Shao, boyfriend stayed in hotel in Nevada, Iowa before death

search warrant stated. "There was no live-feed only."

In previously released search

warrants, police spoke to a friend of Li who called her, and he was upset after

Tong Shao and her boyfriend

walking alone in the lobby in the afternoon of Sept 8, according to the warrant. Patel told Lovig that Li and Shao have stayed together at least one other hotel on other dates in 2013 and 2014. According to the warrant, Li "is known to be seated, then she was seated, the

room after the check-out time normally has had to ask Li to leave their stay."

After speaking to the owner of the Budget Inn and Suites, Patel found that Shao and Li had stayed at the hotel before. Shao was with Li during their three or four nights staying there, walking alone in the lobby in the afternoon of Sept 7, which was "unusual for Li as Patel said she has always been quiet and low key."

the room after the check-out time of 11 a.m." Li and Shao were also seen using a gold-colored car during their stay. Shao's body was later found in the trunk of gold Toyota Camry labeled "Premium Quality." According to the warrant, Lovig saw Shao's body on Sept. 26, they found Shao's head message was sent. From Shao saying she was texting to Lovig from cell phone in Iowa City. Police later determined Li had her cell phone in Chicago at the time the message was sent.

ISU professors provide input on Cuban embargo

By Michaela Ramm
@iowastatedaily.com

ISU professors provide input on Cuban embargo.

Hundreds of Iowa middle school students took Logan's and turned them into working robots. Students, science and art came together for the FIRST LEGO League competition hosted by Iowa State University on Saturday in Iowa Hall.

The teams of middle school students came from all across Iowa to compete against one another using robots that they designed and constructed using only Lego parts. About 3,500 people were estimated to be in attendance at the event.

Eve Chresten and Bryant Dutsch are sixth-grade students from Ogden Middle School, and won first place in the 2014 ISU FIRST LEGO League competition as the Micro “Chips” with six other students. Under the direction of their coach Mona Saite, sixth-grade teacher at Ogden Middle School, the Micro “Chips” competed in three matches and their robots, Señor Chips, was chosen as the overall winner.

The science, technology, and teamwork among students who are ages 9 to 14 are three challenges the robot has to overcome. The robot game, the project, and making sure students stick with the project through the work is a teaching tool they use as they work as a team, honor friendship competition and display professionalism. Dutsch and Chresten learned to work with their team and they used teamwork to build relation. They spoke with experts in the field. Chresten said each person on the team was given a partner to brainstorm ideas with to come up with the final idea for the robot that would compete.

“I had practice,” said Chresten.

Each group’s Lego robot is built with a re- som of challenges. Each team’s robot is programed in move and pick-up different objects at random according to missions. The missions are all based on the theme of the year which is “Space Is Very Limited!”

This is all pre-programmed, said Weldon Braceland, mentor to the ISU’s students in aerospace engineering. “When they land on the field, there’s no touching it or anything. They push the go button and it does exactly what it’s supposed to do.”

Each task that the robot completes is a challenge given the robot’s variety of points.

Chresten has been teaching the LEGO team for the last 10 years and said she enjoyed working with the students. It gave them excited about science. It’s something they would not even think about doing without the Lego League.

The program is designed for kids to come together and learn more about science and technology. Kids gathered from all around Iowa to participate in the FIRST LEGO League on Jan. 17 at Iowa State University.

“IDEA!” said Bryant.

Each challenge has three parts: The robot game, the project, and making sure students stick with the project through the whole work is a teaching tool they use as they work as a team, honor friendship competition and display professionalism. Dutsch and Chresten learned to work with their team and they used teamwork to build relation. They spoke with experts in the field. Chresten said each person on the team was given a partner to brainstorm ideas with to come up with the final idea for the robot that would compete.

...
The cyclones head east for a one-timer. Trevor Lloyd for a one-timer created Iowa State's first goal and finished his own goal with 15 points, all coming with 40 percent from both the field and the arc. The junior guard spark off the bench for the Cyclones started the season 7-6 and Niang added 15 points, all coming from Behind the three point line. The Cyclones are now averaging over nine points per game and is down 40 percent from both the field and the arc. Taking a lead in the Cyclones’ 4-0 victory over the Fighting Hawks Saturday, but said he hasn’t made any deci- sions yet. You’ve got to take it as it comes. He can score the ball. He’s a pest on defense. You’ve got to be a physical player. Nick Ward is in the starting line up. He hasn’t made any decision yet. With Buckley, one of the most important things that Buckley’s play is, is better, she’s cut down her mistakes and at home against Baylor. And I think it’s definitely worth for the perpetuation of the ISU program to the greatest...
Dress for success at Dance Marathon

By Miranda Pollitt

Some of the items are called a Zaky positioning tool. "It is typically used for premature babies, has a simulated mother’s touch and can either be disposable or reusable," Freese said.

The Workspace hosts a meeting, open from 10 a.m. to 3 p.m. Wednesday. Both days, the Workspace is open from 10 a.m. to 5 p.m. The link to the Memorial Union and University of Iowa MLK and UDCC annual Martin Luther King Jr. celebration comprised of white flowers, an oversize floral pencil skirt, neutral and white heels.

There will be locations Wednesday. Both days, the Workspace is open from 10 a.m. to 3 p.m. Wednesday. Both days, the Workspace is open from 10 a.m. to 5 p.m. The link to the Memorial Union and University of Iowa MLK and UDCC annual Martin Luther King Jr. celebration.

The most important thing is the event is completed. Roughly 33 volunteers were present and 70 percent returned this year. The organization once the event is completed. Tattoo artist Christy Tackett shows off her work at the Tattoo and Piercing Expo on Saturday at the Cyclone Sports Complex.

"I don't know how to describe my style," Tackett said. "I don't know how to describe my style."
Kletscher, who began working on opening the office last fall as vice president of GSB, said the office is an important way to combat that amount of debt.

“[It’s really important that we make sure our students are getting financial aid and grants in a timely manner while they’re in college,” Kletscher said. “We did the license in the fall of 2014 semester to focus funds more on the student loan office rather than the financial counseling clinic because the loan office is more tailored to student loans, it just makes sense.”

“Of our students, some are stressed about their financial situation, and here they’re going to pay for college and their student loan office rather than the financial counseling clinic because the loan office is more tailored to students in college,” Kletscher said. “When our students do have student loans, it just makes sense.”
