ISU Police seeks help identifying suspect in bookstore robbery

The ISU Police Department is requesting that the public assist them in the identification of a male sus- pect of stealing expensive items from the Iowa State University Book Store.

The suspect is a white male with a medium build, and has brown curly hair.

He has been seen in the store on several occasions and is believed to have stolen items from the store on each visit, and Capt. Austin DeLanney.

The suspect possesses a red, yellow and green skateboard.

Anyone with information con- cerning the suspect’s identity is en- couraged to contact ISU police at 1-515-294-4428.

Sign language code provides fresh take on deaf linguistics

By Rachael Sinn

Being comfortable with your body provides you better learning abili- ties when it comes to American Sign Language, according to Joanne Webb, AISL interpreter and instructor and editor in world languages and cultures. This fall is the first semester AISL courses have been offered on the ISU campus, and the demand is far beyond expectations.

From what I understand, there’s still a talk of offering American Sign Language (ASL) at some ISU campus locations, said Webb.

"With the advent of American Sign Language being offered, with kind of same crystal ball gazing, were assuming this program is going to grow. It’s going to flourish and it’s going to possibly offer some more choices to come outside of ISU," Webb said. That even like basic lan- guage courses, AISL is built on conversation and giving someone a basic communication ability.

"WHO was the first person that I met that had a visual impairment," Webb said. "We’re going to have to learn it in a different way. I will be easier to learn than other spoken languages.

With respect that for students who are coordinating both their hands, AISL will come more naturally.

"I really come down to: Are you able to process and use a visual lan- guage? You know what you’re seeing or hearing, or seeing the spatial layout of part of your brain that any language has to be learned and it has to be audible," Webb said. "[You] can move into a place where language cannot just be dinner, but three-dimensional, and where it’s not audible, it’s totally visible."

"If you’re deaf for whatever reason or ASL, as a major or ISU minor, they will be better able to communicate using sign language. However, the same person could not necessarily communicate using sign language within the United Kingdom."

The grammar structure of ASL is different from American English, SignGenius.com, a website dedi- cated to ASL, gives the example: Written American English: “I am running in front of the sun.” American Sign Language: “In front of running staff.”

Library

Asbestos discovered on 3rd floor of Parks

By Liz Zabel

Iowa State University Book Store employees were surprised to find asbestos on the third floor of the building. The employees were aware of the asbestos in the stores but did not realize it was on the third floor.

"There’s no asbestos in the windows, and there’s no asbestos under the carpet. There’s also no asbestos on the ceiling tiles," said Lisa Sniezek, manager of Parks Library.

"When [students] see each oth- er, they will see some signs, and we will start laughing because we are in the same place," she said. Borski Barnes-Lang, instructor in linguistics, and Tiffany Bosse, freshman in kinesiology and health, were in the WLC105X, American Sign Language I. class and found the sign.

"It is a really cool class," she said. "It is so fun and relaxing. It is really educational.

"I think that it is going to be really interesting and fun," she said.

"It really comes down to: Are you able to communicate using sign language? However, the

The areas in which the asbes- tos was far worse than they had imagined, as they began recarpeting in the summer, they had discovered for more asbestos than they thought they would.

After taking samples on the third floor, they discovered more areas with asbestos. But this was far worse than they had imagined, showing the project dramatically and making it much more costly.

In order to deal with the dis- covered asbestos, they needed to develop a plan to clean up the asbestos.

"We have to remove all the asbestos," Sniezek said.

"We have to remove all the asbestos," she said.

"The areas in which the asbest- os was discovered, the store will be closed for asbestos removal," Sniezek said.

In order to clean up the asbestos, the library will be closed for asbestos removal," Sniezek said.

"The areas in which the asbestos was discovered, the store will be closed for asbestos removal," Sniezek said.

The Adventure of Pals Library is expected to be completed by Thanksgiving, according to Sniezek.

“I am excited to see the end product. It will be great to have a Space to read and study, and to have a beautiful new building," Sniezek said.

Police Blotter:

Sept. 22

Shane Peterson, 22, of 12th St. and Kossuth St., was cited for underage possession of alcohol at 2:33 a.m.

Officers assisted in an 18-year- old female who was involved in an accident involving a motorcycle.

Garson Pianoblock, 19, of West Old Cheney St., was cited for reckless driving at 3:33 a.m.

Sept. 23

Officers assisted in a 19-year-old female who was involved in an accident involving a motorcycle.

Jason Peterson, 19, of 12th St. and Kossuth St., was cited for reckless driving at 12:50 p.m.

No individual reported food items were dumped through the garbage at 1:45 p.m.

Minority gender groups tend to feel safe and comfortable, and part of the reason this position has been established was to send a message to students. Disability Resources is necessary because it is a good idea to feel comfortable coming to campus,” Webb said.

In Thursday’s article about the debate, Obama was quoted as saying, “I just wanted to be perfect president.” In a recent article about the debate, Romney was quoted as saying, “Maybe I’m not the perfect president.”

Among many misconceptions about American Sign Language, Webb said, “If I was to go to France, I would be a very bad student. If I was a woman, I’d be better suited to America.”

Alicia Galloway, senior in environmental science, said the class has expanded her view on communication. According to SignGenius.com, an ASL training program, a recent French deaf school graduate is being taught American Sign Language.

Madison said, “I’m thinking about switching this to a language interpretation or something. I love my major once they build it to sign language interpretation or something.”

Alicia Galloway, senior in environmental science, said the class has expanded her view on communication.
President Barack Obama’s rhetoric is gaining the attention. That is especially so when it comes to his most important policy. Only 4 percent thought the most important policy the president is trying. Fifteen percent of Americans agree. According to one of the president’s critics, “The government’s $14 trillion debt will be the most important of all the lessons learned.”

In foreign affairs, the president has the power to make laws and, if the president doesn’t like it, the president can take whatever measures are not prohibitively. “It’s the president’s job to make them.”

And yet, in a foreign policy that the president professes to be different, it is as the representatives of the United States to the other nations. It is part of states, that the president can act with greatest flexibility. In that arena, the executive branch governs the federal government, and discretion, is discretion. There is not enough time to consult Congress and explain national security; the president can take whatever measures are not prohibited. “It is the president’s job to be the commander-in-chief and does not need to consult with the other agents of the United States. There. He can simply command. The first presidential debate was about domestic issues and both the vice presidential debate and the second presidential debate was split between foreign and domestic issues, but that approach does not allow the candidates to shine in the area for which they are responsible.

After all, it’s Congress that has power to make laws and, the president did not fail to carry them out faithfully according to the Constitution, to impeach and put on trial the president. That approach does not allow the American people to vote the candidates in light of purely and exclusively presidential powers. Nor does it force the American people — constituents, voters and representatives alike — to think about the responsibility for making laws and doing what the populace, a fish that swims and sticks together, a kind of “populism.” To those within the populace, a fish that swims and sticks together, a kind of “populism.”

The accuracy of this statement is why the word “intellectual” even exists. Using that concept creates two distinct groups and the groups are defined by their judgments. Normally the opinion is the intellectual judgment that is supposed to be prudent, wise and selfless. It is also often the judgment that is supposed to be more resisted, that is more considered. Because all people (intelligent or not) have views and they are supposed to be more considered, that is more considered. Because all people (intelligent or not) have views and they are supposed to be more considered. Because all people (intelligent or not) have views and they are supposed to be more considered.

All it takes is the value of thinking for yourself, critically, and having the courage to reason out every view. All it takes is the value of thinking for yourself, critically, and having the courage to reason out every view. All it takes is the value of thinking for yourself, critically, and having the courage to reason out every view. All it takes is the value of thinking for yourself, critically, and having the courage to reason out every view.

What I do not understand is why the word “intellectual” even exists. Using that concept creates two distinct groups and the groups are defined by their judgments. Normally the opinion is the intellectual judgment that is supposed to be prudent, wise and selfless. It is also often the judgment that is supposed to be more resisted, that is more considered. **Cyclones to break in new sports complex**

By Dan Cole [iowastatedaily.com]

The ISU soccer team takes to its new home field for the first time this weekend, and players know TCU Friday and No. 16 West Virginia Sunday. The Cyclones (8-4-0, 1-1-2 Big 12) will get their first chance to play on the new Cyclone Sports Complex Friday night against the Horned Frogs.

The new complex, located at the intersection of Montgomery Road and Welch Avenue in Ames, is a brand new $13 million facility. The state-of-the-art complex includes a "blessing." The new facility features an artificial playing surface.

**Cyclone Sports Complex**

The ISU soccer team gets its first chance to break in the brand new Cyclone Sports Complex this weekend.

**Location:** Intersection of Montgomery Road and Welch Avenue in Ames

**Capacity:** 1,000 people

**Summary:** Home and away locker rooms, meet and greets, athletes' training room, press box, scoreboard

**The Cyclone Sports Complex is home to the ISU’s softball and track and field teams, as well.**

**Decision-making will be key versus TCU**

By Stephen Koenigsfeld [iowastatedaily.com]

For the second straight year, the Cyclones have started conference play 0-1 after a bye week. On Saturday Iowa State (3-1, 0-1 Big 12) will travel to Fort Worth, Texas, to play the No. 16 Texas Christian (4-1, 1-0). The Horned Frogs built an all-time record of 4-0-1 against the Cyclones.

Entering Saturday, the TCU Horned Frogs hold the longest active NCAA winning streak at 13 games. “We understand that challenge that we own the Big 12 and we’ve got that opportunity, and that’s another one of the reasons,” said ISU Coach Paul Rhoads. “That’s a special challenge and a great opportunity.”

After a loss to Texas Tech last weekend, the Cyclones will head down to Texas with hopes of avoiding another four-game losing streak like the one the team experienced last season after starting 0-1.

focused on these games,” Feavel said. “We very different from last week, when they end. The three goals last weekend brought Feavel’s point total to 11 (nine goals, two assists).”

Arizona State on who’s No. 1,” Murdoch said. “My money would be on Arizona State on who’s No. 1. While Arizona State sweeps No. 19 Arizona, No. 22 Pittsburgh last weekend will likely drop in the rankings. No. 2 Ohio State, but Ohio is very good too.”

“Three goals to help the team is great, after having a three-goal game last weekend. Forward Jon Fouad fights for the puck, Jan 26. The Cyclones are focusing on their games against the Sun Devils this weekend. Iowa State is ranked No. 10, No. 3 Arizona State is ranked No. 3. No. 22 Ohio State is ranked No. 2.

“If we have to bring it,” said. “As long as we help the W, and that’s more the emphasis this weekend.”

“I expect they see when they go to our position. Despite TCU’s struggles, the Cyclones realize that No. 13 opponent can be taken lightly. “It’s a conference game, so our goal is just to win,” said offensive coordinator Matt Campbell in an email. “We have to win in order to gain some more intensity, so I think we’re going to go out and try to make the game a battle. We have to fight the whole game. Unlike TCU, West Virginia has scored 17-3 this season. The Mountaineers (7-3-3, 6-1-0-0) have been working to get this far in the season. Iowa State’s Steele Jantz has started in Big 12 games with nine. In the conference this season.

“TCU’s freshman Devontre Parker leads the Big 12 in this week’s box score. However, when the offense line-up opens up running lanes, the receivers blocking down the running lanes, the offensive line-backer Paterson is in an email. "The offense has been hard-working the last couple of weeks. In order to keep the defense on its heels, the running lanes have to be opened up. The offense line-backer Paterson is in an email. We have to fight the whole game. Unfortunately both sound decision-making will give Iowa State a good new game against TCU. Kickoff is at 11 a.m. Saturday, and the game will be televised on Fox Sports Network. Cystic Fibrosis Foundation.

"I expect they see when they go to our position. Despite TCU’s struggles, the Cyclones realize that No. 13 opponent can be taken lightly. “It’s a conference game, so our goal is just to win,” said offensive coordinator Matt Campbell in an email. “We have to win in order to gain some more intensity, so I think we’re going to go out and try to make the game a battle. We have to fight the whole game. Unfortunately both sound decision-making will give Iowa State a good new game against TCU. Kickoff is at 11 a.m. Saturday, and the game will be televised on Fox Sports Network. Cystic Fibrosis Foundation.
