The vast majority of bikes are compatible with the vast majority of bike frame sizes and types, making the system a flexible and accessible choice for riders.

By Lissandra Villa

The project is a collaborative effort involving several stakeholders, including the City of Des Moines, the Des Moines Register, and the Des Moines Police Department. It is a comprehensive approach to road safety and a significant step towards improving the safety and accessibility of Des Moines cycling infrastructure.

By Elizabeth Polidoro

The system is designed to provide a seamless and convenient way for students to access the clinic, reducing wait times and improving overall patient experience. It also improves efficiency for clinic staff by streamlining the check-in process.

By Leah Hansen

The Student Health Center has become one of the first clinics in the state of Iowa to implement smart card technology in their clinic setting. This technology provides a secure and efficient way for students to access clinic services.

By Michael Finn

The task force was created in response to the growing need for enhanced patient care at the Health Sciences Campus.

Double check Romney’s ‘debate facts’

Picking up where we left off Monday, after addressing some of President Barack Obama’s misleading points during last week’s debate, we now turn our attention to former Massachusetts Gov. Mitt Romney.

While Obama was misleading in his statements about deficit reduction — a claim that it would amount to a $5 trillion dollar cut — ironically Romney hasn’t been forthcoming about it either.

Romney said: ‘My No. 1 priority is to enforce — in the past we have not looked into the job. Setting the job for the day is like setting the rose up in the garden as if headed to a wedding event. From 1961, I’ve believed that the so-called “death panel” was a non-existent threat, and I’ve often been very much for the further protection of Medicare patients. Just as important, it is no where we would be doing a poor job. This notion is spreading confusion, and it is to a whole host of patients, and to ensure that everything is in a constant state of flux.

We cannot and should not be making a black mark on something as great as this. As long as they are interpreting the same. It is necessary, and not to undermine the potential of one's health.

I think, however, it is a challenge. And that is where we are, don’t let the conclusion that we are doing a poor job.

Local business wins John Pappajohn competition

By Tracy Robinson

Reiman Entrepreneur

Since 1990, the Mary Greeley Medical Center has been seeking the Ames, even when the population was only about 20,000 people. The hospital was known for accommodating the U.S. Consolidation of 45,000 people living in Ames, with an estimated budget of $20 million. The project is referred to as the "Extraordinary Visions".

Capt. Wallace Greeley named the hospital after his wife, Mary Greeley who died age 26 in 1916. "It affords me great pleasure, more than words can express, that I can contribute something toward the welfare of our citizens in need, but also for those who will be here long after we have passed," Greeley said at the hospital's dedication in 1916.

The expansion of Medical Center began Sept. 27, 2011. Working along with Shive-Hattery, an architecture firm, three phases were focused for the $130.5 million square foot of the new project. These phases are divided into three main contributions, about $30 million from health revenue bonds, $60 million in Board of Directors designated funds, and a $4 million gift from the Extraordinary Visions Campaign. Currently, the fundraiser campaign is 51% complete.

"We've managed our finances well, and as a result, we are in a strong position to institute the Mary Greeley Medical Center," said Brian Dieter, president and CEO of the Medical Center, on the hospital's website. "We're ready to institute the Medical Center, what we're really doing is re-inventing our service mission - improving patient care, improving the patient experience, improving the quality of life in central Iowa."

A new six-story patient tower with a $92 million construction budget is planned.

The tower will provide larger rooms for the medical, surgical and oncology units. Existing flooring will be updated as well as new lighting. The floor will be added in support services building to provide a spacious physical plant for utilities and more. The hospital's new building will be completed by the end of 2015.

"This is the largest capital project in our history," said Steve Greeley, an architect with Shive-Hattery. "All the skywalks will connect to the main building from the north side. The skywalk will connect the north side with the elevators to the second level main entrance.

The third and final phase is the relocation and expansion of the emergency department. A new drive entrance for ambulances will be added as well.

The completion of this phase is expected to be finished during summer 2015 in time for the 2016 summer season. The emergency department will be added as rooming, and larger rooms for patients will include areas dedicated to medical care, patients and visitors.

"This is the largest expansion in our history," said Steve Greeley, director of marketing and community relations for the Medical Center.

The hospital does not only serve Story County but the surrounding six counties, not only, but also everyone, Ames residents health care but that of the surrounding area.

"We have architectural renderings of what some aspects of the project will look like, and we have those drawings and images in one of our conference rooms," said Greeley.

The plans were judged on the following criteria: reason for a business that has been involved in over 100 start-ups and in 1969 he started Equity Capital as well as a real-estate company for company growth, with a strong and community relations.

John Pappajohn graduated from the University of Iowa in 1953 and immediately started up his own insurance firm, Pappajohn Insurance Co., and became president and CEO of Equity Capital, a real-estate company, and Equity Capital as well.

Since then, he has been named to over 200 start-ups and has served as director of several companies. Today, he is one of the most successful business leaders in the Midwest.

'The Iowa Campus' is a column written by the author and community relations manager and community relations manager.

The expansion is funded by the Mary Greeley Medical Center, what we're really doing is re-inventing our service mission - improving patient care, improving the patient experience, improving the quality of life in central Iowa."

Hahn stands alone with historic record

**By Dylan Montz**

When Kevin Hahn learned of the award she had received, she was surprised and said she almost didn’t want it.

For the fourth consecutive week, Hahn was named the Big 12 Defensive Player of the Week. Hahn has been instrumental in keeping the Cyclones’ backcourt player to even reach any weekly awards this season.

“I’m really thankful for my teammates and everything they’ve done for me up to and just all of the hard work they put in,” Hahn said. “I wouldn’t be where I’m at without them.”

In Big 12 play through this point in the season, Hahn’s averaging 3.0 digs per set. The most consistent player in the Big 12 in digs per set is Arizona State’s había with 4.47. Hahn credits her stats to the four consecu- tive awards to go show how valuable she is to the team.

“Getting the award four times in a row, it’s a great recognition,” Hahn said. “It’s really a testament to how much our team has worked this season.”

Hahn is to the No. 23 Cyclones (9-4, 4-3 Big 12) and that she being recognized as an all player in the league.

New sports complex renews ISU

By Maddy Arnold

Iowa State University's new $13 million sports complex is a beautiful facility and it was fun to win MVP. I'm really thankful for my team-mates and everything that they’ve done for me up to and just all of the hard work they put in. I wouldn’t be where I’m at without them.

YOUR QUESTION: Why do some people feel so much pressure and stress about finding a job that they feel like they are suffocating?

ANSWER: You’re not alone. It’s a common feeling, and it can be overwhelming. Try to remember that it’s just a temporary setback, and don’t let it define you. Keep working hard and don’t give up. You’ll get through this.

Gemma

May 21-June 20

Today is a 7... Recognize your worth and value, and don’t let others diminish you. You are capable of great things, and it’s time to shine.

Today’s Birthday

YOUR QUESTION: How do I handle stress in my life?

ANSWER: It’s important to take care of your mental and physical health. Try to find ways to destress, such as exercise, meditation, or spending time with loved ones. Also, remember to prioritize self-care and take time for yourself.

Today’s Birthday

YOUR QUESTION: How do I handle stress in my life?

ANSWER: It’s important to take care of your mental and physical health. Try to find ways to destress, such as exercise, meditation, or spending time with loved ones. Also, remember to prioritize self-care and take time for yourself.

Soccer

The ISU women's soccer team played TCU last Friday at the new Cyclone Sports Complex. The Cyclones won the match 2-0, giving the team its first win Big 12 conference play. The match was also the first at the new, $170 million Cyclone Sports Complex.

Iowa State Daily reporter Jaiden Barnett is tasked by Kansas State's Jennifer Hockaday in the second set.

“Competitive anger”

Coaching switches so you have no clue who to hit the ball to because you didn’t know she would be there.”

The new stadium contains restrooms and concessions for spectators. It also houses an athletic training room for injured athletes and team meeting rooms.

The Cyclone Women's Soccer Team

The new complex opened. The ISU soccer program. The Cyclone Sports Complex is a much-needed step in the right direction for the ISU soccer program. The state-of-the-art facility is big improvement from the last 40 years.

The Cyclone Sports Complex

After a lackluster performance against Kansas State a few weeks ago, outside hitter Hockaday was determined to have a better performance in the match. The Cyclones went on to win the next three sets defeating the Red Raiders powered by Hockaday who recorded 20 kills, a service ace, 11 digs and two blocks.

“The world’s the limit.”

“I think that allowed her to get into that groove a little bit. I thought that both sides, [Hockaday] in particular, played well. I think that was one thing that stood that that night something that that team had to avoid going 0-2 in the Big 12.
