Fresmen arrived on campus a week and a half ago, nervous and excited to meet new people and have typical college experiences. This weekend, sexual assault could jump off the prevention pamphlets and posters around campus and insert itself into their Friday or Saturday night. Amid the pumping, sliding pressure of bodies on a dance floor, they could meet their perpetrators. The warm hands sliding across intimate parts of someone’s body while pressed against a cool, damp wall may not take the hint when pushed away. The charismatic people freshmen met earlier may invite themselves into their dorm and not listen to “not tonight” or “wait, I’ve never gone this far.”

For freshmen, this weekend and the rest of the semester is a red zone. It’s a time when they’re overstepping their own boundaries, meeting new people, trying new things and learning how to hold their liquor. It’s also the time they will be most likely to be victims of sexual assault. freshmen will be assaulted in the most intimate way with another person taking advantage of their most personal and valued property: their body.

Statistics indicate that students are more likely to be sexually assaulted in their first year at college than any other year. This increase could be for a variety of factors, Oren said.

“We know that when students come to campus, they’re an especially vulnerable population,” said Natasha Oren, employee at Assault Care Center Extending Shelter and Support who works with university officials to combat and treat sexual assault. “Sexual assault perpetrators look for vulnerable populations, so they often target the new people who don’t necessarily know the ropes. They’ve never really had to think about sexual assault.”

The ALS Ice Bucket Challenge has captured the nation's attention and made its way to Iowa State again. Gloria Starns, senior lecturer of mechanical engineering, dedicated her challenge to the deceased father of two former students.

"Two of my former student's father was a victim of ALS," Starns said. "I'll be dedicating this challenge and the money I'm giving to ALS, in his name."

The challenge is intended to raise awareness and funds for the disease. The challenge, consisting of dumping a bucket of ice over one's head, is a fun way that people are alerting the nation about the situation of those with ALS.

"My husband loved to be with people," said Diane Allen, Gary's wife. "He did things for people. In the end, he couldn't even talk to people."

The symptoms of ALS vary by victim. Some have a prolonged battle, while others like Gary succumb to ALS quickly. Unfortunately, no cure has been found for the fatal disease. After the diagnosis, doctors told Diane there was no hope for her husband.

"There is no known cause for the disease, but the ALS Ice Bucket Challenge is raising money to search for both the cause and the cure for ALS."

"What makes it so torturous is that the person is perfectly mentally healthy — they're still there in spirit — but their body is failing them," Starns said. "I think it's an ingenious idea. They have done a lot to bring awareness to the problem and the need for continued research."

Diane says continued research and funding are essential to finding a cure for ALS.

"When you take the ice bucket challenge, donate too," Diane said. "It's kind of a fun thing, but if you don't donate, at least find out what this disease does because it is a very horrible disease. It takes a person's life and turns it inside out."
Take depression seriously

By Kasey Mueller

Volleyball team prepares for tough matchups

Tom Farniok is sick of hearing about his tallness. In fact, he’d rather be hearing about something else.

“I remember their big man, their number one,” Iowa State volleyball coach Christy Johnson-Lynch, said in a Tuesday press conference. “I’m not sure if that was me or if that was one of our veterans that we had two seasons ago, but they were both really big and they certainly look like that now.”

The Cyclones are preparing to face Florida State in a four-team battle for the NCAA Regionals title in San Antonio this weekend. The team has a tough road ahead of them, but they’re already planning to take advantage of the opportunity.

As Johnson-Lynch said, “We will definitely be playing some film, said outside hitter Victoria Hurtt. “We haven’t seen them yet, but some film will help us out.”

Hurtt said the team will be looking to turn 10 total starters from the ISU offense as the Bison return to the Bison backfield. Wisconsin returns to the Bison backfield, and has his eyes set on capitalizing on his third season.

To stay sharp for that type of competition, the challenge is breaking out of the monotonous activity. “Well-coached and physical, they want to match our physicality,” said defensive coordinator Wally Burnham of North Dakota State. “One of the big things in the experience is the consistency of the game.”

The Bison averaged 257.3 rushing yards per game in 2013 and despite losing a handful of seniors, they are not the same one that was on the field in 2013. The Bison averaged 277.3 rushing yards per game and despite losing a handful of seniors, they have played one of the best years.

With the 2013 campaign in the rear view mirror when the 2014 team is not the same one that was on the field in 2013. The Bison averaged 257.3 rushing yards per game in 2013 and despite losing a handful of seniors, they have played one of the best years.

The Bison have a new beginning. “Iowa State is not everybody’s cup of tea, but most expect from them because we are three of national champions, the ISU vol-
For brothers Antti and Eero Helanto, hockey is a way of life. Of the many coaches they have had along the way, none may be more influential than Jukka Koivu.

Growing up in Turku, Finland, the Cyclone defensemen played for TPS, a youth hockey academy under the umbrella of the TPS Academy. "I started playing at the age of three," Eero said.

Koivu, author of Mikko and Sakku Koivu, became a household name in Turku after a playing career, but he is more well-known for his work with the academy.

"Whatever you do, be first," Antti said. "That's what teaches everyone to know."
Forget your alarm, set your mind to blank, and take the day as it comes. What a, how to, or why are not relevant. Take the day as you will.

Aries - (March 21-April 19)
Don't set a time for situations that are up in the air. If there are decisions to be made, wait, don't jump. It's not the time to be decisive, you need to wait for more information.

Taurus - (April 20-May 20)
Procrastinate. Take a step back from your work. Think before you act. This is not the time for immediate action. Take a look at the bigger picture before committing to anything.

Gemini - (May 21-June 20)
You have more energy than you think, but you're not sure where to channel it. Use your love of knowledge to learn something new, but don't let it distract you from your work.

Cancer - (June 21-July 22)
Don't leave your home during the weekend if you can help it. It's the perfect time to stay in and make plans for the week ahead.

Leo - (July 23-Aug. 22)
Don't make plans for Saturday night. It's a good day to spend with friends and family. Enjoy the company of those you love.

Virgo - (Aug. 23-Sept. 22)
This is a great day to start something new. Use your analytical skills to plan and organize your work.

Libra - (Sept. 23-Oct. 22)
Be creative and expressive. This is a good day to pursue your passion or try something new.

Scorpio - (Oct. 23-Nov. 21)
Do your best to maintain your composure. This is not the time for conflicts or arguments.

Sagittarius - (Nov. 22-Dec. 21)
You need to put your mind to your work, but be careful not to become too absorbed. Take breaks and enjoy the people around you.

Capricorn - (Dec. 22-Jan. 19)
You need to be patient and persistent. This is not the time to rush into anything. Take your time and make sure you're making the right decisions.

Aquarius - (Jan. 20-Feb. 18)
You have a lot of energy, but you need to use it wisely. This is a good day to start a new project or pursue a new interest.

Pisces - (Feb. 19-March 20)
Don't be too quick to make decisions. This is not the time for rash actions. Take a step back and think before you act.
