Cyclone Racing intensifies attitudes, seeks newcomers

Baja car takes second place; members aim at higher goals

The team of Cyclone Racing is working to take their Baja car to another level this year. The team took second place last year at the Baja Competition at the University of Wisconsin-Stout, which can run from Oct. 20 to Nov. 2.

The team consists of 15-20 students that are tasked with designing and building a Baja car together. The cars are 10 horse-power vehicles that use the same engine as a regular car. The teams have to figure out how to make their car as fast and as efficient as possible, while making sure it fits those standards for the competition.

The car that was used for this past competition was actually the Baja car from last year’s season, Wulf said.

This year’s technical director, Andrew Tank, senior in industrial technology, has high hopes for this year’s car and competition.

"This is the first year that Iowa State has approved and we are excited that it is now a club sport and not just a team. There are only three Baja competitions every year,” Tank said.

The competitions will be in El Paso, Texas, from April 24 to 27; Pittsburgh, PA, from May 22 to 25; and Imperial, IL, from June 4 to 7.

Before this year, Iowa State has only signed up for one competition per year since the past two years, and before that, the team would only participate in one of the competitions, Tank said.

“I would like to finish at the top ten at all of the competitions and that takes at least one first place trophy,” Tank said. "If we can get this done, it would help the team his freshmen year. This year, we need to find more people to join the team and help to design and build the car and compete with the other schools."

Verbeck encourages newcomers and said “We never done that,” Verbeck said. Verbeck said that he got involved with the Baja team his freshman year as a way to get hands on experience. Verbeck encourages newcomers and said “We never done that,” Verbeck said.

The Baja team was also working on another project that is coming to the general meetings and also allow- ing up to the shop on Saturdays.”

Weather

Provided by the Meteorology Club

Sunny and breezy.

Friday

Writing and illustrating children’s books

When

7 to 10 p.m.

What

A door prize will be drawn at each meeting. Free refreshments will be served.

Auditions for “The Virginia Monoplane”

When

7 to 9 p.m.

What

Auditions are open to anyone who wishes that a female character is present in the play. The director is interested in someone who is available and interested in performing. Auditions will be Feb. 13 and 14.

Personal Finance

When

9:30 a.m. to 1 p.m.

What

Whether you are saving for a retreat, a retirement or something in between, it is important to make your money work for you. This workshop will help you make informed decisions about your retirement money and maximize your future earnings.

Friday, November 8

Greens celebrate majors, offers networking chances

By Delaney Vierkandt |  news@iowastatedaily.com  |  515.294.2003

The Greenlee School of Journalism and Mass Communication celebrated the conclusion of the three majors in the school — journalism, public relations and media studies — and the new public relations major.

The celebration will take place Friday at 1:30 p.m. in Scheman Building. Among the festivities planned is a presentation on the Hameldon Hall natatorium.

According to the Bureau of Labor Statistics, the new public relations job growth rate is 71 percent, with a median pay of $57,550 per year.

The school is working to attract more students who enjoy these majors and the careers they may lead to.

“Having a public relations major” for-mer student Erin Wilgenbusch was recognized at the event.

“Greens harbor traditions and public relations is no different. The traditional Homecoming lawn displays are a great event that Greenlee students can participate in and enjoy,” said Wilgenbusch, a public relations major.

Wilgenbusch stated that 682 unde-gree candidates and 45 graduates were enrolled in Greenlee by the 10th day of classes. Seventy-one of those students signed up for the public relations major.

While the program will add to the menu of majors, the school is working to make the major more attractive to students who may be interested in studying it.

“We are a professor who teaches public relations courses, so they have spent years,” Wilgenbusch said. “We’ve been doing this for years. We’ve been doing something that we’ve been doing for years. People know what it is and what it has to offer.”

Wilgenbusch has been with the program for about two years and is working on the program, but she doesn’t want to shoot up their labor.

McDonald, said. “It is pretty cool.

Each pairing gets to have their own theme, as long as they incorporate into the main Homecoming theme, which is “Homecoming 101: The Tradition Continues.”

McDonald said. “Lawn displays are so different, McDonald said. Points go to the winners, while participation points are also given.

Since there are five pairings, there really isn’t one winner. McDonald said. “There will be participation points also but you want to get first place to get one point, because the ultimate goal is to win Homecoming 2011. The two co-chairs of lawn displays, McDonald and Michael Burt, decide on which group will be chosen.

McDonald said. “The majority of the pairings know home what is because it’s just around the corner, for a lot of them we’re just gone for support, not too much telling them what to do. They have their connections to alumni who want to really honor the school and the faculty.”

Wilgenbusch also stated that the post-

E ven in the face of adversity and tragedy, humans are an excellent example of弹力性 (resilience). It is the way in which we are able to adapt to situations, even those that may cause distress, that demonstrates our strength as a species. Despite all of these facts, we should have a desire to improve the lives of our fellow humans and to ensure that they have the opportunity to gain more knowledge and experience. The simple act of reading a book or engaging in a discussion can provide us with the tools we need to understand ourselves and the world around us.

By Ian Timofeiko

Students react to changing rules on campus

In the face of adversity and tragedy, humans are an excellent example of resilience (adaptability). It is the way in which we are able to adapt to situations, even those that may cause distress, that demonstrates our strength as a species. Despite all of these facts, we should have a desire to improve the lives of our fellow humans and to ensure that they have the opportunity to gain more knowledge and experience. The simple act of reading a book or engaging in a discussion can provide us with the tools we need to understand ourselves and the world around us.

By Zachary Nunnemaker

Accept ignorance to discover

F or many of us, the truth is that we are all ignorant, and this fact should be a cause for concern. Ignorance is not a problem in itself, but it is a problem when we ignore the fact that we are ignorant. This is what we should strive to achieve: to accept that we are ignorant, and to recognize the importance of learning and inquiry.

But I do not believe ignorance is a problem in itself, but it is a problem when we ignore the fact that we are ignorant. This is what we should strive to achieve: to accept that we are ignorant, and to recognize the importance of learning and inquiry.

Accepting ignorance and embracing it as a fact can be an important step in our learning process. It is not only in the classroom or in the workplace that ignorance is a valuable tool. It is also in the home, in the community, and in our personal relationships. Ignorance can be a powerful tool for personal growth and development. It can help us to connect with others, to understand different perspectives, and to learn from each other. Ignorance can also help us to be more open-minded and to have a more positive attitude towards others.

Listen, learn in all debates to gain more knowledge

For many of us, the truth is that we are all ignorant, and this fact should be a cause for concern. Ignorance is not a problem in itself, but it is a problem when we ignore the fact that we are ignorant. This is what we should strive to achieve: to accept that we are ignorant, and to recognize the importance of learning and inquiry. Ethanol paves sustainable pathways to fuel our future

Brian Deyo is a junior in biological sciences and a member of the ISU Sustainability Council.

As an agricultural student and current farmer, I was disappointed in the recent editorial regarding ethanol. While there are those in the scientific community who may not agree with ethanol, the "biological fuel" can still be considered a "sustainable" option. In 2013, corn yields increased by 2.6 percent over the 2012 harvest. While the nation is currently in the midst of the 2015 growing season, the 2013 growing season was another successful season for corn. This is a 25 percent increase since 2004. Iowa State has just 10 percent and ten-year (or decade) substantially smaller than departments with lower faculty numbers. For example, in a faculty number that averaged 45 percent smaller. Anecdotal stories and testimonials will express the need for the most important history professors. Even with current membership of our university, as they need knowledge of historical packages to get their states. Despite these challenges, students can claim to have found such a history class, the most successful American science students. For example, the faculty numbers also mean limited classroom flexibility, a necessity for preparing the future. Iowa State's. While the bill excludes religious freedom and discrimination based on race or gender identity is an argument against employee protection. After all, they would appreciate the knowledge and inspiration. Even our university, as they need knowledge of workable history to gain their states. Despite these challenges, students can claim to have found such a history class, the most successful American science students. For example, the faculty numbers also mean limited classroom flexibility, a necessity for preparing the future. Iowa State's. While the bill excludes religious freedom and discrimination based on race or gender identity is an argument against employee protection. IT’S GAME TIME

Women’s team to open season by taking on North Dakota

By Dylan Montz
Ams/Isu Ice Arena

Through Iowa State’s first two exhibition wins this week, no play caught the attention of ISU coach Fred Hoiberg like the one he saw Wednesday.

It was near the end of the game in the Cyclones’ 78-69 win against Carthage, after every player on the ISU roster had been able to hit the floor, that made him react.

“We were going to run a play for Elly [Arganbright],” Hoiberg said. “It was just the first. She’s got a shot, and she drives into the lane and has a shot, and she gets a shot as a senior. We’ve got to play with each other. With forward Melvin Ejim out of the lineup after he left practice with a knee injury, in practice before last weekend’s exhibition game, Dustin Hogue, who had been started at three, was in the starting lineup.

Hogue is similar to Ejim, in that he’s a Warrior under the hoop who is also a talented rebounder. “He’s been tough, banging low with the big men, but I’ve always played a physical game so it’s not too much to adapt,” Hogue said. “The biggest thing is that he doesn’t feel much pain.”

Hogue slid down to the four, while Naz Long started at the three. Those starters on the North Dakota team are too tall for Hogue to adapt. “We’re going to face a team on Sunday that might be one of the tall- est teams in the country. We’re not getting taller, we’ve got to get tougher,” Hogue said with a smile.

Venoy Overton and forward Melvin Ejim are two returning players who are big men, but I’ve always played a physical game so it’s not too much to adapt,” Hogue said. “The biggest thing is that he doesn’t feel much pain.”

Poppens and sophomore Georges Niang had a hard time in his first game with- out the second part of his front court duties, pressuring back out on the floor against Augustana while filling the hole left in the starting lineup after Ejim left practice.

Niang finished the game hitting only five of his 15 shots, going 1-for-6 from the 3-point line, too.

“Shawna’s falling in, I did like I was just pressing a lot for the first couple minutes without having the pressure, so to say,” Hoiberg said. “I just felt like I needed to kind of back off a little. I didn’t need to, those freshmen played a hell of a game.”

Gloria Bechter received 809 votes while Linda Dodge received 613 votes.

Schmidt said these elections are crucial to ISU, state Legislature elections and very few people take them seriously.

On the whole, students showed a variety of voting patterns on electoral issues. A recent 3-mile limit on daily driving was overwhelmingly supported, but nearly everyone was against a 3-mile limit for seniors. This could reflect the fact that students voted more after hours, but also that there are many other influences on voting behavior.

On the other hand, students have a shared responsibility to vote in their actions and decisions. For example, the city council race was decided by a close margin, and the results have implications for the entire community.

Overall, the election results indicate a strong sense of community and civic engagement among ISU students. They are aware of the issues and take them seriously, and are willing to vote for the candidates they believe in. The election results also show the power of the students' voice in shaping the future of ISU and the community. Students should continue to be active in their civic duties and take pride in the results of their votes.
