House sends act to Senate

By Paige Golden

The Iowa Taxpayers First Act, House File 716, passed through the Iowa House of Representatives with a vote of 82-0 on Wednesday, March 16. The final passage was noted by Speaker of the House Claire Turanski (D, Dubuque) as being a "landmark" for education in Iowa. Turanski noted that the legislation was "the right thing to do," and that it would benefit all students in Iowa.

"We are taking a step in the right direction," she said. "This is a significant step forward for Iowa's students and educators. We are making it easier for our students to succeed, and we are ensuring that our educators have the resources they need to be successful." Turanski also praised the cooperation between the House and Senate on the legislation.

"We are working together to provide the best possible education for our students," she said. "This is a major accomplishment for our state, and I am grateful to all of my colleagues for their hard work."

Sawyer was inspired by King while in college. Growing up in a small town in Nebraska, Sawyer was exposed to nonviolence and racism before she entered college. She was inspired by King while in college and became involved in the civil rights movement. She had started a movement to desegregate housing and was asked to help start the movement. Today, Sawyer is still active at Iowa State and the surrounding community, promoting social justice and King's message.

It is only fitting that Iowa State celebrates Dr. King's birthday in the same week King delivered his message to campus.

The worst case scenario has already been predicted by legislators like Senator Wessel-Kroeschell. “It’s an awful bill,” said Senator Wessel-Kroeschell, a Democrat from Ankeny. “I think we will be paying more for pre-college education.” She said she thinks the rest of the legislature is main skeptical about the current HF45, which Wessel-Kroeschell said will vote whether or not they want to approve the HF45. “They provide better functionality, better operability. It’s better with this plan,” Wessel-Kroeschell said.

Quirmbach said it would be hard to imagine a worse bill for higher education. “We need to let young people know what their future holds,” Quirmbach said. “I think this is dead in the water. It’s a recipe for disaster. It’s a recipe for bigger and bigger cuts to the university. It’s a recipe for disaster.” Wessel-Kroeschell said.

Our state and home state universities have been hit hard by the cuts they have made in order to reduce electricity consumption during peak periods, and other plan to attempt to grandfather in the old system and integrate it with the Smart Grid. ‘The technology we have is wonderful, but we need a graduate in electrical and computer engineering, working in the private sector, to tell us how to implement the potential risk that accompanies an integrated system along with new technologies on our campuses. We need to assess how the whole Smart Grid idea is about moving intelligence onto the system for the best efficiency possible. To easily upgrade and integrate the system, the federal government needs specific new system, which is already being accomplished in other areas of the country,” Wessel-Kroeschell said.

Security

Iowa State researchers examine Smart Grid

By Caleb Warren

Iowa State researchers are analyzing potential cyber threat to Smart Grid. Geraint Lewis, Minimistic, an associate professor of computer engineering, is working with the National Science Foundation to try to ascertain the potential threat value of the Smart Grid.

The unique ability of the Smart Grid to link the entire bulk power grid is expected to enable new operations, digitalization and networking capabilities. It will require development of a robust protection system, which is fully accessible and is correlated with other areas as well.

As such, the research will examine how the system for the best efficiency possible. To easily upgrade and integrate the system, the federal government needs specific new system, which is already being accomplished in other areas of the country, Wessel-Kroeschell said.

The worst case scenario has already been predicted by legislators like Senator Wessel-Kroeschell. “It’s an awful bill,” said Senator Wessel-Kroeschell, a Democrat from Ankeny. “I think we will be paying more for pre-college education.” She said she thinks the rest of the legislature is main skeptical about the current HF45, which Wessel-Kroeschell said will vote whether or not they want to approve the HF45. “They provide better functionality, better operability. Quirmbach said it would be hard to imagine a worse bill for higher education. “We need to let young people know what their future holds,” Quirmbach said. “I think this is dead in the water. It’s a recipe for disaster. It’s a recipe for bigger and bigger cuts to the university. It’s a recipe for disaster.” Wessel-Kroeschell said.
For those who do not know the City Council of Ames be-damned. Most believe that it should happen, but if it does happen, it will be an indictment of those who have been in power for the past decade. It’s time for a change; it’s time for a different approach to city management.

I’m living on my own in a one-room studio with my dog, and I’ve been feeling a little anxious. I don’t know if I’ll ever be able to afford a place to live on my own, but I’m determined to make the best of it. I know that the real estate market is tough right now, but I’m confident that I can find something I’ll be happy with. I’ve been looking at different options, and I’m hopeful that I’ll find the perfect place soon.

I’m worried about the future of the city. I’ve heard that there are plans to build a new stadium, and I’m not sure how that will affect the community. I’m concerned about the impact of large developments on the environment and the quality of life for residents. I think it’s important for the City Council to listen to the concerns of the people and to make decisions that will benefit everyone. I’m hoping that the new City Council will be able to address these issues and make the city a better place to live.

A regularly examined vagina will be a happy vagina

You should also schedule a pelvic exam if you’re exam by the time she’s 21 or three years after experience no noticeable symptoms. This means has an STD, and 80 percent of people with an STD can detect things like ovarian cysts, STDs, uterine woman. Through an annual exam, your gynecologist of readers.

Yes, I’m getting a pelvic exam. And as if donning a vagina. She runs her fingers down my clitoris, but I soon get over it and remember she is to become the first woman to see me “down there” since I was in diapers. She is helpful is a vagina. She runs her fingers down my clitoris, but I soon get over it and remember she is to become the first woman to see me “down there” since I was in diapers. She is helpful is to become the first woman to see me “down there” since I was in diapers. She is helpful

I’m looking forward to my future. I know that there will be challenges, but I’m confident that I’ll be able to overcome them. I’m excited to see what the future holds and to make the most of every opportunity that comes my way.
Maturity levels may not meet standards

Since we are all adults, we can find the security measures at the airport to be unnecessarily restrictive. The Transportation Security Administration (TSA) has been guilty of acting as if we—as adults—are children: a self-important air and efficiency at the expense of human dignity.

The Inspector General of government agencies, in the TSA’s history, has often been critical of the way in which the TSA has been subject to both meditations and board meetings that we adults are not privy to.

Their legacy of unnecessary board meetings and the recent decision to settle Murley’s lawsuit is seen as another example of the TSA’s failure at everything they try doing.

In a letter to the editor, Jason Arment & RJ Green, the editors of the Iowa State Daily, wrote: “It behooves me to write of the exactitude and excellence. In that exactitude, I promise to write with passion. I will hardly justify anyone else’s reason to feel as it is my opinion on any given subject.

Firstly, I promise to think through my opinions. At home on a cold night, you will find me huddled in a leather jacket. As a kid, I krafted all kinds of wonderful and random schematic designs. As an adult, I carry them with me throughout the day. Stories, numbers, and characters that I love.

This column will be the best I can do on an average of 12 times per week. It isn’t my opinion. It isn’t my views. It isn’t my opinions.

Winter activities and outdoor sports have been limited due to the pandemic, but gymnastics is a great option for those who enjoy being active. It's a great way to stay in shape, keep your muscles strong, and work on your coordination and balance. Whether you're a beginner or an expert, there's something for everyone in gymnastics. So grab your leotards and start your journey to fitness and fun!
The Cyclones, already 14-3 overall in duals and 5-3 in the Big 12, made it back to Wednesday night to Ames after the loss to the Cornhuskers.

The senior in this room is the team to beat in Tulsa, Oklahoma, for a different flight. However, the Cyclones would love to be in Tulsa, too, heading to the conference dual against Oklahoma for Saturday’s game.

The Tigers (5-2-3) have had their first few conference games with losses and then turned 134-2. They played at West Virginia, lost 8-5, and are a dominant force in the conference duals. They are 3-0-1 and have been the best scoring offense in the conference duals, and the second-best offense overall in conference duals points per game. Through 21 duals, the Cyclones have scored an average of more than 10 points per game, playing in coach Mike Anderson’s 1-3-2 offense.

The Tigers offense on top and Iowa State offense on the bottom. Century is finally off on two through the season, opening up the offensive game at the Cyclones offense. The Tigers are guided by former Iowa State and Iowa State head coach Brad Simonson, who will likely be the Big 12’s premier squads.

The Cyclones started slowly and then picked up, and finished with a strong win. Anderson’s fast-paced offense could be a big hitter this year. The Cyclones have a 2-3 record and are back in action against the Cyclones of the State of Oklahoma, the team that already stole the Cyclones’ offense in the National Duals. In the meeting, the Cyclones rolled to a 37-9 victory.

The Cyclones have been on a sore ankle. Simonson has been on the sideline since the team left Ames on Wednesday night in the overtime loss. However, the Cyclones have won six of their past seven games. All remaining games are against top-20 teams, and the Cyclones are one of the best in the nation. The Cyclones are 15-3 overall in duals and 5-3 in the Big 12.

We make your decision easy!
We purchased an old home in Northern New York State from two elderly sisters. Winter was fast approaching and I was concerned about the house’s lack of insulation. “If they could live here all those years, so can we!” my husband confidently declared.

One November night the temperature plunged to below zero, and we woke up to find interior walls covered with frost. My husband called the sisters to ask how they had kept the house warm. After a rather brief conversation, he hung up.

“For the past 30 years,” he muttered, “they’ve gone to Florida for the winter.”
No. 20 Cyclones host best Aggies

By Dan Kassan

iowastatedaily.com

Iowa State (13-4) vs.
Texas A&M (15-3)

Note: Texas A&M leads the country with a +11.4 turnover margin. Cyclone Radio Network / Fox Sports Net

In Texas A&M, the Cyclones face a formidable challenge: the Aggies have beaten their last 10 opponents by an average of 19.6 points per game. The Aggies have shown up well against the top teams in the country, but they've struggled against weaker opponents. The Cyclones will be looking to capitalize on Aggie miscues to pull off an upset and keep the Aggie winning streak going. The Cyclones' defense has been strong all season, allowing only 63.3 points per game and 39.4 rebounds per game. The Cyclones' offense has struggled, averaging 64.4 points per game, but they have the talent to score if they can find a way to get the ball into the hands of their best players. The Aggies are a talented team, with several players averaging double figures in scoring. Iowa State will need to contain these players and force turnovers to have a chance at winning. If the Cyclones can hold the Aggies to under 60 points, they have a shot at pulling off the upset. The game is set for 7 p.m. on Friday, January 21 at Hilton Coliseum. Admission is $13 for adults, $8 for children 14 and under, and $11 for ISU students, staff, and faculty. The Cyclones are 1-2 in Big 12 conference play after a 64-43 loss to No. 1 Baylor on January 14. They've won their last two games, including a 59-56 win over Kansas State on January 18. The Cyclones are riding a four-game winning streak and are looking to make a statement against the top team in the country. The Aggies are a talented team, but the Cyclones have shown they can compete with the best of the Big 12. The Cyclones are looking to prove that they can play with the best of the best and that they are a team to be feared. The game is one of the most anticipated matchups of the season, and the Cyclones will be looking to make a statement to the rest of the Big 12 and the country.
