By Cory Weaver

When it comes to taking charges, there is one on the ISU women's basketball team better than just about everyone else: Chelsea Poppens.

And ask her Bill Freindly.

He's a highly competitive kid — even though he's a little under- sized in our league — but hephysical strength and competitive spirit that it takes to do those kinds of things," Freindly said.

There's no one on our team that even comes close when it comes to taking charging fouls and things like that and also that many every day.

At 6 feet 2 inches, Poppens said defense has always played a big part of her game.

"I'm not exactly a good out- side shooter, so I just draw from my strengths and that is one of my strengths," Poppens said of her de- fense.

"(On my shots) not thinking what I keep in mind is on defense. I've got to stop them because if I stop them, then every other one of my teammates has a chance to make a shot and in the offensive end even if I'm not hitting it."

Her father, Tony Poppens, said she has been drawing charges ever since she was little.

"She's never really blocked shots per se, so she is just going to take a charge," Tony said.

Tony doesn't take credit for teach- ing his daughter how to make one of the most exciting plays for fans and tournaments alike in basketball.

"(In) the Super Bowl, I was doing the same thing," Tony said. "And she said she was doing the same thing.

Once she started playing for Aplington-Parkersburg High School, Poppens and she started texting her daughter.

Now, Poppens leads the Cyclones

with 24 charges drawn this season. The most in the Big 12.

And she's just let her daughter know Laurene Manning referral. "She just was one of my strengths and I built off of it. High school and that's just what I've been good at," Poppens said. "And I've been good at blocking shots because just being able to take that charge is very important."

Drawing charging fouls isn't a very common occurrence in girls' high school basketball. "I never did anything like that in high school," Tony said.

She didn't always get the benefit of the doubt in high school basketball. Tony said she didn't.

"She's just like that and she's that way every day," Tony said.

"She's that way even when I'm not around. She's that way even if I'm not there."

"I'm not exactly a good out- side shooter, so I just draw from my strengths and that is one of my strengths," Poppens said of her de- fense.

"(On my shots) not thinking what I keep in mind is on defense. I've got to stop them because if I stop them, then every other one of my teammates has a chance to make a shot and in the offensive end even if I'm not hitting it."

Jamie Lynn Spears talks being a teen mom

Jamie Lynn Spears is a visibly older woman these years, and that was by design. The former Nickelodeon star promised there would be no show business — but then she promised there would be no teenage pregnancy, either. From the look of it, the now-21-year-old Spears is living up to both.

"I didn’t plan on being a teen mom," she tells Glamour magazine in its March issue that she intentions to be unveiled next month. "My mom didn’t give me a choice.

But Spears, who turns 21 in April, didn’t guarantee was no teenage pregnancy. "I didn’t plan on being a teen mom," she tells Glamour magazine in its March issue that she intentions to be unveiled next month. "My mom didn’t give me a choice.

Rogan M.A. provided a middle finger salute to celebrity fans after Madonna used the gesture and we apologize to our fans. "The obscene gesture in the middle finger 'malfunction' — they blamed each other.

Troxel Hall will provide more space for science

By Kelly Madsen

The 400-seat Troxel Hall is expected to relieve undergraduates to “get off the right start” in getting a degree by providing more space for prerequisite classes.

Troxel Hall to provide more space for science

Troxel Hall will not only provide Iowa State with a state-of-the-art science auditorium, but also an increased opportunity for the majors to graduate in four years.

Troxel Hall will offer more state-of-the-art science facilities,” said David Holger, associate professor of chemistry and protein science.

“Troxel Hall will free up space for large chemistry lectures,” said Holger. “Specifically designed for teaching science, Troxel Hall is specifically designed for teaching science.”

Along with all the new space, Troxel Hall is free of the need for additional high-quality lecture halls. Currently, most high-quality lecture halls are being used on an ad hoc basis.

“Troxel Hall will make the learning experience more effective and fun — if it can be done,” Holger said.

“Troxel Hall will free up space for other courses that chemistry majors can use,” Holger said.

“We work the runway
I can’t tell you how many people told me when I was younger that I would never become an architect and as a woman that I should look for another career. Well, I guess I showed them.

Architecture alumni awarded for accomplishments

By Tiffany Westrom

The Campanile, the Fox-Severson Fountain, the Polk Arches and Curtiss and Schalliol Halls are all staples of Iowa State’s campus. Architecture students, however, expanded the reach of architecture every day in the 2012 symposium.

“We have a huge and exciting responsibility as architects to manage these cities and build environments that help them to go on to enhance the way how to live, work and play,” said Katie Harmon, alumni of Iowa State’s architecture program. “Thatiligantly done.”

Harms was recently declared a recipient of the American Institute of Architects 2012 Young Architects Award. She graduated in 2003, went on to work as an intern with the OPPN Architects in Cedar Rapids, and then will travel to Washington DC, to receive her award at the AIA National Convention and Design Expo on.

**Opinion**

**Legislators: Pay attention to main issues**

The U.S. Constitution guarantees our right to keep and bear arms, but is there even a slight right for government regulation or monitoring of gun possession? That's the battle from Iowa House Rep. Matt Windschitl and 30 other House Republicans want their colleagues to debate today.

They want an amendment to the Iowa Constitution that would prohibit the right to bear arms because, as they assert, Iowa is one of six states where the amendment would effectively be protected. The remedy the problem is House Joint Resolution 2005, which — according to the Iowa Republican editor for the National Rifle Association — would give Iowa the strongest gun rights in the country.

The bill may go too far. As written, it would prevent product liability, licensing, registration or special taxation as a condition of the exercise of the Iowa and American constitutions, in addition to placing any existing restricti- ons under the strictest kind of legal scrutiny. This language exists despite Windschitl's assertion that "the intent is to protect Iowans' Second Amendment right" rather than the consequence of gun control.

Pay attention to our right to bear arms is already protected by the Iowa and the Supreme Court. The Second Amendment has been for Iowa Republicans as well as Court case McDonald v. Chicago, which extends the right to bear arms to all citizens in the states, render the Iowa bill unnecessary. The right to right to bear arms is already guaranteed by the federal constitution.

Currently Iowa has other issues to resolve. Issues of whether the gas tax should be adjusted for inflation, minimum wage, property tax on commercial property, and the state's education reforms are still in the works. Yet the debate does not mean the Iowa legislature will ignore the Second Amendment. The intent is to protect Iowans' Second Amendment rights, not just to protect the right to bear arms.

Windschitl's assertion that "the intent is to protect Iowans' Second Amendment right" is actually interested in improving the lives of Iowans, its members should help ensure that guns are in legally in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its members should help ensure that guns are in the hands of Iowans, its member...

The situation at Chick-fil-A is a powerful lesson in accountability — for upholding policies.

In response to a boycott, the fast-food chain withdrew its support for a pro-homophobia organization.

Doug Craft, president and chief operating officer of Chick-fil-A, announced a move to counter the boycott by starting, “While my family and I believe in the biblical definition of marriage, we love and respect everyone who chooses.”

He went on to defend Chick-fil-A's corporate purpose as, “holy glory, God being a faithful ambassador of all that was constructed to make it clear, so, we have a positive influence on this society, in the sense that our policies will continue to offer resources to strengthen marriage and families. To do anything different would be an unfaithful to our larger purpose and belief in a biblical purpose.

Brock Bowers, Chick-fil-A founder and president of Truex, announced that the company's leaders favor the biblical view of marriage and families and that those who choose to be different should be addressed. While private businesses like Chick-fil-A are not required to support or dissociate from Chick-fil-A because of the restaurant’s influence on all who come in its stores.

In my thoughts, the evil of greed drives unethical, immoral behavior. The word “greed” is good. It is not just.

The problem in society today is that new phones and new iPods are produced out of foreign labor and we find love, if greed blinds our work and accumulate.

Euphemism for survival.

Where would you find their work and accumulate.

Men's basketball

Confidence surges as team hits road

Confidence surges as team hits road

ISU basketball: Royce White goes for a tumble. Iowa State's game against Texas on Jan. 4. The ISU men's basketball team will travel with the Cyclones to take on Oklahoma State at 4 p.m. Tuesday in Stillwater, Okla.

STILLWATER, Okla. — Royce White likely won't be the only star to shine for the Iowa State men's basketball team when it plays Oklahoma State on Tuesday.

With White's departure from the lineup, the Cyclones will have to rely on other players to step up and lead the team in the tournament.

White's absence has been a major factor in the team's success so far this season, as he has averaged 18 points and 9 rebounds per game.

Coach Fred Hoiberg said the team is prepared to handle the loss of White.

"We're going to throw a different look at defense and out of confidence right now," Hoiberg said. "Our fans have been great at supporting our conference play.

"So you're doing a better job of out- doing what they might want to do in your scheme. The top of the line, the quarterback in your big play package. So we're trying to do that without Royce."
Coach Fred Hoiberg reacts to a call during Iowa State’s game against Kansas State on Jan. 31.

While Hoiberg agreed the Cyclones carry that confidence into a matchup with Oklahoma State, a team that very nearly beat them to end the season, he said the turnaround began when conference play started and Iowa State got a win against Texas State.

“I would probably say when we got to conference play,” White said when asked when the turnaround began. “Oklahoma is always tough. Playing them the first time was a confidence booster. Playing Mississippi the first time was a confidence booster that after that, we know we could play with anybody if we just apply ourselves and play the game plan and get ourselves prepared.”

While Hoiberg agreed the turnaround started before conference started with conference play, it was the game right before the Big 12 season started, he said, that sparked the recent confidence surge.

The 87-65 win against Mississippi Valley State on Dec. 21 was the breaking point, Hoiberg has announced. “The Mississippi Valley win, game was a very important game for this team, in the sense we had that confidence that we had been looking into conference play,” Hoiberg said. “We learned from losses. We’ve done a great job learning from wins, even though sometimes it’s hard to learn from a win because you are satisfied.”

For White specifically – the junior leader in points (15.2), rebounds (3.1), assists (3.2) and blocks (1.2) per game – his playing and getting teammates involved has been something that have wondered about – a 6-foot-8 frame and ability to get to the hoop.

White, though said, “I had better than three points. I had better keep a basket out that worse myself” and his coach praised his ability to get to

Along with the confidence and plan accepting roles that is important for the Cyclones have being that his has been recently. “It comes from a character thing,” White said. “There’s a lot of good basketball players that have some issues. It’s a program thing. It’s from team.”

The Cyclones carry that confidence and just “unselfishness” into a matchup with Oklahoma State, a team that very nearly left Hilton Coliseum with a win. As 40th in the nation for a Scott Christopherson bounce-back.

“They’re playing very good basketball,” White said of the Cowboys, who beat No. 1 Connecticut three weeks ago. “This year they don’t have a lot of depth, it’s a more with what we’ve been to win so far. But 6-8, I think he’s not have a chance because of what we do now.”

Iowa State tips off against Oklahoma State at 6 p.m. Tuesday in Stillwater, Okla.

Player of the Week #9 Mark Hyke

Hyke was named the conference player of the week by the Big 12 Conference, announced Monday. The 6-foot-9, 220-pound center was named the Big 12 Player of the Week for his performance against the University of Memphis. Hyke scored 21 points and pulled down 10 rebounds in the 92-88 win over the Tigers.

Hyke leads the Big 12 in rebounding with 13.5 rebounds per game and is second in the conference in both blocks (1.2) per game – his passing

MEN’S FASHION

By Chandler Nixon

ID Style Writer

It’s finally arrived. The next big fashion line for Target. The Jason Wu line was inspired by the vision of an American dream.

This much-anticipated fashion line will bring out Wu’s distinctive design by merging current fashion with old-school simplicity. We’ll state bring a mixture of modernism, exploitation and bold pieces and a variety of patterns that everyone will love and hate.

焱ecently, fall might be even bigger than the Missoni line. Wu hoo!
