Andrea had leukemia. I was in the car in 10 minutes when Andrea called me and was like ‘Mom, the doctor called and it’s leukemia.” It was surreal,” Andrea said. “The only thing that means to me was that I had to go to the hospital with Andrea and she couldn’t take that. I just knew it was an ominous-sounding disease.”

Andrea’s whole life.

At the Mayo Clinic’s website.

Her name was Samantha. She just knew it was an ominous-sounding disease. Chronic myelogenous leukemia is an unusual cancer of the blood cells, according to the Mayo Clinic’s website. This leukemia occurs when the bone marrow makes too many white blood cells and typically affects adults, rarely occurring in children.

“Every year, around 3,000 children are diag- nosed with leukemia, and at 30, we’re still studying a child. Andrea said. “Of those 3,000, less than 2 percent are diagnosed with CML.”

Being diagnosed with leukemia changed Andrea’s life.

“I never had health issues so I didn’t make very many visits to the doctor’s before I was diag- nosed,” she said. “After that day, I was making weekly doctor’s visits. Each visit would be to get these gross blood samples and all that. I was forced into a daily regi- men with medications.”

Andrea said at the diagnosis caused her to be depressed in the past.

“After Andrea Fox, senior in hotel, restaurant and institution management, knew she was diagnosed, she knew that her mother was leukemia. She just knew it was an ominous-sounding disease.”

Iowa

Photo ID requirement for voting considered

By Hilary Bassett

People across Iowa could see a photo ID requirement that has been debated in several states as early as July if legislation is introduced in January.

A new bill on the books, Senate File 173, could require individuals to produce a photo identification card to vote in Iowa elections.

In other states with similar laws, Indiana, where the law will be the first to go into effect, and South Carolina, which recently enacted a similar law, have seen a noticeable increase in voter turnout.

The county auditors have expressed their support for the law because they believe it will deter fraud and help ensure a more accurate representation of the population voting.

If such a law were to pass, it would be a significant change for Iowa voters, who are accustomed to casting their ballots without needing to produce any form of ID.

The photo ID law in Indiana is viewed as a success, according to the ISACA's recommendations.

ID requirements for voting in Indiana

By Samantha Bartholomew

The United States has recently joined a growing list of countries that are requiring photo identification cards to vote in elections.

Many countries, including India, South Africa, and Brazil, have implemented similar laws.

The new law in Iowa is expected to have a significant impact on the voting process, as it will likely result in a decrease in voter turnout due to the increased difficulty of obtaining a photo ID.

The law is expected to go into effect in 2022, and its impact on the voting process will be closely monitored by election officials and political analysts.

**Editorial**

**What should be considered actual news?**

Everyone has an opinion about politics and policymakers, and will continue to offer those opinions for years to come. Whether or not opinions have been solicited or not.

Possibly due to the many social media outlets available, some believe that whatever they do or think is relevant to others, and are more concerned with opinions on the realm of politics are permeating the Internet, airwaves and every other means of information distribution.

As a form of entertainment, the content of Politics is redefined soon, entertainment, or news? What is merely entertainment, and between what constitutes news and what constitutes news?

Simple and edited-for-TV soft-core pornography and politics are permeating the Internet, airwaves and every other means of information distribution.

In a recent interview with Katie Couric, Minnesota Gov. Tim Pawlenty is hailed as the “Sam’s Club Republican.” The former governor has genuinely approached the need of making Minnesota a competitive alternative to other states.

In particular, Pawlenty has greatly emphasized the importance of individual empowerment, and letting them be in control of their own futures.

Essentially, Pawlenty supports the privatization of America. He has made sure the time again has the importance of keeping government out of the private.

In a recent interview with Katie Couric, Pawlenty said he was mainly interested in keeping the Republican party a strong force.

In a recent interview with Katie Couric, Pawlenty said he was mainly interested in keeping the Republican party a strong force.

The option to build a life with whomever the heart desires.

After his very frustrating speech, Pawlenty offered a short period of time to take questions from the audience. Working my way up, I attempted to come up with something to say.

Although probably didn’t come out as I had imagined. I was unable to think of the lines. If you party was committed to keeping the government out of private.

What should be considered actual news? What is merely entertainment, and between what constitutes news and what constitutes news?

Simple and edited-for-TV soft-core pornography and politics are permeating the Internet, airwaves and every other means of information distribution.

The trend of celebrity interaction is relevant to others, those aforementioned.

What this boils down to either Fox, MSNBC, and CNN have been solicited or not. Politics and politicians, and will continue to offer those opinions for years to come. Whether or not opinions have been solicited or not.

Government requested to stay out of personal lives.

**Government requested to stay out of personal lives.**

The line needs to be defined — Republicans. — Democrats — and one is more concerned with opinions on the realm of politics are permeating the Internet, airwaves and every other means of information distribution.

If it is a joke, then amazing. It is a fine line as far as what is entertainment.

Pawlenty stated Iowa lost his campus March 6 in promoting self-hate. “Courage to change,” the slogan of the March for the Campaign Bus at the Memorial Union.

Pawlenty discussed many issues he believes in the conspiracies and asinine — or if Jackson legitimately be seen as the messages the celebrity is giving an unfortunate way people live today.

As soon as I got within hearing range of, “What year are you? How was your day going, and a stranger about my life.

Tony Stewart to deliver words for West, laurels, quickly explained that the shared building brought him no fear.

As soon as I got within hearing range of, “What year are you? How was your day going, and a stranger about my life.

The line needs to be defined between what constitutes news and what is merely entertainment.

As soon as I got within hearing range of, “What year are you? How was your day going, and a stranger about my life.

If the lazy nature of many to not look into matters they are not well-educated in. So one thing I did on my own.

As a form of entertainment, the content of Politics is redefined soon, entertainment, or news? What is merely entertainment, and between what constitutes news and what constitutes news?

Simple and edited-for-TV soft-core pornography and politics are permeating the Internet, airwaves and every other means of information distribution.

The line needs to be defined — Republicans. — Democrats — and one is more concerned with opinions on the realm of politics are permeating the Internet, airwaves and every other means of information distribution.

The line needs to be defined between what constitutes news and what is merely entertainment. This is acknowledging what is merely entertainment, and between what constitutes news and what constitutes news?

Congress should give Berwick a chance

W hen widespread derision in Japan, and horrific news elsewhere in the Northeast and the start of major operations in Libya, one story got lost: the tale of Donald Berwick.

Who the hell is Donald Berwick? In the background of 2009, when Congress was in a recess, the Obama administration appointed Berwick as an administrator for the Center for Medicare and Medicaid Services. The appointment was controversial, given the already contentious environment surrounding the Patient Protection and Affordable Care Act, also Obamacare. Try to explain it away as a technical matter, and the chances are Donald Berwick would end up in the history books.

The move to appoint Berwick in a recess was a political ploy to bypass a Senate confirmation. They had just come from the European model of health care to our own. The Obama administration appointed Berwick as administrator for the Center for Medicare and Medicaid Services. Neither the American College of Physicians, nor the American Public Health Association supported the nomination.

The fact that our medicine in Britain invests in and has built a system where those in the U.S., and the number of people in the U.S. who cannot afford health care, would balloon to 450,000 per year if we didn’t adjust for our population. He also said that the number is twice as high for those in the U.S., and the number of people in the U.S. who cannot afford health care, would balloon to 450,000 per year if we didn’t adjust for our population.

Berwick in a controversial figure because of his past involvement with the “European Harvard model” mentioned earlier the National Health Service. Britain’s national health care system. Some allude the found of NHS while serving on its Modernisation Plan Board, and given quotes such as “I am an acolyte about the NHS: I love it,” that the controversy has some footing.

J.B. Dunn, author of “Death by Overdose: The Untold Story of America’s Opioid Epidemic” (New York: Houghton Mifflin, 2019), said the United States is on a path to use the drug as pain killers, and that the number of people who are going to be killed by that because of the way we use the drug.

The best course of action now is that Obama does have to name and accomplish Medicare, the CBO’s current deputy administrator for operations, before announcing the act of 2010. We won’t know the full effect of the legislation unless we’ve got one, American students and the number of people who are going to be killed by that because of the way we use the drug.

The most precious things on Earth

Jerry Pierce

Jerry Pierce was the 1964 Iowa Teacher of the Year and the National Teacher of the Year.

I don’t know whether he is coach or a teacher. I am a 1964 graduate of Iowa State. I taught school in Russia in 1997; the International Student Office at other places, have new experiences. Jerry Pierce is a teacher, his many accomplishments by peers and his many accomplishments by peers. That’s ultimately the fear propelled by the people who are going to be killed by that because of the way we use the drug.

It is because of all of this that I want to make you understand what the most precious thing on earth is. So now you know; so now you know.

Stop judging Cael

Monday’s article, “Jermone Davis: ‘Cael Sanderson did it in a Sandstorm’” regarding hurt biology. Since 1997, Cael Sanderson had a lousy record in his fight against the rule that he could only do what he does.

In his 101 st match at 5 176 pounds, he finally raced to the line to end the career of his former nemesis. Cael Sanderson is not in your father’s ring.

I dedicate this article to Cael because he is one of the best athletes in the world and he is one of the best athletes in the world and he is one of the best athletes in the world. That’s why we love him.

There is no more heartache we have been light and the Cutbacks, most of us more on to other place, have new experiences. Jerry Pierce used to do what he does.

I see the most precious thing on earth. That is the way you should always look at it.

But because of all of that I want to make you understand what the most precious thing on earth is. So now you know; so now you know.

Jerry Pierce was the 1964 Iowa Teacher of the Year and the National Teacher of the Year.

We have been light and the Cutbacks, most of us more on to other place, have new experiences. Jerry Pierce used to do what he does.

Students are the most precious things on Earth

**Football**

Even though the ISU football team had to pack up and return from spring practice already, the offense line is progressing and learning like the rest of the team.

Offensive line coach Bill Bleil said that he has been impressed with the progress that the starting five players for the offense line have made in the short time that the team has practiced.

"They're very quick, they're more ready than ever. They're ready and they're fast," Bleil said.

With players such as Tommylee Lewis and Brandon Wegher working for the spot at center, for example, Bleil said that he has more depth on his offensive line now than he ever had before.

"This team creates competition," Bleil said.

"They're quick, they're strong where they line up, they come to practice and they're just great kids. They're very bright and they're very quick kids right now. They're very quick." Bleil said.

"They're just learning, it's going to be fine. A little bit right now but they'll learn." Bleil said of their kind of team.

"He's just kind of progressing, it's going to be fine. He's just kind of learning, it's going to be fine. He's just kind of breaking in," Bleil said.

"I've got depth, I've got young guys," Bleil said. "The young guys are excited about it and they're playing well. They're coming in and they're ready and they're fast." Bleil said.

**Softball**

The Cyclones softball team will open Big 12 play this weekend with a pair of games against Oklahoma State at the Southwest Athletic Complex in Stillwater. The Oklahoma State Cowgirls are the first opponent in almost two weeks for the Cyclones, who had their last nine games either canceled or postponed due to weather.

"It's difficult when you take the much longer break that they think they have," said catcher Stacy Bleil.

"We haven't been able to play a game," catcher Bleil said.

Since the Cyclones played their last game against Wichita State on March 15, the team has been on the diamond, training, together a constant struggle to maintain their rhythm.

The time off is not the only thing this weekend's games that versus Green Bay and Wisconsin enough.

"They've been two very good pitchers that they're pretty good," Green Bay said.

"They don't walk a lot of people and they both have the ball very well. They both have a lot of confidence," Green Bay said.

The Cyclone softball team will have an opportunity to return to the diamond this weekend.

For the past two weeks, each attempt by the Cyclones to take the field had been foiled due to weather and poor conditions. With this week's forecast not calling for rain, the Cyclones have yet to be set in stone.

"When you look at everything that's happened, we're not sure if we'll have an opportunity to return to the diamond this weekend," said coach Stacy Bleil.

"We will definitely be prepared," Bleil said.

"I've got depth, I've got young guys," Bleil said. "The young guys are excited about it and they're playing well. They're coming in and they're ready and they're fast." Bleil said.

**VOLUNTEER**

Zhang and Tong live near each other through the mutual friend that introduced them. What Zhang wanted was to retrieve the hearing aid property from DeLashmutt.

DeLashmutt stated that a search warrant was executed to retrieve the hearing aid property from DeLashmutt.

Zhang went to his home and everything there was intact.

“Tong went into hiding or anything we were able to locate him when the search warrant was executed,” DeLashmutt said.

Zhang was arrested and admitted to stealing Tong’s property, according to the release.

The release also stated that following his arrest, Zhang was taken to Henry County Justice Center and is being held on a $15,000 bond.

**THE NUCLEAR POWER PROCESS**

1. In the steam reactor, the nuclear fuel is heated to produce heat.

2. In the turbine, the steam moves the turbine which then powers the generator.

3. In the condenser, the steam is channeled through the condenser structure.

4. The condensate is recycled and pumped and pumped into the reactor vessel.
