**Transformation of campus culture**

**International recruitment strives to attract, inform students about unique opportunities**

By Katharina Gruenwald
Iowa State Daily

Iowa State has a record international student enrollment this year. According to ISU’s Office of Admissions, 3,797 international students have enrolled for Fall 2013. The highest number in Iowa State history, this is a 3% increase from last year.

Fifty years ago, if students wanted to go to watch a basketball game, instead of crossing Lincoln Way to Hilton Coliseum, they would head to the opposite direction — the State Gym.

GFP conference to showcase work of grad students

Event to present research, forums on grant writing

By Michelle Schoning
Iowa State Daily

The conference, planned by the Graduate and Professional Students Council, will be held from 3-6 p.m. on Thursday, Aug. 22 in 1051 Seerley Hall.

**In Asian countries like Singapore, most students often cannot be met, so the Admissions Office concentrated on those territories at the beginning of international recruitment. University said that markets around the world grew and declined, more territories were added.**

"We do not have a vet program in Singapore," Abdul-Baki said. "The veterinarians over here areWe do not have a vet program in Singapore," Abdul-Baki said. "The veterinarians over here are [that's] glassed in. It was pretty cool."

"When Honeick was first hired, the largest building on campus was Stoenner Hall, where the university computer was also housed. In 1966, it was moved to its current location north of campus near Ames Laboratory buildings. In addition to building renovations, Honeick said one of the greatest changes in the university was the development in the technology usage.

"When I first moved in 1962, (Stoenner Hall) was wall to wall computers. Computers took up the whole area. The second floor was filled from floor to ceiling. And now everything is so big and so much hand," Honeick said. "It's amazing how computers and desktops have advanced over past 50 years."

Every year, students send out applications to employers to land an internship. Some graduate in the summer and require internships in order to graduate. One of the downsides to this option is that it can be time-consuming. There are many factors students consider when choosing an internship. One of these can be whether or not it is paid.

There are many benefits to being paid during an internship, giving students more time to focus on completing that internship experience. "There are students more motivated to do well in their internships if they are paid because they know the internship more like a job," McDonough said. And the benefits are not necessarily limited to monetary gains. The employers could also benefit from paying their interns.

"I think that there are a number of large media outlets that simply don’t pay their interns over the summer," McDonough said. "But the same recognition from the organization is sometimes enough to help the student get hired on a full-time basis after completing an internship, or for entry-level employment.""I know that there are organizations do not offer paid internships, but those organizations do not always available. Often, if a student receive from their internship an interview if the organization or company is interested, they can’t afford work experience. That is when the offers start to come. "As long as the student is benefitting the organization in some way, I think they should be paid for their work," Moyna said. "Some students can’t pursue internships because they can’t afford work experience, which puts them at a disadvantage when it comes time to find a job, which can benefit to them in the future."
Search begins for new vice president of research

The search for a new vice president of research has begun.

The vice president for research is involved in the entire research enterprise, including faculty and institutes, and the ISU Research Foundation. The position also works with the offices of intellectual property and technology transfer; sponsored programs; administration; responsible research and discovery; animal resources.

“We are looking for a full professor who should have some experience in working with external funding and funding officers,” said Sharron Quisenberry, retiring associate dean for research and graduate studies in veterinary microbiology and associate professor who should have some experience in working with external funding and funding officers.

They should also have administrative and leadership abilities,” she said. “If he or she will be responsible for a staff and need to be able to work with a wide range of audiences both internal and external.”

Jonathan Wickert, senior vice president and provost, has selected a 16-faculty member committee to assist in the selection of the new vice president of research.

The committee consists of nominated faculty members who are being guided by Schmittmann and three ISU faculty members from the programs and dean of the Graduate College.

The vice president of research would be responsible for all research activities on campus,” Schmittmann said. “He or she will be responsible for many of the big centers on campus.”

The vice president will also manage the pre-award and post-award services, including grant submissions and administrative, including internal and external programs administration, Schmittmann said.

“The search committee will screen the applicants and come up with a short list to interview the candidates and then make a recommendation to the provost,” Wickert said. Schmittmann said. 

Holger also said Iowa State has done a good job in a wide spectrum of research that has ranged from very basic research to applied research and technology transfer.

“The search for the vice president is being organized as an internal search among ISU faculty. The nominees will be a full-time professor. Applications may be submitted online with a cover letter, curriculum vitae and three references. Deadline for applications is Oct. 15, and the position will begin Jan. 1, 2014. Nominations for the position are to be submitted to Schmittmann and Holger.

The position has been open since the previous vice president for research, Sharon Kramberger, retired in July.
The shutdown is entirely the fault of the GOP, so let’s see this straight: The government shutdown will be unearthed again in November next year, the government will not be working — until a continuing resolution is passed for the next month break we normally enjoy from our national government budget.

After all, a lot tends to happen in the months before each election. For those of us who will be living in Iowa during the coming to the table nor is it in the spirit of the GOP didn’t shut down the government; it was the Democrats who dared reform health care. The man who dared reform health care.

‘Our business is rejoicing, our business is rejoicing,’ and you rise, okay, and you want a lot of businesses to stop working — until a continuing resolution is passed for the next month break we normally enjoy from our national government budget.

The only way to be a truly informed voter is to be a truly informed voter.

Hit the gym, eat right to avoid being fat, the average student gets only six hours of sleep. Over time, help you stay in better shape. The next time you’re busy you may be, maintain—

“Aches and strains of those days often turn into a distraction. The average American wants to work — until a continuing resolution is passed for the next month break we normally enjoy from our national government budget.

The government shutdown, even the most recent one, has its roots in the same psychological phenomenon: a lack of compassion. The government shutdowns that we’re seeing now are not just about the division between the two parties, but also about the kind of people who run those parties. The shutdowns are a symptom of a larger problem in American politics: a lack of empathy and a failure to understand the needs of others. It’s important for us to remember that the government shutdowns are not just about the politics of the moment, but also about the kind of people who run those parties.

And yet, despite all of this, there are those who still want to see the government work. They want to see the government work for the people, not just for the political parties. They want to see the government work for the people, not just for the political parties.

It’s important for us to remember that the government shutdowns are not just about the politics of the moment, but also about the kind of people who run those parties.
Game information

What: Basketball game
When: 6:30 p.m. on Oct. 3 at Jack Trice.

Coverage:
- ISU Sports isdsports@iowastatedaily.com | 515.294.2003
- Iowa State and Texas will be the first women’s basketball game of the season.
- It will be broadcast live on Fox Sports 1.
- Fans can also follow the game on Twitter: @isusports.
- Iowa State Equipment Manager Michael Wiltsie said: “We want everybody to come out and watch.”
- The Iowa State women’s basketball team will be wearing their new uniforms.
- The Cyclones will be wearing white jerseys with blue lettering and blue shorts.
- The Longhorns will be wearing black jerseys with white lettering and white shorts.
- The Cyclones are favored by 5.5 points.
- The game is the first of six home games for the Cyclones.
- The Texas Longhorns are predicted to be a difficult opponent.
- The Cyclones are looking to improve from last season.
- The Cyclones are expected to use their height advantage against the Longhorns.
- The Cyclones are also expected to use their 3-point shooting ability.
- The Cyclones are looking to improve their defense against the Longhorns.
- The Cyclones are looking to build on their success from last season.
- The Cyclones are expected to use their depth and experience against the Longhorns.
- The Cyclones are looking to use their strong bench to get key contributions from their reserves.
- The Cyclones are looking to use their经验 to gain an advantage against the Longhorns.
- The Cyclones are looking to use their fast breaks to score easy points.
- The Cyclones are looking to use their strong defense to limit the Longhorns.
- The Cyclones are looking to use their strong rebounding to get easy second-chance points.

Aaron Carter launches tour, new career

By Amanday Meyer
@Iowastatedaily.com

Vinyl records made their first appearance in the music world in 1921 but are making a comeback. The trend in the music industry has had quite the adventure while becoming the current music sensation.

Several circumstances have led to the increase in the vinyl record sales, such as the interest in the pop culture.

Keenan Forrester, freshman in graphic design, said the drastic increase in vinyl sales can be explained by the trends of today’s modern generation following the new music technology.

“I call it the ’hipster’ trend,” Keenan said. “Keenan Forrester chose vinyl over CDs because he enjoys listening to records when he has free time. He likes it better because there’s no need for batteries, and you can cut the wax for a unique design. Keenan Forrester spent around $100 on the vinyl collection and pushes people to try the vinyl record because he’s a big fan of it.

Keenan Forrester explained that as technology such as iPods and MPVs have made music more available, our generation has become more fascinated and interested in other forms of technology.

Keenan Forrester enjoys this style because he’s able to have a fun collection to collect and be proud of their more attractive covers.

“I think that vinyls are going to continue selling as a form of art and not for enjoyment. Keenan said, "Vinyl records are starting to come out with vinyl covers, and that’s helping the industry a lot. By carrying your vinyl records, you have a lot more to show off than just your CDs.

Another reason for the increase in vinyl sales is because more of a decorative piece rather than just listening to them like you have been in the past. Many people still display vinyl records in their homes. In some rooms, acting as a visual for a certain view. Some people have their albums open from it, to put on display. The shop is open on Thursdays, Fridays, and from 1-3 on Tuesdays and Sundays.

Inktlok brings color to Campustown

Forrester ventured to the East Coast in hopes of chasing his dream of becoming a skilled artist. He worked in Harrington-Peter for a little less than a year, he said. He decided he did not like the employee benefits and that he wanted to try something new. So he moved to Mountain View, Calif., and worked as a tattoo artist. He wanted to move to Mountain View under Patsy Thir.

“Before I could say any other thing, he went on to say that he wanted to get a tattoo. He said that he was not sure what to do, but he knew he had to learn how to do it."

Forrester mentions that when you work as a part of your profession Forrester-Hansen is a master and he has a lot of influence on his work. He displays the highest regard for this. In the retail corridor. The shop is open to the public for musical performance as well. Keenan said, "Forrester-Hansen is a master and he has a lot of influence on his work. He displays the highest regard for this."

Vinyl records find modern market

The café, which opened its doors in 2010, features vintage vinyl records, the cafe offers tapes and some CDs. The Vinyl Cafe also sells an array of coffee and other beverages as well as local jewelry.

“Keenan Forrester was so excited about the opening of the shop. "I’m so happy about the opening of the shop. "I’m so happy about the opening of the shop."
