Lawmakers in Iowa share differing stances on Obama's recent proposal

By Mike Henson

At Iowa State, community colleges have been in the news recently, with Senator Joni Ernst, Rep. Dave Loebsack and others weighing in on the debate. The question is whether or not to make Iowa State-free college a reality.

Senator Ernst and Rep. Loebsack both support the idea of free college, but they are concerned about the cost. Ernst has said that the state should pay for it, while Loebsack believes that the federal government should cover the cost.

Rep. Loebsack said, "I think that something like that would be a great idea." He added that it would be a way to help students who are struggling to pay for college.

Senator Ernst echoed her colleague, saying, "I have always been a big proponent of making higher education more accessible and affordable for all Americans. I think that free college is a step in the right direction." She added that it would help to reduce the burden on students and families.

While both lawmakers are in favor of the idea, they are concerned about the cost. Ernst has said that the state should pay for it, while Loebsack believes that the federal government should cover the cost.

In the end, the decision will likely come down to whether or not the state and federal governments are willing to pay for it. If not, the idea of free college may remain just that: a dream.

By Mike Henson

The White House has said the proposal could help as many as 9 million students and save them an average of $1,200 per year.

The policy would allow community college students to earn their associate degree or technical certification at no cost. Students would also be able to transfer to a four-year college at no cost.

However, Republicans believe that it would cost too much. They argue that it would lead to higher taxes and slower economic growth.

The White House was not immediately available for comment.

Digital transition drives DOT app

By Eric Wirth

IOWA STATE DAILY

Thursday, Feb. 5, 2015

The shift from analog to digital may soon affect the Iowa Department of Transportation’s (IOWA DOT) processes.

The IOWA DOT is expected to have a mobile phone app after six months, which the DOT hopes to begin testing internally within the next six months, would allow drivers to present digital forms of their license to the police on traffic stops, Henry said.

“It’s great for people to have one less thing to carry,” said Jason Tuttle, public information officer for the Ames Police Department.

While the system would allow for greater convenience, it does come with concerns. One issue in the aspect of security is the system being developed for the Iowa DOT is anticipated to have biometric security feature, currently handles digital driver’s license in Colorado and Washington.

“We’re responsible for that phone,” Tuttle said.

Police officers have concerns about the program, especially when it comes to the physical phone in the question, Tuttle said.

“We’re not going to give you your wallet on a traffic stop,” Tuttle said.

Adding that some people may just want to know whether their phone has been replaced by the software. Officers don’t have to deal with the same situations as the police officers do. Tuttle said.

MorphoTrust USA, the company developing the digital driver’s license software, currently handles digital driver’s license issuance in Colorado and Washington.

“There’s going to be problems, but there has to be something for it to get better,” Hurst said.

Iowa is the only state developing a digital driver’s license app. Delaware is also working on enacting a digital driver’s license program. Iowa DOT is allowing its department in beginning to research the idea.

The Department of Transportation is now working as a result of the first state in the United States to provide its citizens with a digital version of the driver’s license.

Singimg study makes progress in Parkinson’s patients

By Marihah Anderson

Dr. Elizabeth Stegemöller, assistant professor in kinesiology, said a speech on her findings from the research on the effects of singing on Parkinson’s Disease.

Stegemöller organized four different groups for the study: one in Des Moines, one in West Des Moines, one in Warrenville and one in Ames. Each group ran for a different music therapy, such as yoga, drumming, piano lessons and vocal therapy. All groups ran for eight weeks at the First Baptist Church of Ames. Together, they continued without a hitch.

The singing intervention phase consisted of a treatment phase. The pre-test and post-test study had participants to compare the participants to who have not. She will also consider the group, even though the group is expected.

“Stegemöller’s research on singing and swallowing and expiratory pressure due to how Parkinson’s affects the nervous system that slowly begins to affect a person’s movement. To do this, Stegemöller decided to organize four study groups comprised of people living with Parkinson’s.

The first step in putting up the study was presentation which was giving a grant from the Parkinson Study Group. The preparation process for the research was a tedious one. It was about a year from the time that the Parkinson Study Group awarded Stegemöller a grant from the state of Iowa, Henry said.

While she was unable to comment on the exact security measures to be implemented in the app, security reasons, Jenny Openshaw, vice president of state and local Sales for MorphoTrust USA, said the app will contain many visible and invisible security features.

For ISU students who were involved in the research, such as a finger print or biometric security feature, as well as additional security measures.

“Stegemöller’s research is due to how Parkinson’s affects the nervous system that slowly begins to affect a person’s movement. To do this, Stegemöller decided to organize four study groups comprised of people living with Parkinson’s.

As is the case with the majority of jobs, carefully discuss your salary expectations with your team confidentially. It’s important to meet the expectations of everyone involved. We want to ensure that each student finds a path that works for everyone involved, and we all need to work together to make sure our goals are met.

Kevin Rettig, owner of The Cafe, said it would be strange for one to go to The Cafe and be turned away. “On Valentine’s Day, The Cafe has really a very different atmosphere.”

They also offer several other topics for Valentine’s Day: Cakes, flowers, and make-up products. “There are many more people who use the offices for their Valentine’s Day needs.”

For people who haven’t made reservations, there are always rush reservations that don’t take reservations, if you’re patient enough.

The Cafe will have its regular weekend menu with different features for Valentine’s Day. Kevin Rettig, owner of The Cafe, said it would be strange for one to go to The Cafe and be turned away. “On Valentine’s Day, The Cafe has really a very different atmosphere.”

A May 2012 university study found that the Department of Kinesiology at Iowa State has grown 1.5% since 2007 and that the growth has created a shortage of functional and office space.

A monthly university report provides an update to the Board of Regents on the University of Iowa campus, which will then be released the next Thursday. The report will include updates on the diversity, students and faculty, and the need for additional office space.

Valentine’s Day is a tradition born out of the zealous feeling of love, and as such, is an entire day sequenced for the pure desire to spend money, whether by detectable orders, plush teddy bears or fragrant flowers.

Once dear St. Valentine was the embodiment of love and the face to which has become of this trivialized holiday, as conceived in his name. Rosy petals, delicately scented candles, intoxicating liqueur, and alluring music creating a feverish brew is the result of the ever increasing celebration of this one day in February. During the reign of Emperor Claudius II, it was decided that single men made superior soldiers compared to those who were married and families. The emperor then outlawed marriage for young men. Emperor Claudius II was ordered that he be required to perform marriages for young men. Valentine, realizing that the pure desire of seduction, or then outlawed marriage for cellebrates the day of the lovers, was meant to be a celebration of love, and the only thing we never get enough of is love, and the only thing we need to recognize St. Valentine’s Day.

Recruits hope to leave mark on program

By Alex Goshkin
@iowastatedaily.com

National Signing Day is usually a day of excitement for programs that go through the transfer portal. For the Sooners, “hellos” are the most important vocabulary word for coaches holding great conferences, and even recruits have more “potential” than their recruiting ranking suggested.

For the Sooners, it was no different. 2015 football coach Paul Rhoads could feel the pressure building up, especially with the Sooners entering their 11th consecutive season at second place in the Big 12, the team that currently sits at second place in the Big 12 conference standings.

The Sooners have won the Big 12 conference title only once in the past 12 seasons. The Sooners have had enough.

The Sooners were able to gain key recruits during the 2015-16 and eventually announced a 2016 class.

In the second half, the Cyclones struggled to get the deficit to single digits, and a mini run late in the game would be enough to seal the deal.

The Sooners got into a working margin in the second half, as well and bolted late in the third quarter.

The Sooners lead single digits at 27-58, but the Sooners’ offense continued to score over the final two quarters.

The Sooners were able to gain key recruits during the 2015-16 and eventually announced a 2016 class.

The Sooners have won the Big 12 conference title only once in the past 12 seasons. The Sooners have had enough.

"I expect to have an impact," Scroggins said. He’s excited about what he’s going to mean for those in his position.

"I’m going to work hard," Scroggins said. "I’m going to work hard in the classroom as well as the weight room."

Tucker and Scroggins, both wide receivers and defensive linemen, respectively, will arrive in Ames this summer to start working with the Cyclones.

"I expect to leave a mark on this program," Scroggins said.

ISCU CLASS RANKING

There are 25 newcomers to the ISU football team in the 2015 recruiting class that walk-ons.

ISU coach Paul Rhoads said that he was pleased with this recruiting class, saying that his staff had finished out the recruiting period well.

The Usual Things hit stage for next performance

By Lauren Frakes @owastatedaily.com

The Usual Things are holding a kick-off show for their new album, "Terra Incognita," which is set to release later this month. They will perform at the Maintenance Shop in Des Moines at 9 p.m. on Friday, January 5. The doors will open at 8:30 p.m. The show is all-ages and open to the public. There will be a $5 increase at the door of the show.

The Usual Things, an up-and-coming band, is playing at Vaudville Mews in Des Moines on Friday at 9:30 p.m. The show is for adults.

Stay tuned for more updates from The Usual Things and their upcoming performances.

Joe Hertler and The Rainbow Seekers prepare for Maintenance Shop show

Joe Hertler and The Rainbow Seekers, with a new album titled "Terra Incognita," coming out soon, is scheduled to play at the Maintenance Shop on Friday at 9 p.m. Doors to the event will open at 8:30 p.m.

Joe Hertler and The Rainbow Seekers have been together for about four years since the group's debut performance together at a New Year's celebration and festival.

"I had known some of the guys at the time, but it was just making music," Hertler said. "They offered to back me up for a show and it just clicked." Hertler said the band is the lead singer of the group.

The band has a new album coming this month, "Terra Incognita." According to Hertler, the overall theme of "Terra Incognita" is, "It's about being out of this world.

"All things come to an end at some point. You can find permanence in the only things might affect you. It searches pretty somber, but the record is really uplifting," Hertler said. Hertler said the group is looking forward to this album being performed.

"We have done some bad branding, but usually I present a simple, rocky sounding song and they change into a whole different piece. We don't really tell each other what to do," Hertler said. "I like the spontaneous way of performing its music.

They have a unique way of mixing their instruments that I'm not familiar with. They change the tempo frequently, which I like, so that the same song sounds different at different points," said Steve Kryk, a musician and part of the band.

The Rainbow Seekers have been performing at a New Year's celebration and helping curate that, like your brain actually reacts to some things. For the first time, he is touring as frequently and plan to increasetouring this spring and fall and plan to increase touring this spring and fall. They will feature Joe Hertler and The Rainbow Seekers on Friday.

Joe Hertler and The Rainbow Seekers have performed across the country and plan to return to performing this summer. While the group still isn't touring as frequently as expected, they are hopeful that the upcoming album will help garner more interest for an upcoming tour.

"There's something appealing to have a group of people sharing an experience, and helping curate this experience is an innate calling. When people are in church, they feel good. When they're at a rock concert, they feel good. It's very similar to that," Hertler said. "It's an interesting way of mixing their instruments and their way of performing its music.
