Agriculture still growing

By Charles O'Brien

The agricultural sector of Iowa's economy has been the fastest-growing industry 2002, especially in agricultural production.

David Swenson, an associate scientist in the Department of Economics for the College of Agriculture, published a report on Saturday comparing economic data from 2002 to 2011, with an emphasis on the agricultural sector. He said the report is useful to the gross domestic product GDP in the wake of a country's overall output of goods and services at market prices excluding income from abroad.

The report revealed that the agricultural production portion of Iowa's economy has grown 15 percent, and the agriculture-related manufacturing sector has grown 16 percent within that same time.

The entire economy grew 12 percent from 2002 to 2011.

Swenson said, "We are growing faster than other states."

From 2002 to 2011, the state of Iowa saw even more significant growth in GDP for agricultural production, the number of workers in that sector grew a decrease of 672 jobs.

Agricultural manufacturing, however, have an increase of 1,071 jobs from 2002 to 2011.

By 2002, 1,155,800 jobs of Iowa's 1,071 million jobs were tied to agricultural production, while agriculture-re- related manufacturing accounted for 11,695 jobs.

From 2002 to 2011, the state of Iowa saw an increase of 1071 jobs in agricultural production and an increase in Iowa manufacturing in the state of Iowa.

Common alcohol mix more risky

By Baily McGrath

Drinking diet pop in less than regular pop when mixed with alcohol results in higher blood al- cohol levels, a recent study shows.

The research done by the Department of Alcohol at the University of Adelaide in Australia found that regular mixers take longer to empty the stomach than regular pop and are open to the public.

The stomach then absorbs the alcohol into the bloodstream. Thus, they move across the wall into the bloodstream and then, in our body. The study showed that regular mixers take longer to empty the stomach than regular pop and are open to the public.

The study showed that regular mixers take longer to empty the stomach than regular pop and are open to the public.

Agriculture and health

Yang Li, a research scientist with the Department of Biochemistry and Molecular Biology at Iowa State University, has been named a GSB fellow in the University of California, San Francisco’s “Agriculture and Health” program. The program is designed to foster innovative research that seeks to improve human health and well-being through the production and consumption of foods. Li’s research focuses on the role of diet and nutrition in the prevention and treatment of chronic diseases, such as cancer and diabetes.

Li has been studying the relationship between diet and health, particularly the role of dietary fiber. Her research has shown that consuming enough fiber can help to lower the risk of heart disease, type 2 diabetes, and certain types of cancer.

Li’s work has also focused on the role of probiotics in promoting gut health. She has found that certain types of probiotics can help to improve gut health and reduce the risk of certain infections.

Li’s research has been presented at numerous conferences and published in top-tier journals. She has also received several awards and grants for her work, including a grant from the National Institutes of Health.

Li’s appointment as a GSB fellow will allow her to work closely with other researchers at UC San Francisco and to access the university’s resources and facilities. She will also have the opportunity to collaborate with other researchers on projects related to the role of diet and health.

Li is excited about the opportunity to work with other researchers at UC San Francisco and to contribute to the field of agricultural and human health.

“I am thrilled to be a part of this exciting initiative,” Li said. “I look forward to working with my colleagues at UC San Francisco and to contributing to the understanding of how diet and nutrition can improve human health.”
C-SPAN features Iowa State class

History lecture recorded for network programming

By Zoe Woods
@iowastatedaily.com

The Old-School Public Affairs Network, or C-SPAN, filmed a lecture presented by Professor Steffen Schmidt on Friday.

C-SPAN was created in 1979 and provides programming on political affairs, 24 hours a day. The channel is seen in more than 100 million homes worldwide.

Throughout the semester, a few students participated with questions and answers during Schmidt’s lecture. Schmidt spent a lot of time in Iowa covering presidential politics and has interviewed Schmidt, a political science professor for different stories.

“We thought that he was an engaging speaker and that he would be good for the series,” Russell Logan, producer at C-SPAN said.

“The series we are filming is called Lectures in History, and professor Schmidt gave his lecture on the history of political parties. This will air as part of our American History TV programming.”

Schmidt was excited about the opportunity to share his class with C-SPAN.

“It’s a really big honor, because very few professors and very few universities actually are asked if they would be interested in the whole class,” Schmidt said.

“This event would be positive publicity for the LAS college, the political science department and the university as well,” Schmidt said.

Schmidt spent more than a week preparing for C-SPAN to film his lecture. He wanted to make his lecture “really exciting for an audience.”

This is a once-in-a-lifetime opportunity for me and the college, it’s not going to happen again,” Schmidt said.

C-SPAN does not have a specific date as to when his lecture will air on their network.

“Once we know a date and time, we will post the information on the Iowa State website and share the details through social media,” Angie Hunt, communications specialist for the Iowa State University.

“Once we know a date and time, we will post the information on the Iowa State website and share the details through social media,” Angie Hunt, communications specialist for the Iowa State University, said.

“This may not be the last time C-SPAN stops by the university.

“Iowa State has some great history professors, so we certainly would love to come back again at some point in the future,” Logan said.

Lectures in History series information

About 135 classes have been taped so far in this lecture series.

150 will be taped by the end of this semester.

Lectures from coast to coast have been taped.

From the University of Washington to Harvard University in Boston.

From the University of Michigan to Florida State University.

Atmosphere in class was amazing, and very few universities actually have professors who have interviewed politicians, Schmidt said. The university will make every effort to make the audience aware of the lecture.

“Taped lectures are an opportunity to make his lecture ‘really exciting for an audience.”

The camera crew filmed the lecture in the National Swine Research Information Center.

Professor Steffen Schmidt answers students’ questions about political parties toward the end of his lecture. C-SPAN filmed the lecture in the National Swine Research Information Center building on Friday.

Schmidt believes the lecture being featured during network programming will provide positive publicity for the political science department, as well as Iowa State.

This is a once-in-a-lifetime opportunity for me and the college, it’s not going to happen again,” Schmidt said.

C-SPAN does not have a specific date as to when his lecture will air on their network.

Companies offering funding for patents

With the adoption of a new model in support of grinding universities, state and the University of Iowa, com-
panies who offer research funding for patents will have the option at the beginning of their relationship to
renounce the right to any or all invention disclosures and joint maintenance and ownership in such
inventions, subject only to the rights of invention as otherwise provided by law. This
option can impact on future partnerships, as it does not necessarily indicate an end to
research efforts in the area.

The Iowa State University is one of the most active

HBO original series of Thrones is the one of the most production-continuous shows to date. On demand streaming sits among the top options for viewers who cannot have their schedule around television show times, as opposed to networks, which don't offer the same amount of flexibility.

Piracy

Television has endured massive changes throughout its history. One of the largest changes occurred during
the advent of the internet, where the proliferation of web and the creation of Netflix, Hulu, and similar services has
enabled people of smaller means to enjoy the latest TV shows from the comfort of their homes, all for a fraction
of the cost. However, the rise of piracy, which includes unauthorized copying and sharing of copyrighted works,
has had a significant impact on the entertainment industry. The music, film, and television industries have been
affected by piracy, which includes unauthorized copying and sharing of copyrighted works, for decades. However,
the rise of piracy, which includes unauthorized copying and sharing of copyrighted works, has had a significant impact on the entertainment industry.

Albert Cameron, the founder of the Iowa State University, stated in his 1858 inaugural address: “The
All Universities are offered the same opportunity to contribute to the world's progress. The
University of Iowa and the University of Illinois are among the institutions that have
been successful in developing research partnerships with major corporations. These
partnerships have helped to create new markets and opportunities for the
universities and their students. However, the rise of piracy, which includes unauthorized copying and sharing of copyrighted works, has had a significant impact on the entertainment industry.

Iowa State Daily: Iowan Daily

HBO blind to fans’ wants

With the advent of digital services, such as Netflix and
Hulu, viewers have more flexibility in when and where
they watch their favorite shows. However, with this
flexibility comes the issue of piracy. The entertainment
industry has struggled to keep up with the rise of
unauthorized copying and sharing of copyrighted works,
which has had a significant impact on the industry.

Travel

A recent study conducted by the University of Iowa
found that students who study abroad for one
or more semesters are more likely to develop
greater cultural awareness and a broader
understanding of different societies and
cultures. The study also found that students who
study abroad are more likely to develop
leadership skills and to be more open to new
ideas and experiences. However, the rise of piracy, which includes unauthorized copying and sharing of copyrighted works, has had a significant impact on the entertainment industry.

Haley Grove is a sophomore in English. She enjoys watching TV shows and
reading about popular culture. She has a particular interest in 
the Dark Hedges, the rustic sites of western Iowa, and
the Mississippi River or visiting the Everglades. She is interested in
the New World has millions of miles of
historical sites that show that all of the
world's cultures and civilizations are
connected. She is also interested in
the 

centuries of human civilization that will
take place in the fall of 2013. She

McKinley Fristed

with the rise of piracy, which includes unauthorized copying and sharing of copyrighted works, has had a significant impact on the entertainment industry.

HBO seems to be taking the wrong approach to piracy. A recent story in the New York Times revealed that
HBO’s response to piracy has been ineffective and has done little to stop the downloading of its shows. The
industry has struggled to keep up with the rise of unauthorized copying and sharing of copyrighted works,
which has had a significant impact on the industry.

US offers plenty of opportunities

The United States is home to some of the world’s
most innovative companies, including Google,
Apple, and Amazon. These companies have
helped to shape the modern world and have
made significant contributions to science,
technology, and innovation. The United States
also offers a large pool of talent and resources,
which can be leveraged to create new
products and technologies. However, the rise of piracy, which includes unauthorized copying and sharing of copyrighted works, has had a significant impact on the entertainment industry.

Michael Belding, editor in chief

Fernandez gives up ski poles for golf holes

By Alex Gozin
@iowastatedaily.com

Almost 2-year-old Scott Fernandez learned to ski at a young age. He was half the size of most people’s skis but significantly more talented than his age suggested.

It all started in southern Spain where his father, Fermin, worked and played as a professional golfer in the mid-90s. Scott Fernandez was not like most 2-year-olds. In Granada, Spain, it was not uncommon to see school children and adults trying out new slopes and one small toddler was Scott Fernandez, a boy who was barely 2 and a half years old when he was up on skis.

Student made hard decision to develop golf instead of skiing

By Alex Gozin
@iowastatedaily.com

When Melvin Ejim chose to enroll at Iowa State, basketball was the inevitable focus of his decision.

That mindset has slightly changed for Ejim since his freshman year. While the focus remains constant, the second time around the tables is much different.

He’s everything that a student-athlete should be. He’s the reason he made the list. Ejim also took the inaugural award for the Big 12 Scholar-Athlete of the Year.

He has improved his academic focus since his freshman year. While the junior forward continues to contribute heavily on the court, the accolades stemming from the classroom have added another dimension to his performance.

Ejim has a 3.74 GPA while majoring in history in his junior year. He was named to both the Big 12 and AP Academic Teams this season.

Monday night, Iowa State got its third chance to face the best team in the country, Baylor in the Big 12 Championship game. The Bears dominated the Cyclones’ evening, winning 75-47.

Baylor showed why it is so difficult to finish second in the Big 12.

The Cyclones’ evening was one taken by surprise. On Monday night, Ejim’s name could be found on the All-Big 12 team. But on Sunday, second half at least.

Baylor guard Brittney Griner had a dominating presence around the basket, scoring 35 points and grabbing 11 rebounds.

When Melvin Ejim chose to enroll at Iowa State, basketball was the inevitable focus of his decision.

One shot that could sum up the Cyclones’ evening was one taken by center Brittney Griner.

Scott Fernandez was born near Madrid, Spain. As a child, he became interested in skiing and developed his golf skills at a young age. Fernandez decided to focus on golf instead of skiing, making it a difficult decision.

Fernandez facts

- Professional golfer
- Won a U.S. Amateur title in 2013
- His left hand is amputated

By age 13, Fernandez was one of the best skiers in Spain. He was selected to the Spanish National Team. For Fernandez, this offer was not an easy one to refuse. The second weekend he was asked to go to Madrid to race, he was then selected as one of two skiers in Spain to race for the national championship. It was a tough decision for me,” Fernandez said.

“I really liked both sports. They were pretty much the same value for me for either one. I could imagine myself in both and I think I made a good choice.”

Chipping away

While attending school in Madrid, Fernandez saw improvement in his golf game. Launching balls into the national spotlight. Before anyone could doubt his desire to play golf, he was selected to the Spanish National Team. While stepping foot on Iowa’s campus, Fernandez was named as the No. 2 player under 30 in college golf.

“I first learned about him from Royce Votta, who was already on the team here in Iowa State. I received a call,” said ISU coach Andy Talk. "Looking at his video, his game is consistent and he's got a great swing. I could see that he was definitely somebody we needed on our team the next year."

Iowa’s campus, Fernandez became one of five golfers selected to Spanish National Team. When Fernandez turned 15, he was told that the school, only able to make it," Fernandez said.

“Of course I [make it],” Niang said.

“Of course I [make it],” Niang said.

For Niang, academics are harder. "Academics is always tough because you have all that work to do on the road and you have to get Niang to his morning class on time," Ceron said. "That is one thing ISU freshman forward Georges Niang has learned during his first season.

That is one thing ISU freshman forward Georges Niang has learned during his first season.

"I think it going to last a lot of records while I'm still here. But I'm not certain to have to use my best choices in Iowa State history so far and still do it."

Complete the grid so each row, column and 3-by-3 box (in bold borders) contains every number 1 through 9 in a single row, column or box.

**Horoscope**

by Linda C. Black

**Aries** (March 21-April 19) Today is an 8 — For about six weeks, focus on personal development, as energetic Mars is in your sign. The next few days should be especially active and fun.

**Taurus** (April 20-May 20) Today is a 7 — The time is ripe to clean house and create new space for opportunities. If you’re gearing up for a move, these days are great. Clean closets, garages and attics.

**Gemini** (May 21-June 20) Today is an 8 — You’re more friendly than you realized. Treasure them. With Mars in your sign, help your team find opportunities and advance. Together, it’s possible.

**Cancer** (June 21-July 22) Today is a 9 — You’ll be listed for the next couple of days. There’s nothing to fear, your team’s hot. Fire energy into your sister (or brother) from today onward. Approve a new project.

**Leo** (July 23-Aug. 22) Today is an 8 — Be bold. Be the call of the wild and launch your next adventure. You have a bit to explore. By now you know what you truly want. Go for it.

**Virgo** (Aug. 23-Sept. 22) Today is a 7 — Handle financial matters today and tomorrow, and make plans for the future. Use your curiosity to create this innovative process, yourself. Don’t feel a windfall slip through your fingers. Action is required.

**Libra** (Sept. 23-Oct. 22) Today is an 8 — Mars enters your 3rd house this week, so new places, travel and people make your list. It’s a good time to get a massage or treatment.

**Scorpio** (Oct. 23-Nov. 21) Today is a 9 — Today and tomorrow, you’re in super creative work mode. Seek more direction, work faster and make more money. There’s a boost in energy. Concentrate on a new assignment. You’re hot.

**Sagittarius** (Nov. 22-Dec. 21) Today is a 10 — Make long-term plans with someone you love. The excellent success. With Mars in Aries, give in to your passion. Success is in your reaches.

**Capricorn** (Dec. 22-Jan. 19) Today is an 8 — Your heart is at home, Come up with a plan to fix everything in the house. Emotions could be high. Exert your will to improve living conditions.

**Aquarius** (Jan. 20-Feb. 18) Today is a 7 — You’re spurried into action with renewed energy. Take what you need to know in order to make a desired change. Study the facts to get to the bottom line.

**Pisces** (March 21-Apr. 19) Today is an 8 — Self-expression and work grows. Make sure you can express your new ideas. Devote yourself to a passion. Be ready for the next huge expense or choice.
By T.J. Elbert, junior in marketing, and Kuntal Barhate, graduate student in systems engineering and a shopper at Pammel.

“T.J. called me and shared his idea with me,” said Dhruv Malik, a contact at Pammel. “We talked about the merits and demerits of the idea. We decided to try to buy back the product, and from where I sit, it looks like a great idea.”

“We were across Frederiksen Hall when we first opened six years ago, we moved to where we are today,” Manci said.

“They have most products that I need, but there are a few items that they do not have, but I can go to other stores for them.”

“Pammel is a place of communication and a center for ideas between people,” said Malik. “If you need something that is not in stock, we will try to get it for you.”

When he first opened, there were no breathalyzers and half international students.

“T.J. thought of his idea,” Manci said. “He worked in the area for a month and a half, after that period, he decided to try to buy back the product.”

“Anybody can go to Pammel. We don’t have an international student limit. It is known for variety.”

The store is filled with fresh foods from many different countries. Products are in stock which appeal to the Indian, Middle Eastern, Pakistani, Turkish, Italian, South and Central American, and Eastern European communities.

As stated on the Pammel Grocery website, they serve many communities, including the Indian, Middle Eastern, Pakistani, Turkish, African, Asian, and Central and Eastern European communities.

“We have been in the same place. We were across Frederiksen Hall when we first opened six years ago, we moved to where we are today,” Manci said.

“I have my locker at the university, but most of the business comes from word of mouth. We don’t have everything, but most of the business comes from advertising in the newspapers. Including the Hamilton County paper, advertising in the newspapers is limited.”

Although they don’t have everything, they drive home: “Pammel Grocery is not promoted with a large amount of advertising. Graduate student Kuntal Barhate heard of the store by this method. As stated on the Pammel Grocery website, they serve many communities, including the Indian, Middle Eastern, Pakistani, Turkish, African, Asian, and Central and Eastern European communities.

“The current students in the new dorms where they can shop to give the local student a chance to support us.”

“The Cave” and “The other friends” to see what their friend had. Then, Elbert decided to try to buy back the product, and from where I sit, it looks like a great idea.”

“We talked about the merits and demerits of the idea. We decided to try to buy back the product, and from where I sit, it looks like a great idea.”

“The Cave” is known for variety.
