A current issue of this magazine requires months of intensive planning and exten-
sive training. "We train 2 to 3 times a week, doing things like hill running, cardio train-
ing, biking and weightlifting," said Wickert. Why do some people seem to be able to learn the factors involved in running a university. He also cites his many years as a faculty member as how he understands higher education.

President John Wintersteen and ISU President Steven Leath were also unavailable for comment. Wickert said, "The college has 7,000 students, which is larger than the population in Iowa. We would like to see the university get more control in relationships with the students and alumni.

Manderscheid was selected as a candidate, "I am honored to be selected as a candidate," he said. "I have spent six years as professor and chairman of the department of mathematics at the University of Iowa. Wickert said. "The college has 7,000 students, which is larger than the population in Iowa. We would like to see the university get more control in relationships with the students and alumni.

Cyclones track and field team sets out on their busy weekend of three different meets in the state.

Ihmels said that when he took over (the position) that I would target the meets that I knew we would get good competition and good weather in. Iowa State (has) a really good facility, "San Francisco and California. We are probably on the coast every single weekend.

That is something that you give the kids the opportunity to run in good weather and with good fields and great coaches."

Birdsong also noted in almost centre sun that they as in California for the three different competitions with vans going three different directions and training in three different places.

Birdsong said that trips in the mountains of California can be hectic, but said it was a good experience for him.

"That's not easy," Birdsong said. "But I think that the kids get to see what it's like and how that is going to be through the season.

Birdsong also said that this meet is going to be a true test.

"It's a great competition," Birdsong said. "It's going to be a true test."

The Mt. SAC Relays is the first stop on Saturday, [and] our 4x400[-meter] relay. We have such a busy weekend right before the Mt. SAC Relays for week in the country, but we could not be more excited with the Mt. SAC Relays this year.

During the weekend before the Drake Relays, Birdsong said it is important to have such a busy weekend right before the Drake Relays for week in the country. But I'm really looking forward to getting to California for the track and field season.

With a confident state of mind, Wiens talked specifically about the competition that will be at the Mt. SAC Relays this weekend and that he is not worried his runners will not perform.

"We're up against some front teams," Wiens said. "This is a great opportunity to see how we can do against some of those teams and what we can do against some of those teams.

We're going to have a little bit of pressure, we need to learn to play under pressure and don't just let them slide by us as much."

## Preparation still needed for ISU

Cyclones' momentum sets them up for the week.

By Michael Schmitt

Going into the last two meets of the regular season, the Iowa State track and field team is preparing for Texas Tech and before this weekend.

"The team really is not doing much differently in terms of preparing for the meets. We're just really focused on making sure we find our short form again, and USOC welcome Marie-Christine Chartier. "There is a right time to go that's going to change at this point."

(iowastatedaily.com)

#### Track and field

By Dylan Montz

The Bryan Clay Invitational will take place this weekend ahead.

ISU freshman Alec Bollman will run the 800 and 1,500-meter in California.

"It's a great trip for us," Ihmels said. "We're going to have a lot of fun."

ISU freshman Alec Bollman will run the 800 and 1,500-meter in California.

Competitions at Mt. SAC began on Thursday afternoon and will run through Saturday in Walnut, Calif. The Bryan Clay Invitational will be Friday in Arizona, Calif. and the Beach Invitational will be Saturday in Coronado, Calif.

A photo from a previous year

Women get multiple heats to race all runners.

By Stephen Koenigfeld

As the ISU women's track and field teams net out on their busy weekend of three different meets in the state, the ISU women's track and field team sets out on their busy weekend of three different meets in the state.

The Mt. SAC Relays in Walnut, Calif.

The Mt. SAC Relays is the first stop on Saturday, and our 4x400[-meter] relay. We have such a busy weekend right before the Mt. SAC Relays for week in the country, but we could not be more excited with the Mt. SAC Relays this year.

During the weekend before the Drake Relays, Birdsong said it is important to have such a busy weekend right before the August meets for week in the country, but we could not be more excited with the Mt. SAC Relays this year.

"A lot of the kids are going to get to see those opportunities," Birdsong said. "It's one of those opportunities that hard-core runners can come out of it."

Sport's note: Women said he is not concerned with what heats his other teammates are going to be placed in the relay this weekend.

With a confident state of mind, Wiens said the weekend is going to be a true test.

"We have such a busy weekend right before the Mt. SAC Relays for week in the country, but we could not be more excited with the Mt. SAC Relays this year.

**CREATING A FAMILY IN “RENT”**

Heather Smith, senior in performing arts and music, and drama major, will perform at a campus-scale rehearsal of “RENT” on April 10 at Fisher Theater.

**By Patty Clark**

Christian Peterson’s “larger-than-life” plastic human panthers will be viewed for the first time at Iowa State during the Veishea 2012 parade.

The panthers, created by Peterson, are two sculptures that were created by Peterson in his earlier years before coming to Iowa State. They originally sat on two columns in front of the Student Union. When the columns were removed and the statue was placed in storage, the university saw an opportunity to bring the panthers back to campus.

A search for the panthers was conducted by Karen Gysel, assistant professor of ceramics and sculpture at Iowa State.

“I have been searching for the panthers for a few years,” said Gysel. “When they were found at Iowa State, I thought they would be a great addition to the university’s collection of art.”

The panthers arrived at Iowa State on Monday, and are now creating a “lot of noise” around campus.

The panthers will be displayed on a specially built float during the Veishea parade.

**Music**

**Kimya Dawson**

Singer-songwriter Kimya Dawson does not see retirement as much as she is an artist mother, but she is taking a few breaks from touring to spend some time with her family. The New York-based performer will be at Fisher Theatre Thursday. Dawson generally makes her set list the day of the show, and she and her husband, filmmaker Ryan Logan, also a favorite in the Ames area, were recently married.

Kimya’s visit to Ames would be “like a mini-tour,” Logan said. “She’s a great songwriter and known as a wonderful performer.”

It follows a group of friends over the course of a year, as they experience love, loss, separation and ways to survive the artist’s struggle.

The Moldy Peaches.

Dawson said she was especially excited to work with him to schedule a show reminiscent of her first tour of Ames between big venues in Minneapolis and Madison, Wis.

Dawson’s work has been featured in various films, most notably “Juno,” earning her national acclaim.

In addition, she has collaborated with artists like Aesop Rock, They Might Be Giants and The Mountain Goats.

The Moldy Peaches.

Dawson is known for her 10” single with Atmosphere music group on Record Store Day, this Saturday.

She will also be releasing a limited edition colorfully painted pallets.”

Mahlon Darlington
By Olivia Gard
Ames247 Writer

Mahlon Darlington has been involved in the Ames music scene for the past 36 years. He has been the founder of the Ames Piano Quartet, the resident chamber music ensemble, has performed internationally and recorded 14 CDs. Darlington is retiring after 36 years of service, and a reception for him will be Wednesday from 4 to 5 p.m. in the Music Hall Lobby.

Q: What have you learned from the students you instruct?
A: I’m always looking to increase my idea of how to teach certain types of things, not just the music but the techniques, and sometimes I find a student will come up with a new idea about the way of playing or thinking that I think is very interesting.

Q: What have you learned from your Ames Piano Quartet colleagues?
A: There’s an extended family. It’s like any family that you have. I suppose it’s like being a student in a diversity of ways, because we’re all different. I can learn from them. It’s that kind of thing. It’s the only way I know how.

Q: What are your plans after retirement?
A: I always look to increase my knowledge and discover new pieces that haven’t been played around the world. We’ve recorded incredible looks for all of our CDs. We made 14 CDs, and that’s a lot of music when you figure there may be close to 70 minutes on a CD.

Q: What has been the most rewarding part of being in Ames Piano Quartet?
A: Part of it is that it’s given us a chance to not just be teachers here but also a group that has received some acclaim. We’ve been told many times that we’re the most recorded piano quartet in the music world. We’ve received incredible looks for all of our CDs. We made 14 CDs, and that’s a lot of music when you figure there may be close to 70 minutes on a CD.

One of the most rewarding things has been to perform the back of the literature and discover new pieces that we haven’t performed before. And if that’s enough to bring in, we’re very, very, very happy. To bring new pieces that we feel are good, and if you can bring in new things, that’s the way of looking at something, and I’ll say, “Oh, this is a good piece that I’ve never heard before.” And I think it’s the way of thinking that I have always had.

Q: What are your plans after retirement?
A: I’m always looking to increase my idea of how to teach certain types of things, not just the music but the techniques. Sometimes I find a student will come up with a new idea about the way of playing or thinking that I think is very interesting. That’s one of the most rewarding things.

Q: What are you working on these days?
A: That dog that I have, Clara the labradoodle, is in a therapy program. She is going to become a therapy dog. I’ll take her when she’s given the okay, it might not be until fall. Probably some volunteer-type of things, I want to do some traveling.

Q: How do you think you’ve changed over the years?
A: You know a student who would make a good interview profile?
Let us know at Ames247@iowastatedaily.com

Amherst Sherlock, the communications coordinator for University Museums explained that though people think that the panthers were not going to be revealed until Saturday, it’s hard to avoid discussion about the panthers. “The installation of the Petersen panthers to the Art Museum turf and the spot allows them to put on Campus Collection right outside of Morrill Hall,” said Sherlock. “The panthers will be on display from 1:00 p.m. Saturday, and the audience will be able to visit and take pictures.”

Though people walking on campus can see them now, they are not surprised to see the sculptures already placed in the permanent spot yet. Because the panthers are installed single, they are not used to see the site prepared for Saturday so the installation is quick and simple. “I think one of the sculptures needed to be carved more so it can properly fit into the alcove,” said Sherlock. The sculptures are covered every night throughout the week to protect them from any sort of damage.

Allison Sherlock, the communications coordinator for University Museums explained that though people think that the panthers were not going to be revealed until Saturday, it’s hard to avoid discussion about the panthers. “The installation of the Petersen panthers to the Art Museum turf and the spot allows them to put on Campus Collection right outside of Morrill Hall,” said Sherlock. “The panthers will be on display from 1:00 p.m. Saturday, and the audience will be able to visit and take pictures.”

The sculptures are covered every night throughout the week to protect them from any sort of damage.
Modified and organic crops can coexist in agriculture

By Elizabeth Polsdofer

The future of the agriculture industry as well as discussions on how commercial farming can coexist with farms that use genetically modified crops were on the table at the Agricultural Biotechnology, Emerging Technologies and Conferences Conference. The conference was held on Wednesday at the Gateway Conference Center in Mars. The conference included sessions from the organic and traditional farming industries, regulation leaders and prominent researchers.

Among those attending were organizers of the biotechnology research and education project for the Center for Social in the Public Interest, a non-profit organization in DC that focuses on education regarding the agricultural and animal industries.

“When I come to Iowa State, I like to find out how people understand their properties as well as what information they have,” Ahn said. “It’s tricky, there is a policy perspective...”

With professors in agronomy and an active research team, the Future Food Systems Institute provided education for a lay audience and was tailored to discussable issues.

“The state of Iowa where there is production of genetically modified crops that do no good is a problem of all the nations,” Ahn said.

With the rapid advancement in the biotechnology as a challenge because the rate at which regulations policies are change much faster than the advances in biotechnology.

“India is getting into a competition that is going on in the world,” he noted.

“There’s a lot of new information on that, some that is coming out now and that is interesting if we want to do something...” Jaffe said that although policy makers about what the genome is, it is generally not do so quick that the way it’s regulated. “We need to make the right decision on that,” he added.

Jaffe said that rapid advancement in the biotechnology is future transportation, for which the public needs to know more.

“Now we need to know the precautions that we need to take,” Jaffe said.

**Daily Horoscope**

**Scorpio** (Oct. 23-Nov. 21): A romantic phase begins so be ready. Focus on your loved one's needs. It's a great day to be intimate. The stars are shining for you and your special someone.

**Aries** (March 21-April 19): Let love infuse your spirit. Contribute to you or others. It's another group activity that beckons. New studies in a degree or exercise ritual? Maybe. Take advantage. You're in your happy zone.

**Taurus** (April 20-May 20): Check results and celebrate! Check your data before taking any action. You'll need to do something new.

**Gemini** (May 21-June 20): Today is an 8 -- Cancer (June 22-July 22): Career takes off like a rocket. One's encouragement, your hunch could be profitable. New studies in a degree or exercise ritual? Maybe. Take advantage. You're in your happy zone.

**Leo** (July 23-Aug. 22): Today is a 6 -- Virgo (Aug. 23-Sept. 22): Education could be a little while, new opportunities may be served. New studies in a degree or exercise ritual? Maybe. Take advantage. You're in your happy zone.

**Libra** (Sept. 23-Oct. 22): Today is a 6 -- Libra (Sept. 23-Oct. 22): A romantic phase begins so be ready. Focus on your loved one's needs. It's a great day to be intimate. The stars are shining for you and your special someone.

**Sagittarius** (Nov. 22-Dec. 21): Focus on your loved one's needs. It's a great day to be intimate. The stars are shining for you and your special someone.

**Capricorn** (Dec. 22-Jan. 19): Today is an 8 -- Aquarius (Jan. 20-Feb. 18): Today is a 9 -- Pisces (Feb. 19-March 20): Today is an 8 --
