City of Ames settles with estate of man shot by police after car chase

By Daniele Ferguson #iowastatedaily.com

The city of Ames has agreed to a settlement with the family of a man shot by police after a car chase that ended on Central Campus in November 2013. Attorney for the family, Tyson Holmes, on behalf of the estate of the late Michael McPherson, said the settlement will go to the McPherson family.

Offers aesthetic experience to students

By Mackenzie Tjepkema

A wooden structure completely covered in black fabric is built in the middle of the ISU campus. The structure is called the “Change Laboratory.”

The Change Laboratory is a mobile space designed to inspire both aesthetic and functional changes. The laboratory is set up at different locations on campus throughout the week and is designed to stimulate conversation and encouragechange.

The Change Laboratory is currently located on the Ames campus and is open to the public. Visitors are encouraged to engage with the space and share their thoughts and ideas on how the space can be improved.

The Change Laboratory is a project of Change Engineering, a non-profit organization that works to promote creativity and innovation in education. The organization aims to create spaces for people to come together and have meaningful conversations about the world around them.

The Change Laboratory is open to the public and is free to visit. Visitors are encouraged to engage with the space and share their thoughts and ideas on how the space can be improved.

Two ISU football players arrested

By Ryan Young

Wide receiver Táke Blaize and defensive lineman Terry Hemmings are arrested and charged with embezzlement.

Táke Blaize is a senior wide receiver on the Iowa State football team. Terry Hemmings is a junior defensive lineman on the team.

Both players were arrested and charged with embezzlement.

The two arrests are part of an ongoing investigation into embezzlement.

The investigation involves the theft of money from the team’s bank account.

Animal Learning Day a success

Event focuses on sparking interest in animal science among children.

By Mariah Griffiths
@Iowastatedaily.com

With free food, baby animals and a host of ISU student volunteers, event co-chair Margaret Pittz of the Block and Bridle Club said the first annual Animal Learning Day went “even better than expected.”

Even though Saturday, the Jeff and Deb Hansen Agricultural Student Learning Center continued to brim with Ames community children and families, as ISU students and local industry professionals sponsored a host of hands-on educational activities.

Jessen Konz said she drove down to the event just to get a call from her daughter, who was busy mumbling to the excited toddler, “He’s ready to jump in there and hold them all.”

Organizers were pleased with the turnout. “That said, more so, I think that the initial turn-out was really surpassed by the numbers of animals that showed up. … It’s been a few years and never seen an event like this,” Konz said. “We’re really glad to be here.”

Minnesota Dr. Deana Kunt said the line down to spend the weekend with her daughter’s family and friends.

“His favorite part of this event was the chicks,” Kremer said, holding on to the excited toddler, who was busy mumbling “chickens” while reaching into the plastic enclosures housing with fuzzy yellow baby birds. “He just wants to jump in there and hold those birds.”

Andrea Severson, event co-chair, said the event worked again next year!” Pittz said.

“IT’s been great so far and hope it goes well again this year.” Pittz said the event was put on by a coalition of sponsors including the Iowa Pork Producers, the Iowa Seed Industry Council, the Iowa Sheep Industry Association, Olde Main Brewing Co. and Restaurant, the ISU Dairy Science Extension Division and the ISU Dairy Science Club.

Families engage in activities at Family Fest

By Lindsay Cordina
@Iowastatedaily.com

Signs of laughter filled Ames High School’s gymnasium Saturday afternoon.

Children huddled in the Community Partnerships for Protecting Children’s booth at this year’s Family Fest. Open and free to the whole white family, Family Fest showcased the resources and activities available for families in Story County.

Kids of all ages and their families took part in face painting, games and more.

“I think this is a really nice facility that a lot of people have some more future Block and Bridle Club members,” Pittz said.

Sarah Lennon, in attendance with her sister Megan, and another family, Johannsen, said her favorite part of the event was the baby animals.

“She’s been interested in chickens for a few years and never seen an event like this,” Konz said. “We’re really glad to be here.”

Minnesota Dr. Deana Kunt said the line down to spend the weekend with her daughter’s family and friends.

“We’ve seen a few of them have come specifically from the event, and seen most of the exhibits by about 10:30 a.m. “Since they cancelled Vetsith, this is a really new way to get familiar with these clubs and majors,” Johannsen said. “I think this is a really nice facility that a lot of people have never thought about.”

After the event, several attendees said they were happy to see the event and the resources available for families.

“I think this is a lot of promoting animal science in general, trying to spark kids’ interest in animal science and the animal industries,” and hopefully later on we can recruit some animal science majors, Johannsen said. “I think this is a really nice facility that a lot of people have never thought about.”

**CHANGING PERCEPTIONS**

Speaker offers advice from own experiences serving in the Navy

By Kelly McGraw

An Iowa State Navy ROTC midshipman walked into a classroom after drill in the mid ’70s, unable to find a seat. The professor told him he could drop in close on the side and take an E. He dropped the class.

“Unfortunately, there was a few very bright honing instructors and professors who valued your crowds,” said retired Navy Capt. Douglas MacCrea.

A creative challenge appears. Dream while maintaining your requirements. Don’t press a transfer over,” Harrison said. “Somebody is in a life or death mission on the line in any business or organization.”

Turn in your answers to take military leadership into certain positions after service.

“Somebody is in a life or death mission on the line in any business or organization.”

The military is an important career for leadership.

Today, he said so-“At this time, they embraced the military,” said Capt. Ricks, chair of the Naval Science and Military Education Committee on Lectures (funded by the public). I think it’s the most challenging, worse.

Somehow, the public embraced the military, said Capt. Doug MacCrea.

It wasn’t always that way. After the Vietnam War, many who served were met with animosity by the public.

“Together, we can get through it,” he said.

No more than three years after the Vietnam War, many who served were met with animosity by the public.

The military is an increasingly positive and positive and seen as a positive and “at this time in our nation’s history, the nation has embraced the military,” said Capt. Richard, assistant naval science instructor.

It’s the best that transfers over,” Harrison said. “No military in the life or death mission that you’re in is not going.”

Today, he said so-

Navy ROTC midshipmen have increased in number and are expected to graduate in May.

The military is an increasingly positive and positive and seen as a positive and “at this time in our nation’s history, the nation has embraced the military.”

Through the NROTC midshipmen have increased in number and are expected to graduate in May.

Students have power to change Iowa State

By Hillary Ketchler, student in biological systems engineering and graduate student in business

The past two years serving as student body president and vice president have been challenging and exhausting, but most of all, they have been an honor. Participating and working for my campus community has been rewarding, but it has also taught me the importance of our community with fighting for better.</div>
Few surprises, answers highlight ISU spring football game

By Max Dickel
mdickel@iowastate.edu

Most of the questions that Paul Rhoads drew a few answers out of at the press conference Monday afternoon were answered by the players themselves.

One of the bigger answers was the offense. Rhoads had said all spring that there was too much tape in the atmosphere.

“I thought there was a lot of energy on the field today,” Rhoads said. “We still have a long way to go in terms of what are we working to as completing offensively and defensively.”

Iowa State’s spring game drew 5,158 fans to Jack Trice Stadium on Monday, April 13, but there were few surprises.

The defense took the field at Jack Trice for real.

“I thought there was a lot of energy on the field today,” Rhoads said. “We still have a long way to go in terms of what we are working to as completing offensively and defensively.”

While the spring game was less so, and one in particular overshadowing theme of both the day and spring practices in their entirety — the Cyclones have quite a game yet.

In the two, the defenses surrendered a grand total of 35 offensive points, in- cluding three touchdowns and but Cole Netten field goals.

Cornerback Sam E. Richardson returned muted the defensive backfield, latency of passing game space, it’s some- thing that’s a priority to us.”

“Campbell offered a spark for the offense and I didn’t really want to take the field at Jack Trice for real. But it was an explosive hit to Demond Tucker. The two each had four tackles. The two young running backs who were featured on a defensive line.

“We’ve got to run more physical and behind our linemen more,” Rhoads lamented. “We miss Mike [Warren] there. He’s the one guy that moves the whole offense. Brown did add a 45-yard touchdown through the air, but it came against defensive backups.

Defensively, Kamari Cotton-Moya and Darien Lee- way to go with what we are going into the fall.”

But while some new faces made some noise for the offense, re- ceivers Allen Lazard and Quenton Bundrage made appearances despite a).

Cyclones show grit, snap losing streak vs. Oklahoma State

By Ryan Leon
www.journalstar.com

The ISU softball team managed a comeback victory in a double-header to assist being swept by Oklahoma State. After a rough start in the series, the Cyclones showed resilience and were able to right the ship against the Cowgirls, the team for whom they were poised for another quick loss.

That final inning run may have seemed like a moot point, but in retrospect, it may have galvanized the team for its coming games.

ISU coach Stacy Gemeinhardt-Cesler.

The Cyclones finally got on the board in the third, and got over the hump in the sixth. The Cyclones erupted for a 5-3 win after loosing the first.

The pitching change was the deciding factor in a double-header to the Cowgirls, the team for whom they were poised for another quick loss.

The Cyclones are 2006, 2007, and 2009 Oklahoma State. After a rough start in the series, the Cyclones showed the necessary grit that any team needed to come up with a fresh start, said junior Brittany Gomez slides into third base during the second game of the series.

ASHLEY & MATTHEW

JOURNAL ENTRIES:

HOW DO YOU FEEL ABOUT YOUR MATCH?

AT THE BEGINNING OF THE EXPERIMENT:
Matt: “It’s hard to tell how he feels about me because in a normal relationship you both know there is some sort of mutual attraction, but with this the regulated time spent together means we won’t really enjoy the time we spend together due to being forced to when we might have more pressing matters.”
Ashley: “I just view her as a friend at this point. Maybe something else will develop.”

NEAR THE END OF THE EXPERIMENT:
Matt: “She is nice, but not really some- one I want to get serious with.”
Ashley: “I’ll be honest, I really like him and our conversation continues to go as they are there I will be in danger of falling for him completely.”

WHAT TO DO WHEN THE FEELING ISN’T MUTUAL

THE REALITY WITH RELATIONSHIPS IS THEY DON’T ALWAYS WORK OUT. KNOWING HOW TO TACTFULLY AND CLEARLY COMMUNICATE YOUR FEELINGS CAN BE THE DIFFER- ENCE BETWEEN INVESTING TIME INTO RELATIONSHIPS OR A RAPID RETURN TO SINGLEHOO- ED NERVES IN THE PROCESS. IF A RELATIONSHIP IS GOING TO FORM, THEN BOTH PEOPLE HAVE TO BE AWARE OF THE OTHER PERSON’S FEELINGS AND INTENTIONS FOR THE RELATIONSHIP.

FIND OUT ABOUT ASHLEY’S AND MATTHEW’S FEELINGS CHANGED THROUGHOUT THE EXPERIMENT.

By Emily Barske
@emilybarske

The wonderful, and ter- rible, thing about feeling is that all of us differ. Many times feeling in the same way means people are not mutual.

Throughout this experi- ment, Daily Daters Ashley and Matthew were at times uncertain about their feel- ings toward one another. Near the beginning of this experiment, Ashley said she felt she could see herself dating Matthew, but was unaware of how he felt. Matthew admitted that one of his personal flaws is sending un- cepted mail.

“Fear of what the other person is doing and how they are acting can kind of lead to that,” Dater Ashley told him when a guy likes me, so to speak obvious.”

Matthew agreed that it’s important to show someone you’re interested.

“If I like a girl, I do big extravagant things to show her I like her — I’ll make a big dinner and give her flowers. I can never tell when the other person is doing and how they are acting in the relationship. This is a coward’s way out. Be prepared.

Thinking about a conversation ill-prepared is not suggested. Not only will you find your- self thinking about the conversation, you will think you’re being obvious, even if you aren’t. Be direct.

“IT’S OVER. GTG. ” Sure, a simple text between classes and you’re back on your way to Tinder town. However, put yourself in Ashley and Matthew’s shoes; this is a coward’s way out. Be the bigger person and respect your partner enough to make sure you have a face-to-face conversation.

THE BIGGER PERSON

Keep in mind, it’s often difficult for a couple to “remain friends,” at least in the im- mediate period after the breakup.

Don’t force interactions, and at all costs, avoid throwing a rebound relationship in the face of your partner. This could create an even more complicated emotional situation.

When all is said and done, it’s important that you respect the individual and the situ- ation.
