The new chief justice for the Government of the Student Body hopes to make the Judicial Branch more transparent and to make sure the court is visible to students on campus.

**Ambassador from India to lecture at Iowa State**

By Vural Dizdey

@iowastatedaily.com

The Indian ambassador to the U.S. will visit campus Tuesday and lecture.

**New chief justice hopes to make GSB branch more transparent**

By Brian Yoon

@iowastatedaily.com

"I definitely plan on getting the student body involved and trying to put justice into play so people know we're here," said Caytlin Hentzel, GSB's new chief justice. She said she wants to expand her branch's visibility to students on campus.

---

During the semester-long worldwide voyage of Semester at Sea, students study classes and field labs for Semester at Sea. All classes credits are transferable to other universities and institutions. Students are exposed to a variety of cultural and environmental experiences.

---

The lecture is free and open to the public.

---

The event is co-sponsored by the Office of the President, College of Liberal Arts and Sciences, the department of political science, and 55 percent of students attend class - independently of one another.

**Opinion**

**Take part to help keep our campus beautiful**

Human beings are inherently motivated to contribute to the betterment of their environment. Therefore, it is our responsibility to maintain a clean, beautiful, and sustainable campus. We are all students or staff members; no one is excluded from this. By taking part in the Iowa State University’s Stuff the Bus event, we can make a significant impact on our campus environment.

The Stuff the Bus event is an opportunity for students and faculty to donate food items to local food banks. The event takes place on campus, and donations are collected in bins located throughout the campus. These bins are typically manned by volunteers who are willing to contribute passionately and diligently.

The event is open to all members of the Iowa State University community, regardless of major or affiliation. It is an opportunity for everyone to contribute to the betterment of our campus environment. Whether you are a student, staff member, or faculty member, you can participate in this event by donating food items to the bins.

This is a great opportunity for everyone to come together and make a difference. Let’s work together to keep our campus beautiful and sustainable.

---

**What if**: Take time to find the right major

E ven senior year in high school, and all who were college-bound had one important thing to do: what to do with the rest of their lives. By this point, many students have already declared their major, but for those who haven’t, the decision can be both exciting and overwhelming. These dilemmas escape most of us, but for the next 9 years you spend on the students’ bank. What major will break bank? What major will lead to a career that doesn’t require a lifetime of fake smiles? What major will not stress you out too much? Jumping from Wikipedia page to Wikipedia page, you wonder what exactly an anthropologist does to make a living in society, and what majors and majors are a result of this. Finishing the perfect balance between a future that is financially stimulating and passionately fulfilling is tricky, and it becomes even more complicated when a balance between one’s major, one’s job, and one’s bank is made to be better.

This major and career doesn’t have to be stressful or overwhelming. There are many options out there, and it is important to choose a major that suits you best.

---

**Discover ways to serve others**

O n the 2nd Sunday of every month, I participate in a community service activity with my church. We serve at a local food bank, and my task is to organize the food items and ensure they are properly stored. This is a rewarding experience, and I enjoy being able to give back to my community.

Food banks are organizations that collect and distribute food items to those in need. They are a vital part of our community, and they play a crucial role in helping people who are struggling to make ends meet.

Participating in community service activities, such as volunteering at a local food bank, is a great way to give back to your community. It is a fulfilling experience, and it is an opportunity to make a positive impact on the lives of those in need.

Fennelly moves past cut block; Farniok healthy

By Maddy Arnold
@iowastatedaily.com

Iowa State beat Baylor was in February, in the Big 12 Championship game. The last time Iowa State beat Baylor was in February 2013 during Griner’s freshmen season.

“In two years, we beat him,” Fennelly said. “I’m sure it’ll be pretty hard for everybody. I’ll be happy to see him. We beat him this year with some small things.”

Playing against their only is the not only their only win but their first win of the season.

However, Fennelly said the conference’s “biggest win” was the top defense this season would be junior forward Hallie Williamson. Last season, she recorded 42 steals and 25 blocks for Iowa State.

“This is what we’re focused on. It can be yours. "Having the role as the defensive stopper makes me happy because I know it’s something that my teammates, my coaches, they depend on me to do." Williamson said.

"Iowa State has a lot of pressure on our defense, something it has not done much in the past seasons. Iowa State finished last season eighth in the Big 12 in blocked shots and ninth in steals. The Cyclones were second in defensive rebounds but graduated their best rebounder in Chelsea Poppens.

In order to be more competitive in the Big 12 this season, Fennelly said Iowa State would have to be “more aggressive” on any given night and it can be yours.”

Looking at Devon Jefferson, freshman in journalism and mass communication, one would never guess he is also an urban street wear fashion designer.

Along with his high school friend Johnathan Howard, sophomore at Truman State, Jefferson created Bum Life Threads. “I don’t want to say I look like a bum,” Jefferson said. “That’s more or less the grunge recycling of clothing.”

Jefferson and Howard started their business of manipulating used clothing in high school. “We were tired of wasting our visionary views and decided to put them to use through the monstrous media,” Howard said.

For Jefferson, the initial experimenting started with an orange tank top. “I used bleach to manipulate the color to make it look warped,” Jefferson said. “I made it from a V-neck, and I used paints to add some color to it.”

Jefferson has manipulated clothes for himself, as well as many of his friends. He and Howard are currently doing clothing for mostly men but have done some women’s pieces in the past. “Now our plan is to build the fact that we are a custom brand,” Jefferson said. “We are doing some original things.” Jefferson does not plan to pursue a major or minor in apparel, merchandising and design at Iowa State. “I’ve put in five good years of my life into journalism, I know it like the back of my hand,” Jefferson said. “With fashion, I do know a lot about it, but I’m more or less knowledgeable.”

Jefferson has manipulated used clothing to create his own line of urban street wear called Bum Life Threads. Jefferson and a high school friend previously wore clothes and other them with designs that show Jefferson’s unique style.

The program gives students opportunities that might not arise around every day. York and some of the other students on her Semester at Sea cruise ship even went for sand boarding. It’s like snowboarding but on a huge sand dune,” York said.

York said she was given the chance to broaden her horizons through multiple cultural experiences.

“I think that studying abroad can be a life changing experience,” York said.

Emberger said, in order to participate in the Semester at Sea study abroad program, students must be accepted full-time at an American university, have completed one full term, have a 3.0 to 3.7 grade point average and write a 300 to 500 word essay.
