefs and rituals of Native American religious traditions, with attention to cultural and historical contexts and implications. Nonmajor graduate credit.

Relig 334. African American Religious Experience. (Same as Afr Am 334.) (3-0) Cr. 3. Alt. F., offered 2002. Examination of the African American experience from the perspective of black religion and the black church, with attention to political, economic, and social, as well as spiritual, concerns. Nonmajor graduate credit.

Relig 336. Women and Religion. (Same as W S 336.) (3-0) Cr. 3. F. Prereq: 105, 210 or W S 210 recommended. Examines the status of women in various religions, feminist critiques of religious structures and belief systems, and contemporary women’s spirituality movements. Nonmajor graduate credit.

Relig 338. Latin/o/a Religious Experience. (3-0) Cr. 3. A survey of Latin/o/a religious experience, including religious traditions as they are reflected in the literature of Mexican Americans, Puerto Ricans, Cubans, and other groups of Latinos living in the United States. Nonmajor graduate credit.

Relig 350. Philosophy of Religion. (Same as Phil 350.) See Philosophy. Nonmajor graduate credit.

Relig 352. Religious Traditions of India. (3-0) Cr. 3. F. Examines the religious traditions of India, including Hinduism, Jainism, and Sikhism, through text, ritual, and contemporary practice. Nonmajor graduate credit.

Relig 353. Buddhism. (3-0) Cr. 3. S. The various Buddhist paths to realize enlightenment and freedom. Special attention to meditation and yoga and their relationship to altered states of consciousness and to social contexts. Nonmajor graduate credit.

Relig 354. Islamic Civilization. (3-0) Cr. 3. S. An introduction to Islamic religion, culture, and society from 700 to the present. Nonmajor graduate credit.

Relig 356. African Religions. (3-0) Cr. 3. An introduction to the teachings, practices, and history of the religions that originated in Africa and other religions which have gained substantial followings among African peoples. Nonmajor graduate credit.

Relig 367. Christianity in the Roman Empire. (Same as Cl St 367.) (3-0) Cr. 3. An historical introduction to the rise of Christianity in the Roman empire, with special attention to the impact of Greco-Roman culture on the thought and practice of Christians and the interaction of early Christians with their contemporaries. Nonmajor graduate credit.

Relig 370. Religion and Politics. (Same as Pol S 370.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 105 or 210 recommended. The interaction of religion and politics in the U.S. from both an historical and contemporary perspective, as well as the role of religion in politics internationally. Nonmajor graduate credit.

Relig 376. The Archaeology of Greek and Roman Religions. (Same as Cl St 376.) See Classical Studies.

Relig 377. Social Dimensions of Religion. (Same as Soc 377.) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 210, or Soc 130 or 134 recommended. The influence of religion in society, both as a conservator of values and as a force for social change. Nonmajor graduate credit.

Relig 385. Theory and Method in Religious Studies. (3-0) Cr. 3. Prereq: 105. Examines the variety of theories and methods employed in the study of religion. Application of these methods to various religions of the world. Nonmajor graduate credit.

Relig 475. Seminar: Issues in the Study of Religion. (3-0) Cr. 3 each time offered, maximum of 6 credits. Prereq: 6 credits in religious studies. Topic changes each time offered. Sophomores must have approval of instructor. Nonmajor graduate credit.

Relig 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 6 credits in religious studies, and permission of instructor. Topic changes each time offered. Sophomores must have approval of instructor. Nonmajor graduate credit.

Relig 499. Peace and Justice Internship. Cr. var., maximum of 6. Prereq: 3 credits in religious studies, permission of faculty internship coordinator. Supervised placement with a peace and justice agency; structured reflection on the relation of religion and practical social issues. Offered on a satisfactory-fail grading basis only.

Relig 500. Special Topics in Religious Studies. Cr. 1 to 3 each time taken. Prereq: Permission of instructor, 9 credits in religious studies.

www.physics.iastate.edu/

Physics and Astronomy

Distinguished Professors: Clem, Finnemore, Harmon, Ho, Johnston, Lynch

University Professors: Willison

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in physics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

Physics and astronomy are basic natural sciences which attempt to describe and provide an understanding of both our world and our universe. Physics serves as the underpinning of many different disciplines including the other natural sciences and technological areas. Graduates are proficient in the methods of rigorous scientific analysis, relevant mathematical techniques, and modern computational and laboratory methods. They have a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, and modern physics. They are able to communicate clearly and effectively at general and technical levels. They are prepared to pursue a wide range of careers as a professional physicist, astronomer, or science educator. They are also prepared to pursue advanced studies and careers in areas as diverse as engineering, medicine, law, and business administration.

Many opportunities exist for students who terminate their studies with a bachelor's degree, especially when combined with technology studies in other areas. Students who meet the necessary scholastic standards often continue their studies in a graduate college, exploring and contributing to new developments in the field.

The department normally expects each student majoring in physics to complete at least the following courses: Phys 221, 222, 232, 321, 321L, 322L, 322L, 324, 306, 361, 364, and three credits of laboratory work chosen from 310, 311, 311T, 470L, or Astro 344L. All students are required to earn at least 5 credits in laboratory work in physics in addition to the laboratory components of Phys 221 and 222. These 5 credits must be in courses numbered 300 or higher or in approved substitutions. All students must earn at least 20 credits in physics and astronomy courses numbered 304 or higher. The basic list of expected courses is not a rigid requirement and changes in this basic list will be approved by the department curriculum committee on recommendation of the student’s advisor when such changes will better serve the student’s needs. In particular, students planning a physics major and also seeking certification for high school teaching may, with the approval of their adviser, follow a significantly different program designed to meet their particular needs; these students should consult the department for further information. Further information concerning programs of study, including sample degree programs, is available from the department.

The department also offers a major in applied physics in cooperation with several other departments. This major consists of a physics core plus more specialized studies in a physics-related technology area, and is designed to prepare students to work in high-technology industry, or continue their studies in a graduate program in applied science or engineering. Normally students in this major will be expected to complete a physics core, consisting of the following courses: Phys 221, 222, 321, 321L, 361, 364, and six credits of laboratory work chosen from Phys 310, 311, and 470L. At least 3 credits of the laboratory must be in Phys 470L. In addition, a minimum of 12 credits in a specialized topic area must be obtained from the Department of Physics and Astronomy. In summary, the major usually requires a minimum of 32 credits of physics and 12 credits in a specialized topic area.

Students majoring in physics who wish an emphasis in astronomy or astrophysics should consider a minor in astronomy (see below). Those planning graduate work in physics, astronomy, or astrophysics should add to the basic list the courses Phys 362, 365, 480, 481, and 496. One or more of Astro 405, Phys 511, 524, or 537 may also be added according to interest.

The department offers a minor in physics which may be earned by completing 20 credits in physics courses chosen as follows: Phys 221, 222; either 321 or 324; at least one credit of laboratory chosen from 321L, 322L, 310, 311, and 311T. Other acceptable courses are 304, 306, 322, 361, 362, 364, 366, 480, 481, and 496.
The department offers a minor in astronomy which may be earned by completing 15 credits as follows: a total of 12 or more credits in Astro courses (must include Astro 344L and may include one of the courses Astro 120, Astro 150 or Astro 250), with the remaining 3 credits (if applicable) chosen from among Physics 304, 321, 324, 361, 362, 364, 365, 480, 481, or 496; 12 or more credits must be at the 300 level or higher. Note that the same course may not be used to satisfy both the requirements of a physics major and an astronomy minor.

English proficiency requirement: The department requires a grade of C or better in each of Engl 104 and 105 (or 105H), and a C– or better in Engl 305 or 314. Students are also encouraged to study at least one foreign language.

Graduate Study

The department offers studies for the degrees of master of science and doctor of philosophy with majors at both levels in applied physics, astrophysics, condensed matter physics, high energy physics, nuclear physics, and physics; and minor credit courses for students majoring in other departments.

Facilities of various research groups of the department, the Ames Laboratory, and the Applied Science Center, including the Microelectronics Research Center, are available for research.

Students with bachelor’s degrees in physics or astronomy from other institutions ordinarily will qualify for graduate study at Iowa State provided they have satisfactorily completed course work similar to that suggested for undergraduate majors here intending to go on to graduate school. In some cases additional instruction at the intermediate level may be required.

Graduates have a broad understanding of physical science, as well as mastery of state-of-the-art methods in their area of specialization. They are able to communicate effectively to a wide range of audiences, from the general public to research colleagues. Their skills in rigorous scientific thinking prepare them for leadership in the broader community. They are skilled in carrying out research, communicating research results, and soliciting research support. They have considerable teaching experience. They have developed problem solving skills that prepare them for careers in either industry or academia.

All candidates for an advanced degree in physics are expected to complete Phys 571, 572, 591, and either 531 or 564. Candidates for an advanced degree in applied physics are expected to complete Phys 571, 591, 470L (6 cr.), 699 (3 cr.), and either 572 or 531.

Except for the applied physics major where a thesis is always required, the degree master of science is offered both with and without thesis.

For all areas of study except applied physics the basic requirements for the M.S. are the same: At least 30 credits of acceptable graduate work must be completed, not less than 21 of which must be in physics or astronomy. Students must complete not less than 6 credits from outside their major area, with 3 credits being required from outside the department, and 3 credits from a 500 or 600 level course in another area of specialization.

Students choosing a degree with thesis may apply up to 8 credits of 699 but no credits of 599 toward the minimum 30 credits. Students choosing a degree without thesis should apply 2 credits of 599, but may not apply any credits of 699 toward the minimum 30 credits.

Students whose major area is applied physics must complete at least 30 credits of acceptable graduate work and not less than 19 credits of these must be in the required courses listed above; the remaining 11 credits of the 30 credit minimum may be chosen freely either from within the students major area or from without and either from the department or outside, but it should be noted that not more than 3 credits of Phys 699 may be applied toward the 30 credit minimum.

In addition to the list of basic courses above, all candidates for the doctor of philosophy degree, except those in astrophysics, must also complete Phys 592. Individual areas may impose additional requirements. In addition to course work in the major area of study a candidate must complete 12 credits from outside this area. Of these 6 must be taken from other departments and 6 must be taken from the department with the additional constraint that this latter 6 must include at least one 500 or 600 level introductory course in another area of specialization. Each candidate for the doctor of philosophy degree is required to teach one year of elementary physics or astronomy.

Graduate students interested in a physics minor should contact the department for requirements.

Courses open for nonmajor graduate credit: Phys 304, 310, 311, 324, 321, 322, 361, 362, 364, 365, 480, 481, 496, and Astro 342, 344L, 346.

Astronomy and Astrophysics (Astro) Courses Primarily for Undergraduate Students

Astronomy 120. The Sky and the Solar System. (3-0) Cr. 3. F.S.SS. For the nonscientist. The sky: constellations; motions of the moon, planet, and moons; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the sun, planets, satellites, comets, meteors, and asteroids. Extensive use of the planetarium is included.

Astronomy 125L. The Sky and the Solar System Laboratory. (0-2) Cr. 1. F.S. Prereq: Concurrent or prior enrollment in Astronomy 120. Laboratory course to accompany Astronomy 120. Students carry out practical exercises involving naked eye and telescope observing to explore and reinforce ideas covered in Astronomy 120. Activities based on a sky-simulation computer program and other computer-based exercises are also included.

Astronomy 150. Stars, Galaxies, and Cosmology. (3-0) Cr. 3. F.S. For the nonscientist. Observational aspects of stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The Milky Way Galaxy: clouds of matter in space, the structure and evolution of our galaxy. Other galaxies, quasars, cosmology. Theories of the origin of the universe.

Astro 250. Astronomy Bizarre. (3-0) Cr. 3. S. Prereq: 120 or 150. For the nonscientist. New and exciting topics in modern astronomy. Galaxy and star formation. Black holes and quasars. Cosmology, the Big Bang and the future of the universe. Prospects and searches for extraterrestrial life.

Astro 290. Independent Study. Cr. 1 to 4 each time taken. Prereq: Permission of instructor.

Astro 344L. Astronomy Laboratory. (1-6) Cr. 3. F. Prereq: Phys 222. Experiments in optical astronomy. Observational techniques, ranging from stellar photometry to astrophotography. Available instruments include 8” Meade, 14” Celestron and Schmidt camaras. Class meets at Fick Observatory south of Boone. Nonmajor graduate credit.

Astro 346. Introduction to Astrophysics. (3-0) Cr. 3. S. Prereq: Phys 222. Basic radiation theory; spectra. Observational determination of stellar properties; spectral classification. Binary systems. Stellar structure and evolution. White dwarfs, neutron stars, black holes. The Galaxy: structure and composition; the interstellar medium. Other galaxies; active galaxies; cosmology. Nonmajor graduate credit.

Astro 405. Astrophysics. (Dual-listed with 505.) (3-0) Cr. 3. F. Prereq: 342 or 348; Math 266. Survey of astrophysics at an advanced level. Physics of stars, galaxies, and the universe. Stellar spectra, structure and evolution. Origin of the elements. Black holes, neutron stars and white dwarfs. Large scale structure of the universe, dark matter, Big Bang Cosmology.

Astro 450. Undergraduate Research. Cr. 1 to 6 each time taken. F.S.SS. Prereq: Permission of instructor. Research under supervision of astronomy faculty.

Astro 450L. Undergraduate Research. Cr. 1 to 6 each time taken. F.S.SS. Prereq: 344L and permission of instructor. Laboratory or observational project under supervision of astronomy faculty.

Astro 490. Independent Study. Cr. 1 to 4. Prereq: 6 credits in astronomy, permission of instructor. No more than 9 credits of Astro 490 may be counted toward graduation. H. Honors

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Astro 505. Astrophysics. (Dual-listed with 505.) (3-0) Cr. 3. F. Prereq: 342 or 348; Math 266, permission of instructor. Survey of astrophysics at an advanced level: Kinematics of stars, galaxies, and the universe. Stellar spectra, structure and evolution. Origin of the elements. Black holes, neutron stars and white dwarfs. Large scale structure of the universe, dark matter, Big Bang Cosmology.

Astro 510. Observational Astrophysics. (2-3) Cr. 3. Alt. F., offered 2002. Prereq: 405 or 505. Techniques in optical and near-IR astronomy, including spectroscopy and photometry with both single channel and 2-dimensional array detectors. Emphasis on projects involving proficiency in the use of research telescopes and modern instrumentation. Project topics range from spectroscopic and photometric studies of pulsating and binary star systems to deep photographic and CCD imaging of faint nebulae and galaxies.
Astro 518. Radio Astronomy and Astrophysics (3-0) Cr. 3. Alt. F., offered 2001. Prereq: Phys 365 or E 513J. Radio astronomy fundamentals; wave polarization; radio telescope receivers and antennas; wave propagation in plasmas; synchrotron emission; continuum and line spectra; physical conditions in radio sources.

Astro 590. Special topics. Cr. var.

Astro 599. Creative Component. Cr. var. Prereq: Permission of instructor. Reading and directed study directed study of research-level problems for students electing the nonection M.S. option in astronomy.

Courses for Graduate Students

Astro 650. Advanced Seminar. (1-0) Cr. 1 each time taken. F. S. Topics of current interest in astronomy and astrophysics. Offered on a satisfactory-fail grading basis only.

Astro 660. Advanced Topics in Astronomy and Astrophysics. Cr. 1 to 3 each time taken. F. S. Topics in stellar, galactic, and extragalactic astronomy, including stellar evolution, solar physics, variable stars, compact objects, the interstellar medium, active galaxies and quasars, formation and evolution of galaxies, cosmology, high energy astrophysics, advanced observational techniques, and astrophysical applications of hydrodynamics.

Astro 699. Research.

Physics (Phys)

Courses Primarily for Undergraduate Students

Phys 101. Physics for the Nonscientist. (3-0) Cr. 3. F.S. Survey of the principal areas of both classical and modern physics. Emphasis on the nature of the physical universe and the application of physical principles to life in the modern world.

Phys 106. The Physics of Common Experience. (4-2) Cr. 4. F.S. Elementary topics from mechanics, heat, electricity, sound, and light, emphasizing the use of basic concepts and everyday experience. Includes practical problem exercises and a coordinated laboratory.

Phys 111. General Physics. (4-2) Cr. 4. F.S.SS. Prereq: 16. years of high school algebra, 1 year of geometry, 1 semester of trigonometry. General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Mechanics, fluids, heat and thermodynamics, vibrations, waves, sound.

Phys 112. General Physics. (4-2) Cr. 4. F.S.SS. Prereq: 111. General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Electricity and magnetism, ray and wave optics, topics in modern physics.

Phys 198. Physics of Music. (2-2) Cr. 3. F. Introductory level course on sound for nonphysics majors. Properties of pure tones and harmonics; human hearing; acoustics; scales; production, and analysis of musical by voice, string, woodwind, brass, and percussion instruments.

Phys 199. Introductory Seminar. (1-1) Cr. F. S. Survey of recent scientific breakthroughs and current research of physics and astronomy faculty. Discussion of career in physics. Offered on a satisfactory-fail grading basis only.

Phys 221. Introduction to Classical Physics I. (4.5-1) Cr. 5. F.S.SS. Phys 222: Credit or enrollment in Math 166. For engineering and science majors. 3 hours of lecture each week plus 1 recitation and 1 laboratory every 2 weeks. Elementary mechanics including kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, recoil, acoustics, gravitation. Electric forces and fields. Electrical currents; DC circuits.

H. Honors. F.S.

Phys 222. Introduction to Classical Physics II. (4-2) Cr. 5. F.S.SS. Phys 221: Math 166. 3 hours of lecture each week plus 1 recitation and 1 laboratory each week. Magnetic forces and fields: LR, LC, LCR circuits; Maxwell’s equations; waves and sound; ray optics and image formation; wave optics: heat, thermodynamics, kinetic theory of gases; topics in modern physics.

H. Honors. F.S.

Phys 232. Computational Skills of Physics. (0-2) Cr. 1. S. Prereq: 222. Development of skills in the use of software and computer equipment essential to physicists and other scientists. Students work at their own pace. Programming experience is helpful but not necessary.

Phys 290. Independent Study. Cr. 1 to 4 each time taken. Prereq: Permission of instructor.

Phys 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department education coordinator; sophomore classification. For engineering and science majors. 3 hours of lecture each week plus 3 recitations and 1 laboratory each week.

Phys 306. Physics of Wave Motion. (3-0) Cr. 3. S. Prereq: 222, credit or enrollment in Math 267. Oscillating systems including damped and forced oscillations; fluids, geometric optics, water waves, the wave equation, Laplace Transform, non-uniform media, cylindrical and spherical waves, polarization, interference and diffraction, transmission lines, non-linear waves.

Phys 310. Electronic Instrumentation for Experiential Physics. (2-0) Cr. 4. F. Prereq: 222, Math 266. Commercial electronic instruments: DC power supplies; transducers; passive and active devices, analog integrated circuits, including filters and amplifiers; digital integrated circuits, signal transmission and enhancement. Nonmajor graduate credit.

Phys 311. Intermediate Laboratory. (0-3) Cr. 1 or (0-6) Cr. 2 each time taken. S. Prereq. 322 or 324. Experiments in classical and modern physics performed independently by each student. Nonmajor graduate credit.

Phys 311T. Intermediate Laboratory, (0-6) Cr. 3 each time taken. S. Prereq: 112 or 222. Experiments in classical and modern physics performed independently by each student. For students preparing for a career in high school teaching. Nonmajor graduate credit.

Phys 321. Introduction to Modern Physics I. (3-0) Cr. 3. S. Prereq: 222, credit or enrollment in Math 266. Quantum nature of matter: photons, Bohr model of hydrogen, deBroglie wavelength of matter. Schrödinger wave equation in one dimension, energy quantization; detailed solutions for potential steps, barriers and wells. One-electron atoms, spin, and transition rates; x-ray and optical excitations of multi-electron atoms. Nonmajor graduate credit.

Phys 321L. Introductory Laboratory in Modern Physics. (0-2) Cr. 1. S. Prereq: Credit or enrollment in 321 and credit or enrollment in 232 or equivalent experience. Experiments related to the foundations of modern physics. The dual wave and particle character of electrons and photons, statistics, interferometry and x-ray spectroscopy.

Phys 322. Introduction to Modern Physics II. (3-0) Cr. 3. F. Prereq: 321. Quantum statistics; lasers; physics of molecules. Properties of solids, including electron band structure; electrical conduction; Nernst-Ettinghausen effect; McMillan model of superconductivity; magnetic materials, including nuclear sizes and masses, stability, decay modes, reactions, fission and fusion. Elementary particles, including strange- ness, charm, and quark. Nuclear forces and nuclear forces of nature. Nonmajor graduate credit.

Phys 322L. Introductory Laboratory in Modern Physics II (0-2) Cr. 1. F. Prereq: Credit or enrollment in 322. Experiments related to the foundations of modern physics. Radioactive decay, elementary particles, Hall effect, spectroscopy and instrumentation.

Phys 324. Elementary Modern Physics. (3-0) Cr. 3. F.S. Prereq: 222, credit or enrollment in Math 266. For students desiring a one-semester introduction to modern physics following Phys 222; students desiring a more comprehensive treatment should consider Phys 321-322. Quantization of light and energy, Schrödinger equation, atomic physics, molecular structure and spectra, properties of solids, the nuclear atom, nuclear fission and fusion. Nonmajor graduate credit.

Phys 362. Intermediate Mechanics. (3-0) Cr. 3. S. Prereq: 361. Rigid body motion; small oscillations, normal modes. Special relativity including length contraction, time dilation, simultaneity, Lorentz transformation, 4-vector covariant formalism, relativistic mechanics. Nonmajor graduate credit.

Phys 364. Electricity and Magnetism I. (3-0) Cr. 3. S. Prereq: 222, Math 385 or Math 399. Static electric and magnetic fields, potential, Gauss’s law, Maxwell’s equations. Nonmajor graduate credit.

Phys 365. Electricity and Magnetism II. (2-0) Cr. 2. F. Prereq: 364. Relativistic electromagnetic theory; radiation and propagation of electromagnetic waves; interaction with matter. Nonmajor graduate credit.

Phys 389. Seminar (1-0) Cr. S. Pr. Required of all junior physics majors. Graduate level opportunities: graduate school programs and application, job placement, alternative careers, basic skills needed for the job market competition. Offered on a satisfactory-fail grading basis only.

Phys 398. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.
Phys 591. Quantum Physics I. (4-0) Cr. 4. F. Prereq: 481. First semester of a full-year course. Postulates of quantum mechanics; time-dependent and time-independent Schrödinger equations; energy levels, and three-dimensional systems; theory of angular momentum; Rayleigh–Schrödinger time-independent perturbation theory.

Phys 592. Quantum Physics II. (4-0) Cr. 4. S. Prereq: 591. Continuation of 591. Variational theorem and WKB method; time-dependent perturbation theory; method of partial waves and Born approximation for scattering by central potentials; identical particles and symmetry; Dirac and Klein-Gordon equation for free particles; path integral formalism.

Phys 599. Creative Component. Cr. var. Prereq: Permission of instructor. Individually directed study of research-level problems for students electing the nonthesis M.S. degree option.

Courses for Graduate Students

Phys 624. Advanced Nuclear Physics. (3-0) Cr. 3. S. Prereq: 549, 551. Applications of quantum field theory: microscopic few-body and many-body theory; theory of effective Hamiltonians; relativistic nuclear physics; nuclear effects in hadron-nucleus, lepton-nucleus, and nucleus-nucleus reactions.

Phys 625. Physics of Strong Interactions. (3-0) Cr. 3. Alt. S., offered 2001. Quark-gluon plasma; phase transitions; nonperturbative methods; Quantum Chromodynamics (QCD); perturbation methods for QCD; effective field theories for pions and nucleons; finite temperature field theories; quark-gluon plasma; phase transitions in QCD.

Phys 632. Semiconductor Physics. (Same as E E 632.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 480, 481, 511. Band structure; statistical mechanics of electrons and holes; galvanomagnetic effects, magneto-hydrodynamics, cyclotron mobility, cyclotron resonance, effect of impurities; properties of junctions and heterostructures; optical properties; amorphous semiconductors; quantum well structures.

Phys 650. Advanced Seminar. (1-0) Cr. 1 each time taken. F.S. Topics of current interest. Offered on a satisfactory-fail grading basis only.

A. Nuclear Physics
B. Condensed Matter Physics
C. High Energy Physics
D. Physics
E. Applied Physics

Phys 660. Advanced Topics in Physics. Cr. 1 to 3 each time taken. F.S. Courses on advanced topics and recent developments.

A. Nuclear Physics
B. Condensed Matter Physics
C. High Energy Physics
D. Physics
E. Applied Physics

Phys 674. Applications of Group Theory to Physics: Condensed Matter Physics. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 592. Theory of groups and group representations; topics in space, and rotation groups; applications to molecular and crystal structures, crystal field and spin-orbit interactions, energy bands and phonon dispersion relations. Applications to modern materials.
Plant Health and Protection

www.plantpath.iastate.edu

Interdepartmental Undergraduate Program
Advisory Committee: Ed Braun, Chair; Burras, Hart, Martinson, Taber, Wray

Undergraduate Study

For undergraduate major in plant health and protection leading to the degree bachelor of science, see Agriculture, Curricula.

Plant Health and Protection is an interdepartmental major administered by the departments of Plant Pathology, Entomology, Agronomy, Horticulture, and Forestry. The program emphasizes a holistic approach to plant health maintenance encompassing soil fertility and plant nutrition, genetics and plant breeding, cultural practices, and protection from pests such as insects, weeds, and the microorganisms that cause plant diseases. Graduates understand the principles of plant structure and function and the ways in which plants are affected by biotic and abiotic stress factors. They are skilled in diagnosing plant health problems and in developing and implementing plant health management strategies to reduce plant stress with minimal environmental impact. Graduates are able to communicate clearly and work effectively with others on complex plant health problems. They understand the ethical and environmental dimensions of problems and issues facing agricultural and natural resource professionals.

Plant Health and Protection is a broad-based curriculum in biological and agricultural sciences. Students take courses in the basic biological and physical sciences, plant fertility management, entomology, weed science, plant pathology, and plant production systems (agronomy, horticulture, and forestry). Cooperative practical work experience/internships with industry and governmental agencies are available to qualified students. Students also have a large number of elective courses that they can use to individualize their degree program.

Graduates are also employed by agricultural chemical companies, farm management and crop consulting businesses, producer cooperatives, food processors, greenhouses, nurseries, and landscape businesses. Graduates are also employed by governmental agencies like the EPA, USDA, Extension Service, and state departments of agriculture. The curriculum in plant health and protection provides an excellent preparation for graduate study in the crop protection disciplines and related fields such as agronomy, horticulture, plant breeding, genetics, microbiology, molecular biology, botany, and environmental science.

A minor in plant health and protection may be earned with 15 or more credits in 206, 391 and additional courses selected from an approved list available from the chair of the Plant Health and Protection advisory committee. At least 9 of the 15 credits may not be used to satisfy other department, college, or university requirements.

Courses open for nonmajor graduate credit: 301, 320, 354, 376, 407, 416.

Courses Primarily for Undergraduate Students

PI HP 206. Plant Health Biology. (3-0) Cr. R. S. Prereq: Biol 109 or 201. Introduction to issues in plant health biology: plant productivity and food supply, soils and plant health, plant biotechnology, integrated pest management, plant health and sustainable agriculture.

PI HP 283. Pesticide Application Certification. (Same as Ent 283.) See Entomology.

PI HP 301. Forest Ecology and Soils. (Same as For 301.) See Forestry. Nonmajor graduate credit.

PI HP 317. Principles of Weed Science. (Same as Agron 317.) See Agronomy.

PI HP 320. Plant Nutrition. (Same as Hort 320.) See Horticulture. Nonmajor graduate credit.

PI HP 354. Soils and Plant Growth. (Same as Agron 354.) See Agronomy. Nonmajor graduate credit.

PI HP 354L. Soils and Plant Growth Laboratory. (Same as Agron 354L.) See Agronomy.

PI HP 376. Fundamentals of Entomology and Pest Management. (Same as Ent 376.) See Entomology. Nonmajor graduate credit.

PI HP 391. Practical Plant Health. (Same as PI P 391.) (0-4) Cr. R. F. Prereq: 6 credits in biological sciences. Diagnosis of all types of plant health problems caused by diseases, insects, weeds, nutrient deficiencies and toxicities, herbicide injury, and environmental stress. Emphasis is on acquiring practical skills. Students will gain experience in written and oral communications. Field trips.

PI HP 416. Forest Pest Management. (Same as PI P 416.) See Plant Pathology. Nonmajor graduate credit.

PI HP 475. Community Tree Management. (Same as For 475.) See Forestry.

Courses and Programs

Plant Pathology 313

PI HP 490. Independent Study. Cr. 1 to 3. F.S.S.S. Prereq: Junior or senior classification; 6 credits in plant health and protection, permission of instructor. A maximum of 6 credits of 490 may be used toward the total of 128 credits required for graduation.

A. Plant Health and Protection

H. Honors

PI HP 498. Plant Health Management. (2-3) Cr. 3. S. Prereq: 391. Exploration of issues in plant health management from multiple perspectives. Technical and socioeconomic dimensions of problems will be analyzed through case studies, guest speakers, field trips, and other resources. Problem-solving and communications skills will be emphasized.

Plant Pathology

www.plantpath.iastate.edu

Edward J. Braun, Chair of Department

Distinguished Professors: Tiffany

Professors: Braun, Bronson, Gleason, Harrington, Hill, McGee, Miller, Nutter, Tylka

Professors (Collaborators): Stuckey, Wise

University Professors (Emeritus): McNabb

Professors (Emeritus): Durand, Epstein, Everson, Hodges, Norton, Stewart

Associate Professors: Baum, Martinson, Munkvold, Yang

Assistant Professors: Bieatte, Bogdanove, Whitham

Graduate Study

The department offers study for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science non-thesis option is available. The department also participates in the inter-departmental majors in toxicology; genetics; plant physiology; molecular, cellular, and developmental biology, ecology and evolutionary biology, and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research
Courses open for nonmajor graduate credit: 407, 418, 483, 493.

Courses Primarily for Undergraduate Students

PI P 391. Practical Plant Health. (Same as PI HP 389.) See Plant Health.

PI P 416. Forest Pest Management. (Same as Ent 416, For 416, PI HP 416, P M 416) (3-3) Cr. 4. S. Prereq: 8 credits in biological sciences, including Biol 201. Harrington. Habit of forest, shade tree, and wood pest; physical agents of tree damage; concepts of forest health; integrated case studies in the evaluation and economic analysis of protection and pest management problems; weekend field trip. Nonmajor graduate credit.

PI P 477. Bacterial-Plant Interactions. (Dual-listed with 577; same as Micro 477) (3-0) Cr. 3. Alt. S., offered 2002. Prereq. 3 credits in microbiology or plant pathology. Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interactions with plants.

PI P 483. Wood Deterioration and Preservation. (Same as For 483.) See Forestry. Nonmajor graduate credit.

PI P 490. Independent Study. Cr. 1 to 3. F.S.SS. Prereq. Junior or senior classification; 7 credits in biological sciences, permission of instructor. A maximum of 6 credits of 490 may be used toward the total of 128 credits required for graduation. A. Plant Pathology H. Honors

PI P 493. Practical Plant Pathology. Cr. 1. 140-hour workshop. (6 credits) Introduction to biological sciences. Team-taught. Introduction to the characteristics and ecology of plant diseases caused by fungi, bacteria, nematodes, and viruses. Emphasis is on practical knowledge and hands-on experiences geared to the interests of agribusiness, horticultural, and extension professionals. Offered on a satisfactory-fail grading basis only. Nonmajor graduate credit.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

PI P 507. Epidemiology and Disease Management. (2-0) Cr. 2. S. Prereq: 407 or 416 or 503. Martinson, Nutter. Principles of pathogen population dynamics as affected by environment and host/pathogen genetics; modeling biotic plant stress on crop productivity. Principles and practices employed for disease control and their utilization for management; applications of disease management and epidemiological principles to specific diseases through case studies.

PI P 511. Integrated Management of Tropical Crops. (2-0) Cr. 2. Alt. S., offered 2003. Prereq: 407 or 416 or 503 or Ent 370 or 376 or Hort 221. Gleason, Lewis, Delate. Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to pest control, risk assessment methods, and the integration of disease management into commercial crop production practices. Objectives are to familiarize students with common diseases of Midwest crops and landscape plants, and to provide experience in disease diagnosis. Field trips include commercial operations, agricultural research facilities, and ornamental plantings.

PI P 694. Colloquium in Plant Pathology. (2-0) Cr. 2 each time taken. F.S. Prereq: 407 or 416 or 503, permission of instructor. Advanced topics in plant pathology, including biological control, cultural control, strategies for assessment of resistance gene deployment, genetic engineering for disease resistance, chemical control, tropical diseases, fungal genetics, and professional communications.

PI P 698. Seminar. Cr. 1 each time taken. F.S.

Plant Physiology

(Interdepartmental Graduate Major)

Supervisory Committee: D. Hannapel, Chair; M. James, M. Spalding, M. Westgate, E. Wurtele

Work is offered for the degrees master of science (thesis option only) and doctor of philosophy with a major in plant physiology in the following participating departments: Agronomy; Biochemistry, Biophysics and Molecular Biology; Botany, Forestry; Horticulture, Plant Pathology; and Zoology and Genetics. In the Interdepartmental Plant Physiology Major at Iowa State University, students use modern, interdisciplinary approaches to understand plant processes at the molecular, cellular and whole-plant levels. Graduates have a broad understanding of basic, functional plant biology with emphases on fundamental biology, biochemistry, and molecular biology. They are able to address complex research and policy problems in agriculture, biotechnology, and basic plant biology.

All M.S. students must meet the following minimum requirements: (1) make two seminar presentations and enroll each term in the interdepartmental plant physiology seminar (Bot 696 or its cross-listed equivalent); (2) complete two courses chosen from the following: Agron 516, Bot 512, Bot 513; and (3) complete the following courses: BBMB 404 and 405 or 501 and 502; and Stat 401. A higher level course in biochemistry is recommended.

All Ph.D. students must complete the following requirements, in addition to those for the M.S.: (1) two more seminar presentations and enroll each term in the interdepartmental plant physiology seminar (Bot 696 for a total of four); (2) Agron 516, Bot 512, Bot 513; (3) one course chosen from Bot 545, Gen 520 or 620; BBMB 675 or 676; and (4) one biochemistry course beyond the level of BBMB 404/405 or 501/502. Suggested courses include BBMB 451, 460, 622, 632, 642, or 660. Stat 402 or Agron 526 or a comparable biochemistry course are strongly recommended.

In consultation with his or her major professor and the POS committee, a student may select additional courses from an approved list available...
able from the chair of the supervisory committee of the interdepartmental major.

Courses for Graduate Students
P Phy 512. Plant Growth and Development. (Same as Bot 512.) See Botany.
P Phy 513. Plant Metabolism. (Same as Bot 513.) See Botany.
P Phy 545. Plant Molecular Biology. (Same as Bot 545.) See Botany.
P Phy 696. Seminar in Plant Physiology and Molecular Biology. (Same as Bot 696.) See Botany.

Political Science

www.iastate.edu/~polsci/

James M. McCormick, Chair of Department
University Professor: Schmidt

Professors: Dearin, Dobratz, James, Kihl, Lee, Maney, Mansbach, McCormick, Moses, Shelley, Smith, Snow

Distinguished Professor (Emeritus): Rasmussen

Professors (Emeritus): Boles, Parks, Talbot

Associate Professors: Coates, Hutter, Lowry

Associate Professor (Emeritus): Whitmer

Assistant Professors: Clark-Daniels, Ho, Kaelberer, Nemacheck, Potoski, Tuckness, Weibust

Assistant Professors (Adjunct): Bystrom, Waggoner

Undergraduate Study

For the undergraduate curriculum in Liberal Arts and Sciences, with major in political science, leading to the degree of Bachelor of Arts, see Liberal Arts and Sciences, Curriculum.

The study of political science is designed to enable students to become familiar with theories of public values and patterns of national, regional, and international political systems. A political science major should complete a broad liberal arts program, which would maximize opportunities for study in related social science disciplines, as well as in various areas of the humanities. Students will understand the interrelationships of the subfields of political science, develop skills in analysis and critical thinking, and be able to apply research methods relevant to the discipline.

The political science major is often chosen by students preparing for a career in law. Students with this goal should consult with the department in selecting courses. See also Preprofessional Study.

Several internship options are available to the political science major, offering students the opportunity to experience practical application of the knowledge learned in academic courses.

Requirements for the Major:

For the purpose of defining undergraduate requirements in the Department of Political Science, the Department employs four subfields within the discipline, with the following courses in each:

To complete the major in Political Science a student must earn 33 semester credits of courses in Political Science subject to the following conditions:

a. Students must satisfactorily complete Pol S 101.

b. Students must complete at least two courses in each of the four subfields listed above. Students may apply only one half semester mini-course (Pol S 312, 313, 314, 315) in each group.

c. At least 18 credits of Political Science courses must be numbered 300 or above.

d. Students must pass one statistics course from among Stat 101, 104, 227 or 231.

e. Students must develop a research tool by following one of the following options: (1) two years (four semesters) of a single college-level foreign language as demonstrated by successful completion of a foreign language class numbered 202, (2) successful completion of Pol S 301, or (3) passing a national-level examination demonstrating an intermediate level of proficiency in a language other than English.

Students whose first language is not English may fulfill the research tool requirement via the options described above or by providing documentation of at least 3 years full-time coursework in a secondary school, or one year of coursework in a college or university, in which the language of instruction is other than English.

f. No more than six credits of Pol S 490 or 499 (alone or in combination) can be used to fulfill any of these requirements. A maximum of three credits of Pol S 490 can be applied to meet any of the four subfield requirements.

g. A maximum of six credits from half semester mini-courses (Pol S 312, 313, 314, 315) can be applied to satisfy the above requirements.

h. At least 15 credits of Political Science coursework must be earned at Iowa State University.

English Proficiency: Majors must earn at least a C+ in both Engl 104 and 105. Those who do not must complete Engl 309 or 314 with a grade of C or higher.

The department offers a minor in political science that may be earned by completing 15 credits beyond the 100-level of coursework in political science, nine of which must be at the 300 level or above. A student minoring in Political Science normally will be expected to take at least 9 credits in Political Science coursework at Iowa State University. Only 3 credits of Pol S 490 or Pol S 499, alone or in combination, and only 2 credits of Pol S 312-315 may be included in the total of 15 credits required for the minor. All minors in the College of Liberal Arts and Science required a minimum of 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. Credits earned in Pol S 499, offered on a satisfactory/fail basis only, will not fulfill this requirement.

Graduate Study

The department offers work for a Master of Arts degree (M.A.), with a major in political science, and minor for students in other departments. The department also offers work for a Master of Public Administration (M.P.A) degree or a Certificate of Public Management (C.P.M) for those interested in an educational certificate program that requires less work than a full masters program. Brochures with detailed requirements for all graduate degrees may be obtained from the department office or at the department’s web page at www.iastate.edu/~polsci/graduate.html.

The M.A. program is designed to enable its graduates to engage in governmental research, enter public service or private industry, teach, or pursue further graduate study. Graduate students may also wish to work for certification for high school or junior college teaching. A thesis is required for this degree. A specialization in public administration is possible. The department also has a joint Master of Arts/Juris Doctor (M.A.J.D.) program with the Law School of Drake University. Detailed information for the M.A.J.D. can be found at the ISU Political Science webpage as well as the Drake Law School website (under Joint Degree): www.law.drake.edu/admissions/specprograms.html. Students wishing to pursue this joint degree must submit separate applications to both Drake University and Iowa State University and be accepted by both institutions.

M.A. graduates have a broad substantive understanding of the political process and the academic study of politics. They also have in-depth knowledge of one or more subfields in political science. Graduates are skilled at conducting research and preparing thorough research summaries. They are able to identify and address complex political questions, taking into account related ethical, legal, economic, and social issues.

The usual prerequisites for major graduate work in the M.A. program normally are completion of at least 15 credits in political science, the GRE (Graduate Record Examination), one year of a foreign language (equivalent to 8 semester hours) and a course in basic statistics (equivalent to Stat 101). If the basic statistics requirement has not been met, the student may remedy the deficiency by passing equivalent courses, for which no graduate credit will be received. During their program of study, all students are expected to complete Stat 401, a core class of Pol S 502 or Pol S 503, and a thesis. Students normally do concentrated coursework in at least one of the following three areas: international relations, comparative politics, or American politics. The student’s program of study committee may require additional work.

The M.P.A. program is designed for current or aspiring administrators in city, county, state, federal, or international government work as well as those who work in nonprofit organiza-
Courses and Programs Political Science

Pol S 101. Orientation to Political Science. (2-0) Cr. 1. 8 weeks. F.S. Prereq: Political Science and Open Option majors only or permission of the instructor. Introduction to subfields of Political Science, including an introduction to analytical thinking, and research skills relevant to political science. Orientation to university, college, and departmental majors and scholarly activities; roles and responsibilities; degree planning and career awareness. Offered on a satisfactory-fail grading basis only.

Pol S 230. Introduction to Law and Politics. (3-0) Cr. 3. F.S. A general introduction to the basic concepts and theories of the state and of law, including such philosophic issues as authority, power, legitimacy, freedom, and political obligation. Readings from theories in political philosophy, jurisprudence, constitutionalism, and related areas of thought.

Pol S 241. Introduction to Comparative Government and Politics. (3-0) Cr. 3. F.S. Basic concepts and major theories; application to selected political systems, including non-western political systems.

Pol S 251. Introduction to International Politics. (3-0) Cr. 3. F.S. Dynamics of interstate relations pertaining to nationalism, the nation state, peace and war; foreign policy making; the national interest; military capability and strategy; case studies of transnational issues, such as population, food, energy, and terrorism.

Pol S 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Pol S 301. Introduction to Empirical Political Research. (3-2) Cr. 4. F.S. Prereq: 3 credits in political science; one statistics course required. Techniques of empirical political research and analysis; surveys, methods of data collection, applications of statistics and computer techniques.

Pol S 305. Political Behavior. (3-0) Cr. 3. F.S. Prereq: Sophomore classification. Empirical theories and descriptions of political behavior, including decision-making, opinion, and attitudes, with an emphasis on groups and political elites.

Pol S 306. Political Decision-Making and Conflict Resolution. (3-0) Cr. 3. F.S. Prereq: 3 credits in political science. Study of domestic and international political conflict. Simulation and games will be used to illustrate the process through which conflict is resolved.

Pol S 310. State and Local Government. (3-0) Cr. 3. F.S. Prereq: 3 credits in political science. Role of state and local governments in the American federal system. Structures of participation: political parties, elections, interest groups; major governmental institutions: legislative, executive, and judicial. Structure and functions of local governments.

Pol S 311. Municipal Government and Politics. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 215. Legal position of municipal corporation; forms of organization; administration of municipal services; problem-solving in municipal government; urban and metropolitan political process; implications of federal urban policies.

Pol S 312. Minicourse in American Government and Politics. (3-0) Cr. 2. 8 weeks. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in American government and politics. Designated repeat not permitted. Use of credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol S 313. Minicourse in Theory and Methods. (3-0) Cr. 2. 8 weeks. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in theory and methods in political science. Designated repeat not permitted. Use of credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol S 314. Minicourse in Comparative Politics. (3-0) Cr. 2. 8 weeks. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in comparative politics. Designated repeat not permitted. Use of credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol S 315. Minicourse in International Relations. (3-0) Cr. 2. 8 weeks. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in international relations. Designated repeat not permitted. Use of credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol S 320. American Judicial Process. (Same as C J St 320.) (3-0) Cr. 3. S. Prereq: 215. The genesis, structure, processes, and personnel of American courts; basic juridical concepts; restraints on exercise of the judicial power; major eras of American constitutional history; an overview of civil liberties; impact of court decisions on public policy.

Pol S 340. Politics of Developing Areas. (3-0) Cr. 3. Alt. S., offered 2002. Examination of economic and political development as they relate to the political process of developing states. Impact of social and technological change on political systems of developing areas. Some case studies.

Pol S 343. Latin American Government and Politics. (3-0) Cr. 3. Political institutions, processes, and contemporary issues. Selected countries examined intensively to illustrate generalizations. Role of parties, military, church, human rights, women, environmental issues, interest groups, ideology, and globalization.

Pol S 344. Public Policy. (3-0) Cr. 3. S. How agendas come to be set in public policy, theories describing the policy-making process, forces molding policy choices and the impact of such choices.

Pol S 346. European Politics. (3-0) Cr. 3. S. Comparative study of political institutions of Europe and the European Union; emphasis on parties, elections, and governmental structures. Substance and process of public policies in selected problem areas.

Pol S 348. Israeli Government and Politics. (3-0) Cr. 3. Alt. S. Prereq: 241 or comparable background in Middle East/Israeli history. Major factors that have shaped and continue to influence the distinctive nature of Israeli society and politics. Patterns and determinants of Mideast international relations, as reflected in Arab-Israeli conflict, foreign policymaking in Israel, and American involvement since 1945.

Pol S 350. Introduction to the Middle East. (3-0) Cr. 3. S. Introduction to the Middle East as a region and to issues of political and economic influence to the Middle East and its place in the world. Topics covered include Islam, regional conflicts and alliances, local leaders, economic issues, and gender and social relations. Nonmajor graduate credit.

Pol S 356. Theories of International Politics. (3-0) Cr. 3. Introduction to essential theoretical concepts and approaches, both classical and contemporary on world politics including realism, empiricism, liberalism, and postpositivism; for example, war and conflict, peace and cooperation, political economy, crisis decision-making, systemic theory, dependence and interdependence.

Pol S 358. United States Foreign Policy. (3-0) Cr. 3. F. Prereq: 215 or 251, or Hist 467 or 470 or 471. U.S. foreign policy since World War II with emphasis on changing American values in foreign policy, the role of the President, Congress, and the bureaucracy in policy making, and a survey of current foreign policy issues and problems.

Pol S 359. Current Issues in American Foreign Policy. (3-0) Cr. 3. S. Prereq: 215, 251, or 358. Examination of contemporary U.S. foreign policy issues (e.g., U.S. relations with the Middle East; economic and military aid; defense budgeting in the post-Cold War era; conventional and nuclear arms control policy). The course will explore alternate methods to analyze policy, survey the evolution of each issue, and discuss different policy alternatives.

Pol S 361. The President and the State Governors. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 215. Creation and historical development of the office of chief executive; character and behavior of past chief executives; selection and control; powers, roles, functions; executive staff; relations with Congress, press, public opinion.

Pol S 370. Religion and Politics. (Same as Relig 370.) See Religious Studies. Nonmajor graduate credit.

Pol S 381. Introduction to Political Economy. (3-0) Cr. 3. S. Introduction to the theoretical perspectives on international political economy. Exploration of specific issues such as the changing international trade regime, international financial institutions, and Third World development under conditions of globalization.

Pol S 385. Women in Politics. (Same as W. Stud. 385.) (3-0) Cr. 3. Examines the entry and participation of women in politics in the United States and other countries including a focus on contemporary issues and strategies for change through the political process.

Pol S 398. Cooperative Education. Cr. R. F. S. S. Prereq: Permission of department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing work period.

Pol S 406. Public Opinion and Voting Behavior. (3-0) Cr. 3. S. Prereq: 6 credits in political science or junior classification. The formation of political opinion and attitudes, political participation, and voting behavior of the general public, and their influences on American politics; polling as a means of assessing public opinions and behaviors. Nonmajor graduate credit.

Pol S 410. Iowa Government and Politics. (3-0) Cr. 3. S. Prereq: 215. Analysis of Iowa government and politics: public opinion and political participation, governmental institutions, and major policy issues. Nonmajor graduate credit.

Pol S 413. Intergovernmental Relations. (Dual-listed with Hist 313) (3-0) Cr. 3. S. Prereq: 215. Public credit. 

Pol S 417. Campaign Rhetoric. (Same as Sp Cm 417.) See Speech Communication. Nonmajor graduate credit.

Pol S 421. Constitutional Freedoms. (3-0) Cr. 3. S. Prereq: 320 or 420; Leading Supreme Court cases interpreting the Fourteenth Amendment. Emphasis on religion, speech, privacy, due process, and equal protection. Nonmajor graduate credit.

Pol S 422. International Law. (3-0) Cr. 3. Alt. S. Prereq: 215 or 251; junior classification. Development of the principles of international law of war and peace; analysis of theories concerning its nature and fundamental conceptions; its relation to national law; problems of international legislation and codification. Nonmajor graduate credit.

Pol S 430. Western Political Thought: Plato to Machiavelli. (Same as Cl S. 430.) (3-0) Cr. 3. Prereq: 6 credits in political science, philosophy, or European history. Major concepts in original texts of classical, medieval, and renaissance authors: justice, community, man’s basic nature; natural law; force; society outside the political order. Nonmajor graduate credit.

Pol S 431. Modern Political Thought. (Dual-listed with Hist 331.) (3-0) Cr. 3. Prereq: 6 credits in political science, philosophy, or European history. Texts of political thinkers beginning with Thomas Hobbes. Human nature and its influence on contract theory; private rights; differing conceptions of liberty; sovereignty; constitutionalism; bureaucracy; law and democratic theory. Nonmajor graduate credit.

Pol S 433. American Political Thought. (3-0) Cr. 3. S. Prereq: 6 credits in political science or American history. Review of major political concepts and theorists in American political history. Analysis of current concepts in U.S. political thought, and their possible impacts on our political institutions. Nonmajor graduate credit.

Pol S 440. Comparative Politics of the Middle East. (3-0) Cr. 3. Prereq: 241 and coursework on the Middle East. Applies comparative methodology to the analysis of problems and issues affecting the Middle East as a region. Focus on democratization and economic liberalization. Nonmajor graduate credit.

Pol S 451. International Politics of Asia. (3-0) Cr. 3. F. Prereq: 241 or 251. International politics of Asia; emphasis on shifting power balance, role of major powers, security dilemma, foreign policies of small nations, prospect for regional integration. Nonmajor graduate credit.

Pol S 452. Comparative Foreign Policy. (Dual-listed with Hist 552) (3-0) Cr. 3. S. Prereq: 251. Various theoretical approaches to explain foreign policy making and behavior through the use of case studies of selected nations. Nonmajor graduate credit.

Pol S 453. International Organizations. (3-0) Cr. 3. Prereq: 251. Private and public organizations such as the United Nations, other specialized agencies, and multinational organizations, and their influence on our daily lives. Nonmajor graduate credit.
Pol S 490, Independent Study. Cr. var. F.S. Prereq: 6 credits in political science. No more than 9 credits of Pol S 490 may be counted toward graduation. Special studies in the political institutions, processes and policies of American, foreign, and international governments. Also, studies in traditional and behavioral political theory. Use of credit in Pol S 490 is major and minor limited. See Undergraduate Study for information.

A. American Government and Politics
B. Theory and Method
C. Comparative Politics
D. International Relations
E. Extended credit. The student may earn an additional 1 or 2 credits for extra study done for any 300- or 400-level course, with instructor’s approval.

G. Catt Center Project
H. Honors

Pol S 495. Capstone Project in Political Science. (3-0) Cr. 3. S. Prereq: 21 credits in political science and permission of instructor. Capstone project for political science majors; integrating research, analysis and participation.

Pol S 498, Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department; cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Pol S 499. Internship in Political Science. Cr. var. F.S.S.S. Prereq: 6 credits in political science; junior or senior classification; and permission of internship coordinator. Work experience with a specific non-governmental or governmental agency at the local, state, national, or international level, combined with academic work under faculty supervision. Offered on a satisfacory-fail grading basis only. Use of credit in Pol S 499 major and minor is limited. See Undergraduate Study for information.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Pol S 503. Political Research. (3-0) Cr. 3. S. Prereq: 6 credits in political science. Principles of scientific, empirical research applied to political data and public policies. Research design, ethics, role of theory, types and sources of data, survey research, voting analysis, program evaluation, computer utilization, interviewing, review of algebra and the role of statistical techniques in research.

Pol S 504. Proseminar in International Politics. (3-0) Cr. 3. F. Prereq: 6 credits in political science or graduate standing. An overview of the major theoretical and empirical works in the study of international politics and foreign policy. Among the major theoretical approaches surveyed and applied to international politics are realism, neo-realism, liberalism, functionalism, rational choice theory, game theory, and decision-making theory. Seminar writings by leading scholars will be reviewed.

Pol S 506. Proseminar in American Politics. (3-0) Cr. 3. S. Prereq: 6 credits in political science or graduate standing. A presentation of the major theories and research on American government and politics. Substantive topics include modern democratic theory, institutional performance, and mass political behavior. A variety of research methodologies are examined, including normative theory, behavioralism, and rational choice analysis.

Pol S 510. State Government and Politics. (3-0) Cr. 3. Prereq: 312 Comparative Analysis of state political systems. Role of interest groups, political parties, legislatures, courts, and governors in state politics. Possible determinants of public policy outputs at the state level.

Pol S 513. Intergovernmental Relations. (Dual-listed with 413) (3-0) Cr. 3. S. Prereq: 6 credits of American government. Theories and practices of the American federal system; politics and policy making among federal, state, and local governments.

Pol S 531. Modern Political Thought. (Dual-listed with 431) (3-0) Cr. 3. Prereq: 6 credits in political science, philosophy, or European history. Texts of political thinkers beginning with Thomas Hobbes. Human nature and its influence on contract theory; private rights; differing conceptions of liberty; sovereignty; constitutionalism; bureaucracy; law and democratic theory.

Pol S 535. Contemporary Political Philosophy. (Same as Phil 535) (3-0) Cr. 3. Prereq: 6 credits in political science. Emphasis on the changing roles and relationships of business, government and society so as to open the way for more effective policy decisions on corporate-government affairs. Topics may include the changing economic, political, and social conditions; consumerism; social responsibilities of business; economic policies and regulations, and roles of government.

Pol S 544. Comparative Public Policy. (3-0) Cr. 3. Prereq: 6 credits in political science. Examines how, why, and to what effect governments deal with substantive policy problems differently. Environmental factors, ideological culture, domestic policy making processes, and interest groups.

Pol S 547. Political Leadership and Elites. (3-0) Cr. 3. Prereq: 6 credits in political science. Various forms of leadership and follower-relation. Obligations, exchanges, incentives, coercion, corruption, and power in both the U.S. and foreign experience.

Pol S 549. Comparative Political Behavior. (3-0) Cr. 3. Prereq: 305 or 405. Empirical analysis of political behavior in cross-national perspective, including activist participation, level of political sophistication, cleavage structures and voting, role of partisan identification.

Pol S 552. Comparative Foreign Policy. (Dual-listed with 452) (3-0) Cr. 3. S. Prereq: 251. Various theoretical approaches to explain foreign policy making and behavior through the use of case studies of selected nations.

Pol S 559. International Relations Theory. (3-0) Cr. 3. F. Prereq: 6 credits in international studies. Selected theoretical writings, both classical and contemporary, on world politics. Realism, war and conflict, peace and cooperation, economic policy, crisis decision making, and transnational relations.

Pol S 560. Legislative Behavior. (3-0) Cr. 3. Prereq: 360 or equivalent. Principles, procedures, and problems of the legislative process. Policy-making in state legislatures and the U.S. Congress.

Pol S 561. The Chief Executive. (3-0) Cr. 3. Prereq: 6 credits in American government. Legal and political processes influencing the U.S. president, governors, and other governmental executives in decision making, developing and administering programs of government, leading public opinion, and influencing legislation.

Pol S 571. Organizational Theory in the Public Sector. (3-0) Cr. 3. F. Prereq: 6 credits in political science. Major theories of administrative organization, including motivations of administrators and organizations, comparisons of organizational arrangements, factors affecting organizational arrangements, and formal and informal decision-making structures.

Pol S 572. Public Budgeting and Financial Management. (3-0) Cr. 3. F. Prereq: 6 credits in political science. The budgetary process of the U.S. government and its components. Alternative budget systems including taxation, the appropriation process, program evaluation, and debt and risk management at federal, state, and local levels.

Pol S 573. Public Personnel Administration. (3-0) Cr. 3. S. Prereq: 6 credits in political science. Recruitment, retention, and development of employees; merit systems, collective bargaining, and grievance procedures.

Pol S 574. Policy and Program Evaluation. (3-0) Cr. 3. S. Prereq: 6 credits in political science. Integration, application, and utilization of public administration and public policy concepts in the interpretation of results and effectiveness of public programs and the prediction of consequences for policymakers and administrators.

Pol S 575. Management in the Public Sector. (Dual-listed with 475) (3-0) Cr. 3. F. Prereq: 6 credits in political science. Literature and research on organizational behavior and management. Theory with emphasis on applied aspects of managing contemporary public sector organizations. Topics include distinctions between public and private organizations, leadership, productivity, motivation, organizational structure, and organizational change.

Pol S 577. Government, Business, and Society. (Dual-listed with 477) (3-0) Cr. Alt. F., offered 2001. Prereq: Graduate classification. Diverse perspectives on the changing roles and relationships of business, government and society so as to open the way for more effective policy decisions on corporate-government affairs. Topics may include the changing economic, social, and political conditions; consumerism; social responsibilities of business; economic policies and regulations, and politics in the business-government relationship.

Pol S 580. Ethics and Public Policy. (Dual-listed with 480) (3-0) Cr. 3. Prereq: 6 credits in political science. Major ethical concepts in U.S. political philosophy. The controversy over public versus private morality in political policy making. Analysis of public decision-making case studies, emphasis on ethical considerations. Major proposals and legislation related to improving the quality of ethical criteria and decisions in public policy making.

Pol S 581. International Political Economy. (3-0) Cr. 3. S. Prereq: 6 credits in political science. An overview of the international political economy since the end of World War II. Special emphasis on national and international political economy; transformation of workplace and community politics; and national innovation policy; and global environmental policies.

Pol S 583. Environmental Politics and Policies. (Dual-listed with 482) (3-0) Cr. 3. F. Prereq: 3 credits in environmental science and politics at the national and international level and how this interaction shapes policy for science, human welfare, and global concerns. The topics include the evolutionary relationship between science and politics; the controversy over public versus private morality in political policy making. Analysis of public decision-making case studies, emphasis on ethical considerations. Major proposals and legislation related to improving the quality of ethical criteria and decisions in public policy making.

Pol S 584. Science, Technology and Public Policy. (Dual-listed with 486) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 6 credits in Political Science. Investigates the dynamics of interaction between science and politics at the national and international level and how this interaction shapes policy for science, human welfare, and global concerns. The topics include the evolutionary relationship between science and government; the old and new social contract for science; national innovation policy, and global economic and environmental concerns.

Pol S 590. Special Topics. Cr. 2 to 5 each time taken. F.S. Prereq: 15 credits in political science, written permission of instructor.

A. American Political Institutions
B. Public Law
C. Political Theory and Methodology
D. Comparative Government
E. International Relations
F. Political Parties and Policy Formation
G. Public Administration and Public Policy
I. Internship
T. Teaching Preparation
Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional health programs), or GENPV (General Undergraduate Studies Pre-Voc) until they choose a major and offer to transfer to a professional school. All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application or by completing a preprofessional interest form during registration.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the director of the preprofessional program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health care teams. They perform the chemical, microscopic, radioassay, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may also be employed by a pharmaceutical company or by manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based CLS/MT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor’s degree by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 94.5 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in professional CLS/MT school can be used to partially fulfill the requirements for the bachelor’s degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

The following CLS/MT programs are affiliated with Iowa State University:

- Mercy Hospital Medical Center, Des Moines, Iowa. Program Director: Stacy Sime. Medical Director: Vijaya L. Dhannavada
- University of Iowa Hospitals, Iowa City, Iowa. Program Director: Mark Bowman. Medical Director: Robert D. Tucker.

Cytotechnology

A cytotechnologist works in a medical laboratory preparing, staining, mounting, and evaluating specimens of human body tissues in order to find those cells that are abnormal. The abnormal specimens are then submitted to the pathologist supervising the laboratory for confirmation and interpretation. The training requires 12 months in a school of cytotechnology after at least 3 years of college study that includes a minimum of 20 semester credits in biological sciences, 8 semester credits in chemistry, and 3 semester credits in math. Certification as a cytotechnologist requires a baccalaureate degree. Students may enter the professional school after earning a bachelor’s degree in a related field. Alternatively, they may use up to 32 semester credits from an affiliated cytotechnology school in partial fulfillment of requirements for a B.S. degree.

An Interdisciplinary Studies major must earn 94.5 credits before off-campus study; the most recent 32 credits must have been earned in residence at ISU.

Iowa State University is affiliated with the cytotechnology programs of the State Laboratory of Hygiene at the University of Wisconsin-Madison and Mercy Hospital Medical Center in Des Moines.

Courses and Programs

Preprofessional Study 319

Dental Hygiene

A dental hygienist screens dental patients for oral defects, performs clinical procedures such as cleaning teeth, and may participate in oral health education programs. Most work with dentists in private practice, but some have positions in public health centers and schools. Certification as a dental hygienist requires 2 years in a professional program of study. Admissions requirements for these programs vary. A student may study for 2 years at Iowa State University and then transfer to an institution that grants the bachelor’s degree in dental hygiene. Alternatively, a student may earn a bachelor’s degree in another field at Iowa State before entering a professional program.

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as they meet the admission requirements; they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree.

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other health care institutions. To be certified as registered record administrators (R.R.A.) they must have completed a program leading to a bachelor’s degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor’s degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and mental health facilities. The professional requirement may be for a master’s degree or a bachelor’s degree, depending upon the size of the institution and whether an entry-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor’s degree in health administration, or they may spend four years earning a bachelor’s degree in any department before entering a master’s degree program at the University of Iowa or other university. Courses required for admission to master’s degree programs in hospital and health admin-
istration vary, but may include introductory accounting, management, statistics, and economics.

**Human Medicine**
Physicians study, diagnose, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then 3 or more years in hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathic medicine (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts and humanities. Although many medical schools admit a small number of exceptionally well-qualified applicants after 3 years of preprofessional study, most students earn a bachelor’s degree while taking the courses required for admission to medical school. This degree can be from any college and in any curriculum or major offered by the university. The major should reflect the student’s interests and provide appropriate preparation for an alternative career.

**Law**
A lawyer assists the legal, peaceful resolution of conflicts in many different ways. Most lawyers are engaged in private practice, but many are employed by government agencies and private business. At least 3 years are needed to complete a law school program leading to a doctor of jurisprudence (J.D.) or a bachelor of laws (L.L.B.) degree, and a bachelor’s degree is required for admission to nearly all law schools. A student planning to enter law school may major in any field. The courses taken should develop skill in critical thinking, comprehension and expression of ideas, and understanding of human institutions and values. Perhaps most valuable are courses in English language and literature, government, economics, history, mathematics, Latin, logic and scientific method, and philosophy.

**Library and Information Science**
Librarians are essential in educational institutions, medical facilities, government agencies, industries, and public information centers. The professional preparation for library administration is provided by master’s degree programs. Admission requirements for the University of Iowa’s program, for example, include a bachelor’s degree with at least 85 semester credits in the arts and humanities and the natural and social sciences. Iowa State students may choose majors that reflect their own interests and that may provide a foundation for working in medical, legal, or other specialized libraries.

**Nuclear Medicine Technology**
The use of radioactive chemicals in the diagnosis and treatment of disease is the distinguishing feature of nuclear medicine. Under the supervision of a physician in a hospital or clinic, the technologist prepares and administers these radioactive tracers, uses sophisticated detectors and computers to trace the movement and localization of the tracers in the human body, and analyzes biological specimens to determine levels of hormones, drugs, and other chemicals in the body. One year in a training program such as that at the University of Iowa College of Medicine is required to become a certified nuclear medicine technologist (C.N.M.T.). This program requires at least 94 semester credits of preprofessional coursework in chemistry, physics, zoology, English, mathematics, computer science, statistics, the social sciences, and humanities. Students at Iowa State University can transfer to a university offering a nuclear medicine technology program after 2 or 3 years of preprofessional courses, and then receive the bachelor’s degree at that institution. Alternatively, the student may earn a bachelor’s degree before entering the 1-year professional program or may spend 3 years at Iowa State University meeting the admissions requirements of the program and completing requirements for a B.S. degree using a maximum of 32 semester credits that may be transferred to Iowa State University from the professional school.

**Nursing**
A professional nurse may do clinical nursing, teaching, or research, in hospitals, private practice, public health centers, schools, or industry. Although becoming a registered nurse (R.N.) does not require a bachelor’s degree, the student who completes the bachelor of science degree in nursing (B.S.N.) has college-level preparation for clinical nursing and an essential base for graduate study. Iowa State University does not offer a nursing degree but does participate in a transfer program with the University of Iowa and Grand View College in Des Moines. Students take specified courses for 2 years at Iowa State University and, if accepted in the University of Iowa College of Nursing, complete the B.S.N. requirements and the R.N. examination in another 2 years. If accepted at Grand View College, they may complete the B.S.N. requirements and take the R.N. examinations in 2 years. Students may also elect to transfer to a B.S.N. program at another college or university. Most of these programs require a minimum of 3 years of resident study, but their requirements vary, so early planning for transfer is essential.

**Occupational Therapy**
Occupational therapists provide purposeful activities to help those who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Students have several options in planning their education. They may transfer after two years at Iowa State University to a college or university offering physical therapy as a bachelor’s degree program. They may complete three years of undergraduate courses including prerequisites before transferring to a three-year professional curriculum such as the master’s degree program at St. Ambrose University or the doctoral degree program at Creighton University. Usually, students earn a bachelor’s degree in a related field at ISU before spending two years in a professional school to earn a master’s degree or certificate. Admission to the master’s degree program at the University of Iowa requires a bachelor’s degree. The bachelor’s degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Earning a bachelor’s degree prior to entering professional school allows a student to apply to a range of graduate level programs and builds a strong liberal arts foundation. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

**Physician Assistant**
A physician assistant provides medical services under the supervision of a licensed physician, frequently in a rural or inner-city clinic. The responsibilities may include taking patients’ histories, physical examinations, prescription of laboratory studies, diagnosis and treatment, follow-up care, and counseling. Certification as a physician assistant requires 2 years in a professional program at the master’s or bachelor’s degree level. Students applying...
to a bachelor’s degree program must have completed at least 60 semester credits of college work including general and organic chemistry, zoology, behavioral science, and humanities. Mathematics and physics courses are recommended, and applicants who have had health-care experience with direct patient contact are preferred. Admission to a master’s degree program requires similar coursework and experience in addition to a bachelor’s degree.

Podiatry
Podiatrists diagnose, treat, and try to prevent diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor’s degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor’s degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor’s degree.

Theology or Religious Studies
The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor’s degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

Veterinary Medicine
About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine). The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu.) Students may pursue their preprofessional preparation in any college at Iowa State University. A major (preprofessional medicine is not a major) should be selected that is allied to each student’s vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor’s degree; the most effective progress toward a bachelor’s degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preprofessional program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preprofessional course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor’s degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

Production/Operations Management
(Administered by the Department of Logistics, Operations and Management Information Systems)
Michael R. Crum, Chair of Department
Distinguished Professors: Allen, Baumel
Professors: Crum, Poist, Wacker
Professors (Emeritus): Thompson, Voorhees
Associate Professors: Hendrickson, Lummus, Mennecke, Nilakanta, Norris, Premkumar, Walter
Assistant Professors: Hackbarth, Johnson, Montabon, Ruben, Strader, Suzuki, Zhu
Instructors (Adjunct): Blanshan, Choobineh, Clayton

Undergraduate Study
For undergraduate curriculum in business, major in production and operations management, see College of Business, Curricula.

Production/operations management is the planning, control, and implementation of the processes used to transform inputs into finished goods and services. A majority of the firm’s investment, personnel, and purchases of materials and equipment are often controlled by the operations function. The efficient management of these resources is critical to the success of the firm. Although operations management principles apply to all types of organizations, the production/operations management major focuses on the application of these principles in manufacturing systems. Students learn how to efficiently organize and manage the labor, equipment, material, and information systems resources required to deliver products that satisfy customer needs.

The major provides business students with the understanding of manufacturing planning and control systems, continuous process improvement techniques, lean manufacturing methods, strategic quality management systems, and other manufacturing practices needed to become gainfully employed in manufacturing industries.

Students are required to take three courses - POM 420, 422, and 424, plus three additional courses from an approved list.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, 9 credits of which may not be used to satisfy any other requirement.

Graduate Study
The production/operations management major participates in two graduate programs: the M.S. in Business and the full-time and part-time M.B.A. programs. The M.S. program is a 30-credit curriculum culminating in a thesis. The M.B.A. program is a 48-credit, nonthesis, noncreative component curricula. Twenty-four
Courses and Programs  Production/Operations Management

Professional Agriculture

(Interdepartmental Program administered by the Department of Agricultural Education and Studies)

Supervisory Committee: Eric Hoiberg, Kenneth Holmes, Steve Jungst, Paul Lasley, Sergio Lence, Dan Loy, Kenneth Moore, Gary Munkvold, James Pease

Undergraduate Study

Through the College of Agriculture, Iowa State University offers the bachelor of science degree in professional agriculture designed specifically for those students who choose to study away from the Ames campus. Graduates have a broad base of agricultural knowledge, the ability to communicate effectively, and skills in problem solving. They have an understanding of technology and the ability to live and work in a global society. Many students take a portion of their coursework from colleges in close proximity to their homes and transfer the credits to ISU. The agricultural coursework (a minimum of 45 credits) is a well-rounded mix of agricultural topics delivered via video-tapes, wide world web, interactive video, off-campus site classes, and on-campus workshops and laboratories. For curriculum detail see Professional Agriculture, College of Agriculture, Curricula.

Visit our website at www.ag.iastate.edu/cen-
ters/proag/

Graduate Study

The graduate major in professional agriculture is an off-campus program leading to the degree master of agriculture. The program is considered to be a professional master’s degree and not preparation for further graduate study. Graduates have a broad base of knowledge in one or more agriculture disciplines. They have the ability to communicate effectively and make decisions based on knowledge. To earn the 32 credits necessary for graduation, students must complete 24 semester credits of formal coursework, 4 semester credits of workshops, and 4 credits of creative component. Courses are delivered via video-tapes, interactive video, wide-world web, on and off campus classes and workshops. Specific courses offered in the program and the location of the off-campus classes may be obtained from the departmental course listings, off-campus course catalog, or by contacting the Professional Agriculture Coordinator, 201 Curtiss Hall.

University Professors (Emeritus): Brown

Associate Professors: Bushman, Cooper, Cunnick, Dark, Epperson, Hanisch, Scott, Venkatagiri

Assistant Professors: Cross, Day, Madon, Vogel

Assistant Professors (Adjunct): Mason

Undergraduate Study

For the undergraduate curriculum in Liberal Arts and Sciences, with a major in psychology, leading to the degrees of bachelor of arts and bachelor of science, see Liberal Arts and Sciences, Curriculum.

An undergraduate major in psychology may be taken as liberal arts education, as preparation for graduate study in psychology, or as background for professional education in law and in the health professions. A student with an undergraduate psychology major and a concurrent major or minor in departments such as business administration, family environment, or sociology may qualify with a bachelor’s degree for positions in business and social welfare systems as well as for professional work in correctional, rehabilitation, and developmental disability centers. Such diversified education must be planned early in the undergraduate’s career in close consultation with an adviser.

The requirements of the program enable graduates to understand and apply the scientific principles, facts, and basic methods of psychology in their personal and professional activities. Graduates learn to think scientifically about human behaviors and mental processes. They can communicate effectively in speech and in writing, respect individual and cultural differences in behaviors, and appreciate ethical issues in both the science and practice of psychology. Professional work with a job title of psychologist in academic, business, clinical, government, and school settings requires graduate degrees.
Departmental requirements for the B.A. and B.S. include the following supporting courses: 6 credits in philosophy including 201; two of the following courses: Biol 109 or 201, Zool 155, Chem 163, Gen 260; one of the following courses: Stat 101, 104, or 227; and a course in mathematics acceptable in group IIIa. In addition to the supporting courses specified above, students electing a B.S. degree must complete a minimum of 10 more supporting credits in group IIIa, 6 in group IIIb, and 1 in a laboratory course in group IIIb. Students electing a B.A. degree must complete a minor.

The major must include the following psychology courses: 101, 102, 111, 201, 301, and 440 with a minimum grade of C-. The major also must include five courses distributed across at least four of the following five areas: Area A - 230; Area B - 280; Area C - 310, 315; Area D - 312, 313, 316; Area E - 360, 460. Two additional 3-credit courses must be taken either from these areas or from any of the other courses offered by the department, excluding 470, 490, 491, and 492. Students electing a B.S. degree also must complete 302 with a minimum grade of C-. In accordance with college requirements, the student must earn a C average or better in the courses used to satisfy the major.

See also the B.S./M.S. program under Graduate Study.

The department offers a minor in psychology which may be earned by completing 18 credits in psychology, including 101 and 301. At least 9 of the 18 credits must be in 300 level courses and above and no more than 3 of the 9 credits may be in Psych 490, 491, and 492. The student must earn a C average or better in the courses used to satisfy the requirements for the minor. Contact the psychology advising office for more information.

English proficiency requirement: The department requires a grade of C- or better in each of English 104 and 105 (or 105H), and in one of the following courses: Psych 302, Psych 490 (2 credits minimum), or Engl 302, 309, or 314.

Graduate Study

The department offers the degrees master of science and doctor of philosophy in psychology, and a minor to students with a major in other departments.

Within the major of psychology, the department offers a doctoral specialization in counseling psychology (APA accredited) and doctoral areas of concentration in cognitive psychology and social psychology. The department also offers a non-thesis master’s degree program in general psychology.

Students seeking a graduate major in psychology must have graduated from an accredited college in a curriculum substantially equivalent to the undergraduate curriculum in Liberal Arts and Sciences at Iowa State University. Prerequisite to admission is at least 15 credits of basic psychology, which should include a laboratory course, a measurement course, and a statistics course.

Graduates function as academic psychologists in higher education or as professional psychologists in applied settings. They have an extensive knowledge of psychological principles and the conceptual and quantitative skills to conduct psychological research, communicating the results to the scientific community, students in the classroom, and the general public. Graduates in applied programs have specialized knowledge in counseling and program development. They are skilled in delivering such programs and services to diverse clientele in a variety of settings.

The department also participates in the interdisciplinary program in industrial relations and neuroscience, and in the interdepartmental minor in gerontology (see Index).

A formal class and a supervised practicum in the teaching of psychology is recommended for all doctoral students whose future plans may include teaching at the college level. A 12-month internship in a training site or agency approved by the faculty is required of all doctoral students in counseling psychology.

The department also offers a B.S./M.S. program in psychology that allows the student to obtain both the B.S. and M.S. degrees in five years. Students interested in this program should contact the chair of the department’s Graduate Program Committee. Application for admission to the Graduate College and department should be made near the end of the junior year of undergraduate study.

Courses open for nonmajor graduate credit: Psych 401, 413, 422, 436, 440, 450, 460, 484, 485, 488. CmDis 471.

Courses Primarily for Undergraduate Students

Psych 101. Introduction to Psychology. (3-0) Cr. 3. F.S.SS. Fundamental psychological concepts derived from the application of the scientific method to the study of behavior and mental processes. Applications of psychology. 101H: (2-2) F. Honors section. (For students in the University Honors Program only.)

Psych 102. Laboratory in Introductory Psychology. (3-2) Cr. 1. F.S. Prereq: Credit or enrollment in 101. Laboratory to accompany 101.

Psych 111. Orientation to Psychology. (1-0) Cr. R.F.S. Program requirements and degree/career options. Required of psychology majors. Offered on a satisfactory-fail grading basis only.

Psych 201. Exploring Psychology at ISU. (2-0) Cr. 1. F.S. Survey of psychological research and practice. Psychology majors only. Offered on a satisfactory-fail grading basis only.

Psych 230. Developmental Psychology. (3-0) Cr. 3. F.S.SS. Life-span development of physical traits, cognition, intelligence, social and emotional behavior, personality, and adjustment.

Psych 280. Social Psychology. (3-0) Cr. 3. F.S.SS. Individual human behavior in social contexts. Emphasis on social judgments and decisions, attitudes, perceptions of others, social influence, attraction, aggression, and group pressure.

Psych 298. Cooperative Education. Cr. R.F.S.S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses and Programs

Psych 301. Research Design and Methodology. (3-0) Cr. 3. F.S.SS. Prereq: Stat 101; 1 course in psychology. Survey of the principal research techniques used in psychology with an emphasis on the statistical analysis of psychological data.

Psych 302. Research Methods in Psychology. (2-2) Cr. 3. F.S. Prereq: 301. Discussion of and experience in designing research studies, collecting and analyzing data, and preparing research reports in psychology.

Psych 310. Brain and Behavior. (Same as Zool 310.) (3-0) Cr. 3. F.S. Prereq: 101; Biol 109 or 201 or Zool 155. Chem 163. Survey of basic concepts in the neurosciences with emphasis on brain mechanisms mediating sensory processes, perception, motivation, learning, and abnormal behavior.

Psych 312. Sensation and Perception. (3-0) Cr. 3. F.S. Prereq: 101. Survey of the physiology and psychology of human sensory systems including vision, audition, smell, taste, the skin senses, and the vestibular senses.

Psych 313. Learning and Memory. (3-0) Cr. 3. F.S. Prereq: 101. Fundamental concepts and theories of learning and memory derived from human and animal research.

Psych 314. Motivation. (3-0) Cr. 3. F.S. Prereq: 101. Concepts and topics of motivation including curiosity, pain, emotion, sex, aggression, love, play, addiction, sleep, fatigue, and work.

Psych 315. Drugs and Behavior. (3-0) Cr. 3. F.S. Prereq: 101; Biol 109 or 201 or Zool 155. A biological perspective on fundamentals of psychoactive drugs and their use in experimental, therapeutic, and social settings.

Psych 333. Educational Psychology. (Same as C I 333.) See Curriculum and Instruction.

Psych 346. Psychology of Women. (Same as W S 346.) (3-0) Cr. 3. S. Prereq: 2 courses in psychology including 101. Survey of psychological literature relating to biological, developmental, interpersonal, and societal determinants of the behavior of women.

Psych 381. Social Psychology of Small Group Behavior. (Same as Soc 381.) (3-0) Cr. 3. S. Prereq: 280 or Soc 305. A survey of small group research and theory from a social psychological perspective. Major theories of interpersonal behavior such as exchange theory, equity theory, status and status consistency theory, and major areas of research such as leadership, power, conformity, bargaining, status, norms, and roles.

Psych 398. Cooperative Education. Cr. 6. F.S.SSS. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Psych 401. History of Psychology. (3-0) Cr. 3. F.S. Prereq: 4 courses in psychology. Philosophy and science backgrounds of psychology. Development of theories and causes of events in academic and applied psychology. Nonmajor graduate credit.

Psych 413. Psychology of Language. (Same as Ling 413.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 101. Psychological and linguistic processes involved in language related activities, like speaking, listening, reading, and writing. Nonmajor graduate credit.
Pay 422. Counseling Theories and Techniques. (2-2) Cr. 3. F. Prereq: 3 courses in psychology. Survey of major theoretical approaches in counseling and related assessment and intervention techniques. Supervised practice in basic counseling skills. Nonmajor graduate credit.

Pay 434. Applied Behavior Analysis. (Dual-listed with 534.) (3-0) Cr. 3. Prereq: 9 credits in human development and family studies or psychology. Design and evaluation of behavioral interventions in applied settings such as classrooms, institutions, and families. Design of single subject experiments.

Pay 436. Individual Differences and Exceptional Patterns of Development. (3-0) Cr. 3. Prereq: 230. Behavioral, biological, and social theories of retarded, handicapped, and other atypical persons; differences associated with race, sex, and socio-economic status. Nonmajor graduate credit.

Pay 437. Characteristics of Giftedness. (Dual-listed with 537; same as HD FS 437.) (3-0) Cr. 3. Prereq: 9 credits in human development and family studies or psychology, including Psych 230 or HD FS 102; junior classification. Understanding of giftedness and talent from cognitive, developmental, and social perspectives, including life-span and schizophrenia. Current conceptualizations and research regarding gifted children and adults. Implications for education and guidance.

Pay 440. Psychological Measurement I. (2-2) Cr. 3. F.S.S. Prereq: 301 and 9 credits in psychology, including Stat 101. Principles of psychological measurement, including concepts of reliability and validity; interpretation of scores; factors influencing performance, construction and use of measures of ability, achievement, and personality. Nonmajor graduate credit.

Pay 450. Industrial Psychology. (3-0) Cr. 3. F.S.S. Prereq: 2 courses in psychology including 101, Stat 101. Content and methods of industrial psychology. Selection and placement techniques, performance appraisal, training, testing in industry, techniques of interviewing, human error, accidents, and job analysis. Statistics including regression and correlation are used throughout the course. Nonmajor graduate credit.

Pay 460. Abnormal Psychology. (3-0) Cr. 3. F.S.S. Prereq: 3 courses in psychology including 101. Description of major forms of maladaptation including anxiety, mood disorders, personality disorders, substance abuse, and schizophrenia. Factors in the development of behavior deviations. Research pertinent to the description, development, and maintenance of abnormal behavior. Nonmajor graduate credit.

Pay 470. Seminar in Psychology. (1-0 to 3) Cr. 1 to 3 each time taken. Prereq: 12 credits in psychology. Current topics in psychological research and practice. A. Counseling B. Experimental C. Individual Differences D. Social

Pay 484. Psychology of Close Relationships. (3-0) Cr. 3. Prereq: 9 credits in psychology including 280. Theories and research concerning the functions, development, and evolution of close relationships. Influence of psychological processes on friendship, romantic, marital, and family relationships. Topics include mate selection, interdependence, trust and commitment, power and dominance in relationships, sexuality, divorce, gender roles, and family interaction. Nonmajor graduate credit.

Pay 485. Health Psychology. (3-0) Cr. 3. F. Prereq: Junior classification. 8 credits in psychology. Application of psychological theory and research methods to issues in physical health. Psychological factors in illness prevention, health maintenance, treatment of illness, recovery from injury and illness, and adjustment to chronic illness. Nonmajor graduate credit.

Pay 488. Cultural Psychology. (3-0) Cr. 3. S. Prereq: 280 and 301; junior classification. Examination of psychological differences among people living in different parts of the world with a focus on cross-cultural research related to social, developmental, and personality psychology. Nonmajor graduate credit.

Pay 490. Independent Study. Cr. var., maximum 3 per semester. F.S.S.S. Prereq: Junior classification, 6 credits in psychology, and permission of instructor. No more than 9 credits may be counted toward a degree in psychology. Supervised reading in an area of psychology. Writing requirement.

Pay 491. Research Practicum. Cr. var. F.S.S.S. Prereq: Junior classification, permission of instructor, and credit or enrollment in 301. No more than 9 credits of 491 may be counted toward a degree in psychology. Supervised research in an area of psychology. Primarily for students intending to pursue graduate education.

Pay 492. Fieldwork Practicum. Cr. var. F.S.S.S. Prereq: Junior classification, 12 credits in psychology, and permission of instructor. No more than 9 credits of 492 may be counted toward a degree in psychology. Supervised fieldwork in human service agency or other appropriate setting. Offered on a satisfactory-fail grading basis only.

Pay 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Pay 507. Applications of Multivariate Methods in Psychology. (3-0) Cr. 3. Prereq: Stat 401, Stat 402. Training in the application of multivariate methods in the analysis of psychological data using standard statistical packages. Techniques that are covered include exploratory and confirmatory factor analysis, MANOVA, regression, survival analysis, path analysis, and structural equation analysis with latent variables.

Pay 511. Advanced Physiological Psychology. (3-0) Cr. 3. Prereq: 310 or 315. Neurophysiological correlates of behavior.

Pay 512. Advanced Perception. (3-0) Cr. 3. Prereq: Survey of current theory and research in perception with an emphasis on vision.

Pay 514. Advanced Human Learning and Memory. (3-0) Cr. 3. Prereq: 310 or 316 or 9 hours in psychology. Historical and contemporary survey of human learning and memory.

Pay 516. Advanced Cognition. (3-0) Cr. 3. Prereq: 310. Theoretical and empirical research in human cognition, including pattern recognition, attention, visual imagery, text processing, short- and long-term memory, problem solving, decision making, language, and hemispheric specialization.

Pay 519. Cognitive Neuropsychology. (3-0) Cr. Prereq: 316. Theoretical and empirical research in cognitive psychological models and related neurological substrates underlying cognition in normals and brain-damaged patients. Topics of investigation include spatial perception, object and face recognition, voluntary motor control, language processing, memory, and problem solving.

Pay 533. Psychology of Learning, Cognition, and Motivation in Educational Settings. (Same as C 533.) See Curriculum and Instruction.

Pay 534. Applied Behavior Analysis. (Dual-listed with 434.) (3-0) Cr. 3. Prereq: 9 credits in human development and family studies or psychology. Design and evaluation of behavioral interventions in applied settings such as classrooms, institutions, and families. Design of single subject experiments.

Pay 537. Characteristics of Giftedness. (Dual-listed with 437; same as HD FS 537.) (3-0) Cr. 3. Prereq: 3 credits in human development and family studies or psychology, including Psych 230 or HD FS 102; junior classification. Understanding of giftedness and talent from cognitive, developmental, and social perspectives using a life-span approach. Current conceptualizations and research regarding gifted and talented children and adults. Implications for education and guidance.

Pay 540. Psychological Measurement II. (3-0) Cr. 3. Prereq: 9 credits in psychology, including 280. Advanced statistical methods and issues, including factor analysis, reliability, validity. Test and scale construction strategies.

Pay 545. Individual Differences. (3-0) Cr. 3. Prereq: 540. Psychometric assessment of human attributes (abilities, personality, and vocational interests) and their role as behavioral determinants in school, work, and interpersonal settings. Methodological issues encountered in the assessment of psychological traits (construct validity) and the developmental etiology of these attributes (maturity).

Pay 560. Advanced Personality Psychology. (3-0) Cr. 3. Prereq: 4 courses in psychology, including 360. Analysis of theories of personality, concepts, methods, and current research issues.

Pay 561. Psychopathology and Behavior Deviations. (3-0) Cr. 3. Prereq: 460. Critical review of theoretical perspectives and current research on the development and maintenance of the major forms of maladaptation including schizophrenia, anxiety, affective, drug use, personality, psychosomatic, reactive, and childhood disorders.

Pay 580. Advanced Social Psychology: Psychological Perspectives. (3-0) Cr. 3. Prereq: 4 courses in psychology, including 280. Current theories, methods, and research in social psychology with an emphasis on cognitive and interpersonal process-
Psych 581. Applications of Social Psychology. (3-0) Cr. 3. Prereq: 12 credits in psychology, including 280. Application of social psychological theory to various applied topics, including physical and mental health, stress, and coping.

Psych 586. Research Methods in Social Psychology. (3-0) Cr. 3. Prereq: Stat 402 and permission of instructor. Development of research skills, generating testable hypotheses, operationalizing independent and dependent variables, sampling and design issues, laboratory procedures, and interpretation of results in experimental research. Issues in analysis of variance, Bayesian reasoning, and effect size estimation will be emphasized, as will writing and publication strategies.

Psych 588. The Meta-Analytic Review. (3-0) Cr. 3. Prereq: Stat 401. Presentation of and hands-on experience with all stages of meta-analytic reviews, including problem formulation, data collection, data evaluation, data analysis and interpretation, and public presentation.

Psych 590. Special Topics. Cr. var. Prereq: 12 credits in psychology, and permission of instructor. Guided reading on special topics or individual research projects.

Psych 592. Seminar in Psychology. (1-0 to 3-0) Cr. 1 to 3 each time taken. Prereq: 12 hours in psychology. A. Counseling B. Industrial-Organizational C. M. Professional Issues and Ethics D. Research Methods and Psychometrics E. Cognitive F. Social G. General

Psych 597. Internship in Psychology. Cr. R. Prereq: M.S. degree candidacy; permission of instructor. Full-time, non-clinical, supervised experience in a setting relevant to psychology. Intended for master's degree level internships.

Psych 599. Creative Component. Cr. Var. Offered on a satisfactory-fail grading basis only.

Courses for Graduate Students

Psych 601. History of Philosophy of Psychology. (3-0) Cr. 3. Prereq: 4 courses in psychology. Origins of philosophy in psychological, medical, and related thought. Development as an independent discipline in the nineteenth and twentieth centuries as a science and as a practice including traditional and contemporary theory and philosophy.

Psych 621. Psychological Counseling; Theory and Process. (2-0) Cr. 2. F. Prereq: 4 courses in psychology including 440 and 480, and permission of instructor. Combined survey of theoretical issues and approaches. Didactic coverage of theoretical viewpoints at an introductory level.

Psych 621L. Techniques in Counseling. (0-6) Cr. 3. F. Prereq: 621 or concurrent enrollment in 621 and permission of instructor. Development of basic counseling skills and techniques through observation, role-playing, case studies, and supervised counseling sessions.

Psych 623. Vocational Behavior. (3-0) Cr. 3. Prereq: 3 courses in psychology. Theoretical views, research, and issues in career development through the life span. Methods of career counseling, including appraisal interviewing, assessment, test interpretation, and use of information sources.

Psych 626. Group Counseling. (2-2) Cr. 3. Prereq: 621L, 691A. Theory, research, ethical issues, and therapeutic considerations relevant to group counseling. Participation in lab exercises for development of group counseling skills and observation of ongoing groups.

Psych 628. Advanced Counseling Theory. (2-0) Cr. 2. Prereq: Practicum in counseling psychology. In-depth coverage of major theoretical positions, including comparative analysis. Coverage and evaluation of research on counseling interventions.

Psych 633. Teaching of Psychology. (2-0) Cr. 2. Prereq: Enrollment in degree program in psychology, completion of at least 1 year of graduate study, permission of instructor. Orientation to teaching of psychology at college level: academic issues and problems, instructional and evaluative techniques.

Psych 635. Interventions with Children and Adolescents. (3-0) Cr. 3. Prereq: Graduate classification and permission of the instructor. Research and therapy underlying application of behavioral and cognitive psychology to the treatment of childhood and adolescent psychopathology with an emphasis on internalizing disorders, developmental processes, and multimodal interventions.

Psych 691. Practicum in Psychology. Cr. var. Prereq: Permission of instructor. Supervised practice and experience in the following fields of specialization in applied psychology: A. Counseling B. Group Counseling. Prereq: 626, 691A (satisfactory-fail grading basis only) C. Advanced Counseling. Prereq: 691A (satisfactory-fail grading basis only) D. Teaching. Prereq: 633 (satisfactory-fail basis grading only) E. General

Psych 692. Research Seminar. (1-0 to 3-0) Cr. 1 to 3 each time taken. Prereq: Permission of instructor. A. Counseling B. Cognitive C. Social D. General

Psych 699. Research. Offered on a satisfactory-fail grading basis only.

Communication Disorders (CmDis) (Administered by the Department of Psychology)

The following courses are part of the Speech Communication Program. For more information refer to that section. CmDis 170, 275, 286, 371, 471.

Courses Primarily for Undergraduate Students

CmDis 170. Speech Improvement for Nonnative Speakers. (2-0) Cr. 2. For nonnative speakers of English only. Development of effective English vowel and consonant productions, accommodation processes that occur in context, intelligibility in conversational English, and appropriate stress patterns. Offered on a satisfactory-fail grading basis only.

CmDis 275. Introduction to Communication Disorders. (Same as Ling 275.) (3-0) Cr. 3. Survey of nature, causes, and types of major communication disorders including phonological, adult and child language, voice, cleft palate, fluency, and hearing disorders.

CmDis 286. Basic Sign Language. (Same as Ling 286.) (1-0) Cr. 0. Prereq: Full time skills in the use and understanding of signed English, a modification of American Sign Language. Overview of the types, causes and consequences of hearing impairment, deaf culture and the education of hearing-impaired children.

CmDis 371. Phonetics and Phonology. (Same as Ling 371.) (3-0) Cr. 3. Prereq: 275 or Engl 219. Analysis of speech through study of individual sounds, their variations, and relationships in contexts; English phonology; practice in auditory discrimination and transcription of sounds of American English;

Courses and Programs Sociology 325

description of speech sounds in terms of their production, transmission, and perception.

CmDis 471. Language Development. (Same as Ling 471.) (3-0) Cr. 3. Prereq: 275 or Psych 230 or Engl 219. Definition of components of language. Overview of theories and developmental processes related to each component of linguistic skill (semantics, lexicon, syntax, morphology, phonology, pragmatics). Overview of normative information available for infants, children, adolescents, and adults. Attention to metalinguistic skills and the complementary nonlinguistic and paralinguistic skills. Nonmajor graduate credit.

Graduates understand how social institutions, communities, and organizations work and change; they can examine the causes and consequences of conformity, deviance, and inequality. They can apply sociological understanding of human behavior to practical work situations and everyday life. Graduates can
read critically, think independently, and communicate effectively about social issues and social policy.

**College of Liberal Arts and Sciences—Sociology**

A major in sociology can serve as a liberal arts education; as preparation for various positions in social service and related occupations in business and industry; as background for professional education in such areas as law and theology or as a basis for graduate professional training as a sociologist in academic, government, business, and industrial settings.

Departmental requirements for all majors include the following supporting course: Philosophy including 230 and one upper level Philosophy course, English 302 or 309 or 314; One of the following courses: Statistics 101 or 104; At least three additional credits with a Mathematics designator.

A program of study that meets the needs and interests of the student and department requirements will be developed in consultation with the major adviser. Programs of study will include 115, 130 or 134, 202, three credits from 310, 380 or 420, 302, 305, three credits from 327, 330, 331 or 332, 401, 9 credits of upper level electives. Majors must receive grades of C or better in Eng 104 and 105, and a grade of C or better in either Eng 302 or 309 or 314. Programs leading to a bachelor of arts degree will emphasize additional coursework in groups I, II and IV of the general education requirements. Programs leading to a bachelor of science degree will emphasize additional coursework in groups III and IV of the general education requirements. Some of the possible fields of concentration are criminal justice systems, community (urban and rural) sociology, family sociology, sociology of work, social science teaching, research methods and statistics, social change and development, complex organizations, human population and ecology, social inequality, social psychology, and sociological theory.

In consultation with their advisers, students may gain work experience and develop their skills in their field of concentration through the field observation and practice options of 454 and 460.

The department offers a minor in sociology which may be earned by completing 15 credits in sociology including: Sociology 130 or 134; 3 credits from 310, 380 or 420; 3 credits from 264, 305 or 381; an additional 6 credits in sociology courses. At least 9 of the 15 credits must be at the 300 level or higher, 6 of these credits must be taken at ISU with a minimal grade of C.

**College of Agriculture—Public Service and Administration in Agriculture**

The curriculum in public service and administration in agriculture is designed for students who desire an interdisciplinary education to pursue a career with agriculturally related governmental and private agencies, or with businesses and industries that are concerned with public service. Students will explore the planning and implementing of rural and agriculturally related programs in organizations, communities (town, city, or county), multico county areas, states, regions, and at the federal level.

The curriculum has a broad base of general education subjects including credits in communications, mathematics, physical and biological sciences, social sciences, and humanities. The technical subjects represent a combination of sociology, economics, government, and technical agriculture, with emphases on social and economic change, history of public services, complex organizations, interagency relationships, community leadership, community action, adoption and diffusion, group dynamics, and political and legal behavior as they relate to agriculture and rural areas.

**Graduate Study**

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in a number of areas, e.g., family, inequality, life course and aging; food systems, agriculture and environment; methodology; social change and development; social deviance and mental health; community studies and development; social organization; and social psychology. The Department of Sociology does not offer a nonthesis master’s program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy.

Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in industrial relations, interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

**Courses Primarily for Undergraduate Students**

Soc 110. Orientation to Public Service and Administration in Agriculture. (1-0) Cr. R. F. Survey of public service and administration in agriculture. Exploration of career tracks and career planning. Recommended during first semester of freshman year or as soon as possible after transfer into the department.

Soc 115. Orientation to Sociology. (1-0) Cr. R. F. Orientation to sociology. A familiarization with University LAS College requirements and procedures. Occupational tracks and career options open to sociology; introduction to career planning. Recommended during second semester of freshman year, or as soon as possible after transfer into the department. Offered on a satisfactory-fail grading basis only.

Soc 130. Rural Institutions and Organizations. (3-0) Cr. 3. F.S. An introductory analysis of sociological concepts and theories as they relate to rural institutions and organizations. Emphasis on the static structure and function of these institutions and organizations and on their dynamic adaptation to changing societal, environmental, and economic conditions. General sociological principles and perspectives. Credit for only 130 or 134 may be applied toward graduation.

Soc 134. Introduction to Sociology. (3-0) Cr. 3. F.S.S.S. Social interaction and group behavior with emphasis on contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure. Credit for only 130 or 134 may be applied toward graduation.

Soc 219. Sociology of Pre-Marital and Marital Relationships. (3-0) Cr. 3. F.S. Prereq: 130 or 134. Sociological analysis of courtship and marriage relationships across the life cycle. Attention also given to alternative and single lifestyles, to parenting, and to family life.

Soc 235. Social Problems. (3-0) Cr. 3. F.S. Prereq: 130 or 134. Sociological concepts and methods employed in the analysis of various social problems, including crime, substance abuse, problems with institutions, rural and urban problems, and international concerns. Consideration of various solutions.

Soc 241. Youth and Crime. (Same as CJ St 241.) (3-0) Cr. 3. F.S. Prereq: 130 or 134. An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents’ rights, and traditional and alternative ways of dealing with juvenile crime.

Soc 264. Small Group Dynamics. (3-0) Cr. 3. F.S. Prereq: 130 or 134. An introduction to intra- and intergroup dynamics in small groups. Group decision-making, coalitions, conformity, intergroup relations, status and role effects, leadership, group development and group conflict. Includes student participation in small group processes.

Soc 298. Cooperative Education. Cr. R. F. S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Soc 305. Social Psychology: A Sociological Perspective. (3-0) Cr. 3. F.S. S.S. Prereq: 130 or 134. Examination of human behavior in a social environment with emphasis on development of the self, interpersonal relations, attitudes, and small groups.

Soc 310. Community. (3-0) Cr. 3. F.S. Prereq: 130 or 134. Comparative analysis of the institutional structure of rural, urban, and suburban communities; community as an ecological and social system; power relationships; analysis of planned and unplanned processes of social change.

Soc 325. Agriculture in Transition. (3-0) Cr. 3. S. The impacts of agricultural changes on farm families, rural communities, and consumers. Past, present, and future trends in family farms and their social implications.
Soc 327. Sex and Gender in Society. (Same as W S 327) (3-0) Cr. 3. F.S.S. Prereq: 130 or 134. How the biological fact of sex is transformed into a system of gender stratification. The demographics and social positions of women and men in the family, education, media, politics, and the economy. Theories of the social-psychological and sociological bases for beliefs about women and men. The relationship between gender, class, and race.

Soc 328. Sociology of Masculinities and Manhood. (Same as W S 328) (3-0) Cr. 3. S. Prereq: Soc 130, 134, or W S 201. Examination of socially constructed and idealized images of manhood, the nature of social hierarchies and formations constructed on the basis of imagery, ideologies, and norms of masculinity. Theories on gender (sociological, psychological, and biological). Particular attention given to theory and research on gender variations among men by race, class, ethnicity, sexual orientation, physical ability and age.

Soc 330. Ethnic and Race Relations. (Same as At Am 330.) (3-0) Cr. 3. F.S.S. Prereq: 130 or 134. Analysis of ethnic and race relations, particularly in America; emphasis on the sociology and psychology of race and ethnic relations.

Soc 331. Social Class and Inequality. (3-0) Cr. 3. F.S.S. Prereq: 130 or 134. Social stratification and processes resulting in poverty, implications of status, class, and poverty for people of different races, ethnicities, and gender.

Soc 332. The Latino/Latina Experience in U.S. Society. (3-0) Cr. 3. F. Prereq: 130 or 134. Examination of the social, historical, economic and political experience of Latin American and Latino ethnic groups in the U.S. — primarily focusing on Mexican, Puerto Ricans, and Cubans.

Soc 340. Deviant and Criminal Behavior. (Same as CJ St 340.) (3-0) Cr. 3. S. S. Prereq: 130 or 134. Theory and psychology of deviance and social deviance; issues relating to crime, antisocial behavior and social policies designed to control deviant behavior.

Soc 341. Criminology. (Same as CJ St 341.) (3-0) Cr. 3. F. Prereq: 130 or 134. The nature of crime and criminalization and theory of crime; statistics and theories of criminality; major forms of crime; official responses to crime and control of crime.

Soc 345. Population Problems and Society. (Same as Env S 345.) (3-0) Cr. 3. F. Prereq: 130 or 134. Human overpopulation; impact on food, resources, and services; population growth and development; trends of births, deaths, and geographic movement; projecting future population; population control and family planning; immigration policies and laws; comparison of the United States with other societies throughout the world.

Soc 371. High Risk Children and Adolescents. (3-0) Cr. 3. S. Prereq: 130 or 134. This class traces life course developmental risk and resiliency through early adulthood. Its focus is on contextual factors that contribute to or impede prosocial outcomes in young people with special emphasis on the origins and processes of prosocial and cumulative risk. It reviews the literature on children and adolescents in high risk social contexts such as runaway and homeless adolescents, inner city adolescents, and gangs.

Soc 380. Sociology of Work. (3-0) Cr. 3. F. S. Prereq: 130 or 134. Inequalities (gender, race, class) related to jobs, occupations, firms, and industries. Satisfaction, rewards, alienation, discrimination, and other topics of importance to workers are examined.

Soc 381. Social Psychology of Small Group Behavior. (Same as Psy 381.) (3-0) Cr. 3. F. S. Prereq: Soc 305 or Psy 280. A survey of small group theory and research from an interdisciplinary, social psychological perspective.

Soc 382. Environmental Sociology. (Same as Env S 382.) (3-0) Cr. 3. F. S. Prereq: Soc 130, 134 or Env S 201. Environment-society relations; social construction of nature and the environment; social and environmental impacts of resource extraction, production, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples.

Soc 388. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Soc 401. Contemporary Sociological Theories (3-0) Cr. 3. F. S. Prereq: 9 credits in sociology. Both historical and modern social theories as applied to understanding and researching the social world. Nonmajor graduate credit.

Soc 411. Social Change in Developing Countries. (3-0) Cr. 3. S. Prereq: 130 or 134 plus 3 credits in social sciences. Review of historical and social approaches to technology evaluation. Examination of public responses to complex and controversial technology. Strategies for gaining adoption/rejection of technologization. Applications to topics in agriculture, development, and marketing. Nonmajor graduate credit.

Soc 420. Complex Organizations. (3-0) Cr. 3. F.S. Prereq: 130 or 134 plus 3 credits in social sciences. Study of bureaucracies and other large organizations as social systems through the perspective of basis social processes and structural variables. Incorporates topics of organizational effectiveness, power and change. Nonmajor graduate credit.

Soc 425. Social Movements and Revolution. (3-0) Cr. 3. S. Prereq: 6 credits in sociology. Theoretical approaches to social movements; focusing on the origins, development, and impact of social movements including social-psychological, organizational, and structural dimensions. Nonmajor graduate credit.

Soc 431. Chicanos/Chicanas in Contemporary Society. (3-0) Cr. 3. S. S. Prereq: 130 or 134. An interdisciplinary examination of the largest U.S. Latino ethnic group. Special attention will be given to social conflict and social transformation as it relates to contemporary Chican/o issues, particularly in the Midwest and Southwest.

Soc 435. Urban Society. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 130 or 134 plus 3 credits in social sciences. Development of cities and urban systems; human and spatial ecology; urban transformation, decline, and revitalization and issues and challenges; residential segregation; poverty, immigration and subcultures; urban social movements; local governance; alternative solutions and planning for cities; interaction and conflict perspectives in urban sociology. Nonmajor graduate credit.

Soc 450. Demographic Analysis, Projections, and Modeling. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 6 credits in sociology. Methods and techniques for analyzing, projecting, and modeling demographic behavior and change. Focus on fertility, migration, and mortality, economic, education, labor force, housing, service utilization, resource consumption, and consumer markets. Integrating population variables into decision making. Applications using surveys, census data, and other indicators. Nonmajor graduate credit.

Soc 454. Field Observation and Practice. Cr. var., maximum of 12. F.S.S. Prereq: Junior or senior classification, permission of faculty internship coordinator. Undergraduates as field observer in sociology or PSA 201, 302, 305. Supervised practice in industrial plants, business organizations, and governmental agencies. Not more than 12 credits of field experience (Soc 454 and 460) may be counted toward meeting the required 47 credits of upper level courses. The total of 124.5 credits required for graduation. No credits in Soc 454 may be used to satisfy minimum sociology requirements for sociology majors. Offered on a satisfactory-fail basis.

Soc 460. Criminal and Juvenile Justice Practicum. (Same as CJ St 460.) Cr. var., maximum of 12. F.S.S. Prereq: Junior or senior classification; permission of criminal justice studies coordinator; major or minor in sociology, criminal justice studies minor, or PSA, 241 or 340. Study of the criminal and juvenile justice systems and social control processes. Supervised course work in the field, police officer’s court, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency. (Soc 454 and 460) may be counted toward meeting the required 47 credits of upper level courses and the total of 124.5 credits required for graduation. No credits in Soc 460 may be used to satisfy minimum sociology requirements for sociology majors. Offered on a satisfactory-fail grading basis only.

Soc 461. Life Course Sociology. (3-0) Cr. 3. F. Prereq: 6 credits in sociology. Theoretical and empirical perspectives on development, social status, roles, age, related norms, values, and subcultures. Decisions and issues faced by individuals as they progress through stages of the life cycle.

Soc 476. The Aged in American Society. (Same as Geron 476.) (3-0) Cr. 3. S. Prereq: 6 credits in sociology. A survey of sociological problems of the aging and the social implications of an sizable aged population. Nonmajor graduate credit.

Soc 485. Sociology of the Family. (3-0) Cr. 3. S. Prereq: 6 credits in sociology. The contemporary family in developing, industrial, and post-industrial societies. Effects of modernization and family policies on family structures and functions.

Soc 490. Independent Study. Cr. 1 to 3 each time taken. Prereq: 6 credits in sociology and permission of instructor. Students in the College of Agriculture must be of junior or senior classification and may use no more than 6 credits of Soc 490 toward the total of 128 credits required for graduation. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of 490 toward graduation. A. General Sociology B. Rural Sociology

Soc 496. Agriculture and Rural Development in Ireland. (3-0) Cr. 3. S. Prereq: 3 credits in sociology and permission of instructor. The course provides a 2 week tour of the Irish countryside where students can observe and experience small town and farm life.
Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Soc 509. Agroecosystem Analysis. (Co-listed with Agron 509, SusAg 509, Anthr 509) (3-0) Cr. 3. SS. Prereq: 6 credits in social sciences, 6 credits in natural, biological or engineering sciences and senior or above classification. Field study of commercial farming systems within the context of global energy flows and biogeochemical cycles, including ecological, agronomic, and social perspectives.

Soc 513. Qualitative Research Methods. (2-2) Cr. 3. Alt. F., offered 2001. Prereq: 511. Applied qualitative research methods in sociology. Design and implementation of a course-based research project including data collection and presentation of results. Qualitative data gathering techniques using observational, historical, in-depth interviewing or content analysis approaches. Laboratory emphasis on completion of data gathering, analysis, and report writing.

Soc 522. Attitude and Attitude Change. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 305 or Psych 280. Analysis of theories of attitude and attitude change; current controversies between the theories examined, as well as supporting research.

Soc 528. Sociology of Gender. (Same as WS 528.) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 6 credits in sociology. Examination of the social construction of gender and the social organization of gender inequality. Analysis of gender identity in socialization, interpersonal behavior, the media, and the economy. Investigation of the intersection of gender, race, and class.

Soc 529. Racial and Ethnic Inequality. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 6 credits in sociology. Analysis of racial and ethnic inequality in the United States and the world, focusing on the implications of the changing world social and economic order for differences in racial and ethnic groups relative to wealth, status, and power; a critical examination of majority group domination of minority groups in various societies.

Soc 533. Models of Community. (3-0) Cr. 3. Alt. F. offered 2001. Prereq: 6 credits in sociology. Emphasis on different models or frames of reference used in community analysis. Theoretical and methodological tools, current views of community problems, and explanation of social and cultural change are presented for each model.

Soc 534. Social Stratification. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 6 credits in sociology. Critical examination of the causes and consequences of social stratification and inequality; classical theories, contemporary frameworks, and recent empirical studies; international stratification patterns, institutions of higher education, and the private sector in rural development will be assessed.

Soc 541. Technological Innovation, Social Change, and Development. (Same as TC 541, U St 541) (3-0) Cr. 3. Alt. F., offered 1999. Prereq: 6 credits in social sciences. Sources, theories and models of technological innovation, social, institutional, cultural, economic and political contexts of technology transfer; issues and mechanisms of technological change; planning technology related social change; local and international case studies.

Soc 544. Sociology of Food and Agricultural Systems. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 6 credits in sociology. Socialization of food and fiber production, processing, and distribution systems. Sociological comparison of conventional and alternative production systems; gender roles in agriculture and food systems; local, national and global food systems; perspectives on food and agricultural research and policy.

Soc 546. Organizational Strategies for Diversified Farming Systems. (Co-listed with SusAg 546, Hort 546, Agron 546.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: SusAg 546. The day-to-day operation and social relations of the complex, diversified farm. Alternative organizational strategies for the diversified and sustainable farm. Farm family dynamics and goal setting. Cooperation between farmers. The social relations of alternative marketing, including green labeling, community supported agriculture, farmers’ markets, and relationship marketing.

Soc 566. Political Sociology. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 6 credits in sociology and/or political science. The relationship between state and society with emphasis on American society. Analysis of theoretical frameworks, political participation, power, social movements, elites, democracy, and capitalist society.

Soc 584. Current Issues in Crime and Justice. (3-0) Cr. 3. Alt. F., offered 2003. Prereq: 6 credits in sociology. Discussion of current research and theory in crime and delinquency; topics include the purpose and role of law in social life; emerging theoretical directions in criminology; recent work on specific forms of criminality; controversies in the criminal justice system.

Soc 590. Special Topics. Cr. 1 to 3 each time taken. Prereq: 6 credits in sociology; senior or graduate classification. A. General Sociology B. Rural Sociology

Soc 591. Orientation to Sociology. (1-0) Cr. R. F. Prereq: Formal admission into the sociology graduate program. Introduction to the department, current graduate student policies at department and university levels, departmental administrative procedures. Required of graduate students. Offered on a satisfactory-fail grading basis.

Soc 592. Teaching Sociology. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: Graduate classification in sociology. Pedagogical and substantive issues in the teaching of sociology at the college level focusing on course organization, instructional objectives, techniques of presentation, and instruments for evaluation of learning and instruction.

Soc 595. Internship. Arr. Cr. Var. F.S.SS. Prereq: 12 graduate credits in sociology, approval of major professor and internship coordinator. Supervised practice for students to apply sociological knowledge and skills to work with client groups.

Soc 599. Research for Master’s Thesis. A. General Sociology B. Rural Sociology

Courses and Programs Sociology

2001-2003
Courses for Graduate Students

Sec 607. Contemporary Sociological Theory. (3-0) Cr. 3. S. Prereq: 6 graduate credits in sociology. Survey of theoretical developments since 1925, including the rise of structural-functionalism, symbolic interactionism, conflict theories, phenomenology, exchange theory, and others.

Sec 610. Society and Technology in Sustainable Food System. (Co-listed as SusAg 610, A E 610, cross-listed as Agron 610.) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: SusAg 509. Social and technological dimensions of sustainability in food systems. Emphasis on strategies and ethics for evaluating existing and emerging options.

Sec 611. Advanced Theory Construction for Categorical Outcomes. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 511; Stat 404. Rationale for and interpretation of various quantitative methods of analyzing categorical and ordered categorical variables, including log-linear, logit, logbinomial and event history analysis, models for censored data.

Sec 640. Comparative Social Change. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 6 graduate credits in sociology. Contemporary theories of social change, modernization, dependency, and development are critically examined; methodological issues identified; supporting research explored; applicability of theoretical models, concepts, and strategies to current national and international needs are evaluated.

Sec 698. Seminars in Sociology. (3-0) Cr. 3 each. A. Family and Life Course B. Methodology C. Community Studies and Development D. Social Change and Development E. Social Deviance and Mental Health G. Social Organization H. Social Psychology I. Social Inequality J. General K. Food Systems, Agriculture and Environment

Sec 699. Dissertation Research. A. General Sociology B. Rural Sociology

Speech Communication

(Administered by the College of Liberal Arts and Sciences)

Undergraduate Study

The cross-disciplinary program in speech communication offers introductory courses designed for all students as part of their general education, as a complement to professional training, and as an introduction to further study within the discipline.

Students who major or minor in speech communication can prepare themselves for a wide variety of future employment opportunities, depending upon individual interests, background, and abilities. Present curricula can prepare students for the study of law or theology; for positions in business and industry or education; and for graduate level work in speech communication, or related disciplines.

A student electing to major in speech communication must meet the particular requirements of one of the following options: interpersonal and rhetorical communication, or speech education (bachelor of arts).

The general requirement for majors in speech communication is that no credits in 290, 493, 499, and 590 may be applied toward the minimum required credits within any prescribed option. (IRC: 33 credits; SpEd: 47 credits.) Specific requirements for the major in speech communication with its various options are listed under their respective descriptions.

The English proficiency requirement may be met by (1) completion of Engl 104, 105 (or 105H), or its equivalent, with a grade in each of 2.0 or better; (2) one additional writing course beyond Engl 105 with a grade of 2.0 or better from the following approved list: Engl 302, 305, 309, 314, 415; JI MC-201.

The requirements for minors in speech communication may be fulfilled by credit in Sp Cm 212 plus at least 15 additional hours, of which 9 credits are in courses numbered 300 or above. All 15 credits must be taken within interpersonal and rhetorical communication. No credits in 290, 490, 493, 499, and 590 may apply toward the minor.

The program participates in the following interdisciplinary graduate minor programs: the interdisciplinary program in linguistics, and the interdisciplinary program in technology and social change, and the undergraduate program in gerontology.

Speech Communication Education

Students fulfilling the requirements for teacher licensure prepare to teach speech communication, dramatic arts, and media at the secondary school level. In addition, they prepare to direct co-curricular and extracurricular activities.

Each student seeking teacher licensure in speech communication must fulfill the requirements outlined in the Teacher Education section of this bulletin. In addition, each student must maintain a 2.5 grade point average in all courses taken to be admitted to the College of Education.

Communication Studies (ComSt)

The communication studies major is administered by the Greenlee School of Journalism and Communication. (See Index)

Interpersonal and Rhetorical Communication (Sp Cm)

The interpersonal and rhetorical communication area provides a thorough understanding of communication theories, principles, and applications. Students will be required to complete courses which provide a solid grounding in the theories of communication, the nature of rhetorical principles in communication, and the role of communication in creating, maintaining, and changing human relationships. The following courses are required for an emphasis in interpersonal and rhetorical communication: ComSt 101; Sp Cm 212, 305, 327, 412, and 497 (Capstone Seminar) plus an additional 15 credits from courses in interpersonal and rhetorical communication (Sp Cm).

Emphasis in the area prepares students for graduate study, the study of law or theology, to teach speech communication in high school, or enter a variety of communication-related careers and occupations in business and professional organizations. Communication internships in business and professional settings are available for qualified students. The area’s courses also provide a minor concentration for students in business, English, journalism, foreign languages and literatures, and the social sciences.

Theatre

The theatre program is administered by the Department of Music, (See Index).

Graduate Study

The program offers courses for a graduate minor in speech communication as well as supporting work for other disciplines. The Program of Speech Communication also participates in the interdepartmental program leading to a master’s degree in Interdisciplinary Graduate Studies.

Courses open for nonmajor graduate credit: Sp Cm 305, 321, 323, 327, 410, 412, and 417.

Communication Studies (ComSt)

(For those interested in the study of mass communication, see Index. Journalism and Mass Communication.)

Interpersonal and Rhetorical Communication (Sp Cm)

Courses Primarily for Undergraduate Students

Sp Cm 110. Listening. (3-0) Cr. 3. F.S.SS. Theory, principles, and competency development in comprehensiveness, therapeutic, critical, consumer, and appreciative listening. The impact of listening in relationships and partnerships.

Sp Cm 212. Fundamentals of Public Speaking. (3-0) Cr. 3. F.S.SS. Theory and practice of basic speech communication principles applied to public speaking. Practice in the preparation and delivery of extemporaneous speeches.

Sp Cm 223. Intercollegiate Debate and Forensics. Cr. 1 each time taken, maximum of 6 credits. F. Prereq: Permission of instructor. Participation in intramural and intercollegiate debate and other forensic events.

Sp Cm 290. Special Projects. Cr. 1 to 2 each time taken, maximum of 6 credits. F. S. Prereq: 3 credits in speech communication; permission of department chair.

Sp Cm 305. Semantics. (3-0) Cr. 3. F.S.SS. Prereq: Engl 105. The study of symbolic processes and how meaning is encoded in words, phrases, sentences, and utterances; discussion of modern theories of meaning; and an exploration of relationships among language, thought and action. Nonmajor graduate credit.

Sp Cm 312. Business and Professional Speaking. (3-0) Cr. 3. F.S.SS. Prereq: 212. Theory, principles, and competency development in the creation of coherent, articulate business and professional oral presentations.
Prereq: 15 credits in speech communication; junior or Sp Cm 497. Capstone Seminar.

Sp Cm 322. Argumentation, Debate, and Critical Thinking. (3-0) Cr. 3. F.S.SS. Prereq: 212. Practice in preparing and presenting argumentative and debate speeches; emphasis on critical thinking and ethical and logical duties of the advocate; analysis, evidence, reasoning, attack, defense, research, case construction, and judging.

Sp Cm 323. Gender and Communication. (Same as W S 323.) (3-0) Cr. 3. F. Prereq: 212. The rhetorical strategies and women and men to succeed in oral communication; the theory, principles, and practice of effective gender communication in a variety of settings. Nonmajor graduate credit.

Sp Cm 325. Nonverbal Communication. (Same as ComSIT 325.) See Communication Studies.

Sp Cm 327. Persuasion. (3-0) Cr. 3. F.S.SS. Prereq: 212. Examination of persuasive theories, strategies and research in persuasion. Emphasis on application and analysis; logical, emotional, and ethical proofs. Nonmajor graduate credit.

Sp Cm 404. Seminar. (Dual-listed with 504.) Cr. 3 each time taken, maximum of 9. Prereq: 18 credits in speech communication.

A. Interpersonal and Rhetorical Communication.
B. Speech Education.

Sp Cm 410. Classical Rhetoric. (3-0) Cr. 3. S. Prereq: 12 hours in speech communication, Greek and Roman tradition in rhetorical theory, practice, criticism, and pedagogy. Nonmajor graduate credit.

Sp Cm 412. Rhetorical Criticism. (3-0) Cr. 3. S. Prereq: 212 and 6 credits in speech communication. Development of rhetorical theory and practice from Corax to modern times. Application of principles of criticism to current public speaking practices. Nonmajor graduate credit.

Sp Cm 416. American Public Address. (3-0) Cr. 3. S. Relationship between public persuasions and leaders; process of preparing major public addresses; selected speakers and speeches as linked with political or historical events.

Sp Cm 417. Campaign Rhetoric. (Same as Pol S 417.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 212. Backgrounds of candidates for state and national elections; selected speeches and issues; persuasive strategies and techniques of individual speakers. Nonmajor graduate credit.

Sp Cm 490. Independent Study. Cr. 1 to 3 each time taken, maximum of 9. F.S.SS. Prereq: 18 credits in speech communication, junior classification, permission of department chair. Only one independent study enrollment is permitted within the department per semester.

Sp Cm 495A. Directing Speech Activities. (1-0) Cr. 1. S. Prereq: C I 301; 9 credits in speech communication; minimum grade point of 2.5 in speech communication courses. Problems, methods, and materials related to directing speech activities in secondary schools.

Sp Cm 495B. Teaching Speech. (Same as C I 495B.) (3-0) Cr. 3. F. Prereq: Sp Cm 313; 9 credits in speech communication; minimum grade point average of 2.5 in speech communication courses. Problems, methods, and materials related to teaching speech, the afore, and media in secondary schools.

Sp Cm 497. Capstone Seminar. (3-0) Cr. 3. S. Prereq: 15 credits in speech communication; junior or senior classification. Students synthesize relevant theory and research culminating in a capstone project paper.

Sp Cm 499. Communication Internship. Cr. var. 1 to 3, each time taken, maximum of 6. F.S.SS. Prereq: 18 credits in speech communication courses, other courses deemed appropriate by faculty adviser; 2nd semester junior or senior standing; cumulative GPA of at least 2.5 overall and 3.0 in speech communication; and permission of the internship committee. Applications should be submitted in the term prior to the term in which the internship is desired. Supervised application of interpersonal and rhetorical communication in professional settings.

Courses Primarily for Graduate Students, open to qualified undergraduates

Sp Cm 504. Seminar. (Dual-listed with 494.) Cr. 3 each time taken, maximum of 9. F.S.SS. Prereq: 9 credits in speech communication. Topics may include the following:

A. Interpersonal and Rhetorical Communication
B. Speech Education

Sp Cm 590. Special Topics. Cr. 1 to 4 each time taken, maximum of 12 credits. Prereq: Permission of department chair.

Dean L. Isaacson, Chair of Department

Distinguished Professors: Athreya, Fuller, Meeker

University Professors: Koehler, Stephenson

Professors: Aranmuy, Bailey, Bonett, Isaacson, Kennedy, Lahiri, Lorenz, Morris, Shelley, Stern, Stufken, Vardeman

Professor (Collaborator): Themeau

Distinguished Professor (Emeritus): H. A. David

University Professors (Emeritus): D. Cox, H. T. David, Groeneveld, Hinz

Professors (Emeritus): C. Cox, Harville, Hickman, Hotchkiss, Pollak, Strahan, Wolins

Associate Professors: Carrquiry, Cook, Dixon, Kaiser, Marasinghe, Musser, Roberts, Rollins, Sherman

Associate Professor (Emeritus): Sukhatme

Assistant Professors: Daniels, Duckworth, Froelich, Nettleton, Opsomer, Wu, Yang

Assistant Professors (Collaborators): Sloan

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in statistics, leading to the degree of bachelor of science, see Liberal Arts and Sciences, Curriculum.

The curriculum in liberal arts and sciences with a major in statistics is designed to prepare students for (1) entry level statistics positions; (2) graduate study in statistics. Entry-level positions include the following types of work: statistical design, analysis and interpretation of experiments and surveys; data processing and analysis using modern computing facilities and statistical computing systems; application of statistical principles and methods in commercial areas such as finance, insurance, industrial research, marketing, manufacturing, and quality control. Nonprofit organizations such as large health study institutions have entry-level positions for B.S. graduates in statistics. Also, there are opportunities for work in statistics that require a major in a subject-matter field and a minor in statistics.

Students completing the undergraduate degree in statistics should have a broad understanding of the discipline of statistics. They should have a clear comprehension of the theoretical basis of statistical reasoning and should be proficient in the use of modern statistical methods and computing. Such graduates should have an ability to apply and convey statistical concepts and knowledge in oral and written form. They should be aware of ethical issues associated with polling and surveys and in the summarization of the outcomes of statistical studies.

Undergraduate majors in this department usually include in their programs: a) Statistics 101 or an alternative introductory course (104 or 227), b) Mathematics 165, 166, 265 (or 165H, 166H, 265H), 307 (or 317) and Computer Science 103, and c) Statistics 341, 342, 401, 402, 421, 479, 480.

These courses plus at least two additional courses in statistics at the 400 level or above constitute the major. With the permission of the department, I E/Stat 361 may be substitut ed for one of these 400 level courses. It is advisable to have a minor in a field of application.

The department offers a minor in statistics which may be earned by completing one of three options. Option I: one of 101, 104 or 105; 231 or 401. Option II: 341, 342, 231 or 401. Option III: 227, 228. Additional courses in statistics at the 300 level or above are required for each option to yield a total of at least 15 credits in statistics courses.

English and Speech proficiency requirement: The department requires a grade of C- or better in each of Engl 104 and 105 (or 105H), and completion of one of Engl 202 or 314 with a grade of C- or better. The department requires a passing grade in ComSIT 102 or Sp Cm 212.

Undergraduate Study

Students intending to do graduate work in statistics normally will take additional courses in mathematics.

Graduate Study

The department offers the degrees master of science and doctor of philosophy with a major in statistics, and minor work for students majoring in other departments. Within the statistics major the student may select areas of specialization in experimental design, probability, statistical methods, statistical theory, statistical computing, survey sampling, quality control, spatial statistics, time series, reliability, or applied statistics (e.g., biometrics, econometrics, environmental statistics, psychometrics,
Courses Primarily for Undergraduate Students

Stat 100. Orientation in Statistics. (1-0) Cr. R. F. Opportunities, challenges, and the scope of the curriculum in statistics. For students planning or considering a career in this area.

Stat 101. Principles of Statistics. (3-2) Cr. 4. F. S.S.S. Prereq: 1 1/2 years of high school algebra. Statistical concepts in modern society; descriptive statistics and graphical displays of data; the normal distribution; data collection; elementary probability; elements of statistical inference; estimation and hypothesis testing; linear regression and correlation; contingency tables. Credit for only one of the following courses may be applied toward graduation: 101, 104, 105, 227.

Stat 104. Introduction to Statistics. (2-2) Cr. 3. F.S.S.S. Prereq: 1 1/2 years of high school algebra. Statistical concepts and their use in science; collecting, organizing and describing events; elementary probability; binomial and normal distributions; regression; estimation and hypothesis testing. For students in the agricultural and biological sciences. Credit for only one of the following courses may be applied toward graduation: 101, 104, 105, 227.

Stat 105. Introduction to Statistics for Engineers. (3-0) Cr. 3. F. S. Prereq: Math 165 or 165H. Statistical concepts with emphasis on engineering applications. Data collection; descriptive statistics; probability distributions and their properties; elements of statistical inference; regression; statistical quality control charts; use of statistical software; team project involving data collection, description and analysis. Credit for only one of the following courses may be applied toward graduation: 101, 104, 105, 227. Credit for both 105 and 305 may not be applied for graduation.

Stat 201. Applied Regression Analysis for Business. (2-0) Cr. 2. F. S. S.S. Prereq: 101 or 104 or 105, Math 150 or 165. Brief review of required descriptive and inferential statistics; statistical process monitoring and applications in quality control; use of computers to analyze data; simple linear regression analysis; diagnostic checking and model building; application of regression techniques to analysis of variance and time series analysis. Credit for both 201 and 227 may not be applied toward graduation.

Stat 227. Introduction to Business Statistics. (4-2) Cr. 5. F. S.S.S. Prereq: Math 150 or 165. Obtaining, presenting, and organizing statistical data; measures of location and dispersion; probability concepts; the normal distribution; sampling and sampling distributions; estimation and confidence intervals; statistical process monitoring and applications in quality control; use of computers to analyze data; simple linear regression analysis; multiple regression analysis. Credit for only one of the following courses may be applied toward graduation: 101, 104, 105, 227. Credit for both 201 and 227 may not be applied toward graduation.

Stat 231. Probability and Statistical Inference for Engineers. (4-0) Cr. 4. F. S. Prereq: Credit or enrollment in Math 265. Emphasis on engineering applications. Basic probability; random variables and probability distributions; joint and sampling distributions; propagation of error. Descriptive statistics; confidence intervals; hypothesis testing; simple linear regression; multiple linear regression; one way analysis of variance; use of statistical software; team project involving data collection, description and analysis. Credit for only one of the following courses may be applied toward graduation: 101, 104, 105, 227. Credit for both 201 and 227 may not be applied toward graduation.

Stat 305. Engineering Statistics. (3-0) Cr. 3. F. S. Prereq: Math 165 or 165H. Statistics for engineering problem solving. Principles of engineering data collection; descriptive statistics; elementary probability distributions; confidence intervals and significance tests; one-, two-, and multi-sample studies; regression analysis; use of statistical software; team project involving engineering experimentation and data analysis. Credit for both 105 and 305 may not be applied for graduation.

Stat 328. Applied Business Statistics. (2-2) Cr. 3. F. S. S. Prereq: 201 or 227. Application of statistical methods to problems in business and economics; review of multiple regression; residual analysis; model building; analysis of variance; introduction to experimental design concepts; time series analysis and forecasting. Nonmajor graduate credit.

Stat 330. Probability and Statistics for Computer Science. (3-0) Cr. 3. F. S. Prereq: Math 166. Topics from probability and statistics applicable to computer science. Basic probability; Random variables and their distributions; Elementary probabilistic simulation; Queuing models; Basic statistical inference; Introduction to regression. Nonmajor graduate credit.

Stat 341. Introduction to the Theory of Probability and Statistics. (Same as Math 341) (3-0) Cr. 3. F. S. Prereq: Math 285 or 286H. Probability; distribution functions and their properties; classical discrete and continuous distributions; moment generating functions. Credit for both 341 and 447 may not be applied toward graduation.

Stat 342. Introduction to the Theory of Probability and Statistics. (Same as Math 342) (3-0) Cr. 3. S. Prereq: 341, Math 307 or 317. Theory of estimation and tests of hypotheses; regression and correlation; linear model theory and applications. Nonmajor graduate credit.

Stat 361. Quality Control. (Same as I E 361.) See Industrial Engineering. Nonmajor graduate credit.

Stat 401. Statistical Methods for Research Workers. (3-0) Cr. 4. F. S. S.S. Prereq: 104 or 105 or 201 or 227. Graduate students without an equivalent course should contact the department. Methods of analyzing and interpreting experimental and survey data. Statistical concepts and models; estimation; hypothesis tests with continuous and discrete data; simple and multiple linear regression and correlation; introduction to analysis of variance. Nonmajor graduate credit.

Stat 407. Statistical Methods for Field Biologists. (Same as I a L 4011) See Agriculture Laboratory.

Stat 402. Statistical Design and the Analysis of Experiments. (3-0) Cr. 3. F. S. Prereq: 401. The role of statistics in research and the principles of experimental design. Experimental units, randomization, replication, aliasing; analyzing experiments with completely randomized designs; factorial treatment designs and confounding; extensions of the analysis of variance to cover general crossed and nested classifications and models that include both classification and continuous factors. Nonmajor graduate credit.

Stat 403. Nonparametric Statistical Methods. (2-0) Cr. 2. Alt. F., offered 2002. Prereq: 231 or 328 or 401. Analysis of data when the dependent variable has ordinal or nominal properties; statistical inference for ranked data; Mann-Whitney and Kruskal-Wallis procedures; rank correlation; efficiency of nonparametric procedures and robustness of comparable parametric procedures. Nonmajor graduate credit.

Stat 404. Statistics for the Social Sciences. (2-2) Cr. 3. F. S. Prereq: 201 or 328. Applications of generalized linear regression models to social science data. Assumptions of regression; diagnostics and transformations; analysis of variance and covariance; path analysis. Nonmajor graduate credit.

Courses and Programs: Statistics

Stat 421. Survey Sampling Techniques. (2-2) Cr. 3. S. Prereq: 231 or 328 or 401. Methods of designing and analyzing survey investigations; simple random, stratified, and multistage sampling designs; estimation methods of estimation including ratio and regression; construction and use of sample frames. Nonmajor graduate credit.

Stat 432. Applied Probability Models. (3-0) Cr. 3. Alt. F. Offered 2001. Prereq: 231 or 341 or 447. Probabilistic modeling and the physical sciences; probability; Markov chains; Poisson and renewal processes; applications to queueing, scheduling, control, and other quantitative problems. Nonmajor graduate credit.

Stat 493. Workshop in Statistics. (1-0 or 2-0) Cr. 1 or 2. Off-campus, offered as demand warrants. Prereq: 101 or 104 or 227. Planning, executing, and interpreting experiments by understanding experimental design and using statistical methods: determination of linear models. Designed for master of agriculture program only. Nonmajor graduate credit.

Stat 495. Applied Statistics for Industry. (3-0) Cr. 3. Alt. F. Offered 2002. Prereq: 101 or 104 or 105 or 201 or 227; Math 186 or 186H. Graduate students without an equivalent course should consult the department. Statistical thinking applied to industrial processes. Assessing, monitoring and improving processes using statistical methods. Analytical/observational study; graphical displays of data; process monitoring; control charts; capability analysis. Nonmajor graduate credit.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Stat 510. Design of Experiments. (3-0) Cr. 3. F. Prereq: 511. Stulfen. Basic ideas of experimental design and analysis; completely randomized, randomized complete block, factorial, split-plot, randomization analysis; factorial experiments, confounding, fractional replication; split-plot and incomplete block designs; crossover designs.

Stat 514. Scheduling and Inventory Theory. (Same as E I 514.) See Industrial Engineering.

Stat 531. Quality Control and Engineering Statistics. (Same as I E 531) (3-0) Cr., Alt. S., offered 2003. Prereq: 401, 342 or 447. Vardeman. Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; feed- back control; analysis of mass data; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic argu- ments in industrial statistics; experimentation for process improvement.

Stat 533. Reliability. (Same as I E 533) (3-0) Cr. Alt. S., offered 2002. Prereq: 342 or 432 or 447. Meeker. Probabilistic modeling and inference in relia- bility; analysis of systems; Bayesian aspects; product limit estimators; probability plotting maximum like- hood estimation for censored data, accelerated failure time and proportional hazards regression models with accelerated life testing and repairable sys- tem data; planning studies to obtain reliability data.

Stat 535. Methods in Biostatistics. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 500, 543 or 447. Daniels. Statistical methods useful for statistical problems. Topics include analysis of ehrmic data, splitting and randomized clinical trials, techniques in the analysis of survival and longitudinal data, approaches to han- dling missing data, and meta-analysis. Examples will come from recent studies in AIDS, heart dis- ease and psychiatry and from studies to evaluate health care in the U.S. (health services research).

Stat 536. Genetic Statistics. (Same as Gen 536.) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: 401, 447; Gen 320 or BioI 301 or permission of instructor. Probability applied to genetic systems; random mat- ing, selection, mutation and migration; theory of inbreeding; effects of finite population size; basic con- cepts in quantitative genetics; prediction of progress from artificial selection.

Stat 537. Statistics for Molecular Genetics. (Same as Gen 537.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 536 or permission of instructor. Sampling designs and experimental designs to obtain information from markers for mapping and linkage analysis and haplo- segregation analysis; finding alignments and similari- ties between DNA sequences; constructing phyloge- netic trees.

Stat 538. Econometric Statistics. (Same as Econ 538.) (3-0) Cr. 3. F. Prereq: 433. Generalized linear regression, nonlinear regression, measurement error models. Simultaneous equation systems, regression equations with autoregressive errors, large sample theory.

Stat 539. Game Theory. (Same as Econ 539) (3-0) Cr. 3. F. Pre: 541 or 447. Zero-sum and bi-matrix non-cooperative two person games; games of timing; relation to mathematical programming; cooperative n-person games.

Stat 542. Theory of Probability and Statistics. (4-0) Cr. 4. F. Prereq: 431; Math 414 or 465. Sample space probability; conditional probability; Random variables, expectation, inequalities; Common theoreti- cal distributions; Joint distributions, conditional distribu- tions; Linear regression to point estimation including maximum likelihood estimation, method of moments, and Bayesian estimation; Introduction to stochastic processes with applications to Poisson Process, Brownian motion; Moment generating functions; Probability laws of transformations, sampling distribu- tions, order statistics.
Courses for Graduate Students

Stat 601. Advanced Statistical Methods. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 511; Math 514. Kaiser. This course is designed to provide students with in-depth coverage of topics from current and recent developments in statistical modeling and applications. Recent topics have included Markov Chain Monte Carlo methods for Bayesian analysis of hierarchical models, conditionally specified statistical models, complex random parameter models, and Bayesian dynamic models. Applications have included problems of monitoring air and water quality, spatial modeling of organism abundance and disease rates, and population pharmacokinetic models. Requires some programming ability to deal with computationally intensive methods.

Stat 602. Spatial Statistics. (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 511, 543. General spatial models; spatial data analysis; continuous spatial variation; geostatistics, kriging; lattice data, conditional models, joint models; image analysis; point patterns, randomness, clustering, random sets.

Stat 611. Theory and Applications of Linear Models. (3-0) Cr. 3. F. Prereq: 503 or 402 or 404, 542 or 447, a course in matrix algebra. Koehler. Statistical methods for analyzing simple random samples when outcomes are counts or proportions; measures of association and relative risk, chi-squared tests, loglinear models, logistic regression and other generalized linear models, extensions to longitudinal studies, nested designs, models with fixed and random effects. Use of statistical software: SAS or S-Plus.

Stat 621. Advanced Theory of Survey Sampling. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 511. Advanced topics of current interest in design of surveys and analysis of survey data; criteria for choice of survey strategies including sufficiency, likelihood, and admissibility; sampling methods and their role in choice of optimal strategies; review of recent literature.

Stat 622. Advanced Probability Theory. (3-0) Cr. 3. S. Prereq: 511, 542, Math 514. Athreya, Laliri, Yang. Probability spaces; Kolmogorov's existence theorem for stochastic processes; expectation; Jensen's inequality and applications; Borel-Cantelli lemmas; weak and strong laws of large numbers; convergence of moments; weak convergence of probability distributions; characteristic functions; continuity theorems; Lindeberg-Feller central limit theorem and its ramifications; conditional expectation and probability; discrete-time martingales, discrete-parameter Markov chains, Brownian motion.

Stat 643. Advanced Theory of Statistical Inference. (3-0) Cr. 3. F. Prereq: 543, 642. Lahiri, Vardeman. Sufficiency, completeness; Elements of decision theory; Bayesian paradigm of inference and theory of Markov Chain Monte Carlo; Invariance; Neyman-Pearson theory of testing hypotheses. Uniformly most powerful tests, introduction to unbiased tests, likelihood ratio tests, Wald's tests, Rao's tests; Asymptotic theory and maximum likelihood estimation and likelihood ratio tests; Asymptotic efficiency; Resampling methods.

Courses and Programs - Sustainable Agriculture 333

Sustainable Agriculture

(Interdepartmental Graduate Major)

The graduate program in sustainable agriculture is an interdepartmental major offered through faculty in ten participating departments: Agricultural and Biosystems Engineering, Agricultural Education and Studies, Agronomy, Animal Science, Anthropology, Entomology, Forestry, Horticulture, Plant Pathology, and Sociology. M.S. and Ph.D. degrees are offered within the major.

Master's students should have a bachelor's degree in one of the life, social, or engineering sciences, or a bachelor's degree plus equivalent experience in these areas. Doctoral students must have a master's degree and either an undergraduate or master's degree in one of the majors in the College of Agriculture or its equivalent.

Graduates of the program will be equipped with skills to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. To acquire these skills, students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture. The program seeks to balance specialized, disciplinary knowledge with broader, systems-level analyses. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to engaged learning. Students choose an area of specialization, and additional course work in this
area is developed via consultation with the student’s Program of Study committee.

Graduates of the program will be qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming.

Information on applications procedures, research interests of the faculty, and specific requirements of the major can be obtained from the office of Dr. Lorna Michael Butler, Henry A. Wallace Chair for Sustainable Agriculture, 110 Curtiss Hall, or from the following Internet address: http://www.sust.ag.iastate.edu/gosa.

### Courses for Graduate Students

**SusAg 509. Agroecosystem Analysis.** (Same as Agron 509, Anhtr 509, Soc 509.) (3-0) Cr. 3. SS. Prereq: 6 credits in social sciences, 6 credits in natural, biological or engineering sciences and senior or above classification. Field study of commercial farming systems within the context of global energy flows and biogeo-chemical cycles, including ecological, agronomic, and social perspectives.

**SusAg 530. Ecologically Based Pest Management Strategies.** (Same as Agron 530, Ent 530, PI P 530.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 509. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

**SusAg 546. Organizational Strategies for Diversified Farming Systems.** (Same as Agron 546, Hort 546, Soc 546.) (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 509. The day-to-day operation and social relations of the complex, diversified, and sustainable farm. Family farm dynamics and goal setting. Cooperation between farmers. The social relations of alternative marketing, including green labeling, community supported agriculture, farmers’ markets, and relationships marketing.

**SusAg 599. Creative Component.** Cr. Var. F.S.S. Pre-enrollment contract required. Advanced topic for creative component report in lieu of thesis.

**SusAg 600. Sustainable Agriculture Colloquium.** (1-0) Cr. 1. F.S. Weekly seminar for graduate students in the Sustainable Agriculture program.

**SusAg 610. Society and Technology in Sustainable Food Systems.** (Same as A E 610, Anhtr 610, Soc 610.) (3-0) Cr. 3. Alt. S., offered 2003. Prereq: 509. Social and technological dimensions of sustainability in food systems. Emphasis on strategies and ethics for evaluation existing and emerging options.

---

### Systems Engineering

(Interdepartmental Graduate Major)

**Supervisory Committee:** D. Gemmill (Chair), D. Flugrad, E. Jones, A. Mann, G. Sheble.

Work is offered for the master of engineering with a major in systems engineering. The graduate major in Systems Engineering is both an on- and off-campus program. It is an interdisciplinary program that allows students to take courses across a variety of departments. Graduates of the program will possess the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. They will have the ability to work across disciplinary boundaries, as the practice of modern engineering often requires. Graduates will have developed management capabilities and extended their disciplinary knowledge.

The program is broadly based and uses courses in the various departments of the College of Engineering and courses in other departments of the university. The 30 credits necessary for graduation includes 27 semester credits of formal coursework and 3 credits for a creative component. Completion of the program requires two courses in systems engineering, two courses in the major discipline of the student, three engineering courses with a systems engineering emphasis, two courses outside of the college, and a creative component. Courses are delivered to off-campus students both with the instructor present and through various distance education systems, including the Iowa Communications Network (ICN), satellite transmission, and videotape.

The program of study committee, in consultation with the student, determines the courses to be taken and the acceptability of transfer credits. The major professor should be selected from the discipline where a concentration of coursework will be taken.

Admission to the program requires a baccalaureate degree in engineering and admission to the graduate college. Students with degrees in other areas will be considered on an individual basis. The degree awarded is a Master of Engineering in Systems Engineering.

For additional information students should contact the Chair of the Supervisory Committee, 2019 Black Engineering Building, ISU, Ames, Iowa 50011.

---

### Teacher Education

**Walter H. Gmelch, Director, Teacher Education and Dean, College of Education**

All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the teacher education program and be recommended by the College of Education. An undergraduate seeking a bachelor’s degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located. Students already holding a bachelor’s degree should consult with the coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

### Admission to Undergraduate Teacher Education Program

A student seeking admission to a teacher education program must be accepted by a selection committee for the specific program which the student seeks to enter. Factors considered in evaluating applications include scholarship, interest in teaching, character, and physical and mental health. Recommendations by selection committees must be confirmed by the University Teacher Education Committee before admission to the program in teacher education is granted.

Students may apply as early as four semesters before the one in which they plan to enroll for student teaching; however, they must be fully admitted into the Teacher Education Program by mid-semester prior to their planned students teaching semester. Requirements for full admission to the Teacher Education Program are:

1. A minimum 2.5 cumulative grade point average that must be maintained through graduation to be recommended for licensure.
2. One of the following:
   —Minimum ACT composite of 19.
   —Minimum SAT I composite score of 910.
   —PPST subtest scores in reading, writing and mathematics of 172, 172, and 170 respectively.

Details regarding the dates and fees for any of these tests are available in the Testing Office in Student Counseling Services.

3. Documented completion of 10 hours of pre-student teaching field experience.

### Student Teaching

Student teaching is the culminating experience to the teacher preparation program at Iowa State University. To ensure that students are prepared for this experience, the following requirements must be met prior to student teaching:

1. Full admission to the teacher education program by mid-point of the semester prior to the semester when student teaching is planned.
2. A passing grade must have been earned in all required professional teacher education
courses (see The Professional Teacher Education Requirement).
3. Completion of the student teaching application for any license, may be obtained from the Education Student Services Office in the College of Education.

The General Education Requirement
All prospective teachers are required to complete a program in general education which is integrated with their professional preparation and extends through the undergraduate curriculum.

The student is expected to complete studies in five groups in general education. Usually, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

All students must satisfactorily complete at least one credit of pre-student teaching laboratory experience. This requirement may be met through a pre-student teaching course (e.g. C I 280) or, in certain subject areas, a course designated to provide an equivalent experience.

The Professional Teacher Education Requirement
As part of a total educational program, the prospective teacher must complete certain studies related directly to the profession of teaching. All students in teacher education must take the following courses prior to student teaching: (See college department for appropriate course)

The Requirements for Areas of Specialization
A teacher must also be competent in the area of a teaching specialization. For instance, certain competencies are required of those who would teach at the prekindergarten-Kindergarten or the elementary level. Those preparing to teach at the secondary level must develop a depth of understanding in one or more subject matter areas.

For full-time teaching in secondary schools an approved subject matter concentration of at least 30 semester hours is required. Additional subject matter areas, usually consisting of 24 semester hours each, are possible but not required. Students interested in adding a second subject area should consult with the coordinator of the area.

The additional courses required by specific teaching areas are:

Agricultural Sciences and Agribusiness
See Curriculum, Agricultural Education.

Art
See Curriculum, Art Education, Department of Art and Design, B.F.A.
Biology
Coordinator: Warren Dolphin

Students seeking approval to teach biology must earn 13 credits in chemistry, 8 in physics, and at least 6 in mathematics, and take the following biological courses: Biol 201, 201L, 202, 202L, 301, 301L, 302, 303, 302L, and 312.

Bot 306
Micro 202
Zool 355

Seven additional credits at the 300 level or above in a basic biological science. A course emphasizing concepts in biotechnology is recommended, but not required.

Students who have begun their biological science program under earlier catalogs need to see the science teaching adviser if they have questions.

Chemistry
Coordinator: Thomas Greenbowe

Students seeking approval to teach chemistry must earn credits in the following courses:

General chemistry 177, 177L, 178,
Analytical chemistry 210 or 211, 211L, 316, and 316L
Organic chemistry 331, 331L, 332, 332L
Inorganic chemistry 301
Physical chemistry 321, 321L, 322
Math 165, 166
Phys 221 and 222 or 111 and 112

A minimum of one course in biology is required. The recommended course is Biol 201, 201L.

Students with an endorsement in a natural science who seek approval to teach chemistry as an additional area must earn credits in the courses below (15 minimum credits):

Chem 177, 177L, 178, 178L, 211, 211L, 331, 331L, 332, 332L

or

Chem 163, 163L, 164, 164L, 211, 211L, 231, 231L

Students with no natural science endorsement who seek approval to teach chemistry as an additional area must complete one of the two sets of courses listed above plus sufficient additional courses to total 24 chemistry credits, chosen from:

Chem 316, 316L, 301, 321, 322, 321L

or

BBMB 301, 320, 311, 451

In addition, students are required to take the physical science teaching methods course LAS 492.

Coaching Interscholastic Athletics
Coordinator: Rich Engelhorn

Students seeking approval for the Iowa State University endorsement to coach interscholastic athletics must:

a. Satisfy the professional teacher education requirements of the College of Education.

b. Satisfy the requirements of a teaching specialization area.

c. Earn credits in the following: Zool 155; EX SP 220, 258, 355 (Prereq: Phys 106 or 111), 315, 358 (Prereq: Zool 150), 365.

Curriculum and Instruction
Early Childhood Education. See Curriculum, Curriculum and Instruction or Human Development and Family Studies.

Elementary Education. See Curriculum, Curriculum and Instruction.

Earth Sciences
Coordinator: Kenneth Windom

Students seeking approval to teach earth sciences must earn credits in the following courses:

Geol 100, 100L, 102, 102L, 302, 305, 311, 356, 365, 368, 480
Mteor 206
Astro 120, 150
Chem 177, 177L, 178, 178L
Phys 111, 112; or 221, 222
Math 151 or 160 or 165
Corn S 107

and one course in biology.

Students with an endorsement in a natural science who seek approval to teach earth sciences as an additional area must earn credits in the following courses:

Geol 100, 100L, 102
Mteor 206
Astro 120, 150
Courses 300 or above—3 credits

Students with no other natural science endorsement, but who seek endorsement in this area, must take the listed courses plus additional credits in this area to give a total of 24. See area coordinator for approval prior to taking courses.

English
Coordinator: Robert Tremmel

Students seeking endorsement to teach English (7-12) must earn 58 credits in the following courses:

Distributed Requirements:

12 English Studies: 199 (required, but no credit); 219; 260; 310; 339 or 350

3 Classical Studies: CI St 353

6 British literature (selected from 370, 373, 374, 375, 376, 377, 378, 379)

6 American literature (selected from 360, 361, 362, 363, 364)

3 Any literature course

3 Women’s and/or minority literature (selected from 340, 345, 346, 347, 348, 349, 353, 354),

22 English Education: 220, 394; 420; 392 (C I 280 for 2 cr. must be taken concurrently with 392); 494 (C I 280 for 2 cr. must be taken concurrently with 494); 1 395

Students seeking to add English as an additional endorsement area must earn 43 credits in the following courses:

9 English Studies: 220, 260, and 310

3 British literature (selected from 370, 373, 374, 375, 376, 377, 378, 379)

6 American literature (selected from 360, 361, 362, 363, 364)

3 Any literature course

3 World, women’s, or minority literature (selected from 340, 345, 346, 347, 348, 349, 353, 354)

16 English education 394; 392

(C I 280 for 2 cr. must be taken concurrently with 392); 494 (C I 280 for 2 cr. must be taken concurrently with 494); 1 395

English as a Second Language
Coordinator: Roberta Vann

To add a K-12 teaching endorsement in English as a Second Language, students must fulfill the certification requirements in a major subject area and complete twenty-four semester hours in ESL.

Those twenty-four hours must include Eng 518 and 588. In addition, students must take at least one course in each of the following areas. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites. Teaching ESL: Engl/Ling 524, 525, 528

Applied Linguistics: Engl/Ling 220, 419/516, 519, 526

Language in Culture: ComSt 310; Anthr/Ling 309, 500; Engl 344, 349, 549, Span 320.

Bilingual Education: Engl/Ling 514

Nature of Language: Engl/Ling 219, 420, 511, 512, 527

Process in Language Acquisition: Engl/Ling 425, 517

Family and Consumer Sciences
Coordinator: Donna Cowan

See Curriculum, Family and Consumer Sciences Education, Teacher Licensure option.

Foreign Languages and Literatures
Coordinator: Linda Quinn Allen

Students seeking approval to teach a foreign language must earn at least 34 credits in that one foreign language which must include the courses indicated below for that language. Licensure, full or restricted, also requires Foreign Language 487.

French: 301, 302, 305, 321 or 331, 322 or 332, 401.

German: 301, 302, 305, 330, 340, 4 credits from 471 or 472.

Spanish: 301, 303, 314, 320 or 326, 401, 403; 6 credits from 321, 322, 330, 331, 332.
Students seeking approval to teach one of the above foreign languages as an additional area must earn 25 credits in that language; 9 of these credits must be at the 300 level or above with 6 of these credits in composition and conversation at the 300 or 400 level. In Latin 10 credits must be at the 300 or 400 level and Hist 403 (CI St 403) is required. F Lng 487 is also required for this licensure.

Students seeking approval to teach Greek or Portuguese as an additional language must take 25 credits in the language; 9 of these credits must be 300 level courses or above. Endorsement in Greek also requires History 402. F Lng 487 is also required for this licensure.

**Economics**: Econ 101 and 102, and credits as needed from 301 or 302, 312, 320, 321, 344, 353, 355, 370, 376, 415.

**Geography**: Select one course from each group: 1) Intro to Geog* or Anthr 306; 2) Political Geog* or Anthr 201; 3) Anthr 202; 4) Urban Geog* or Anthr 311 or 323 or 325 or 326; 5) EnSci 101 or 330 (*Geography courses are not available at ISU - see history/social science coordinator for available options).

**Psychology**: 101, 301, 440 and six additional credits except Psych 230 and 333.

**Sociology**: Soc 130 or 134 and credits as needed from 201, 235, 302, 305, 310, 327, 330, 331, 340, 345, 377, 380, 381, 401, 411, 415, 420, 425, 435, 461, 473, 484, 485.

United States History Credits as needed with at least two courses from groups 1 and 2 and one course from group 3.

Group 1: 221, 351, 450, 451, 454, 455, 462, 464, 465, 467.

World History Credits as needed with at least one course from each group.

Group 1: 201, 304, 325, 401, 402, 403, 404, 405, 406, 408.

Students who have approval in other subjects and who wish additional approval to teach a specific area of the social studies must take LAS 493 and complete 24 semester credits in the area of approval or 15 semester credits in an approval area plus 15 semester credits from one additional area or distributed from other social studies areas.

**Human Development and Family Studies**

Early Childhood Education. See Curriculum, Human Development and Family Studies or Curriculum and Instruction.

**Mathematics**

Coordinator: Janet Sharp

Students majoring in mathematics and seeking approval to teach mathematics as a primary endorsement must take the following:

One of the following sequences: Math 165, 166, 201; or 175, 176.

Math 265, 266 or 267, 301, 302 or 307 or 317, 304 or 341, 365, 414, 435, 436, 489, 497.

Com S 107 or 207 or 227.

Students wishing to add mathematics as an additional endorsement area or as a non-mathematics major seeking a license to teach mathematics must take the following:

**Courses applicable in specific areas**

Anthropology: Anthr 201, 202, 306 or 309, 307 or 308, and any other Anthr course.

**Courses and Programs**

Teacher Education 337

One of the following sequences: Math 165, 166, 201; or 175, 176.

Math 266 or 267, 301, 304 or 341, 302 or 307 or 317, 414, 435, 436, 489, 497.

Com S 107 or 207 or 227.

**Music**

Coordinator: Sylvia Munsen

Students seeking approval to teach music must earn credits in the following courses:

Music 327, 359A, 360, 367 and 465, and 3 credits of music theater or opera studio are required for students planning to teach vocal music.

Music 350, 351, 352, 353, 354, 356, 358B, 464, and either 368 or 369 are required for students planning to teach instrumental music.

**Physical Education**

See Curriculum, Exercise and Sport Science, Physical Education Licensure.

**Physical Sciences**

Coordinators: Thomas Greenbowe, David Meltzer

Students seeking approval to teach physical sciences must earn credits in the following courses:

Astro 120, 150; or 342, 346
Chem 163, 165L, 231, 231L
Geol 100, 100L
Mteor 206
Phys 111, 112; or 221, 222
Biology: one course
Math 151 or 160 or 165

Three credits from courses numbered 300 and above in astronomy and astrophysics, chemistry, meteorology, physics, and geology.

Students with an endorsement in a natural science who seek approval to teach physical sciences as an additional area must earn credits in the courses listed below. Students with no other science endorsement, but who seek an endorsement in this area, must take the listed courses plus additional credits in the area to yield a total of at least 24. See area coordinator for approval prior to taking additional courses.

Astro 120 or 150 or 342 or 346
Chem 163, 165L
Geol 100, 100L
Mteor 206
Phys 111, 112; or 221, 222

**Physics**

Coordinator: David Meltzer

Students seeking approval to teach physics must earn credits in the following courses:

Phys 221, 222, 311T, 399 (2 cr), 321 or 324, and at least 12 credits from Phys 302, 304, 306, 310, 321L, 322, 322L, 361, 364, 365, 396; Astro 342, 344L, 346; Chem 321, 322; E E 205, 235, 441; E M 274, 301, 348, 378; M E 330, 331.
Students with an endorsement in a natural science who seek approval to teach physics as an additional area must complete one of the following sets of courses:

Phys 221, 222, 311T, 321, 321L, 399 (2 cr.); or Phys 111, 112, 302, 311T, 399 (2 cr.)

Students with no other natural science endorsement who seek approval to teach physics as an additional area must complete one of the two sets of courses listed above plus sufficient additional credits from the following list of courses to total 24 credits:

Reading (K-6; 7-12)
Coordinator: Donna Merkley

Students seeking endorsement to teach reading (7-12) as an additional area must earn credits in the following courses: Engl 219, 394; Engl 302 or 304 or 305 or 306 or 404 or 405; C I 378, 396, 396, 478. Students seeking reading approval for grades K-6, see elementary education adviser.

Speech Communication
Students seeking approval to teach speech must earn credits in the following courses: CmDis 275; ComSt 102; Sp Cm 110, 212, 305, 313, 322, 412, 495A, 495B; Thrte 255 or 360, 358, 455; Jl MC 101.

Advisers for Areas of Specialization in Teacher Education

Persons interested in teaching in one of the following areas should consult with the appropriate individual. Details of each area will be found in the appropriate departmental section.

Community College—Laura Ebbers (Arts and Sciences), John Van Ast (Applied Science and Technology/Vocational-Technical)

Elementary Education—Al Campbell, Kate Shafer, Denise Zumbach

Early Childhood Education—Al Campbell (College of Education), Patricia Walsh (College of Family and Consumer Sciences)

Special Education—Geoffrey Abelson

Talent and Gifted—Gary Phye

Secondary Education

Agricultural Sciences/Agribusiness Education—Gregory S. Miller
Art—Dennis Dake
Biology—Warren Dolphin, Mike Clough
Chemistry—Thomas Greenbowe
Coaching Interscholastic Athletics—Rich Engelhorn
Earth Sciences—David Meltzer, Mike Clough
English—Robert Tremmel
English as a Second Language—Roberta Vann

Family and Consumer Sciences Education and Studies—Mary Gregoire
Foreign Languages—Linda Quinn Allen
General Science—Michael Clough, Thomas Greenbowe
Health Education—Frank Schabel
History and Social Sciences (economics, sociology, government, geography, and history)—Clair Keller
Mathematics—Janet Sharp, Richard Tondra
Music—Sylvia Munsen
Physical Education—Katherine Thomas
Physical Sciences—Mike Clough, Thomas Greenbowe, David Meltzer
Physics—David Meltzer
Reading—Donna Merkley
Speech Communication—

Technology and Social Change

Advisory Committee: Eric Abbott, coordinator; Karl Gwiasda, undergraduate coordinator; Robert Mazur, graduate coordinator.

Undergraduate Study

Technology and social change is a cross-disciplinary program examining the relationships between technologies and the social and cultural environments in which they operate. The program has a national and international perspective, with courses addressing the interrelationships, policies, and impacts created by the international exchange of technologies. Through T SC, students will better understand the institutional and sociocultural consequences of technological change from differing perspectives and will become sensitive to the issues attending the use of technology to improve people’s lives. Work in the program can also serve as preparation for advanced study in this field.

The program requirement for a minor in technology and social change is a minimum of 15 credit hours. One of the courses must be T SC 341. An additional 3 credits must be taken from T SC cross-listed courses. The remaining 9 may be selected from T SC cross-listed courses or from the list of T SC approved courses. At least 9 of the 15 credits must be in courses numbered 300 or above. Because technology and social change is an interdisciplinary study, minor programs must include coursework in at least two departments. Students seeking a minor should develop a specific program of courses either with the T SC faculty representative in their department or with the T SC undergraduate coordinator. The student’s minor program must be approved by the T SC program coordinator.

T SC courses are listed below. The list of T SC approved courses is available from the program coordinator. Through the program coordinator, students may petition for approval of courses not on the approved list that address matters relevant to technology and social change.

Graduate Study

The graduate minor in technology and social change is a cross-disciplinary program that enables students to study the interactions between technologies and their users, on both societal and individual levels. The minor strengthens the ability of students to apply differing perspectives in understanding the effects of the global exchange of technologies and to heighten their sensitivity to the institutional and sociocultural issues attending the use of technology to improve people’s lives.

Students choosing to minor in technology and social change will pursue a degree program in the major department. In consultation with their major professor, students are to identify a T SC faculty member to serve on the committee guiding their program of study. This T SC faculty member must be on the Graduate faculty and must be from a discipline outside the major field of study. With the agreement of the POS committee, the student declaring a minor in T SC will select a group of courses from the list of T SC approved courses available through the program coordinators. For the master’s degree, this group should be at least 9 credit hours; for a doctoral degree, the group should be at least 15 credit hours. In either case, T SC/Soc 541 is required. Students may not include in their minor any courses from their own major. All programs of study that include a T SC minor must be approved by the T SC Program coordinator.

Courses open for nonmajor graduate credit: 342, 343.

Courses Primarily for Undergraduate Students

T SC 341. Technology: International, Social, and Human Issues. (3-0 Cr. 3. F. Prereq: Junior classification. An interdisciplinary study of the international significance of technology and of the societal and human issues attending its development and adoption.

T SC 342. World Food Issues: Past and Present. (Same as Agron 342.) See Agronomy. Nonmajor graduate credit.

T SC 343. Philosophy of Technology. (Same as Phil 343.) See Philosophy. Nonmajor graduate credit.

T SC 474. Communication Technology and Social Change. (Same as Jl MC 474.) See Journalism and Mass Communication.

T SC 490. Independent Study. Cr. var. Prereq: 341, permission of instructor and of T SC coordinator.

Courses Primarily for Graduate Students, Open To Qualified Undergraduate Students.

T SC 541. Technological Innovation, Social Change, and Development. (Same as Soc 541.) See Sociology.

T SC 574. Communication Technologies and Societies. (Same as Jl MC 574.) See Journalism and Mass Communication.

T SC 590F. Special Topics: Technology and Social Change. (Same as U S St 590F.) Cr. var. Prereq: 541, permission of instructor and of T SC coordinator. Individual study of topics concerning global and local implications of technological change.
Courses for Graduate Students
T SC 640. Seminar in Technology and Social Change. (Same as U ST 640.) Cr. var. Prereq: 541. Consideration of global issues and consequences arising from technological change. Specific topics vary each time offered.

Textiles and Clothing
Mary Gregoire, Chair of Department

University Professors: Farrelli-Beck
Professors: Gregoire, Littrell, Stone

Distinguished Professors (Emeritus): Winakor

Professors (Emeritus): Burnet, Danielson
Associate Professors: Damhorst, Fiore, Kadolph, Kunz, Miller

Associate Professors (Emeritus): Brackelsberg, Kudel

Assistant Professors: Campbell, Parsons

Assistant Professors (Adjunct): Glock

Instructors (Adjunct): Fratzke

Undergraduate Study
The department offers study for the degree bachelor of science with a major in apparel merchandising, design, and production. The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, design and production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the department provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to the development and use of apparel and textile products by individuals, families, and institutions. The program can be used as a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, with special attention to human concerns for protection and comfort, health and safety, aesthetic expression, and communication. They are prepared to plan, develop, and present textile and apparel products to meet the needs of consumers. They understand the issues involved in textile and apparel production and marketing, both nationally and internationally. Graduates appreciate the interdependence of nations and cultures as producers and consumers of textile products.

The major in apparel merchandising, design, and production (AMD) provides a broad-based program of study with flexibility in creating an individualized program option. Courses are required in the following groups: general education, family and consumer sciences core, and the AMD core. To complete the program, a student combines structured clusters of courses to form an option in merchandising, design, or production.

An option in merchandising prepares students for the planning, development, and presenta-
tion of market-oriented product lines. Career opportunities are in product development, buying, promotion, and management in both manufacturing and retailing sectors of the textile and apparel industry.

An option in apparel design is appropriate for those interested in the aesthetic, creative, and technical aspects of design, product or line development, or promotion of textiles and apparel.

An option in production prepares students for positions related to apparel engineering, plant management, quality assurance, costing, production development, sourcing, and buying piece goods or trim for apparel manufacturing or retailing firms.

In addition, a student selects a secondary option from the other primary options or from business, consumer behavior/marketing, creative design, history/theatre costume, human relations/communications, international trade, quality assurance, or technical design. The combinations of primary and secondary options allow students to individualize their programs.

The department offers a minor in apparel merchandising, design, and production. The minor can be earned by taking T C 131 or 165; 204; 225, 231, or 245; 6 credits at the 300-400 level; for a total of 15 to 17 credits. Also available is an apparel merchandising, design, and production designated area of concentration combined with a major in journalism and mass communication in the College of Liberal Arts and Sciences; see department for details.

Graduate Study
The department offers the degrees master of science; master of business administration; master of arts in liberal studies; master of arts in museum studies; master of education in occupational and technical education; master of education in teacher education; master of business administration in health care management; master of science in technology and social change. Program emphases for graduate study include business, consumer behavior/marketing, creative design, history/theatre costume, human relations/communications, international trade, quality assurance, or technical design. The combinations of primary and secondary options allow students to individualize their programs.

Graduates accept positions relevant to their academic experience. All doctoral graduates have teaching experience. Masters and doctoral graduates have experience working in team-oriented and interactive environments.

Graduates are prepared to adapt to future changes in their professions and to provide leadership in professional and public practice. They bring a strong sense of ethics, research, teaching, and business endeavors.

Program emphases for graduate study include consumer behavior; entrepreneurship; craft marketing; merchandising and marketing aspects of textiles and clothing; acquisition and use of textiles and apparel within cultures; U.S. costume and textiles of the 19th and 20th centuries; textiles; social/psychological aspects of dress; aesthetics; product quality and development; textile conservation; and computer-aided design.

The department participates in the interdepartmental minor programs of gerontology and housing.

Courses open for nonmajor graduate credit: 354.

Courses Primarily for Undergraduate Students
T C 121. Apparel Assembly Processes. I-4 Cr. 3. F.S. Principles of garment assembly. Use of mass production equipment and methods to develop and assemble garments.

T C 135. Appearance in Society. 3-3 Cr. 3. F.S. Social science approaches to understanding clothing and appearance in contemporary U.S. society. Examination of diversity among consumers and forecasting future trends in consumer behavior.

T C 231. Apparel Manufacturing. 3-2 Cr. 4. F.S. Prereq: 204, 204. Analysis of apparel manufacturing processes, product development, sourcing, and production. Focus on specifications relative to quality, performance, and cost.

T C 245. Aesthetics of Apparel. 2-0(3) Cr. 2. F.S. Prereq: 131, 165. Analysis of multisensory aesthetic aspects of apparel products and promotional settings affecting the consumer.

T C 245L. Aesthetics of Apparel Laboratory. 0-6 Cr. F.S. Prereq: 131, 165, 245 or concurrent enrollment. Computer-aided design applied to analysis, development, and presentation of textiles and apparel.

T C 278. Fashion Illustration. 0-6 Cr. 3. F.S. Prereq: 131, 245, Art 108 or 130. Drawing the fashion figure and apparel using mixed media and computer-aided design. Studies and compositions appropriate to advertising, fashion presentation, and portfolio development. Survey of historical and contemporary fashion artists.
Courses and Programs

T C 331. Apparel Engineering and Management. (2-3) Cr. 3. S. Prereq: 231; Com S 103; T C 121 recommended. Procedures and experiences related to method analysis, work measurement, costing, and production planning; resource management, technology applications, and quality assurance.

T C 342. Aesthetics of Everyday Experience. (3-0) Cr. 3. S. Design concepts and philosophies applied to everyday living. Influence of individual differences and cultural patterns on aesthetic preferences.

T C 354. History of European and North American Costume. (3-0) Cr. 3. Offered F. 2001; S. 2003. Prereq: 204; 3 credits from Hist or A rt H. Clothing and adornment of women, men, and children in the Ancient Near East, Egypt, Europe, and the United States, from prehistoric times to present; social, economic, technological, and cultural context of costume. Nonmajor graduate credit.

T C 355. History of Asian Costume. (Dual-listed with 555.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 204; 3 credits from Hist or Art H. Clothing and adornment of men, women, and children in selected countries of Asia, from antiquity to the early 20th century; includes Turkey, Iran, China, Japan, Korea, and Indonesia.

T C 362. Cultural Perspectives in Clothing and Textiles. (3-0) Cr. 3. S. Prereq: 165 or 3 credits in anthropology, psychology, and sociology. Analysis of multiple factors related to clothing and textiles in selected societies, including technology, aesthetics, social organization, ritual, stability and change. Application to apparel design.

T C 375. Merchandising. (Dual-listed with 575.) (3-0) Cr. 3. F. Prereq: 165; Com S 103, 3 credits in Math; junior classification. Principles of merchandising as applied in manufacturing and retailing business organizations. Study of planning and development of primary apparel and related product lines.

T C 375L. Merchandising Analysis. (1-0) Cr. 1. F. Prereq: Credit or concurrent enrollment in 375. Interpretation of financial results of merchandising decisions based on computer simulation.

T C 376. Merchandise Planning and Control. (3-0) Cr. 3. S. Prereq: 165. Theories and procedures in planning, sourcing, and controlling retail inventories for the profitable management and operation of apparel and related product lines. Computer applications in strategic retail management.

T C 380. Field Study. Cr. 2. May be repeated. F.S.S.S. Prereq: 9 credits in textiles and clothing, junior classification. Permission by application. Study of and tours to textile mills, apparel manufacturers, design studios, showrooms, markets, retailers, museums, testing laboratories, trade seminars and exhibitions and other areas of interest within the textile and apparel industry.

T C 398. Cooperative Education. Cr. R. F. S. Prereq: Permission of department executive officer; junior classification. Credit required of all cooperative education students. Students must register for this course prior to commencing each work period.

T C 404. Textile Science II. (Dual-listed with 504.) (3-0) Cr. 3. Alt. S.. , offered 2003. Prereq: 204, 245; one course in natural sciences select from group. Theories and principles of textile science; emphasis on fiber, dye, and detergent chemistry. Examination of product failure, current research, and environmental impact.

T C 411. Seminar on Current Issues. Cr. 1 to 3 each time taken. Prereq: Senior classification; 12 credits in textiles and clothing. Trends and issues in textiles and apparel.

T C 467. Consumer Behavior and Apparel. (Dual-listed with 567.) (2-2) Cr. 3. F. Prereq: Stat 101 or 222; T C 165 or 3 credits in marketing, psychology, and sociology. Application of concepts and theories from the social sciences to the study of consumer behavior toward apparel and adornment. Experience in conducting research.

T C 470. Supervised Experience. Cr. 2 to 6. F.S.S.S. Prereq: Minimum 2.0 GPA; permission by application; junior or senior classification. Supervised work experience with a cooperating firm in merchandising, design, manufacturing, product development or quality assurance.

T C 504. Textile Science II. (Dual-listed with 404.) (3-0) Cr. 3. Alt. S.. offered 2003. Prereq: 204, 245; one course in natural sciences select from group. Theories and principles of textile science; emphasis on fiber, dye, and detergent chemistry. Examination of product failure, current research, and environmental impact.

T C 510. Foundation of Scholarship in Textiles and Clothing. (2-0) Cr. 2. F. Prereq: Graduate classification. Overview of research in textiles and clothing with emphasis on current and future directions and interdisciplinary nature of the field. Introduction to theory and model building.

T C 545. Interdisciplinary Approach to Aesthetics of Textiles and Clothing. (3-0) Cr. 3. Alt. F., offered 2001. Prereq: Undergraduate course in design elements and principles. Examination of aesthetics theory from an interdisciplinary perspective. Emphasis on theory from disciplines outside textiles and clothing. Discussion of implications for development and promotion of apparel products and promotional settings.

T C 555. History of Asian Costume. (Dual-listed with 355.) (3-0) Cr. 3. Alt. F.. offered 2002. Prereq: 2 credits from Hist or Art H. Clothing and adornment of men, women, and children, in selected countries of Asia, from antiquity to the early 20th century; includes Turkey, Iran, China, Japan, Korea, and Indonesia.

T C 562. Dress and Culture. (3-0) Cr. 3. Alt. F., offered 2002. Prereq: 362 or 6 credits in social science or cultural anthropology. Analysis of dress as artifact, behavior, and symbol in selected cultures.

T C 564. Clothing Consumption. (3-0) Cr. 3. Prereq: Econ 101, Stat 101 or 227. Theories of clothing consumption; factors affecting family expenditures and levels and standards of consumption for clothing and household textiles.

T C 567. Consumer Behavior and Apparel. (Dual-listed with 467.) (3-0) Cr. 3. Alt. F., offered 2002. Prereq: Stat 101, T C 165 or 3 credits in marketing, psychology or sociology. Application of concepts and theories from the social sciences to the study of consumer behavior involving apparel and adornment. Experience in conducting research; grant proposal and manuscript writing.

T C 570. Practicum in Textiles and Clothing. Cr. 1 to 3. F.S.S. Prereq: 7 graduate credits in textiles and clothing, permission by application. Supervised experience related to career objective. Proposal must be approved semester before placement.

T C 590. Special Topics. Cr. arr. Prereq: Permission of department executive officer and instructor(s). Individually designed textile and clothing related projects that reflect the special interests of the student.

Courses for Graduate Students

T C 611. Seminar. Cr. 1 to 3 each time taken. Prereq: 6 graduate credits in textiles and clothing, permission of instructor. Discussion of scholarship and current issues. Topics vary.

T C 665. Social and Psychological Theories of Appearance. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: 467 or 6 credits in sociology or psychology. Analysis of social science theories and concepts applicable to clothing and appearance research.

T C 690. Advanced Topics, Cr. arr. Prereq: Enrollment in doctoral program, permission of instructor, and approval of department executive officer.

T C 699. Research.

Theatre and Performing Arts

www.theatre.iastate.edu

(Administered by the Department of Music)

Undergraduate Study

Students interested in theatre as a major area of concentration declare a major in Performing Arts and select an emphasis in Theatrical Design or Acting/Directing. Students implement the theories and principles explored in the classroom by participating in production work. During the academic year, Iowa State University Theatre presents up to ten main-stage and second stage productions in Fisher Theater, and works in close collaboration with ISU Music and Dance.

The major in Performing Arts offers the undergraduate student a cross-disciplinary concentration in Music, Dance and Theatre. The core curriculum consists of 25 credit hours in the three areas. Students elect a 24 credit hour emphasis in either Dance, Theatrical Design or Acting/Directing. In addition to coursework, all Performing Arts majors and minors participate in concert (Orchesis, Footfalls), workshop (Opera Studio, Minority Theatre Workshop) and production (Barchje, Stars Over Veishe, ISU Theatre/Music Theatre/Second Stage and Studio) experiences.

Performing Arts students, in addition to a solid theoretical and experiential background in the areas of performance, theatrical design, dance and music, are prepared to meet the challenges of the work force or graduate school with their strengths in collaboration, creative problem solving, meeting deadlines and processing diverse input to yield cohesive output. Two required professional internships prior to graduation are vital to the student’s appreciation and practical understanding of the rigor of the field.

The theatre area offers a wide variety of courses. Students may select from a core of courses in acting, design (costume, scenic, lighting/sound), make-up, stage direction, stage management, and theatre history. Independent study and special topics courses supplement formal course offerings to provide opportunities to intensify study in a particular aspect of theatre.

Auditions for ISU Theatre productions are open to all students irrespective of academic major. Similarly, participation in areas of production other than acting is open to both majors and nonmajors. Qualified students also present experimental, laboratory, and Minority Theatre Workshop productions. Student actors, directors, designers, and technical crew heads are required to maintain a grade point average of at least 2.0 to participate in productions.

Theatre scholarships are awarded on a yearly basis to students who make significant contributions to Iowa State University Theatre.

Bachelor of Arts - Performing Arts Major (Perf)

The Core for the Performing Arts Major (25 cr)

(Perf)

Music 100, 102, 127
Dance 120--Modern Dance I, 130--Ballet I, 220--Modern Dance Composition
Dance 270--Dance Appreciation
Thrt 255, 263, 365
Perf 105--(six semesters), Perf 310 (2), Perf 401
Emphasis in Theatrical Design (24 cr)
Thrt 250 (2 cr), 360, 366, 455, 461, 465, 466, Music 133
Emphasis in Dance (24 cr)
Art 292, Music 133, Ex Sp 355
Dance 222, 224 (2 cr), 232, 360, 370
Select 2 credits from: Dance 140, 150, 160, 170, 211 (instead of 160, 170)
Select 2 credits from: Dance 223, 233, 242, 243, 262
Select 3 credits from: Dance 320, 384, 385, 386

All students enrolled in the Dance Emphasis must register for one dance technique course every semester of residence up to a total of 8 credits and must complete one computer course (Com S 103, 107, 207, CI 210). Emphasis in Acting/Directing (24 cr)
Thrt 151, 250 (2 cr), 251, 351, 451, 455, 465, 466
Music 133
Minor in Performing Arts (21 cr)
Perf 105 (three semesters)
Music 100, 102
Dance 120 or 130, 270
Thrt 255, 263 or 251
plus six credits 300+ in Dance, Thrt or Perf

Graduate Study

The department offers graduate courses as supporting work in other fields.

Courses open for nonmajor graduate credit:
Thrt 316, 465, 466; Perf 401.
Performing Arts

Courses Primarily for Undergraduate Students

Perf 210. Performing Arts Internship. Cr. R. F.S.S.S. Related to performing arts majors. A job or internship with a professional or semi-professional performing arts organization.

Theatre

Courses Primarily for Undergraduate Students

Thetre 106. Introduction to the Performing Arts. (3-0) Cr. 3. F.S.S.S. An audience oriented, broad-based, team-taught survey of the performing arts which emphasizes theatre and includes segments on television, radio, film, dance, and music.

Thetre 110. Theatre and Society. (3-0) Cr. 3. F.S.S.S. An introduction to Theatre focusing on its impact on society from the Greek to modern times. Particular emphasis on the contemporary world theatre.

Thetre 151. The Actor’s Voice. (3-0) Cr. 3. S. Study and practice of fundamentals of vocal production: breathing, quality, articulation, projection, and expressiveness for the performing artist.

Thetre 224. Concert and Theatre Dance. (Same as Dance 224.) See Health and Human Performance, Dance.

Thetre 250. Theatre Practicum. Cr. 1 or 2 each time taken, maximum of 6 credits. F.S. Prereq: Permission of instructor. Practice in various aspects of technical theatre production. Offered on a satisfactory-fail grading basis only.

Thetre 251. Acting I. (3-0) Cr. 3. F. S. Theory and practice in fundamentals of acting.

Thetre 252. African American Theatre Production. (Same as Af Am 252.) (3-0) Cr. 3. F.S. An exploration of African American Theatre in production; aesthetic foundations, history and contributions to American theatre.

Thetre 255. Introduction to Theatrical Production. (3-3) Cr. 4. F. S. Standard structure and procedures, historical overview of performing arts production including the design and creation of scenery, costumes and lighting.

Thetre 263. Script Analysis. (3-0) Cr. 3. F. S. Theory and analysis of scripts for production.

Thetre 290. Special Projects. Cr. 1 to 3 each time taken, maximum of 6 credits. F.S.S.S. Prereq: 3 credits in theatre; permission of instructor; approval of written proposal.

Thetre 316. Creative Writing—Playwriting. (Same as Eng 316.) (3-0) Cr. 3. S. Preq: Eng 105, not open to freshmen. Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop criticism, and individual conferences. Nonmajor graduate credit.

Thetre 351. Acting II. (3-0) Cr. 3. S. Preq: 251. Dance 120 recommended. Theory and practice of techniques of acting with emphasis on character and scene analysis.

Thetre 354. Musical Theatre I. (2-1) Cr. 3. Preq: 251 or Music 236 or 3 credits in Dance. Theatre, theory, history and practice of musical theatre techniques. Designed to develop the musical theatre performance skills of singers, dancers, and actors.

Thetre 357. Stage Make-up. (1-2) Cr. 2. F. Theory and practice of make-up and hair-styling techniques for the performing arts: Theatre, Opera, Dance, Television and Film. Lab required.

Thetre 358. Oral Interpretation. (3-0) Cr. 3. F. Principles of oral interpretation: practice in analysis, in reading aloud of literary selections, and in reader’s theatre.

Thetre 359. Theatre for Children and Youth. (3-3) Cr. 3. S. Study and practice of directing, acting, and the production of theatre for children and youth.

Thetre 366. Theatrical Design II. (3-3) Cr. 3. S. Preq: 255. Intensive application of the concepts introduced in 365. In-depth study and practice of the graphic skills of rendering and drafting.

Thetre 367. Stage Management. (3-0) Cr. 3. F. Preq: 255. The responsibilities and techniques of stage management for the performing arts.

Thetre 393. Workshop. Cr. 3 each time taken, maximum of 9. F.S.S.S. Preq: 255 credits in theatre. Offered to explore special topics.

Thetre 451. Acting III. (3-0) Cr. 3. F. Preq: 351 and permission of instructor. Analysis and practice of period scenes.

Thetre 455. Directing I. (3-0) Cr. 3. F. Preq: 255; 263; 261 recommended. Theory, techniques, and practice of directing.

Thetre 456. Directing II. (2-2) Cr. 3. S. Preq: 455. Practical and theoretical experience in directing the stage play.

Thetre 461. Theatrical Design Studio. (3-2) Cr. 4 each time taken, maximum of 12. F.S. Preq: Permission of instructor. Focuses on the art and craft of specific areas of theatrical design. Each semester the student will focus on one or two of the following: scenic, costume, or lighting design.

Thetre 465. History of Theatre I. (3-0) Cr. 3. F. Preq: Hist 201 or equivalent. Theatre history from ancient times to 1800. Nonmajor graduate credit.

Thetre 466. History of Theatre II. (3-0) Cr. 3. S. Preq: 465. Theatre history from 1800 to present. Nonmajor graduate credit.

Thetre 469. Advanced Theatre Practicum. Cr. 1 to 3 each time taken, maximum of 3 credits per semester, maximum of 6 credits total. F.S.S.S. Preq: 9 credits in theatre courses; junior classification. Practicum in production with ISU Theatre, with opportunities for specialization within various areas. Required: Approval of written proposal.

Thetre 490. Independent Study. Cr. 1 to 3 each time taken. F.S.S.S. Preq: 9 credits in theatre; approved written proposal; junior classification. Only one independent study enrollment within the department is permitted per semester; no more than 9 credits in Thetre 490 may be counted toward graduation.

Thetre 497. Senior Seminar. (3-0) Cr. 3. S. Preq: 15 credits in theatre courses; senior classification. Directed study of a theatre issue or problem identified by each student. Students synthesize relevant theory and research culminating in senior project or paper.

Thetre 499. Theatre Internship. Cr. var. 1 to 8 each time taken, maximum of 8. F.S.S.S. Preq: 18 credits in theatre, other courses deemed appropriate by faculty adviser; 2nd semester junior or senior standing; cumulative GPA of at least 2.5 overall and 3.0 in theatre courses. Supervised application of theatre in professional settings.

Courses Primarily for Graduate Students, open to qualified undergraduates

Thetre 504. Seminar. Cr. 1 to 3 each time taken. F.S.S.S. Preq: 9 credits in theatre. Topics may include the following:
A. Musical Theatre
B. Acting Techniques
C. Acting Styles
D. Design and Technical Theatre
E. Arts Management

Thetre 590. Special Topics. Cr. 1 to 4 each time taken, maximum of 12 credits. Prereq: Approved written proposal.

Toxicology

www.molebio.iastate.edu/~L-wild/tox-home.htm
toxic@iastate.edu

(Interdepartmental Graduate Major)

Supervisory Committee: G. Munkvold, Chair; J. Beetham, J. Coats, W. Hyde, A. Kanthasamy

Work is offered for the degrees master of science and doctor of philosophy with major in toxicology in various cooperating departments: Agricultural and Biosystems Engineering; Animal Ecology; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Botany; Chemistry; Entomology; Food Science and Human Nutrition; Geological and Atmospheric Sciences; Microbiology; Plant Pathology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Pathology; and Zoology and Genetics.

The prerequisites for entrance into the graduate toxicology major include an undergraduate degree in a relevant area of study; for example, chemical engineering, biology, biochemistry, chemistry, ecology, entomology, food science and technology, microbiology, nutritional science, zoology, or veterinary medicine. Minimum undergraduate coursework should include the following or their equivalent: 1 year of college mathematics, including calculus; 1 year of inorganic chemistry with quantitative analysis; 1 course in physics; 1 year of organic chemistry; 2 years of biological sciences including 1 course in physiology.

Other courses that are considered desirable in the undergraduate preparation include: biochemistry, physical chemistry, qualitative analysis, and some specialized courses such as histology or advanced physiology.

Prospective students not meeting these requirements may be admitted on a provisional basis with approval of the admissions committee and the program of study committee.
Facilities and faculty are available in these departments for fundamental research in such areas as aquatic toxicology, environmental fate and effects of chemicals, food safety, neurotoxicology, nutritional toxicology, pesticides, and veterinary toxicology.

Students majoring in toxicology will be affiliated with a cooperating department and choose a major professor from the participating faculty in that department. All Ph.D. students take a core curriculum consisting of Tox 501 and 502, 2 credits of Tox 500 (Toxicology Seminar), 7 additional credits in toxicology, 8 credits in biochemistry (from BBMB 404, 405, 420, 451, 511, 542), 3 graduate credits in physiology, histology, or pathology; Stat 401 and 402. M.S. students take a core of Toxicology 501 and 502, 1 credit of Toxicology 500 Seminar, 3 additional credits in toxicology, BBMB 404 and 405, Stat 401. Additional coursework is selected to meet departmental requirements and to satisfy individual student research interests; toxicology courses may be chosen from those listed below. The foreign language requirement is determined by the student’s major department.

Graduates of the Toxicology major will be able to carefully design, execute and analyze experiments that extend the knowledge of toxicology and closely related sciences. They will be able to clearly communicate research findings, and thoroughly evaluate the literature of toxicology, contributing significantly to the advancement of the field.

A graduate minor in toxicology is available for students enrolled in other majors. A minor for an M.S. degree includes Tox 500 and 501 and 6 credits in other toxicology courses. A minor at the Ph.D. level includes Tox 500, 501, and 9 credits in other toxicology course work. One member of the student’s program of study committee will be a member of the toxicology faculty.

Courses open for nonmajor graduate credit: 419, 420.

Courses Primarily for Undergraduate Students
Tox 419. Foodborne Hazards. (Same as FS HN 419.) See Food Science and Human Nutrition. Nonmajor graduate credit.
Tox 420. Food Microbiology. (Same as Micro 420.) See Microbiology. Nonmajor graduate credit.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students
Tox 501. Principles of Toxicology. (Same as VDPAM 501, Zool 501.) (3-0) Cr. 3. S. Prereq: Permission of instructor. Principles of toxicology governing entrance, fate, and effects of toxins on living systems. Includes toxicokinetics and toxic foreign compounds metabolism relative to intoxication or detoxification. Fundamentals of foreign compound effects on metabolism, physiology, and morphology of different cell types, tissues, and organs systems.
Tox 502. Toxicology Methods. (Same as VDPAM 502, Zool 502.) (0-0-6) Cr. 3. S. Prereq.: Permission of instructor. Provides demonstrations or laboratory experience in the application of methods used in toxicology, including safety procedures, calculation and data analysis, teratologic and pathologic evaluation, electrophysiologic measures, in vitro enzyme induction/biotransformation, neural and behavioral toxicology testing.
Tox 504. Toxicology Seminar. (Same as VDPAM 504.) (1-0) Cr. 1 each time taken. F.S. Prereq: Permission of instructor. Presentation of a seminar about a current topic in toxicology as part of a weekly series of seminars by graduate students, faculty, and guest lecturers from off campus.
Tox 513. Ecological Toxicology. (Same as A Ecl 513.) See Animal Ecology.
Tox 519. Food Toxicology. (Same as FS HN 519.) See Food Science and Human Nutrition.
Tox 526. Veterinary Toxicology. (Same as VDPAM 526.) (3-0) Cr. 3. S. Prereq: Permission of instructor. A study of disease processes in animals caused by toxicants and the use of differential diagnostic and therapeautic procedures.
Tox 544. Aquatic Toxicology. (Same as A Ecl 544.) See Animal Ecology.
Tox 546. Clinical and Diagnostic Toxicology. (Same as VDPAM 546.) (0-3 to 0-9) Cr. 1 to 3 each time taken. F.S.S.S. Prereq: VDPAM 526 or DVM degree. Advanced study of current problems and issues in toxicology. Emphasis on problem solving utilizing clinical, epidemiological, and laboratory resources.
Tox 554. General Pharmacology. (Same as B M S 554). See Biomedical Sciences.
Tox 590. Special Topics.

Courses for Graduate Students
Tox 626. Advanced Food Microbiology. (Same as FS HN 626.) See Food Science and Human Nutrition.
Tox 643. Natural Toxins. (Same as VDPAM 643.) (1-6) Cr. 3. Alt. F., offered 2002. Prereq: Courses in biochemistry and physiology. Naturally occurring toxins in foods and feeds, poisonous plants and venoms.
Tox 645. Agricultural and Environmental Analytical Toxicology. (Same as VDPAM 645.) (1-3) Cr. 2. F. Prereq: Chem 211, 322, Analysis and interpretation of toxicant residues in animal tissues, foods, water, soil, and other environmental specimens.
Tox 699. Research.

Transportation

Courses and Programs Transportation and Logistics 343

**Courses Primarily for Graduate Students**

Trans 555. Economic Analysis of Transportation Investments. (3-0) Cr. 3. Alt. S., offered 2002. Prereq: C E 350 or 353 or 384 or 355. Application of economic analysis methodologies to evaluate transportation projects. Multi-modal approaches to evaluate impacts of transportation investments and maximize economic efficiency while considering equity and other social issues related to investment options.
Trans 691. Seminar in Transportation Planning. (1-0) Cr. 1 to 3. S. Prereq: An overview of current transportation issues; lectures and guest seminars of a variety of timely transportation topics.

Trans 699. Research.
Transportation and Logistics

(Administered by the Department of Logistics, Operations, and Management Information Systems)

Michael R. Crum, Chair of Department

Distinguished Professors: Allen, Baumel

Professors: Crum, Poist, Wacker

Professors (Emeritus): Thompson, Voorhees

Associate Professors: Hendrickson, Lunnmus, Mennecke, Nilakanta, Nonis, Premkumar, Walter

Assistant Professors: Hackbarth, Johnson, Montabon, Ruben, Strader, Suzuki, Zhu

Instructors (Adjunct): Blanshan, Choobineh, Clayton

Undergraduate Study

For the undergraduate curriculum in business, major in transportation and logistics, see College of Business, Curricula.

Transportation and logistics management is a discipline concerned with the efficient flow of materials through our industrial and economic system. Transportation management deals with the management of the domestic and international modes of transportation in today's rapidly changing economic environment. Logistics management assumes the systems approach to the management of a wide variety of activities such as inventory control, warehousing, traffic management, location analysis, packaging, materials handling, and customer service.

The study of transportation and logistics serves as a specialized program for those who plan careers in transportation or logistics with shippers, carriers, and government agencies. It is a broad-based educational program which emphasizes the managerial aspects of transportation and logistics systems and concepts.

The requirements for the transportation and logistics major are met by completion of the following courses: TrLog 460, 461, plus four of the following courses, two of which must be TrLog courses: TrLog 462, 463, 466, 468, 469, 490, POM 420, 422, 424, or MIS 439.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, 9 credits of which may not be used to satisfy any other requirement.

Graduate Study

The department participates in two graduate degree programs: the M.S. in Business and the M.B.A. full-time day and part-time weekend programs. The M.S. degree in Business is a 30-credit curriculum culminating in a thesis. The M.B.A. program is a 48-credit, nonthesis, noncreative component curriculum. Twenty-four of the 48 credit hours are core courses and the remaining 24 are graduate electives. The department also participates in the interdepartmental transportation major.

Courses open for nonmajor graduate credit: 461, 462, 463, 466, 468, and 469.

Courses Primarily for Undergraduate Students

TrLog 360. Business Logistics. (3-0) Cr. 3. Prereq: Econ 101. Introduction and analysis of the logistics concept to include the management of transportation, inventory, packaging, warehousing, materials handling, order processing, facility location, and customer service.

TrLog 461. Transport Economics. (3-0) Cr. 3. Prereq: Stat 227, Econ 101. The role of transportation in the economy. The economic characteristics of the various modes of transportation, including the nature of transport demand and cost functions; economic dimensions of transport service; transport market structures; and transport pricing theory and practice. Emphasis on managerial implications of transport economic principles. Nonmajor graduate credit.

TrLog 462. Transportation Carrier Management. (3-0) Cr. 3. Prereq: Credit or enrollment in 461. Analysis of transport users’ requirements. Carrier management problems involving ownership and mergers, routes, competition, labor, and other decision areas. Nonmajor graduate credit.

TrLog 463. Purchasing Management. (3-0) Cr. 3. Prereq: 360. Principles and policies in acquiring goods and services for the firm. Emphasis on purchasing as it relates to materials management. Nonmajor graduate credit.

TrLog 466. International Transportation and Logistics. (3-0) Cr. 3. Prereq: 360. Logistics systems and legal framework for the international movement of goods. Operational characteristics of providers of exporting and importing services. The effects of government trade policies on global logistics. Nonmajor graduate credit.

TrLog 468. Transportation and Public Policy. (3-0) Cr. 3. Prereq: Credit or enrollment in 461. Analysis of current policies affecting transportation providers and users. The roles of carrier and shipper organizations, government agencies, and other interest groups in policy development. Evaluation of impact of programs, policies, and legislation on various transportation constituencies. Nonmajor graduate credit.

TrLog 469. Transportation and Logistics Issues. (3-0) Cr. 3. Prereq: 460, 461. An integrative course designed to study contemporary problems and issues in transportation and logistics. Nonmajor graduate credit.

TrLog 490. Independent Study. Cr. 1-3 each time taken. Prereq: 360, senior classification, permission of instructor.

Courses Primarily for Graduate Students

TrLog 560. Business Logistics Strategies. (3-0) Cr. 3. Prereq: Graduate classification. Management of the logistics functions in the firm, including transportation, inventory control, warehousing, packaging, facility location, materials handling, and customer service. Includes both theoretical aspects and practical applications in logistics.

TrLog 561. Transportation Management and Policy. (3-0) Cr. 3. Prereq: Graduate classification. Analysis of contemporary issues and strategies in transportation management and policy. Emphasis on evaluation of the impacts of transportation policies, new technologies, and strategic carrier and shipper management practices on the freight transportation industry and logistics systems.

TrLog 590. Special Topics. Cr. 1 to 5 each time taken. Prereq: Graduate classification and permission of instructor. For students who wish to do individual research in a particular area of transportation or logistics.

University Studies

Howard Shapiro, Vice Provost for Undergraduate Programs

Certain interdisciplinary courses are offered through university studies, at the discretion of the vice provost for undergraduate programs upon the advice of the Faculty Senate Curriculum Committee. No major is available in university studies, but credit obtained through university studies offerings may be applied toward a degree in any of the colleges, consistent with the stipulations of the student’s curriculum.

Requests to make use of U St 101, 290, 301, and 490 should be directed to the vice provost for undergraduate programs and should be accompanied by a positive recommendation from the department heads and deans of the instructors making the request. The vice provost will refer requests to the Faculty Senate Curriculum Committee which will make recommendations to the vice provost regarding their disposition after consultation with appropriate college and university committees.

The Graduate College sponsors U St 180 and 511 to help graduate students carry out instructional tasks as teaching assistants. Placement in 180 is determined by examination (SPEAK/TEACH tests).

Courses open for nonmajor graduate credit: 342.

Courses Primarily for Undergraduate Students

U St 101. Interdisciplinary Studies. Cr. var. Yr. Offered when demand warrants. Experimental interdisciplinary courses offered by an interdepartmental group. Intended primarily for freshman and sophomore offerings.

U St 110. Carver Academy Seminar. Cr. 1. F.S. Prereq: Acceptance in Carver Academy Program. Orientation to the university for Carver Academy students. Offered on a satisfactory-fail grading basis only.

U St 111. Hixon Scholars Seminar. (1-0) Cr. 1. F. Prereq: Recipient of the Hixon Opportunity Award. Orientation to Iowa State University and the Hixon Opportunity Awards Program. Offered on a satisfactory-fail grading basis only.

U St 120. Study Abroad Credit. (Same as IntSt 120.) See International Studies.

U St 131, 132. Early Success Seminar. (0-2) Cr. 1. F.S. Orientation to the university for students in the Early Success Program. Offered on a satisfactory-fail grading basis only.

U St 150. Dialogues on Diversity. Cr. 1. F.S. An exploration of diversity within the context of the Iowa State University community through understanding human relations issues.

U St 180. Communication Skills for International Teaching Assistants. (Same as Engl 180.) F.S. Placement based upon SPEAK/TEACH test results. Persons whose native language is English cannot take 180 for credit. No more than one section of 180 may be taken per semester; up to two sections total. Credit does not apply toward graduation. Offered on a satisfactory-fail grading basis only.

A. Speaking Skills. Cr. 3. Emphasis on pronunciation improvement and greater fluency in spoken English for teaching purposes.

B. Intermediate Spoken English. Cr. 3. Interactive speaking and response to questions is emphasized.
reached the passing level on the SPEAK/TEACH test. D. Presentation Skills. Cr. 3. Developing explanations, leading discussions and handling questions in a teaching environment.

E. Supervised Independent Study. Cr. 1. Seminar with individual observation and consultation.

U St 220. Study Abroad Credit. (Same as IntSt 220.) See International Studies.

U St 240. Predeparture Orientation for China Study Abroad. Cr. 1. An examination of the culture, language, history, economics, and agriculture of China in preparation for participating in the ISU Study Abroad Program. Offered on a satisfactory-fail grading basis only.

U St 290. Special Problems. Cr. var. Prereq: Permission of the vice provost for undergraduate programs. Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores.

U St 298. Federal Cooperative Education Program. Cr. R. F.S.S. Prereq: Permission of director, ISU Career Planning and Placement Services; sophomore classification. Required of all Federal Cooperative Education students. Students must register for this course prior to commencing each work period with the Federal Government.

Courses Primarily for Graduate Students, Open To Qualified Undergraduate Students

U St 541. Technological Innovation, Social Change, and Development. (Same as Soc 541.) See Sociology.

U St 590. Special Topics. Independent study on topics of an interdisciplinary nature. Intended primarily for graduate students. F. Technology and Social Change. (Same as T SC 590.)

Courses for Graduate Students

VETERINARY CLINICAL SCIENCES

Christopher M. Brown, Chair of Department

Professors: Betts, Brown, Evans, Grier, Hoeffe, Hopkins, Jackson, Markley, Noxon, D. Riedesel, Ware

Professors (Collaborators): Carpenter

Professors (Emeritus): Canthers, Clark, Eness, Pearson

Associate Professors: Baldwin, Booth, Jergens, Miles, Nieves, Obrien, Himendorf, E. Riedesel, Wagner

Assistant Professors: Conzemius, Hopper, Kline, McClure, Whelan

Instructors (Adjunct): Aquino, Grewal, Hunter, Langer, Lau, Little, Loenser, Morrison, Pendry, Ridgway, Schreiner, Sponseller, Wilke

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine. Curriculum.

The study of medicine and surgery expands the training previously received in anatomy, physiology, pharmacology, pathology, and microbiology.

The department presents coursework in animal reproduction concerning interferences with parturition, diseases of the newborn, and infertility.

The teaching of radiology emphasizes the production and interpretation of radiographs and the dangers of ionizing radiation to humans and animals. Alternate imaging modalities, including ultrasonography and nuclear medicine are also taught.

Hospital assignments during the fourth year provide the student an opportunity to participate in the application of clinical skills and knowledge.

U St 498. Federal Cooperative Education Program. Cr. R. F.S.S. Prereq: Permission of director, ISU Career Planning and Placement Services; senior classification. Required of all Federal Cooperative Education students. Students must register for this course prior to commencing each work period with the Federal Government.

Courses Primarily for Graduate Students, Open To Qualified Undergraduate Students

U St 541. Technological Innovation, Social Change, and Development. (Same as Soc 541.) See Sociology.

U St 590. Special Topics. Independent study on topics of an interdisciplinary nature. Intended primarily for graduate students. F. Technology and Social Change. (Same as T SC 590.)

Courses for Graduate Students

GRADUATE STUDY

The department offers work for the degree master of science with major in veterinary clinical science, and minor work for students majoring in other departments. Within the veterinary clinical sciences major, the student may specialize in veterinary medicine, swine production medicine, surgery, or theriogenology. The D.V.M. degree or equivalent is prerequisite to a major graduate work.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits and a final examination.

Foreign language requirements may be established by the student’s program of study committee.

Courses Primarily for Professional Curriculum Students

U C S 385. Seminar. (Same as VDPAM 385.) (1-0) Cr. R each time taken. F.S. Prereq: Classification in veterinary medicine. Seminars and case discussions on selected clinical subjects by staff and fourth-year students of the College of Veterinary Medicine. Offered on a satisfactory-fail grading basis only.

U C S 398. Anesthesiology. (1-0) Cr. 1. S. Prereq: Second-year classification in veterinary medicine. Anesthetic equipment, agents, and procedures for domestic animals.

U C S 401. Advanced Small Animal Orthopedics. (1-0) Cr. 1. S. Prereq: Third or Fourth-year classification in veterinary medicine. Elective course in advanced small animal orthopedics.

U C S 405. Pet Bird and Exotic Species Medicine. (1-3) Cr. 2. S. Prereq: Classification in veterinary medicine. Elective course in management and diseases of pet birds and exotic species.

U C S 419. Preceptorship in Veterinary Medical Practice. Cr. 1 to 6 each time taken. F.S.S.S. Prereq: Fourth-year classification in veterinary medicine, permission of department chair. Elective course in veterinary practice under the guidance of veterinarians in approved practice settings.

Prereq: Second-, third-, or fourth-year classification in veterinary medicine. Husbandry, management, and common diseases of rabbits, guinea pigs, hamsters, gerbils, rats, and mice.

V C S 440. Introduction to Clinics. (Same as VDPAM 440.) (0-4) Cr. R. F. 8 weeks. Prereq: Third-year classification in veterinary medicine.

V C S 445. Clinical Medicine II. (Same as VDPAM 445.) (5-0) Cr. 5. S. Prereq: Third-year classification in veterinary medicine. Clinical diagnosis and treatment of diseases of equine, swine, beef, dairy, and sheep.

V C S 448. Radiology. (2-0) Cr. 2. S. Prereq: Third-year classification in veterinary medicine. Essentials of diagnostic imaging and radiobiology with emphasis on diagnostic interpretation and protection from radiation.

V C S 449. Surgery Laboratory. (1-4) Cr. 3. F. Prereq: Third-year classification in veterinary medicine. Pre-laboratory presentations and laboratories introducing the student to appropriate companion animal surgical methods and techniques.

V C S 450. Disturbances of Reproduction. (Same as VDPAM 450.) (4-0) Cr. 4. F. Prereq: Third-year classification in veterinary medicine. General principles of diseases causing disturbances in reproduction.

V C S 451. Advanced Small Animal Soft Tissue Surgical Laboratory. (1-6) Cr. 2. Prereq: VCS 397, 398, 399, 449. Advanced small animal soft tissue surgical procedures involving the abdominal cavity. Less emphasis will be placed on the thoracic cavity and head and neck injury.

V C S 452. Clinical Dermatology. Cr. 2. Prereq: Fourth-year classification in veterinary medicine, small animal option. Study of clinical dermatological problems via computer-aided instruction, case simulations, and/or lectures. Clinical management of cases presented to Veterinary Teaching Hospital.

V C S 468. Intensive Care. Cr. 4. Prereq: Fourth-year classification in veterinary medicine. Clinical assignment to provide supervision of hospital cases requiring intensive care and including emergency cases.

V C S 476. Anesthesiology. Cr. var each time taken. Prereq: Fourth-year classification in veterinary medicine. Elective clinical assignment in small animal and large animal anesthesiology.

V C S 490. Independent Study. Cr. 1 to 5. Prereq: Permission of instructor and department chair.

V C S 495. Seminar. (Same as VDPAM 495.) Cr. R. S. Prereq: Fourth-year classification in veterinary medicine. Seminars and case discussions on selected subjects by staff of the College of Veterinary Medicine and others, including student presentations. Offered on a satisfactory-fail grading basis only.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

V C S 590. Special Topics. Cr. 1 to 3. Prereq: Permission of instructor.
A. Medicine
B. Surgery
C. Theriogenology
D. Radiology
E. Anesthesiology

V C S 599. Creative Component. Cr. var. Prereq: Enrollment in nonthesis master’s degree program.

Courses for Graduate Students

V C S 604. Seminar. Cr. 1 each time taken. F.S.

V C S 699. Research.
A. Medicine
B. Surgery
C. Theriogenology
E. Anesthesiology

Veterinary Diagnostic and Production Animal Medicine

Robert E. Holland, Chair of Department
University Professors: McKeen
Professors: Carson, Evans, Harris, Hartvig, Hoffman, Holland, Hopkins, Hopper, Hyde, Kunesh, Osweiler, Trampel

Professors (Emeritus): Kunesh, Stahr, Wass
Associate Professors: Halbur, Janke, Kersting, Larson, Thacker, Thompson, Uhlenhopp, Yaeger, Zimmerman

Assistant Professors: Apley, Carr, O’Connor, Sorden, Yoon, Zhou

Assistant Professors (Adjunct): Harman, Imerman, Kinyon, Kozak, Schwartz

Instructors (Adjunct): Enslay, Ham, Meyer, Poganychny, Robbe, Swalla, Villar, Wagner

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.
The study of veterinary diagnostic and production animal medicine provides the student with basic and advanced skills in diagnostics, reproduction, medicine, surgery, production, and health management of the major livestock species. Students in the fourth year of the curriculum in veterinary medicine may elect to take advanced courses in beef, dairy, swine, poultry or other production medicine. Elective courses may include preceptorships in private practices, other veterinary schools, research and disease control laboratories.

Production animal medicine emphasizes the integration of veterinary medicine with nutrition, genetics, economics, food safety, and other disciplines, enabling graduates to use a broad knowledge base to support the health and production of food and fiber animals.

Graduate Study

The department offers graduate courses for students pursuing graduate work in other departments. The D.V.M. degree or equivalent is prerequisite to enrollment in these courses.

Courses Primarily for Professional Curriculum Students

VDPAM 385. Seminar. (Same as V C S 385) (1-0) Cr. R. Each time taken. Prereq: Classification in veterinary medicine. Seminars and case discussions on selected clinical subjects by staff and fourth-year students of the College of Veterinary Medicine. Offered on a satisfactory-fail grading basis only.

VDPAM 480. Porcine Medicine and Disease Prevention. (Dual-listed with VDPAM 580) Cr. 2. S. Prereq: Enrollment in College of Veterinary Medicine. Bacterial, viral, parasitic, and nutritional diseases of domestic poultry and gamebirds; biosecurity, immunization, and management procedures to prevent poultry diseases.

VDPAM 416. Bovine Reproduction Evaluation Laboratory. (0-0-3) Cr. 1. F.S. Prereq: Third year classification in veterinary medicine. Emphasis on udder palpation techniques. Involves repetitive taught in three-hour sessions. Students will learn techniques of epideral anesthesia, artificial insemination, and ultrasonic imaging. University-owned cattle will be used.

VDPAM 420. Preceptorship in Veterinary Medical Practice. Cr. 1 to 6 each time taken. F.S.S.S. Prereq: Fourth-year classification in veterinary medicine, permission of department chair. Elective course in veterinary practice under the guidance of veterinarians in approved practice settings.

VDPAM 426. Veterinary Toxicology. (Dual-listed with S 526) Cr. 3. S. Prereq: Third-year classification in veterinary medicine. A study of the disease processes in animals caused by toxicants and the use of differential diagnostic and therapeutic procedures.

VDPAM 436. Beef Herd Problem Identification. (7-33) Cr. 2. F.S.S.S. Prereq: Fourth-year classification in veterinary medicine. Seven hours recitation/discussion and 33 hours clinical experience per week. Course taken for two weeks at University of Wisconsin, Madison on a space-available basis. Identify equipment, facilities and management characteristics of dairy farms. Understand dairy herd records and use to examine health and productivity. Prioritize herd health and production problems and evaluate adequacy of ventilation and housing systems.

VDPAM 440. Introduction to Clinics. (Same as V C S 440) (0-4) Cr. F. R. 8 weeks. Prereq: Third-year classification in veterinary medicine.

VDPAM 450. Disturbances of Reproduction. (Same as V C S 450) (4-0) Cr. F. Prereq: Third-year classification in veterinary medicine. General principles of diseases causing disturbance in reproduction.

VDPAM 455. Diagnostic Laboratory Practicum. Cr. 2 each time taken. F.S. Prereq: Fourth-year classification in veterinary medicine. Practical experience in diagnosis of field cases.

VDPAM 478. Introduction to Swine Production Medicine. (15-20) Cr. 2. F.S.S.S. Prereq: Fourth-year classification in veterinary medicine. Emphasis on swine production medicine with emphasis on monitoring disease, disease prevention, and production economics. Fifteen hours recitation/discussion and 20 hours clinical experience per week.

VDPAM 479. Swine Production Medicine Preceptorship. (9-31) Cr. 2. F.S.S.S. Prereq: Fourth-year classification in veterinary medicine. Two week advanced course in swine production medicine with emphasis on herd health management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit.

VDPAM 481. Introduction to Beef Production Medicine. (15-20) Cr. 2. F.S. Prereq: Fourth-year classification in veterinary medicine. Two week advanced course in beef production medicine with emphasis on herd health management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit.

VDPAM 483. Advanced Beef Production Medicine. (15-20) Cr. 2. F.S. Prereq: Fourth-year classification in veterinary medicine. Two week advanced course in beef production medicine with emphasis on monitoring disease, disease prevention, and production economics. Fifteen hours recitation/discussion and 20 hours clinical experience per week.

VDPAM 484. Introduction to Dairy Production Medicine. (15-20) Cr. 2. S. Prereq: Fourth-year classification in veterinary medicine. Two week introductory topics in dairy production medicine with emphasis on monitoring disease, disease prevention, and production economics. Fifteen hours recitation/discussion and 20 hours clinical experience per week.

VDPAM 485. Dairy Production Medicine Preceptorship. (9-31) Cr. 2. F.S. Prereq: Fourth-year classification in veterinary medicine. Two week course advanced course in dairy production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit.

VDPAM 486. Introduction to Small Ruminant Production Medicine. (15-20) Cr. 2. S. Prereq: Fourth-year classification in veterinary medicine. Two week introductory topics in small ruminant production medicine with emphasis on monitoring disease, disease prevention, and production economics. Fifteen hours recitation/discussion and 20 hours clinical experience per week.

VDPAM 487. Livestock Disease Prevention. (3-0) Cr. F. 3. F. A survey of diseases of large domestic animals, including discussion of causes, transmission, and control. Designed for students majoring in agricultural sciences.

VDPAM 488. Laboratory in Clinical Microbiology. Cr. 1 each time taken. F.S.S.S. Prereq: Fourth-year classification in veterinary medicine. Application of microbiological and immunological procedures to the diagnosis of infectious and immunologically mediated diseases.

VDPAM 490. Independent Study. Cr. 1 to 5. F.S.S.S. Prereq: Permission of department chair.

VDPAM 495. Seminar. (Same as V C S 495) Cr. F. S. Prereq: Fourth-year classification in veterinary medicine. Seminars and case discussions on selected subjects by staff of the College of Veterinary Medicine and others, including student presentations. Offered on a satisfactory-fail grading basis only.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

VDPAM 501. Principles of Toxicology. (Same as Tox 501, Zool 501) (3-0) Cr. BMB 404 or equivalent. Principles of toxicology governing entry, fate, and effects of toxicants on living systems. Includes toxicokinetics and foreign compound metabolism relative to toxification or detoxification. Fundamentals of foreign compound effects on metabolism, physiology, and morphology of different cell types, tissues, and organ systems.

VDPAM 502. Toxicology Methods. (Same as Tox 502, Zool 502) (4-6) Cr. F. or S. Prereq: 501. Provides demonstrations or laboratory experience in the applications of methods used in toxicology, including safety procedures, calculation and data analysis, mutagenicity tests, cell culture, residue analysis, teratogenic and morphologic evaluation, electrophysiological measures, in vitro enzyme induction/Transformation, neural and behavioral toxicology testing.
Veterinary Medicine

Norman F. Cheville, Interim Dean
Eldon K. Uhlenhopp, Associate Dean
Donald L. Reynolds, Associate Dean

Courses Primarily for Professional Curriculum Students

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

V Med 301. Professional Orientation. (1-0) Cr. 8 weeks. Prereq: First-year classification in veterinary medicine. Topics to be covered include attendance, observation, interviewing, and confrontation, emphasis on hygiene, and integration.

V Med 302. Clinical Communications and Listening Skills. (2-0) Cr. 1. S. 8 weeks. Prereq: Classification in veterinary medicine. Topics to be covered include attendance, observation, interviewing, and confrontation, emphasis on hygiene, and integration.

V Med 401. Introductory Aquatic Animal Health and Medicine. (Same as A Éc 401.) (1-2) Cr. 1. F. 8 weeks. Introductory course with focus on fish production, health, and medicine. Course content will help define future roles for veterinarians, procedures, and service providers. Emphasis will be placed on questions of aquatic pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquatic facilities.

V Med 403. International Preceptorship. (0-40) Cr. 1-12 each taken. F.S.S. Prereq: Second-year classification in veterinary medicine. International preceptorships and study abroad programs. This course will provide opportunities for students to be involved in applied clinical, production, and research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

V Med 409. Management Pathways in Veterinary Medicine. (3-15) Cr. 4. F. 7 weeks. Prereq: Classification in veterinary medicine. Introduction to veterinary operations management and marketing. Skills development related to being a valued practice associate. Self development to assist the student in successfully balancing elements of fiscal responsibility and personal and professional success. Out of class work will be assigned.

V Med 414. Veterinary Practice Entrepreneurship. (2-0) Cr. 2. Prereq: Classification in veterinary medicine. A formal exposure to the skills needed for purchase and successful ownership of a veterinary practice. The course incorporates the fundamental business skills of accounting, finance, management, marketing, strategic planning, organizational structure, human resource management, operations management, and statistical quality control.

V Med 490. Independent Study. Cr. 1 to 3. Prereq: Classification in veterinary medicine. Independent or small group study of a specific area for which no course is available in an existing department.

H. Honors

V Med 503. International Preceptorship. (0-40) Cr. 1-12 each taken. F.S.S. Prereq: Admission to the Graduate College. International preceptorships and Study Abroad programs. This course will provide opportunities for students to be involved in applied clinical, production, and research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Veternary Microbiology & Preventive Medicine

Charles O. Thoen, Chair of Department

Distinguished Professors: Kaeberle, Ross, Roth

Professors: Carpenter, Cheville, Moon, Paul, Platt, Reynolds, Rosenbusch, Thoen

Professors (Collaborators): Donham, Larsen, Mengeling, Nystrom-Dan, O’Bery, Schmerr, Schultz, Tabatabai

Distinguished Professors (Emeritus): Beran, Packer, Switzer

Professors (Emeritus): Hogle, Jensen, Kramer

Associate Professors: Abou-Gabal, Dickson, Griffith, Holland, Minion, B. Thacker, Uhlenhopp, Wannemuehler, Zimmerman

Associate Professors (Collaborators): Frey, Harp, Panigraphy, Zuerer

Assistant Professors: Comick, E. Thacker, Yoon

Assistant Professors (Adjunct): Davis, Flaming

Assistant Professors (Collaborators): Anderson, Currier, Halling, Hurd, Sacco, Stabel, Stanton, Waters, Wesley

Instructors (Adjunct): Frana, Qal

Instructors (Collaborators): Schlater

The Department of Veterinary Microbiology and Preventive Medicine offers instruction in the areas of bacteriology, mycology, virology, immunology, epidemiology and public health at the graduate level.

Microbiologic, immunologic, regulatory, and preventive medical aspects of infectious diseases of animals are emphasized in courses for students in the veterinary curriculum.

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.
The Department of Veterinary Microbiology and Preventive Medicine provides instruction on pathogenic bacteria, fungi, and viruses and their interaction with host animal species. Principles and applications of infectious diseases, immunity to disease, diagnostic methods for infectious diseases, and vaccinology are covered. Principles and applications of epidemiology, public health, preventive veterinary medicine, regulatory veterinary medicine, and food safety are also emphasized.

Graduate Study
The department offers opportunities for the degree doctor of philosophy with a major in veterinary microbiology. A specialization in preventive medicine is an option for this degree. Graduates in the Veterinary Microbiology and Preventive Medicine programs have a broad understanding of the fundamental processes involved in infectious diseases, pathogenesis and immunology. They are able to effectively establish research programs, which involve complex biological systems and disease syndromes. They are also prepared to address microbial-based social, ethical and environmental problems. Graduates acquire effective written and oral communication skills which lead to successful research and teaching careers in the medical and veterinary sciences. The department also offers work towards the master of science with majors in veterinary microbiology, or veterinary preventive medicine. A non-thesis master's option is available for majors in preventive medicine. Courses are open for students majoring in other graduate programs. Prerequisite to graduate study is completion of coursework in general microbiology, biology, biochemistry, mathematical sciences, and physics. Candidates for the majors in veterinary microbiology should possess an undergraduate degree in biomedical science with emphasis in medical microbiology or the D.V.M. degree. Candidates for the major in preventive medicine should possess the D.V.M. degree. The department also participates in the interdepartmental majors and programs in genetics, immunobiology, and MCDB (molecular, cellular, and developmental biology; see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

Courses Primarily for Professional Curriculum Students

V MPM 378. Case Study IV. (0-4) Cr. 2. S. Prereq: Second-year classification in veterinary medicine. Clinical applications of basic sciences taught concurrently in the spring semester of the second year curriculum in veterinary medicine.

V MPM 380. Veterinary Immunology. (3-3) Cr. 2. S. 8 weeks. Prereq: First-year classification in veterinary medicine. Structure and function of the immune system in animals.

V MPM 386. Veterinary Microbiology. (3-3) Cr. 5. F. Prereq: Second-year classification in veterinary medicine. Bacteria and fungi of veterinary importance with emphasis on mechanisms of disease production and laboratory diagnostic procedures.

Courses and Programs

V MPM 389. Clinical Mycology. (1-2) Cr. 2. F. Prereq: Second-year classification in veterinary medicine or Micro 310. Fungal pathogens, common mycotoxins and the associated diseases in animals and humans with emphasis on clinical laboratory diagnosis.

V MPM 390. Topics in Veterinary History. (2-0) Cr. 1. S. 8 weeks. Significant persons, noteworthy events, and pivotal scientific discoveries in the course of the development and advancement of veterinary medicine from ancient times to the present.

V MPM 409. Infectious Diseases of Captive Wild Animals. (1-0) Cr. 1. F. Prereq: Third-year classification in veterinary medicine. Infectious diseases (bacterial, viral, and mycotic) of non-human primates, birds, ruminants, exotic and domesticated animals, marine mammals, and carnivores.

V MPM 436. Infectious Diseases and Preventive Medicine. (2-0) Cr. 2. F. Prereq: Third-year classification in veterinary medicine. Etiology, epidemiology, laboratory diagnosis, regulatory control and preventive medicine aspects of the infectious diseases of small domestic animals.

V MPM 437. Infectious Diseases and Preventive Medicine. (3-0) Cr. 3. S. Prereq: Third-year classification in veterinary medicine. Etiology, epidemiology, laboratory diagnosis, regulatory control and preventive medicine aspects of the infectious diseases of swine, sheep, goats, cattle and horses.

V MPM 486. Laboratory in Public Health. Cr. 1 each time taken. F.S. Prereq: Fourth-year classification in veterinary medicine. Laboratory exercises and field trips related to veterinary public health practices.

Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

V MPM 502. Microbial Genetics. (Same as Micro 502.) See Microbiology.

V MPM 504. Microbial Physiology. (Same as Micro 504.) See Microbiology.

V MPM 520. Medical Immunology I. (4-0) Cr. 4. F. Prereq: Micro 310 or V MPM 388, 3 credits in biochemistry. Nature of the immune system and its role in health and disease. Credit for either 520 or 575, but not both may be applied toward graduation.

V MPM 537. Infectious Diseases and Preventive Medicine. (3-3) Cr. 4. S. Prereq: Permission of instructor. In-depth study of the etiology, epidemiology, laboratory diagnosis, regulatory control and preventive medicine aspects of the infectious diseases of large domestic animals.

V MPM 540. Livestock Immunogenetics. (Same as An S 540.) See Animal Science.

V MPM 575. Immunology. (Same as Micro 575.) See Microbiology.

V MPM 586. Medical Bacteriology. (Same as Micro 586.) (4-0) Cr. 4. F. Prereq: Permission of instructor. Bacteria associated with diseases of vertebrates including virulence factors and interaction of host responses.

V MPM 586L. Medical Bacteriology Laboratory. (0-2) Cr. 2. F. Prereq: credit or enrollment in 586 or 625. Procedures used in isolation and identification of pathogenic bacteria, including molecular and genetic techniques used in research.

V MPM 587L. Laboratory in Animal Virology. (0-3) Cr. 1. Prereq: Permission of the instructor. Basic laboratory techniques in virology.

V MPM 599. Creative Component. Cr. arr. Prereq: Nonthesis M.S. Option only. A written report based on laboratory research, library reading, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Courses for Graduate Students

V MPM 604. Seminar. (1-0) Cr. 1 each time taken. F.S. Prereq: offered on a satisfactory-fail grading basis only.

V MPM 615. Molecular Immunology. (Same as BBMB 615.) See Biochemistry, Biophysics, and Molecular Biology.

V MPM 629. Medical Immunology II. (3-0) Cr. 3. S. Prereq: 520 or 575. Current concepts of the role of native and acquired immunity in health and disease.

V MPM 690. Current Topics. Cr. 1 to 3 each time elected. F.S. Prereq: Permission of instructor. Colloquia or advanced study of specific topics in a specialized field. A. Immunology. B. Infectious Diseases

V MPM 698. Seminar in Molecular, Cellular, and Developmental Biology. (Same as MCDB 688.) See Molecular, Cellular, and Developmental Biology.

V MPM 699. Research.
Veterinary Pathology

Claire B. Andreasen, Interim Chair of
Department

University Professors (Emeritus): Kluge

Professors: Carson, Cheville, Haynes, Hopper, Hyde, Moon, Myers, Niyi, Osweiler

Professors (Collaborators): Meador, Murray

Professors (Emeritus): Daniels, Greve, Hagenauser, Holter, Jeska, Ledet, Miller, Seaton, Stahr

Associate Professors: Ackermann, Andreasen, Halbur, Janke, Jarvinen, Larson, Yaeger

Assistant Professors: Beetham, Brockus, Jones, Sorden, Williamson

Assistant Professors (Collaborators): Hutto, Ryhan

Instructors (Adjunct): Greenlee, Morgan, Thomsen

Assistant Professors (Temporary): Fales-Williams, Hostetter

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Pathology offers a systematic study of basic disease mechanisms with emphasis on the changes in cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases.

Graduate Study

The department offers work for the degree master of science and doctor of philosophy with a major in veterinary pathology. As an option, students within the veterinary pathology major may choose an area of specialization in cellular and molecular pathology, veterinary clinical pathology, veterinary toxicology, or veterinary parasitology. The master of science degree is available on a thesis or nonthesis basis in the veterinary pathology major with or without an area of specialization.

Graduates have a broad understanding of veterinary pathology and related disciplines. They are able to communicate with clinicians, other scientists, and other colleagues on scientific matters, and with the general public on science policy matters that relate to veterinary pathology.

Graduates are able to address complex problems facing the agricultural and biomedical sciences, and are able to make appropriate diagnoses and investigations of animal diseases.

They consider ethical, social, legal and environmental issues, and are skilled at carrying out research, communicating research results, and writing concise and persuasive grant proposals.

A minor in veterinary pathology requires a minimum of 12 graduate credits at the Ph.D. level and 8 graduate credits at the M.S. level. Additionally, a faculty member from the department must be a member of the student’s program of study committee.

A veterinary degree (doctor of veterinary medicine or equivalent) is required for the major in veterinary pathology and Veterinary Clinical Pathology. Other specializations do not require the veterinary degree. A minimum score of 550 is required on the TOEFL examination for students whose native language is not English. Scores on the standardized Graduate Record Examination (GRE) General Test are required of students not having a veterinary degree from the United States or Canada. The GRE General Test is strongly recommended for all other applicants. The foreign language requirement will be determined by the student’s program of study committee with the approval of the departmental chair. The Graduate English Examination is a graduate college requirement for native English speakers.

The M.S. thesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 30 graduate credits. Following completion of all other requirements, a comprehensive final examination is administered covering all graduate work including the thesis. The examination is typically oral, but a written component may be specified by the program of study committee. The degree candidate must submit a thesis, including at least one manuscript suitable for publication, to the major professor at least one week prior to the final examination. The departmental requirement for graduate courses includes 3 credits of basic biological sciences (biochemistry, genetics, cell biology), 4 credits of statistics (Stat 401), 4 credits of veterinary medicine (from V Pth 570 or 571), 1 credit of post-mortem pathology (V Pth 551) and 1 credit of seminar (V Pth 565), and a significant number of research credits (V Pth 698).

The M.S. nonthesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 40 graduate credits including at least 10 graduate credits earned outside the department. Every nonthesis master’s degree program requires evidence of individual accomplishment demonstrated by completion of a creative component, special report, or scientific study. A minimum of 3 credits of such independent work (V Pth 599) and a practical diagnostic examination (V Pth 606) corresponding to the area of specialization are required on every program of study. The final examination is comprehensive and consists of written and oral questions. The departmental requirement for graduate coursework includes those for the M.S. thesis degree plus additional courses corresponding to the area of degree emphasis of specialization. Contact the department for a more complete list of requirements and information on areas of specialization.

The Ph.D. degree in veterinary pathology, with or without an area of specialization, requires a minimum of 72 graduate credits including at least 12 graduate credits earned outside the department. A minor is encouraged, but not required. The preliminary examination, consisting of written and oral components, is comprehensive and not restricted to the content of graduate courses. The degree candidate must submit a dissertation, including at least two manuscripts suitable for publication, to the major professor at least one week prior to the final examination. The final examination is primarily a defense of the dissertation, but it may include questions on other areas of specialized knowledge. Contact the department for a more complete list of requirements for the Ph.D. degree and information on areas of specialization.

Minor work is recommended in other departments in the College of Veterinary Medicine or departments or programs in other colleges. The department participates in the interdepartmental program in immunobiology and the interdepartmental major in toxicology (See Index.)

Courses open for nonmajor graduate credit: 478.

Courses Primarily for Professional Curriculum Students

V Pth 304. Introduction to Clinical Problem Solving. (0-4) Cr. 2. F. Prereq: First year classification in veterinary medicine. Application of knowledge in basic biomedical sciences to clinical problems using a small group, problem-based learning format.

V Pth 342. General Pathology. (Dual-listed with 542.1) (3-2) Cr. 2. F. S. 8 weeks. Offered second half semester only. Prereq: First-year classification in veterinary medicine. Basic pathology with emphasis on disease in animals.

V Pth 376. Veterinary Parasitology. (Dual-listed with 576.) (3-3) Cr. 4. S. Prereq: Second-year classification in veterinary medicine. Parasitic diseases of domestic animals and their control.

V Pth 377. Case Study III. (0-4) Cr. 2. F. Prereq: Second-year classification in veterinary medicine. Clinical applications of the basic sciences taught concurrently in the fall semester of the second year curriculum in veterinary medicine.

V Pth 401. Basics of Medical Terminology. (1-0) Cr. 1. F. 8 weeks. Offered second half semester only. Discussion of prefixes, suffixes, and roots (mostly from Latin and Greek) that comprise medical terms.

V Pth 406. Surgical Pathology. (1-0) Cr. 1. S. Prereq: 372. Biopsies and associated cases reviewed with students in a seminar format. Interpretation of histopathologic findings as an adjunct to diagnosis, prognosis, and management of clinical cases.

V Pth 407. Parasites of Laboratory and Exotic Animals. (1-0) Cr. 1. S. Prereq: Third- or fourth-year classification in veterinary medicine. Discussion of important parasitisms occurring as natural infections in laboratory animals and exotic pet animals. Rodents, primates, reptiles, and caged birds are examples of hosts discussed.

V Pth 408. Clinical Pathology Interpretation. (1-0) Cr. 1. S. Prereq: 425. Interpretation of laboratory data on a series of clinical cases supplemented by current literature review.
Women’s Studies

www.public.iastate.edu/~womenstu/wsprogram.htm

Undergraduate Study

Women’s Studies in the College of Liberal Arts and Sciences is a cross-disciplinary program in which students may elect a minor or a major. Women’s Studies provides an opportunity for students to examine women’s roles, contributions, and status in social and cultural context and to investigate a variety of disciplines from feminist perspectives. Women’s Studies creates an understanding that interrelated factors—e.g., race, ethnicity, class, age, disability, religions, national origin, and sexual orientation—inform knowledge of women’s history, culture, and social roles. Women’s Studies seeks to improve critical thinking and to provide students with the intellectual means to question prevailing assumptions. It encourages students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. It promotes social responsibility by examining the connections between personal experience and political activity, and validates student contributions and voices. Women’s Studies graduates are skilled in critical thinking, research methods, and effective communication. Because they have developed a thorough understanding of gender, race, and class, they can understand and work effectively with employers, colleagues, and clients to analyze and address complex social problems.

Women’s Studies graduates acquire strong backgrounds for careers in such areas as counseling, education, human resources, public policy, politics, business, or law. The program includes at various times core courses in Women’s Studies and cross-listed courses in anthropology, art history, classical studies, economics, English, foreign languages and literatures, history, health and human performance, political science, psychology, religious studies, sociology, speech communication, and zoology.

An undergraduate major requires 33 credits of core, cross-listed, and independent study courses. Women’s Studies majors must satisfy the following requirements:

1. 18 credits selected from women’s studies core courses (W S).
   A. Required core courses: W S 201, 301, and 401 or 402. Students must also choose between a thesis, W S 499 (3 cr.) or an internship, W S 491 (3 cr.).
   B. The remaining 6 credits should be chosen from the Women’s Studies core courses (W S 450 and 301 may be taken more than once).
   C. No more than 6 credits of W S 490 may be counted toward the W S major.
   D. 15 credits selected from W S cross-listed courses or W S core courses.

Women’s Studies majors may also declare either a minor or a second major in a different program or department.

English proficiency requirement: The Women’s Studies major requires an average grade of C- or better in English 104 and 105 (or 105H) and successful completion of either English 305, English 314 or a foreign language 370 course (literature and culture in English translation).

Undergraduate students may minor in Women’s Studies by taking 15 semester hours of Women’s Studies classes, including W S 201, 301 and one 400 level core Women’s Studies course, plus 6 additional credits of core or cross-listed courses.

Because course listings vary from year to year, any student interested in a minor or major in Women’s Studies should contact the chair of the program committee for advising. (See Index, Cross-Disciplinary Programs)

The following women’s studies courses are applicable to the human relations requirement for teachers: 201, 327, 340, 345, 346, 370, 385, 386. (See Index, Teacher Education Program)

Graduate Study

Courses open for nonmajor graduate credit: 301, 321, 323, 336, 340, 345, 350, 394, 401, 402, 422, and 450.

Courses Primarily for Undergraduate Students

W S 201. Introduction to Women’s Studies. (3-0) Cr. 3. F.S. Introduction to the interdisciplinary field of Women’s Studies. Contemporary status of women mainly in the United States from social, economic, historical, political, philosophical and literary perspectives. Analysis of intersection of gender, race, class, and sexuality. Topics include work, health, sexuality, violence, and sport. Background for the other courses in the program.

W S 203. Lesbian Cultures and Communities. (3-0) Cr. 3. An exploration of contemporary and historically and socially relevant cultures and communities in the United States, examining their roots, politics, populations, and conflicts from multiple perspectives.

W S 301. International Perspectives on Women and Gender. (3-0) Cr. 3. May be repeated for up to 6 credits. F. Prereq: 201 or 3 credits in Women’s Studies at the 300 level or above. Study of women in a range of cultures, depending on faculty expertise. Special emphasis on women in development seen in postcolonial context. Nonmajor graduate credit.

W S 321. Economics of Discrimination. (Same as Econ 321.) See Economics. Nonmajor graduate credit.

W S 323. Gender and Communication. (Same as Sp Cm 323.) See Speech Communication. Nonmajor graduate credit.

W S 327. Sex and Gender in Society. (Same as Soc 327.) See Sociology.

W S 328. Sociology of Masculinities and Manhood. (Same as Soc 328.) See Sociology.

W S 340. Survey of Women’s Literature. (Same as Eng 340.) See English. Nonmajor graduate credit.

W S 345. Women and Literature: Selected Topics. (Same as Engl 345.) See English. Nonmajor graduate credit.

W S 346. Psychology of Women. (Same as Psych 346.) See Psychology.

W S 350. African American Women. (Same as Afr Am 350.) (3-0) Cr. 3. S. Prereq: 201 or Afr Am 201 or 3 credits in Women’s Studies or African American Studies at the 300 level or above. Economic, social, political and cultural roles of African American women in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored. Nonmajor graduate credit.

W S 374. Women in Classical Antiquity. (Same as Cl St 374.) See Classical Studies.

W S 385. Women in Politics. (Same as Pol S 385.) See Political Science.

W S 386. History of Women in America. (Same as Hist 386.) See History.

W S 394. Women in Art. (Same as Art H 394.) See Art History. Nonmajor graduate credit.

W S 401. Feminist Theories. (3-0) Cr. 3. F. Prereq: 201 or 3 credits in Women’s Studies at the 300 level or above. Current theories of feminism, the feminine and sexual difference. Problems in race, class, sexuality, ethnicity as they are developed in diverse feminisms. May include readings in lesbian, Black, post-colonial, psychoanalytic and postmodern thought. Nonmajor graduate credit.

W S 402. Feminist Research Methodologies and Scholarship. (3-0) Cr. 3. S. Prereq: 201 and 301. Introduction to feminist research methods and the history and influence of feminist research. Examination of scholarly works by U.S. and international feminists. Nonmajor graduate credit.

W S 422. Women, Men, and the English Language. (Same as Engl 422.) See English. Nonmajor graduate credit.

W S 450. Topics in Women’s Studies. (3-0) Cr. 3 each time taken, maximum of 6. S. Prereq: 201 or 3 credits in Women’s Studies at the 300 level or above. Special and/or experimental topics in a specific discipline, e.g., women and education, women and religion, women and the law, women and science. Nonmajor graduate credit.

W S 490. Independent Study. Cr. 1 to 3 each time taken, maximum of 6. S. Prereq: Any two courses in Women’s Studies, permission of instructor. The director of the Women’s Studies Program Committee must be consulted in advance.

W S 491. Senior Internship. (3-0) Cr. 3. S.F.S.S. Prereq: Senior classification. Internship designed to provide an application of Women’s Studies principles and methods in a workplace. To be arranged with an internal or external employer and conducted under the supervision of a member of the Women’s Studies faculty.

W S 499. Senior Thesis. (3-0) Cr. 3. S.F.S.S. Prereq: Senior classification. Senior thesis to be independently researched and written under the supervision of a member of the Women’s Studies faculty.

Courses for Graduate Students, Open To Qualified Undergraduate Students

W S 523. Gender Roles and Sport. (Same as Ex Sp 523.) See Health and Human Performance.

W S 528. Sociology of Gender. (Same as Soc 528.) See Sociology.

W S 545. Women’s Literature. (Same as Engl 545.) See English.

W S 590. Special Topics. Cr. var. Prereq: Permission of Women’s Studies Program Committee. Independent study on a topic in Women’s Studies.

W S 594. Women in Art. (Same as Art H 594.) See Art History.
Courses Offered by Other Departments

Engl 304. Creative Writing - Fiction. See English. Acceptable only when offered as a course on women’s writing.

Frnc 370. French Studies in English. See Foreign Languages and Literatures. Acceptable only when offered as a course on women or feminism in French literature.

Ger 370. German Studies in English. See Foreign Languages and Literatures. Acceptable only when offered as a course on women or feminism in German literature.

Zoology and Genetics

www.mbb.iastate.edu/htm/index.html

M. Duane Enger, Chair of Department

University Professors: Dolphin

Professors: Ackerman, Atherly, Campbell, Drewes, Enger, Haydon, Henderson, Howell, J. Johansen, Lee, Mayfield, Myers, T. Peterson, Richmond, Schnable, Shen

Distinguished Professor (Emeritus): Ulmer

University Professor (Emeritus): Stadler

Professors (Collaborators): Palmer, Paradise, Shoemaker

Professors (Emeritus): Bishop, Brown, Buttrey, Holland, Imsande, Jeska, Miller, Mutchmor, Pattee, Pollak, Redmond, Robertson, Welshons

Associate Professors (Adjacent): D. Vleck, Wang

Associate Professors (Collaborators): Link, Mahajan, Tucker

Associate Professor (Emeritus): Shaw

Assistant Professors: Becraft, Chou, Gu, Naylor, Powell-Coffman

Assistant Professors (Adjacent): Coffman, Pleasants

Assistant Professor (Collaborators): Bricker

Instructors (Adjacent): Carlson, Leschem-Ackerman

Instructor (Collaborator): Bowman

Undergraduate Study

The department offers majors in genetics, zoology and co-administers biology. The zoology and genetics majors are available to students in both the College of Agriculture and the College of Liberal Arts and Sciences. The programs for these majors are listed below and under the Curricula in Agriculture. College requirements can be found under Curricula in Agriculture and Curriculum in Liberal Arts and Sciences. The department offers minors in both genetics and zoology. B.S./M.S. programs are available in which a student, with proper planning, can complete the requirements for both bachelor’s and master’s degrees in five years. Students interested in the B.S./M.S. program must apply during their sophomore year.

Training in genetics, zoology or biology may lead to employment in teaching, research, or any of a variety of health-related professions. In most cases, students should plan on continuing their education in graduate or professional school. Students with the B.S. degree may expect to find employment in the biotechnologgy, health, or food industries. Recent graduates have also developed careers in conservaion biology, technical writing, science journalism, technical sales, business, and genetic counseling.

The required course work and associated electives are designed to provide students with knowledge of the basic biological sciences, mathematics, chemistry, and physics. This background is essential for professions involving modern biological sciences. As part of these courses, students develop skills in problem solving, critical thinking, writing, research-related activities and an introduction to biological professions.

The respective communications and English proficiency requirements of both colleges are met by an average of C or better in Engl 104, 105 or 105H, and an additional English writing course. The lowest grade acceptable in any of these courses is C-. Students in the College of Agriculture must also achieve a C or better in an oral communications course.

A grade of C– or better is required in all biological science courses within the majors with a cumulative GPA of at least 2.0.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling preprofessional requirements for such professions as cytotechnology, dental hygiene, dentistry, human medicine, medical technology, nursing, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in either genetics or zoology while fulfilling the preprofessional requirements. (See Preprofessional Study.)

Genetics

Genetics is the scientific study of heredity. The understanding of heredity is fundamental to all the biological sciences. The department offers a full range of instruction in all aspects of genetics from the molecular genetics of microorganisms to population genetics.

In addition to basic degree requirements listed in the Curricula in Agriculture or the Curriculum in Liberal Arts and Sciences, genetics majors must satisfy the following requirements:

2. Gen 110, 410, 411, 491, and either 462 or 563.
3. Eleven credits of calculus and statistics including at least one course in each.
4. Three years of chemistry and biochemistry.
5. One year of general college physics.
6. Nine credits for the degree in the College of Agriculture, and 6 credits for the degree in the College of Liberal Arts and Sciences, of support electives chosen from an approved list.
7. Majors in the College of Liberal Arts and Sciences must take one course that involves both humanities and biology such as history of science or bioethics. This course may also count toward a college group requirement. A list of acceptable courses is available from the departmental office.
8. Majors in the College of Agriculture must include Biol (A Ecl) 312 in their program.

The department offers a minor in genetics that may be earned by completing Biol 301, 301L, 302, 302L, Gen 410, 411 and 491. A Genetics major may not double major or minor in Biology.

Zoology

The study of zoology includes all aspects of animal life. The department offers instruction in a wide range of zoological subjects ranging from the structure and function of cells to the behavior of animals and their populations.

In addition to the basic degree requirements listed in the Curricula in Agriculture and the Curriculum in Liberal Arts and Sciences, zoology majors (including those preparing for professional programs in medical and other health-related fields) must complete satisfactorily the following requirements:

2. Zoology electives: 17 credits in zoology at the 300 level or above are required including seven credits at the 400 level or above and two laboratory courses with at least one at the 400 level. Biol 312, 303, and Gen 462 are also acceptable electives. A maximum of 4 credits of 490R and no credits of 490S and 490U may be used toward the 17 credits; however, only 2 credits of 490R may be applied to the requirement of seven 490 or above credits and no 490R credits can be applied to the laboratory requirement. The 17 credits must also include at least one organizational course.
3. Two years of chemistry or biochemistry totaling 15 credits to include one year of general chemistry with laboratory and at least one semester of organic chemistry with laboratory.
4. Eleven credits of calculus and statistics including at least one course in each.
5. One year of general college physics.
6. Majors in the College of Liberal Arts and Sciences must take one course that involves both humanities and biology such as history of science or bioethics. This course may also count toward a college group requirement. A list of acceptable courses is available in the department office.
7. Majors in the College of Agriculture must take 6 credits of agricultural biology electives. This requirement is satisfied by passing six credits at the 300 level or above from the departments of Animal Ecology, Animal Science, or Entomology.
8. Majors in the College of Agriculture must include Biol (A Ecl) 312 in their program.
Genetics (Gen)

Courses Primarily for Undergraduate Students

Gen 110. Genetics Orientation. (1-0) Cr. 0.5. F. First 8 weeks. Orientation to the area of genetics. For students considering a major in genetics. Specializations and career opportunities. Offered on a satisfactory-fail grading basis only.

Gen 260. Human Heredity and Society. (3-0) Cr. 3. F. Prereq: One semester of college biology or Anthr 202. A survey course in genetics for non-biology majors interested in heredity and its importance, and implications to self and society. Not recommended for those intending to take advanced courses in genetics. Credit for graduation will not be allowed for more than one of the following: 260, 301, 320, Biol 301 and 301L, and Agron 320.

Gen 296. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Gen 301. Principles of Genetics. (Same as Biol 301.) See Biology. Credit for graduation will not be allowed for more than one of the following: 260, 301, 320, Biol 301 and 301L and Agron 320.

Gen 301L. Principles of Genetics Laboratory. (Same as Biol 301L.) See Biology.

Gen 320. Genetics, Agriculture and Biotechnology. (Same as Agron 320.) (3-0) Cr. 3. F. S. Prereq: Biol 202. Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: 260, 301, 320, Biol 301 and 301L and Agron 320.

Gen 340. Human Genetics. (3-0) Cr. 3. S. Prereq: Biol 301 or Gen 301. Fundamental concepts and current issues of human genetics. Human chromosome analysis, pedigree analysis, gene mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics.

Gen 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Gen 411. Molecular Genetics. (3-0) Cr. 3. S. Prereq: Biol 302. The principles of molecular genetics: gene function and structure at the molecular level, including regulation of gene expression, genetic rearrangement, and the organization of genetic information in prokaryotes and eukaryotes. Nonmajor graduate credit.

Gen 462. Evolutionary Genetics. (Dual-listed with 462; same as Zool 462.) (3-0) Cr. 3. S. Prereq: Biol 303. The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.
Courses and Programs

Zoology and Genetics 335

Zool 403I. Evolution. (Same as Ia LL 403I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Zool 404I. Behavioral Ecology. (Same as Ia LL 404I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Zool 405. Biology of Invertebrates. (Dual-listed with 508.) (3-0) Cr. 3 or (3-3) Cr. 4. F. Prereq: Biol 302. Emphasis on diversity, development, physiology and behavior of invertebrate organisms - the "spineless wonders" of the world. Laboratory emphasizes hands-on study and experimentation with living invertebrates. Nonmajor graduate credit.

Zool 415I. Freshwater Invertebrates. (Same as Ia LL 415I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Zool 419. Vertebrate Ecology and Evolution. (Same as Ia LL 419I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Zool 420I. Amphibians and Reptiles. (Same as Ia LL 420I.) See Iowa Lakeside Laboratory. Nonmajor graduate credit.

Zool 433. Developmental Biology. (Dual-listed with 533; same as Biol 433.) (3-0) Cr. 3. S. Prereq: Biol 302. Principles of multicellular development, from gametogenesis and fertilization through reproductive maturity. Emphasis is placed on understanding the underlying mechanisms that govern developmental processes.

Zool 433L. Developmental Biology Laboratory. (Same as Biol 433L.) (3-0) Cr. 1. S. Prereq: Credit or enrollment in 433. Experiments and explorations illustrating fundamental principles of multicellular development.

Zool 454. General and Comparative Endocrinology. (Dual-listed with 554.) (3-0) Cr. 3 or (3-3) Cr. 4. S. Prereq: 355 and Biol 302. Chemical integration of vertebrate organ systems and evolution of the control of various functions, reproduction, and behavior. Nonmajor graduate credit.

Zool 459. Environmental Physiology. (Dual-listed with 559.) (3-0) Cr. 3 or (3-3) Cr. 4. S. Prereq: 355 or A Ec 311; physics recommended. Physiological adaptations to the environment, emphasis on vertebrates. Nonmajor graduate credit.

Zool 462. Evolutionary Genetics. (Dual-listed with 562; same as Gen 462.) See Genetics. Nonmajor graduate credit.

Zool 490. Independent Study. Prereq: 15 credits in zoological sciences; permission of instructor. Students in the College of Agriculture may use no more than 6 credits of 490 toward the total of 128 credits required for graduation; students in the College of Liberal Arts and Sciences may use no more than 9 credits of 490 toward graduation. I. Iowa Lakeside Laboratory. R. Zoology research. Cr. 1 to 5 each time taken. S. Attendance and critique of zoology seminars. Cr. 1. Offered on a satisfactory-fail grading basis only. U. Laboratory teaching experience. Cr. 1 to 2. For students registering to be undergraduate laboratory assistants. Offered on a satisfactory-fail grading basis only.

Zool 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Zool 556. Computational Genomics and Evolution. (Same as BC B 556.) (3-0) Cr. 3. S. Prereq: Biol 301. Gu. Introduction to evolutionary sequence analysis at the genome level. Topics include sequence alignment, phylogenetic inference, molecular clock analysis, ancestral state inference, sequence/structure relation, functional divergence and prediction, evolutionary development, genome duplication, and comparative genomics. Focus will be on data analysis and biological interpretation.

Zool 562. Evolutionary Genetics. (Dual-listed with 462; same as Bot 562, Zool 562.) (3-0) Cr. 3. S. Prereq: Biol 302. Graduate study in conjunction with 462. The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.

Zool 566. Molecular Evolution. (Same as Bot 566.) See Botany.

Zool 590. Special Topics. Cr. 1 to 3. Prereq: 301 or 320.

Zool 594, Computational Molecular Biology. (Same as BC B 594, Com S 594, Math 594.) (3-0) Cr. 3. S. Prereq: Biol 301 and 302 or Math 304 and 307; Math 317 may be used instead of Com S 311 and 330 or equivalent courses. Introduction to the biological background and the algorithms used in sequence comparison and database search, fragment assembly and physical mapping of DNA, building of phylogenetic trees, analysis of genome rearrangement, and molecular structure prediction. Practice with some of the software commonly used for these problems.

Zool 598. Genomic Data Processing. (Same as BC B 598, Com S 598.) (3-0) Cr. 3. F. Prereq: Com S 208 or 228, and Com S 311. Chou. Introduction to major computational methods relevant to modern molecular biology research. Topics include database construction, search and update; data collection and dissemination through Internet; sequence alignment and comparison methods; structure recognition and prediction algorithms; shotgun assembly procedures and algorithms, and scripting languages for linking together an automatic biological data processing pipeline. Focus will be on the analysis and actual implementation of these algorithms.

Courses for Graduate Students

Gen 615. Molecular Immunology. (Same as BBMB 615.) See Biochemistry, Biophysics and Molecular Biology.

Gen 657. Nucleic Acid Structure and Function. (Same as BBMB 675.) See Biochemistry, Biophysics and Molecular Biology.

Gen 696. Seminar in Plant Physiology and Molecular Biology. (Same as Bot 696.) See Botany.

Gen 698. Seminar in Molecular, Cellular, and Developmental Biology. (Same as MCDB 698.) See Molecular, Cellular, and Developmental Biology.

Gen 699. Research.

Zoology (Zool)

Courses Primarily for Undergraduate Students

Zool 110. Zoology Orientation. (1-0) Cr. 0.5. F. First 8 weeks. Orientation to the area of zoology. For students considering a major in zoology. Specializations and career opportunities in the zoological sciences, including medically related professions. Offered on a satisfaction-fail grading basis only.

Zool 155. Basic Human Physiology and Anatomy. (3-0) Cr. 3. F.S.SS. Prereq: H. biology and chemistry or Biol 109 or 109I Anatomy and Physiology, recommended. The structure and functions of human organ systems.

Zool 156. Laboratory in Human Physiology and Anatomy. (0-4) Cr. 2. F.S.SS. Prereq: Credit or enrollment in 155. Introduction to selected aspects of human anatomy and physiology through the use of models, specimens, and student conducted experiments.

Zool 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Zool 301I. Iowa Natural History. (Same as Ia LL 301I.) See Iowa Lakeside Laboratory.

Zool 303, Biological Evolution. (Same as Biol 303.) See Biology.

Zool 304L. Laboratory in Animal Behavior. (0-3) Cr. 1. F. Prereq: Credit or enrollment in 304. Laboratory techniques for observation, description and analysis of animal activities; independent projects.

Zool 310. Brain and Behavior. (Same as Psych 310.) See Psychology.

Zool 311. Introduction to Parasitology. (Same as Micro 311.) (3-3) Cr. 4. F. Prereq: Biol 202. Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasitic infections.

Zool 312. Ecology. (Same as Ia LL 312I.) See Iowa Lakeside Laboratory.

Zool 320. Comparative Chordate Anatomy. (3-4) Cr. 5. F. Prereq: Biol 202, junior classification. The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates; comparisons of anatomical structures among major groups, the adaptive significance of anatomical structures. Laboratory involves dissection of representative species.

Zool 334. Embryology. (2-0) Cr. 2. S. Prereq: Biol 202. Basic principles and processes of development. Course will cover classical as well as current aspects of development in biology. Emphasis will be on vertebrate model systems. Not acceptable for credit in the major for Genetics or Zoology majors.

Zool 334L. Embryology Laboratory. (0-3) Cr. 1. S. Prereq: Credit or enrollment in 334. Selected experiments demonstrating basic concepts in development. Mixture of live embryo experiments and vertebrate developmental anatomy.

Zool 355. Principles of Physiology. (3-4) Cr. 5. S. Prereq: Biol 302. Introduction to systemic functions with emphasis on mammals. Nonmajor graduate credit.

Zool 383. Women in Science and Engineering. (Same as W S 383.) (3-0) Cr. 3. Alt. F., offered 2001. Prereq: A 200 level course in science, engineering or women's studies, Engl 105. The interrelationships of women and science and engineering examined from historical, sociological, philosophical, and biological perspectives. Factors contributing to under-representation, feminist critiques of science, examination of sexism in science.

Zool 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.
Courses Primarily for Graduate Students, Open to Qualified Undergraduate Students

Zool 501. Principles of Toxicology. (Same as Tox 501, VDPM 501.) See Toxicology or Veterinary Diagnostic and Production Animal Medicine.

Zool 502. Methods of Toxicology. (Same as Tox 502, VDPM 502.) See Toxicology or Veterinary Diagnostic and Production Animal Medicine.

Zool 505. Biology of Invertebrates. (Dual-listed with 405.) (3-3) Cr. 3 or (3-2) Cr. 4. Prereq: Biol 302. Emphasis on diversity, development, physiology, and behavior of invertebrate organisms - the "spineless wonders" of the world. Laboratory emphasizes hands-on study and experimentation with living invertebrates.

Zool 507. Advanced Animal Behavior. (2-0) Cr. 2. S. Prereq: 304, permission of instructor. Analysis of current research in animal behavior with emphasis on physiological or endocrine control mechanisms.

Zool 510. Histology and Pathology of Fish Diseases. (Same as A Ecol 510.) (2-3) Cr. 3. Alt. S., offered 2002. Prereq: A course in vertebrate histology or ichthyology. Histology of teleost fishes; pathology biology and analysis of cell and tissue changes in the major teleost diseases.

Zool 511. Field Parasitology. (Same as a LL 5111.) See Iowa Lakeside Laboratory.

Zool 528. Cellular Growth and Regulation. (Same as MCDB 528.) (3-0) Cr. 3. F. Prereq: Courses in cell biology and biochemistry. Cell cycle, regulation of cell growth, cell division, membranes, transport processes, and regulation of cellular activities.

Zool 540. Signal Transduction. (Same as BBMB 540, MCDB 540.) (3-0) Cr. 3. S. Prereq: 528, BBMB 404. Mechanisms and components of cellular signal transduction including receptors, G-proteins, second messengers, protein phosphorylation, other post-translational protein modifications, and transcriptional regulation.

Zool 542. Introduction to Molecular Biology Techniques. (Same as BBMB 542, Bot 542, FS HN 542, BMS 542.) Cr. 1 per module. F.S.SS. Prereq: Graduate classification. Workshop in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail grading basis only.

Zool 554. General and Comparative Endocrinology. (Dual-listed with 454.) (3-3) Cr. 3 or (3-3) Cr. 4. S. Prereq: 355 and Biol 202. Graduate study in conjunction with 454. Chemical interaction of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones. Laboratory techniques for studying hormonal phenomena. Laboratory experiments require animal surgery and involvement outside of scheduled class time.

Zool 556. Neurobiology. (Dual-listed with 456; same as Neuro 556.) (3-0) Cr. 3 or (3-3) Cr. 4. F. Prereq: 355 or 310; physics recommended; permission of instructor to enroll in lab. Graduate study in conjunction with 456. Integration, coding, plasticity, and development in nervous systems.

Zool 557. Advanced Neuroscience Techniques. (Same as Neuro 557.) See Neuroscience.

Zool 559. Environmental Physiology. (Dual-listed with 459.) (3-0) Cr. 3 or (3-3) Cr. 4. F. Prereq: 355 or A Ecol 371, physics recommended. Graduate study in conjunction with 459. Physiological adaptations to the environment with emphasis on vertebrates.

Zool 562. Evolutionary Genetics. (Dual-listed with 462; same as Gen 562.) See Genetics.

Zool 566. Molecular Evolution. (Same as Bot 566.) See Botany.

Zool 568. Advanced Systematics. (Same as Ent 568.) See Entomology.

Zool 569. Biogeography. (Same as Bot 579.) See Botany.

Zool 590. Special Topics. (Same as a LL 5901.) Cr. 1 to 5 each time taken. Prereq: Permission of instructor.

Zool 5901. Graduate Independent Study. (Same as a LL 5901.) See Iowa Lakeside Laboratory.

Courses for Graduate Students

Zool 632. Current Topics in Signal Transduction. Cr. 2 to 3 each time taken. Prereq: Permission of instructor. Selected topics in signal transduction events, their molecular mechanisms and their relation to cellular processes. Topics may include signal transduction, second messenger systems, integration and transfer, cell cycle, cell differentiation, and pattern formation.

Zool 660. Current Topics in Neurobiology and Behavior. (Same as Neuro 660.) Cr. 2 to 3 each time taken. Prereq: Permission of instructor. Topics may include communication, hormones and behavior, neural integration, developmental neurobiology, neuroanatomy and ultrastructure, sensory biology, social behavior, techniques in neurobiology and behavior.

Zool 690. Seminar in Zoology. Cr. 1 each time taken. Journal article critique and discussion by faculty and graduate students. Offered on a satisfactory-fail grading basis only.

Zool 696. Research Seminar. Cr. 1 each time taken. Research seminars by faculty and graduate students. Offered on a satisfactory-fail grading basis only.

Zool 698. Seminar in Molecular, Cellular, and Developmental Biology. (Same as MCDB 698.) See Molecular, Cellular, and Developmental Biology.

Zool 699. Research. 1. Iowa Lakeside Laboratory. See Iowa Lakeside Laboratory.

Courses Offered at the Gulf Coast Research Laboratory (GCRL), Ocean Springs, Mississippi

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for the following University of Southern Mississippi/ GCRL courses and transfer them to their ISU degree programs. Written permission of the ISU coordinator for the GCRL, 201 Bessey, is required for this arrangement. Inquire at 201 Bessey for further information.

MAR 301. Marine Biology. Cr. 3. SS. Prereq: 8 semester hours of biological sciences. A general introduction to marine biology with emphasis on local fauna and flora.

MAR 301L. Marine Biology Lab. Cr. 2. SS. Lab to accompany 301.

MAR 403L. Marine Invertebrate Zoology Lab. Cr. 3. SS. Lab to accompany 403.

MAR 404. Parasites of Marine Animals. Cr. 3. SS. Prereq: 311. Study of the parasites of marine and estuarine animals with emphasis on morphology, taxonomy, life histories, and host-parasite relationships.

MAR 404L. Parasites of Marine Animals Lab. Cr. 3. SS. Lab to accompany 404.

MAR 408L. Marine Ichthyology Lab. Cr. 3. SS. Lab to accompany 408.

MAR 430. Comparative Histology of Marine Organisms. Cr. 3. SS. Prereq: Permission of instructor. Detailed study of the histological organization of representative marine organs at the light and electron microscope levels.

MAR 430L. Comparative Histology of Marine Animals Lab. Cr. 3. SS. Lab to accompany 430.
**Distinguished Professor** denotes those faculty members who have been recognized for having attained outstanding national and international reputations within their professional disciplines.

**University Professor** denotes those faculty members who have been recognized for having made outstanding contributions to the quality of education at Iowa State University.

* denotes active member of the Graduate Faculty.

**ABELSON, ROBERT E.,** Emeritus Professor of Psychology. B.A., 1988, Wisconsin.

**ABENDROTH, ROBERT E.,** Emeritus Professor of Psychology. B.A., 1976, Wisconsin.

**ABUK-CURR, CIGDEM T.,** Assistant Professor of Veterinary Microbiology and Preventive Medicine. B.V.Sc., 1962, Cairo; M.Sc., 1970, Hanover.

**ADAMS, ROY DEAN,** Emeritus Professor of Biomedical Sciences; University Professor. A.B., 1963, California (Davis); M.S., 1967, Purdue; Ph.D., 1970, California (Davis).

**ADAMS, DONALD R.,** Emeritus Professor of Biomedical Sciences; University Professor. A.B., 1963, California (Davis); M.A., 1967, Chico State; Ph.D., 1970, California (Davis).

**AGARWAL, SANJEEV,** Associate Professor of Marketing. B.E., 1979, Roorkee (India); M.S., 1980, California (Davis); Ph.D., 1986, M.A., 1986, Ohio State.

**AGINSKY, VERA,** Adjunct Assistant Professor of Foreign Languages and Literatures. B.A., 1972, Minsk State Pedagog Institute; M.A.T., 1992, Drake; Ph.D., 1999, Middlebury College.

**AHLMANN, JOHN SMITH,** Emeritus Professor of Education; Professor of Leadership and Policy Studies; Emeritus Professor of Psychology. Distinguished Professor in Education. B.A., 1943, Trinity; B.S., 1947, M.S., 1949, Ph.D., 1951, Iowa State.

**AKINC, MUFUR,** Emeritus Professor of Materials Science and Engineering and Chair of the Department. B.S., 1970, M.S., 1973, Middle East Technical (Turkey); Ph.D., 1977, Iowa State.

**AKKURT, CIGDEM T.,** Assistant Professor of Food Science and Human Nutrition. B.S., 1979, Cornell; M.S., 1982, Massachusetts.

**AL-KAISI, MAHDI,** Assistant Professor of Agronomy. B.S., 1974, Baghdad; M.S., 1982, Ph.D., 1986, North Dakota State.

**ALBRIGHTSON, GARY N.,** Adjunct Assistant Professor of English. B.A., 1980, Minot State College; M.A., 1980, North Dakota.

**ALCORN, JANEL W.,** Emeritus Associate Professor of Music. B.Mus., 1958, Northwestern; M.Mus., 1960, Boston University.

**ALEKEL, D. LEE,** Assistant Professor of Food Science and Human Nutrition. B.S., 1979, Cornell; M.S., 1982, Pennsylvania State; Ph.D., 1983, Iowa State.

**ALEXANDER, ROGER K.,** Associate Professor of Mathematics. B.A., 1968, Kansas; M.A., 1974, Ph.D., 1975, California (Berkeley).

**ALEN, BENJAMIN J.,** Professor of Logistics, Operations and Management Information Systems; Professor of Economics; Distinguished Professor in Business; Dean of the College of Business. B.S., 1969, Indiana; M.A., 1973, Ph.D., 1974, Illinois.

**ALEN, BEVERLY,** Assistant Professor of Sociology. B.S.W., 1975, M.S.W., 1977, Temple; Ph.D., 1995, Iowa State.

**ALEN, CRAIG MARSHALL,** Associate Professor of Human Development and Family Studies. B.S., 1972, M.S., 1975, Brigham Young; Ph.D., 1980, New Hampshire.

**ALEN, LINDA QUINN,** Assistant Professor of Foreign Languages and Literatures; Assistant Professor of Curriculum and Instruction. B.A., 1978, Purdue; M.A., 1982, Ball State; Ph.D., 1994, Purdue.

**ALEN, VIRGINIA,** Associate Professor of English; Associate Professor of Curriculum and Instruction. B.A., 1965, Florida State; M.A., 1972, Chicago State; Ph.D., 1980, Florida State.

**ALRU, SRIYOVAS,** Assistant Professor of Electrical and Computer Engineering; Assistant Professor of Computer Science. B.Tech., 1989, Indian Institute of Technology; M.S., 1991, Ph.D., 1994, Iowa State.

**AMAYA, JOSE M.,** Assistant Professor of English. B.A., 1987, California State (Northridge); Ph.D., 1995, California (Los Angeles).

**AMBROSIO, LINDA,** Associate Professor of Zoology and Genetics. B.S., 1976, New York (Stony Brook); M.S., 1985, Princeton.

**ANDERSON, CARL E.,** Associate Professor of Agricultural and Biosystems Engineering. B.S.A.E., 1962, Pennsylvania State; M.S.A.E., 1965, Arizona; Ph.D., 1975, Kansas State.

**ANDERSON, CYNTHIA D.,** Assistant Professor of Sociology. B.A., 1987, William and Mary; M.S., 1990, Virginia Polytechnic Institute; Ph.D., 1996, North Carolina State.

**ANDERSON, IVER ERIC,** Adjunct Professor of Materials Science and Engineering. B.S., 1975, Michigan Tech; M.S., 1977, Ph.D., 1982, Wisconsin.

**ANDERSON, JULIA F.,** Emeritus Professor of Family and Consumer Sciences Education and Studies. B.S., 1941, Iowa State; M.S., 1947, Washington.

**ANDERSON, KEVIN F.,** Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1975, Iowa Wesleyan; M.S., 1983, Western Illinois.

**ANDERSON, LINDA LOU,** Adjunct Instructor in English. B.S., 1969, Northwest Missouri; M.A., 1974, Louisiana State.

**ANDERSON, LLOYD LEE,** Professor of Animal Science; Charles F. Curtiss Distinguished Professor in Agriculture. B.S., 1957, Ph.D., 1961, Iowa State.

**ANDERSON, MARVIN A.,** Emeritus Professor of Agronomy. B.S., 1939, M.S., 1949, Ph.D., 1955, Iowa State.

**ANDRE, THOMAS,** Professor of Curriculum and Instruction; Professor of Psychology. B.S., 1967, Massachusetts; M.A., 1970, Ph.D., 1971, Illinois.
**AATHEY, KRISHNA B.**, Professor of Mathematics; Professor of Statistics; Distinguished Professor in Liberal Arts and Sciences. B.A., 1959, Loyola (India); Ph.D., 1967, Stanford.

**ATHREYA, RICHARD E.**, Emeritus Professor of Agronomy. B.S., 1941, Kansas State; M.S., 1942, Ph.D., 1948, Iowa State.

**AYELE, MICHAEL D.**, Professor of Veterinary Medicine; Assistant Professor of Biomedical Sciences. B.S., 1959, St. Olaf; Ph.D., 1962, Northwestern.

**AYI-ARMEY, EMMANUEL**, Assistant Professor of Pharmacology. B.S., 1962, Kwame Nkrumah University of Science and Technology; M.S., 1964, Chulalongkorn University; Ph.D., 1967, University of California, Los Angeles.

**AZNAR, ANGEL**, Associate Professor of Chemistry; Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1983, Universidad de Zaragoza; M.S., 1987, University of California, Los Angeles; Ph.D., 1993, University of California, San Diego.

**BAILEY, THEODORE B. JR.**, Professor of Civil and Construction Engineering. B.A., 1948, University of Maine; M.S., 1949, Pennsylvania State University; Ph.D., 1952, University of California, Berkeley.

**BAKER, RAYMOND**, Professor of Computer Science. B.S., 1965, University of California, Berkeley; Ph.D., 1972, University of California, Los Angeles.

**BARTON, TOMMY J.**, Emeritus Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. B.S., 1962, Lamar; M.D., 1967, Florida.

**BARUA, ARUN**, Adjunct Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1957, Colton College (India); M.S., 1959, Ph.D., 1965, Gauhati (India).

**BATH, JOHN A.**, Emeritus Professor of Psychology; Emeritus Professor of Curriculum and Instruction. A.B., 1932, Peru State; M.A., 1933, Ph.D., 1942, Nebraska.

BÄRLAND, THOMAS, Emeritus Professor of Electrical Engineering. B.S., 1976, Georgia Tech; M.S., 1978, Iowa State; Ph.D., 1981, University of Texas at Austin.

BENNETT, ADRIAN, Emeritus Professor of Electrical and Computer Engineering. B.S., 1958, M.S., 1960, Iowa State; Ph.D., 1964, Iowa State.

BEETLE, JOHN, Emeritus Professor of Agricultural Economics. B.S., 1947, M.S., 1949, Iowa State; Ph.D., 1953, Iowa State.

BROOKS, JAMES, Emeritus Professor of Biological Sciences. B.S., 1962, M.S., 1964, Iowa State; Ph.D., 1968, University of California at Berkeley.

BROOKS, JAMES, Emeritus Professor of Biological Sciences. B.S., 1962, M.S., 1964, Iowa State; Ph.D., 1968, University of California at Berkeley.

**BOCKHOP, CLARENCE W.,** Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1943, M.S., 1955, Ph.D., 1957, Iowa State.

**BODGANOVA, ADAM J.,** Assistant Professor of Plant Pathology. B.S., 1987, Yale; Ph.D., 1997, Cornell.

**BOGUE, WILLIAM H.,** Associate Professor of Agricultural Education and Studies. B.S., 1968, M.S., 1972, Iowa State.

**BOHNENKAMP, JEANNETTE,** Emeritus Associate Professor of Food Science and Human Nutrition. B.A., 1953, Clarke; M.S., 1956, Iowa State.

**BOLES, DONALD E.,** Emeritus Professor of Animal Science. B.A., 1953, Clarke; M.S., 1956, Iowa State.

**BOOTH, LARRY C. JR.,** Associate Professor of Veterinary Clinical Sciences. B.V.M., 1973, Iowa State; M.S., 1976, Michigan State. (Fresno); M.A., 1980, Ph.D., 1983, California (Los Angeles).

**BOVINETTE, JAMES T.,** Emeritus Associate Professor of Veterinary Clinical Sciences. D.V.M., 1990, Iowa State.

**BOYD, MORTON MCKEE,** Emeritus Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1969, Pennsylvania State; M.S., 1962, Massachusetts.

**BOYD, PAUL M.,** Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1970, Iowa State.

**BOYLAN, DAVID RAY JR.,** Emeritus Professor of Chemical Engineering; Emeritus Dean of the College of Engineering. B.S., 1943, Kansas; Ph.D., 1952, Iowa State.

**BOYSTON, TERRI,** Emeritus Assistant Professor of Food Science and Human Nutrition. B.S., 1982, M.S., 1984, Iowa State; Ph.D., 1988, Michigan State.

**BOZIE, JOHN L.,** Emeritus Professor of Electrical and Computer Engineering; Anson Marston Professor of Engineering; Emeritus Dean of the College of Engineering. B.S., 1979, Iowa State; Ph.D., 1972, Liverpool.

**BREDEK, PRINCE, DAWN,** Associate Professor of Foreign Languages and Literatures. B.A., 1983, M.A., 1985, New York University; Ph.D., 1990, California (Berkeley).

**BRAHMACARA, DAKSHAYAN,** Emeritus Professor of Computer Science; Emeritus Professor of Electrical and Computer Engineering. B.E., 1946, Georgia Institute of Technology; M.S., 1950, Ph.D., 1954, Illinois.

**BREUER, BARBARA JANE,** Emeritus Associate Professor of Agricultural Education and Studies. B.S., 1972, M.S., 1977, Arizona State; Ph.D., 1992, Iowa State.

**BROWN, NANCY EVELYN,** Emeritus Associate Professor of Hotel, Restaurant, and Institution Management. B.S., 1960, Vermont; M.S., 1964, Kansas State; Ph.D., 1972, Iowa State.

**BRYAN, RICHARD GROVER,** Emeritus Professor of Electrical and Computer Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1948, M.S., 1951, Ph.D., 1956, Iowa State.

**BRETTING, PETER K.,** Associate Professor of Agronomy (Collaborator). B.S., 1975, Tulane; Ph.D., 1981, Indiana.

**BREWEN, KENNETH ALVIN,** Emeritus Professor of Civil and Construction Engineering. B.S.C.E., 1960, M.S., 1961, Kansas State; Ph.D., 1968, Texas A and M.

**BRICKER, BETSY J.,** Emeritus Associate Professor of Zoology and Genetics (Collaborator). B.A., 1973, California (Los Angeles); Ph.D., 1982, Iowa.

**BRONSON, MARY JANE,** Assistant Professor of Human Development and Family Studies. B.A., 1973, M.S., 1976, Nebaska (Omaha); Ph.D., 1985, Kansas.

**BROWER, WILLIAM K.,** Emeritus Professor of Veterinary Clinical Sciences and Chair of the Department. B.S., 1970, D.V.M., 1972, Liverpool; Ph.D., 1977, Bristol.

**BROWN, DONALD WAYNE,** Emeritus Professor of Accounting. B.A., 1942, Kansas State; M.B.A., 1946, Denver.

**BROWN, FREDERICK G.,** Emeritus Professor of Psychology; Emeritus Professor of Curriculum and Instruction; University Professor. B.A., 1964, M.A., 1955, Wisconsin; Ph.D., 1958, Minnesota.

**BROWN, GEORGE GORDON,** Emeritus Professor of Zoology and Genetics. B.S., 1959, M.S., 1961, Virginia Polytechnic Institute; Ph.D., 1966, Miami (Florida).

**BROWN, MARTHA M.,** Emeritus Instructor in Zoology; Emeritus Associate Professor of Agricultural Education and Studies. B.S., 1972, M.S., 1977, Arizona State; Ph.D., 1992, Iowa State.

**BROWN, NANCY EVELYN,** Emeritus Associate Professor of Hotel, Restaurant, and Institution Management. B.S., 1960, Vermont; M.S., 1964, Kansas State; Ph.D., 1972, Iowa State.

**BROWN, ROBERT GROVER,** Emeritus Professor of Electrical and Computer Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1948, M.S., 1951, Ph.D., 1956, Iowa State.

**BRUNER, NANCY EVELYN,** Emeritus Associate Professor of Human Development and Family Studies. B.S., 1966, Iowa State.

**CARRIOQUIRY, ALICIA L.** Associate Professor of Statistics; Associate Provost. B.S., 1982, Universidad De La Republica (Uruguay); M.S., 1985, Illinois; M.S., 1986, Ph.D., 1989, Iowa State.

**CABLE, JAMES KARL,** Associate Professor of Civil Engineering. B.S., 1964, M.S., 1976, Iowa State; Ph.D., 1994, Illinois.

**CAIN, BRYAN EDMUND,** Assistant Professor of Mathematics. B.S., 1963, Massachusetts Institute of Technology; M.S., 1964, Ph.D., 1968, Wisconsin.

**CAMBARDELLA, CYNTHIA ANN,** Associate Professor of Agronomy (Collaborator). B.S., 1975, Maryland; Ph.D., 1991, Colorado State.

**CAMPBELL, ANTHONY RAY,** Professor of Agronomy; Professor of Zoology and Genetics; B.S., 1965, M.S., 1976, Ph.D., 1987, Iowa State.

**CAMPBELL, JAMES R.** Assistant Professor of Textiles and Clothing. B.S., 1984, Wisconsin; M.S., 1969, Northern Illinois; Ph.D., 1976, Iowa.

**CARRIOQUIRY, ALICIA L.** Associate Professor of Statistics; Associate Provost. B.S., 1982, Universidad De La Republica (Uruguay); M.S., 1985, Illinois; M.S., 1986, Ph.D., 1989, Iowa State.

**CARTER, RICHARD I.** Professor of Agricultural Education and Studies; Professor of Curriculum and Instruction. B.S., 1966, M.S., 1968, Oklahoma State; Ph.D., 1976, Iowa State.

**CATRON, DOUGLAS M.** Associate Professor of English. B.S., 1969, Ohio State; M.S., 1971, Illinois State; Ph.D., 1978, Tulsa.

**CHACKO, THOMAS L.** Professor of Management. B.Sc., 1968, Madras (India); M.A., 1972, St. Francis; Ph.D., 1977, Iowa.

**CHAN, CHIU SHU,** Associate Professor of Architecture. B.S., 1974, University of Chinese Culture; M.Arch., 1982, Minnesota; Ph.D., 1990, Carnegie Mellon.

**CHANG, HSI CHIH,** Emeritus Professor of Sociology. B.A., 1944, Southwest Associated (China); M.S., 1965, Ph.D., 1968, Missouri.

**CHANG, TAO,** Assistant Professor of Industrial and Technology. B.S., 1980, National Central (Taiwan); M.S., 1986, Rose-Hulman; Ph.D., 1991, Auburn.

**CHAPLIN, MICHAEL H.** Professor of Horticulture and Chair of the Department. B.S., 1965, Kentucky; M.S., 1966, Rutgers; Ph.D., 1968, Michigan State.
CHARLES, DON C., Emeritus Professor of Psychology; Emeritus Professor of Curriculum and Instruction. B.A., 1941, Northern Iowa; M.A., 1947, Ph.D., 1951, Nebraska.
CHATFIELD, WALTER L., Emeritus Assistant Professor of Foreign Languages and Literatures; Emeritus Assistant Professor of Curriculum and Instruction. B.A., 1956, Augustana (Illinois); M.A., 1958, Iowa.
CHEN, CHING-SHIH, Associate Professor of Industrial Education and Technology. B.S., 1982, Tunghai (Taiwan); M.S., 1988, Ph.D., 1994, Auburn.
CHEN, DEGANG, Associate Professor of Electrical and Computer Engineering. B.S., 1984, Tsinghua (China); M.S., 1988, Ph.D., 1992, California (Santa Barbara).
CHEN, SHAOCHEN, Assistant Professor of Industrial and Manufacturing Systems Engineering. B.E., 1988, Tsinghua (China); M.S., 1995, Akron; Ph.D., 1999, California (Berkeley).
CHEN, TSING-CHANG, Professor of Meteorology. B.A., 1965, Taiwan Normal; M.S., 1968, National Central (Taiwan); M.A., 1972, Johns Hopkins; Ph.D., 1975, Michigan.
CHEVILLE, NORMAN F., Professor of Veterinary Pathology; Professor of Veterinary Microbiology and Preventive Medicine; Interim Dean of the College of Veterinary Medicine; Interim Director of the Veterinary Medical Research Institute. D.V.M., 1959, Iowa State; M.S., 1963, Ph.D., 1964, Wisconsin; Dr.H.C., 1986, Liege.
CHIDISTER, MARK J., Emeritus Assistant Professor of Curriculum and Instruction. B.A., 1982, Tunghai (Taiwan); M.S., 1988, Ph.D., 1992, California State (San Bernardino); Ph.D., 1990, Alabama.
CLAYTON, JOHN L., Emeritus Professor of Civil and Construction Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1950, M.S., 1951, Wisconsin; Ph.D., 1960, Iowa State.
CLEM, ANNE MARIE, Assistant Professor of Accounting. B.B.A., 1990, Iowa State; Ph.D., 1997, Texas.
CLEM, JOHN RICHARD, Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1960, M.S., 1962, Ph.D., 1965, Illinois.
COATS, JOEL, Professor of Entomology and Chair of the Department. B.S., 1970, Arizona State; M.S., 1972, Ph.D., 1974, Illinois.
COCHRAN, JAMES, Assistant Professor of Physics and Astronomy. B.S., 1988, Georgia Inst. of Technology; M.A., 1987, Ph.D., 1993, New York (Syracuse).
CODY, ROBERT, Associate Professor of Geological and Atmospheric Sciences. B.S., 1960, St. Louis; M.A., 1962, Wyoming; Ph.D., 1968, Colorado.
COFFMAN, CLARK, Adjunct Assistant Professor of Zoology and Genetics. B.S., 1986, Iowa State; Ph.D., 1993, California (La Jolla).
COLETTI, JOE PAUL, Associate Professor of Forestry. B.S., 1972, Humboldt; M.S., 1974, Ph.D., 1978, Wisconsin.
COLLINS, EDGAR V. JR., Emeritus Associate Professor of Chemical Engineering. B.S., 1944, Louisiana State; M.S., 1947, Iowa State.
COVIN, THOMAS, Professor of Agricultural and Biosystems Engineering (Collaborator); B.S., 1970, Ph.D., 1971, Iowa State.
COGNER, RICHARD, Professor of Sociology, Professor of Psychology. B.S., 1972, Arizona State; M.A., 1974, Ph.D., 1976, Washington.
CONSTANT, KRISTEN P., Associate Professor of Materials Science and Engineering. B.S., 1986, Iowa State; Ph.D., 1990, Northwestern.
CONZEMIUS, MICHAEL G., Assistant Professor of Veterinary Clinical Sciences. D.V.M., 1990, Ph.D., 2000, Iowa State.
COOK, CHRISTINE C., Associate Professor of Human Development and Family Studies. B.A., 1972, Montclair; M.S., 1977, Cornell; Ph.D., 1982, Ohio State.
COOK, DIANNE H., Adjunct Professor of Economics. B.A., 1981, California State; M.E., 1983, California State (San Bernardino); Ph.D., 1990, Alabama.
COOK, EDWARD JR., Emeritus Assistant Professor of Zoology and Genetics. B.S., 1986, Iowa State; Ph.D., 1993, California (La Jolla).
*DECARLO, THOMAS E., Associate Professor of Marketing. B.S., 1982, North Carolina State; Ph.D., 1993, Georgia.
*DECKER, KENT A., Adjunct Instructor in Military Science and Tactics.
*DELT, KATHLEEN, Assistant Professor of Horticulture; Assistant Professor of Agronomy. M.S., 1966, B.S., 1968, Florida; Ph.D., 1991, California (Berkeley).
*DELI, MATTHEW J., Assistant Professor of Sociology. B.A., 1995, Syracuse; Ph.D., 2000, Colorado.
*DELLMANN, H. DIETER, Emeritus Professor of Biomedical Sciences; Clarence Hartley Cowdall Distinguished Professor in Veterinary Medicine. Dr. Veterinary, 1964, Fort Halt(PH); 1961, Munich.
*DEMARIE, SAMUEL, Adjunct Instructor in Horticulture; Assistant Professor of Animal Science. B.S., 1962, M.S., 1985, Wageningen Agricultural (The Netherlands; Ph.D., 1989, Wisconsin.
*DELEATE, KATHLEEN, Assistant Professor of Horticulture; Assistant Professor of Agronomy. M.S., 1966, B.S., 1968, Florida; Ph.D., 1991, California (Berkeley).
*DEITER, RONALD E., Adjunct Instructor in Military Science and Tactics.
*DISI, MATTHEW J., Assistant Professor of Sociology. B.A., 1995, Syracuse; Ph.D., 2000, Colorado.
*DINSMORE, JAMES JAY, Emeritus Professor of Greenlee School Journalism/Communication. B.A., 1937, Oklahoma.
*DIXON, PHILIP M., Associate Professor of Statistics. A.B., 1978, California (Berkeley); M.S., 1984, Ph.D., 1986, Cornell.
*DOAK, PAUL D., Emeritus Associate Professor of Economics. B.S., 1967, M.S., 1969, Missouri; Ph.D., 1965, Iowa State.
*DOBBS, DRENA LEIGH, Emeritus Professor of Zoology. B.S., 1977, Georgia; Ph.D., 1983, Oregon.
*DONALD, WARREN DEAN, Emeritus Professor of Zoology. University Professor. B.S., 1962, West Chester; Ph.D., 1968, Ohio State.
*DOMOTO, PAUL ALAN, Emeritus Professor of Horticulture. B.S., 1969, M.S., 1971, California State (Fresno); Ph.D., 1974, Michigan State.
*DORAISWAMY, L., Emeritus Professor of Chemical Engineering. Aron Marston Distinguished Professor in Engineering. B.S., 1946, Nizam (India); M.S., 1950, Ph.D., 1952, Wisconsin.
*DOW, JAMES R., Professor of Foreign Languages and Literatures; Professor of English. B.A., 1967, Mississippi College; A.B., 1961, Ph.D., 1966, Iowa State.
FORKER, BARBARA E., Emeritus Professor of Health and Human Performance; Distinguished Professor in Education. B.S., 1942, Eastern Michigan; M.S., 1950, Iowa State; Ph.D., 1957, Michigan.

FOSSELL, RAY, Emeritus Professor of Soil Science. B.S., 1941, Oklahoma; M.S., 1942, Iowa State; Ph.D., 1952, Iowa State.

FOULADPOUR, MOHAMMAD, Emeritus Professor of Chemical Engineering. B.S., 1968, K. N. Toosi; M.S., 1968, Iowa State; Ph.D., 1972, Iowa State.

FOUW, KARL D., Emeritus Professor of English; Distinguished Professor in Liberal Arts and Sciences. B.A., 1937, A. M., 1938, Utah; Ph.D., 1954, California (Berkeley).

FOX, RODNEY O., Associate Professor of Chemical Engineering. B.S., 1982, M.S., 1985, Ph.D., 1987, Kansas State.

FRANK, JOEL, Emeritus Professor of Electrical and Computer Engineering. B.S., 1986, New England College; M.S., 1987, Iowa State University; Ph.D., 1992, Iowa State University.
1973, Ohio State.

*HUNGER, J. DAVID,* Associate Professor of Biosystems Engineering. B.S., 1939, M.S., 1940, Colorado; Ph.D., 1979, Iowa State.

HUNTER, WILLIAM A., Emeritus Professor of Curriculum and Instruction. B.S., 1936, Wilberforce; M.S., 1948, Ph.D., 1952, Iowa State.

*HUNTINGTON, STUART H.,* Associate Professor of Veterinary Medical Sciences. B.S., 1964, North Park; M.S., 1969, Missouri.

HUNTSBERGER, DAVID V., Emeritus Professor of Statistics. B.S., 1947, Bethany; M.S., 1948, West Virginia; Ph.D., 1954, Iowa State.

*HURBURGH, CHARLES R.,* Professor of Agricultural and Biosystems Engineering; Professor of Food Science and Human Nutrition. B.S., 1973, M.S., 1980, Ph.D., 1981, Iowa State.

*HYDE, WALTER G.,* Professor of Veterinary Diagnostic and Production Animal Medicine; Professor of Veterinary Pathology. B.S., 1973, M.S., 1980, Ph.D., 1985, Iowa State.

IMSANE, JOHN, Emeritus Professor of Agronomy; Emeritus Professor of Zoology and Genetics. B.A., 1953, Montana; M.S., 1956, Montana State; Ph.D., 1960, Duke.

*INGEBRITSON, THOMAS S.,* Associate Professor of Zoology and Genetics. B.A., 1968, Oregon State; Ph.D., 1979, Indiana.

INYANG, ANIEFOK D., Adjunct Assistant Professor of Industrial Education and Technology. B.S., 1976, Kansas; M.S., 1979, Ph.D., 1982, Oklahoma.

*ISERBRANDS, JUDSON G.,* Professor of Forestry (Collaborator). B.S., 1965, Ph.D., 1969, Iowa State.

*ISENHART, THOMAS M.,* Assistant Professor of Forestry. B.S., 1983, M.S., 1988, Ph.D., 1992, Iowa State.

*JACKSON, ROBERT A.,* Emeritus Professor of Agronomy; Emeritus Professor of Horticulture. B.A., 1955, California Institute of Technology.; Ph.D., 1957, California Institute of Technology.

*JACKSON, ROBERT A.,* Emeritus Professor of Veterinary Tropical Diseases. B.S., 1955, California Institute of Technology.; Ph.D., 1957, California Institute of Technology.

*JACOBSON, CARL ERNEST,* Professor of Biological and Atmospheric Sciences. B.S., 1973, New York (Binghamton); Ph.D., 1980, California (Los Angeles).

*JACOBSON, DOUG W.,* Associate Professor of Electrical and Computer Engineering. B.S., 1980, Ph.D., 1985, Iowa State.

JACOBSON, JOHN BRUCE, Assistant Professor of Aerospace Engineering and Engineering Mechanics; B.S., 1971, M.S., 1979, Iowa State.

*JACOBSON, NORMAN L.,* Emeritus Professor of Animal Science; Emeritus Professor of Food Science and Human Nutrition; Charles F. Curtiss Distinguished Professor. Ph.D., 1940, Wisconsin; M.S., 1941, Ph.D., 1947, Iowa State.

*JAMES, MARTHA GRAHAM,* Adjunct Associate Professor of Biochemistry, Biophysics and Molecular Biology. B.A., 1968, Colorado; M.A., 1985, Drake; Ph.D., 1989, Ph.D., 1990, Iowa State.

*JAMES, PATRICK,* Professor of Political Science. B.A., 1979, Western Ontario; M.A., 1982, Ph.D., 1984, Maryland.

*JANE, JAY-LIN,* Assistant Professor of Food Science and Human Nutrition. B.S., 1973, National Chung-Hsing; Ph.D., 1984, Iowa State.

*JANKE, BRUCE H.,* Associate Professor of Veterinary Diagnostic and Production Animal Medicine; Associate Professor of Veterinary Pathology. B.S., 1970, D.V.M., 1975, Iowa State; M.S., 1981, Ph.D., 1984, Missouri.

JOHNSON, HOWARD P., Emeritus Professor of Agricultural and Biosystems Engineering; Charles F. Curtiss Distinguished Professor in Agriculture. B.S., 1949, M.S., 1950, Iowa State; M.S., 1954, Iowa; Ph.D., 1958, Iowa State.

JOHNSON, MARGARET S., Emeritus Assistant Professor of Foreign Languages and Literatures. B.A., 1956, Oregon; M.A., 1974, Drake.

JOHNSTON, STANLEY R., Professor of Economics; Charles F. Curtiss Distinguished Professor in Agriculture; Vice Provost for Extension. B.A., 1961, Western Illinois; M.S., 1962, Texas Tech; Ph.D., 1966, Texas A and M.

JOHNSTON, DAVID C., Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1969, California (Santa Barbara); Ph.D., 1975, California (San Diego).

JOLLY, ROBERT WILLIAM, Professor of Economics. B.S., 1968, M.S., 1974, Ph.D., 1976, Minnesota.

JONES, BERT LYNN, Associate Professor of Agricultural Education and Studies. B.A., 1970, Missouri Southern; M.A., 1974, Central Missouri; Ph.D., 1985, Wisconsin.

JULIUS, MARVIN G., Emeritus Professor of Economics. B.S., 1948, Ph.D., 1968, Iowa State.

JURA, JERZY OSKAR, Assistant Professor of Foreign Languages and Literatures. M.A., 1986, Jagiellonian (Poland); M.A., 1994, Ph.D., 1997, Wisconsin.

JURK, THOMAS WAYNE, Associate Professor of Botany. B.A., 1974, Texas; Ph.D., 1980, Cornell.

KADOLPH, SARA JEAN, Associate Professor of Textiles and Clothing. B.S., 1972, Iowa State; M.S., 1973, Kansas State; Ph.D., 1979, Minnesota.
*KEITH, PATRICIA M., Professor of Sociology; Assistant Dean of the Graduate College. B.S., 1960, Southwest Missouri; M.S., 1960, Missouri; Ph.D., 1969, St. Louis.

KELKAR, ATUL G., Associate Professor of Mechanical Engineering. B.E., 1984, Poona (India); M.S., 1990, Ph.D., 1993, Old Dominion.

*KELLER, BRIAN ALAN, Associate Professor of Mathematics. B.S., 1983, Purdue; S.M., 1989, Massachusetts Institute of Technology; Ph.D., 1993, Western Michigan.

*KELLY, J. MICHAEL, Professor of Forestry and Chair of the Department. B.S., 1966, East Tennessee; M.S., 1968, Ph.D., 1973, Tennessee.

*KENDALL, RICK A., Adjunct Associate Professor of Computer Science. B.S., 1983, Indiana State; Ph.D., 1988, Utah.

*KENEALLY, MICHAEL D., Professor of Animal Science; University Professor. B.S., 1969, Ph.D., 1974, Iowa State.

*KENNEDY, WILLIAM J. JR., Professor of Statistics. B.S., 1959, M.S., 1960, Oklahoma State; Ph.D., 1969, Iowa State.

*KERSTING, KARL W., Associate Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1974, New Mexico State; D.V.M., 1978, Purdue; M.S., 1985, Ohio State.

*KESSEL, KAREN L., Assistant Professor of Anthropology. A.A., 1990, Oberlin College; Ph.D., 1997, Indiana.

*KHAMMASH, MUSTAFA H., Associate Professor of Electrical and Computer Engineering. B.S., 1986, Texas A and M; Ph.D., 1990, Texas.

*KILGORE, DEBORAH W., Assistant Professor of Educational Leadership and Policy Studies. B.A., 1985, Maryland; M.S., 1984, Johns Hopkins; Ph.D., 1999, Texas A and M.

*KILKENNY, MAUREEN R., Assistant Professor of Economics. B.A., 1975, California (Davis); M.S., 1978, Ph.D., 1982, California (Berkeley).

*KLING, CATHERINE L., Professor of Electrical and Computer Engineering. B.S., 1983, Indiana State; Ph.D., 1985, Oklahoma.

*KLING, FRED WAYNE, Professor of Computer Science; Associate Professor of Computer Science. B.A., 1985, M.S., 1986, Iowa State; M.S., 1990, Ph.D., 1992, Purdue.

*KLEINBERG, ETHAN C., Professor of Electrical and Computer Engineering. B.S., 1987, Oklahoma State; M.S., 1990, Ph.D., 1992, Purdue.

*KLEMMER, JULIAN, Associate Professor of Finance. B.A., 1976, Michigan State; M.B.A., 1979, Iowa State.

*KLEMSCHI, ARTHUR C., Emeritus Professor of Industrial and Manufacturing Systems Engineering. B.S., 1938, Minnesota; B.S., 1943, Oregon State; M.S., 1948, Minnesota; Ph.D., 1953, Iowa State.

*KLETSCH, JOSEPH CALVIN, Emeritus Professor of Veterinary Medicine. B.S., 1942, Iowa State; M.S., 1947, South Dakota State.

*KLAIBER, FRED WAYNE, Professor of Computer Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1962, M.S., 1964, Ph.D., 1968, Purdue.

*KLEINSCHMIDT, ARTHUR C., Emeritus Professor of Industrial and Manufacturing Systems Engineering. B.B.A., 1938, Minnesota; B.S., 1943, Oregon State; M.S., 1948, Minnesota; Ph.D., 1953, Iowa State.

*KLETSCH, JOSEPH CALVIN, Emeritus Professor of Veterinary Medicine. B.S., 1942, Iowa State; M.S., 1947, South Dakota State.

*KLETSCH, JOSEPH CALVIN, Emeritus Professor of Veterinary Medicine. B.S., 1942, Iowa State; M.S., 1947, South Dakota State.

*KLETSCH, JOSEPH CALVIN, Emeritus Professor of Veterinary Medicine. B.S., 1942, Iowa State; M.S., 1947, South Dakota State.

*KLETSCH, JOSEPH CALVIN, Emeritus Professor of Veterinary Medicine. B.S., 1942, Iowa State; M.S., 1947, South Dakota State.

*KLETSCH, JOSEPH CALVIN, Emeritus Professor of Veterinary Medicine. B.S., 1942, Iowa State; M.S., 1947, South Dakota State.

*KLETSCH, JOSEPH CALVIN, Emeritus Professor of Veterinary Medicine. B.S., 1942, Iowa State; M.S., 1947, South Dakota State.

*LACASA, JAIME, Associate Professor of Foreign Languages and Literatures. L.PhiL., 1957, L.Let., 1958, Queto; St.T.B., 1964, St. Louis; Ph.D., 1970, Iowa State.

*LACASA, JUDITH N., Professor of Foreign Languages and Literatures. B.S., 1958, Ph.D., 1968, Louisiana State.

*LACZNIAK, RUSSELL N., Professor of Marketing and Chair of the Department. B.S., 1978, Marquette; M.B.A., 1979, Wisconsin (La Crosse); J.D., 1985, Minnesota Law.

LADD, GEORGE WELLS, Emeritus Professor of Economics; Charles F. Curtiss Distinguished Professor in Agriculture. B.S., 1950, South Dakota State; M.A., 1951, Michigan State; Ph.D., 1955, Illinois.

*LAFLENS, JOHN M., Professor of Agricultural and Biosystems Engineering (Collaborator). B.S., 1959, M.S., 1960, Ph.D., 1972, Iowa State.

LAGOMARINO, VIRGIL S., Emeritus Professor of Educational Leadership and Policy Studies; Emeritus Dean of the College of Education. B.A., 1943, Coe; M.S., 1948, Drake; Ph.D., 1956, Iowa State.

LAGRANGE, WILLIAM S., Professor of Animal Science. B.S., 1948, Drake; M.S., 1950, Ph.D., 1956, Iowa State.

LAM, RICHARD C., Emeritus Professor of Physics and Astronomy. B.S., 1955, Massachusetts Institute of Technology; M.S., 1960, Ph.D., 1963, Kentucky.

*LAMONT, JOHN WILLIAM, Professor of Electrical and Computer Engineering. B.S., 1964, Missouri (Rolla); M.S., 1966, Ph.D., 1970, Missouri.

LANG, RICHARD D., Adjunct Assistant Professor of Military Science and Tactics. B.S., 1984, Upper Iowa; M.P.A., 1997, Drake.

LANGER, NATALIE, Adjunct Instructor in Veterinary Clinical Sciences. B.V.Sc., 1998, Queensland (Australia).

*LAPAN, HARVEY E., Professor of Economics; University Professor. B.S., 1969, M.S., 1969, Ph.D., 1971, Massachusetts Institute of Technology.

*LAROCK, RICHARD C., Professor of Chemistry; University Professor. B.S., 1967, California (Davis); Ph.D., 1972, Purdue.

LARSEN, WILLIAM L., Emeritus Professor of Materials Science and Engineering. B.M.E., 1948, Marquette; M.S., 1950, Ph.D., 1956, Ohio State.

*LARSON, DAVID, Associate Professor of Veterinary Diagnostic and Production Animal Medicine; Associate Professor of Veterinary Pathology. B.S., 1964, D.V.M., 1968, Iowa State; M.S., 1975, Missouri.

*LARSON, LISA M., Professor of Psychology. B.S., 1980, Kansas; M.S., 1984, Ph.D., 1986, Missouri.

LASSILLA, KENNETH E., Professor of Physics and Astronomy. B.S., 1956, Wyoming; M.S., 1959, Ph.D., 1962, Yale.

*KURTENBACH, JAMES M., Associate Professor of Accounting. B.S., 1980, Iowa State; M.S., 1987, Tulsa; Ph.D., 1992, Missouri.

*LAWRENCE, JOHN D., Professor of Sociology (Collaborator). B.S., 1980, Nebraska; M.A., 1986, Minnesota.

LAVERY, RUSSELL J., Adjunct Assistant Professor of Veterinary Clinical Sciences. B.V.Sc., 1998, Queensland (Australia).

*LAWARE, MARGARET R., Assistant Professor of Philosophy and Religion. B.A., 1985, New York (Stony Brook); M.A., 1986, Minnesota.

LEA, DAVID, Associate Professor of Electrical and Computer Engineering. B.S., 1984, Cincinnati; M.S., 1986, Pennsylvania; Ph.D., 1990, Iowa State.

*LEE, DAH-YINN, Emeritus Professor of Civil and Construction Engineering. B.S., 1958, Chung Kung; Ph.D., 1964, Iowa State.

LEE, DAI-HEUI, Associate Professor of Biological Science (Collaborator). B.S., 1958, Yansei (Korea); M.S., 1960, Ph.D., 1969, Iowa State.

*LEE, GYUNGHO, Professor of Electrical and Computer Engineering. B.S., 1977, Sogang (Korea); M.S., 1979, Korean Institute of Science and Technology; Ph.D., 1986, Illinois.

*LEE, MICHAEL, Professor of Agronomy; Professor of Zoology and Genetics. B.S., 1981, Rutgers; M.S., 1984, Ph.D., 1986, Minnesota.

LEE, MOTOKO Y., Emeritus Professor of Sociology. B.A., 1959, Nara Women’s University (Japan); M.A., 1963, Indiana; Ph.D., 1969, Iowa State.

*LEGG, TEDDY JOSEPH, Adjunct Assistant Professor of Aerospace Engineering and Engineering Mechanics. B.S., 1969, Iowa; B.S., 1975, Iowa State.

*LEONARD, KATHY S., Associate Professor of Foreign Languages and Literatures. B.A., 1975, California (Riverside); M.A., 1979, Santa Clara; B.A., 1983, Nevada; Ph.D., 1991, California (Davis).

*LESTEN, NIELS R., Emeritus Professor of Botany. B.S., 1958, M.S., 1960, Chicago; Ph.D., 1963, California (Berkeley).
*MALLARINO, ANTONIO P., Associate Professor of Agriculture. B.S., 1968, Uruguay; M.S., 1981, Ph.D., 1988, Iowa State.

MALIGNE, WILLIAM A., Emeritus Associate Professor of Community and Regional Planning. B.S., 1947, M.S., 1960, Iowa State.

*MANATT, RICHARD P., Professor of Educational Leadership and Policy Studies; University Professor. B.S., 1981, M.S., 1986, Iowa State; Ph.D., 1984, Iowa.

*MANEY, ARDITH LOUISE, Associate Professor of Foreign Languages and Literatures. A.B., 1974, Dartmouth College; M.A., 1977, Purdue; Ph.D., 1983, Illinois.

*MANEY, ARDITH LOUISE, Associate Professor of Foreign Languages and Literatures. A.B., 1974, Dartmouth College; M.A., 1977, Purdue; Ph.D., 1983, Illinois.

*MARTIN, MICHAEL, Emeritus Professor of Animal Science and Chair of the Department. B.V.Sc., 1972, University of Sydney, Australia; M.S., 1984, Michigan State; Ph.D., 1996, Cornell.

*MATTHEWS, ELEANOR R., Emeritus Associate Professor, Library, B.A., 1958, Wheaton College (Massachusetts); M.A., 1975, Iowa.

MATTHIS, DONALD R., Professor of Sociology. B.A., 1963, Drake.

*MAZZARELLI, JAMES M., Professor of Political Science. A.B., 1971, St. John's University; M.A., 1976, Ph.D., 1983, Tulane.

*MAZZARELLI, JAMES M., Professor of Political Science. A.B., 1971, St. John's University; M.A., 1976, Ph.D., 1983, Tulane.

*MAZZARELLI, JAMES M., Professor of Political Science. A.B., 1971, St. John's University; M.A., 1976, Ph.D., 1983, Tulane.

*MAZZARELLI, JAMES M., Professor of Political Science. A.B., 1971, St. John's University; M.A., 1976, Ph.D., 1983, Tulane.

*MAZZARELLI, JAMES M., Professor of Political Science. A.B., 1971, St. John's University; M.A., 1976, Ph.D., 1983, Tulane.
McNABB, HAROLD S., JR., Emeritus Professor of Plant Pathology; Emeritus Professor of Forestry; University Professor; B.S., 1949, Nebraska; M.S., 1951, Ph.D., 1954, Yale.
*MEEKER, WILLIAM G. JR., Professor of Statistics; Distinguished Professor in Liberal Arts and Sciences. B.S., 1972, Clarkson; M.S., 1973, Ph.D., 1975, Union.
*MEKS, CAROL B., Professor of Human Development and Family Studies; Dean of the College of Family and Consumer Sciences. B.S., 1968, M.S., 1969, Ph.D., 1972, Ohio State.
*MEEKS, HOWARD D., Associate Professor of Industrial and Manufacturing Systems Engineering. B.S., 1980, Iowa State; M.S., 1986, Ph.D., 1970, Ohio State.
*MEEKS, MARVIN, Professor of Military Science and Tactics and Chair of the Department. B.S., 1979, US Military Academy, M.S., 1996, Central Michigan.
METZLER, DAVID E., Emeritus Professor of Biochemistry; Distinguished Professor in Liberal Arts and Sciences. B.S., 1948, California Institute of Technology; M.S., 1950, Ph.D., 1952, Wisconsin.
*MAYER, WALTER THOMAS, Adjunct Professor of Physics and Astronomy. B.A., 1965, Wesleyan; Ph.D., 1971, Cornell.
*Miller, Elizabeth S., Emeritus Professor of Art and Design; Distinguished Professor in Design. B.F.A., 1951, Nebraska; M.F.A., 1967, Drake.
*Miller, Gerald Arey, Professor of Agronomy; Associate Dean of the College of Agriculture. B.S., 1965, Virginia Polytechnic Institute; M.S., 1971, Ph.D., 1974, Iowa State.
Miller, Gordon J. JR., Associate Professor of Chemistry. B.S., 1982, Rochester; Ph.D., 1986, Chicago.
*Miller, Gregory Scott, Associate Professor of Agricultural Education and Studies; Associate Professor of Curriculum and Instruction. B.S., 1987, M.Ed., 1990, Auburn; Ph.D., 1992, Ohio State.
Miller, Kathryn M., Emeritus Associate Professor of Human Development and Family Studies. B.S., 1959, Iowa State; M.S., 1964, Cornell.
*Miller, Lance Leroy, Adjunct Professor of Physics and Astronomy. B.S., 1962, Missouri Western State; Ph.D., 1988, M.S., 1994, Iowa State.
*Miller, Nancy J., Associate Professor of Textiles and Clothing. B.S., 1976, M.S., 1979, Ph.D., 1994, Nebraska.
*Miller, Richard Keith, Emeritus Professor of Mathematics; Distinguished Professor in Liberal Arts and Sciences. B.S., 1961, Iowa State; M.S., 1962, Ph.D., 1964, Wisconsin.
*Miller, William Wade, Professor of Agricultural Education and Studies; Professor of Curriculum and Instruction. B.S., 1974, Texas A and M; M.Ed., 1976, Stephen F. Austin; Ph.D., 1980, Texas A and M.
*Miller, Wyatt A., Professor of Plant Pathology; Professor of Biochemistry, Biophysics and Molecular Biology. B.A., 1978, Carleton; Ph.D., 1984, Wisconsin.
Min, Kyoung Jo, Adjunct Instructor of Industrial and Manufacturing Systems Engineering. B.S., 1984, California (Los Angeles); M.S., 1985, Ph.D., 1990, California (Berkeley).
*Min, Mani, Adjunct Professor of Electrical and Computer Engineering. B.S., 1982, M.S., 1985, M.S., 1987, Missouri.
*Miner, Andrew S., Assistant Professor of Computer Science. B.S., 1993, Randolph-Macon College; M.S., 1995, Ph.D., 2000, College of William and Mary.
*Minion, Frank C., Associate Professor of Veterinary Microbiology and Preventive Medicine; Associate Professor of Zoology and Genetics. B.S., 1972, M.S., 1977, Memphis; Ph.D., 1983, Alabama (Birmingham).
*Misra, Manjit Kumar, Professor of Agricultural and Biosystems Engineering. B.S., 1971, Orissa; M.S., 1973, Ph.D., 1978, Missouri.
*Modler, Robert H., Adjunct Instructor of Physics and Astronomy. B.S., 1989, M.S., 1992, Darmstadt Univ. (Germany); Ph.D., 1995, Darmstadt Univ. of Tech.

*NONNEECE, BRIAN J., Associate Professor of Animal Science (Collaborator). B.S., 1974, M.S., 1976, Guelph; Ph.D., 1979, Ohio State.

*NORRIS, F. ANDERSON, Assistant Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1986, Erskine College; Ph.D., 1991, Clemson.

NORTON, DON CARLOS, Emeritus Professor of Plant Pathology. B.S., 1947, Toledo; M.S., 1949, Ph.D., 1950, Ohio State; M.S., 1957, Ph.D., 1975, Iowa State.

NORTON, MARTHA S., Adjunct Assistant Professor of Educational Leadership and Policy Studies. B.S., 1983, St. Lawrence; M.S., 1985, Vermont.

*O’CONNOR, ANNETTE M., Assistant Professor of Veterinary Diagnostic and Production Animal Medicine. B.V.Sc., 1993, Sydney (Australia); M.V.S.C., 1997, Queensland (Australia); D.VSc, 2000, Guelph (Canada).

*OAKLAND, MARY JANE, Associate Professor of Food Science and Human Nutrition. B.S., 1966, South Dakota; M.S., 1970, Ph.D., 1975, Iowa State.

*OBRIEN, SUSAN E., Associate Professor of Veterinary Clinical Sciences. B.S., 1972, D.V.M., 1973, Michigan State.

*OGILVIE, CRAIG A., Assistant Professor of Physics and Astronomy. B.Sc., 1983, Canterbury (New Zealand); Ph.D., 1987, Birmingham (UK).

*OH, HAEMOON, Assistant Professor of Hotel, Restaurant, and Institution Management. B.A., 1989, Hanyang (Korea); M.S., 1992, Nevada (Las Vegas); Ph.D., 1997, Pennsylvania State.

*OKISHI, THEODORE H., Professor of Mechanical Engineering; Associate Dean of the College of Engineering. B.S., 1960, M.S., 1963, Ph.D., 1965, Iowa State.

*OLESON, MARK D., Assistant Professor of Human Development and Family Studies. B.S., 1994, Brigham Young; M.S., 1996, Ph.D., 1999, Utah State.

*OLIVER, DAVID J., Professor of Botany and Chair of the Department. B.S., 1971, M.S., 1973, New York (Syracuse); Ph.D., 1975, Cornell.

*OLSON, CAROLYN G., Associate Professor of Agromony (Collaborator). B.S., 1974, Syracuse; M.A., 1977, Ph.D., 1979, Indiana.

OLSON, JAMES ALLEN, Professor of Biochemistry, Biophysics and Molecular Biology; Professor of Food Science and Human Nutrition; Distinguished Professor in Liberal Arts and Sciences. B.S., 1946, Gustavus Adolphus; Ph.D., 1952, Harvard.

*ONG, SAY K., Assistant Professor of Civil and Construction Engineering. B.S., 1980, Malaya (Malaysia); M.S., 1987, Vanderbilt; Ph.D., 1990, Cornell.

OPENSHAW, SCOTT D., Adjunct Instructor in Mechanical Engineering. B.S., 1996, Brigham Young; M.S., 2000, Iowa State.

*OTAIGBE, JOSUA I.A, Professor of Materials Science and Engineering; Associate Professor of Chemical Engineering. B.S., 1979, Benin; Ph.D., 1984, Manchester.

OUYANG, TIAN HE, Professor of Electrical and Computer Engineering (Collaborator).

*PATTERSON, JOHN W. JR., Associate Professor of Horticulture. B.S., 1972, Springfield; M.S., 1978, Cleveland State; Ph.D., 1984, Texas A and M.
PATTERSON, RALPH III, Assistant Professor of Electrical Engineering. B.S.E.E., 1963, M.S., 1976, Iowa State.

*PAUL, PREM SAGAR, Professor of Veterinary Microbiology and Preventive Medicine. Associate Vice Provost, Research. B.V.Sc., 1969, Hissar; Ph.D., 1975, Minnesota.

PAULSEN, ARNOLD ALLEN, Emeritus Professor of Economics. B.S., 1961, Ph.D., 1969, Iowa State.

PAVLAT, JOHN R., Emeritus Associate Professor of Electrical and Computer Engineering. B.S., 1955, South Dakota School of Mines; M.S.E.E., 1961, Iowa State.

*PAYNE, WILLIAM DONALD, Associate Professor of English. Associate Professor of Curriculum and Instruction. B.A., 1967, University of Iowa; M.A., 1968, Ph.D., 1980, Illinois.

PEARCE, ROBERT BRENT, Emeritus Professor of Agronomy. B.S., 1963, California (Davis); M.S., 1965, Ph.D., 1967, Virginia Polytechnic Institute.

*PEASE, JAMES L., Emeritus Professor of Zoology and Genetics. B.S., 1947, Tufts; Ph.D., 1953, Illinois.

*PLAZAK, DAVID, Adjunct Assistant Professor of Community and Regional Planning; Adjunct Assistant Professor of Civil and Construction Engineering. B.A., 1977, Wisconsin; M.A., 1979, Iowa.

*PLEASANTS, BARBARA P., Adjunct Assistant Professor of Zoology and Genetics. B.S., 1971, Cornell; Ph.D., 1977, California (Los Angeles).

*PLETCHER, RICHARD H., Professor of Mechanical Engineering. B.S., 1957, Purdue; M.S., 1962, Ph.D., 1966, Cornell.

*POAGUE, LEANDA L., Emeritus Professor of English. B.A., 1970, California State (San Jose); Ph.D., 1973, Oregon.

*POLMAG, JAMES A., Emeritus Professor of Art and Design. B.S., 1960, Iowa State; M.S., 1968, Ph.D., 1970, Nebraska.

*POLSTER, NANCY L., Emeritus Associate Professor of Art and Design. B.S., 1960, Iowa State; M.S., 1964, Syracuse.

*POMETTO, ANTHONY III, Emeritus Professor of Zoology and Genetics. B.S., 1961, Northern California; Ph.D., 1964, University of California (Berkeley).

*PE帀SE, NEVA M., Emeritus Professor of Human Development and Family Studies; Emeritus Professor of Art and Design. B.S., 1930, M.S., 1947, Iowa State.

*PETERSON, CARLA ANN, Associate Professor of Human Development and Family Studies; Emeritus Professor of Art and Design. B.S., 1930, M.S., 1947, Iowa State.

*PETERSON, FRANCIS, Professor of Physics and Astronomy. B.E.E., 1964, Rensselaer; Ph.D., 1968, Cornell.

*PETERSON, THOMAS A., Emeritus Professor of Zoology and Genetics; Associate Professor of Biology. B.S., 1976, California (Davis); Ph.D., 1984, California (Santa Barbara).

*PETTRICH, JACOB W., Associate Professor of Chemistry. B.S., 1980, Yale; Ph.D., 1985, Chicago.

*PHAM, HUNG ANH, Assistant Professor of Mechanical Engineering. B.S., 1991, Harvey Mudd College; M.S., 1994, Ph.D., 1996, California (Berkeley).

*PHYE, GARY D., Professor of Curriculum and Instruction; Professor of Psychology. B.A., 1964, M.A., 1965, Wichten; Ph.D., 1970, Missouri.

*PICKETT, MARY S., Emeritus Professor of Human Development and Family Studies; Emeritus Professor of Art and Design. B.S., 1944, M.S., 1951, Tennessee; Ph.D., 1958, Iowa State.

*PIERCE, CLAY L., Assistant Professor of Animal Ecology (Collaborator). B.S., 1980, Mankato; M.S., 1982, Kent; Ph.D., 1987, Maryland.

*PITT, JOHN MICHAEL, Associate Professor of Civil Engineering. B.S., 1968, Missouri (Rolla); M.S., 1974, Ph.D., 1978, Iowa State.

*PORTER, MARC DAVID, Professor of Chemistry. B.S., 1977, M.S., 1979, Wright State; Ph.D., 1984, Ohio State.

*POTTER, ALLAN GEORGE, Emeritus Professor of Electrical Engineering. B.S., 1955, Kansas State; M.S., 1959, Ph.D., 1966, Iowa State.

*POUNDS, RUSSELL G., Emeritus Associate Professor of Economics. B.S., 1957, Central State (Ohio); M.S., 1970, Iowa State.
- **POWELL, EDWIN CADMAN**, Associate Professor of Zoology and Genetics. B.A., 1963, California State (Chico); M.S., 1965, Florida State; Ph.D., 1971, Tulane.
- **POWELL, JACK E.**, Emeritus Professor of Chemistry. B.S., 1943, Monmouth; Ph.D., 1952, Iowa State.
- **POWELL-COFFMAN, JO A.**, Assistant Professor of Zoology and Genetics. B.S., 1986, California (Davis); Ph.D., 1993, California (San Diego).
- **PRIEBE, JOHN**, B.S., 1973, California State (Fresno); M.S., 1979, New Mexico; Ph.D., 1987, Duke.
- **RAGAN, JAMES A.**, Associate Professor of Forestry. B.S., 1956, Iowa State; M.S., 1957, Iowa; Ph.D., 1969, Pennsylvania.
- **RAGAN, JOE**, B.S., 1979, M.S., 1982, New Mexico; Ph.D., 1986, Iowa State.
- **RAKATANSKY, MARK**, Professor of Architecture. B.A., 1979, California (Santa Cruz); M.Arch., 1982, California (Berkeley).
- **RAMEY, ROBERT JAY**, Adjunct Assistant Professor of Animal Science. B.S., 1963, Colorado State; M.S., 1971, Iowa State.
- **RANDIC, MIRJANA**, Professor of Biomedical Sciences. M.D., 1969, Ph.D., 1972, Zagreb.
- **RANKEN, EUGENE C.**, Assistant Professor of Psychological and Brain Sciences. B.A., 1966, Kansas.
- **RASMUSSEN, JORGEN S.**, Emeritus Professor of Political Science. Emeritus Professor of Curriculum and Instruction; Distinguished Professor in Liberal Arts and Sciences. B.A., 1967, Augustana College (Illinois); M.S., 1969, Tennessee; Ph.D., 1976, Kansas.
- **RASMUSSEN, MARK A.**, Assistant Professor of Animal Science (Collaborator); Assistant Professor of Biomedical Sciences (Collaborator). B.S., 1976, M.S., 1979, Nebraska; Ph.D., 1986, Illinois; M.B.A., 1996, Iowa State.
- **RAVENSFROEFT, SCOTT P.**, Associate Professor of Agricultural and Biological Sciences. B.S., 1974, Iowa State; M.S., 1978, Detroit Mercy; Ph.D., 1989, Michigan State.
- **REDDY, MANBUJ B.**, Assistant Professor of Food Science and Human Nutrition. B.S., 1976, M.S., 1978, Osmania (Indial); Ph.D., 1987, Texas A and M.
- **REDMOND, JAMES R.**, Emeritus Professor of Zoology. B.S., 1953, Ph.D., 1954, California (Los Angeles).
- **REECE, JAMES M.**, Assistant Professor of Animal Science. B.S., 1990, South Dakota State; M.S., 1992, Missouri; Ph.D., 1995, Purdue.
- **REILLY, PETER J.**, Professor of Chemical Engineering; Anson Marston Distinguished Professor in Engineering. B.A., 1960, Princeton; Ph.D., 1964, Pennsylvania.
- **REINERTSON, ERIC L.**, Associate Professor of Veterinary Clinical Sciences. D.V.M., 1971, Iowa State; M.S., 1974, Cornell.
- **REITMEIER, CHERYL M.**, Associate Professor of Food Science and Human Nutrition. B.S., 1973, Minnesota; M.S., 1975, Arkansas; Ph.D., 1988, Iowa State.
- **REYNOLDS, DONALD L.**, Professor of Veterinary Microbiology and Preventive Medicine; Associate Dean of the College of Veterinary Medicine. B.S., 1977, D.V.M., 1981, Ph.D., 1986, Ohio State.
- **ROHDES, EDWARD D.**, Adjunct Instructor in Military Science and Tactics.
- **RICE, JOHN STEPHENS**, Adjunct Associate Professor of Architecture. B.S., 1948, Iowa State.
- **RICE, MARLIN E.**, Professor of Entomology. B.S., 1977, Central Missouri; M.S., 1979, Missouri; Ph.D., 1987, Kansas State.
- **RICHARD, THOMAS L.**, Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1978, California (Berkeley); M.S., 1987, Ph.D., 1997, Cornell.
- **RIGNALL, JAY**, Adjunct Instructor in Veterinary Clinical Sciences. B.V.M.S., 1994, Glasgow; M.S., 2000, Iowa State.
- **RIECK, DONALD ARTHUR**, Adjunct Assistant Professor of Curriculum and Instruction. B.A., 1963, Northern Iowa; M.S., 1968, Wisconsin (Stout); Ph.D., 1967, Iowa State.
- **RIEDESEL, DEAN HAROLD**, Professor of Veterinary Clinical Sciences; Professor of Biomedical Sciences. D.V.M., 1969, Ph.D., 1976, Iowa State.
- **RIEMENSCHNEIDER, DONALD E.**, Professor of Forestry (Collaborator). B.S., 1972, M.S., 1976, Ph.D., 1979, Minnesota.
- **ROBERTS, DONALD M.**, Emeritus Professor of Nuclear Engineering. B.Sc., 1945, Albert; M.Sc., 1949, Ph.D., 1953, Purdue.

ROBERTSON, ALAN P., Professor of Veterinary Medicine. B.S., 1991, Iowa State.

ROBSON, RICHARD M., Professor of Molecular Biology; Professor of Biochemistry, Biophysics and Biology. B.S., 1982, Northwestern; M.D., 1987, M.P.H., 1995, Minnesota.

ROBINSON, JAMES ALLEN, Emeritus Professor of Veterinary Medicine; Distinguished Professor in Veterinary Medicine. B.S., 1975, M.S., 1979, Ph.D., 1981, Iowa State.

Rudolph, William B., Emeritus Professor of Mathematics; Emeritus Professor of Curriculum and Instruction. B.A., 1960, Bethany (West Virginia); M.S., 1965, Ph.D., 1969, Purdue.

Ruedenberg, Klaus, Emeritus Professor of Chemistry; Emeritus Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. Abitur, 1938, Bielefeld; M.S., 1944, Fribourg, Ph.D., 1959, Zurich; Ph.D., 1975, (Hon) Basel.

Rule, Lita C., Associate Professor of Forestry. B.S., 1975, M.S., 1982, Philippines; Ph.D., 1988, Texas A and M.

Runyan, William S., Emeritus Professor of Food Science and Human Nutrition. B.S., 1960, Fairleigh Dickinson; Ph.D., 1969, Iowa State.

SCHOR, EDWARD L., Assistant Professor of Sociology (Collaborator). A.B., 1966, Washington (St. Louis); M.D., 1970, Chicago Medical School.

SCHROEDER, GLENN L., Professor of Chemical Engineering. B.S., 1972, Iowa State; Ph.D., 1978, Wisconsin.

SCHREINER, CLEM ALAN, Adjunct Instructor in Veterinary Clinical Sciences. B.S., 1990, New Mexico; D.V.M., 1994, Colorado State.

SCHROEDER, JOHN R., Associate Professor of Economics. B.S., 1973, California Institute of Technology; Ph.D., 1979, California Institute of Technology.

SCHUTZ, RICHARD CARL, Professor of Forestry. B.S., 1985, Missouri State; M.S., 1970, Iowa State.

SCHWAB, CHARLES V., Associate Professor of Agricultural and Biosystems Engineering. B.S., 1979, M.S., 1982, Ph.D., 1989, Kentucky.

SCHWARTZ, GORDON W., Emeritus Professor of Health and Human Performance. B.S., 1945, M.S., 1946, Ph.D., 1950, Iowa State.

SCHWARTZ, RICHARD CARL, Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1963, M.D., 1964, Iowa State.

SCHON, WILLIAM F., Assistant Professor of Animal Science. B.S., 1984, Iowa State; M.S., 1985, Iowa State.

SCHELLER, JACOB, Emeritus Professor of Chemistry. B.S., 1947, Iowa State; M.S., 1949, Iowa State; Ph.D., 1955, University of Wisconsin.

SCHLEGEL, RICHARD, Emeritus Professor of Electrical Engineering. B.S., 1957, Iowa State; M.S., 1959, Iowa State; Ph.D., 1962, Iowa State.

SCHLICKER, WAYNE, Emeritus Professor of Chemical Engineering. B.S., 1950, Iowa State; M.S., 1951, Iowa State; Ph.D., 1953, University of Wisconsin.

SHEBLE, MACK CLAYTON, Professor of Educational Leadership and Policy Studies; Professor of Statistics; Professor of Political Science. B.A., 1972, American; M.S., 1973, Ph.D., 1977, Wisconsin.

SHELEN, SHIELDON SHIH-TA, Professor of Zoology and Genetics. B.S., 1969, Missouri; Ph.D., 1974, California (Berkeley).

SHERMAN, PETER JAMES, Associate Professor of Aerospace Engineering and Engineering Mechanics; Associate Professor of Statistics. B.S., 1974, M.S., 1975, Ph.D., 1984, Wisconsin.

SHIN, YEON-KYUN, Associate Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1982, Seoul National (Korea); Ph.D., 1990, Cornell.

SHORES, RICHARD, Emeritus Professor of Agronomy. B.S., 1956, Maine; M.S., 1958, Ph.D., 1961, Iowa State.

SMITH, ARTHUR A. JR., Professor of Philosophy and Religious Studies; Professor of Political Science. B.A., 1974, Boston College; Ph.D., 1980, New York (Stony Brook).

SMITH, KIM ANTHONY, Emeritus Professor of Industrial and Manufacturing Systems Engineering. B.S., 1952 M.S., 1958, Ph.D., 1964, Iowa State.

SMITH, RANDALL, Emeritus Professor of Agricultural and Biosystems Engineering. B.S.C., 1962, Kings College; M.S., 1967, Ph.D., 1971, Iowa State.

SMITH, ROGER A. P., Professor of Industrial Education and Technology; Associate Dean of the College of Education. B.A., 1969, M.A., 1971, Northern Illinois; M.S., 1974, Iowa State.

SNEDD, PHILLIS JEAN, Associate Professor of Hotel, Restaurant and Institution Management. B.S., 1975, M.S., 1977, Oklahoma State; Ph.D., 1985, Ohio State.

SREENIVASAM, SELSA M., Emeritus Associate Professor of Art and Design. B.A., 1951, St. Scholastica; M.A., 1969, Minnesota.

SRITHARAN, SIVALINGAM, Assistant Professor of Civil and Construction Engineering. B.S.C.E., 1986, Berlin (Germany).

SQUIRES, RICHARD, Emeritus Professor of Industrial and Manufacturing Systems Engineering. B.S., 1931, Purdue; M.S., 1932, Yale.

SREERAMAN, SELSA M., Emeritus Associate Professor of Art and Design. B.A., 1951, St. Scholastica; M.A., 1969, Minnesota.

STADLER, JOAN K., Emeritus Professor of Zoology and Genetics; University Professor, B.A., 1951, Wellesley; Ph.D., 1954, Missouri.

*STAHLY, TIMOTHY S., Professor of Animal Science. B.S., 1970, M.S., 1972, South Dakota State; Ph.D., 1975, Nebraska.

STAHLY, HENRY M., Emeritus Professor of Veterinary Pathology. B.S., 1956, South Dakota State; M.S., 1960, Union; Ph.D., 1976, Iowa State.

*STANFORD, JOHN L., Emeritus Professor of Physics and Astronomy. B.S., 1944, Iowa State; M.S., 1967, Iowa State.

STRAHAN, ROBERT F., Emeritus Professor of Psychology; Emeritus Professor of Statistics. B.A., 1981, Kansas (Pittsburg); Ph.D., 1987, Minnesota.

STRAWN, GEORGE O., Associate Professor of Computer Science. B.A., 1962, Cornell College; Ph.D., 1969, Iowa State.

STROHL, JOHN KENNETH, Adjunct Instructor in Food Science and Human Nutrition. B.S., 1981, Minnesota; Ph.D., 1988, Iowa State.

STROMER, MARVIN H., Professor of Animal Science; Professor of Food Science and Human Nutrition; Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1959, Ph.D., 1966, Iowa State.

STORM, JOHN R., Emeritus Associate Professor of Human Development and Family Studies. B.S., 1959, Brigham Young; M.S., 1962, Arizona State; Ph.D., 1974, Oregon State.

STRICK, CURTIS J., Professor of Physics and Astronomy. B.S., 1976, Minnesota; M.Phil., 1978, Ph.D., 1981, Yale.

STUART, DAVID H., Associate Professor of Music; Associate Professor of Curriculum and Instruction. B.A., 1972, M.M., 1973, South Florida; D.M.A., 1981, Iowa.

STUFKEN, JOHN, Professor of Statistics. B.S., 1979, Ph.D., 1982, Catholic University; Ph.D., 1986, Illinois (Chicago).

SUIEN, JISHIAN, Assistant Professor of Community and Regional Planning. B.S., 1984, Feng Chia (Taiwan); M.U.P., 1988, Oregon; Ph.D., 1998, Washington.

SUNS, SIH-WU, Assistant Professor of Civil and Construction Engineering. B.S., 1983, Tsam Kung University; M.S., 1988, Auburn; Ph.D., 1994, Iowa State.

SVATOS, MICHÈLE LYNN, Assistant Professor of Philosophy and Religious Studies. B.S., 1987, Tulane; Ph.D., 1994, Arizona.

SVEC, HARRY J., Emeritus Professor of Chemistry; Emeritus Professor in Liberal Arts and Sciences. B.S., 1941, John Carroll; Ph.D., 1960, Iowa State.

SWAN, PATRICIA B., Emeritus Professor of Food Science and Human Nutrition. B.S., 1958, North Carolina (Greensboro); M.S., 1961, Ph.D., 1964, Wisconsin.

SWENSON, CLAYTON A., Emeritus Professor of Physics and Astronomy; Emeritus Professor in Liberal Arts and Sciences. B.S., 1944, Harvard; D.Phil., 1949, Oxford.

SWENSON, RUTH WILDMAN, Emeritus Professor of Botany; Emeritus Associate Dean of Liberal Arts and Sciences. A.B., 1946, Mount Holyoke; M.S., 1947, Illinois; Ph.D., 1969, Iowa State.

SWITZER, WILLIAM P., Emeritus Professor of Veterinary Microbiology and Preventive Medicine; Clarence Harley Covault Distinguished Professor in Veterinary Medicine. D.V.M., 1948, Texas A and M; M.S., 1951, Ph.D., 1954, Iowa State; Dr.H.C., 1979, Vienna.

*TABATABAI, LOUISA, Professor of Biochemistry, Biophysics and Molecular Biology (Collaborator); Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.A., 1962, California (Berkeley); M.S., 1966, Ph.D., 1976, Iowa State.

*TABATABAI, M. ALI, Professor of Agronomy. B.S., 1958, Baghdad; M.S., 1960, Oklahoma State; Ph.D., 1964, Southern Illinois.

**VALLER, JANE E., Adjunct Assistant Professor of English. B.A., 1963, Morningside; M.S., 1969, Iowa State; Ph.D., 1960, Colorado.

VALLER, TRACY L., Associate Professor of Geological and Atmospheric Sciences (Collaborator). B.S., 1962, Iowa State; Ph.D., 1967, Oregon State.

**VAN VOORHIS, TIMOTHY, Assistant Professor of Industrial and Manufacturing Systems Engineering; B.A., 1988, Covenant; B.S.E., 1988, M.S., 1992, Ph.D., 1997, Georgia Institute of Technology.

**VANDEWINTER, HLKE, Professor of Economics. B.Sc., 1959, M.A., 1961, McGill; Ph.D., 1964, Iowa State.

VANNET, DELMAR B., Associate Professor of Mechanical Engineering. B.S., 1954, B.S., 1957, M.S., 1958, Missouri.

**VARDAMAS, Constantine, Professor of Statistics; Professor of Industrial and Manufacturing Systems Engineering. B.S., 1971, M.S., 1973, Iowa State; Ph.D., 1975, Michigan State.

**VENKATA, SUBRAHMANYAM, Professor of Electrical and Computer Engineering and Chair of the Department. B.S., 1963, Andhra (India); M.S., 1966, Indian Institute of Technology; Ph.D., 1971, South Carolina.

**VENKATAGIRI, HOBIRAGUL, Associate Professor of Psychology. B.A., 1967, M.S., 1969, Mysore; Ph.D., 1977, Boston College.

**VESTERLUND, LILITH, Assistant Professor of Economics. B.A., 1990, Copenhagen (Denmark); M.S., 1995, Ph.D., 1997, Wisconsin.

**VIGIL, DENNIS R., Assistant Professor of Chemical Engineering. B.S., 1985, New Mexico; M.S., 1986, Ph.D., 1990, Michigan.

**VILES, JOSEPH MOORE, Associate Professor of Zoology and Genetics. B.A., 1965, Rice; M.S., 1968, Ph.D., 1969, Tulane.

**VINOGRADO, BERNARD, Emeritus Professor of Mathematics; Distinguished Professor in Liberal Arts and Sciences. B.S., 1937, City University of New York; M.A., 1940, Ph.D., 1942, Michigan.

**VITTAL, VIJAY, Professor of Electrical and Computer Engineering. B.E., 1977, B M S. College of Engineering (India); M.Tech., 1979, Indian Institute of Technology; Ph.D., 1982, Iowa State.

**VLECK, CAROL M., Associate Professor of Zoology and Genetics. B.A., 1972, Pomona; M.S., 1972, Ph.D., 1978, California (Los Angeles).

**VLECK, DAVID, Adjunct Associate Professor of Zoology and Genetics. B.A., 1972, Pomona; Ph.D., 1978, California (Los Angeles).

**VOIGT, ADOLF F., Emeritus Professor of Chemistry. B.A., 1935, Pomona; M.A., 1938, Claremont; Ph.D., 1941, Michigan.

**VONDRA, CARL FRANK, Emeritus Professor of Geology; Distinguished Professor in Liberal Arts and Sciences. B.S., 1956, M.S., 1958, Ph.D., 1963, Nebraska.

**WAGGONER, KATHLEEN M., Adjunct Assistant Professor of Sociology; Adjunct Assistant Professor of Political Science. B.S., 1975, Wisconsin (Lacrosse); M.S., 1978, Ph.D., 1983, Iowa State; J.D., 1987, Drake.

**WAGNER, BRUCE HARVEY, Associate Professor of Mathematics. B.A., 1975, California (Santa Cruz); M.A., 1979, Ph.D., 1982, California (Berkeley).

WARD, IRA J., Emeritus Professor of Veterinary Clinical Sciences. D.V.M., 1974, Purdue; M.S., 1983, Kansas State.

WALKER, HOMER W., Emeritus Professor of Food Science and Human Nutrition. B.S., 1951, Pennsylvania State; M.S., 1953, Ph.D., 1955, Wisconsin.

WALKUP, JOSEPH K., Emeritus Professor of Industrial and Manufacturing Systems Engineering. A.B., 1932, B.M.E., 1932, l.e., 1941, Ohio State.

WALLACE, ROBERT S., Associate Professor of Botany. B.S., 1981, Willkes; M.S., 1984, Ph.D., 1988, Rutgers.

WALSH, THOMAS E., Associate Professor of Hotel, Restaurant, and Institution Management. B.S., 1953, M.A., 1962, Michigan State; Ph.D., 1980, Iowa State.

WALLACE, DAVID L., Associate Professor of English. B.A., 1932, B.M.E., 1932, I.E., 1941, Ohio State.

WATERS, RAY, Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1985, D.V.M., 1988, Auburn; Ph.D., 1996, Iowa State.

WEBER, THOMAS A., Professor of Physics and Astronomy. B.S., 1962, De Paul; Ph.D., 1961, Notre Dame.

WECHSLER, MONROE S., Emeritus Professor of Materials Science and Engineering; Emeritus Professor of Nuclear Engineering. B.S., 1944, City University of New York; A.M., 1950, Ph.D., 1953, Columbia.

WEERASINGHE, ANANDA, Associate Professor of Mathematics. B.S., 1979, Colombo; Ph.D., 1986, Minnesota.

WEI, LI, Assistant Professor of Finance. B.S., 1992, M.S., 1994, Tsinghua (China); Ph.D., 2000, Utah.

WEIBUST, INGER, Assistant Professor of Political Science. B.Sc., 1986, Carleton; M.A., 1990, Ottawa; Ph.D., 2000, Massachusetts Institute of Technology.

WELLS, GARY L., Professor of Psychology; Distinguished Professor in Liberal Arts and Sciences. B.S., 1973, Kansas State; Ph.D., 1977, Ohio State.

WENINGER, QUINN A., Assistant Professor of Economics. B.Sc., 1989, Alberta (Canada); Ph.D., 1995, Maryland.

WHEELock, thomas d., Emeritus Professor of Chemical Engineering. University Professor. B.S., 1949, Ph.D., 1959, Iowa State.

WHigham, myrna, Adjunct Associate Professor of Curriculum and Instruction. B.S., 1965, Northwest Missouri; M.S., 1971, Ph.D., 1985, Iowa State.

Wilsnant, kerry lewis, Associate Professor of Physics and Astronomy. B.S., 1976, Missouri (Rolla); Ph.D., 1982, M.S., 1982, Wisconsin.

Whitaker, FAYE PaulL, Associate Professor of English; Associate Provost. A.B., 1963, Laclede; M.A., 1965, Western Michigan; Ph.D., 1974, Northwestern.

White, bernard j., Emeritus Professor of Biochemistry, Biophysics and Molecular Biology; University Professor. B.S., 1958, Portland; M.A., 1961,  Ph.D., 1963, Oregon.

White, Pamela JUne, Professor of Food Science and Human Nutrition. B.S., 1972, M.S., 1974, Washington; Ph.D., 1979, Iowa State.

Whiteford, Michael B., Professor of Anthropology and Chair of the Department. B.A., 1967, Beloit; M.A., 1970, Ph.D., 1972, California (Berkeley).

Whitham, steven a., Assistant Professor of Plant Pathology. B.S., 1990, Iowa State; M.S., 1992, Ph.D., 1995, California (Berkeley).

Wickershams, thomas w., Emeritus Professor of Animal Science. B.S., 1941, M.S., 1954, Iowa State.

Widrlechner, mark p., Assistant Professor of Agronomy (Collaborator); Assistant Professor of Horticulture (Collaborator). B.S., 1977, Michigan State; M.S., 1980, Illinois; Ph.D., 1982, Minnesota.

Wiener, merle oliver, Emeritus Professor of Industrial Education and Technology. B.S., 1938, Northern Iowa; M.S., 1950, Iowa State.

Wilder, David R., Emeritus Professor of Materials Science and Engineering. B.S., 1951, Ph.D., 1956, Iowa State.

*ZIMMERMAN, JEFFREY J., Associate Professor of Veterinary Diagnostic and Production Animal Medicine; Associate Professor of Veterinary Microbiology and Preventive Medicine. B.A., 1978, Nebraska (Omaha); D.V.M., 1984, M.S., 1986, Ph.D., 1990, Iowa State.

*ZIMMERMAN, ZORA DEVRNJA, Professor of English; Associate Dean of the College of Liberal Arts and Sciences. B.A., 1967, Ph.D., 1974, New York (Buffalo).

ZMOLEK, WILLIAM G., Emeritus Professor of Animal Science. B.S., 1944, M.S., 1951, Iowa State.

*ZUERNER, RICHARD L., Associate Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.A., 1980, California State (Chico); M.S., 1983, Ph.D., 1986, West Virginia.
